4333	12034319	برنامج مقترح قائم على التعلم الإلكتروني وأثره على تنمية بعض مهارات التفكير الناقد لدى تلاميذ المرحلة الإعدادية =	أحمد، خالد عبيد علي أحمد.	2012		بعد طلاب الجامعه من اكثر الفئات في المجتمع عرضه للاصابه بالعديد من الاضطرابات والمشكلات النفسية والاجتماعيه وذلك لانهم يمرون بمرحلة من التحديات والتغيرات والتي لابد ان يتجاوزوها لتحقيق لتوافق النفسي والانفعالي. تكونت عينه الدراسه من 200 طالب وطالبه من طلاب كليتي التربية والاداب بأسوان وقد استخدم اسلوب الهازم للذات وبرنامج الارشاد العقلاني الانفعالي لتخفيف حده السلوك الهازم للذات لدى شباب الجامعه. وقد استخدم المنهج شبه التجريبي واسفرت نتائج الدراسه عن وجود فروق في ذات دلالة احصائية بين الذكور والاناث من الطلاب في متوسطات درجات السلوك الهازم للذات لصالح الاناث ووجود فروق ذات دلالة احصائية بين متوسطات درجات افراد المجموعه الارشادية على مقياس السلوك الهازم للذات في القياسين القبلي والبعدي في اتجاه البرنامج الارشادي. وعدم وجود فروق ذات دلالة احصائية بين متوسطى درجات المجموعه الارشادية على مقياس السلوك الهازم للذات في القياسين القبلي والبعدي. تهدف الدراسة: إلى التعرف على مدى فاعلية الإرشاد الأسرى في خفض الاكتئاب وقلق الارتكاس لدى الأبناء المرضى بالمرض التخاطبى ، ولقد تكونت العينة:من أربعة فئات من مرضى التخاطب : الأولى مرضى الصوت : تلقوا جلسات العلاج التخاطبية،والثانية مرضى الصوت: تلقوا جلسات العلاج التخاطبية وتلقت أمهاتهم برنامج للعلاج الأسرى،والثالثة مرضى التلعثم:تلقوا جلسات العلاج التخاطبية،والرابعة مرضى التلعثم: تلقوا جلسات العلاج التخاطبية وتلقت أمهاتهم برنامج للعلاج الأسرى. أما أهم أدوات الدراسة فهي : قائمة بيك للاكتئاب ، ومقياس قلق الارتكاس وبرنامجي الإرشاد الأسرى الأول والثاني لأمهات مرضى التخاطب (مرض الصوت والتلعثم) إعداد : الباحث . أما عن أهم النتائج فهي : توجد فروق بين متوسطى درجات الأبناء المرضى بمرض الصوت (اللذين تلقوا علاج تخاطب ، واللذين تلقوا علاج - تخاطب وتلقت أمهاتهم علاج أسرى) فى الاكتئاب وقلق الارتكاس . توجد فروق بين متوسطى درجات الانباء المرضى بمرض التلعثم (اللذين تلقوا علاج تخاطب ، واللذين تلقوا علاج - تخاطب وتلقت أمهاتهم علاج أسرى) فى الاكتئاب وقلق الارتكاس. لاحظت الباحثة من خلال احتكاكها بطلاب وطالباتها الجامعة (كليات جامعة جنوب الوادى بأسوان) فى أثناء ترحدها على كليات الجامعة كباحثة أن طلاب الجامعة يعانون من مشكلات نفسية عديدة وخاصة السلوكيات الهازمة للذات كرويتهم للعالم المحيط وواقعهم بأنه مولى وأنهم فاشلون وأن مستقبلهم ممتلئ بالمعاذب والمعاناة والشعور بالذنب والخزى ورفض محاولات الآخرين للمساعدة ، والتدخين عند الضيق والإيمان والانسحاب وقت المنافسة والخوف من النجاح وغيرها فهم يقومون بسلوكيات تسبب لهم الضرر .والأذى وتعوقهم عن أداء مهامهم المطلوبة بالشكل المناسب فهم عاجزون عن تركيز ذواتهم مع أن لديهم القدرات، لذلك فقد هدفت الباحثة من البحث الحالي إلى عمل برنامج إرشادى عقلانى انفعالى لخفض حدة السلوك الهازم للذات لدى عينة من طلاب الجامعة وتمثلت فروض الدراسة في توجد فروق ذات دلالة إحصائية بين متوسطات درجات طلاب الأقسام الأدبية ومتوسطات درجات طلاب الأقسام العلمية على مقياس السلوك الهازم للذات في اتجاه طلبة الأقسام الأدبية، توجد فروق ذات دلالة إحصائية بين الذكور والإناث من الطلاب في متوسطات درجات السلوك الهازم للذات، توجد فروق ذات دلالة إحصائية بين متوسطات درجات أفراد المجموعة الإرشادية على مقياس السلوك الهازم للذات في القياسين القبلي والبعدي في اتجاه البرنامج الإرشادى، لا توجد فروق ذات دلالة إحصائية بين متوسط درجات المجموعة الإرشادية على مقياس السلوك الهازم للذات في القياسين القبلي والبعدي . وقد تكونت عينة الدراسة من (200) طالب وطالبة من طلاب كليتى التربية والآداب بأسوان، وقد استخدم مقياس السلوك الهازم للذات، البرنامج الإرشادى العقلانى الانفعالى لتخفيف حدة السلوك الهازم للذات لدى الشباب الجامعى إعداد الباحثة. وقد استخدم المنهج شبه التجريبي. وأسفرت نتائج الدراسة عن وجود فروق ذات دلالة إحصائية بين متوسطات درجات طلاب الأقسام الأدبية ومتوسطات درجات طلاب الأقسام العلمية على مقياس السلوك الهازم للذات في اتجاه طلبة الأقسام الأدبية، وجود فروق ذات دلالة إحصائية بين الذكور والإناث من الطلاب في متوسطات درجات السلوك الهازم للذات لصالح الإناث، وجود فروق ذات دلالة إحصائية بين متوسطات درجات أفراد المجموعة الإرشادية على مقياس السلوك الهازم للذات في القياسين القبلي والبعدي في اتجاه البرنامج الإرشادى، عدم وجود فروق ذات دلالة إحصائية بين متوسطى درجات المجموعه

[illegible]

							وتوصلت الدراسة إلى عدة نتائج يُمثل أهمها في الآتي :-
						2012	يتوقف مستوى كفاءة سوق الأوراق المالية بالدرجة الأولى على مدى توافر المعلومات المحاسبية وتمثلاتها لجميع المتعاملين بالسوق، وكذلك على مدى فهم وإستيعاب المتعاملين للمعلومات المتاحة، حيث تُعد المعلومات المحاسبية شريان الحياة لأسواق الأوراق المالية القوية وبالتالي فإن عدم توافرها سيؤدي إلى ضعف وإنهيار أسواق الأوراق المالية. يعد زيادة إنتشار عدم تماثل المعلومات المحاسبية بين المتعاملين في الأسواق المالية من أهم وأخطر المشكلات التي تواجه سوق الأوراق المالية المصري وتهدد كفاءته، وخاصة في ظل ما تشهده الشركات التي تتداول أسهمها بسوق الأوراق المالية من انفصال الملكية عن الإدارة وسيادة فرضية أساسية لنظرية الوكالة وهي تعارض المصالح بين أطراف الوكالة وهم الإدارة والملاك. زيادة مستوى عدم تماثل المعلومات المحاسبية في سوق الأوراق المالية يؤدي إلى أضرار جسيمة بسوق الأوراق المالية -3 والتي منها إنخفاض أحجام تداول الأسهم وعدد عمليات تداول الأسهم وإرتفاع مدى أسعار الأسهم، وبالتالي إرتفاع تكلفة التمويل وإنخفاض درجة السيولة، الأمر الذي يضعف من كفاءة سوق الأوراق المالية في جذب الأموال لتوجيهها للاستثمارات اللازمة لتحقيق معدلات التنمية الاقتصادية المستهدفة.
4338	12036020		قياس آثار عدم تماثل المعلومات المحاسبية على كفاءة سوق الأوراق المالية المصري :	خليفة، محمد يوسف عبدالرحيم.			يُمثل الهدف الأساسي للدراسة في التعرف على مدى فعالية جودة معايير المحاسبة المصرية الصادرة بالقرار الوزاري رقم (243) لسنة 2006م وذلك من خلال قياس منفعة المعلومات المحاسبية الناتجة عن تطبيق تلك المعايير في الفترة السابقة واللاحقة لتطبيق تلك المعايير المحاسبية، ولتحقيق ذلك تناولت الدراسة الجوانب التالية :- 1- جودة المعايير المحاسبية. 2- المعايير المحاسبية وكفاءة سوق الأوراق المالية. 3- إستخدام مدخل منفعة المعلومات المحاسبية في تقييم جودة المعايير المحاسبية. 4- إجراء دراسة تطبيقية لتقييم جودة معايير المحاسبة المصرية الصادرة بالقرار الوزاري رقم (243) لسنة 2006م. وتوصلت الدراسة إلى عدة نتائج، أهمها:- أن معايير المحاسبة المصرية الصادرة بالقرار الوزاري رقم (243) لسنة 2006م تسهم في تحسين منفعة المعلومات المحاسبية في الفترة اللاحقة لتطبيق المعايير المحاسبية، مما يعتبر مؤشرا على جودة تلك المعايير المحاسبية وقد هدف البحث إلى تقديم حلول عملية مناسبة تساعد على تحقيق المنافسة الاقتصادية في الأسواق المالية من خلال تصميم برنامج يمكن إستخدامه في تقييم جودة بعض المنتجات في صناعة الملابس الجاهزة للربط بين مواصفات المعمل وتتبع مراحل التصنيع للمنتج، وتحديد العوامل المؤثرة على نسبة الجودة المحققة. ثم وضع البرنامج وحددت المعايير المستخدمة في التقييم، ووضعت نسب مئوية لهذه المعايير مع تحديد العيوب التي سيتم تقييم الجودة من خلالها، وكيفية قياس كل عيب مع حساب نسبة الجودة المحققة، مع وضع نظام للقبول والرفض، حيث يتميز البرنامج بالمرونة وإمكانية تغيير أو إضافة معايير جديدة حسب طلب المعمل.
4339	12036052		تقييم جودة معايير المحاسبة المصرية من منظور سوق الأوراق المالية :	أحمد، محمد عزام عبدالمجيد.		2012	يهدف البحث إلى التعرف على فاعلية استراتيجية التعلم التعاوني في تنمية قيم المسئولية الاجتماعية لدى تلاميذ المرحلة الإعدادية من خلال تدريس مادة الدراسات الاجتماعية.ويقدم البحث نموذجاً لتدريس الدراسات الاجتماعية باستخدام استراتيجية التعلم التعاوني يساعد على تنمية قيم المسئولية الاجتماعية.
4340	12036116		فاعلية استراتيجية التعلم التعاوني في تدريس الدراسات الاجتماعية لتنمية الوعي بقيم المسئولية لدى تلاميذ المرحلة الإعدادية/	مأمون، أميره معوض بركات.		2012	تشهد التربية الخاصة في جميع دول العالم تغيرات جذرية نحو الأشخاص ذوي الاحتياجات الخاصة حيث كانت تسود في العقود الماضية نظرات نحو ذوي الاحتياجات الخاصة على أنهم مختلفين عن غيرهم ويجب عزلهم عن المجتمع في ملاجئ ومراكز خاصة وفي السنوات الأخيرة تغيرت هذه النظرة ومن أهم مؤثراتها المطالبه بالعمل على دمج ذوي الاحتياجات الخاصة في المدارس العادية وفي المجتمع أسوة بقرانهم العاديين. يمكن صياغة مشكلة الدراسة في تساؤل عام ينبثق منه عدة تساؤلات فرعية كالآتي: التساؤل العام: ما مدى فاعلية الدمج الشامل في تنمية مهارات التفاعل الاجتماعي وتقليل سلوك إيذاء الذات لدى عينة من الأطفال التوحيدين؟ التساؤلات الفرعية: هل يؤدي الدمج الشامل في المدرسة العادية إلى تنمية مهارات التفاعل الاجتماعي لدى عينة من الأطفال التوحيدين؟ 1- هل يؤدي الدمج الشامل في المدرسة العادية إلى تقليل سلوك إيذاء الذات لدى عينة من الأطفال التوحيدين؟ 2- أهداف الدراسة: تهدف هذه الدراسة إلى تقييم دور الدمج الشامل ومعرفة كيفية تأثيره في تنمية بعض مهارات التفاعل الاجتماعي وتقليل سلوك إيذاء الذات لدى عينة من الأطفال التوحيدين، خلال تواجدهم في هذا البرنامج. أهمية الدراسة: محاولة التوصل إلى أفضل الآليات لتنفيذ الدمج الشامل بشكل أكثر فاعلية مع الأطفال التوحيدين - محاولة مساعدة معلمي الفصل ومدرسي الدعم في كيفية التعامل مع الطفل التوحيدي، خلال برنامج الدمج الشامل عن طريق تقديم أساليب قائمة على فنيات العلاج السلوكي فروض الدراسة: توجد فروق دالة إحصائية بين القياس القبلي والقياس البعدي لمهارات التفاعل الاجتماعي لدى عينة الدراسة لصالح القياس البعدي. توجد فروق دالة إحصائية بين القياس القبلي والقياس البعدي لسلوك إيذاء الذات لدى عينة الدراسة لصالح القياس البعدي
4341	12036150		فعالية برنامج ارشادي في تعديل اتجاهات التلاميذ غير المعاقين وأولياء امورهم نحو الدمج الشامل لذوي الاحتياجات الخاصة في مدارس التعليم العام/	صادق، نورا تاج الدين جعفر.		2012	أسباب إختيار الموضوع :- تتعدد أسباب إختيار الطالب لمنطقة الدراسة ويمكن أن نذكر منها :- سرعة التغيرات التي طرأت على مجرى النيل بمرور الزمن بظهور أشكال جيومورفولوجية جديدة وإختفاء أخرى -1 وزيادة نشاط النهر في عملياته المختلفة بالمنطقة. محاولة الإستفادة من الأشكال، التي تصاحب تطوّر مجرى النيل، كالجزر النيلية والرّوس الإرسابية -2 توفر بعض الدراسات التي يمكن أن تساعد الطالب في دراسته ومنها معلومات جيولوجية وهيدروlogية بالإضافة إلى -3 توفر بعض الخرائط والمرئيات الفضائية إمكانية العمل الميدانية بسبب قرب مكان منطقة الدراسة بالنسبة للطالب ومعيشتة للمنطقة عن قرب -4 أهداف الدراسة :- تهدف الدراسة الحالية إلى :- 1- العمق في دراسة الأشكال الجيومورفولوجية بمنطقة الدراسة -1 2- دراسة تتبّع التغيرات المعاصرة لوادي النيل لفترة من الزمن -2 3- محاولة رسم خرائط حديثة متتابعة لمنطقة الدراسة لمعرفة وتتبع التغيرات -3 4- وضع تصور مستقبلي عام لوادي النيل منطقة الدراسة بناء على الوضع الحالي -4 ومن نتائج الدراسة :- تتّك منطقة الدراسة فيما بين أسوان والأقصر بطول 252 كم، يتعرّج المجرى في 8 ثنيات متفاوتة الأبعاد والخصائص -1 والمجرى عالي التشعب لكثرة الجزر خاصة في الجنوب، والسهل الفيضي يتدرّج في مساحاته فيختفي جنوبا ويزداد اتساعا شمالا ويتّرامي في سهل كوم أمبو يرجع الفضل للنهر في إبراز الخصائص الطبوغرافية العامة للمنطقة، حيث تبين أن هناك إتجاه عام للإنتحارات على -2 سطح المجرى بالإتجاه من الجنوب إلى الشمال، ومن الشرق إلى الغرب

						أثر بناء السد العالي على التغيرات في الخصائص الطبيعية لمجرى النيل بالمنطقة من حيث زيادة طول المجرى -3 الرينسى، وتناقص عرضه في بعض القطاعات، وإنكماش مساحة المسطح المائي. تأثرت الخصائص الجيومورفولوجية للجزر النهرية بعد بناء السد العالي، وقد ظهر ذلك واضحا في حدوث تغيرات 4 معاصرة في الجزر النهرية مكانيا، من حيث انضمام بعض الجزر بإحدى ضفتي المجرى، أو نشأة جزر حديثة، أو التحام جزيرتين أو أكثر في جزيرة واحدة، مثل التحام جزيرتي العبل، العوايد، في جزيرة واحدة تعرف باسم كيما المطاعة 2011 تعد السياحة الدينية ظاهرة اجتماعية منذ القدم، ونمطا من أنماط السياحة التي تثار حاليا، عالية من الدولة، وتتمثل هذه العلية في التشريعات الخاصة بتنظيم إحتفالياتها المختلفة، وكذلك المؤسسات القائمة على الإهتمام بالمزارات، ومنها المؤسسات الدينية والثقافية والسياحية، حيث تأخذ السياحة الدينية شكلين، هما الشكل الديني الذي يتمثل في سياحة التأمل الروحي، في زيارة المزارات الدينية الأثرية، والشكل الإقتصادي، حيث تعد منطقة المزارات الدينية مراكز لترويج السلع والمنتجات، سواء في أثناء الزيارات العادية، أو أثناء الإحتفالات الدينية (المولد)، ومواسم الأعياد. وتسعى الدراسة إلى عدة أهداف – تعد محاور أساسية في دراسة موضوع السياحة الدينية بإقليم جنوب الوادي- وهي:- التعرف على إمكانات إقليم جنوب الوادي، المتمثلة في المزارات الدينية، وتنوعها التاريخي والديني، وتوزيعها 1- الجغرافي، وكيفية إستغلالها، وتوظيفها، كمورد ديني وإقتصادي برصد الحركة السياحية لهذه المزارات الدينية، ودراسة خصائصها، بهدف معرفة نمطها، سواء داخلية أو دولية -2 ودوافع الزيارات ومنتها، والخصائص الديموجرافية للزائرين، من حيث أعمارهم وأنواعهم ودينتهم، وكذلك حالتهم الاجتماعية والإقتصادية، وما يترتب عليها من إنفاق سياحي، ودخل إقتصادي، بالإضافة إلى دراسة التطور الحجمي للزوار ومعدلات نمو الزائرين، مع دراسة خصائص الرحلة إلى المزارات الدينية، ومصادر الحركة محاوله التعرف على تأثير السياحة الدينية، على التواحي الاجتماعية للسكان والعمران، بالإقليم، وكذلك التواحي 3- الإقتصادية، كالأسواق المقترنة بالموالد، والنخل، والإتفاق السياحي، والخدمات المتوفرة لجذب الزائرين إستخلاص نتائج بحثية، تفيد الهيئات المعنية بالسياحة والآثار، بعرض إمكانات الإقليم الدينية ومشكلاتها، ومحاوله إقتراح 4- حلول لها، لتطوير المسياحة الدينية ومزاراتها، وتوظيفها كمورد إقتصادي، يدر دخلا للوطن، ومحافظة الإقليم تنقسم الدراسة إلى ستة فصول، مسبوقة بمقدمة، ومنتهية بخاتمة بها أبرز النتائج والتوصيات، كما تشمل (59) جدولا إحصائيا لعناصر الدراسة، و (59) خريطة وشكلا بيانيا، و(107) صورة فوتوغرافية، لإبراز وتوضيح جوانب مختلفة من عناصر موضوع البحث، وتعتمد دراسة الفصول على مناهج وأساليب بحثية مختلفة، لإظهار نقاط الضعف والقوة، في موضوع الدراسة.
4342	12036175	التغيرات الجيومورفولوجية المعاصرة لوادي النيل فيما بين أسوان والأقصر :	دندراوي، محمد الراوي.			
						الفترة الزمنية لهذه الدراسة ذات اهمية لانها شهدت استمرار العلاقات الجيدة بين الولايات المتحدة الأمريكية وايران ولانها توضح السياسة التي اتبعتها امريكا لتتأسي النموذ الأمريكى فى ايران . الفترة الزمنية لهذه الدراسة من ١٩٥٣ إلى ١٩٧٩ ، والتي تعتبر حدود - الدراسة ذات أهمية لأنها شهدت استمرار العلاقات الجيدة بين الولايات المتحدة الأمريكية وايران . تتبعث أهمية هذه الفترة لأنها توضح السياسة التي اتبعتها أمريكا - لتتأسي النموذ الأمريكى فى ايران . وكالة المخابرات Central Intelligence Agency CIA - دور ال المركزية في إسقاط أي حكومة مناهضة للغرب من خلال تجنيد عمالها الداخليين بالتعاون مع المخابرات البريطانية ، وتنصيب الحكومات الموالية لها . استخدام أمريكا سياسة الأحلاف ، ومعاهدات الدفاع المشترك ، للتصدي - للخطر الشيوعي المزعوم ، وتوطيد نفوذها في المنطقة . بلغت قوة العلاقة بين البلدين في هذه الفترة إلى درجة اعتبرت الولايات - المتحدة الأمريكية إيران شريكة لها في الوقوف ضد الأطماع السوفيتية في إيران ، واعتبرت أمريكا إيران حليف استراتيجي قوي في هذه الفترة ، لرعاية المصالح الأمريكية في المنطقة . توضيح السياسة الخارجية التي اتبعها الشاه ، والتي اعتمدت تمامًا على - الولايات المتحدة الأمريكية وإسرائيل ،
4344	12037056	العلاقات السياسية الأمريكية الإيرانية من 1953-1979/	سيد، نهى فكرى.			نتيجة للتطورات التي حدثت في مجالات المعلومات وظهور ثورات المعلومات المختلفة من حواسيب واتصالات، بالإضافة إلى الزيادة الهائلة في كم المعلومات المتاحة، كل ذلك تسبب في الكشف عن ما يعرف "بالأمية المعلوماتية information illiteracy" وهي إفتقاد الفرد والمجتمع للمهارات والخبرات اللازمة لتحقيق الإستثمار الأمثل لموارد المعلومات. فلم يعد الأمي ذلك الفرد الذي لا يجيد القراءة والكتابة، بل أصبح الأمي من لا يستطيع التعلم ولا يمتلك القدرة على تداول المعلومات وإستخدامها والإفادة منها، ومن هنا تشكلت ظاهرة الوعي المعلوماتي information literacy، فالمستقبل لمن يملك قدرأ كبيراً من المعلومات القادر على الحصول عليها وتقييمها وإستخدامها لتساعده في إتخاذ القرار المناسب في الوقت المناسب. وتتمثل مشكلة الدراسة في انخفاض الوعي المعلوماتي لدى طلاب المرحلة الجامعية الأولى بجامعة جنوب الوادي بقا، وعدم قدرتهم على تحديد إحتياجاتهم من المعلومات، وعدم قدرتهم على الوصول إلى المعلومات المطلوبة، فضلاً عن عدم قدرتهم على تقييم المعلومات وإستخدامها بكفاءة في الغرض الذي جمعت من أجله، لذا سعت الدراسة إلى الكشف عن الواقع الفعلي لمهارات الوعي المعلوماتي لدى طلاب المرحلة الجامعية الأولى بجامعة جنوب الوادي فرع قنا، لوضع برنامج تدريبي مقترح لإكساب طلاب المرحلة الجامعية الأولى مهارات الوعي المعلوماتية. وقد اعتمدت الباحثة على المنهج الميداني لدراسة واقع الوعي المعلوماتي لدى الطلاب، مستخدمة في ذلك الإستبيان بوصفه الأداة الرئيسية في البحوث الميدانية، وتقترض الدراسة وجود علاقة ذات دلالة إحصائية بين متغيرات (التخصص،النوع ومحل الإقامة)ومهارات الوعي المعلوماتي. وإشتملت الدراسة فضلاً عن المقدمة والملاحق على أربعة فصول، تتناول الفصل الأول الإطار النظري للوعي المعلوماتي، أما الفصل الثاني فقد تناول واقع مهارات الوعي المعلوماتي لدى طلاب المرحلة الجامعية الأولى بالجامعة، وفي الفصل الثالث ناقشت الباحثة علاقة مهارات الوعي المعلوماتي بمتغيرات الدراسة، أما الفصل الرابع فحاولت الباحثة من خلاله إقتراح برنامج لرفع كفاءة الوعي المعلوماتي لدى طلاب الجامعة. وخلصت الدراسة إلى مجموعة من النتائج منها:- هو بول زروكوسكى رئيس جمعية صناعة المعلومات، وذلك في information literacy أن أول من استخدم مصطلح • إقتراحه المقدم للجنة القومية الأمريكية لتحسين التعليم وجود نقص في مهارات الطلاب في استخدام أنواع مصادر المعلومات المختلفة، وذلك راجع إلى عدم توافر برامج الإعلام • البليوجرافي بمكتبات الجامعة إنخفاض مؤشر توافر مهارات الوعي المعلوماتي لدى الطلاب بمتوسط حسابي بلغ 2.99 وهو متوسط منخفض، مما • يستدعى تقديم برنامج تدريبي لرفع كفاءة الوعي المعلوماتي لدى الطلاب بالجامعة، وهو ما حاولت الباحثة وضع تصور له

						، أن متغيرات الدراسة لم تؤثر على مهارة بعينها، وإنما كان هناك تأثير لبعض المتغيرات على بعض جوانب هذه المهارات • كما إنحدمت العلاقة في بعض الأحيان بين متغيرات الدراسة ومهارات الوعي المعلوماتي لدى طلاب المرحلة الجامعية الأولى.
4345	12041065	الوعي المعلوماتي لدى طلاب المرحلة الجامعية الأولى بجامعة جنوب الوادي بقنا :	علي، زينب علي بكري.		2012	تشعني هذه الدراسة الى التعرف على الدور الذي تقوم به وكالات العلاقات العامة لتطوير النشاط الاتصالي والتسويقي في مصر والتي تشمل اهم الانشطة التي تقوم بها عينه من وكالات العلاقات العامة العمله في مصر ونوعيه عملانه ودرجه تعاون العملاء مع الوكالات ومدى رضاه العملاء عن هذا التعاون والأنشطة المقدمة واسس اختيار العملاء لوكالاتهم ومدى ادراك وكالات العلاقات العامة وعملانها لمفهوم الاتصالات التسويقيه ودوافع الاتجاه نحو تلك الاتصالات وايضاً الدور الأملئ الذي يجب ان تقوم به الوكالات لتطوير النشاط الاتصالي والتسويقي بها والمعوقات التي تواجه الوكالات وعملانها والمقترحات لحلها. تؤذي العلاقات العامة دور ا حيوي ا في حياتنا ، فهي دائماً موجودة بيننا حيث يتم استخدامها بشكل مستمر وهذا دون إدراك منا بذلك غالباً ، ويكون هذا الاستخدام في أشكال مختلفة اعتمادا على احتياجاتنا الخاصة في تلك اللحظة، وإذا ما تم استخدامها بشكل مناسب، فيمكن ان الفرد الحصول على معلومات مفيدة وكذلك الت علم من ها بالإضافة إلى نشر الطمأنينة والتعاطف وإثارة الاهتمام بمواقف بعينه أو تقبلها. وتؤثر العلاقات العامة في عالم الأعمال في جمي ع أنواع المنظمات ، كبرت أم صغرت ، سواء أكانت تجاري ة أم غير تجاري ة، خيري ة أم قطاع خاص ، فهي عبارة عن الاتصال - بمعناه العريض - بين منظم ة ما وجميع المنظمات الأخرى التي لها صل ة من أي نوع بها ، فلا يمكن تجنب هذه العلاقات العامة أو حتى تجاهلها(١) . وتتمثل وكالات العلاقات العامة جزء ا حيويًا وهام ا من الصورة الكلية لمهنة العلاقات العامة ، فهي منظمات يعمل بها عديد من ممارسي مهنة العلاقات ال عامة كشبك ة متكاملة من مختلف التخصصات والمهارات الإبداعية والمهنية من أجل الوفاء باحتياجات عملاء الوكالة سواء كانوا أفراد ا أو منظمات أو هيئات. وقد فرضت وكالات العلاقات العامة نموها السريع على المستوى العالمي والإقليمي والمحلي نظراً لمجموعة من العوامل م نها: زيادة الاهتمام بالأنشطة التسويقية المتكاملة ومن بينها نشاط العلاقات العامة، واتجاه المنظمات إلى استخدام جهود العلاقات العامة ب اعتبار ها أحد المكونات الرئيسية في الترويج لأعمال وسياسات ومنتجات المنظمات المختلفة، وتزايد الأهمية النسبية للعلاقات العامة كجز ة من المزيج الترويجي والتسويقي في الوقت الراهن
4346	12041072	دور وكالات العلاقات العامة في تطوير النشاط الاتصالي والتسويقي /	صابر، شيماء عبد العاطي سعيد.		2012	تناولت الرسالة اسباب اختيار الموضوع والدراسات السابقة والمنهج المستخدم بينما عالج التمهيد ايدولوجيه المراء في السلطه من خلال عرض لوجهه نظر المجتمع البيزنطي والكثيسه والقانون تجاه المراء وكذلك الامكانيات التي تمكنت المراء خلالها من ممارسة السلطه بواسطه ايدولوجيات مقبوله من قبل المجتمع.
4347	12041081	نسوه العرش البيزنطي في عصر أسره كومنينوس (1081-1185م))	محمد، مصطفى محمود محمد.		2012	أهداف البحث :- يهدف البحث الحالي إلى :- 1-إعداد برنامج مقترح مبني على الويب في تدريس الرياضيات للصف الأول الإعدادي - دراسة فعالية برنامج مقترح مبني على الويب في تدريس الرياضيات لتلاميذ الصف الأول الإعدادي في تنمية التحصيل - المعرفي بمستوياته الست دراسة فعالية برنامج مقترح مبني على الويب في تدريس الرياضيات لتلاميذ الصف الأول الإعدادي في تنمية الاتجاهات - نحو إستخدام الحاسب الآلي أهمية البحث :- ترجع أهمية البحث الحالي إلى أنه:- نتأتى كمحاولة للتغلب على أوجه القصور في أساليب وإستراتيجيات تدريس الرياضيات المعادة والثامنة في المدارس - ومسيرة للإتجاهات التربوية الحديثة في إستخدام المستحدثات التكنولوجية المتقدمة في العملية التعليمية بما يمكن أن يسهم في زيادة فعاليتها، ومن هذه الأساليب التعلم الخليط يمكن أن يساهم البرنامج المقترح في الإتجاهات نحو إستخدام الحاسب الآلي لدى تلاميذ الصف الأول الإعدادي - يقدم نمونجا إجرائيا لكيفية تصميم وحدة "الأعداد" من كتاب الرياضيات المقرر على تلاميذ الصف الأول الإعدادي - مما يساعد معلّمي الرياضيات على كيفية تنفيذ دروس (Web based learning) باستخدام التعلم القائم على الويب مادتهم باستخدام هذه التقنيات المتقدمة يمكن أن يساعد إستخدام التعلم القائم على الويب في تكوين إتجاهات إيجابية لدى تلاميذ الحلقة الإعدادية نحو إستخدام - تكنولوجيا المعلومات مما يكون له أثر إيجابي في حياتهم العلمية والعملية المستقبلية في عصر المعلوماتية فروض البحث :- يسعى البحث الحالي إلى إختيار صحة الفروض الآتية :- لايوجد فرق دال إحصائيا بين متوسطي درجات تلاميذ المجموعة التجريبية (التي درست وحدة الأعداد باستخدام التعلم - القائم على الويب) وتلاميذ المجموعة الضابطة (التي درست الوحدة نفسها بالطريقة المعادة) في التطبيق البعدي لإختيار التحصيل المعرفي لا يوجد فرق دال إحصائيا بين متوسطي درجات تلاميذ المجموعة التجريبية (التي درست وحدة الأعداد باستخدام التعلم - القائم على الويب) وتلاميذ المجموعة الضابطة (التي درست الوحدة نفسها بالطريقة المعادة) في التطبيق البعدي لمقياس الإتجاه نحو إستخدام الحاسب الآلي
4348	12041098	فعالية برنامج مقترح مبني على الويب في تدريس الرياضيات لتلاميذ المرحلة الإعدادية على تحصيلهم المعرفي وإتجاهاتهم نحو إستخدام الحاسب الآلي /	محمد، كريم محمد أحمد.		2012	لأن القرآن الكريم مكنز الأسرار الذي أنول على النبي (صلى) ونحن مأمورون بالتدبر في الفاظه ومعانيه لذلك جاءت الرسالة لتدبر سورة الكهف احكاماً وعظمت وسبل نجاه الإنسان ونكرت قصصاً واحداثاً حدثت قديماً . سورة الكهف بي من السور المكية ، إقا ا ب ن ع باس : " إنها مكية غير آيتين منها فيهما ذكر عينية بن حصن الفزارل , كعن قتادة أنها مكية " (, كني إحدل سور بدنت ب " الحمد لله كذله السور بي : " الفتحه – الأنعا – الكهف – سباء فاطر " كلها تبئذئ بتمجيد الله " كقديسو كالأعتر ا ب ا عظمة كالك ك براء كالك ج لب كالك كيا . عدد حركتها ستة إلا ك ك ل ا ب ثمانية ك سد توف حرف ا , ككلماتها ألفا كخمسةائة كسبع كسبعوف كلمة , كلياتها مائة كعشر آيات عند الكوفيين , كمائة كآخذ عشر عند البصريين (. قام ع بيج إذك ف : ركل البخارم بسنده عن البراء بن عازب رضئ الله عنو أنوا إقا : " كاف رجل قرأ سورة - 1 الكهف , كإلى جانبو حصاف مربوط بشطلين , فتغشئو سحابو , فجعلت تندو كندنو , كجمل فرسو ينفر , فلما أصبح أتى النبي صلى الله عليه وسلم فقأ : تلك السكنية نزلت بالقرأف " (. ركل مسلم بسنده عن أبي الرداء رضئ الله عنو أف النبي صلى الله عليه وسلم إقا : " من - 2

						حفظ عشر آيات من الكهف سورة الكهف ع صم من الدجا) (القرآن الكريم كنز الاسرار الذي أنزل على النبي صلى الله عليه وسلم ونور الانوار التي اودعها الله للبشرية ونحن مأمورون بالتدبر في ألفاظه ومعانيه. وهناك دراسات عديدة تحدثت عن سورة الكهف وقد تناول الباحث خلال الدراسة المنهج التكاملي وقد قسم الدراسة الى مقدمة وتمهيد وثلاثة فصول وخاتمة وثبت باهم المصادر والمراجع هدفت الدراسة إلى اختصاص القراءات الشاذة بالتحليل من الوجهة البلاغية ، وتصنيف نصوص القراءات الشاذة (نماذج منها) طبقاً للظواهر البلاغية ، تناولت الدراسة القراءة الشاذة مصدرية باسم قرأنا، ورصدت أوجه الاختلاف بين القراءة الشاذة وقراءة الجماعة فيما يتعلق بالأسلوب والتركيب والدلالة، وتناولت نشأة ظاهرة تعدد القراءات وتأثيرها بطروفي جمع القرآن وثوثيقه، وظاهرة تعدد المصاحف فى عهد أبى بكر الصديق رضى الله عنه . عرضت مقاييس للقراء الصحيحة ، ناقشت نماذج من القراءات الشاذة وحللناها وقرأتها بقراءات الجماعة . وتناولت ثلاث ظواهر بلاغية ، هى الأسلوب والتركيب ، والدلالة، بحثت التغيير بين القراءات فيما يتعلق بأسلوبي الخبر والاتشاء، والتغيير فيما يتعلق بأسلوب الجملة الاسمية وأسلوب الجملة الفعلية ، وتناولت أسلوب الالتفات ، وظاهرني الحذف والزيادة ، وظاهرة الفصل والوصل بين الجمل ، وتناولت المجاز الاسنادي ، والمجاز فى الصيغة الصرفية ومجاز الحذف، والمجاز المرسل، وعرضت نماذج للقراءات الشاذة وتناولت دلالة الاستعارة ، وتوصلت الدراسة إلى الكشف عن تلك التغييرات التى أحدثتها القراءات الشاذة فى العبارة القرآنية على المستوى الأسلوبي وعلى المستوى التركيبى وعلى مستوى الدلالة المجازیة ، من خلال تحليل تلك القراءات ومقارنتها بقراءات الجماعة أو القراء العامة	
						تسقط الدراسة الضوء على الصراع المصرى الإسرائيلي بدء من عام 1956 وهو العام الذى شهد بدايه الاعتداءات الإسرائيلية على الحدود المصرية كما ظهرت فى نفس العام بعض المحاولات الغريبه لتسوية الصراع بشكل نهائى وفى نفس العام أيضاً قامت مصر بعقد صفقه الأسلحه التشكيكه مع المعسكر الشرقى وتنتهى الدراسه مع الضربه الاولى من حرب يونيه 1967 والتي شكلت مرحله جديده من مراحل الصراع المصرى الإسرائيلى.	
						استطاع تنظيم الضباط الأحرار بقيادة "جمال عبد الناصر " الثورة على نظام الملك فاروق فى مصر يوم ٢٣ يوليو سنة ١٩٥٢ ، ثم ما لبث فى ٢٦ يوليو من نفس العام أن أجبره على الرحيل من مصر، بعد تنازله عن العرش لابنه الصغير أحمد فؤاد، لتصبح السلطة كاملة فى يد مجلس قيادة الثورة (١)، والذي كان عليه تحمل مسئولية إدارة البلاد، إضافة إلى مواجهة تحديات عديدة، وتحقيق الأهداف التى أعلن عنها، كالقمضاء على الاستعمار وأعوانه والإقطاع وسيطرة رأس المال، وإقامة حياة ديمقراطية سليمة وعدالة اجتماعية بين طبقات المجتمع، وبالطبع بناء جيش وطنى قوى قادر على حماية البلاد، كما كان عليه حل مجموعة من القضايا الخارجية مثل تحديد موقفه من الصراع بين المعسكرين الشرقى والغربى، وكذلك قضية فلسطين. وقد رتب مجلس قيادة الثورة أولوياته، بحيث جاء اه إزال العلم البريطانى من قاعدة القناة كهدف رئيس للثورة، لا يتقدمه هدف آخر، كما كان إيجاد حل للمسألة السودانية يمثل مطلباً استراتيجياً ملح (٢)، حيث أدركت القيادة أنه ليس من السهل البدء فى مفاوضات الجلاء مع البريطانيين دون حل لمشكلة السودان، فهي العقبة الكوود التى تحطلت عليها معظم المفاوضات المصرية البريطانية السابقة، أما قضية فلسطين فلم تكن حرب فلسطين أو نتائجها سببا رئيسيا لإقيام الثورة المصرية، وإنما كانت عاملاً مساعدا ودافعا لضرورة التغيير (٤)، وبالتالي لم تكن تل ك القضية تحتل مكانًا رئيسيًا فى أولويات النظام الجديد فى مصر، لدرجة أن "جمال عبد الناصر"، رغم علمه بعمل الحكومة الإسرائيلية على زيادة قواتها المسلحة بشكل مضطرد، إلا إنه رفض إعطاء مسألة الاهتمام بالجيش الأولوية فى الاتفاق الحكومى، وفصل أن تكون الأولوية لم شاريع التنمية (٥)، وربما يرجع عدم احتلال قضية فلسطين، أو مسألة الصراع العربى الإسرائيلى مكانًا رئيسيًا فى أولويات الثورة، إلى أن هزيمة ١٩٤٨	
						تناولت الرسالة الرهانان السياسيين فى الاندلس منذ الفتح الإسلامى حتى نهايه عصر الطوائف وهدفت الدراسه الى معرفه الاوضاع السياسية فى الاندلس للوقوف على اثرها فى اتخاذ الرهانن والكشف عن ماهيتهم وسماتهم والغرض من اتخاذهم وشرحت اسباب التغير السياسي الذى طرأ على بلاد الاندلس من جراء اتخاذ الرهانن واثر ذلك على العوامل الداخليه والخارجيه والفكرية والسلباسيو والاجتماعيه فى الاندلس الاسلاميه وجيرانها نظراً لأن موضوع البحث (الرهانن السياسيون يـ) يعد فكرة جزئية صغيرة فإن البحث اعتمد على النطاق الأفقى القائم على دراسة جزئية صغيرة على فترة زمنية كبيرة أكثر من اعتماده على النطاق الرأسى القائم على دراسة جزئية كبيرة فى فترة زمنية قصيرة جداً «والسبب فى ذلك يرجع إلى الرغبة فى استيفاء أفكار البحث التى تنصف مادته باللندرة المصدرية واخترت الإطار الزمنى للموضوع مبتدئاً من الفتح الإسلامى للاندرلس حتى نهاية عصر ملوك الطوائف وذلك لما تتميز به هذه الفترة من خصوصية بين قترات التاريخ الأندلسى /هـ ٧١١م- ١٤٩٢ م). - الطويل الممتد من (٩٢ ٨٩٧ وقد اخترت الموضوع لأطر وحتى للماجستير لعدة أسباب :	
						عدم وجود دراسات عربية أو اجنبية حول ذلك الموضوع، وهذه النتيجة جاءت بتأكيد أساتذة فى تاريخ المغرب والأندلس، وبعد قراءات واسعة فى الكتابات المختلفة حول التاريخ الأندلسى، وكذلك بعد البحث الدقيق المستمر والدائم للشبكة الدولية للمعلومات وعلى هذا يـ يمكن القول بإطمئنأن أن هذا الموضوع يـعد من الموضوعات (Internet) النادرة التى لم يتم دراستها بعد فى أى فترة من قترات التاريخ الأندلسى .تزويد المكتبة العربية التاريخية بدراسة متخصصة للرهانن فى التاريخ الإسلامى . □	
						تنشأ المادة العلمية الخاصة بموضوع البحث (الرهانن السياسيون فى الأندلس) □ وتشتملت عبر عشرات المصادر مما يحتاج معه إلى بذل الوقت الطويل والجهد الكبير من أجل جمع شتات هذه المادة قبل تصنيفها وتفسيرها وهو الأمر الذى م ثل تحنياً كبيراً كل بمثابة أحد أهم أسباب اختيار هذا الموضوع دون غيره للبحث . يوفّر هذا البحث الفرصة لباحثين آخرين للقيام بدراسة موازية فى أماكن أخرى من □ الدولة الإسلامية تتبع إتخاذ وسيلة الرهانن قبل فترة الدراسة وأثناءها متتبعا الجذور اثار بخية لحالات □ الرهانن منذ عهد النبى صلى الله عليه وسلم حتى فترة الدراسة وأثناءها . دراسة الأوضاع السياسية فى الأندلس للوقوف على أثرها فى إتخاذ الرهانن . □ الكشف عن ماهية الرهانن وسمتهم والغرض من اتخاذهم . □ شرح أسباب التغير السياسى الذى طرأ على بلاد الأندلس من جراء إتخاذ الرهانن وأثر □ ذلك على العوامل الداخلية والخارجية والفكرية والسياسية والاجتماعية فى الأندلس الإسلامية وجيرانها .	
						معرفة اثر اتخاذ الرهانن فى تحقيق الاهداف السياسية المرجوة منه . □ مقارنة معاملة الرهانن وأثرها على أطراف النزاع فى الأندلس

						تظهر أهمية هذه الرسالة أنها تناولت الاختلافات الفقهية التي وردت بين الإمامين بالبحث والتحليل والترجيح، وقد قمت بتقسيم الرسالة إلى مقدمة وتمهيد وأربعة فصول وخاتمة وفهارس. وتناولت في المقدمة أسباب إختيار الموضوع والدراسات السابقة والمنهج المتبع في الدراسة بالإضافة إلى الهيكل العام للرسالة. أما التمهيد فكان عبارة عن ترجمة الإمام الرازي والإمام الجصاص، وتتكون من أربعة مطالب:- المطلب الأول: حياة الإمام فخر الدين الرازي ومؤلفاته. المطلب الثاني: منهج الإمام فخر الدين الرازي في التفسير. المطلب الثالث: حياة الإمام أبي بكر الجصاص ومؤلفاته. المطلب الرابع: منهج الإمام أبي بكر الجصاص في التفسير. أما الفصل الأول فكان بعنوان: الاختلافات الفقهية التي وردت في سورة البقرة وآل عمران. وتتكون من تسع مسائل فقهية. والفصل الثاني: الاختلافات الفقهية التي وردت في سورة النساء، وتتكون من عشرين مسألة فقهية. والفصل الثالث: الاختلافات الفقهية التي وردت في سورة النور، وتتكون من ثمانية مسائل فقهية. والفصل الرابع: الاختلافات الفقهية التي وردت في سورة المجادلة، وتتكون من مسألتين فقهيتين. ثم كانت الخاتمة واحتوت على أهم نتائج البحث وأيضاً التوصيات والصعوبات التي واجهتني أثناء البحث، ثم نهاية الرسالة اختوت على الفهارس.	2012
4358	12042097	الاختلافات الفقهية بين الإمام فخر الدين الرازي (ت. 606هـ) والإمام أبي بكر الجصاص (ت. 370هـ) من خلال التفسير /	محمد، محمود أحمد أبو الليل.			تتناول الرسالة في الإقتصار على الأبواب الوهمية في الدولة الحديثة على الاسره 18 وفي العصر المتأخر على الاسرتين 25-26 وقد ارتبط الباب الوهمي بصيغه القران والتي اختلفت اشكال كتابتها على الابواب الوهميه-التي كانت تشكل في جدار الغرف السفمية في مقابر الأسرة الأولى والثانية في منف وأورد عبد العزيز صالح نفس ال أرى ويرى أن تمك الشكاوات او المستطيل تعرف الابواب الوهميه بداخل الروح وهي وحدات معمارية وعقائدية استمر كيانها ثابت في المقابر وبعض معابد الطقوس المصرية في اغلب المصور وظهر الباب الوهمي كعنصر واضح المعالم من الاسره الرابعه واستمر منذ الدولة القديمه الى الدولة الوسطى وقد حددت وظيفتين للباب الوهمي الاول الباب الوهمي المكان الرئيسي في المقبرة والذي تقدم فيه القرابين الى الميت وتقام عنده الدعوات والصلوات من الكهنه الوظيفة الثانية ان الباب الوهمي هو المكان الوحيد الذي تستطيع الروح الدخول من الى المقبرة للالتقاء بالصلوات والقرابين وروية الزائرين للمقبرة وقد جاءت الدراسة في مقدمة وثلاثة فصول وخاتمة ولكن لا بد من توضيح شيء هام فالباب الوهمي محل الد ارسه تقصد بو الباب الوهمي بشكمو التقديدي الذي يتكون من العضادات والعتب السفمي والعموى والخير ا زنة ونخمة الباب والاسطوانة مفرقين في ذلك بين الباب الوهمي و بين الموحة ذات الباب الوهمي كما اطلق عميبا حيث انتشرت في الدولة الحديثة في مقابر الاف ا رد لوحات تخص صاحب المقبرة الا انها اتخذت في شكيبا الفنى خاصة الشكل الخارجى شكل الباب الوهمي وخاصة الطنف الذي يعموا. وقد جاءت الد ارسه في مقدمة و ثلثية فصول وخاتمة . الفصل الاول : المصادر و درس في هذا الفصل الأبواب الوهمية في الدولة الحديثة والتي تركزت النماذج منها في الاسره وفي العصر المتأخر تركز في الاسرتين 25-26 ،وشمل الفصل التعريف بصاحب كل باب 18 وسمى ولقبو وموقع المقبرة بجبانة طيبة وموقع الباب الوهمي بالمقبرة ومقاسات الباب ومادة صنمو والتشر العمى لمباب ونصوصو ،ثم عرض لنصوص الباب بداية بالنص البيروغيفي والترجمة الصوتية والترجمة والتعميق إن وجد ،وشملت الد ارسه بعض الأبواب الغير منشورة عميبا حيث قام الطالب بالوصف ونقل النصوص والترجمة والتعميق عميبا. الفصل الثاني: المناظر المصورة عى الابواب الوهمية ودرس في هذا المناظر المصورة عى الباب نفسو وتقصد بيا مناظر لوحة القرابين والعتب السفمي ثم المناظر المحيطة بالباب سواء المناظر الجانبية او المناظر العموية والسفمية شارحين في ذلك لمناظر والنصوص المصاحبة لو ،وقد شملت ايضا بعض المناظر الغير منشورة	2012
						تتبع أهمية هذه الدراسة من أهمية الموضوع نفسه فف عصر المعلومات الذي نعيشه اكتسبت المكتبات مكانة بارزة في حياة المجتمع وأفراده نظراً للدور الذي تؤديه في بث الوعي لدى أفراد المجتمع فالمكتبات أسست لخدمة المجتمع والمكتبيون يمثلون نقطة الاتصال بين المجتمع ذاته ، ففي عصر المعلومات الذي نعيشه اكتسبت المك ثبات مكانة بارزة في حياة المجتمع وأفراده نظراً للدور الذي تؤديه في بث الوعي لدى أفراد المجتمع . فالمكتبات أسست لخدمة المجتمع ، والمكتبيون يمثلون نقطة الاتصال بين المجتمع والمكتبة . لهذا كان من البديهي العمل على تحقيق الرضاء الوظيفي لهم ، لما لذلك من أثر كبير ر على ادائهم وكفاءتهم في المكتبة . فالرضاء الوظيفي يمثل مسألة حيوية بالنسبة للأفراد والهيئات والمجتمعات ،وحيث إن فئة العاملين بالمكتبات فة مهمة جدا من فئات العاملين التي تخدم المجتمع وظيفاته المختلفة ، لذا نتناول هذه الدراسة موضوع الرضاء الوظيفي والعوامل المؤثرة فيه بالتطبيق على العاملين بالمكتبات في مركز ومدينة قنا ، وتتضح أهمية هذه الدراسة فيما يلي : تحاول هذه الدراسة الوقوف على الآثار الإيجابية الناتجة عن رضاء الفرد عن -١ عمله مثل ارتفاع الروح المعنوية لهم ، وانخفاض نسبة الغياب ،وانخفاض معدلات ترك العمل .وليد أثر واضح على ادائهم وكفاءتهم وتقهم بأنفسهم . هذا الى جانب التعرف على العوامل السلبية للرضاء الوظيفي مثل زيادة معدلات الغياب وترك العمل ، كثرة الشكاوى والتذمر ر. لما له من أثر كبير على ادائهم في تقديم الخدمة المكتبية وانخفاض الروح المعنوية وفقدان الانتماء الوظيفي . محاوله لسد النقص في أبحاث الرضاء الوظيفي لدى العاملين بالمكتبات حيث لا -٢ يوجد سوى دراستين فقط – على حد علم الباحثة .	2012

						تتناول الدراسة تنمية الهوامش النيلية الصحراوية لمحافظة قنا والأقصر وتتبع محافظتي قنا والأقصر بعد قرار فصل محافظته الأقصر عن محافظة قنا وهما محافظتي مصر العليا اقيم جنوب الصعيد ويحدها شمالاً محافظة سوهاج بينما يحدها جنوباً محافظة أسوان والوادي الجديد من الغرب والبحر الأحمر من الشرق وتعد هذه الدراسة مهمة لاعتبارات جغرافية عده مثل التنمية كأحد الموضوعات الجغرافية المهمة التي تسعى كافة الدول الى تحقيقها لنجاح مشروعاتها التنموية وتواصلها المستمر اذ تتطلب هذه التنمية صيانة قاعده الموارد البيئية وحمايتها من منطلق كونها الرصيد الاستراتيجي لها بالإضافة الى موقع المنطقة المتوسط بين محافظات مصر العليا وهو اقليم جنوبالصعيد حيث قسمت مصر على اكثر من اقليم تخطيطي منذ بدايه الخمسينات وحتى عام 1977 عندما استقر الرأي على تقسيممصر الى ثمانية اقاليم تخطيطيه واقتصاديه وجاء اختيار منطقة الدراسة لامتلاكها العديد من الموارد الطبيعيه والبشريه المهمه والتي لم تلق الاهتمام الكافي لتنميتها من قبل المسؤولين حيث تعدد الانشطة الاقتصادية من انشطه زراعيه لكون المنطقة ريفيه تحتل الزراعه بها المرتبه الاولى وانشطه المرتبه الثانيه الممتلئه في تنوع الانشطه الصناعيه وجاء في المرتبه الثالثه الانشطه السياحيه وذلك لما تملكه المنطقه من مقومات سياحيه خاصه كل هذه الانشطه تحتاج الى دراسته للتعرف على امكاناتها واستغلالها الامثل وازاله كافة المشكلات لتطويرها والحفاظ على مواردها حالياً ومستقبلاً. الدى تلعبه التنميه وخاصه التنميه الاقتصاديه باعتبارها احد العوامل التي يرتكز عليها الأمن الاقتصادي والبشرى في البلاد وتعمل التنميه على توفير فرص عمل وابداع مناطق عمرانيه جديده وبالتالي ارتفاع مستوى المعيشه الى جانب فتح اسواق داخلية واسواق خارجيه مما يعمل على تحقيق فائض في ميزان الدفوعات وبالتالي تعود الفائده على الدوله وعلى المجتمع مره اخرى. حظيت الدراسات التنمويه باهتمام وافر من الجغرافيين وغيرهم لما لها من مكانه بارزه في الدراسات الجغرافيه وللور الذي تلعبه التنميه وخاصه التنميه الاقتصاديه باعتبارها احد العوامل التي يرتكز عليها الأمن الاقتصادي والبشرى في البلاد وتعمل التنميه على توفير فرص عمل وابداع مناطق عمرانيه جديده وبالتالي ارتفاع مستوى المعيشه الى جانب فتح اسواق داخلية واسواق خارجيه مما يعمل على تحقيق فائض في ميزان الدفوعات وبالتالي تعود الفائده على الدوله وعلى المجتمع مره اخرى. تتناول الدراسة تنمية الهوامش النيلية الصحراويه لمحافظة قنا والأقصر وتتبع محافظتي قنا والأقصر بعد قرار فصل محافظته الأقصر عن محافظة قنا وهما محافظتي مصر العليا اقيم جنوب الصعيد ويحدها شمالاً محافظة سوهاج بينما يحدها جنوباً محافظة أسوان والوادي الجديد من الغرب والبحر الأحمر من الشرق وتعد هذه الدراسة مهمة لاعتبارات جغرافية عده مثل التنمية كأحد الموضوعات الجغرافية المهمة التي تسعى كافة الدول الى تحقيقها لنجاح مشروعاتها التنموية وتواصلها المستمر اذ تتطلب هذه التنمية صيانة قاعده الموارد البيئية وحمايتها من منطلق كونها الرصيد الاستراتيجي لها بالإضافة الى موقع المنطقة المتوسط بين محافظات مصر العليا وهو اقليم جنوبالصعيد حيث قسمت مصر على اكثر من اقليم تخطيطي منذ بدايه الخمسينات وحتى عام 1977 عندما استقر الرأي على تقسيممصر الى ثمانية اقاليم تخطيطيه واقتصاديه وجاء اختيار منطقة الدراسة لامتلاكها العديد من الموارد الطبيعيه والبشريه المهمه والتي لم تلق الاهتمام الكافي لتنميتها من قبل المسؤولين حيث تعدد الانشطه الاقتصادية من انشطه زراعيه لكون المنطقة ريفيه تحتل الزراعه بها المرتبه الاولى وانشطه المرتبه الثانيه الممتلئه في تنوع الانشطه الصناعيه وجاء في المرتبه الثالثه الانشطه السياحيه وذلك لما تملكه المنطقه من مقومات سياحيه خاصه كل هذه الانشطه تحتاج الى دراسته للتعرف على امكاناتها واستغلالها الامثل وازاله كافة المشكلات لتطويرها والحفاظ على مواردها حالياً ومستقبلاً. الدى تلعبه التنميه وخاصه التنميه الاقتصاديه باعتبارها احد العوامل التي يرتكز عليها الأمن الاقتصادي والبشرى في البلاد وتعمل التنميه على توفير فرص عمل وابداع مناطق عمرانيه جديده وبالتالي ارتفاع مستوى المعيشه الى جانب فتح اسواق داخلية واسواق خارجيه مما يعمل على تحقيق فائض في ميزان الدفوعات وبالتالي تعود الفائده على الدوله وعلى المجتمع مره اخرى.
4377	12044960	تنمية الهوامش النيلية/ الصحراويه بمحافظتي قنا والأقصر بأستخدام نظم المعلومات الجغرافيه والاستشعار عن بعد/	درويش، ززمز مرعي أحمد.		2013	يهدف موضوع البحث إلى إلقاء الضوء على إحدى المدن المصرية التي لم تَلَقْ قدراً كافياً من إهتمام وعناية الباحثين، والعمام الأتاريين بالقدّر الذي تتّله معظم المدن المصرية التاريخية التي تميّزت بعبق التاريخ وطرز العمارة والفنون الإسلامية عبر عصورها التاريخية المتعاقبة منذ الفتح الإسلامي لمصر في سنة 642م مثل مدن الفسطاط، والعسكر، والقطنية، والقاهرة، وغيرها من المدن المصرية سواء في الوجه البحري وسيناء أو في الوجه القبلي والبحر الأحمر ألا وهي مدينة بورسعيد، التي تملك كما ذكر فاليري نيقولا (1) ثرائاً متجانساً بشكل ملحوظ يتطلب منا وقفة حقيقية لإبراز هذه المدينة التي يمنحها موقعها (Valérie – Nicols) المتفرد على شاطئ البحر الأبيض المتوسط، وفي منخل قاة السويس، وفي منتصف المسافة بين القاهرة والإسكندرية وتعالج هذه الدراسة اشغال الخشب بعمائر المدينة المدنية منذ نشأتها حتى بداية القرن الرابع عشر الهجري / نهاية القرن التاسع عشر الميلادي، حيث أسهمت هذه الصناعة في نشأة، ونمو، وازدهار المدينة منذ أن استخدم الخشب في أول رصيف خشبي عائم للمدينة " المرفأ الخشبي"، ومرورا باستخداماته المختلفة في صانرها سواء المدنية، أو الدينية، وغير ذلك من عناصر مثل القنار على سبيل المثال، فالمتجول بين شوارعها الرئيسية والثانوية، وحاترها، وأزقتها، ودروبها يلحظ للوهلة الأولى ثروة خشبية هائلة نفتت وفق أساليب صناعية وزخرفية رائعة يندر أن يجدها في مدينة أخرى من مدن مصر الحديثة والمعاصرة، ويلحظ هذه الأشغال الخشبية التأثير بأسلوبين، أحدهما نفذ وفق الأسلوب المحلي المملوكي العثماني، والآخر نفذ وفق الأسلوب الفرنسي يحكم النشأة والتطور بالنسبة للمدينة.
4378	12044991	أشغال الخشب لعمائر مدينة بورسعيد منذ إنشائها حتى بداية القرن الرابع عشر الهجري :	أحمد، إيمان ماهر.		2013	تكمن أهمية البحث في بحث النظرية السياسية عند السوفسطائيين ومقارنتها بالنظرية السياسية عند ميكافيللي لما لهاتين النظريتين في الفلسفة السياسية من أهمية كبيرة تتمثل في مدى تأثيرهما على مجريات السياسة العالمية ولما لهما من ريادة في وضع اولويات وأسس الفكر السياسي اليوناني والحديث والكشف عن النزعة الواقعية عند السوفسطائيين وميكافيللي. بدأ الفكر السياسي مع بدايه ظهور الحضارات وارتبط ظهورة بظهور الدول المختلفة التي تتطلب بالضرورة نظماً وقوانين للحكم لضبط الحياة السياسية المختلفة التي عبرت عن فكرة الدولة منذ اقدم العصور وحتى الآن. وارتبط نمو الفكر السياسي بنمو المجتمعات البشرية واستقرارها كما تطور بتطور الحضارات الإنسانية الرفاهية والسعادة البشرية تطور الفكر السياسي وقد عكست المحاولات الكثيرة لتصور الدولة عند الفلاسفة والمفكرين السياسيين الظروف السياسية والاجتماعية التي ظهرت فيها ارائهم ومفاهيمهم فالمفكر هو مرآة لعصره يعكس كل ما فيه من واقع اجتماعي. ولقد كانت الحركة السوفسطائية حركة انتقالية في الفكر اليوناني كما كان تفكير ميكافيللي فكر انتقالي في عصر النهضة من الفكر الديني الى الفكر الواقعي وعاده ما تكون المراحل الانتقالية في البداية محل خلاف او جدل سياسي لا ينتهي بين المؤرخين. من البديهيات في علم السياسة، أنه لا دولة بدون سلطة سياسية، فركن السلطة السياسية القادرة على فرض ارادتها على كافة الأشخاص الذين يقفونون إقليميا محددا هو جوهر الدولة، وترتبط فكرة السلطة العامة ارتباطا وثيقا بمدلول النظام السياسي، باعتبار أن هذا النظام السياسي ما هو إلا السلطة السياسية في حالة ديناميكية فاعلة فهو مجموعة الأجهزة والمؤسسات المتناسقة والمتراصة فيما بينها، والتي تقوم بأداء وظائف تلزم لبقاء الجماعة . ومدلول السلطة العامة في هذا المقام ينسج ليُشْمَل مفهومها عضويًا وآخر وظيفيًا ، وسوف يكون تناولنا لهذا المدلول شاملا - ليهذين المفهومين معا .
						ومن الجدير بالذكر القول بأن مدلول السلطة العامة وجد في كافة المجتمعات ، فليس هناك مجتمع بشري لم يبد فيه شكل أو آخر من أشكال السلطة العامة، وإن اختلفت أسسها ومدلولها من مجتمع لآخر ، تبعاً لاختلاف ظروف التجمعات الإنسانية، وبالتالي أصبحت تختذ وصف الظاهرة ، فلا يمكن تصور وجود مجتمعات بدون سلطة أيا كانت . ففي التاريخ المعروف لنا نشاهد بوضوح أن الجماعات الإنسانية لم تستطع أن تنظم نفسها بصورة دائمة دون قبول وجود فكرة السلطة.

						وقد شكّلت فكرة السلطة العامة بما تثيره من مسائل تتعلق بحدودها وتبديرها، مكانة رئيسة في التفكير الفلسفي والسياسي عند الفلاسفة والمفكرين، كما شكّلت السلطة العامة المحور الرئيسي للنظرية السياسية، ولذلك لم يكن من قبيل المبالغة وجود اتجاه قوي يرى أن العلم السياسي هو علم السلطة العامة، كما يعرف البعض الآخر القانون الدستوري بأنه قانون تنظيم السلطة العامة ولذلك يعرفه الفقيه فيديل بأنه مجموعة القواعد القانونية التي تتعلق بتنظيم السلطات. بدأ الفكر السياسي مع بداية ظهور الحضارات، وارتبط ظهوره بظهور الدول المختلفة التي تتطلب بالضرورة نظامًا وقوانين للحكم لضبط الحياة السياسية فيها، ومن ثم ظهرت النظريات السياسية المختلفة التي عبرت عن فكرة الدولة منذ أقدم العصور وحتى الآن. وارتبط نمو الفكر السياسي بنمو المجتمعات البشرية واستقرارها كما تطور بتطور الحضارة الإنسانية، وكلما ارتقى الإنسان وزادت مطالبه من أجل الرفاهية والسعادة البشرية تطور الفكر السياسي حتى أنه يمكن القول أن الفكر السياسي كان مقياسًا للعمارة والحضارة. وقد عكست المحاولات الحديثة لتصور الدولة عند الفلاسفة والمفكرين السياسيين الظروف السياسية والاجتماعية التي ظهرت فيها أراؤهم ومفاهيمهم، كما عكست الاتجاهات السياسية التي حكمت عالمهم، فالمفكر هو مرآة لعصره يعكس كل ما فيه من واقع اجتماعي حقيقي. بالإضافة إلى ذلك كان من بين كتابات المفكرين السياسيين عن الدولة ما كان يرسم صورة مثالية لما يتصوره المفكر السياسي لما يجب أن يكون، ومن بينها ما يقدم صورة واقعية لما كان حادثًا وواقعًا بالفعل في عصره، وعلى هذا فقد اختلف موقف المفكر السياسي كما اختلفت نظرياته السياسية باختلاف المراحل التاريخية والظروف السياسية التي شكّلتها وأسهمت في وضع أسسه. ولقد كانت الحركة السوفسطائية حركة انتقالية في الفكر اليوناني، كما كان تفكير "مكيافيلي" " Machiavelli" (م) أيضًا فكرًا انتقاليًا في عصر ١٤٦٩- ١٥٢٧ الهضبة من الفكر الديني إلى الفكر الواقعي، وعادةً ما تكون المراحل الانتقالية في تاريخ الفكر السياسي محل خلاف أو جدل سياسي لا ينتهي بين المؤرخين، وربما انقسم الناس حولها بين مؤيد ومعارض، وفي الواقع أن هناك أسبابًا عديدة تكف وراء ذلك السبب الأول: أن الفكر الجديد الذي تيسر به هذه المراحل الانتقالية لم تألفه الأذهان بعد، ومن هنا تكّى المعارضة والرفض. السبب الثاني: أن هذه المراحل تحمل من الجراة والخروج على ما استقرت عليه الأعراف والتقاليد مما يجعلها تبدو بلا شك خطرًا على المجتمع ع، وتهديدًا للنظام السياسي والاجتماعي. ولقد كانت الحركة السوفسطائية والفكر السياسي المكيافيلي فكرًا انتقاليًا فقد كان رافضًا لما كان سائدًا في عصورهما، فقد كان السوفسطائيون رافضين لما كان سائدًا في عصورهم من عقائد اجتماعية وسياسية، تمثلت في رفضهم لكل ما هو مثالي واهتمامهم بالواقع الفعلي المعيش فقط، كما تمثلت في معارضتهم لمشروعية الرق الذي وافق عليه بعض فلاسفة اليونان من قبلهم ومن بعدهم، كما رفضوا أيضًا ما كان سائدًا في عصرهم من عقائد دينية. ويتفق "مكيافيلي" مع السوفسطائيين في رفضه للعبودية وتمجيده للدولة التي عاشت في حرية "كالثعبان الروماني"، كما كان واقعيًا في دراسته وفكره السياسي مثل السوفسطائيين، كما رفض مثلهم ضعف وهوان الشعب الإيطالي في عصره نتيجة اتباع العقيدة الدينية . ومن ثم يمكن اعتبار التراث السياسي السوفسطائي والمكيافيلي من أهم النماذج الفكرية التي كانت قادرة على الإسهام في تطوير الفكر السياسي. ذلك لأنهما حاولا دراسة الواقع السياسي كما هو قائم لا كما ينبغي أن يكون، فلم يبحثا في مثاليات وإنما بحثا في الواقع بما فيه من مشكلات. والسياسة عند بعض السوفسطائيين و"مكيافيلي" هي علم القوة وكيفية استخدام هذه القوة للحصول على أكبر قدر من السلطة السياسية، ولقد حاول بعض السوفسطائيين و"مكيافيلي" استخدام هذه الجزئية في دراستهم للواقع السياسي.
4379	12046706	الفكر السياسي بين السوفسطائيين ومكيافيلي/	محمد، أماني شوقي.		2013	إن مبحث الفداء فرع من فروع دراسته (هوية الدين) التي اختلف القرآن الكريم والمعهد القديم في تحديدها ولكنهما اجمعا على عدم وقوع التكليف أو الامتحان عمليا عليها إذ تدخل الله عز وجل من أجل منع ابراهيم عليه السلام من تنفيذ الأمر الإلهي وفداء الابن بنج من الحيوان وبناء على هذا فإن عقيدة الفداء متقرره في الكتابين المقدسين ولكنها فيهما عقيدة من نوع خاص ومحدد إذ لا هدف لها سوى ابراز العنليه الإلهيه بالخلق وجزاؤه تعالى للمطيعين من عباده فهي اذن رمز جسده الله ليمنح المؤمنين النموذج الإيماني الذي يجب ان يحتذى. فإن قصص الانبياء الت وردت في كتب التراث الديني تحمل في طياتها اغراضاً عديدة منها الغرض الديني والاخلاقي والتعليمي وما الى ذلك إذ انها كثيرة ومتنوعه وهي تجسد الصراع بين الخير والشر الصراع بين الانسان وظروفه واهوانه انها تجسد الصراع بين صاحب الرساله (محمد صلى الله عليه وسلم) واهل مكانه وغير هم من المنهضين لرسالته. فقصص الانبياء تبشر المؤمنين بالجنه وتحذر الكافرين من النار وتوضح نعمه الله على انبيائه وترسم الصورة المثلى للعلاقات الانسانيه كما يراها الله وتبين الرابطه التي تربط هؤلاء الانبياء برب العالمين. إن مبحث الفداء فرع من فروع دراسته (هوية الدين) التي اختلف القرآن الكريم والمعهد القديم في تحديدها ولكنهما اجمعا على عدم وقوع التكليف أو الامتحان عمليا عليها إذ تدخل الله عز وجل من أجل منع ابراهيم عليه السلام من تنفيذ الأمر الإلهي وفداء الابن بنج من الحيوان وبناء على هذا فإن عقيدة الفداء متقرره في الكتابين المقدسين إن مبحث الفداء فرع من فروع دراسته (هوية الدين) التي اختلف القرآن الكريم والمعهد القديم في تحديدها ولكنهما اجمعا على عدم وقوع التكليف أو الامتحان عمليا عليها إذ تدخل الله عز وجل من أجل منع ابراهيم عليه السلام من تنفيذ الأمر الإلهي وفداء الابن بنج من الحيوان وبناء على هذا فإن عقيدة الفداء متقرره في الكتابين المقدسين
4380	12046719	الفداء في الفكر الديني بين اليهوديه والإسلام/	محمود، مارسيل محمد الصغير.		2012	اسباب اختيار الموضوع أن دراسته المخاليف من الدراسات التاريخيه الجديده التي لم يتم تناولها بالدراسه من قبل حيث تركزت معظم الدراسات حول دراسته تاريخ اليمين بعصفه عامه او دراسته الدويلات الحاكمه مثل الدوله الزياديه والدوله الايوبيه والدوله الرسوليّه او دراسات مستقله لليمن مثل مدينه تعز ومدينه صنعاء ومدينه زبيد. يعد المخالاف وحده اداريه هامه حيث قسمت اليمن اوائل العصر الاسلامي إله ثلاثه مخاليف كان الجند اهمها واعظمها لكونه عاصمه اليمن الاولى وبالرغم من ذلك لم يحظى باهتمام الباحثين بالشكل الكافي .

						ان معظم الدراسات التاريخية تنصب على الأحداث السياسية بشكل عام غافله الدور الحضارى وتأثيره على المجتمع وعلى الأحداث السياسية نفسها وكذلك الرغبة في اضافة ماده علميه جديده للمكتبة العربيه والاسلاميه ليفيد منها الباحثون والدارسون فيما بعد والمنهج الذى اتبع فى هذه الدراسه هو المنهج التاريخى من خلال دراسه الأحداث التاريخيه والسياسيه فى المخلاف وتحليل هذه الأحداث ووصف المظاهر الحضاريه والحياه الاجتماعيه وما تشمله من احتفالات واعياد وغيره.ا. كذلك اسخدم المنهج المقارن من خلال مقارنه المخلاف بمخاليف اليمين الأخرى وتطور الأحداث فيها لاطهار دور المخلاف وتأثيره الحضارى والسياسى على المخاليف والمدن المجاوره. معظم الدراسات حول دراسه تاريخ اليمين بصفه عامه او دراسه الدويلات الحاكمه مثل الدوله الزياديه والدوله الأيوبيه والدوله الرسولييه او دراسات مستقله للمدن مثل مدينه تعز ومدينه صنعاء ومدينه زبيد.
4381	12046739	مخلاف الجند منذ القرن الرابع حتى القرن التاسع الهجرى /	عبد المقصود، عزه محمد.		2012	يعد المخلاف وحده اداريه هامه حيث قسمت اليمين اوائل العصر الإسلامى لة ثلاثة مخاليف كان الجند اهمها واعظمها لكونه عاصمه اليمين الاولى وبالرغم من ذلك ان معظم الدراسات التاريخيه تنصب على الأحداث السياسية بشكل عام غافله الدور الحضارى وتأثيره على المجتمع وعلى الأحداث السياسية نفسها وكذلك الرغبة في اضافة ماده علميه جديده للمكتبة العربيه تناولت هذه الدراسه محاوله التعرف على الدور الاتصالي لمكاتب العلاقات العامه بالإداره المحليه فى محافظات جنوب الصعيد ومن هذا المنطلق يهتم البحث بدرجه كبيره لرصد طبيعه الدور الاتصالي لمكاتب العلاقات العامه بالإدارات المحليه بمحافظات جنوب الصعيد (أسوان- الأقصر- قنا- سوهاج) نظراً لأهميه هذه الإدارات فى نشر المعلومات الصادقه للجمهور المحلى وتحسين الخدمات المقدمه للجمهور بالإضافه الى قيامها بتقديم المعلومات لأجهزة الأعلام المحليه لتحسين صوره الإداره المحليه وتقديم المعلومات عنها للجمهور الخارجى. من خلال دراسه سلوك الأفراد والجماعات دراسه علميه موضوعيه وبهدف رعايه العلاقات الانسانيه السليمه فى المجتمع وكسب ود الجماهير وضمان التقاهم بين الإدارات المحليه من جهه وجماهيرها من جهه أخرى لتبينه جو سيكولوجيا من الفهم واللقه المتبادله بين الإدارات المحليه وبين جماهيرها المتعلقه معها عن طريق لجهود المستمره التى تسير وفق خطه مدروسه. وتعد العلاقات العامه نشاطاً هاماً واساسياً من أنشطه المنشآت التى تعمل فى مجال الإدارات المحليه وعامل من عوامل نجاح الجهود التنشيطيه للإداره المحليه حيث تستهدف العلاقات العامه دعم ومسانده أنشطه الاتصال بالجمهور الداخلى والخارجى للإداره المحليه. تناولت هذه الدراسه محاوله التعرف على الدور الاتصالي لمكاتب العلاقات العامه بالإداره المحليه فى محافظات جنوب الصعيد ومن هذا المنطلق يهتم البحث بدرجه كبيره لرصد طبيعه الدور الاتصالي لمكاتب العلاقات العامه بالإدارات المحليه بمحافظات جنوب الصعيد (أسوان- الأقصر- قنا- سوهاج) الانسانيه السليمه فى المجتمع وكسب ود الجماهير وضمان التقاهم بين الإدارات المحليه من جهه وجماهيرها من جهه أخرى لتبينه جو سيكولوجيا من الفهم واللقه المتبادله بين الإدارات المحليه وبين جماهيرها المتعلقه معها عن طريق لجهود المستمره التى تسير وفق خطه مدروسه.
4382	12046761	الدور الإصلى لمكاتب العلاقات العامه بالإداره المحليه فى محافظات الصعيد/	حسن، أمين عبد الكريم.		2012	يتمثل الهدف الرئيسى فى رصد وتوصيف وتفسير العوامل المؤثرة على مستقبل حرية الصحافة فى مصر خلال العقدين القادمين ويتفرع من هذا الهدف الرئيسى عدد من الأهداف الفرعيه الأخرى تشمل : 1- تحديد مستقبل القيود والإلتزامات المفروضه على الصحافة المصريه - 2- تحديد مستقبل الضغوط التنظيميه والإداريه للمؤسسات الصحفيه المفروضه على القائمين بالإتصال - 3- التعرف على تأثير السياسه التحريرييه للصحف المصريه على القائم بالإتصال فى العقدين القادمين - 4- تحديد شكل العلاقة بين الصحافة والسياسيه خلال العقدين القادمين - تستهدف الدراسه رصد فكره التعدديه الحزبيه وعلاقتها بالحريات العامه تأثيراً وتأثراً من حيث تكوين الاحزاب وممارستها وصولاً لتداول السطله فيما بينهما تحقيقاً للتغيير العام بوسيله الانتخابات العامه كآليه ديموقراطيه لبلوغ تلك الغايه وذلك من خلال الاستعانه بالمنهج المقارن بالتطبيق على النمطين الاتحاديه والولايات المتحده الامريكيه وفرنسا ومصر وتوصلت الدراسه الى ان النشاط الحزبى فيمصر تحكمه نصوص قانونيه بالعه فى التشدد فهناك نصوص قانون الاحزاب التى تتركس سيطره لجنه شئون الاحزاب على النشاط الحزبى الى حدتسلطها بما يمكنها من وقف نشاط الحزب وفقاً مشمولاً بالنفاذ المعجل كما انتهت فى الصحافة قانون الاحزاب بعد تعديله الى تقيد الصحافة الحزبيه اصداراً ودواماً على مستوى النص بإشتراطه وجوب ان يكون للحزب عشره اعضاء فى مجلس الشعب حتى يمكنه اصدار صحيفه ايداء او استمرار صحيفته فى العمل وبجانب ذلك نجد ان النشاط الحزبى مقدر له ان يجرى فى ظل ترسانه من القوانين الاستثنائيه اصطلحه على تسميتها بالقوانين سيئه السعده فضلاً عن مناح الطوارئء وما يصاحبه من رياح غير متواتيه للحرية والناجم عن اصرار النظام الحاكم على تطبيق قانون الطوارئء لعشرات السنين. تحديد شكل العلاقة بين الصحافة والسياسيه خلال العقدين القادمين. تستهدف الدراسه رصد فكره التعدديه الحزبيه وعلاقتها بالحريات العامه تأثيراً وتأثراً من حيث تكوين الاحزاب وممارستها وصولاً لتداول السطله فيما بينهما تحقيقاً للتغيير العام بوسيله الانتخابات العامه
4383	12046785	مستقبل حرية الصحافة فى مصر /	حسين، شريهان محمود أبو الحسن.		2012	اجريت هذه الدراسه بهدف تحديد دور الجمعيات الأهليه فى مجال التعليم وتطويره والوقوف على نقاط القوه لزياده تلك القوه ونقاط الضعف للتغلب عليها وذلك فى ضوء الأبعاد المجتمعيه المتنوعه فى المجتمع المصرى كما تهدف الى صياغه استراتيجيه مستقبليه لتفعيل دور الجمعيات الأهليه من خلال توفير متطلبات التطوير للمجتمع المدرسى ومدى اسهام الجمعيات الأهليه فى تلبيه هذه المتطلبات سواء أكانت اقتصاديه او اجتماعيه او تعليميه او صحيه او ترويجيه. ان التعليم هو المشروع القومى لمصر فهو سبيلنا الوحيد لكى نواكب التطور العالمى وخلق جيل قادر على الابتكار والإبداع العلمى فى جميع المجالات العلميه والفنيه والثقافيه وقادر على حمليه امن مصر القومى. لهذاً هو الاساس والقاعده لإنائى المجتمع فضاء المجتمع يبدأ من بناء المدارس لأن موقع المدرسه من المجتمع اشبه بموقع الروح من الجسد وحين يكون التعليم متمسكاً بالوجود يكون المجتمع متمسكاً بالتقدم ونوعيه التعليم فى مجتمع تنعكس اثارها فى بنيه هذا المجتمع فإن اهم ما يميز الانسان عن الجمد ان الانسان يحفظ كذا عن طريق التجديد والتطوير بفعل التربيه والتعليم. والوقوف على نقاط القوه لزياده تلك القوه ونقاط الضعف للتغلب عليها وذلك فى ضوء الأبعاد المجتمعيه المتنوعه فى المجتمع المصرى كما تهدف الى صياغه استراتيجيه مستقبليه لتفعيل دور الجمعيات الأهليه من خلال توفير متطلبات التطوير للمجتمع . كما تهدف الى صياغه استراتيجيه مستقبليه لتفعيل دور الجمعيات الأهليه من خلال توفير متطلبات التطوير للمجتمع المدرسى ومدى اسهام الجمعيات الأهليه فى تلبيه هذه المتطلبات سواء أكانت اقتصاديه او اجتماعيه او تعليميه او صحيه او ترويجيه. ان التعليم هو المشروع القومى لمصر فهو سبيلنا الوحيد لكى نواكب التطور العالمى وخلق جيل قادر على الابتكار والإبداع العلمى فى جميع المجالات .
4384	12046818	الجمعيات الأهليه ودورها فى تطوير المجتمع المدرسى/	قمر الدين، ناديه عوض أحمد.		2012	هفتك هذه الدراسه الى دراسه زى سلاطين المغول من خلال مدرسه التصوير المغولى الهندى وذلك من خلال معرفه الملابس التى يرتدونها فى المجالس الدينيه والعلميه والاحتفالات العامه وكذلك الاستقبالات الرسميه ورحلات الصيد والقتص والمعارك الحربيه وكذلك الصور الشخصيه وذلك من خلال المنهج الوصفى وتم معرفه المواد الخام المستخدمه فى صناعه الملابس واستخدام العديد من الملابس المختلفه فى اسماءها والمتنوعه فى زخارفها.
4385	12046853	زى السلاطين المغول فى مدرسه التصوير المغولى بالهند/	على، ناهد أبو السعود محمد.		2012	

						يتمثل الهدف الرئيسي للبحث في التعرف على أثر التحولات التي طرأت على بناء القوة داخل الريف المصري في فترة التسعينات وما بعدها وخاصة بعد التطورات التي طرأت على القوانين المنظمة لأوضاع الملكية الزراعية في الريف مثل القانون رقم 96 لسنة 1992 والخاص بتنظيم العلاقة بين المالك والمستأجر وكذلك التعرف على أثر التغييرات التي طرأت على أوضاع المزد والمشيخ وسلطاتهم الإدارية في ظل المؤسسات الحكومية وسيطرتها على أغلب القرى المصرية. تقف هذه الدراسة وسطاً بين مجالات علم الاجتماع الريفي بحكم مجالها الجغرافي والذي يلقى الضوء بالدراسة على قرية في ريف صعيد مصر ومجالها البشري المكون من عينة من الريفيين وبين مجال علم الاجتماع السياسي بحكم طبيعته الظاهرة التي تتناولها بالدراسة والتحليل وهي القوة الاجتماعية التي تعد المقولة الأساسية والهامة واحد المباحث الرئيسية في علم الاجتماع السياسي والتي طرأ عليها العديد من التغييرات الجوهرية مثلها مثل باقي جوانب الحياة الريفيه التي شملها تغير وتطور من خلال الأحداث التاريخية التي مر بها الريف المصري خلال القرنين التاسع عشر والعشرين والتي كانت سلسله متلاحقه متتابعه في حركه ديناميكيه لا تتوقف من التغييرات الاجتماعية والاقتصاديه والسياسيه والتي اثرت في المجتمع بشكل عام وفي المجتمع الريفي بشكل خاص. التي تعد المقولة الأساسية والهامة واحد المباحث الرئيسية في علم الاجتماع السياسي والتي طرأ عليها العديد من التغييرات الجوهرية مثلها مثل باقي جوانب الحياة الريفيه. وتعتبر هذه الدراسة دراسته وصفية تعتمد على الاسلوب الوصفي التحليلي بقصد جمع البيانات وتحليلها وتفسيرها الى كميه وكيفيه بهدف الوصول الى نتائجها النهائية وعليه فأن الهدف الرئيسي لهذه الدراسة يتمثل في التعرف على نتائجها النهائية ويتمثل في التعرف على التغييرات التي لحقت ببنه القوة الريفيه في ظل تحولات التي مر بها الريف المصري ولتحقيق هذا الهدف الرئيسي تنطلق نحو تحقيق عدد من الاهداف التفصيليه .	2012
4386	12046880	التحولات الاجتماعية وبناء القوة في ريف صعيد مصر /	محمد، حسن محمود يوسف.			شكّلت المفارقة عنصر الهميشة في هذا التصور وقد رغب الباحث أن تكون الرسالة موضوعاً لتطبيق فرضيته الجديدة وليست الغايه من هذا البحث عن سقطات الدراسات السابقة في هذا الميدان فحسب بل إن الغايه الحقيقيه هي محاوله تجاوز تلك الدراسات والوقوف على فترة المفارقة على هذا التجاوز . يسعى البحث الى استخدام استراتيجيه تدريس غير تقليديه من اجل تطوير التدريس وتحسين العائد التعليمي تحقيقاً لمسنوى أعلى من الاهداف التربويه وذلك تمشياً مع اتجاهات التحديث والتطوير لمتاهج التربيه الرياضيه وتقوم فلسفه استراتيجيه "بلوم" لإتقان التعلم على تقديم دروس مرحليه للطلاب من ذوى المستوى المنخفض والمتوسط هذه الدروس المرحليه تسهم في الوصول الى مستوى الاداء المهارى المطلوب والقاء المزيد من الضوء على استراتيجيه التعلم لإتقان واهميتها وفاعليتها خاصه في كليات التربيه الرياضيه.	2012
4387	12046922	دراسيه المفارقة في السرد العربي القديم/	علي، طارق مهني أحمد.			يأتى البحث الحالي استجابه للعديد من توصيات البحوث والدراسات والمؤتمرات فيسعى الى استخدام استراتيجيه تدريس غير تقليديه من اجل تطوير التدريس وتحسين العائد التعليمي تحقيقاً لمسنوى اعلى من الاهداف التربويه وذلك تمشياً مع اتجاهات التحديث والتطوير لمتاهج التربيه الرياضيه تقوم فلسفه استراتيجيه " بلوم" لإتقان التعلم على تقديم دروس مرحليه للطلاب من ذوى المستوى المنخفض والمتوسط هذه الدروس المرحليه تسهم في الوصول الى مستوى الاداء المهارى المطلوب. قد تسهم نتائج هذا البحث في القاء المزيد من الضوء على استراتيجيه التعلم لإتقان واهميتها وفاعليتها خاصه في كليات التربيه الرياضيه.	
						ويهدف البحث الحالي الى : تصميم وحدات تعليميه لبعض المهارات الهجوميه في كرة السله باستخدام استراتيجيه التعلم لإتقان -1 التعرف على فاعليه استراتيجيه التعلم لإتقان على مستوى الاداء المهارى لبعض المهارات الهجوميه في كره السله -2 وتوجد فروق ذات دلالة احصائيه بين متوسطات درجات القياس القبلي والبعدي للمجموعه التجريبيه في مستوى الاداء المهارى لبعض المهارات الهجوميه لكره السله لصالح القياس البعدي . وتقوم فلسفه استراتيجيه "بلوم" لإتقان التعلم على تقديم دروس مرحليه للطلاب من ذوى المستوى المنخفض والمتوسط هذه الدروس المرحليه تسهم في الوصول الى مستوى الاداء المهارى المطلوب والقاء المزيد من الضوء على استراتيجيه التعلم لإتقان واهميتها وفاعليتها خاصه في كليات التربيه الرياضيه.	
						يأتى البحث الحالي استجابه للعديد من توصيات البحوث والدراسات والمؤتمرات فيسعى الى استخدام استراتيجيه تدريس غير تقليديه من اجل تطوير التدريس وتحسين العائد التعليمي تحقيقاً لمسنوى اعلى من الاهداف التربويه وذلك تمشياً مع اتجاهات التحديث والتطوير لمتاهج التربيه الرياضيه تقوم فلسفه استراتيجيه " بلوم" لإتقان التعلم على تقديم دروس مرحليه للطلاب تسعي المؤسسات التعميميه عمى اختلف مستناتيات ا إلتى تمتيت م تذا المتامع المتممته لمتممتت الت ا يمتت م تاع العميمته التعميمته سمنا يتتاست ام ا عتتط قتي تذا تعتمت تع التعميمي السمنا م التعميمته التي تتنام م ذا سمنا لمتمم عمى الفعاع الفعيمي سين المتعممين اصلا الى اقدم معمام تعميمي ممكن . التاكيم عمى إيمان التعميت mastery Learning مستعم في الكناسات التسليته متن ا تم عتقا كفتا ع العميمه التعميميه ،الم ا م " 91 smith ت(أن الأى ا عم الأكتع إمتاماً لما يتعممان ، أكتع إمتاماً لمتمم <1] " ات ا ز لم ات التي تاكم إلي ت ايميمان عمى التتظليت المي ت أهما اذ ة المعالت . إسنت ا عتي ية التتعمت لقتمتان strategy for learning master متن الاسنت ا عتي يات التعميمته ل ميئته الم مة التي ت عت إلي ا التسليه العياديه لتن لآت تا تعتمت عمتي ق تئ التتعمت ل سيعته الم مة التي سنا تعمم ا من خفم تمسيت الم تاى إلي ا مات تعمميه صغيعم م ممع الأهمنا مذا استتخامت عتم كسيعت متن الاختسا ا عت التكاينيه من التنا التخصيصتي ختقم كتم عمي تعميمي التي يت تمم متن خفل تا تمى اصنام التعمميتين لمستائى اتتمتان 08 % مزا الاعتماد عمتي التتغ يته ال ا ع عته لمتن لتت ي ممنا مستائى اتتمتان اتي صاعع م ماعات صغيعم ، سيئما يتعض التتمتان إلي أتي ة إتي ا ع يط اس ت اتنتا اسنت ا عتي ية اتنتا إيتاقي ماخم الممي التعميمي قيط تصا الأخ ا من ا م اصنام 08 % متن التعمميتين لمستائى اتتمتان ست سمعت ت اممعت ت الخاصة . يتتمت الميمه التسليته ل ت ا التنا متن التتعت قتي تمميتط التتغ يته ال ا ع عته المستمعم لمتممعتت لت متع لقط اسنم ا عيه التعتت افعاليظ ، تعميم مساعه ا الا سام تي الاصام إلي التمكن . ايؤكته التتعتت لقتمتان عمتي الفعاع الفعيمي ، الكتتط يتعض التاءت عتمها كمسمته ت تتام مان انت تاز ، ق تا يستتغم ا استتغلا كيتا كاسيه لمتمم عمى ا يث يع ي كم تمعتت مط قتي أن يتتعتت افتنا لمستاه الخصصتي قتي تمام عم ا عتط ، اسعته لمتممط ، السعمامه ، اما لقط ، لت لن ق تا اسنما يعتت ستأخلف الاسنت اسات ستيق الأقت ا عم ، لكتتط يتع ا الاختف أساسا لمتمعتت الفعام ، ليعتقا سمنا أما هولا الأى ا عم قعما ا ماعيا . كتعم السئمة متن الأخت ة ال عيكته التي تميزت سا تام الميمت متن الم تا ا عت التي تكت مت متن الفعت إسماع أكتع من م ا ع ق ا ع ا ا الماها في تتاسع اتسمم اكفا ع عاليه . ل لن تعشع كعم السمة متن العيادات التي يتأع س ا ممنا الأما ال عكي لمم ا ا عت ال عيكه المعكسه سمستنا أما المقمعات ال عيكته لمم ا ا عت سنا كالتت هت ه ال عكتات متن التتم السستي اا الصع م ات المتتمع عمتي مممت هت ه ال عكتات في تما ج عكي متكام في حكم م ا ع معكسه شكمة البحث : من خفم سيعه عيم الما ئة ايام ا ستمعي لت سيمتات العميمه لمتمعتت كتعم السئمة لمفعه تة التالئته عست المتتاهت التتتمعي التعميئته العيادكتيه لخصمتنا كتتتعم السئمة كيميئته التعميئته العيادكتيه سمستنا المعنتته - تا الاملا لا طلت:	

						صدقت (فلاحة 2) . أما المجالس في عيد الأمكييف فقد تطورت حيث كانت المجالس تعقد في قصير فخمسة ، حيث استمعنا بعض القصير الرمانية ، كينكا لأنفسى بعض القصير الخاصة بي (3) ، فقد بنى معاً كية قصير الخضرة في دمشق ، ك ذهب الأخم فاء الأمل كيك في دة الأ قصير الأ سره كالك أرسى ، كاتر شكا المناس كالكساند كعمكا المستار ، كايضا افمكا الحجاب كالج أرس ، ككاف معاً كية ألك مف اتخذ الاسره قة بيا بطارقة الر ك في الشا ، ككعص المستار كالمنافس ، أمالك أرسى فكاف ألك م فامد تعمد يا زو باد يف ابو كالى معاً كية على عمى الازا (4) ، كاتقبن الأمكييف مف الر ك كالفرس مظار الإبية كاطل اوز ، كمنافقة الاشعار في المجالس ، كنفش الذبياح كالفز كاصطناع الاسره مف الانكس كالمج كالذنب (5) فأصبحت مجالس الخفاء في العيد الأمك مجالسا للأدب كالحكمة كالشعر الخ ، كاختمفت مجالس الخفاء الأمكييف الإجتماعية باختلا شخص يدى كيكلى ، فقد كاف الأمكييف حكاما نشطاء خصصكا شط اركبى ارمف كيمى للاعبا الإدا ريمك حى د يف فضكا الأمسيات كالموالى في السمر (1) ، كعشقكا فى بادئ الأمر سماع القصص التاريخية ، كفضمكا منيا بصفة خاصة أساطير الحركب ، كذا فضلا عف إنشاء الشعر (2) . تطكرت المجالس في العصر العباسى ، فكانت أركع المجالس فى حشف أثاثيا ، كسعة رحاليا ، ككثرة عمماتيا ككثرة ادنيا ، ككنعك أبحاثيا ككنفكيا ، أما مجالس الطرب التى كانت الصيغة الادبية عالية عميا بما يثار فيها مف حديث الشعر كالشعر كتنفسر ككمات إلى يتغنى بيا المنعكف ، كمف أشير خفاء بنى العباس فى فامة مجالسى كركعنيا الرشيد ككلمامكف (3) . فمجالس الرشيد كانت تحتشد بأشير العماء مف فركع العم (4) ، كايضا مف أشير شع ارم مجالسو أبك نكس كالك العتابة كدعنب كسمم فبال كلبد ، كاله بلش بف الأحن ، كمف الافة أبك كيتن كالك شاق عى ، كمحمد بف الأحصف ، كمف الأمعك د يف أبك ع بدة كالا صمعى كالك سناى ، كمف أشير المورخيف ال كاقدل ، كمف أشير المنعيف كالمصمى كلف إبنع (5) . أما كالممكف فكانت مجالسو تعتبر مف أركع المجالس العممية فى تاريخ الحضارة الإسلامية إذا كاف لك نفسو يعتبر عالما ، ككاف بلاطو يشم الأ كؤ بر مف رجيا الهم كالأدب كالك شع ارم كالأطباء كالفلاسفة مف جميع أنحاء مممكو ، ككنى ارماف كابدأ المناقشات ، ككثير العماء لميحت (6 لميحت) . كايضا كاف ذكر الك ارقيف أم ككاييف بيع كالكب ذكر اركبى ارم فى تطكر العم ، حيث كاف بكلك الكتب مف الأدباء ذك الثقافة الرفيعة ، مت إبال اندى صاحب (الغريست كيكافكت) معج الأدباء (ك كمعج المذاف)

4403	12053488	تأثير برنامج تدريب بليومتريك لتنمية القدره العضليه على مستوى أداء التحركات الخططيه النفاثيه وكرة اليد/	سيد، محمد أحمد همام.				2013	يهدف البحث الى تصميم برنامج تدريب بليومتريك لتنمية القدره العضليه على مستوى أداء التحركات الخططيه النفاثيه اثنتييه كرة اليد من خلال المعرفه وتأثير التدريب البليومتريك لتنمية القدره العضليه على مستوى أداء حائط الصد وعلى مستوى أداء التحركات النفاثيه.	
4404	12054083	برنامج تعليمي باستخدام دوره التعلم لتنمية مفاهيم أبعاد الحركه وأثره على تعلم بعض مهارات الكره الطائره/	محمد، محمد فؤاد راشد.				2014	يهدف البحث الى تصميم برنامج تعليمي باستخدام دوره التعلم ومعرفه أثره على: 1-تنمية مفاهيم أبعاد الحركه المرتبطه ببعض مهارات الكره الطائره لدى تلاميذ المرحلة الإيعاديه -1 تعلم بعض مهارات الكره الطائره لدى تلاميذ المرحلة الإيعاديه -2	
4405	12054112	الثقافه الترويحيه وعلاقتها بالمشاركه في الأنشطة الطلابيه وأستثمار وقت الفراغ لدى طلاب جامعه جنوب الوادى/	حمد الله، محمود فوزى محمد.				2013	تعميق مفهوم الثقافه الترويحيه لدى طلاب جامعه جنوب الوادى - تحديد انواع الأنشطة الترويحيه التى يهتم بها طلاب جامعه جنوب الوادى دور الجامعه في نشر الثقافه والأنشطه الترويحيه لدى طلاب جامعه جنوب الوادى بقنا -	
4406	12054131	أثر استخدام القصص الحركيه على تنمية اللياقه الحركيه لدى اطفال الروضه/	زاعى، عبد الرحيم محمد الصغير.				2014	تتمثل اهميه البحث والحاجه اليه في تنمية اللياقه الحركيه لدى اطفال الروضه باستخدام القصص الحركيه. وقد يفيد هذا البحث المشرفات ومعلمات رياض اطفال على تنوع اساليب التدريس لتكون اكثر تشويقاً.	
4407	12054146	تفعيل الأنشطة اللاصفيه الرياضيه في ضوء الشركه المجتمعيه/	بكرى، محمد فريد شوقي.				2014	ترجع اهميه البحث كمحاوله للتغلب على بعض المشكلات التى تواجه التعليم كالتمويل ونقص الادوات والامكانيات (ماديه- بشريه) وضعف الميزانيه المخصصه للأنشطه الرياضيه بالمدارس من خلال الشركه والتعاون مع المجلس القومى للرياضه وتوفير تلك الامكانيات والدعم المادى بالهيايات الشبائيه القريبه لتحقيق اهداف النشاط اللاصفى بالمدارس الإيعاديه.	

						أن الله -عز وجل- هو الذي أنزل القرآن الكريم بلسان عربي مبين، على نبي عربي أمين ، ثم هو الذي دعا إلى التنبير في آياته وكلماته، ثم هو -عز وجل- قدر تبين فهم النحاة للكلمة والجملة القرآنية، بما فتح الباب للراء أن تختلف بما يثري المعاني، فتؤدي المعاني المتعددة المتنوعة بعبارة قليلة موجزة، بل بعلامة إعرابية واحدة من ضمة أو فتحة أو كسرة أو سكون. وهذا قمة الإعجاز. وترجع أهمية الموضوع إلى :- هذا الموضوع يعد مهما لاتصاله بالقرآن الكريم الذي يمثل وعاء اللغة العربية الخالد، ويعد أول أدلة الشريعة بفروعها -1- والعربية بقواعدها، وإنه يؤكد أصرة القرابة بين علوم العربية وعلوم الشريعة الإسلامية هذا الموضوع يؤكد حقيقة مؤداها " أن العلاقة بين النحو والمعنى علاقة تبادلية"، فإذا كان الإعراب فرع المعنى – كما هو معروف وشائع- فإن شيئا آخر ينبغي أن يعلم وهو أن المعنى قد يتفرع عن الإعراب ليكون بذلك قرينة من قرأت الدلالة هذا الموضوع يرفع القواعد – بالإضافة وتوسعة- لفكرة وضع أساسها، تربط الأوجه الإعرابية بالإعجاز اللغوي للقرآن -3- الكريم، فتعد الأوجه الإعرابية للكلمة أو الجملة القرآنية يجعلنا وكأننا لسنا أمام آية واحدة، وإنما أمام عدد من الآيات بعدد الأوجه الإعرابية المختلفة، الأمر الذي يعني السعة والثراء في دلالات الآيات هذا الموضوع يحول لفت الأنظار إلى آثار تعدد التوجيه الإعرابي على دلالات آيات الكتاب، وما يلقي به هذا التعدد من -4- ظلال وارقة وأضواء كاشفة على المسائل العقيدية والأحكام الفقهية والمعاني التفسيرية هذا الموضوع يظهر عبقرية وألمعية الإمام الشوكاني - رحمه الله- عند عرضه لاختلاف معاني القرآن الآيات ودلالاتها -5- تبعا لاختلاف توجيهات إعرابها، مما يدل على إدراكه العملي العميق لحقيقة خروج المعنى من عبادة الإعراب أحيانا	
4408	12054194	ناصر، أحمد ناصر أحمد.	الأثر الدلالي لتعدد التوجيه الإعرابي في فتح القدير للشوكاني /		2013	يعد هذا الموضوع من الموضوعات الهامة في مجال الآثار الإسلامية والتي لم تأخذ حقه في الدراسة مقارنة بميثلاتها من الدراسات الأثرية وتكمن أهمية الدراسة في أنها تكشف لنا جانباً مهماً من الحياة السياسية في عصر دوله الإباطره المغول بالهند وتعرفنا على أحد الأساليب الداعية السياسية في تلك الفترة . هي دراسة تعرض فيها الأقليات الإسلامية التي تواجدت على أراضي الطرف البيزنطي والتي شكلت أحد العناصر السكانية في المجتمع البيزنطي فمن هذه العناصر من كان مقامه بالاراضي البيزنطيه مرتبطاً بطرف مؤقت ومنها من كان مقامه بشكل دائم كالأسرى والتجار المسلمين ومنها من كان مقامه بشكل دائم كالأسرى والتجار المسلمين بشكل دائم كالأسرى والتجار المسلمين. العناصر الإسلامية في القسطنطينيه (من القرن السابع وحتى القرن الثاني عشر الميلادي/ الأول وحتى السادس الهجري) التي تواجدت على أراضي الطرف البيزنطي والتي شكلت أحد العناصر السكانية في المجتمع البيزنطي فمن هذه العناصر من كان مقامه بالاراضي البيزنطيه مرتبطاً بطرف مؤقت ومنها من كان مقامه بشكل دائم كالأسرى والتجار المسلمینالمجتمع البيزنطي فمن هذه العناصر من كان مقامه بالاراضي البيزنطيه مرتبطاً بطرف مؤقت ومنها من كان مقامه بشكل دائم كالأسرى والتجار المسلمینمقامه بالاراضي البيزنطيه مرتبطاً بطرف مؤقت ومنها من كان مقامه بشكل دائم والتي شكلت أحد العناصر السكانية في المجتمع البيزنطي فمن هذه العناصر من كان مقامه بالاراضي البيزنطيه مرتبطاً بطرف مؤقت

4437	12059885	الكفاية الإنتاجية في الصناعة وعلاقتها بالروح المعنوية والأحتراف الفنسي لدى مديري الإدارة ومديري الإنتاج/	عثمان، سعاد سعيد محمود.		2014	كما تتضح أهمية الدراسة في تناولها لفئة لا ستهان بها في المجتمع وهم المد يرّون في أقصى الجنوب. تتأ ثل الدراسة (تشكلات الذات المتلبسة في الشعر العباسي حتى نهاية القرن الرابع الهجري) الدوافع التي فرت هذا الاتجاه في الشعر العربي في تلك الفترة من الزمن التي تميزت بوجود مجموعة من الشعراء الكبار وكذلك تسمي الدراسة التي تتبع لحوال الذات في العصر العباسي فإن الذات قد اتخذت مجموعة متنوعة من الصور والأحوال أبقت في كل حال منها عن طبيعتها وفلسفتها الذاتية تجاه نفسها والآخر وتجاه مجتمعها وكذلك في موقعها من الوجود والإنسانية عامة بيد أن هذه الدراسة لا تتوقف عند معرفة صور الذات الإنسانية في خطابها الانوي المباشر الصريح وفق تصاغر الجدليات المتناقضة للحياة الإنسانية إنما تبحث عن تلبس الذات التي مارسها الشعراء العباسيون وقد اقتضت هذه الدراسة تقسيم البحث إلى ثلاثة فصول يسبقها مدخل وتليها خاتمة وذلك على النحو التالي :
4438	12059906	تشكلات الذات المتلبسة في الشعر العباسي حتى نهاية القرن الرابع الهجري/	أحمد، عزت عبد العليم محمود.		2014	يتطرق المدخل المعنى اللغوي للذات ثم تتناول المعنى الاصطلاحي لها من خلال علماء النفس والفلسفة والاجتماع قديما وحديثا ثم عرض بصورة موجزة للذات في النظريات النقدية المختلفة وعلاقة الذات بالآثا أما الفصل الأول وعنوانه : دوافع الشعراء إلى شعر الذات فقد أخص بدراسة دوافع الشعراء إلى شعر الذات في العصر العباسي من دوافع سياسية واجتماعية وثقافية وفكرية ونفسية في حين جاء الفصل الثاني بعنوان :أحوال الذات في الشعر العباسي و ضم في ثناياه مجموعة مختلفة من أحوال الذات من ثائرة وعاشقة وخاضعة وكذلك من متفردة وجماعية ومغترية وأيضا منتجة للقيم ومشكلة للوجود .
4439	12059951	فلسفه الأخلاق عند برتراند رسل/	علي ، سعيد علي عبيد.		2014	أما الفصل الثالث فعنوانه : تلبسات الذات في الشعر العباسي وقد ضم هذا الفصل الصور التي تلبست فيها الذات من إنسان وحيوان وطبيعة جماد وتنتهي الدراسة بخاتمة تتضمن أهم النتائج ثم قائمة بالمصادر والمراجع وفهرس للموضوعات. تستخدم الدراسة المنهج التحليلي النقدي المقارن وهو ما يناسب فلسفه الأخلاق عند برتراند رسل لاننا سوف نتطرق لتحليل ارانه في كل نظريه اخلاقيه تبناها رسل ثم عدل عنها وهومنهج نقدي لاننا سوف نتبع اراء رسل بصورة نقدية في فلسفه الاخلاق وايضا موقف رسل النقدي من الفلاسفه المعاصرين في فلسفه الاخلاق ومقارنه ذلك بفلسفه الاخلاق في نفسها العام من ناحيه و اراء الفلاسفه المعاصرين من ناحيه اخرى.
4440	12059985	محددات مقترحه لاختيار طلاب تخصص التريس بكميات التربه الرياضيه بجمهورية مصر العربيه/	عرايبي، محمد خضري محمد.		2014	ترجع اهميه البحث والحاجه اليه: 1- انه محاوله منهجيه لوضع محددات لاختيار طلاب تخصص التدريس بكميات التربه الرياضيه - 2- قد يكون هذا البحث عامل مساعد للقائمين على اختيار طلاب تخصص التدريس بكميات التربه الرياضيه - كما يهدف البحث الى وضع محددات مقترحه لاختيار طلاب تخصص التدريس بكميات التربه الرياضيه بجمهورية مصر العربيه.
4441	12060047	فاعليه برنامج مقترح لتنميه بعض مهارات التعبير الكتابي والاتجاه نحو اللغه العربيه لدى تلاميذ المرحلة الابتدائيه في ضوء المعايير القويمه للتعليم في مصر/	عبد الدايم، انتصار فيض السيد.		2013	يهدف البحث الى تقديم مقترح لتنميه بعض مهارات التعبير الكتابي لدى تلاميذ المرحلة الابتدائيه في ضوء المعايير القويمه وقد تحدثت مشكله البحث في ضعف مستوى اداء تلاميذ مرحله الابتدائيه لمهارات التعبير الكتابي ولعلاج هذه المشكله حاول البحث الاجابه عن الاسئله الآتيه: 1- ما مستوى اداء تلاميذ الصف السادس الابتدائي لبعض مهارات التعبير الكتابي في ضوء المعايير القويمه - 2- ما فاعليه البرنامج في تنميه بعض مهارات التعبير الكتابي لدى تلاميذ الصف السادس الابتدائي في ضوء المعايير القويمه - تتمثل الدراسه في " فعاليه الإرشاد السلوكي في رفع تقدير الذات للتلاميذ ضحايا العنف المدرسي "ومن ثم هدفت الدراسه إلى التعرف على العلاقه الإرتباطيه بين تعرض التلاميذ للعنف المدرسي وتقديرهم للذات، والتحقق من فعاليه برنامج سلوك قائم على فيثات الإرشاد السلوكي لمعلمي ضحايا العنف المدرسي وإكسابهم الأساليب التربويه، وتعتمد فعاليه البرنامج الإرشادي على بعض فيثات الإرشاد السلوكي في تنمية بعض المهارات الإجتماعيه لدى الأطفال المتلجلجين (أفراد المجموعه التجريبية) وبالتالي الحد من اضطراب اللجلجه لديهم، وكذلك التعرف على مدى استمرار فعاليه هذا البرنامج بعد الإنتهاء من تطبيقه خلال فترة المتابعه.
4442	12060627	فعالية الإرشاد السلوكي في رفع تقدير الذات لدى التلاميذ ضحايا العنف المدرسي /	محمود، شيما بدري فكرى.		2012	أهمية الدراسة:- الأهمية النظرية : ترجع أهمية الدراسة من الناحية النظرية إلى أنها تتناول اضطراب كلامي شائع بين الأطفال، ويؤثر هذا الاضطراب على كافة جوانب شخصية الطفل الانفعالية والشخصية والاجتماعية، حيث يكون الطفل المتلجلج غير قادر على إقامة علاقات اجتماعية مع الآخرين المحيطين به، ومن هنا كانت الحاجة إلى تنمية بعض المهارات الاجتماعية لدى الأطفال المتلجلجين للحد من هذا الاضطراب لديهم، وعلى الرغم من تنوع الدراسات الأجنبية التي تناولت موضوع تنمية المهارات الاجتماعية للمتجلجين، إلا أن الدراسات السابقة العربية في حدود علم الباحثة لم تسلط الضوء على هذا الموضوع، كما تسهم هذه الدراسة في زيادة المعلومات عن الأطفال المتلجلجين، وكذلك المهارات الاجتماعية. الأهمية التطبيقية : تتبع الأهمية التطبيقية لهذه الدراسة من أهمية الأسلوب الإرشادي المستخدم، وهو برنامج الإرشاد السلوكي، وقد كشفت العديد من الدراسات السابقة عن فعالية هذا النوع من الإرشاد في تنمية المهارات الاجتماعية، وكذلك في خفض اضطراب اللجلجه، وبالتالي يكون هناك تقيراً إيجابياً على علاقات الطفل الاجتماعية مع الآخرين، وكذلك تفتح هذه الدراسة المجال لدراسات أخرى تستهدف عمل برامج إرشادية لتنمية المهارات الاجتماعية للمتجلجين، فعالية برنامج الإرشاد السلوكي في رفع تقدير الذات لدى التلاميذ ضحايا العنف المدرسي عينة الدراسة، فعالية برنامج سلوك قائم على فيثات الإرشاد السلوكي لمعلمي ضحايا العنف المدرسي وإكسابهم الأساليب التربويه، إستمرارية فعالية البرنامج الإرشاد السلوكي بعد فترة المتابعة. لعبت التقود دوراً هاماً في الحياة الاقتصادية في العالم الإسلامي وذلك لإتصال التقود بجوانب مهمة في الشريعة الإسلامية من حيث المعاملات والعبادات والصداق والديات والوقف والزكاة وغيرها ولقد حظيت بأهمية خاصة في العصر الإسلامي وسعى الحكام إلى ضبط وزنها وشكلها على عيار جيد حتى تقوم بدورها الشرعي في أداء الزكاة وسائر المعاملات وعندما إتفصلت العديد من الدول عن كيان الدولة الإسلامية وإختلفت أوزان نقودها وعيارها، قام الفقهاء في معظم بقاع العالم الإسلامي بوضع المؤلفات التي تحدد قيمة الزكاة بالتقود الجارية:- دراسة جابت من التاريخ السياسي للإمبراطورية الرومانية وكان له دور هام في تاريخ الإمبراطورية الرومانية بصفة - 1- تحديد مفهوم الشريعة عند الشعب الروماني وكيفية إكتساب تلك الشريعة والحفاظ عليها - 2- محاولة تصنيف الأباطرة الرومان (فترة الدراسة) من خلال تحديد الشرعيات المختلفة عند الشعب الروماني مثل شرعية -3- السناتو الإرث، التبنّي، وأخيرا الجيش بشقيه من الحرس الإمبراطوري والفيالق الرومانية النتائج:- 1- لعبت المرأة دورا كبيرا في إعطاء الإمبراطورية الشريعة من خلال مباشرتها للقتل أو التحريض على القتل للإمبراطور - الموجود على العرش، أو المنافسين له على العرش الإمبراطوري وجود الكثير من القتل والإغتيالات والقتل والخيانة والغدر في حياة الأباطرة الرومان -2-

4443	12060639		سعيد، حجاج أحمد سيد أحمد.	تقود أياطرة المغول بالهند حتى نهاية عهد جهاتير :		2013	3-	لعب قائد الحرس البرياتوري دورا كبيرا ومحورا وجوهريا في حياة الإمبراطور - تعتبر دراسته حياة العلماء الاقتصادية والاجتماعية في اى مجتمع من المجتمعات الإسلامية من أهم الدراسات التاريخية والحصارية وذلك لما تمثله هذه الدراسات من انعكاس لأوضاع تلك المجتمعات على الصعيدين الاقتصادي والاجتماعي وكذلك لما تمثله فيه العلماء من مكانة اجتماعية وافية داخل تلك المجتمعات ومما يوسف له حقاً انه على الرغم من اهمية تلك الدراسات الا انها لم تحظى باهتمام وإقبال الباحثين بالشكل الذى تستحقه تلك الدراسة حيث تركزت الدراسات المتعلقة بالعلماء في الأونة الأخيرة وانصببت بشكل واضح على الجانب الثقافي لهم.		
4444	12060654		حجي، حسن رضوان محمود.	الحياة الاقتصادية والاجتماعية للعلماء في ازربيجان منذ ظهور السلاجقة حتى نهاية العصر الإيلخاني :		2014		اعتمدت الدراسة على المنهج الموضوعي والدراسة تهتم بأحد المتغيرات السكانية الرئيسية وهو القوى العاملة فتعرض لدراسة نمو وخصائص القوى العاملة والعوامل المؤثرة فيها كذلك على المنهج الأقليمي وذلك في دراسة خصائص القوى العاملة وتوزيعاتها على الوحدات الإدارية للإقليم كما اعتمدت الدراسة على المنهج التاريخي الذى يستعرض التغيرات التى طرأت على حجم ومعدلات القوى العاملة في الإقليم في فترة الدراسة (1986-2006) ومتابعة تطور ها وتم الاستعانة بالأسلوب الكمي والكارتوجرافي والأساليب الإحصائية في تحليل بيانات الدراسة كما استعان الطلاب ببعض برامج الحاسب الآلى.		
4445	12060672		علي، أحمد سعيد أحمد.	القوى العاملة في محافظات إقليم جنوب الصعيد في الفترة (1986-2006) :		2012		اهتم بدراسة المشتغلين حسب قطاعات النشاط الاقتصادى موضحاً نمو وتوزيع وتركيب المشتغلين بكل قطاع في أقسام المحافظة مع توضيح التصنيف الثلاثي للأنشطة ومعاملات توطن العاملين بالأنشطة الأولية والثانوية والثالثة ، ودراسة سوق العمل وفرص الاستثمار بكل قطاع من قطاعات النشاط الاقتصادى بالمحافظة . الفصل الخامس : ركز على دراسة مقومات الجذب السياحي بمحافظة البحر الأحمر ، وتطور الحركة السياحية بالمحافظة ، كما تعرض لدراسة حجم قوة العمل السياحية ، وتوضيح خصائصهم الديموغرافية والزواجية والتعليمية والمهنية مع توضيح تيارات الهجرة الوافدة إلى المحافظة وأهم الخصائص الديموغرافية للمهاجرين وأهم دوافع الهجرة ، وفي النهاية تم عرض أهم المشكلات التي تعاني منها قوة العمل السياحية بالمحافظة مع الاعتماد على نتائج الدراسة الميدانية لاستكمال جوانب هامة تفيد الدراسة . الفصل السادس : ناقش الأعداد المتوقعة للسكان وقوة العمل بمحافظة البحر الأحمر وأقسامها في الفترة من (2006/2031) ، وذلك بالاعتماد على مجموعة من الإسقاطات باستخدام الحاسب الآلى والمعادلة الأسية لإسقاط أعداد السكان وقوة العمل حسب فئات السن والنوع بالمحافظة اعتماداً على ثلاثة فروض (مرتفع – متوسط – منخفض) مع ترجيح الفرض المتوسط ، مع توضيح سنوات التضخايف اللازمة لتضاعف حجم السكان وقوة العمل ، بالإضافة إلى عمل جدول الحياة المختصر لقوة العمل والمشتغلين بالمحافظة .		
4446	12060772		عبدالوهاب، خان شيبانه ابراهيم.	منهج القرطبي في تفسير آيات الأحكام والقواعد الأصولية من خلال تفسيره (الجامع لأحكام القرآن)).		2012		يمتاز القرطبي عن غيره من المفسرين بأنه رصد الأحوال السياسية والاجتماعية والدينية والعقائدية في تفسيره، عند تفسيره لبعض الآيات مما يدل على أن تفسيره كان مرآة صادقة للتطورات التي حدثت في عصره كما أن هناك بعض الشيوخ الذين ذكرهم الإمام القرطبي في تفسيره قد اغفلتهم كتب التراجم والسير بالإضافة إلى دفاعه عما نسب إلى الصحابة التابعين من آراء فقهية، ومنهجه في الترتيج بين آرائهم دفاعه عما نسب إلى الإمام مالك من أقوال وكذلك رفضه لنسبه (كتاب السِر) إليه وترجيحه للمذهب المالكي. مشكلة الدراسة :- تمثلت مشكلة الدراسة في تحديد فلسفة المنهج عند المسلمين وكيف تطور خلال القرون الثلاثة الأولى للهجرة. هدف الدراسة :- هدفت الدراسة إلى :- الكشف عن المنهج التربوي عند العرب الجاهليين وفلسفته في ضوء القرآن الكريم والحديث الشريف - تحديد التصور الإسلامي لحقائق الألوهية والكون والإنسان والحياة - إبراز تطور العلوم الشرعية في القرون الثلاثة الأولى للهجرة - توضيح تطور علوم اللغة والأدب في القرون الثلاثة الأولى وموقفها من حقائق التصور الإسلامي - الوقوف على تطور العلوم الكونية في القرون الثلاثة الأولى للهجرة وموقفها من حقائق التصور الإسلامي - وضع تصور مقترح لمنهج تربوي إسلامي من حيث الأسس والعناصر المكونة له. وتحقيقاً لهذا الغرض استخدم الباحث المنهج التاريخي التحليلي للوقوف على فلسفة المنهج وتطوره عند المسلمين خلال القرون الثلاثة الأولى للهجرة وتناولت الدراسة الفصول التالية : المنهج عند العرب قبل الإسلام وفلسفته في ضوء القرآن الكريم والحديث الشريف، التصور الإسلامي لحقائق الألوهية والإنسان والكون والحياة، العلوم الشرعية وتطورها في القرون الثلاثة الأولى للهجرة، علوم اللغة والأدب في القرون الثلاثة الأولى للهجرة وموقفها من حقائق التصور الإسلامي، العلوم الكونية في القرون الثلاثة الأولى للهجرة وموقفها من حقائق التصور الإسلامي تصور مقترح للمنهج من حيث الأسس والعناصر. النتائج والتوصيات:- توصلت الدراسة إلى أن المنهج عند العرب الجاهليين تكون من عدد من المعارف، وهي المعارف الدينية والشعر والنثر والكتابة والخط والطب والبيطرة، والكهانة والعرافة، والعيافة والزجر والنسب وتعبير الرؤيا، والحساب وعلم النجوم. وعندما جاء الإسلام رفض العديد من عناصر هذا المنهج مثل الكهانة والعرافة والوشم، وإعترف ببعضها الآخر بعد إضفاء طبيعة الإسلام عليها وتنقيتها من كل ما يخالف عقيدة الإسلام، وأقر البعض الآخر وعمل على نشره مثل الكتابة والخط. ولقد ازدهرت في المنهج الإسلامي العلوم الشرعية جنب إلى جنب مع الحركة الأدبية من الشعر والنثر وحررته الترجمة وظهور علوم اللغة ومقارنة الأديان، وظهرت العديد من العلوم الكونية واهتم الإسلام بالعلوم الطبية ودراسة السيرة والتاريخ وكان هذا الإزدهار منطلقاً من حقائق الإسلام الكبرى وروزيته للألوهية والكون والإنسان والحياة.

								Research work in the area of extracting rules from tranined neural networks has observed much activity recently.Research work in the area of extracting rules from trained neural networks has observed much activity recently. However, the degree of complexity of ANN increases exponentially as a factor of the numbers of input and hidden nodes. The complexity problem can be improved by constructing the structure of the network based on constructive learning One of the most difficulties for the extraction of		

						accurate knowledge is that the data being mined can be so noisy. In these cases neural networks are a feasible solution, due to their relatively good tolerance to noisy and generalization ability and the performance of a neural network is directly related to its parameters and architecture. But the difficulty is that the classification rules generated by neural networks are usually hardly comprehensible to the human users and this is a serious problem for the user. This is because neural network characterized by real-valued parameters that are difficult to interpret. This problem can be solved by constructing hyper system from neural network and a new technique of Evolutionary Algorithms (EAs) called Gene Expression Programming (GEP). Gene expression programming (GEP) is the most recent technique of evolutionary algorithm, for data analysis. GEP uses fixed length, linear strings of chromosomes to represent computer programs in the form of expression trees of different shapes and sizes, and implements a GA to find the best program. Gene expression programming is one of several linear variations and liner chromosomes of GP and its aim is to improve the performance of GP and to offer many options of implementing GP in the 3rd and the 4th generations of computer programming languages. In this thesis, we presented destructive neural network learning technique and the analysis of the convergence rate of the error in a destructive neural network with and without threshold in the output layer at first. In addition, an algorithm has been proposed for rules extraction based on a trained neural network using Gene Expression Programming (GEP). We applied our method to public-domain dataset in order to emphasize that the set of rules extraction from the proposed method is more accurate and brief compared with those obtained by the other models.

							تعتبر البيئة المحيطة بالفرد لها أثر كبير على صحته وسلوكه العام فالإنسان يعيش في بيئته وهو في صراع دائم بينه وبين العوامل التي تؤثر على صحته ولولا يقظته ورعايته الصحية ومحاولاته المستمرة لتحسين نفسه ضد هذه العوامل لبشئ الطرق لتعرضه لمختلف الأخطار الصحية. والقوام السليم يعتبر انعكاسا لصوره الفرد المتكاملة من النواحي البدنية والنفسية والعقلية والاجتماعية، فالقوام من اهم المؤشرات الهامة الدالة على صحة وسلامة جسم الإنسان، ولذلك اهتمت الدول بسلامة القوام لجميع افرادها في جميع مراحل العمر، فالقوام السليم يزيد من شعور الإنسان بالثقة بالنفس، فيعكس ذلك في صورته معاملاته واتصالاته بالأفراد واتجاهاته نحو المجتمع الذي يعيش فيه ومن هنا يجب علينا أن نهتم بأطفالنا سواء أكانوا في المدينة أو القرية وعلياً أن نذكرهم حق الذكر بأن يكون لهم مكان مرموق في نفوسنا وأذهاننا فزراعهم صحياً وننشر بينهم العادات القوامية السليمة ونجذبهم إلى الميادين الرياضية حتى يكتسبوا بذلك قواما معتدلا سليما خاليا من الإحترافات فالأطفال هم شباب المستقبل وهم أمل كل شعب في غده، وعدة كل دولة في مستقبلها، ويعف على عائق الدولة والعاملين بميادين التربية الرياضية، أمانة نشر الوعي القوامي والإهتمام بصحة جميع فئات الشعب، واكتساب جميع أفراد اللياقة، بالقوة، من خلال التربية الرياضية بأنشطتها المختلفة التي تعتبر من أحب الأشياء إليهم. أهداف البحث:- يهدف البحث إلى التوصل للإحرفات القوامية الشائعة لتلاميذ المرحلة الإعدادية من خلال التعرف على العدد والنسبة النسوية للإحرفات القوامية الشائعة بالجزء العلوي للجسم والطرف السفلي والقدمين لدى كلا من (تلاميذ الريف، تلاميذ الحضر) بالمرحلة الإعدادية بمحافظة أسوان. تساؤلات البحث :- ما هي الإحرفات القوامية الشائعة لدى تلاميذ الريف بالمرحلة الإعدادية بمحافظة أسوان ؟ ماهي الإحرفات القوامية الشائعة لدى تلاميذ الحضر بالمرحلة الإعدادية بمحافظة أسوان ؟ مصطلحات البحث :- • القوام هو العلاقة الميكانيكية بين مختلف أجهزة الجسم الهيكلية والعضلية والحوية والعصبية، وهو مجموعة العظام والعضلات وباقى أجهزة الجسم التي تبني مظهره. • القوام الجيد هو الوضع الذي تكون فيه الأجزاء الرئيسية للجسم وأجهزته ممتزنة ومنظمة فوق قاعدة الارتكاز ، وتكون العلاقة التنظيمية بين هذه الأجزاء سليمة بحيث تمكنه من القيام بوظائفه بكفاءة وبأقل جهد حيث أن القوام الجيد لا يحتاج إلا لقليل من الطاقة حتى يتوزن فكما زادت الطاقة المبذولة للحفاظ على الوقوف بإعتماد كان ذلك مؤشراً لضعف العضلات. 2014		الإحرفات القوامية الشائعة لتلاميذ المرحلة الإعدادية بمحافظة أسوان : خضري، عبد الكريم فاروق.	4474	12076644
							أهمية البحث :- تتمحور أهمية البحث من خلال الإحساس بما يعاني من كبار السن ومن خلال التعايش مع هذه الفئة لفترات منتظمة ومستمرة ومحاولة مساعدتهم من خلال الآتي :- 1. التعرف على أفضل الطرق التي تتناسب في الوصول إلى الإسترخاء مع كبار السن 2. تشجيع الاتجاه نحو التعامل مع فئة جديدة لم تحظى بالرعاية الكافية في الدراسات والبحوث حيث أنها تمثل ثروة المجتمع من علماء ومفكرين 3. التوصل إلى برنامج مقترح للإسترخاء لدى كبار السن قد يساهم في مواجهة الضغوط النفسية للحياة 4. إقترح أسلوباً علمياً يستخدم في مواجهة الضغوط النفسية لدى كبار السن 5. تصميم برنامج باستخدام الإسترخاء العضلي والتخيلي لمعرفة أثره على الضغوط النفسية التي يعاني منها كبار السن هدف البحث :- يهدف البحث إلى تصميم برنامج باستخدام الإسترخاء العضلي والتخيلي ومعرفة أثره على مواجهة الضغوط النفسية لدى "كبار السن" بمحافظة سوهاج. فروض البحث :- (العضلى والتخيلي)توجد فروق دالة إحصائية بين متوسطى القياس القبلى والبعدى للمجموعة التجريبية للإسترخاء والمضغوظ النفسية لكبار السن بمحافظة سوهاج لصالح القياس البعدى (العضلى والتخيلي)توجد فروق دالة إحصائية بين متوسطى القياس القبلى والبعدى للمجموعة الضابطية للإسترخاء والمضغوظ النفسية لكبار السن بمحافظة سوهاج لصالح القياس البعدى توجد فروق دالة إحصائية بين القياس البعدى للمجموعتين التجريبية والضابطية للإسترخاء (العضلى والتخيلي) والاضغوظ النفسية لكبار السن بمحافظة سوهاج لصالح القياس البعدى للمجموعة التجريبية الاستنتاجات :- فى ضوء النتائج التى توصل إليها الباحث إستنتج ما يلى :- 1. ممارسة تدريبات الإسترخاء لها تأثير إيجابى على الضغوط النفسية لدى كبار السن 2. يتتو ع إستجابة أفراد العينة لتدريبات الإسترخاء باختلاف الحالة الاجتماعية والإقتصادية والحالة الصحية لدى كبار السن 3. تتوقف نسب خفض حدة الضغوط النفسية لدى كبار السن على مدى إستمرارهم فى ممارسة تدريبات الإسترخاء 4. الأفراد الذين يتمتعون إلى بيانات متوسطة اجتماعيا والذين تعتمد عليهم الأسرة فى تصريف شئون حياتهم يتعرضون لضغوط نفسية حادة 5. يضعف العائد المادى لدى كبار السن له أثر سلبى على الإستجابة للبرامج النفسية وخفض حدة الضغوط النفسية 6. يزداد التوتر العضلى لكبار السن مقارنة بالشباب فى نفس الظروف 7. زيادة حساسية كبار السن للمشكلات النفسية عن الشباب التوصيات :- من خلال الاستنتاجات التى أمكن التوصل إليها وفى حدود عينة البحث يوصى الباحث بمايلى:-				

4479	12109331		penicillin resistance against staphylococcal isolates recovered from subclinical mastitis in sohaq governorate/	mohamed-manar mahmoud helmy.			2012	The cell envelope is the target of numerous antibiotics most of which are involved in blocking or disrupting peptidoglycan biosynthesis continual synthesis processing and polymerization of peptidoglycan precursors together with cell wall degradation and trun over is essential for maintaining cellular shape as well as owing cell growth septum formation and division. The last extracellular enzymatic reaction since wall synthesis are carried out by the penicillin binding proteins and can be inhibited by the two magor groups of cell wall active antibiotics the beta - lactams and the glycopeptides .

								The honeybee colony consists of thousands of individual insects living together. Such crowded condition provides ideal environment for the establishment and spread of infections. The brood and adult bees are subject to infectious disease, Nosema is the most serious disease found in adult bees. Nosema disease in bees is caused by parasitic infection with Nosema. apis, which attacks the epithelium cells of the mid- gut but does not kill the bee outright, nor does it produce diagnostic symptoms that are ready visible. However, the disease causes severe losses to the beekeeping industry by damaging queen activity, retarding the development of package bees and over-wintered colonies, shortening the lives of worker bees and reducing the quantity of brood reared. These factors combine to reduce overall honey production. This work was conducted in Qena regions during seasons 2011. Between two hybrid of the Carniolian bee race and Italian bee race. The aim of this work is to Study of the prevalence of this parasite and its effects ecological, Physiological and Histological on the honeybee. The obtained results may be summarized as follow: 1- Ecological studies of the protozoan parasite Nosema apis of the honeybee, Apis mellifera:		

							1.1. Seasonal fluctuation of Nosema apis: This section of the present study is to estimation seasonal variations of Nosema infection levels with regard to certain climatic factors (maximum and minimum temperatures, relative humidity) were studies in apiaries at Qena region from January till December 2011. Samples were taken from the central brood combs (nurse bees). Mean number of spores/bee were used as an indicators of infection levels. Data showed that the number of spores/bee for each colony of the different race increased in winter and spring. It is worth nothing the summer gave the lowest number of spores. It has been proved that the winter and spring more investigation than autumn and summer. Also result showed that Nosema infection levels in the both two races had a significant relationship with the all weather factors. where high temperatures (mixture and minimum) during summer reduced the infection. While temperatures during spring and winter coincided with the significant increase in the infection levels. 1.2. Measurement of sealed worker brood: Nosema infection prevents normal brood rearing in this study. Results indicated that there was significant negative relationship between Nosema infection levels and the measurements of the honeybee brood areas, on Carniolian bee race was higher than Italian bee race. 2- Physiological and morphological studies: 2.1. Development stages of the hypopharyngeal gland of the nursing bee: The result indicated that there was significant negative relationship between Nosema infection levels and the development stages of the hypopharyngeal gland for two honeybee races. 2.2 Measurement of length of the mandibular gland: The result indicated that there was non-significant negative relationship between Nosema infection levels and the length of the mandibular gland for two honeybee races. 2.3. Measurement of length and width of the wax gland: The result indicated that there was negative relationship between Nosema infection levels and the length, width of the wax glands for two honeybee races. 2.4 Measurement of length and width of the right forewing: The result indicated that there was negative relationship between Nosema infection levels and the length, width of the right forewing for two honeybee races. Also result showed that the effect of Nosema infection levels on the length and width of the right forewing for Carniolian bee race was highest than Italian bee race. 3- Histopathological studies: The ventricular histology of artificially infected bees was studied with light microscopy. The histopathological observations obtained from histological sections of midgut of infected bees it could be concluded that Nosema infected in honeybees had shown to cause atrophy in the ventricular epithelia cells, which led to gland atrophy and starvation. These events contributed to the remarked decrease in the body weight eventually early death because the digestive function of infected midgut was impaired. Therefore, the ventriculus tissue was unable to meet the bee's nutritional needs. Generally, nosemosis causes heavy to the beekeeping industry, by shorten the bee's life span. The researcher recommends to intensify the care and treatment programs during months of heavy infection (January, February, March), in the Upper Egypt. Also prefer to use Italian honeybee races than Carniolian races because it is more resistant to Nosema disease infection in Upper Egypt.		
4482	12110349	Assessment of Nosema Disease on The Efficiency of The Honeybee Workers	Saif Elnasr, Rasha Abd Allah.			2012	The present thesis deals with the electrochemical and determination of some pollutant organic acids : monochloroacetic, dichloroacetic and , These Acids were determined using cyclic linear sweep voltammetric technique. the present investigation can be summarized as follow : the first chapter : the first chapter includes an introduction to voltammetry. it also contains an introduction to stripping voltammetric analysis, types of stripping analysis techniques and the parameters, which affect the stripping voltammetric response. we assessed the impact of anaesthesia with CO₂ and infection with Nosema apis on the lifespan of workers. In the field experiment, the age at onset of foraging was observed in groups of workers with different expected lifespans. In both the experiments, workers originating from one queen inseminated with the semen of one drone were divided into five groups. The first group was anaesthetized with CO₂ on the first day of life. Workers from the other three groups were individually inoculated with a constant number of N. apis spores on the 1st, 6th and 11th days of life. Workers from the fifth control group were neither treated with CO₂ nor inoculated in any way. Both the laboratory and field experiments revealed that anaesthetized and infected workers had shorter expected lifespans compared to control bees. Amongst infected workers, those inoculated earlier in life survived for a significantly shorter period of time in		

							comparison to those infected later in life. In agreement with the expectation, the field experiment showed that anaesthetized and infected workers with shorter expected lifespan start foraging earlier than control workers. Amongst the infected workers, age at inoculation correlated with age at onset of foraging. This means that short-lived workers complete safe nest tasks and begin riskier foraging earlier in life. Our results provide a strong support for the hypothesis that the division of labour in eusocial insects is a consequence of the different expected worker REVIEW OF LITERATURE	19		
4483	12110395	Electroanalytical determination of some chloro compounds/	Assaf, Hytham Fawzy Hassan.			2012	lifespan and different risk associated with their tasks; however, they do not contradict other existing explanations. Dussaubat et al. (2010) demonstrated that Pheromones in social insects play a key role in the regulation of group homeoeostasis. It is well-established that parasites can modify hormone signaling of their host, but less is known about the effect of parasites on pheromone signaling in insect societies. We, thus, tested in honey bees (<i>Apis mellifera</i>) the effect of the widespread parasite <i>Nosema</i> spp. on the production of ethyl oleate (EO), the only identified primer pheromone in honey bee workers. Since environmental stressors like pesticides also can weaken honey bees, we also analyzed the effect of imidacloprid, a neonicotinoid widely used in agriculture, on EO production. We show that, contrary to imidacloprid, <i>Nosema</i> spp. significantly altered EO production. In addition, the level of <i>Nosema</i> infection was correlated positively with the level of EO production. Since EO is involved in the regulation of division of labor among workers, our result suggests that the changes in EO signaling induced by parasitism have the potential to disturb the colony homeoeostasis Haloacetic acids are by-products of drinking water disinfections that occur when chemicals like chlorine are applied to the water supply to strip it of pollutants and make it potable. Owing to the great importance of (HAAs) and their application in industry where (HAAs) are used in the production of a wide variety of useful compounds, e.g. drugs, dyes and pesticides. However, these compounds have a bad effect on human health, plants and animals, as the exposure to haloacetic acids in drinking water can cause irritation to the skin and eyes. Moreover, the exposure to high levels of these acid causes loss of skin. High concentration of (HAAs) may increase the risk of breath defects, irritate nose and lung causing coughing or shortness of breath. Also it may affect kidney, and other dangerous diseases such as (cancer). Out of the great importance of these compounds and their impact on the lives so we choose these compounds So our work is aimed to: 1) Determination of the desirable compounds quantitatively and qualitatively by the Knowledge of the peak position. 2) Studying the effect of some parameters on the peak's height such as Supporting Electrolyte, Deposition Time, Scan Rate, pH and concentration to achieve the ideal conditions. 3) The work is designed to determine the concentration of (HAAs) at low concentration as possible. 4) Providing an easy, cheap, available, accurate and with good reproducibility technique for the determination of these compounds in wate			
							Many computer applications and real-life problems can be modelled by systems of linear equations or safely transformed to the linear case. when uncertain models parametrs are introduced by intervals, then a parametric interval linear system must properly be solved be solved to meet all possible scenarios and yield useful results. In this work we solved parametric linear systems of equations whose coefficients are, in the general case , nonlinear functions of interval parameters. Here solution means that we enclose the set of all solutions, the so-called parametric solution set, obtained when all parameters are allowed to vary within their intervals. This task appears in many scientific and engineering problems involving uncertainties. A C-XSC implementation of a parametric fixed-point iteration method for computing an outer enclosure for the solution set is proposed in this work. This method requires to bound the range of a multivariate function over a given box			

							and often delivers intervals which are too wide for practical applications. We computed tight enclosures of the parametric solution set by using the new extended generalized interval arithmetic which is an arithmetic for intervals (which are representing uncertainties). The most important property of this method is to reduce the effect of the dependency problem which is inherent in the computation with standard interval arithmetic. We used the new arithmetic to tightly bound the range of a multivariate nonlinear function over a box, a task to which many problems in mathematics and its applications can be reduced. We applied the new bounding technique to improve the efficiency of the solution for parametric systems. Numerical examples illustrating the applicability of the proposed method are solved, and the proposed method is compared with other methods. Interval analysis is an enormously valuable tool to solve the problems occur when we use computer to carry out mathematical computation using floating point arithmetic which real numbers are approximated by machine numbers. Because of this representation two types of errors are generated. The first type of error occurs when a real valued input data is approximated by a machine numbers. The second type of error is caused by intermediate results being approximated by machine numbers. Therefore, the results of the computations performed will usually be affected by rounding errors and in the worst cases lead to completely wrong results. This problem is getting even worse since computers are becoming faster, and it is possible to execute more and more computations within a fixed time. It is possible to verify the accuracy of the results generated by some complicated programs using other tools. By Interval analysis we can estimate and control the errors (which occur on the computers) automatically. Instead of approximating a real value by a machine number, the real value is approximated by an interval [] that includes a machine number. The upper and lower boundaries of this interval contain the usually unknown value . The width of this interval may be used as a measure for the quality of the approximation. It is desirable to make interval bounds as narrow as possible. A major focus of interval analysts is developing interval Algorithms that produce sharp or nearly sharp bounds on the solution of numerical computing problems. A C-XSC implementation of a parametric fixed-point iteration method for computing an outer enclosure for the solution set is proposed in this work. This method requires to bound the range of a multivariate function over a given box and often delivers intervals which are too wide for practical applications. We computed tight enclosures of the parametric solution set by using the new extended generalized interval arithmetic which is an arithmetic for intervals (which are representing uncertainties). The most important property of this method is to reduce the effect of the dependency problem which is inherent in the computation with standard interval arithmetic. We used the new arithmetic to tightly bound the range of a multivariate nonlinear function over a box, a task to which many problems in mathematics and its applications can be reduced. We applied the new bounding technique to improve the efficiency of the solution for parametric systems. Numerical examples illustrating the applicability of the proposed method are solved, and the proposed method is compared with other methods.		
4484	12110444	Verified computers solution for parametric problems/	Elaraby, Ahmed Elaraby Ahmed.			2012	Toxicity in humans is a threatening truth and much more than any disease caused by any organism as toxic substances are everywhere-in air,in water and in food.many compounds which are essential to use for human such as insecticides are widely used nowadays in veterinary prodcts to control insects on cattle,sheep,and pigs Environmental pollution including the increased use of various types of pesticides in the modern world led to a greater emphasis on the possibility of series environmental contamination arising from their use (Durham et al., 1965; Vettorazzi, 1975 and Cremlyn, 1978). These pesticides having injurious effects including damage of lung, nervous and reproductive system, dysfunction of the immune and endocrine system, birth defects and even cancer (Muhammad et al ., 2009). Among of these pesticides are cypermethrin, lambda-cyhalothrin (LTC) represented a synthetic pyrethroid group. LTC is employed to control or treat ectoparasites with good results (kakar et al., 2009 and shah et al., 2009). The applied insecticide Lambda-cyhalothrin [a-cyano-3-phenoxybenzyl-		

							3(2-chloro-3,3,3-trifluoro-1-propenyl)-2,2dimethylcyclopropanecarboxylate] (LTC). It is a synthetic type ii pyrethroid insecticide, yellowish brown liquid and odor harmful if inhaled or swallowed, cause moderately eyes 1 INTRODUCTION & REVIEW irritation , skin and respiratory system irritant ((Meister, 1992 and Kumar et al.,2008). LTC is effective and persistent activity against a large variety of arthropods harmful both to human and animal health, and to vegetal production (WHO, 1990). LTC is widely used in veterinary products to control lice, flies, and ticks on cattle, sheep, and pigs, as well as used in agricultural formulations to control numerous insect pests on fruits, vegetables, and field crops (Leahey, 1985; Schenone and Rojas, 1992; Davies et al., 2000 and Kroeger et al., 2003). Regarding to effectiveness and to their low toxicity, synthetic pyrethroids appear to be the first- choice insecticide for this type of use pattern because they are much more effective against a wide spectrum of pests than other insecticides particularly, organochlorine, organophosphate and carbamate insecticides (Pauluhn, 1999). Lambda-cyhalothrin has the hazardous risk including irritating to eyes, skin and upper respiratory system. Ingestion of this insecticide could lead to neurological symptoms such as tremors and convulsion aspiration of the solvent in to the lungs (WHO, 1999). Due to their lipophilicity, pyrethroid insecticides favor absorption through the gastrointestinal and respiratory tracts and 2 INTRODUCTION & REVIEW also confer preferential distribution into lipid-rich internal tissues, including body fat, skin, liver, kidney, ovaries and the central and peripheral nervous systems (Soderlund et al., 2002). Liver is the major site of pesticides metabolism and this soft tissue accumulates a greatest concentration of its metabolites (Rickard and Brodie, 1985). Pyrethroids affect the nervous system of the organism, it act by disruption the gating mechanism of sodium and calcium channels (Narahashi, 1996; NPTN, 2001 and Clark and Symington, 2007). Several reports have shown that pyrethroid type II insecticide exposure inhibited cell proliferation in rodent bone marrow (Celik et al., 2003 and 2005). They generated probably oxygen-reactive species (ROS) which led to oxidative stress. Many side effects of (LCT) such as noising, rolling gait, salivation in coordination progressing to causes tremors and death in rats have been reported (Righi and Palermo, 2003). In rats, LTC produced a sever syndrome characterized by salivation and choreathetosis (Martnez-Larranaga et al., 2003). Also clinical signs including salivation, licking of legs and other body parts, muscular tremors, ataxia and convulsion was observed in rabbit by (Abdul Basir, et al., 2011).		
4485	12110936	Studies on the protective effects of ginseng plant extract(Ginsana) and garlic powder agaonst tge bad effects of (Lambda-Super fog 5%) insecticide on some organs of female rates/	Abd-Elkader, Aml Ahmed.			2012	The objective of this study was to investigate intestinal bacteria in chickens because of the resulting increase in chicks mortality rate and reduction in hatchability and fertility. it was also intended to study the distribution of different enterobacteriaceae within oranges and of different sampled chickens. finally, the effectiveness of eleven antibiotics on these bacteria were tested and evaluated During the last decade, a marked increase in focusing on the importance of meat and meat products has evolved (Ali, 1989). It has been anticipated that by the year 2020 the population of Egypt will have grown by 50 % and access to both global communications and commerce is raising the expectations of the population for more and better care and for new expensive health care technology (El-Henawy, 2000). Such increase in population will undoubtedly be associated with an increase in consumption of meat as well as all other food products. It seems advisable to diversify the sources of animal protein, by encouraging the raising of breeds of farm animals that have a high potential in converting nutrients into animal protein and those animals suitable for our environment. Nowadays, poultry industry is considered one of the main sources of animal protein not only in Egypt put also all over the world due to efficiency cost of production and its short life cycle (Ali, 1989).		

							The production of poultry and poultry products has increased over the last several decades while the number of poultry producers has decreased (CAST, 1996). Total annual world poultry meat and egg production changed from 2.2 million operations producing 5.8 billion pounds of meat and 5.3 million dozen eggs yr-1 in 1960 to 91.000 operations producing 28.8 billion pounds of meat and 6.2 million dozen eggs yr-1 in 1990 (CAST, 1996; Marks and Knuffke, 1998). Today in the U.S.A, 10 companies produce 92 % of the nation's poultry. These companies are vertically integrated, meaning that they control all aspects of production, including hatcheries, feed mills, and processing plants (Marks and Knuffke, 1998). All of these statistics indicate that the poultry industry is consolidating into "factory farms", or concentrated animal feeding operations (CAFO's) with increased operation size and management intensiveness. CAFO's are capable of producing more poultry from less input at a much lower cost to the consumer (Marks and Knuffke, 1998). As poultry breeders continue to use population genetics in improving economically efficient stocks, undesirable correlated responses will occur. Selection for increased muscle may result in undesirable syndromes such as deep muscle myopathy (Siller et al., 1978; Grunder et al., 1984) and reduced immunological competence (Dunnington et al., 1987). These potential difficulties can be exacerbated when diets are formulated to maximize growth potential of these stocks (Katanbaf et al., 1989; Praharaj et al., 1996). A biological imbalance now expressed after generations of intense selection for rapidly growing, well-muscled broilers. It demonstrates a biological imbalance that is a consequence of allomorphic differences in heart and lung growth relative to the size of the animal (Dunnington et al., 1987). In the United States, many food animals-poultry, swine and cattle are routinely treated with antibiotics in order to grow animals faster and to compensate for unsanitary conditions on many industrial farms (GAO, 2004). Recently, major increases in antibiotic-resistant bacterial infections in human populations have led to public health concerns regarding antibiotic use for such non-therapeutic purposes in animals destined for food production (GAO, 2004). Organic and other non-conventional meat products are now available in developed countries to satisfy consumers' demand for high-quality products that meet the following requirements: (i) guaranteed animal welfare during production; (ii) absence of chemical agents during animal feeding; (iii) environmentally-friendly, and (iv) better taste than conventional products (Dransfield et al., 2005). However, little is known about the microbiological status of organic animal products and the potential microbiological risks linked to organic meat production. Currently, it is well known that several antibiotic-resistant bacteria isolated from humans originate primarily from animals raised for human consumption (Aarestrup, 2000; Sa'enz et al., 2001; Miranda et al., 2008). 1.2: Enterobacteriaceae: The Gram-negative bacilli belonging to the Enterobacteriaceae are the most frequently encountered bacterial isolates recovered from clinical specimens (Winn et al., 2006). Widely dispersed in nature, these organisms are found in soil and water, on plants, and, as the family name indicates, within the intestinal tracts of humans and animals (Winn et al., 2006). Before the advent of antibiotics, chemotherapy and immunosuppressive measures, the infectious diseases caused by the Enterobacteriaceae were relatively well defined. Diarrhea and dysenteric syndromes accompanied by fever and septicemia, in classic case of typhoid fever, were known to be caused by Salmonella and Shigella species (Winn et al., 2006). Classic cases of pneumonia were known to be caused by Klebsiella pneumoniae, E. coli, Proteus species, along with various members of the Klebsiella and Enterobacter group (Winn et al., 2006). These bacteria were commonly recovered from traumatic wounds contaminated with soil or vegetative matter or from abdominal wound incisions following gastrointestinal surgery (Winn et al., 2006).		
4486	12111012	Bacteriological studies on some enterobacteriaceae isolated from chickens in qena province /	Mahmoud, Asmaa Sayed Abdelgelil.			2013	The uncontrolled rapid human activities along the red sea coast has increased significantly in the last three decades in some areas, especially in the city of hurghada, causing series of disturbances and pressures destructive to the ecosystem. the different human impacts at the area invvited many researchers in recent years to examine and interpret the environmental system of the modern coastal deposits along hurghada coastThe Red Sea occupies a part of an enormous crack in the continental crust of Africa and Arabia. It extends in a northwesterly direction from the narrow strait of Bab-el-Mandeb, at its southern tip to the southern tip of the Sinai Peninsula, a distance of about 1840 km, from Lat. 12° 40' N at 27° 45' N (Gohar, 1953).		

4487	12111081	Geochemical and environmental comparative studies of recent marine sediments and surface water along hurghada coast, Red Sea.Egypt/	Assran, Bakheit Borhee Metawi.	2013	The Red Sea has an average depth of 500m, and is noted for some of the hottest (exceeding 30 °C) and most saline (up to 46‰) seawater in the world (Behairy et al., 1992). The Red Sea is also unique for its very irregular bottom topography (excluding the Gulf of Suez); hence the nature and distribution of its bottom deposits are unmatched in other seas. It is a young ocean basin often called an ocean in status nascent. To the south the Red Sea is connected to the Gulf of Aden through the shallow, 137m deep Babb el Mandeb strait (Werner and Lange, 1975). It extends north word to Sinai Peninsula which divides it into the shallow Suez Gulf, 250 km long, average width of 32 km and average depth of 64m and deep Aqaba Gulf, 150 km long, average width of 16 km and average depth of 650m (El-Shenawy et al., 2006).The Red Sea is a home of a unique fauna due to its almost isolated position near the Indian Ocean and therefore is one of the most fascinating diving areas of the world. The Red Sea coast has lately attracted the attention of several investors from different countries overlooking the sea and working in the fields of tourism, marine sports, diving, fishing, medical treatment, occasionally mining and quarrying as basis for local industries. These tremendous potentials have been found to be associated with particular geomorphological features characterizing the Red Sea coast including the high hills, alluvial fans, raised beaches, sharms, beside the spectacular barrier and fringing reefs which are considered specific for this coast as the northern-most coral reefs in the world, in addition to the coastal mangrove distributed along the shore line. The Red Sea region has always been a vital maritime trade route linking the Middle East with the other continents of the Old World. Over the course of the past few decades, the oil industry and marine transportation of oil has increased thesignificance of the region. This has placed it frequently at the center of the geopolitical strategies of the industrialized countries. At the same time an increasing interest in the Region's living marine resources and their habitats has developed both at the local and international levels. Early studies on the Region's living marine resources can be dated back to the collections of flora and fauna, particularly fish, made by the Swedish naturalist Peter Forsskal in 1761-1762. Most recently, projects funded by the Global Environment Facility (GEF) and other donors aim to help in the conservation and sustainable management of the biodiversity of the region. Lack of reception facilities at ports for dealing with bilge and ballast waters is of concern. With increase in recreation, a need is seen for the construction of new marinas. There are plans to establish marinas in three stages from now to 2017, to serve 50,000 yachts and boats in 24 locations in the Red Sea (including the Gulfs of Aqaba and Suez). Waste collection and disposal is inadequate or non-existent, and the most conspicuous form of pollution is the great variety of discarded waste material (scrap metal, wood, plastics, miscellaneous garbage and a variety of construction materials) that litters beaches and seabed around human settlements throughout the area. This is not particularly damaging to the environment, but is incompatible with successful coastal tourist developments. Measures are being taken to improve municipal waste collection and disposal in the Hurghada area, but not, so far, for other areas (GEF, 1998). In contrast to other regional seas arouaround the world where most pollution comes from landbased activities, the main source of marine pollution in the Red Sea Region is from ship-based sources, oil exploitation and offshore oil production. While production and transport of oil continue to play a critical role in the Region's economy, they also constitute major sources of marine pollution. The marine pollution could be derived through the discharge of oily ballast water and tank washings by vessels, operational spills from vessels loading or unloading at port, accidental spills from foundered vessels, and leaks from vessels in transit (PERSGA, 2010). The lack of waste and garbage reception facilities and landing places results in dive boats and other coastal shipping discharging wastes and rubbish into the sea, so contributing to coastal pollution. Discharges from sewage treatment facilities and desalination plans are potentially damaging, but at present appear to be well managed and not cause environmental pollution.Generally, the environmental problems and threats to the Red Sea ecosystem and geosystem include recreation and tourism activities, landfilling, dredging, oil pollution, water pollution, solid waste disposal, phosphate pollution and fishing practices. As a result of the human activities, pollution extends along the shore, and is discharged to the nearshore waters. Some of these pollutants may directly or indirectly be captured by bottom sediments. In the case of successive concentrations of these pollutants in bottom sediments, the latter will act as reservoir for pollutants. In that case, bottom sediments may interact with adjacent bottom water mass, enriching it or gathering from it pollutants of different types. Harbours in these areas are mainly the source of contaminated sediments and marine invertebrates to offshore areas. Pollution and sediment fill threaten the nearby coral reefs and some invertebrate's species (Madkour, 2004). Therefore, geochemical and environmental studies of recent sediments along the Egyptian Red Sea coast are very important in assessing potential environmental hazards resulting from the irrational human activities. The areas of this study are located in Hurghada Coast and its surroundings where, six areas were selected respectively from the South to the North
------	----------	---	-----------------------------------	------	--

							Water, (especially drinking water) pollution with organics and bacteriological species constitutes a dangerous environmental problem that increased in the last decades due to industrial, agricultural and domestic wastes which are drained into surface water without sufficient treatment. Water is the most common element on the earth's surface. It makes up the hydrosphere. Its volume is estimated at 1370 million cubic kilometers. The volume of fresh water distributed between rivers, lakes and ground water is considered to be between 500,000 and one million cubic kilometers. The volume of polar ice caps represents 25 million cubic kilometers of fresh water. Finally, there are 50,000 cubic kilometers of water in the atmosphere in the form of vapour and clouds. Annual evaporation is about 500,000 cubic kilometers yearly [1]. Above all, however, water is essential for biological life. It is the major component of living matter. On the average, it accounts for 80% of its composition. In higher animals, the percentage of water is between 60 and 70%. In marine organisms, such as jelly-fish and certain algae, the proportions reach extremes of 98% [1]. Due to human activities these limited water sources are exposed to pollution. The most important sources of water pollution are urban (wastewaters containing metabolic wastes from domestic activities and that resulting from urban structures) and industrial residues. The main waste load of urban residues is organic (mostly non-toxic and relatively biodegradable) while the other type (the industrial residue) may contain a complex or toxic organic and inorganic composition depending on the category of industry [2]. Although these industries are useful and vital to human life, they introduce waste products to the environment. The pollutants may be degradable or non-degradable [3]. In addition, a wide spectrum of compounds transform to more dangerous substances during the traditional drinking water disinfection process, especially by chlorine. Chlorine also can react with natural organic matter (NOM) in fresh water. NOM are defined as a complex matrix of organic materials present in all natural waters. As a result of the interactions between the hydrological cycle and the biosphere and geosphere, the water sources used for drinking water purposes generally contain NOM. The amount, character and properties of NOM differ considerably in water of different origins and depend on the biogeochemical cycles of the surrounding environments [4]. Moreover, the range of organic components of NOM may vary also on the same location seasonally [5], due to for example rainfall event, snowmelt runoff, floods or droughts. The mixture of organic compounds of NOM is divided into hydrophilic and hydrophobic fractions with resins [5, 6]. The hydrophilic fractions of NOM are composed mostly of aliphatic carbon and nitrogenous compounds, such as carboxylic acids, carbohydrates and proteins. Hydrophobic NOM primarily consists of humic and fulvic acids (humic substances) and is rich in aromatic carbon, phenolic structures and conjugated double bonds [4, 6]. As a result, NOM affects potable water quality by contributing to annoying color, taste, and odor problems and as a carrier of metals and hydrophobic organic chemicals. In addition, NOM is responsible for the majority of the coagulant and disinfectant use in water treatment. It has a tendency to interfere with removal of other contaminants. Furthermore, it is responsible for fouling of membranes, contributes to corrosion and acts as a substrate for bacterial growth in the distribution system [7]. Also, NOM has been noted to be the major contributor to the disinfection by-product (DBP) formation. DBPs have become a focus of attention in water treatment, since they have been reported to have adverse health effects [8]. More than 600 compounds of DBPs have been identified, among which trihalomethanes (THMs) and haloacetic acids (HAAs) are the most common which were specified from United States Environmental Protection Agency (USEPA) to increase the risk of cancer [9, 10]. Because of the possible public health effects, the

4488	12111121	Synthesis, characterization of TiO2 nanoparticles and its applications in water treatment/	Ali, Ahmed Mohammed Kamal.		2013	USEPA as well as Egyptian regulation has set a maximum contaminant level of about 0.1 mg/L (100 ppb) for trihalomethanes in drinking water [10,11]. Once THMs are formed, they are very difficult to remove. Therefore, the best way to keep THM levels low is to prevent their formation by the removal of organics before chlorination [4].		
4489	12111520	effect of lead and its interaction with supplementations of lycopene and vitamin E on some biological characteristics, of african cat fish, <i>clarias gariepinus</i> /	Mohammed, Salwa Mansour.		2014	in the present study 80 specimens of <i>clarias gariepinus</i> were used to determine the adverse effects of sublethal concentraion of lead(7mg/1) on behavioral changes, mortality, growth performance (condition factor and hepatosomatic index), blood constituents (red blood cells, white blood cells,haemoglobin,haematocrit, mean corpuscular volume, mean corpuscular hemoglobin, mean corpuscular haemoglobin concentration,glucose, total protein, total lipids, albumin urea, creatinine.ALT and AST enzymes).		
						The foraminiferal contents of three surface sections from south to north(Gebel Tarboul,Wadi Tarfa,and Bir Dakhel sections) in southern Galala sub-basin,North Eastern Desert, Egypt had been studied in detail and used in biostratigraphy and chronostratigraphy bof the Upper Cretaceous-paleogene successionsThe foraminiferal contents of three surface sections from south to north (Gebel Tarboul, Wadi Tarfa, and Bir Dakhel sections) in Southern Galala Sub-basin, North Eastern Desert, Egypt had been studied in detail and used in biostratigraphy and chronostratigraphy of the Upper Cretaceous – Paleogene successions. Sixty-nine planktonic foraminiferal species belonging to twenty-three genera have yielded 13 biozones and 6sub-biozones. They are, in ascending order: Globotruncana aegyptiaca IZ, Gansserina gansseri IZ, Contusotruncana contuse - Racemiguembelina fructuosa IZ, Abathomphalus mayaroensis IZ, Globanomalina compressa/Praemurica inconstans LOSz (P1c), Praemurica uncinata LOZ (P2), Morozovella angulata- Globanomalina pseudomenardii IZ (P3), Igorina pusilla PRSz (P3a), Igorina albeari LOSz (P3b), Globanomalina pseudomenardii TRZ (P4), Globanomalina pseudomenardii/Parasubbotina variospira CRSz (P4a), Acarinina subsphaerica PRSz (P4b), Acarinina soldadoensis/Globanomalina pseudomenardii CRSz (P4c), Morozovella velascoensis PRZ (P5), Acarinina sibaiyaensis LOZ (E1), Pseudohastigerina wilcoxensis/Morozovella velascoensis CRZ (E2), Morozovella marginodentata PRZ (E3), Morozovella formosa LOZ (E4), and Morozovella aragonensis/Morozovella subbotinae CRZ (E5). The analysis of quantitative and qualitative distribution patterns of benthic foraminifera complement with the recognition of eight mixed clastic-carbonate facies types (MF-1 to MF-8) of the upper Cretaceous –lower Paleogene succession are suggested that the depositional environment range from an outer neritic to bathyal. Based on sequence stratigraphic analyses, ten complete 3rd order depositional sequences each bounded by sequence boundary, are recognized. Moreover, Local and widespread regional (from previous studies) hiatus was detected in the pelagic to hemipelagic sequence during Cretaceous-Paleogene succession in Southern Galala Sub-basin. This hiatus corresponds to the Early Maastrichtian-Early Eocene in Gebel Tarboul (with missing whole Paleocene period), the interval between Late Maastrichtian-Early Paleocene throughout Wadi Tarfa sequences, and Late Maastrichtian-Late Paleocene in Bir Dakhel section. Local normal faults influenced the depositional architecture of the Upper Cretaceous–Paleogene strata in Southern Galala Sub-basin. A major change in faultrelated movements and basin depocenters and thus creation of two accommodation zones in the shoulders of the basin toward the north and south, result in hanging walls subsidence through the Cretaceous after the initial rifting stage of the Syrian Arc System (and relative sea-level rise) synchronous with footwall uplift and a relative sea-level fall. As sediments initially load, an anomalously thick siliciclastic-carbonate sedimentarypackage builds up on the subsiding blocks of the faults zone and become progressively thinner in the center of the basin. During the reverse reactivation of these faults in the Middle-Late Paleocene, a localized uplift has		

occurred in Gebel Tarboul and Bir Dakhl synchronous with relative sea-level drop. Consequently, the Late Maastrichtian-Early Paleocene sediments were removed due to Late Paleocene erosion which led finally to the hereby declare that research work titled "Stratigraphy and facies analysis of Late Cretaceous-Early Tertiary sequences, North Eastern Desert, Egypt" is my independently work and without using unauthorized aids. where material has been used from other sources it has been properly acknowledged / referred. Neither this nor a similar work has been presented elsewhere for assessment, published or submitted for publication.

unconformable contact between formations Throughout the Earth's history a number of events have occurred on different timescales, driven by a multitude of forcing mechanisms and affecting the depositional system and basin filling processes. These events include:

Climatic change events: global warm (9-10°C rise in high latitude Sea Surface Temperature; 4-5°C rise in deep sea and equatorial Sea Surface Temperature; and 5°C rise on land) during Paleocene Eocene Thermal Maximum (PETM) (Hanif, 2011); Biotic events: deep sea Benthic foraminiferal extinction (Benthic Extinction Event (BEE) across the PETM which characterize by Ecosystem variations); global mass extinction, an estimated 75% of creatures, occurred across the Cretaceous-Paleogene Boundary (65-66 m.y.); Tectonic events: tectonic processes working on scale of several million years (Volcanism, plate tectonic and its related structures like Syrian arc system, uplifting , or subsidence), orbitally induced changes in the amount of solar radiation that reaches the Earth on the scale of Milankovitch cycles (~18 - 400 kyr) or on even shorter timescales (Ruddiman, 2001). Egypt forms the north-eastern part of the African continent and is situated between latitudes 22° and 31° north. The country covers an area of about one million km² and occupies nearly one-thirtieth of the total area of Africa. The largest part of Egypt consists of desert, the so called Western Desert, to the west of the Nile, the Eastern Desert, east of the Nile Valley and the Sinai Peninsula, delineating the north-eastern extension of the Sahara in the studied Southern Galala Sub-basin, on the northern part of Egyptian territory where the unstable shelf located, marine sedimentary sections across the Cretaceous/Paleogene (K/Pg) interval are widely distributed and preserved in the Sudr, Dakhla, Tarawan and Esna formations. Several authors have studied the stratigraphy, biostratigraphy and sedimentology of the outcropping Cretaceous–Paleogene succession in the Eastern Desert of Egypt (e.g. Hume, 1911; Awad and Abdallah, 1966; Abdel Kireem and Abdou, 1979; Bandel and Kuss, 1987; Bandel et al., 1987; Hendriks et al., 1987; Kuss and Leppig, 1989; Kuss et al., 2000; Ismail et al., 2009; Scheibner and Speijer, 2009; Höntzsch 2011; Ismail, 2012 and Hefny et al., in press) During the early Late Cretaceous, Egypt was situated at the southern margin of the Neotethys at ca. 5° northern paleo-latitude (Philip and Floquet 2000). The Cretaceous-Paleogene rocks are well exposed in the northern part of the Eastern Desert. However, outcrops of lower Upper Cretaceous (Cenomanian-Turonian) strata are comparatively rare and little is known in detail about their facies and depositional environment. The Campanian-Eocene interval was probably the most widespread sediments in Eastern Desert, formed during a major transgressive period when the sea extended up to some 1000 km inland of the present coast (Picard, 1943; Said, 1962; Garfunkel and Bartov, 1977). The investigated area represents a segment of the northern passive margin of the Afro-Arabian plate, formed during the Late Triassic-Jurassic opening of the Neotethys. The

4490	12111568	Stratigraphy and facies analysis of late cretaceous-early tertiary sequences, North eastern Desert, Egypt /	Hefny, Mahmoud Ali Ahmed.		2013	extensional tectonic processes resulted in the formation of eastwest- striking northwarddeepening half-grabens that were mostly covered by the Late Triassic-Early Cretaceous seas, depending on, among others, sea level fluctuations (Scheibner et al., 2001). Beginning with the initial stages of the collision between the African and European plates during Turonian times, a dextral transpressive reactivation of the half-grabens took place along the North African-Arabian plate boundary (e.g. Aal and Lelek 1994, Moustafa and Khalil, 1995). As a consequence, a system of inverted, uplifted and folded grabens was formed, called the Syrian Arc System & 'unstable shelf' (Krenkel, 1925, Said, 1962). These structures were mainly active during the Late Santonian (Kuss et al. 2000; Rosenthal et al. 2000). But there is evidence of several Early Eocene tectonic pulses on the same structures in the Galala Mountains that recently discussed in details by Höntzsch et al. (2011). The Galala Mountains in the Eastern Desert, together with areas in western Sinai, represent a southern branch of the Syrian Arc called the Northern Galala/Wadi Araba High (NGWA) (Kuss et al., 2000), characterized by Late Cretaceous uplift in the north and subsidence further to the south		
		Electrochemical studies on the corrosion				in this, the electrodeposition of Zn-Ni-Mn alloy from acidic sulfate electrolyte is studied.the influence of the deposition potential deposition current density, deposition time,pH and manganese sulfate concentration on the deposits composition , Electrodeposition of zinc coatings on ferrous materials are widely used to provide corrosion protection. Since this protection is not acceptable under severe atmospheric conditions, various alternative methods and materials are being investigated. Various Zn-based alloys are considered such as Zn-Ni and Zn-Mn. Zn-Ni alloy coatings have better mechanical and corrosion resistance properties compared to pure zinc coatings. They have many applications in the electronic industries, automotive industries, electrocatalytic water electrolysis and fasteners. This alloy is also considered as a viable alternative to cadmium for plating aircraft and commercial steel parts. There is a growing interest on the electrodeposition of Zn-Mn alloys because of their superior protective properties and environmental compatibility. Coatings with low manganese content have shown better mechanical properties needed for automotive applications as well as steel protection in different aggressive environments containing activators such as chloride and sulfate ions. Some Zn-Mn alloys exhibit the highest corrosion resistance properties among known Zn alloys. These alloys present a double protective mechanism combining a sacrificial protection and formation of a practically insoluble surface layer. The literatures concerning the ternary alloys are very few in comparison with binary alloys. Consequently, the objective of this work is to collect the properties of both Zn-Ni and Zn-Mn alloys in one alloy via the electrodeposition of Zn-Ni-Mn ternary alloy from acidic sulfate bath. The work also aims to investigate the effect of the deposition potential, deposition current density, deposition time, pH and manganese sulfate concentration on the deposits composition, corrosion resistance properties, appearance and surface morphology. X-ray diffraction (XRD) technique is used as one of the experimental evidences for identification of the different deposited alloy phases by comparing them with reference standards from Joint Committee on Powder Diffraction Standard (JCPDS) cards. Scanning electron microscopy (SEM) is used to investigate the morphology (shape and size of the particles making up the deposit), topography (surface features) and crystallography (how the atoms are arranged in the deposit). Energy-dispersive X-ray fluorescence (EDXRF) and atomic absorption spectroscopy (AAS) are used to determine the chemical composition, thickness and cathodic current efficiency of the coatings obtained under different conditions. The interpretation based essentially on the analysis of the cyclic voltammograms, galvanostatic and potentiostatic measurements during electrodeposition process. Linear polarization and anodic linear sweep voltammetry are used to		

4491	12111588	behavior of electrodeposited Zn-Mn alloy from sulphate bath/	Eissa, Ahmed Al-Shahat Ahmed.			2013	demonstrate the corrosion behavior of the alloys deposited under different conditions. Exposure to toxic substance can affect the body in many ways.in general, when chemicals and other toxic substances are absorbed, they travel through the various body systems and can affect a particular organs, called the target organs. the body has mechanisms, mainly in the liver and kidneys, to process and eliminate many of these substances. Liver diseases: Liver has important functions in the body, including detoxification, plasma protein synthesis and glycogen storage (Yang et al., 2011). Because of its unique metabolism and relationship to the gastrointestinal tract, the liver is a crucial target of the toxicity of drugs, xenobiotics and oxidative stress (Jaeschke et al., 2002). Liver is the key organ of metabolism and excretion so it is continuously and variedly exposed to xenobiotics because of its strategic placement in the body (Shaker et al., 2010). Evidences developed over the last several years have suggested that various forms of liver injury may be caused by free radical formation and subsequent oxidative stress (Bhadauria et al., 2008). Also Loguercio and Federico (2003) stated that all processes that involve hepatocyte, Kupffer, stellate and endothelial cells which induce liver disease are related to the crucial role of reactive oxygen and nitrogen species. It is believed that reactive oxygen species (ROSSs), such as hydroxyl radical, super oxide radical anion and nitric oxide may injure cell membranes through lipid peroxidation and damage biomolecules, i.e., proteins, lipids, carbohydrates and DNA in vitro and in vivo (Halliwell, 1996 and Graziewicz et al., 2002). Documented evidence has been reported that reactive oxygen species (ROSSs), including singlet oxygen, super oxide and hydroxyl radicals are knownto play an important role in liver-disease pathology and progression (Vitaglione et al., 2004). Significant cellular damage occurs when the amount of produced free radicals exceeds the capacity of endogenous cellular antioxidant defense system. The main sources of free radicals are represented by hepatocyte mitochondria and cytochrome P450 enzymes, by endotoxinactivated macrophages (Kupffer cells) and by neutrophils. In chronic liver injury, the injured cells release a number of cytokines (Tipoe et al., 2010). These cytokines then stimulate the Kupffer cells to release more inflammatory mediators and various free radicals (Clària et al., 2011). The presence of high concentration of these pro-inflammatory mediators and free radicals then activities a large number of neutrophils to release pro-inflammatory mediators and free radicals (Makni et al., 2011). One of sources of generation of reactive oxygen species (ROSSs) is CCl4. Carbon tetrachloride (CCl4) is frequently used to produce liver injury in animals so it is used to evaluate the therapeutic potential of drugs (Basu, 2011). CCl4 is responsible for oxidative stress and lipid peroxidation through cytochrome P450-mediated generation of highly reactive radicals, leading to eventual damage characterized by hepatocellular necrosis (Gong et al., 2012). Liver diseases often progress from sub-clinical icteric hepatitis to necro-inflammatory hepatitis, fibrosis, cirrhosis and hepatocellular carcinoma (Vitaglione et al., 2004 and Cristovao et al., 2007). Liverfibrosis is characterized by excessive accumulation of extracellular matrix (ECM) proteins such as type I and type IV collagen within the perisinusoidal space of Disse (Dai et al., 2009). It is a major feature of most chronic liver injuries, including metabolic, viral, cholestatic and biliary disorders (Pinzani and Rombouts, 2004; Haber et al., 2008 and Henderson and Forbes, 2008). Abnormal flow of bile acids and bilirubin in the liver is characterized of cholestasis, which leads to retention and accumulation of toxic hydrophobic bile salts within hepatocytes (Faubion et al., 1999), causing inflammatory reactions, hepatocyte death and periductular fibrosis (Webster and Anwer, 1998). Oxidative stress is likely to play a key role in cholestasisinduced liver fibrosis, as evidenced by reduced liver injury and fibrosis after bile duct ligation (BDL) in mice lacking NADPH oxidase (NOX-1), which produces reactive oxygen species (ROSSs) (Cui et al., 2011). The cirrhosis of liver is a heterogeneous group of chronic, progressive and irreversible diseases for which no satisfactory treatment is available (Conn, 1975). All cases of cirrhosis are		
------	----------	--	-------------------------------	--	--	------	---	--	--

4492	12111691	Comparative studies of the effect of some medical plants and chemical drugs against toxicity of liver and kidney induced by carbon tetrachloride (CCl4) in Albino rats/	Mohammed, Samar Ali.			2013	characterized morphologically by the loss of normal liver architecture, which is replaced by a new tridimensional structure based on the combination of variable degrees of liver cell regeneration and excessive connective tissue deposition (Popper, 1977). Cirrhosis produces hepatocellular dysfunction and increased intra-hepatic resistance to blood flow, which result in hepatic insufficiency and portal hypertension, respectively (Gines et al., 2004). Cirrhosis affects hundreds of millions of patients world wide. Modern medicines have little to offer for attenuation of hepatic diseases and it is chiefly the plant based preparations which are employed for the treatment of liver disorders (Somasundaram et al., 2010). There is a great demand for the development of an efficient hepatoprotective drug from the natural resources (Tandon et al., 2008). Plants are rich source of bioactive components that have desirable health benefits and are traditionally known to be useful for prevention of chronic diseases. Many studies have reported that antioxidant supplements are effective in preventing oxidative-stress-related liver pathologies due to particular interactions and synergisms (Bhathal et al., 1983 and Vitaglione et al., 2004). Kidney diseases: Kidney is a paired organ whose functions include removing waste products from the blood and regulating the amount of fluid in the body. The basic units of the kidney are microscopically thin structures called nephrons, which filter the blood and cause wastes to be removed in the form of urine. Together with the bladder, two ureters, the single urethra and the kidneys make up the body's urinary system. Acute renal failure occurs frequently in critically ill patients in intensive care (Nissenson, 1998). This disorder is defined as a sudden

4496	12112148	A Study of UML-based Testing Techniques of Object - Oriented Software/	Mahmoud, Aida Hussein Abu Bakr.			2014	Testing is very important part of software development . Almost 80% of software fail because of not testing properly. Testing is very important part of software development. Almost 80% of software fail because of not testing properly. Testing is performed by different types of strategies generally, testing is performed on code, but if the software can be tested in the earlier phases, then most of the faults can be eliminated and can stopped from propagating to next phases. Thus, there is a need to explore testing possibilities in earlier phases. Testing is very important part of software development . Almost 80% of software fail because of not testing properly. Testing is very important part of software development. Almost 80% of software fail because of not testing properly. Testing is performed by different types of strategies generally, testing is performed on code, but if the software can be tested in the earlier phases, then most of the faults can be eliminated and can stopped from propagating to next phases. Thus, there is a need to explore testing possibilities in earlier phases.		
4497	12112157	Analysis and interpretation of magnetic data of central eastern desert in egypt /	fouad, Muhammed Abdul-Majeed Muhammed.			2014	The present work represents a geophysical study of the central eastern desert in the area between the northeast of qena governorate and the red sea using the available aeromagnetic data the data were compiled from surveys that have been conducted in 1983 by the western geophysical company of America (Aero service division).		
							The area under study is located in the northern part of central Eastern Desert, Egypt. The area approximates 2358 km ² and extends from latitudes 27 00' to 27 21'N and longitudes 32 40' to 33 16' 43" E in the central Eastern Desert, Egypt. It is covered in its central and eastern parts by igneous basement complex of Precambrian age, while its western part is occupied by cretaceous and Quaternary deposits. The aeromagnetic data was compiled from surveys that have been conducted in 1983 by the Western Geophysical Company of America (Aero Service Division). Airborne magnetic and radiometric datasets were processed to interpret the geology and to estimate the depth of the magnetic sources in Gabal El Juruf area and its surroundings, central Eastern Desert, Egypt. The study was aimed at mapping lithology, delineating structural lineaments and		

						their trends as well as estimating the depth to magnetic source bodies of the area. The data processing steps involved enhancement filters such as reduction to the pole (RTP), power spectrum, upward continuation, downward continuation, horizontal derivatives, horizontal gradient magnitude (HGM), vertical derivatives, tilt derivative (TD), analytical signal (AS), source parameter imaging (SPI), and Euler deconvolution. Lineament analysis of the obtained results showed that the area is dominated by NNW-SSE, NW-SE, & NE-SW trends and WNW-ESE, NNE-SSW, NS, E-W, & ENE-WSW trends of less importance. Depths to magnetic sources estimated by four different methods showed that the main depths for regional and residual sources were 2.1 and 0.7 km respectively. On the other hand, high sensitivity airborne spectrometry survey data were useful for mapping surface geology of the study area. The composite image technique was applied to aeroradiometric data to facilitates the correlation and delineation of lithologic units based on differences in the radioelements concentrations and ratios. The method showed practical success to map the basement sedimentary contact, delineate igneous rocks, and highlights those rock types characterized by low content of radioelements. Aeromagnetic data are used today in a wide range of applications and geological fields including lithologic contacts tracing to locate different structures like faults, dykes and layered complexes. In addition to studying the regional geological pattern and the main structural features, aeromagnetic data allow in high resolution surveys more detailed study to the shallow structures and near surface sources, which makes magnetic data analysis an essential tool of geophysical exploration. The magnetic anomalies can be originated from a series of changes in lithology, variations in the magnetized body thickness, faulting, folding and topographical relief. A significant quantity of information can be obtained from the qualitative interpretation of the magnetic anomalies. In this sense, we can say that the value of the survey does not finish with the primary interpretation, but rather it increases as more geology is known (Keary and Allison, 1980). There are two imaging problems that can be aided with the inclusion of magnetic data: delineation of basement surface, and better definition of the geometry of complex bodies. Magnetic data can be analyzed in a number of ways, with enhanced techniques and imaging making it an increasingly valuable tool. The basic geophysical concept behind this is that different rock types have different magnetic responses (Sharma, 1997). The Interpretation of magnetic data is more complex than gravitational one, due to the dipolar nature of the magnetic anomalies and also because of the latitude/longitude dependent nature of the induced magnetic response, but in practice magnetic data analysis may give more definite results as the magnetic response is a result of fewer possible sources than gravitational anomalies (Sharma, 1997). On the other hand, airborne gamma-ray spectrometric data provide important information through mapping the radioactive element characteristics of various lithologies in complex terrains. The method provides estimates of apparent surface concentrations of the most common naturally occurring radioactive elements, Potassium (K), equivalent Uranium (eU), and equivalent Thorium (eTh). Additionally the total count (TC) which gives the measure of the total radioactivity (Andrson and Nash, 1997; Graham, and Bonham-carter, 1993; Jaques et al., 1997; charbonneau et al., 1997). In the present study, high resolution imaging methods and feature extraction techniques are applied to the airborne geophysical (magnetic and spectral gamma-ray) data collected over the study area together with available geological information aiming to produce multiple attribute maps that can reveal the complex geological and environmental setting of the area. 1.2. Location The area under study is located in the northern part of the central Eastern Desert, Egypt. The area covers 2358 km² and bounded by latitudes 27 00' to 27 21' N and longitudes 32 40' to 33 16' 43" E as shown in fig (1.1). 1.3. Climate and Vegetation The area under study is characterized by typically arid climate; hot during summer and cold in winter with very little rainfall and sky is clear during most of the year. Winds are occasionally strong especially during winter. Vegetation is represented by scarce desert plants, mainly around some water wells. The main water wells in the area are Bir Abu Marawah and Bir Al Niqat (Stern et al., 1985).

							in this section we develop some of the theory of frontier transform, which provides extremely powerful tool for converting certain linear partial differential equations into either algebraic equations or else differential equations involving fewer variables. In this thesis, we estimate higher order and fractional of ultra – hyperbolic kernel related to the spectrum, as follow:Chapter 1: In this chapter, we refer to the fundamental concepts which are used in In this section we develop some of the theory of Frontier transform, which provides extremely powerful tool for converting certain linear partial differential equations into either algebraic equations or else differential equations involving fewer variables. Then, we see that the Fourier transform is an especially powerful technique for studying linear, constant-coefficient partial differential equations. For examples this means that for a partial differential equation involving time, it may be useful to perform in holding the space variables fixed the solution of the resolvent eq. (13) with the right hand side is the Laplace transform of the solution of the heat equation (11) with initial data . (If and , we could now represent in terms of the fundamental solution, to rederive formula (7).)Turning now to more general (in particular, non-continuous) functions, we note that the largest class for which the integral defining $\tilde{u}$ converges (absolutely) is the space L^2. Beyond these particular facts, what we would like here is to reestablish in the general context the symmetry between u and $\tilde{u}$ that holds for L^2. This is where the special role of the Hilbert space enters. Of special significance will be the negative power in the range, L^{-s}. For these there will be generalization of the formal operator (18) as an integral operator. That is, with a slight change of notation we shall have (For the purpose it is convenient to use the class of functions, which are indefinitely differentiable on and all of whose derivatives remain bounded when multiplied by polynomials. The Riesz potentials lead to very elegant and useful formulae, as we have already seen. nevertheless the present formalism suffers from a shortcoming which may be explained as follows. The importance of the potentials lies above all in their role as "smoothing operators." While the local behavior f , of the kernels f is suited to this purpose, the global behavior f is less favorable and leads to increasing awkwardness the greater is A. A way out of this dilemma is by a modification of the Riesz potentials which maintains the essential local behavior but eliminates the irrelevant problems of infinity. There are several roughly equivalent ways of doing this , but the simplest and most natural approach consists in replacing the "non-negative" operator Δ , by the "strictly positive" operator $\Delta + I$ (Identity) and defining the Bessel potentials B_s by To put matters in logical order, we must begin by deriving the kernel of the Bessel potential, that is the presumed function K_s , with the property that A close examination of eq. (37) suggests a method of constructing a sequence of approximations to the exact solution let u_n be a first approximation to the solution. If u were the exact solution, then u_n equals u. If is not equal to the exact solution, then u_n will not equal either u or $\tilde{u}$. However, we might expect u_n closer to u than u is. Therefore, we set the second approximation u_2 equal to then is a better approximation than u_1. Repeating this operation, we get at the beginning of the nth iteration, The question we ask is whether the sequence $\{u_n\}$ converges to the exact solution. We must find conditions under which the iterative procedure in eq. (38) is convergent. Two such conditions are apparent from the iterative procedure: the space from which the sequence $\{u_n\}$ is taken should be complete, and the operator should be such that when applied to two elements of the space it transforms the elements into new elements which are closer together than the original pair. That is, Thus, a contractive mapping "contracts distances": the distance between the images u_n and u_m is smaller, by scale factor of α. Then the distance between the elements u_n and u_m. When α takes any positive value (i. e. not necessarily between zero and one), the mapping is called Lipschitz continuous. It is clear that a Lipschitz continuous (and hence, a contractive) mapping is continuous. If in eq. (38) is a contractive mapping on a subset of a normed space X, then the iteration sequence $\{u_n\}$ is a Cauchy sequence. If X is complete, the Cauchy sequence converges to the limit point u in X. However, the limit in general need not lie in the domain of the mapping T, and therefore is not a candidate for a solution of the equation $u = Tu$. If S is a closed set, that is, contains all its limit points, then the limit of sequence $\{u_n\}$ must lie in S, and we can expect the iterative procedure to converge to the true solution. These ideas are expressed in the following Banach Fixed Point Theorem, which gives the sufficient conditions for the existence and uniqueness of solutions. The theorem not only presents an existence and uniqueness result but also gives an algorithm to obtain the solution by an iterative procedure. For this reason eq.

4500	12112199	"On higher order ultra-hyperbolic kernel related to the spectrum"/	Mohmoud, Heba Mostafa Abo El- Magd.			2014	(38) is known as the method of successive approximationsThe contraction mapping theorem (or the method of successive approximations) can be used in proofs of existence and in obtaining approximate solutions of algebraic, differential, and integral equations		
4501	12112211	Seasonal variation in the quality of drinking water in qena governorate/	Damarany, Khaled Ahmed.			2014	Water is the primary resourc for the existence of life. human cultures, nouished by water, flourishe or decayd according to available water for drinking, cultivation and navigation. it is, therefore, not surprising that water has been described as a "ingle most important resource for our future"		
4502	12112276	Electroanalytical studies on some nitro compounds /	Mohamed, Omnia Mustafa Fahmy.			2014	Ehe present thesis deals with the electrochemical studies and determination the pollutant of some nitro compounds organic acids such as :p-Nitrobenzoic acid, p-Nitrobenzaldehyde and p-Nitroaniline using voltammetric techniques. This work aim to study and determine some pollutant nitro compounds such as :- p- nitrobenzoic acid, p-nitro benzaldehyde and p-nitro aniline. These nitro compounds were determined using cyclic and linear sweep voltammetry. 1-p-Nitrobenzoic acid was an indispensable intermediate in organic synthesis, which was always employed to pharmaceutical, dyestuff and pesticide, and was, as the raw material, used for synthesis of benzocaine, procaine hydrochloride, folic acid and para-aminobenzoylglutamic acid in pharmaceutical industry while it was suitable for azo dyestuff, colour thin film dyestuff. 2- p-Nitrobenzaldehyde is an organic compound consisting of a benzene ring with a formyl substituent. It is the simplest aromatic aldehyde and one of the most industrially useful. It is a colorless liquid has a characteristic pleasant almond-like odor. In fact, benzaldehyde is the primary component of bitter almond oil and can be extracted from a number of other natural sources is prepared from benzaldehyde 3-p-Nitroanilines are important pollutants in water because of their wide use in many industrial processes such as the manufacture of pharmaceuticals, dyes and synthetically colors. Furthermore, they are of great environmental concern because of their high toxicity to living things. Actually, they can be released into the environment either directly as industry waste or indirectly as breakdown products of herbicides and pesticides, due to their solubility in water, anilines can readily permeate through soil and contaminate ground water. They can be taken up by humans via the skin, the respiratory tract and the gastrointestinal tract.		
							The objective of this study was to investigate the effects of naci stress on growth and some related physiological activitiied of wheat cultivars (sids 12, sids4, bani sweif 2 and giza 165) the main experimental results can be summarized in the following points : 1- A considerable variation in the salt tolerance among the four studied wheat cultivars has been observed. this variation was also revealed among the shoots and roots of each cultivar. the results revealed that cv. sids 12 cultivar had a gradual decrease in dry matter mass production with increasing salt level, but in cvs. sids 4 and bani sweif 2, there is a significant reduction in dry matter production of different organs Wheat (Triticum aestivum L.) is the staple foods for more than 35% of world population (Almaghrabi, 2012). Wheat is the most important and widely adapted food cereal in Egypt. However, egypt supplies only 40% of its annual domestic demand for wheat (Abdel Latef, 2010). Egypt is one of the countries that suffer from severe salinity problems. For example, 33% of the cultivated land, which comprises only 3% of total land area in Egypt, is already salinized due to low precipitation (<25mM annual rainfall) and irri- gation with saline water (Abdel Latef, 2010). Soil salinity has been a major concern to global agriculture throughout human history (Zhang et al., 2011). Soil salinity is one of the significant abiotic stresses for plant agriculture worldwide up to 20% of the irrigated arable land in arid and semi-arid regions is already salt affected and that portion is still expanding (Yeilaghi et al., 2012). Under salt stress, plants have to cope with water stress imposed bythe low external water potential and with ion toxicity due to accumulation of ions inside the plants (Romero-Aranda et al., 2006). In addition to its known components of osmotic stress and ion toxicity, salt stress is also manifested as an oxidative stress, which contributes to its deleterious effects (Hernández et al., 2001, Teixeira and Pereira, 2007). Roots are usually the first tissues exposed to sodium stress. For this reason, and the fact that roots depend on mitochondria for most of cellular energy production, sodium stress related impairment ofmitochondria function is likely to be particularly important in roots

4505	12113305	Effect of ciprofloxacin on interleukin-2 production: Immunological study/	Mahmoud, samah mohammed.			The aim of the present study was to evaluate the effect of ciprofloxacin (fluroquinolone antibiotic) on the production of IL-2 which give an idea about the efficacy and drawbacks of antibiotics on the immune response. Cytokines are intercellular signaling peptides (usually between 8 and 30 kDa in mass) that can act at any range (autocrine, paracrine, endocrine). They include peptides released from microbially-stimulated leukocytes that act on other leukocyte targets. Eighteen cytokines have been given names alluding to this definition (i.e., interleukin (IL)-1 through IL-18). This terminology supplanted earlier descriptive terminology such as "endogenous pyrogen" and "lymphocyte-activating factor" on the realization that each of these molecules induced a variety of biological activities that rendered activity-based names insufficient [some cytokines, such as tumor necrosis factor-α (TNF-α) and transforming growth factor-β (TGF-β) have retained historical names that no longer adequately convey their biological scope]. However, the term interleukin is also overly restrictive since many cytokines given this name are produced by nonleukocyte sources and act on nonleukocyte targets. Likewise, new biological activities have been discovered for the growth factors and interferons that were originally named in the 1950s for their actions in somatic development and interference with viral replication, respectively. All of these proteins fit under the general term "cytokine," a family with over 80 members and still growing (pulverer, 1992). Antibiotics are widely used as bacteriostatic or bactericidal drugs in the therapy of bacterial infections. Whereas the interaction between antibiotics and bacteria and between bacteria and the immune system has been well studied, little is known about the effects of antibiotics on the immune system (Van vlem et al., 1996). Net cytokine activity in any clinical or biological context is a complex issue because of the variety and multiple activities of cytokines. Furthermore, one cytokine can radically alter (even reverse) the activity of another cytokine on a target cell. As a result, it is sometimes useful to consider cytokines in functional groups. For example IL-2, granulocyte-macrophage colony stimulating factor, and interferon-γ promote cytotoxicity, whereas IL-4 and -13 promote antibody-mediated immunity. The largest group of cytokines stimulates immune cell proliferation and differentiation. This group includes Interleukin 1 (IL-1), which activates T cells; IL-2, which stimulates proliferation of antigen-activated T and B cells; IL-4, IL-5, and IL-6, which stimulate proliferation and differentiation of B cells;
						Antibiotics are used by the poultry industry and poultry veterinarians to enhance growth and feed efficiency and reduce disease. Antibiotic usage has facilitated the efficient production of poultry, allowing the consumer to purchase, at a reasonable cost, high quality meat and eggs. Antibiotic usage has also enhanced the health and well-being of poultry by reducing the incidence of disease. Although these uses benefit all involved, unfortunately, consumer perceptions are that edible poultry tissues are contaminated with harmful concentrations of drug residues (Donoghue, 2003). Drugs used in food animals can affect the public health because of their secretion in edible animal tissues in trace amounts usually called residues. For example, oxytetracycline (Salehzadeh et al., 2006) and enrofloxacin residues (Salehzadeh et al., 2007) have been found above the maximum residual level in chicken tissues. Similarly, diclofenac residues were reported to be the cause of vulture population decline in Pakistan (Oaks et al., 2004). Some drugs have the potential to produce toxic reactions in consumers directly; for example, clenbutarol caused illness in 135 peoples as a result of eating contaminated beef in Spain in 1990. Other types of drugs are able to produce allergic or hypersensitivity reactions. For example, 2-β-lactam antibiotics can cause cutaneous eruptions, dermatitis, gastro-intestinal symptoms and anaphylaxis at very low doses. Such drugs include the penicillin and cephalosporin groups of antibiotics (Paige et al., 1997). Indirect and long term hazards include microbiological effects, carcinogenicity, reproductive effects and teratogenicity. Microbiological effects are one of the major health hazards in human beings. Antibiotic residues consumed along with edible tissues like milk, meat and eggs can produce resistance in bacterial populations in the consumers. This is one of the major reasons of therapeutic failures amongst such peoples. Certain drugs like 3-nitrofurans and nitroimidazoles can cause cancer in human population. Similarly, some drugs can produce reproductive and teratogenic effects at very low doses consumed for a prolonged period of time. One such example is vaginal clear cell adenocarcinoma and benign structural abnormalities of uterus with diethyl stilbesterol (Sundlof, 1994). Antibiotics are important in animal husbandry because they significantly enhance growth when added to animal feed, although European Union (EU) legislation has forbidden this practice since 2006 (European Commission, 2003). Several antibiotic families are used in veterinary medicine: B-lactams; Tetracyclines; Chloramphenicols; Macrolides; Spectinomycin; Lincosamide; Sulphonamides; Nitrofurans; Nitroimidazoles; Trimethoprim; Polymyxins; Quinolones and Macrocylics. Macrocylics are characterized by their high selectivity as they are

						chiral selectors (Ward and Farris, 2001). The extensive use of antibiotics has triggered the development of bacterial resistance (Novais et al., 2010), which, in recent years, has become an international concern (Teuber, 2001). Much attention has been paid to food-producing animals as potential source of antibiotic resistant bacteria in humans. As a result, there is increasing pressure on laboratories responsible for ensuring the safety of food for human consumption. Legislation regarding the control of antibiotic residues in live animals and animal products is given in Council Directive 96/23/EC (European Commission, 1996), and maximum residue limits (MRLs) have been established for different matrices, so fast, sensitive methodologies to determine antibiotic residues in food samples are critical in food safety control laboratories. In this field, Kantiani et al., (2009) presented a review on the analytical methods developed for penicillin and cephalosporin residues in milk and feed samples (Kantiani et al., 2009). Drugs used in food animals can affect the public health because of their secretion in edible animal tissues in trace amounts usually called residues. For example, oxytetracycline (Salehzadeh et al., 2006) and enrofloxacin residues (Salehzadeh et al., 2007) have been found above the maximum residual level in chicken tissues. Similarly, diclofenac residues were reported to be the cause of vulture population decline in Pakistan (Oaks et al., 2004). Some drugs have the potential to produce toxic reactions in consumers directly; for example, clenbutarol caused illness in 135 peoples as a result of eating contaminated beef in Spain in 1990. Other types of drugs are able to produce allergic or hypersensitivity reactions. For example, 2-β-lactam antibiotics can cause cutaneous eruptions, dermatitis, gastro-intestinal symptoms and anaphylaxis at very low doses. Such drugs include the penicillin and cephalosporin groups of antibiotics (Paige et al., 1997). Indirect and long term hazards include microbiological effects, carcinogenicity, reproductive effects and teratogenicity. Microbiological effects are one of the major health hazards in human beings. Antibiotic residues consumed along with edible tissues like milk, meat and eggs can produce resistance in bacterial populations in the consumers. 4506	12113320	Antimicrobial Residues in Chicken Meat /	Sayed, Ahmed Shahat Ahmed,		2013	شهد العالم في نهاية القرن الماضي ومطلع القرن الحالي، العديد من المستجدات والتطورات، التي شملت جميع مجالات وميادين الحياة الاجتماعية، والثقافية، والسياسية، والاقتصادية. وتواجه دول العالم عامة، والنامية خاصة، تحديات أساسية تدور حول كيفية تحقيق مستويات عليا من الرفاهية لأبنائها؛ مع الحفاظ على موقعها في المجتمع الدولي، من خلال التفاعل الإيجابي مع الدول التي سبقها في المجال العلمي، والتقني، والإنتاجي. وتسعى الدول إلى تحقيق غايات وأهداف اقتصادية، وسياسية، واجتماعية من خلال الاستفادة المثلى من مواردها البشرية، والمادية، والعمل على تنمية هذه الموارد. وبعد الإدارة من أهم الأنشطة الموجودة في أي نظام أو تجمع إنساني، فهي موجودة في الأسرة والمدرسة والجامعة والمنظمات الأخرى، وأن مقدر هذه المنظمات على تحقيق أهدافها مرتبطة إلى حد كبير بمدى توافر قيادة إدارية مؤهلة تمتلك الكفايات اللازمة لتنسيق جهود الأفراد، وتوجيه طاقاتهم لتحقيق الأهداف. وفي ظل التطورات العالمية شهدت الإدارة المدرسية تغيرات كثيرة، فتطور المفهوم أدى إلى تطور الدور، ولم يعد دور الإدارة المدرسية مجرد إدارة شؤون المدرسة بطريقة روتينية، والمحافظة على النظام، ومراقبة سير الدراسة، وفق برنامج معد، بل أصبح العمل في الإدارة المدرسية يدور ويتمحور حول الطالب، من خلال توفير كل الإمكانيات والظروف التي تساعد على النمو، والإفادة من أقصى طاقاته. ويرجع الفضل للإدارة المدرسية في نجاح المؤسسة، وفي تحقيقها لأهدافها، كما يمزى إليها عجزها في تحقيق أهدافها المنشودة، وهذا ما يفتر اختلاف مخرجات المدارس، رغم تشابه الظروف والإمكانيات البشرية، والمادية المتاحة (). وتعتمد المدرسة في تحقيق أهدافها اعتماداً كبيراً على مدير المدرسة بوصفه محور العملية الإدارية، والركيزة الأساسية للنهوض بمستوى الإدارة المدرسية وتطويرها، والعنصر الفاعل الذي يتوقف عليه نجاح العمل الإداري بالمدرسة. وحيث أن الأداء الجيد لمدير المدرسة يعد من أهم المتطلبات الأساسية التي تنشدها المؤسسات التعليمية على اختلاف مستوياتها، وشرط أساس لنجاح العملية الإدارية في المدرسة فإن الاهتمام بمدير المدرسة ورفع مستوى أدائه وتوفير السبل المعبئة التي تكلل نجاحه في عمله أمر بالغ الأهمية لما له من انعكاسات على أداء جميع العاملين في المدرسة.		
4507	12113327	استراتيجية مقترحة لتنمية الكفايات الإدارية لمديري المدارس الثانوية في ضوء بعض الاتجاهات الإدارية المعاصرة /	المجيمى، فهد فهد.		2015	Antimicrobial resistance has become such a growing global problem that, according to the Institute of Medicine, it may be a "paramount microbial threat of the twenty-first century." (Weber and Courvalin, 2005). Resistance has produced an increased burden of illness, longer hospitalizations, excess deaths, and greater health care costs (Reed et al., 2005 and Stratton, 2006) There is considerable evidence of drug resistance reflected by strains of staphylococci and mostly it is thought to be mediated by penicillinase production (Owens and Watts, 1988). Staphylococci are considered causative mastitis pathogens in both clinical and subclinical cases, and S. aureus is the most important pathogen among S. species related to sub-clinical intramammary infections in dairy cows leading to severe economic losses in industry worldwide (Godden et al., 2002). A variety of antibiotics can be used against this organism, S. aureus mastitis has been found to respond poorly to antibiotic treatment. (Bakerna et al., 2006). The increased resistance of S. aureus isolates to several antimicrobial agents has been reported (Gentilini et al., 2002). What impacts the effectiveness of therapy since control methods of this organism from dairy herds requires treatment of infected mammary glands with effective antimicrobial agents (Kirkkan et al., 2005).		

							The determination of antimicrobial susceptibility of clinical isolates is required not only for therapy but also for monitoring the spread of resistant strains throughout the populations. β-lactam antibiotics are the most frequently used in intramammary infusion therapy. Bacterial resistance mechanisms to this class of antibiotics include production of β-lactamase and low-affinity penicillin-binding protein 2a (PBP2a) determined by the presence of the chromosomal gene <i>mecA</i>. The latter, designated for methicillin resistance, precludes therapy with any of the currently available β-lactam antibiotics, and may predict resistance to several classes of antibiotics (Rohrer et al., 2003 and Moon et al., 2007). The isolation of <i>S. aureus</i> methicillin resistant (MRSA) from animals was first reported in 1972 following its detection in milk from mastitic cows. Several reports concerning MRSA infection in domestic animals, including dogs, cats, cattle, sheep, chickens, rabbits, and horses (Lee, 2003 and Goni et al., 2004). In recent years, the number of cases has shown an increasing trend (Rich and Roberts 2004 and Weese et al., 2005). The bacterium is a colonizer of the skin and mucosae from which it can invade multiple organs. In livestock <i>S. aureus</i> is an important cause of mastitis, skin and soft tissue infections (SSTI) and to lesser extent infections of the locomotory system. Surgical site infections (SSI) in which <i>S. aureus</i> is isolated have been increasingly reported in small companion animals and horses (Safdar and Bradley, 2008). The potential for animals to act as a source of <i>S. aureus</i> zoonotic infections of humans is exemplified by recent descriptions of human infections caused by pig-associated strains of MRSA (Rasigade, 2010 and Van der Mee-Marquet et al., 2011). In addition, recent evidence implies that some <i>S. aureus</i> strains may have the capacity to colonise humans (Garcia-Alvarez et al., 2011) and that humans represent an important source of new pathogenic strains affecting livestock (Guinane et al., 2010 and Price et al., 2012). MRSA among the most important pathogens in terms of increasing prevalence and impact. MRSA once caused predominantly nosocomial infections in immunocompromised patients. In recent years, however, infectious disease experts have noted an emergence of infections not associated with hospitalization, often referred to as community-acquired (CA) MRSA. The incidence has risen dramatically in the past decade (Johnson and Saravolatz, 2006; Bartlett, 2006) in contrast to hospital (or healthcare) acquired MRSA (HA-MRSA), CA-MRSA has a number of unique characteristics and may present an even greater threat to public health and a more significant challenge to clinicians. The determination of antimicrobial susceptibility of clinical isolates is required not only for therapy but also for monitoring the spread of resistant strains throughout the populations. β-lactam antibiotics are the most frequently used in intramammary infusion therapy. Bacterial resistance mechanisms to this class of antibiotics include production of β-lactamase and low-affinity penicillin-binding protein 2a (PBP2a) determined by the presence of the chromosomal gene <i>mecA</i>. The latter, designated for methicillin resistance, precludes therapy with any of the currently available β-lactam antibiotics, and may predict resistance to The isolation of <i>S. aureus</i> methicillin resistant (MRSA) from animals was first reported in 1972 following its detection in milk from mastitic cows. 4508	12113520	Penicillin Resistance Against Staphylococcal Isolates Recovered from Subclinical Mastitis In Sohag Governorate /	Mohamed, Manar Mahmoud Helmy.			2012	Throughout history, there has been a continual battle between humans and the microorganisms that cause infection and disease. With respect to bacterial pathogens, they have shown a remarkable ability to adapt to environmental parameters. In particular, the increasing use of antimicrobials over the past few decades has led to the emergence and spread of various mechanisms of antimicrobial drug resistance among bacterial pathogens (Tenover, 2006). Various pathogens have emerged that exhibit resistance to multiple antimicrobial agents and have the property to disseminate in the hospital environment, causing nosocomial infections, or to spread in cases of infection acquired in the		

							community. Few papers have examined endemic antimicrobial resistance in Egypt, in particularly the occurrence and resistance patterns of specific respiratory and enteric pathogens (Haberberger, Jr. et al., 1994; Ostroff et al., 1996; El-Kholy A. et al., 2003). This review attempts to evaluate recent therapeutic options available for the treatment of resistant infections and the progress being made in terms of discovery and development of the next generation of combination antimicrobials that will be relied upon for treating such infections in the next decade. Aim of work: The aim of the work is to spotlight the recent antimicrobial combinations and presents a brief overview of the problem of resistance to antimicrobial agents. More importantly, is to show the recent therapeutic advances available for fighting resistant microorganisms. Throughout history, there has been a continual battle between humans and the microorganisms that cause infection and disease. With respect to bacterial pathogens, they have shown a remarkable ability to adapt to environmental parameters. In particular, the increasing use of antimicrobials over the past few decades has led to the emergence and spread of various mechanisms of antimicrobial drug resistance among bacterial pathogens (Tenover, 2006). Various pathogens have emerged that exhibit resistance to multiple antimicrobial agents and have the property to disseminate in the hospital environment, causing nosocomial infections, or to spread in cases of infection acquired in the community. Few papers have examined endemic antimicrobial resistance in Egypt, in particularly the occurrence and resistance patterns of specific respiratory and enteric pathogens (Haberberger, Jr. et al., 1994; Ostroff et al., 1996; El-Kholy A. et al., 2003) This review attempts to evaluate recent therapeutic options available for the treatment of resistant infections and the progress being made in terms of discovery and development of the next generation of combination antimicrobials that will be relied upon for treating such infections in the next decade. Throughout history, there has been a continual battle between humans and the microorganisms that cause infection and disease. With respect to bacterial pathogens, they have shown a remarkable ability to adapt to environmental parameters. In particular, the increasing use of antimicrobials over the past few decades has led to the emergence and spread of various mechanisms of antimicrobial drug resistance among bacterial pathogens (Tenover, 2006). The capacity of microorganisms to acquire resistance to antimicrobial agents has surpassed our imagination. In some cases, antimicrobial agents formerly effective are no longer useful. <i>S. aureus</i> is the resistant bacterium most familiar in the clinical setting. This bacterium rapidly acquired resistance to sulfonamides when they were in use. Penicillin was initially effective to this microorganism, but resistant strains that produce penicillinase increased in the 1950s. Therefore, penicillinase stable methicillin was developed in 1960. However, as early as the following year, 1961, methicillin resistant <i>S. aureus</i> (MRSA) was isolated in the UK. In the latter half of the 1990s, vancomycin intermediate <i>S. aureus</i> (VISA) was reported in Japan. On the other hand, vancomycin resistant <i>S. aureus</i> (VRSA) reported in the US		
4509	12113538	Recent Advances in Antimicrobial resistance and antimicrobial combinations /	Basry, Al shaimaa Meki.			2012	our understanding of the embryology of OA/TOF has lagged considerably behind the dramatic improvement in the survival of affected neonates this lag reflects continuing lack of clarity of the mechanisms of normal tracheoesophageal embryogenesis in this review we discuss the current understanding of both normal tracheoesophageal development and the disturbances in the molecular, cellular, and morphogenetic mechanisms that underlie the embryogenesis of Esophageal atresia (OA) represents a congenital developmental anomaly characterized by anatomical discontinuity of the esophagus such that the lumen is not patent. (Spitz L 1999). In approximately 80-90% of cases OA will be associated with an abnormal communication between the trachea and esophagus, in 1-3% there will be no fistula and in the remainder a fistula but no true OA) (Spitz L 1999; Goyal A; et al 2001). In those patients with OA and an associated tracheoesophageal fistula (TOF), the most common arrangement would be a blind ending upper esophageal pouch with a distal fistula: isolated proximal or the presence of both proximal and distal fistulas occurs much less commonly) (Spitz L		

						٢٠٠٧; Goyal A; et al ٢٠٠٦).An understanding of these anatomical variants remains important to facilitate optimal medical and surgical management (Bax KN; et al ٢٠٠٨The frequency of OA appears fairly consistent in most populations, occurring between ١ in ٢,٥٠٠ to ٤,٥٠٠ live births (Spitz L ٢٠٠٧).The great majority of cases occur as a sporadic phenomenon, although the incidence is higher in twins. Ioannides (AS; Copp AJ ٢٠٠٩). Perhaps of greater clinical importance remains the high frequency of associated anomalies, at over ٥٠%,which may greatly impact on both treatment and outcome. Ioannides(AS; Copp AJ ٢٠٠٩). In addition to their frequency, anomalies remain unequally distributed between patients: thus those with 'pure' or 'isolated' OA without fistula have anomalies in up to ٦٥% of cases, with a much lower frequency in those with a fistula but no atresia, perhaps contributing to diagnostic delay(Spitz L ٢٠٠٧). Cardiac defects consistently account for the greatest number of anomalies and may be a feature of theVACTERL (Vertebral, Atresia – duodenal and anorectal, Cardiac, Tracheoesophageal, Renal, Limb) and charGE (Coloboma, Heart,Atresiachoanal, Retarded growthGenitalhyposplasia, Ear deformities) syndromes in addition to OA associated with Trisomy ١٨ and ٢(Spitz L ٢٠٠٧).In a seminal paper, David Waterston in ١٩٦٢ stratified "risk" criteria based on birth weight, pneumonia, and associated anomalies(Waterston DJ et al ١٩٦٢.Lewis Spitz and colleagues١٩٩٠). later proposed a new and simpler system based on associated congenital heart defects and low birthweight status for the modern era. Survival in babies >١٥٠٠ g and without a major cardiac lesion now approaches ٩٧% (group I), but falls dramatically to only ٢٢% (group III) if low birth weight (<١٥٠٠ g) and a severe heart anomaly coexist(Lewis Spitz et al ١٩٩٠). Other studies from large centres confirm these findings(Driver CP; et al ٢٠٠١). Cardiac and chromosomal defects account for most (if not all) early deaths. Ongoing respiratory complications account for late mortality(Choudhury SR; et al ١٩٩٩).Whilst atresia remains the most common congenital anomaly of the esophagus, much has changed in the management of this condition since the first reported primary repair in ١٩٤١ by Haight.(Haight C ١٩٤٤).Following this description, successful repairs were performed in ١٩٤٨ at both Great Ormond Street Hospital for Children in London and at the Royal Children's Hospital in Melbourne(Myers NA.١٩٩٢; Spitz L.١٩٩٦).Whereas these early procedures were associated with mortality rates of ٢٠-٥٠%, improvements in surgical, anaesthetic and neonatal care over the last ٥٠ years have resulted in the present situation where survival following surgery may generally be expected, even for infants with long-gap defects, prematurity and some associated anomalie(Myers NA.١٩٩٦; Spitz L.١٩٩٦; Houben CH,Curry JI. ٢٠٠٨).With these improvements, the focus of thecritical lens has moved from mortality to morbidity and quality of life issues (Little DC; et al ٢٠٠٢		
4510	12113554	oesophageal atresia and tracheo-oesophageal fistula: current management strategies and complications/	Ahmed, Ahmed farghal.		2012	The term VATS should be used in the medical literature when the standaard thoracoscope is not employed in such cases the topic is separated from the surgical instrument and the chest tube is always positioned under video control this can be achieved through a 2 cm single skin incision asingle trocar or by means of 2-3- 4- trocars and finally using a minithoracotomy of 5 to 6 cm.Video-assisted thoracoscopic surgery (VATS) is recognized as an accepted approach for many intrathoracic diseases previously requiring a thoracotomy, for a definitive diagnosis or for appropriate therapeutic management [1].VATS is principally employed in the management of pulmonary, mediastinal, and pleural pathology. [2] In these two decades VATS has developed very rapidly, and has replaced conventional open thoracotomy as a standard procedure for some simple thoracic operations as well as an option or a complementary procedure for some other more complex operations. [3] Surprising advances in the refinement of video technology have allowed the rapid expansion in video assisted operative approaches in nearly all surgical areas. The thoracic area is no exception and it has played a very important role in thoracoscopic surgery. VATS not only offers bigger, more representative pleural biopsies to be undertaken, but also allows for all of the pleural surfaces (including the mediastinal, diaphragmatic, and visceral pleura) to be fully visualized and accessible for biopsy. Using VATS enables the surgeon to diagnose less common causes of indeterminate pleural effusions without difficulty.Thoracoscopy is not a new technique; H.C. Jacobeus, the Swedish internist, was the first to perform thoracoscopy in 1910, as a diagnostic procedure for exudative pleuritis [4] utilizing a cystoscope in order to free pleural adhesions in a patient with pulmonary tuberculosis to facilitate collapse therapy [5].		

							H.C. Jacobeus published the first series of thoracoscopy cases in 1921, describing the value of thoracoscopy in the diagnosis of tuberculous and malignant effusions. However, in the following decades, thoracoscopy was used mainly as a therapeutic tool for adhesolysis in patients with tuberculosis (TB), in order to obtain a "therapeutic" pneumothorax. [4] (.After 1950, it was rarely performed due to the development of chemotherapy for patients with TB. [3] After the decline of thoracoscopic interventions as a treatment for TB, some centres in continental Europe continued to use thoracoscopy as a diagnostic and therapeutic tool in other disorders, such as Pneumothorax and pleural effusion. Pioneers like Swierenga et al. [6] and Boutin et al. [7] confirmed its value in their publications. In the UK and the USA, thoracoscopy was not a widespread procedure, and open thoracotomy was the preferred procedure to obtain a diagnosis in pleuropulmonary disease. Around 1990, instruments such as endoscopic stapler devices, scissors, grasping and biopsy forceps were developed for surgical interventions by means of thoracoscopy in the thorax. The development of endoscopic video systems and instrumentation lead to the widespread use, by thoracic surgeons, of therapeutic thoracoscopy for a wide variety of major thoracic procedures. [4] It is interesting that even today the abbreviation and terminology used to indicate the right mini-invasive approach are not used uniformly; in fact, some authors use thoracoscopic surgery (TS) , others video-thoracoscopy (VTS) , and others video-assisted thoracoscopic surgery (VATS). Also we found the term, medical thoracoscopy. Thoracoscope is, by its original meaning, defined as an endoscope to observe intrathoracic space. [8] Medical thoracoscopy is defined as a procedure performed through one hole incision, performed under local anaesthesia in the endoscopy suite with the use of a thoracoscope with a working channel for instrument as one piece, looking directly through eye piece or connected to a monitor and is generally for diagnostic purposes, at the end of the procedure the chest tube is positioned blindly in the same hole. This term (medical) is not generally accepted. [4] Marcello Miglio & Giulio Deodato. [9] believe that there is a great difference between thoracoscopic surgery(TS) , video-thoracoscopic surgery (VTS) and Video-assisted thoracic surgery (VATS), they claim that Thoracoscopic surgery (TS) indicate the use of standard thoracoscope with the surgeon look directly through eye piece and instrument working through a channel in the thoracoscope . Video-thoracoscopic surgery (VTS) should indicate the procedure that uses the standard thoracoscope connected to a camera and in turn to a video, The possible operative maneuvers with this technique are very few, such as biopsy of pleura and pleurodesis with talc; in this case the chest tube is not positioned under vision because it is generally introduced through the same incision after the withdrawal of the thoracoscope. The term VATS should be used in the medical literature when the standard thoracoscope is not employed. In such cases the optic is separated from the surgical instrument and the chest tube is always positioned under video control. This can be achieved through a 2 cm single skin incision, a single trocar, or by means of 2-3-4 trocars and finally using a minithoracotomy of 5 to 6 cm. [9]		
4511	12113580		Role of video Assisted thoracic surgery in Management of pleural diseases /	Abd hameed, Ahmed Sayed.		2012	In the last 60 years, the development of the rectifier and semiconductor technology has led to a variety of applications in all industries. Major applications include static power converters and drive systems. It has long been known that this equipment produces harmonics in the AC and DC power systems. The passive filter was designed to reduce the harmonics and improve the power factor. The passive filter consists of passive elements such as capacitor, inductor and resistor. However, these elements are limited and their values are determined and tuned or detuned to eliminate or reduce certain harmonics not all harmonics. Also the passive filters have not the adaptive ability to suppress any circuit harmonic. With advent of power electronics, a new device called active power filter is developed. The active power filter has the adaptation capability to eliminate all harmonics over wide range of operating conditions. The active power filter have two major types ,namely shunt and series active power filters. The present thesis investigates the capability of the Pulse Width modulation PWM converter system with distributed generators to operate as a shunt active power filter in order to improve the power quality and eliminate the harmonics due to nonlinear loads or distorted source or both. The harmonic equivalent circuit of sample power system is developed. The above circuit consists of harmonic current source due to nonlinear load, harmonic voltage source of distorted source, transmission line impedance and capacitor for power factor correction. The shunt active power filter is simulated in this circuit as variable admittance element. There are two control parameters of the proposed shunt active power filter, one of them is conductance while gain factor is second one. The relationship between the shunt active power filter current and harmonic source of nonlinear load in terms of shunt active power filter control variables is obtained. Also the relation between shunt active power filter current and harmonic voltage source of distorted source voltage in terms of shunt power filter control		

4512	12113607	Harmonic Elimination in Power Systems Networks :	Mohamed, Mahmoud Nasrallah.	2013	parameters is developed. A control strategy is established to estimate the two control variables of shunt active power filter. Therefore the shunt power filter currents is regulated to suppress and compensate the load harmonics and voltage source harmonics. The essential feature of the proposed control strategy is that the load voltage signal is filtered using passive filter to get the fundamental and harmonic components. Then these components are manipulated based on the two control variables of the shunt active power filter. The results are the required filter currents which are fed to the PWM converter to suppress the harmonics and regulate the dc voltage of the converter circuit. Therefore the load point voltage (point of common coupling) and source current are filtered and will become pure sine wave. iv Moreover, the effect of the load connected to the dc side of the converter on the performance of the shunt active power filter and load voltage and source current wave forms is studied. It is found that the power quality of the power system is enhanced. To validate the effectiveness and the powerful of the proposed control strategy, the instantaneous power theory (p-q theory) is used to control PWM converter. Therefore the only harmonic currents of the converter operating as shunt active filter are injected to the power system to eliminate the load voltage and source current harmonics. A comparison between the power quality of the power system using the proposed control strategy and p-q theory is reported. In the last 60 years, the development of the rectifier and semiconductor technology has led to a variety of applications in all industries. 4513	12113642	Studies on cecum with special reference to typhlectomy in Dogs /	Zayed, Mohammed Naguib Hussein.	2012	The cecum is the proximal part of the large intestine, forming a dilated pouch distal to the ileum and proximal to the colon and receives waste material from the small intestine. There is a great deal of variation in the relative size of the cecum between species. The dog's cecum is a small, coiled organ while in horse it is a very large fermentation chamber extending from the upper right flank to the xiphoid cartilage of the sternum. Birds are different again; they have a double cecum which appears to compensate digestively for the absence of a significant colon. (http://download.videohelp.com/vitalis/med/large_intestine.htm) Most of mammalian herbivores have a relatively large cecum, hosting a large number of bacteria, which aid in the enzymatic breakdown of plant materials such cellulose. In many species, the cecum is considerably wider than the colon. In contrast, obligatory carnivores, whose diets contain little or no plant material, have a reduced cecum, which is often partially or wholly replaced by the vermiform appendix. Over 99% of the bacteria in the gut flora are anaerobes, but in the cecum, aerobic bacteria reach high densities (Guarner and Malagelada 2003 and Sears, 2005). The cecum of the dog is an irregularly twisted tube which is attached to the ileum and ascending colon by short peritoneal folds (Nickel, Schummer and Seiferle 1979). Yildiz, Arslan, COBKUN, and Yildiz (2006) reported that, the cecum, ascending colon, transverse colon, descending colon and rectum are segments of large bowel. The cecum is usually described as the first part of the large intestine. It has an irregular blunt apex and ends with the ileocolic sphincter. The ascending colon and cecum are located at the termination of the ileum. Moreover Miller, et al., (1993); Kumar (2004) and Budras, Patrick, McCarthy, Fricke and Richter (2007) mentioned, that the cecum is usually described as the first part of the large intestine, but this is not true in the dog because the ileum, the terminal part of the small intestine, communicated only with the colon, and the cecum exists as a diverticulum of the proximal portion of the colon. Miller et al., (1993) reported that, the communication of the cecum is with the beginning of the ascending colon by means of the cecocolic orifice, this opening lies approximately 1 cm from the ileocolic orifice. The cecocolic sphincter is a specialization of the inner circular muscular coat which guards the cecocolic orifice. The cecum is attached to the terminal portion of the ileum by fascia and peritoneum throughout most of its length. Also Kumar (2004) reported that, the cecum is attached to the distal portion of the ileum by an ileocecal peritoneal fold, the blood vessels pass through this fold. The cecum is extremely variable in size and forms in the living animal. It is about 5 cm long and 2cm in diameter at its colic end. It is irregularly tapers to the rather blunt apex, which is less than 1 cm in diameter and usually point caudoventrally or is located transversely. When the cecum straightened, the length of the cecum is over twice than attached (Miller et al., 1993; Kumar, 2004 and Yildiz et al., 2006). Nickel et al., (1979) reported that, the cecum of the dog is 8-30 cm long and that of cat is 2-4 cm long. The cecum is consists of apex, body and base, located to the right of the median plane, and usually within the duodenal loop. It lies dorsal to and occasionally partly surrounded by the coils of the jejunum, ventral to the right transverse processes of the second to fourth lumbar vertebrae (Miller et al. 1993). In addition Nickel et al., (1979) and Kumar (2004) stated that, the cecum of the dog is located on the right side of the abdomen ventral to the transverse processes of the second to the fourth lumbar vertebrae. The general direction o the cecum is caudad, but its blind end is bent and often points cranial. The cecum is related ventrally to the ileum and jejunum, dorsally to the right kidney, laterally to the descending duodenum and right lobe of the pancreas caudally to the duodenum, and medially to the root of the mesentery. Malla (2003) explained the cecum position on developmental o embryological basis due to the arrest in the so called caudal migration of the cecum to the right iliac region as seen in human being. Dyce, Sack and Wensing (2002) stated that, the cecum is short though of varying length and twisted. It is joined to the ileum by a short ileocecal fold and is oriented crainocaudally, although its rounded blind end may finally point in any direction. The cecum communicates with the ascending colon through the cecocolic orifice adjacent to the ileal orifice. The cecum lies to the right kidney dorsally, the descending duodenum and pancreas laterally, and the jejunum ventrally. It lies below the second lumbar joint and thus is broadly level with the most caudal part of the costal arch. pregnant women, which may result in spontaneous abortion (2nd/3rd		
------	----------	--	---------------------------------	------	---	--	--

trimester) or stillbirth. The mortality rate is around 20–30%. The more severe disorders may be preceded by mild influenza-like symptoms, including persistent fever. (Donnelly,1994)

Unlike infection with other common foodborne pathogens, such as Salmonella, which rarely results in fatalities, listeriosis is associated with the highest case fatality rate of approximately 30 % (Slutsker and Schuchat 1999).

There is an increasing demand for fish and fish products around the world (Feldhusen, 2000). However, there is substantial evidence that fish and seafood are high on the list of foods associated with outbreaks of foodborne diseases (Huss, 1997). A large proportion of these outbreaks are caused by biotoxins, histamine and viruses. Nevertheless, fish and seafood may also be a vehicle for many bacterial pathogens (Davies et al., 2001). In assessing the risks from fish.

Many different enrichment broths and selective media have been adapted in the past fifty years for selective cultivation of *Listeria* spp. Detection and isolation remains complicated due to the inability of researchers to identify a single procedure sensitive enough to detect *L. monocytogenes* in all types of foods within a reasonable amount of time (Donnelly, 1999).

PCR is one of the most promising techniques for rapid detection of microorganisms in food. This process has provided increased sensitivity for detection and therefore enhanced the likelihood of detecting bacterial pathogens (Lampel et al., 2000).

The present study was designed to:

1. Study of prevalence of *Listeria* spp. and *L. monocytogenes* in fish & sea foods.
2. Evaluate the different method for detection of *L. monocytogenes*.
3. Collection of different samples of fresh fish & sea foods.
4. Trial to isolate *L. monocytogenes* according to international standard method for *Listeria* isolation and Polymerase chain reaction.
5. Biochemical identification of suspected *Listeria* colonies.
6. Using CAMP test & motility for identification of *L. monocytogenes*

L. monocytogenes are one of the most important food borne pathogens responsible for serious infections in immunocompromised individuals, newborns, pregnant women, and the elderly. *Listeria* infections can cause abortion, meningitis, meningoencephalitis, septicemia, and death.

Within the genus *Listeria*, *L. monocytogenes* is the major pathogen in humans and animals. *Listeria* spp. other than *L. monocytogenes*, e.g. *L. innocua*, *L. seeligeri*, *L. welshimeri*, *L. murrayi*, *L. grayi* and *L. ivanovii* are not pathogenic to humans. *L. ivanovii* and *L. seeligeri* are pathogenic to animals.

Fish and sea foods can be frequently contaminated with *L. monocytogenes* so contaminated sea foods and undercooked fish have been assumed to be sources for *Listeria*.

So, this study was designed to determine the incidence of *L. monocytogenes* in the fish and sea foods and to evaluate difference between conventional bacteriological method and PCR method in detection of *L. monocytogenes*.

A total of two hundred and thirty samples of fish and sea food samples were purchased from different shops and markets in Luxor city. The mentioned samples were inoculated in to oxford and palcam agar, the positive samples were identified by biochemical reaction followed by CAMP test and PCR which amplified the (inlB) of *L. monocytogenes* by using IB-L and IB-R.

from the 230 fish and sea foods samples which inoculated in to oxford and palcam agar 14%, 4%, 6%, 3% and 26.7% samples from fish fillets, shrimp, calamari, tilapia and catfish were positive for *Listeria* isolates, respectively. While failed to be isolated from cooked fish: and when identified the positive samples (21 isolates) biochemically and by CAMP test, were found that *L. monocytogenes* was isolated by 42.9, 33, 100 and 12.5% from fish fillets, calamari, tilapia and catfish respectively. While *L. monocytogenes* failed to be detected in shrimp.

PCR method was detected *L. monocytogenes* DNA from 21 isolates which identified on oxford and palcam agar with a percentage 28.6%, 50% and 25%) from fish fillets, shrimp and catfish, respectively. While, *L. monocytogenes* give negative results in calamari and tilapia.

There were four samples were positive for *L. monocytogenes* isolation by conventional bacteriological method and negative by PCR, while there were three samples were negative by conventional bacteriological method were positive by PCR, there were two samples are positive in both methods and twelve samples were negative by both methods.

The present study also revealed that the incidence of *L. monocytogenes* in fish fillets, shrimp and catfish was 4%, 2% and 6.6% respectively with total incidence

4514	12113682	Detection of listeria monocytogenes in fish and sea food /	Ibraheem, Shima elnagar taheer.		2012	2.2%. While <i>L.monocytogenes</i> failed to be detected in cooked fish, calamari and tilapia. Also the present study showed that the incidence of <i>L.monocytogenes</i> was predominated in catfish and in fresh water fish (tilapia and catfish) 3.3% More than in sea food (fish fillets, shrimp and calamari) 2%. The result of this study concluded that: • Fishes plays a role in transmission of <i>L.monocytogenes</i>. • Proper cooking kills all <i>L.monocytogenes</i> organisms. • Catfish has the predominant rate of <i>L.monocytogenes</i> infection.		
4515	12113723	Microbiological and Molecular studies on <i>E.coli</i> O157:H7 as one of important food borne diseases /	Mohammed, Waleed Khedr.		2012	<i>Escherichia coli</i> (<i>E.coli</i>), a bacterium that is a common inhabitant of the gut of warm blooded animals, including man. Most strains of <i>E.coli</i> are harmless; however, some strains such as <i>E. coli</i> O157:H7 can cause severe food borne disease and are referred to as enterohemorrhagic <i>E. coli</i> (EHEC). This pathogen produces toxins, known as verotoxins or Shiga-like toxins because of their similarity that produced by <i>Shigella dysenteriae</i>. (WHO, 1996). <i>E. coli</i> O157:H7 is a gram-negative rod-shaped bacterium. The letter "O" in the name refers to the somatic antigen number, whereas the "H" refers to the flagellar antigen (Nataro and Kaper, 1998). <i>E. coli</i> O157:H7 serotype occurred due to the horizontal gene transfer of virulence factors (Whittam et al., 1988). <i>E. coli</i> O157:H7 is one of hundreds of gram negative <i>E. coli</i>. There are more than 170 serogroups of <i>E.coli</i>. Within each serogroup, there are one or more serotypes. <i>E.coli</i> O157:H7 is the most well known enterohemorrhagic strain (EHEC) (Peacock et al. 2001) <i>E. coli</i> O157:H7 was first recognized as a human pathogen in 1982, when two outbreaks in the United States were associated with eating undercooked hamburgers from a fast-food restaurant chain (Riley et al. 1983). This food borne pathogen has since emerged as a major cause of bloody and non bloody diarrhea, causing up to 20,000 cases and up to 250 deaths per year in the United States (Griffin, 1995). In addition to causing bloody diarrhea, <i>E. coli</i> O157:H7 infection is the most common cause of the hemolytic uremic syndrome (HUS), which cause kidney failure among children in the United States. HUS is associated with significant long-term complications. 3%-5% of patients who develop HUS die, and approximately 12% are left with significant sequelae, including end-stage renal disease, hypertension, and neurologic injury (Siegler et al., 1994). Consumption of ground beef, lettuce, unpasteurized cider or milk, and untreated water has been associated with outbreaks, and person-to-person transmission is well documented (Griffin, 1995). The VTEC enter the food chain via faecal contamination of milk, contamination of meat with intestinal contents during slaughter or contamination of fruit and vegetables by contact with contaminated manure. VTEC are also transmitted through contact with infected people, animals or animal waste. Moreover, contaminated water which used for irrigating or washing vegetables can also be source of infection for humans or animals (Paton and Paton, 1998). Routine techniques for diagnosis of VTEC focus exclusively on the detection of <i>E. coli</i> O157: H7 in clinical specimens, animal feces, food and environment. There are many problems with the developed techniques for <i>E. coli</i> O157: H7. A major challenge is the isolation of bacterium from different complex sample types. The sample will often contain low numbers of VTEC, very high levels of background flora and natural inhibitors which interfere with isolation of <i>E.coli</i> O157: H7 (Mead and Griffin, 1998; Gross, 1990; Duffy et al. 1999 and WHO, 1998). So techniques to improve the speed of O157 detection have been developed based on immunological or DNA techniques (polymerase chain reaction (PCR)). (Duffy et al. 1999) Aim of the work Thus, keeping in view, the above facts and the magnitude of the problem a more rapid, accurate method to detect <i>E. coli</i> O157:H7 is needed for improved clinical diagnosis, and epidemiological studies. Therefore, the present study was planned and aimed to detect and characterize <i>E. coli</i> O157:H7 from diarrheic and apparently healthy calves, raw milk and from children suffer from diarrhea which can achieve through the following steps:- 1- Isolation of <i>E-coli</i> O157:H7 by using MacConkey agar and sorbitol MacConkey agar with Cefixime Tellurite (CT) supplement (selective media) 2- Identification of <i>E-coli</i> O157:H7 by conventional biochemical reaction and API20E. 3- Serological detection of <i>E.coli</i> O157 by using Latex agglutination kit for O157. 4- Confirmation of the <i>E-coli</i> O157:H7 by polymerase chain reaction (PCR) using specific primers.

								Scorpion stings are a major public health and veterinary problem in tropical and sub-tropical countries. Most of the scorpions that are dangerously venomous to humans and animals belong to buthidae family (Gary and Lance, 2009). Buthidae is the largest and most widespread scorpion family. Around 72 currently recognized genera and at least 528 species are classified under this family. Leiurus quinquestriatus (L. Q.) scorpion is one of the most important members of buthidae family. It is reported as one of the most dangerous scorpions in the world. This is because its venom is a powerful cocktail of neurotoxins with a low LD50 (Lucian, 2008). The scorpion's venom is comprised of a variety of compounds including low-molecular-weight proteins, neurotoxins, histamine, serotonin, enzymes, enzyme inhibitors, and other unidentified compounds (Possani et al., 2000). According to the molecular size; The neurotoxins of L.Q. are classified into the short chain toxins composed of 20 – 40 amino acid residues with three or four disulfide bonds, including chlorotoxins and charybdotoxins, which affect chloride or potassium channels. The long-chain toxins have 58 – 76 amino acid with four disulfide bonds and affect mainly the sodium channels (Mouhat et al., 2004). The reported LD50 of L.Q. venom is ranged from 0.16 - 0.5mg/kg in different animals; which confirm the severity of this species of scorpion (Gueron, et al., 1992). The voltage dependent ion channels; sodium, potassium and calcium channels; are the main targets of scorpion venom action. The symptoms of scorpion envenomation result from a complex interaction of parasympathetic and sympathetic stimulation along with the release of a variety of endogenous compounds including catecholamines, angiotensin II, glucagon, corticosteroids, bradykinins, prostaglandins, and cytokines. Fatalities are primarily the result of cardiovascular and respiratory dysfunction and failure (Cupo et al., 2007). Although the toxicity of L.Q. venom has been studied by several groups all over the world, it still needs several investigations. The purpose of this study is to investigate in vivo the pathological, hematological and biochemical changes associated with Leiurus quinquestriatus crude venom injection on female rabbits. In Egypt, envenomation by scorpions represents a serious public health and veterinary problem. Leiurus quinquestriatus scorpion was reported to be one of the most dangerous scorpions worldwide. In the present study; clinical, histopathological, hematological and biochemical investigations had been done in female rabbits after L. Q. crude venom injection. A total number of 30 female California rabbits have been used in this study. A single dose of crude L.Q. venom of 0.4mg/kg was injected i.v in peripheral ear vein. Blood samples have been collected pre – and post – envenomation in a time course started from zero up to eight days for the hematological and biochemical investigations. Histo-pathological examination of different body organs have been carried out postmortem. Three animals have been used per time point. Respiratory distress and nervous manifestations were the predominant symptoms after envenomation. These include tremors, convulsions and hurried respiration directly after envenomation; while dyspnea, recumbency and paralysis of the hind limbs was observed at the late stage. Wide spread congestion and hemorrhage at different body organs was obvious in the postmortem examination; with the lung, brain and heart being the most affected organs. On the other hand the lung body weight index revealed edematous enlargement of the lung post envenomation. The histopathological examinations of the lung showed severe affection. Edema, hemorrhage, emphysema of the lung and damage of the bronchial epithelium were the predominant findings at the most of the tested time points.		

4519	12114184	Toxic effect of leiurus quinquestriatus venom in rabbits /	Elkashef, Reham Hassan Reyad khalil.		2012	Histopathology of the brain showed liquifactive necrosis and demyelination expressed by vaculation at most of envenomation intervals. Irreversible myocardial damage which was obvious by necrosis and oedema was evident in this study. Nephrotoxicity was also obvious after envenomation by necrosis of glomerular tuft and renal tubules, interstitial hemorrhage and hyaline casts. The spleen showed hyperplasiawhile exhaustion of lymphoid follicles was evident by 24h post envenomation. The hepatic changes observed in the present study started as sinusoidal dilatation, hepatocytes degeneration and ended by hepatocytes necrosis by day post after envenomation. The genital organs in the present study showed hyperemia of blood vessels in early stages of envenomation followed by wellexpressed inflammation of the ovaries by Twenty four-hours. By day eight post envenomation; all body organs appeared free from any morphological alterations in comparison to the control of lymphoid follicles after 30min. from envenomation;		
4520	12114266	The impact of wind speed variation on power system stability for wind farm interconnected grid /	Rashad, Ahmed Mohammed Mohammed.		2013	The aim of the thesies is to investigate the impact of gust as case of wind speed variation on the stability of wind farms composed of fixed speed wind turbines based on SCIG and on the stability of wind farms composed of variable speed wind turbines based on DFIG.The continuous increasing in the pollution level and in the same time increasing in fuel price are factors lead to the increase in using renewable energy sources specially wind energy. Wind power production faces many challenges, one of the important challenges is that of the rapidly change in wind speed which depends on the weather condition. A change in wind speed affects on the generated power from wind turbine. SCIG and DFIG are famous kinds of wind turbine, each of them has advantages and disadvantages, SCIG is cheap but its operation has a harmful effect on system stability. DFIG keeps the system stable but it is very expensive technology for many countries. The thesis proposes a gust as a case of wind speed variation. The thesis uses Matlab/Simulink program to simulate the wind speed variation according to International Electrotechnical Commission 61400-1 (IEC 61400-1). The thesis focuses on the impact of gust which represents the wind speed variation according to reference IEC 61400-1 on stability of wind farm connected to grid when the wind farm is composed of Squirrel Cage Induction Generator (SCIG) and when it composed of Double Fed Induction Generator (DFIG). The thesis investigates the stability of wind farm by studying the voltage stability as one of power system studies. In this thesis the voltage stability analysis is achieved by using two different kinds of Voltage Stability Indices (VSI) indicated by VSI_1 and VSI_2 which are used to indicate the voltage stability condition.The thesis designs a hybrid wind farm consists of an equal number of SCIGs-based wind turbine and DFIGs-based wind turbine without STATCOM connected to wind farm. The thesis designs this kind of wind farm to overcome the instability of SCIG and expensive price of DFIG. Key words: IEC 61400-1, Gust, Squirrel Cage Induction Generator (SCIG), Double Fed Induction Generator (DFIG), Hybrid wind farm and Voltage Stability Index (VSI).THESES ORGANIZATION This is organized in 7 chapters. Notation, list of table, list of figures and abbreviations are shown after the list of contents. Literature references are mentioned in square brackets by numbers. Equations are numbered in format (x.y) and figures are numbered in format Figure x.y where x is the chapter number and y is the number of the item.		
						This thesies classifies three types of protections for the DFIG :the conventional crowbar protection the series crowbar protection and a new proposed crowbar protection the thesis illustrates the dynamic behavior of the DFIGs under different studies.Enhancement protection and operation of the doubly fed induction generator (DFIG) during the grid fault are investigated in this thesisWind power growth with a 20% annual rate has been experienced the fastest growth among all renewable energy sources since five years ago. It is predicted that by 2020 up to 12% of the world's electricity will have been supplied by wind power so Wind generation is becoming the most development. During 2011, 40 GW of wind generation capacity was added to power networks around the world. Worldwide wind capacity has reached 254 GW, by the end of June 2012, 273 GW expected for full year, indicating a 25% annual average growth rate in wind energy capacity.DFIG has recently received much attention as one of preferred technology for wind power generation. Compared to a full rated converter system, the use of DFIG in a wind turbine offers many advantages, such as reduction of inverter cost, the potential to control torque and a slight increase in efficiency of wind energy extraction.The DFIG is very sensitive to any grid disturbances, if a severe voltage dip occurred due to grid fault, high currents will pass through stator and rotor windings and also a very high		

							DC voltage would be induced in converter circuit, it may lead to damage the converter circuit and the DFIG windings. Protection systems are essential to avoid the disconnection of the DFIGs from the network during fault. This thesis classifies three types of protections for the DFIG: the conventional crowbar protection, the series crowbar protection and a new proposed crowbar protection (the outer crowbar protection). This thesis illustrates the dynamic behavior of the DFIGs under different studies: □ Without protection □ With conventional crowbar protection □ With series crowbar protection □ With outer crowbar protection This thesis produces strategy of determining the suitable protection method for the doubly fed induction generators to be applied during the grid fault. In the last decade the renewable energy sources, especially wind generation, have gained significant interest throughout the world due to the phasing out of conventional electrical power generation, this is caused by the global goals for the reduction of greenhouse gas emissions [1]. Wind is a form of solar energy, winds are caused by the uneven heating of the atmosphere, the irregularities of the earth's surface, and rotation of the earth. Wind flow patterns are modified by the earth's terrain, bodies of water, and vegetation. Humans use this wind flow, or motion energy, for many purposes: sailing and even generating electricity. The terms wind energy or wind power describes the process by which the wind is used to generate mechanical power or electricity. Wind turbines convert the kinetic energy in the wind into mechanical power. To meet the growing energy demands in the future by taking advantage of the abundant energy in wind so as to protect the environment from CO₂ released through some of the more conventional ways of generating power. The worldwide wind capacity reached 254 GW by the end of June 2012, out of which 16.546 GW were added in the first six months of 2012. This increase represents 10 % less than in the first half of 2011, when 18.405 GW were added. The global wind capacity grew by 7% within six months (2% less than the same period in 2011) and by 16.4 % on an annual basis (mid-2012 compared with mid-2011). In comparison, the annual growth rate in 2011 was 20.3 %. [2], Figure 1-1 shows the expected annual and cumulative wind installations by 2020. Wind power growth with a 20% annual rate has been experienced the fastest growth among all renewable energy sources since five years ago. It is predicted that by 2020 up to 12% of the world's electricity will have been supplied by wind power so Wind generation is becoming the most development. During 2011, 40 GW of wind generation capacity was added to power networks around the world. Worldwide wind capacity has reached 254 GW, by the end of June 2012, 273 GW expected for full year, indicating a 25% annual average growth rate in wind energy capacity. DFIG has recently received much attention as one of preferred technology for wind power generation. Compared to a full rated converter system, the use of DFIG in a wind turbine offers many advantages, such as reduction of inverter cost, the potential to control torque and a slight increase in efficiency of wind energy extraction. The DFIG is very sensitive to any grid disturbances, if a severe voltage dip occurred due to grid fault, high currents will pass through stator and rotor windings and also a very high DC voltage would be induced in converter circuit, it may lead to damage the

							Rabbits are very abundant, worldwide and they are raised for a variety of purposes including; production of meat and wool, used as laboratory animal, tissue cultures, toxicity tests, ophthalmologic experiments and production of antibodies. Parasitic infection is one of health problems that hinder rabbit breeding and interfering with its production especially Eimeria spp. which is considered as one of the most important diseases of rabbits. Therefore, the present study was carried out to make a spot light on some internal and external parasites infecting rabbits at Quena Governorate; including the prevalence regarding to the age, sex and breeds; morphology of the recovered parasite species, histopathological changes and the efficacy of some anticoccidial drugs. The present study showed that the overall infection rate of internal parasites infecting rabbits at Quena Governorate was 68.12 % and the most frequent species was protozoa with an infection rate of 49%, while the helminthes infection represented 5.7% of the examined samples through coprological examinations. Additionally, the mixed infection represented in 13.4% of the examined samples.		

Concerning the ages of examined rabbits, the obtained results revealed that young rabbits (kids) were seem to be more susceptible to the infection with internal parasites (78.8%) than the adult ones (43.3%). Moreover, female rabbits (both adult and kids) were more susceptible to the internal parasites infection than male ones where the infection rate was 73.8% and 25.7%, respectively.

In respect to rabbit breeds, the present investigation concluded that the most susceptible rabbit breed to internal parasitic infections seemed to be Newzelandy with an overall prevalence of 76.2% and the least susceptible breed was Flander sp. (25%).

Regarding to the monthly infection rate of different internal parasites among rabbits revealed that the highest infection rates were observed in December, January and April, where the percent of infection were 100%, 90% and 90%, respectively, while the lowest infection rate was recorded during August and October, where the infection rate reached (42.86%) and (45%) respectively.

Concerning to the seasonal prevalence; the obtained results concluded that the highest infection rate was observed during winter season followed by autumn, spring where the infection rates were 83.33%, 73.33% and 64.21 %, respectively, while the lowest infection rate was recorded during summer season (57.83%).

Among the Helminthes; the helminthes identified was *Passalurus ambiguus* in the present study.

The overall prevalence of *Passalurus ambiguus* infection among examined rabbits via coprological examination was 5.7 %. Furthermore, the highest prevalence of infection was observed among young and male rabbits, where the infection rate was 5.8% and 8.6%, respectively.

In present investigations the seasonal prevalence of *P. ambiguus* infection in rabbits showed that the highest prevalence was recorded during summer season followed by spring where the infection rates were 16.9%, 3.2%, respectively, while there was no infections was observed during winter and autumn seasons.

Among the protozoan; the coccidia identified were *Eimeria* spp. and *Cryptosporidium* spp. in the present investigation.

The present study showed that the overall prevalence of *Eimeria* spp. and *Cryptosporidium* species among examined rabbits was 33.9% and 15.1 %, respectively.

Dealing with rabbit breeds, the present study revealed the most susceptible breeds to *Eimeria* species infection seemed to be Newzeland breed with an overall prevalence of 48.5% with low percent of infection among Rex breed (7.7%).

Regarding to the age of examined rabbit, the obtained results showed that the total prevalence of *Eimeria* spp. among rabbit kids and adult were 47.1% and 3.3%, respectively. Dealing with the age and sex, the obtained results revealed that the prevalence of *Eimeria* spp. among female kids, male kids, adult female and adult male were 48.8%, 0.0%, 1.6 and 7.1 %, respectively. Furthermore, the obtained results revealed that the total prevalence of *Cryptosporidium* among rabbit kids and adult rabbits was 9.1 % and 28.9%, respectively.

The present research showed that the high prevalence of *Eimeria* spp. infection was observed during winter season with an infection rate of 63.3% followed by spring and autumn seasons where the infection rates were 40% and 33.3%, respectively, while the lowest percent of infection was recorded during summer season (6%).

Eight species of *Eimeria* were recovered from the faeces of examined rabbits based on their morphological characters and the prevalence of each species was as follow:

E. perforans 96%, *E. magna* 92%, *E. flavescens* 68%, *E. coecicola* 32%, *E. exigua* 28%, *E. media* 20%, *E. intestinalis* 12%, and *E. piriformis* 8%.

Concerning the ectoparasites in this study, the total incidence of infection was 25 %; and the most frequent species was *Sarcoptes Scabiei* (22.5%) and *Notoedres cuniculi* (2.5%).

Regarding to the age of examined rabbit, the obtained results showed that the total prevalence of mite infection among rabbit kids and adult were 29.5% and 19.3%, respectively.

Dealing with the age and sex, the results clarified that the prevalence of ectoparasites were high in male rabbits (both adult and kids) compared to female rabbits (both adult and kids) where the infection rates were 31.4% and 22.8%, respectively. Generally, it was established that the young ages of

						rabbits (kids) and the male were more susceptible to mite infection compared to adult ones and females. In respect to the treatment trials, the present work found that, the marked decrease in OPG was observed as a result of medication with all therapeutic agents used (amprolium and toltrazuril) as there was a significant decrease in the total oocyst count in comparison with the infected non treated group. Furthermore, there was a noticeable significant decrease in the total oocyst count among the treated groups with both amprolium and toltrazuril. The criteria for drug evaluation were clinical signs, oocyst counts, and mortality rate, and average feed intake, hematological and histopathological changes. In recent years, there has been increasing commercial production of rabbits as a source of protein. The consumers prefer rabbits for their low cholesterol and fat contents (Al-Husseini, 1992). Therefore, rabbit production became one of the most important animal resources in Egypt. In addition to this commercial value, these animals are used as very important models for medical research and as pets (Yousif and Abdul-Aziz, 1995). Moreover, besides their uses as laboratory animals, are used for a wide variety of commercial purposes viz. wool, meat and fur (Tripathi et al., 1995). Rabbit breeding is widespread in many parts of the world and, in particular, at some governorates of Egypt, where the most rabbit population is in the hand of smallholders, while the rest belong to commercial sector (Galal and Khalil, 1994). Like other animals, rabbits have diseases and parasites that interfere with their normal physiology which have in the past contributed to the reduction of populations, as well as, slowing the progress of rabbit farmers across the world. Parasitic infections are one of the most health problems that hamper rabbit breeding and interfering with its production. <i>Passalurus ambiguus</i> (Rudolphi, 1919) is a common oxyurid found in the caecum and colon of domestic, wild, and laboratory rabbits and hares (Owen, 1972; Taffs, 1976). Furthermore, it is the species most likely to be adapted to the intensive breeding farms, as its infective larvae do not leave the egg until the egg is ingested by the host (Grice and Prociw, 1993). <i>P. ambiguus</i> infections of rabbit are not generally thought to be very pathogenic, although very large numbers of pinworms were found in rabbits, where scouring was a problem (Ostler, 1961), and fatal massive infections in young rabbits have been recorded (Owen, 1972). Coccidiosis remains one of the most important infectious causes of digestive disorders in fattening rabbits (Vancraeynest et al., 2008). Coccidiosis of rabbits are ubiquitous infections caused by obligatory intracellular protozoan parasites belonging to the genus <i>Eimeria</i> and considered as a major cause of significant morbidities and mortalities (Lebas et al., 1986; Wang and Tsai, 1991; Coudert et al., 1995 and Bhat et al., 1996) and seriously impairing their growth and food utilization (Abdel-Megeed et al., 2005). It mainly affects the intestine and only one species cause hepatic lesion (<i>Eimeria stiedae</i>). <i>Cryptosporidium</i> is a ubiquitous enteropathogen and has been reported from many geographical regions of the world. The parasite is recognized as one of the most common causes of diarrhea in humans and farm animals (De Graaf et al. 1999;		
4522	12114374	Studies on Parasites of rabbits at Quena governorate /	Ali, Esraa Hamdy Abd El-Raheim.		2013	The aim of this work are: propagation and isolation of NzdV from suspected samples collected from infected chickens using the embryonating chicken eggs biological and serological detection and identification of different isolates isolated on the basis of haemagglutination (HA) property and haemagglutination inhibition test using NDV specific antiserum. Newcastle disease (ND) is a highly contagious disease of birds and one of the major causes of economic losses in the poultry industry. Despite routine vaccination programs, several outbreaks have occurred in Egypt in the last 2 years and remain a constant threat to commercial poultry. Hence, the present study was aimed to characterize NDV isolates obtained from clinical cases in various locations of South Valley Provinces (Sohag, Qena and Luxor) during the period of 2011 - 2012. This study was carried out on 126 samples (liver, proventriculus, intestines, brain, spleen, lung, trachea and cecal tonsils), were collected from freshly dead and diseased live commercial broiler and backyard chicken flocks showing respiratory and/or nervous manifestations. Samples were prepared and inoculated into embryonating chicken eggs of 9 - 11 days old via allantoic cavity for virus propagation. Inoculated eggs were observed for 5-7 days post-inoculation (PI) then the allantoic fluid was collected and tested for haemagglutination (HA) character by rapid and slow HA tests to confirm the virus growth. The positive samples for HA were identified by haemagglutination inhibition (HI) test using NDV specific antiserum to confirm the presence of the virus. The obtained results indicated that 45 (35.7 %) samples were NDV positive. Molecular confirmation of the virus was performed by one step reverse transcriptase polymerase chain reaction (RT-PCR) after the RNA extraction from the allantoic fluids of 45 ND positive samples. RT-PCR was conducted using specific primers to amplify 695 base pair (bp) fragment targeting region at the end of matrix (M) gene and Carboxyl terminus (C-terminus) of Fusion (F) gene, including cleavage site. RT-PCR results showed that all ND positive		

								samples produced the specific PCR product at 695bp. The pathotyping of the isolated virus was carried out biologically by intracerebral pathogenicity index (ICPI) in 1-day-old chicks. The clinical manifestations and post mortem picture of NDV were observed on the inoculated chicks. The results revealed that The ICPI ranged from 1.4- 2 index which referred that all NDV isolates were ranged from moderate to velogenic types. In order to understand the evolution of NDV in Upper Egypt and confirm the pathotyping, 8 out of 45 samples were selected from different regions for DNA sequencing and phylogenetic analysis. The post sequencing analysis of the cleavage site of the fusion gene showed that all the isolates have multiple basic amino acids at the C- terminus of the F2 protein and phenylalanine at residues 117 of the F1 protein, with cleavage site motif 112R-R-Q-K-R-F117, classifying them as velogenic which correlated to the results of ICPI. The obtained nucleotide sequences were aligned in compare with the LaSota and Egyptian strains previously isolated and the results indicated that all (8 strains) were 22 – 20% different from LaSota (vaccine strain) and 1-2 % from Egyptian one (2011), 16-22 % from other Egyptian one (2006, 2010). However, the 8 isolated were clustered into 6 clades based on nucleotide differences as well as away from the LaSota strain. The predicted amino acid sequences of these isolates were 21% different from LaSota also; some strains had a unique amino acid in different positions. The nucleotide sequences were then compared with available sequences deposit in the Genebank and used to construct the phylogenetic tree. Phylogenetic analysis indicated that the current isolated strains belonged to genotype VII which is the predominant genotype responsible for most ND outbreaks since the end of the last century and it is currently circulating in Egypt, causing very high mortalities in chicken flocks. The obtained isolates were genetically distinct and phylogenetically distant from the LaSota strain. Egyptian isolates (2006, 2010) and Israel (2003) while grouped with ND strains isolated from Egypt (2012) and Israel (2011). Far phylogenetic distance between vaccines and current obtained virulent strains which indicate to the occurrence of new ND stains different from the vaccine strains and other Egyptian strains isolated from chicken in 2006. These strains developed from the accumulation of point mutations in different sites of the F gene as well as this evolution may be a major reason for the continuous outbreaks of ND in Egypt. From the previous results we can conclude that: 1. Newcastle disease is still a major problem for the commercial and backyard poultry. 2. Presence of new NDV strains which differ from the vaccinal strains used for vaccination programs in Egypt so, studies on comparison of antigenic structure of the newly pathogenic NDV strains isolated from different outbreaks with that of the viruses used for the vaccination are of crucial importance to understand the causes of frequently occurring vaccine failure. 3. Poultry farmers need to be educated to adopt the biosecurity programs 4. A timely reporting mechanism should be developed that can be used to control an ND epidemic in the country		
4523	12114403		Molecular characterization of Newcastle disease virus isolated from Chickens in South Valley provinces /	Hussein, Mahmoud Hamed Sabra.			2013			
4524	12114789		Effects of injection of some neurotransmitters on the ovary and reproductive hormones in albin rats /	Ali, Fatma ali mohamed.			2013	The development and maintenance of reproductive systems are necessary for the propagation of all vertebrate species therefore the efforts of scientists are directed towards this object to improve reproductive performance. Female reproduction is under hormonal control of hypothalamic -pituitary- gonadal (HPG) axis which is responsible for the development, puberty, adulthood and senescence of reproductive systems .		
								The aim of this investigation is to obtain information and evaluation of serological tests(RBPT and TAT) for diagnosis of brucellosis of cows in gena governorate. sensitive alternative test for detection for brucella spp. either following serology or directly in field samples and comparing the sensitivity and specificity of the traditional method and that of PCR. Brucellosis is one of the major worldwide diseases caused by facultative intracellular bacteria of the genus Brucella. The disease is characterized by abortion, retained placenta, orchitis and epididymitis in its principal animal hosts and by weakness, fever, chills, sweating, joint pain and headaches in human. Control of brucellosis in animals is still considered a difficult task due to the contagious nature of the disease, wide host range, latency as well as difficulty to detect all infected cases at all stages of the disease. Application of policy of test and slaughter has been reported in different countries including Egypt. Great limitation of this method is mainly due to difficulty of accurate diagnosis in individual cases (Salem et al., 1987). Migratory sheep and goats especially those grazing after cattle constitute a major risk and can make serious breakdowns in the control program. To boost the control program, effective epidemiological tools are needed for tracing of infection. To gain detailed epidemiological information about the disease spread among different animal		

4525	12114799	Some Molecular Studies on Brucella Species /	Gad, Sayed Mahran.	2013	species in various localities, one must not rely only on serological testing, but thorough bacteriological examination is necessary. Although identification to the species level is the primary goal of allAlthough identification to the species level is the primary goal of all microbial classification schemes, the accurate recognition of subtypes within a species is assuming greater importance. The use of competent biotyping methods is necessary to enable a differentiation of the Brucella strains and to define the source of infection, mechanisms of transmission and rate of spread of infection. Subtyping of the genetically and phenotypically closely related members of the genus Brucella presents a real challenge. Molecular means including DNA restriction endonuclease analysis (O'Hara et al., 1985; Gándara et al., 2001), DNA-DNA (Verger et al., 1985 and DNA- rRNA (De Ley et al., 1987; Grimont et al., 1992) hybridization revealed high genomic resemblance. Genotyping failed thus far in differentiating all strains at the biovar level(Bardenstein et al., 2002; Cloeckaert et al., 2002; Marianelli et al., 2003). Very recently, Bricker et al. (2003) discriminated among field strains of Br. abortus biovar 1. Inter-laboratory reproducibility of genotyping methods for brucella has been problematic making the global application of such methods unlikely, at least for the time being. To make matters worse, an almost single predominant strain, Br. melitensis biovar 3, has been lately encountered in animals in Egypt (Ghobashy et al., 2003; Sayour, 2004). This renders biovar identification of limited value for epidemiological trace-back to the herd/flock of origin as brucellosis is highly communicable and zoonotic.Aims of the present thesis are: 1) The aim of this investigation is to obtain information and evaluation of of serological tests (RBPT and TAT) for diagnosis of brucellosis of cows in Qena Governorate. 2) Sensitive alternative test for detection for Brucella spp.either following serology or directly in field samples and comparing the sensitivity and specificity of the traditional methods and that of PCR. 3) Application of PCR on the field samples as sensitive and specific alternative test for detection of Bruella.		
4526	12114812	Clinical and laboratory studies on emaciation and ill-thriftiness in cattle at Aswan governorate =	Nour, Safaa Yousef.	2013	Aim of the work to look for the relation between emaciation in cattle and clinical evaluation of skin , hair coat , mucous membranes rumen motility, temperature and appetite.hematological parameters. Cattle are considered the main integral part of the farming system for small farmers in Aswan governorate. Farmers depend on cows and oxen for milk and meat. In spite of their importance, poor growth, worth body condition and poor productivity of cattle in this area consist of a major problem thus it is important to study this problem and look for the possible causes of emaciation in cattle in this area. Poor growth and unthriftiness in livestock animals are considered the widely mentioned complain among farmers in Upper Egypt. Bad or inadequate feeding of nutrients, deficiency of macro and micro-elements, improper housing or management, impact of gastrointestinal, skin and blood parasites and chronic debilitating diseases are incriminated as the most probable causes of such condition (Sadiek, 2001). Ill-thrift is a vaguely defined condition with a variety of causes however ill-thrift and suboptimal growth are terms often used interchangeably (Radostiis et al., 2000). Failure to gain weight is the main feature of this condition and chief complain of livestock producers. It has a drastic economic impact on livestock production as it affects animal' s rate of body weight gain, marketing, day to the first calving, herd survivorship and future productivity (Underwood and Suttle, 1999). While the most likely cause of this condition is the disturbance of metabolism secondary to micronutrients imbalances, the pathophysiological basis of such condition is still intricate (Mills, 1983).Weight loss or failure to gain weight (ill-thrift) is concerned with the syndrome of weight loss in the presence of an adequate food supply and a normal appetite. In the absence of any primary disease, an animal or group of animals that presents with this as the problem is a major diagnostic dilemma. Several poorly identified diseases in this category are 'weaner ill-thrift', 'thin sow syndrome', 'thin ewe syndrome', 'weak calf syndrome' (Radostiis et al., 2006). Ettinger and Feldman, (1995) mentioned that change in body weight-weight loss or weight gain result when metabolic utilization and/or nutrient loss exceeds or falls short of energy intake. Weight loss can occur through increased energy demands (hyper metabolism), inadequate nutrient assimilation (anorexia, regurgitation A number of stress factors including environmental and managerial variables such as hot climatic condition, type of soil and weaning practices have also been reported to be contributing factors to calf ill-thrift (Reid and Howath, 1980; Scibilia et al., 1987). Stress of trace elements deficiencies and hot climatic condition generally increases the production of free radicals, leading to oxidative stress (Elsayed, 2001 and Saleh et al., 2008).		

							the present study is designed to investigate the following: evaluation of the sensitivity and specificity of PCR technique in comparison with biochemical reaction by API 20 E and conventional culture methods by isolation of E coli from suspected samples collected from mastitic bovine milk identification of isolates using conventional methods and adaption of PCR technique for detection of E coli to give accurate diagnosis by using specific primers. Escherich, (1885) was the first who identified E. coli in 1885, and the bacterium was known as bacterium coli commune. De. et al., (1956) identified enterotoxins secreted by E. coli able to mediate increased fluid secretion in gut leading to diarrhoea based on virulence properties of E. coli, their difference in epidemiology and distinct O:H serotypes In recent years, there has been considerable increase in the incidence of drug resistance in bacteria due to extensive and indiscriminate use of antimicrobial agents for therapy, prophylaxis or growth promotion. The emergence of drug resistant strains following continuous feeding of antibiotics to livestock has led to loss of their efficacy (Smith and Hall, 1966 and Singh et al., 1992). The organism typically colonizes the infant gastrointestinal tract within hours of life and thereafter, both E. coli and the host derive mutual benefit (Drasar and Hill, 1974). Wilson et al. (1983) reported that the microorgansim originally called bacterium coli was isolated from the feces of infants by Escherich over a century ago. Martin et al. (1986) stated that raw milk was first recognized as a vehicle of transmission of E. coli. Levine, (1987) stated that In the debilitated or immunosupressed host or when gastrointestinal barriers are violated even normal non pathogenic strains of E. coli can cause infection. Pathogenic E. coli are one of the most important groups of bacteria causing diarrhoea and extraintestinal infections in humans and animals. Jones, (1990) stated that millions of non-pathogenic E. coli bacteria are living in the normal intestinal microflora of both humans and animals. E. coli adheres to the mucus overlaying the large intestine where they constitute a useful microbial barrier because of their antagonism to pathogenic bacteria. E. coli is massively excreted with the faeces in the environment. E. coli is ubiquitous in the cow's environment. It is obvious that challenge of E. coli udder infection will remain so long as cows produce faeces. Varnam and Evans (1991) stated that subdivided the pathogen strains of E. coli subdivided based on clinical signs, mechanisms of pathogenesis, biochemical and serological markers into five groups : enteropathogenic (EPEC), enterotoxigenic ETEC), enteroinvasive (EIEC), enteroaggregative, diffuse adherent (Eagg- DAEC), and enterohaemorrhagic (EHEC). Pathogenic E. coli are one of the most important groups of bacteria causing extraintestinal infections. Since that, it has become a pathogen of major concern in both food and dairy industries, because of its ability to cause severe illness to humans and animals (Abdul-Raouf et al., 1993). Cullor, (1996) stated that E. coli is a Gram-negative, non-spore-forming rod, which belongs to the family Enterobacteriaceae. Gram-negative bacteria have a cell wall that typically consists of three layers, the cytoplasmic membrane, the peptidoglycan layer and the outer membrane. The outer cell membrane contains phospholipids, membrane proteins and lipopolysaccharide (LPS). Lipopolysaccharide comprises lipid-A, the lipopolysaccharide core and repeated polysaccharide units, called O-antigens. He stated that on the outer surface, bacteria may have fimbriae, which protrude from the cell wall. The surface mayalso be covered with a thick polysaccharide layer, called a capsule. Based on the different structures of O-antigens, K-antigens (capsular) and H-antigens (flagellar), E. coli can be divided into O:H:K serotypes. Lipid-A is the lipophilic, inner part of LPS, which causes the toxic effects of LPS, also known as endotoxin (Cullor, 1996; Hogan and Smith, 2003). E. coli is part of the normal intestinal flora of humans and animals, and is the most common facultative anaerobic bacterial species in the gut. The bacteria are constantly excreted in the faeces to the environment. Pathogenic E. coli bacteria can cause intestinal and extra-intestinal infections in mammalian and avian hosts (Cullor, 1996; Nagy and Fekete, 1999). Cullor, (1996) stated that E. coli is the predominant cause of urinary tract infection in humans, and also causes invasive diseases, such as bacteraemia and meningitis, in humans and animals. China and Guffaux, (1999) stated that E. coli is a member of the family of Enterobacteriaceae. of primary importance is their ability for fermentation of lactose. Over 700 antigenic types or serotypes of E. coli have been recognised based on O, H, and K antigens. Two classes of coliforms have to be distinguished strains that are harmless (non-pathogenic strains) and strains that cause a wide variety of typical clinical infections (pathogenic strains). Lehtolainen, (2004) mentioned that E. coli strains involved in acute clinical mastitis have, however, no specific virulence factors. 2. Mastitis overview :- Mastitis is defined as an inflammatory reaction of the mammary gland (International Dairy Federation, 1987). In practice, whether a case of mastitis is classified as clinical or subclinical often depends on how carefully the cow is observed when diagnosis is made The extent of these changes is determined by the severity of the infection. (International Dairy Federation, 1987; Harmon, 1994 and Pyörälä, 2003).

4534	12115644	Etude stylistique de Madame Bovary de Gustave Flaubert/	Mohamed, Tag khaled Ahmed.			2013	Au debut je tiens a exprimer mes remerciements et ma gratitude pour Madame le professeur Nadia kamel je la remercie pour son acceptation de diriger la these j'ai beaucoup profite de son erudition. Avant tout, nous voudrions montrer que le but de ce travail est de reconnaître les caractéristiques du style de Flaubert dans Madame Bovary. Le xx siècle a reconnu en Flaubert le premier écrivain vraiment moderne. Difficilement classable, il a inventé une forme romanesque originale et féconde.1 On considère généralement Flaubert comme l'un des maîtres du mouvement réaliste, ce qui ne va pas sans poser de problème puisqu'il a constamment refusé toute appartenance à une école et volontiers fustigé les écrivains de l'école réaliste.2 Flaubert donne au style un grand soin. On peut découvrir cela d'après ces propos d'Emile Zola : «J'arrive au style de Gustave Flaubert [...] il soigne, je l'ai dit, jusqu'aux virgules, il met des journées s'il faut, sur une page pour l'obtenir telle qu'il l'a rêvée. Il poursuit les mots répétés jusqu'à trente et quarante lignes de distance. Il se donne un mal infini pour éviter les consonances fâcheuses, les redoublements de syllabes offrant quelque dureté.»3 Flaubert voit que la prose doit prendre les caractéristiques de la poésie. Il dit : «Une bonne phrase de prose doit être comme un bon vers, interchangeable, aussi rythmée, aussi sonore.»4. Quant à la question du rythme dans la phrase de Flaubert, il hérite le rythme ternaire : «Flaubert affectionne le rythme ternaire.»5. Cela paraît dans Madame Bovary. Emile Zola affirme la tendance de l'auteur d'écrire une prose comme la poésie par ces paroles : «Surtout il proscrire l'écrivain a beaucoup souffert pour obtenir un style sublime. Emile Zola poursuit son discours sur le style de Flaubert et montre cette souffrance subite par l'auteur dans les propos suivants : «Je lui ai souvent entendu dire qu'une page de belle prose était deux fois plus difficile à écrire qu'une page de beaux vers. La prose a, par elle-même, une noblesse de contours, une fluidité qui la rend très pénible à couler dans un moule solide. Lui, la voudrait dure comme du bronze, éclatante comme de l'or. Avec Gustave Flaubert, nous revenons toujours à une idée d'immortalité, à l'ambition puissante de faire éternel.»2 Marcel Proust traite une question importante chez Flaubert, c'est celle de l'adverbe. «[...] les adverbes, locutions adverbiales, etc., sont toujours placés dans Flaubert de la façon à la fois la plus laide, la plus inattendue, la plus lourde, comme pour maçonner ces phrases compactes, boucher les moindres trous. M. Homais dit : «vos chevaux, peut-être, sont fougueux.»3 Comme on a dit au-dessus, Flaubert a subi des maux pour obtenir une écriture parfaite. Nous voudrions signaler une question très importante dans le travail de l'écrivain, c'est l'épreuve du gueuloir : «Flaubert [...] est un homme qui travaillait et retravaillait ses textes. Jamais content de la forme obtenue, il raturait, puis raturait encore. Après ce labeur épuisant, il se mettait à déclamer sa prose tout haut, en hurlant dans ce qu'il appelait son gueuloir. C'est à l'épreuve de l'oralité qu'il décidait si le rythme et la musicalité étaient satisfaisants.»4. Maupassant dit au sujet de Flaubert : «Son regard ombragé de grands cils sombres courait sur les lignes, fouillant les mots, chavirant les phrases, consultant la physionomie des lettres assemblées, épiait l'effet comme un chasseur a l'affût»1.		

4535	12115675		The diagnostic value of saline infusion sonohysterography and hysteroscopy in the evaluation of uterine cavity /	Ibrahim, Ahmed Mowafy.			Aim of the work to compare the diagnostic accuracy , acceptability, reliability and sensitivity of saline infusion sonohysterography (SIS) and hysteroscopy for evaluation of intracavitary abnormalities in woman with abnormal sonographic and hysterosalpigographic finding.Ultrasound imaging of the female reproductive tract was first described in 1972 by Kratochwil et al., (Kratochwil et al; 1972). and currently represents one of the most common procedures performed by gynaecologists. The recent advances in ultrasound technology have promoted transvaginal ultrasound (TVS) as a non-invasive, low-cost alternative to hysteroscopy. Indeed, it provides good visualisation of the endometrium, mid-line echo and uterine cavity. The simplicity of the ultrasound examination has led gynaecologists to consider TVS as the 'first step' procedure in the evaluation of the uterine cavity. However, which is the best method for the evaluation of the uterus is still a matter of debate. Indeed, a single technique that is 100% reliable, accurate, well-tolerated and low-cost is still to be identified. (Grandberg et al .,1991)Saline infusion sonography (SIS) is a real-time imaging technique for visualization of the endometrium and endometrial cavity. Sterile saline installation into the endometrial cavity with the aid of the two-dimensional B-Mode transvaginal ultrasonography (TVS) is an easy, fast, cheap and well-tolerated technique for diagnosis of uterine cavity pathologies. SIS offers a detailed vision of the uterine cavity compared to the TVS and can prevent the patient from more invasive procedures such as diagnostic hysteroscopy. Additionally, SIS can also be used to evaluate the tubal patency in some instances (Fleischer et al; 1997) and to search for retained products of conception. (Wolman et al; 2000)Hysteroscopy has the advantage of directly visualizing the uterine cavity and endometrium, but it cannot comment on myometrial pathology. The choice of diagnostic procedure seems to be determined largely by clinician's preference. However, acceptability of the procedure by subjects is very important. (Kelekci, et al; 2005)Aim of the work To compare the diagnostic accuracy , acceptability , reliability and sensitivity of saline infusion sonohysterography (SIS) and hysteroscopy for evaluation of intracavitary abnormalities in women with abnormal sonographic and hysterosalpigographic findingsDay 1 of the menstrual cycle refers to the first day of menstruation. At this time oestrogen levels are low and follicle-stimulating hormone (FSH) is secreted by the pituitary gland and stimulates follicular development within the ovary. The granulosa cells of the growing follicles produce oestrogen, which acts upon both the hypothalamus (reducing gonadotrophin-releasing hormone production [GnRH]) and pituitary gland. Secretion of FSH from the pituitary is thus inhibited (negative feedback) and circulating FSH levels fall. Only the largest 'lead' follicle possesses enough FSH receptors to continue growth and oestrogen production, the other follicles becoming atretic (days 5–7). (Jeffcoate; 1992)This hormonal 'surge' triggers ovulation (day 14) and oestrogen levels fall temporarily so that positive feedback on the hypothalamus and pituitary ceases and is replaced by a negative feedback effect resulting in a fall in FSH and LH. The collapsed postovulatory follicle is transformed into a corpus luteum. The granulosa and theca cells of the newly formed corpus luteum produce oestrogen, and more importantly progesterone, so that a stable secretory endometrium is produced in anticipation of conception and ensuing embryonic implantation. In the absence of pregnancy (trophoblast producing human chorionic gonadotrophin), the corpus luteum cannot be maintained and starts to wane after 7–10 days. Hormone production declines rapidly and it is this progesterone withdrawal that triggers menstruation 14 days		
							The aim of this study:- 1-To detect the serum leptin in children with nephrotic syndrome. 2-To detect the relationship between serum leptin and degree of proteinuria. 3-To find out if it has a prognostic value or significance as regard the respond to treatment especially steroid.The first recorded description of NS dates to the15thcentury.Pediatric nephrotic syndrome, also known as nephrosis, is defined by the presence of nephrotic-range proteinuria, edema, hyperlipidemia, and hypoalbuminemia. Nephrotic range proteinuria is defined as proteinuria exceeding 1000 mg/m² per day or spot (random) urinary protein-to- creatinine ratio exceeding 2 mg/mg. The proteinuria in childhood nephrotic syndrome is relatively selective, constituted primarily by albumin (Hogg et al., 2000).		

						incidence and Epidemiology:- Annual incidence of NS range from 2-7 per 100,000 children, and prevalence from 12-16 per 100,000 (Eddy et al., 2003).A study from New Zealand found the incidence of NS to be almost 20 cases per million children under age 15 years (Wong et al., 2007).In specific populations, such as those of Finnish or Mennonite origin, congenital nephrotic syndrome may occur in 1 in 10,000 or 1 in 500 births, respectively (Niaudet et al., 2004).ome studies have suggested a change in the histology of idiopathic nephrotic syndrome (INS) over the past few decades, although the overall incidence of INS has remained stable. The frequency of focal segmental glomerulosclerose (FSGS) associated with INS appears to be increasing. A review of the literature suggested a 2-fold increase in the incidence of FSGS in recent decades (Borges et al., 2007).In children younger than 8 years at onset, the ratio of males to females varies from 2:1 to 3:2 in various studies. In older children, adolescents, and adults, the male-to-female prevalence is approximately equal.International study of kidney diseases in children (ISKDC) data indicate that 66% of patients with either minimal changes nephrotic syndrome (MCNS) or FSGS are male, whereas 65% of individuals with membranoproliferative glomerulonephritis (MPGN) are female (Borges et al., 2007). Patients with MCNS, 70% are younger than 5 years. Only 20-30% of adolescents with INS have MCNS on biopsy findings. In the first year of life, genetic forms of INS and secondary nephrotic syndrome due to congenital infection predominate (Eddy et al., 2003) of glomerular capillary wall by degrading heparan sulphate glucosaminoglycans.The degradation of these anionic glycans has long been hypothesized as a cause of increased glomerular permeability to recently showed dysregulated heparanas synthesis in children with steroid-sensitive NS (Holt et al., 2005).The association of allergic responses with NS also illustrates the role of the immune system in INS. NS has been reported to occur after allergic reactions to bee stings, fungi, poison ivy, ragweed, house dust, jellyfish stings and cat fur. Food allergy might play a role in relapses of INS; a reduced-antigenic diet was associated with improved proteinuria and complete remission in one study (Coleman et al., 1996).Additionally, INS is 3-4 times more likely in children with human leukocyte antigen (HLA)-DR7. Steroid sensitive INS has also been associated with HLA-B8 and the DQB1 gene of HAL-DQW2. A greater incidence of INS is also observed in children with atopy and HLA-B12 (Niaudet et al., 2004)Leptin circulating levels directly The kidneys play a significant role in the plasma removal of leptin. Given its size (16,000 Daltons), leptin is freely filtered by the glomerulus. However, while leptin is freely filtered, little or no leptin cleared by the kidneys appears in the urine (Meyer et al., 1997). Renal processing of leptin appears to occur through renal tubular uptake and cellular degradation (Landt et al., 1998). It was previously reported the presence of significant decrease in the prednisolone response of peripheral blood mononuclear cells (PBMCs) derived from patients with chronic renal failure, compared to the PBMCs of healthy subjects and nephrotic syndrome (NS) patients as leptin is a small peptide, it is principally cleared by the kidneys, urinary excretion of leptin in proteinuric NS patients is significantly higher, compared with healthy subjects (Kayo et al., 2008) Multiple studies revealed that the decrease in glomerular filtration rate leads to the accumulation of leptin (Menon et al., 2004).		
4536	12115701	Role of Leptin in children with nephrotic syndrome /	Mahmoud, Fatma El-Zahraa Mostafa Abo El-Magd.		2013	Aim of the work to evaluate the role of laparoscopy in the repair of the different types of inguinal hernias ,including its Advantages and disadvantages in comparison with open inguinal hernia repair.Much evidence suggests that hernia formation and Recurrence depends in part on a systemic predisposition due to an abnormal metabolism of connective tissue and in part on other Risk factors, surgical as well as non-surgical. (Sorenson et al., 2002)Inguinal hernia repair is the most frequently performed Operation in general surgery with about 100,000 procedures being carried out in the UK, 700,000 in the US and 20 million worldwide Annually. (Kruzer and Kark, 2005).In the last 15 years the development and refinement of new techniques and assimilation of new and evolving medical technologies has turned laparoscopic inguinal hernia repair from an experimental to a widely performed procedure. Further improvements in prosthetic mesh technologies and new methods of mesh fixation are now expanding the role of laparoscopy to other types of hernia (Ahmed and Beckingham, 2004).Early laparoscopic inguinal hernia repair techniques such as simple ring closure or intraperitoneal onlay of mesh (IPOM) had high rates of recurrence and complications and have been superseded. The two current methods are Trans-Abdominal Pre-Peritoneal (TAPP) and Totally Extraperitoneal (TEP) repair. TEP is considered to be technically more difficult, partly because of unfamiliarity with the anatomy. The use of a balloon can greatly facilitate dissection, particularly useful for surgeons on the early part of their learning curve, although it does add to the cost of the procedure (National Institute for Clinical Excellence, 2001).A large European Union meta-analysis recently compared the results of minimally invasive hernia repair with the traditional open mesh repair. This meta analysis compared the results of 41 published trials .The conclusion was that the risks of haematoma formation and wound infection were less in the laparoscopic group. The duration of hospital stay was less and return to normal activity was quicker after laparoscopic surgery. The incidences of chronic pain, numbness and hernia recurrence were also less after laparoscopic repair. The incidence of haematoma formation was less after laparoscopic repair but of seroma formation was hi (Mc Cormack, 2003).		

							The laparoscopic approach also often identifies additional hernias, some of which might well not have been seen at open surgery (Crawford et al., 1998).The UK National Institute of Clinical Excellence(NICE) published the guidelines on laparoscopic hernia repair including that: for repair of primary inguinal hernia, open (mesh) should be the preferred surgical procedure; for the repair of recurrent and bilateral inguinal hernia, laparoscopic surgery should be considered; when laparoscopic surgery is undertaken for inguinal hernia, the TEP procedure should be preferred; laparoscopic surgery for inguinal hernia should be only undertaken in those units with appropriately trained operating teams that regularly undertake these procedures (National Institute for Clinical Excellence, 2001).the riskAim of the Work This study aims to evaluate the role of laparoscopy in the repair of the different types of inguinal hernias, including its advantages and disadvantages in comparison with open inguinal hernia repair.		
4537	12115735	Role of Laparoscopy in inguinal hernia repair /	Allam, Ahmed Fathy Ahmed.			2013			
							Aim of the work to compare between oxybutynin and solifenacin succinate as anticholinergic drugs in the treatment of nocturnal in Qena government. Nocturnal enuresis (NE) is defined as repeated, spontaneous voiding of urine during sleep in a child aged 5 years or older in the absence of congenital or acquired defects of CNS or urinary tract (Budak et al., 2010). Diurnal enuresis or incontinence is defined as leakage of urine during the day. For the diagnosis of NE to be established, a child 5 to 6 years old should have two or more bedwetting episodes per month; and a child older than 6 years of age should have one or more wetting episode per month (Thiedke, 2003). At 5 years of age, 15-25% of children wet the bed. NE is twice as common among boys as girls. With each year of maturity, the percentage of bed-wetters declines by 15% (Bakker et al., 2002). According to the presence of other symptoms, NE is classified into two types. Monosymptomatic or uncomplicated NE is defined as normal voiding occurring at night in bed in the absence of other symptoms referable to the urogenital or gastrointestinal tract. Polysymptomatic or complicated NE is defined as bed wetting associated with daytime symptoms such as urgency frequency, chronic constipation or encopresis (Thiedke, 2003). Monosymptomatic NE usually is divided into primary (PNE) and secondary (SNE) forms (Koff et al., 1998). Primary NE is defined as present when the patient had never achieved a period of nighttime dryness >6 consecutive months. SNE is considered present when the patient had experienced a period of nighttime dryness of at least 6consecutive months (Norgaard et al., 1998). Monosymptomatic NE is a common pediatric disorder with a high spontaneous resolution rate. Different causes such as maturational delay, genetics, small functional bladder capacity, abnormal diurnal secretion of vasopressin, sleep disorders...etc; may contribute to NE in a given child (Wille et al., 1994). Primary NE & SNE likely share a common pathogenesis. Symptoms of daytime voiding dysfunction are common in patients with PNE & SNE.Daytime voiding habits might influence how the C.N.S responds at night to a full or contracting bladder (Robson et al., 2005) The common reported causes of SNE include urinary tract infections, constipation, urge syndrome/dysfunctional voiding, psychological stress, diabetes, and obstructive sleep apnea (Robson et al., 2000). The only significant difference between the patient with PNE & those with SNE was in the prevalence of constipation. Constipation was significantly associated with PNE (Robson et al., 2005). The theoretical mechanism whereby constipation might cause enuresis is a direct pressure effect of stool on the bladder. Constipation might be a potential cause of the low nocturnal bladder capacity that is reported as a pathophysiologic factor in bedwetting (Hjamlmas et al., 2004) .The evaluation of the child with monosymptomatic NE includes a careful history, physical examination & urine analysis (Bakker et al., 2002). (Treatment program usually involves several methods of treatment; non pharmacological such as motivational therapy, fluid restriction, enuresis alarms, bladder training; and pharmacological agent such as desmopressin acetate, tricyclic antidepressants (eg, Imipramine) & anticholinergic (eg, Oxybutynin) (Cendron, 1999). Oxybutynin is one of the most common anticholinergic medications used to treat overactive bladder in children (Koçsar et al., 1999). Anticholinergic agents may play a role for a subset of children with enuresis who do not have lower urinary tract symptoms during the day but have a restricted bladder capacity because of detrusor overactivity at night as it relaxes bladder smooth muscle, increases bladder capacity, diminishes the frequency of uninhibited contractions of the detrusor muscle, and delays the initial desire to void in patients with involuntary bladder contractions (Yeung et al., 2002). Aim of the work To compare between oxybutynin and solifenacin succinate as anticholinergic drugs in the treatment of nocturnal enuresis in Qena governmentchildren.		
4538	12115766	Solifenacin versus oxybutynin in treatment of nocturnal enuresis in children (comparative study) /	Murad, Nesma Abdel-Salam Mahmoud.			2012			
							Aims of the current study to describe the epidemiological features of type 1 diabetes mellitus in the from of sex, residence , age group at diagnosis ,maternal occupation , the pattern of seasonality at birth and at diagnosis , birth order , type of feedig type of delivery , parents consanguinity , maternal occupation , family history of diabetes mellitus the precipitating factors the initial symptoms of presentation and insulin regimen among children.Diabetes mellitus (DM) is a group of metabolic diseases characterized by chronic hyperglycemia resulting from defects in insulin secretion, insulin action, or both (ISPAD consensus guidelines, 2007). Two main categories with various subtypes currently identified are type 1		

						DM and type 2 DM. Type 1 DM occurs in less than 10 % of people diagnosed with diabetes (McCarthy et al, 2001). Type 1 DM is the most common metabolic disease in childhood (Ross et al, 2003). Type 1 diabetes (T1D) is an autoimmune disorder that likely results from a T cell mediated autoimmune process targeted at the β-cells in the pancreas. It is one of the most common pediatric diseases and viewed as a complex disease with varied pathogenesis, clinical appearance and outcome (Mayer-Davis et al, 2009). Type 1 diabetes is often called insulin dependent diabetes mellitus (IDDM) due to the lifelong clinical need of exogenous insulin to sustain life (Mordes et al, 2004). There is a clear seasonal variation in diagnosis of diabetes, and children may have a preceding, precipitating factor like infection. However, seasonal factors could influence not only precipitating mechanisms just before diagnosis, but also initiating or promoting mechanisms very early in the disease process (Moony et al, 2004). Also, seasonal variation in nutrition or infections might influence pregnant mothers and their fetuses, or the baby during its early life. Some studies have confirmed the relation between month of birth and the risk of developing diabetes (Rothwell et al, 1996). An Egyptian study showed that age, seasonal variations, viral infections, emotional stress, high birth order and consanguinity between the parents and family history of diabetes were risk factors for development of Type 1 DM (Salem et al, 1990). Diabetes prevalence in some Eastern Mediterranean countries is among the highest in the world. The highest rates are reported in Egypt, Kuwait, Lebanon, Oman and Qatar where the incidence of type 1 diabetes is reported to be 8-10 per 100 000 population per year in children aged <15 years (WHO. Guidelines for the prevention, management and care of diabetes mellitus 2006). Incidence rate varies greatly between different countries, within countries, and between different ethnic populations. The incidence of Type 1 DM increased worldwide in the closing decades of the 20th century. Steep rises in the age group under 5 years has been recorded recently (Gale et al, 2002). The incidence of type 1 diabetes is increasing and this may double the burden of disease in our youngest by 2020. The recent increase in incidence is mostly happening in the very young and those with moderate genetic susceptibility. Many environmental factors have been implicated, but no major determinants have been clearly identified, and the mechanisms of involvement remain elusive. This review summarizes current research efforts directed at understanding the possible reasons for this increase, including the role of viruses, gut micro biota, early life feeding patterns, perinatal factors and childhood growth patterns. It also provides a road map for future research directions (John Wiley et al, 2010)Recent epidemiological studies have focused on determining what triggers the body to destroy pancreatic β-cells, which produce insulin. Studies have suggested multiple risk factors, including genetic predisposition, diet, body size, seasonality of birth, viruses and geography, in addition to autoimmunity (Lernmark et al, 2008). The rising incidence of T1D over the past decade is too rapid to be completely attributed to an increase in genetic susceptibility. Recent reports from Australia, Europe and the United States have shown that the proportion of youth with T1D having the highest risk human leukocyte antigen (HLA) genotype (DR3/4) has not changed over time; rather the majority of individuals with new onset T1D are those with the moderate risk HLA genotypes (DR3/3 and DR4/4) (Vehik et al, 2008)Type 1 DM is a disease with both acute and chronic complications that are associated with serious illness and shortened life. It has been estimated that average life span of individuals with diabetes is about 10 years shorter than nondiabetic general population (Alemzadeh et al, 2004). The aim of management is control of hyperglycemia, general health maintenance, psychological and emotional satisfaction, and prevention of acute and chronic complications. The aspects of management include insulin therapy, nutritional management, exercise, educational aspects, and psychological aspects (Devendra et al, 2004This study aimed to describe the epidemiological features of type 1 diabetes mellitus in the form of (sex, residence, age group at diagnosis, maternal occupation, the pattern of seasonality at birth and at diagnosis, birth order, type of feeding, type of delivery, parents' consanguinity, maternal occupation, family history of diabetes mellitus, the precipitating factors the initial symptoms of presentation and insulin regimen) among children.		
4539	12115808	Some epidemiological of childhood type I Diabetes mellitus /	Abdel Aziz, Mahmoud Mohamed.		2012			
4540	12116856	Comparative study between transthoracic and transesophageal echocardiography in assessment of rheumatic heart diseases associated with fever/	Ali, Ahmed abdellatif Ali.		2013	Evaluation of the goal of harmonic transthoracic echocardiography (h TTE) compared to transesophageal echocardiography (TEE) in the assessment of rheumatic heart patients associated with fever in Qena university hospital.		
4541	12116862	Effect of carbamazepine in treatment of asthmatic patients/	Ibrahim, Amr Abul-hasan.		2013	Aim of work is to study the efficacy of the carbamazepine in patients with bronchial asthma.		

4542	12116867	Changes in Anterior chamber configuration as Measured by ultrasound biomicroscopy after cataract surgery /	Abdelghahy, Amr Mahmoud.			2013	aim of the work to evaluate quantitatively by means of ultrasound biomicroscopy (UBM) changes in the anterior segment configuration including the ciliary processes induced by cataract surgery.		
4543	12116873	Role of galectin -3 troponin I in heart failure patients/	Ahmed, Marwa Abd-elhady.			2013	The aim of this study is to determine the value of plasma galectin-3 & troponin I in heart failure patients correlate the results with the clinical criteria & the echocardiographic findings of the patients correlate the results with some morbidity cofactors in heart failure patients such as hypernatraemia hyperuricemia & anemia.		
4544	12116878	respiratory functions in patients with liver cirrhosis/	Hamed, Mahmoud Ekiny.			2013	Aim of the work to evaluate respiratory functions in patients liver cirrhosis.		
4545	12116889	Evaluation of pulmonary and portal hypertension in bilharzial patients/	Abass, seham faisal.			2012	Aims of the work evaluate pulmonary and portal hemodynamic in patients with bilharzial hepatic periportal fibrosis study the correlations between pulmonary and portal parameters in those patients.		
4546	12116894	Screening for thyroid dysfunction in diabetic patients/	Bahgat, Karima sayed.			2013	Aim of the work to assess the adverse effects of diabetes on thyroid hormone levels to evaluate the biochemical thyroid hormone abnormalities in diabetic subjects without symptoms of thyroid hormone dysfunction.		
4547	12116902	Left ventricular diastolic dysfunction in type II diabetic patients/	Elnady, Reham Mohamed.			2013	Aim of the work is to evaluate the left ventricular diastolic dysfunction in asymptomatic type II diabetic patients.		
4548	12116906	Role of Multidetector computed tomography in the diagnosis of pulmonary embolism/	Mahmoud, Mohammed nabil.			2012	Aim of the work to assess the role of MDCT in the diagnosis of pulmonary embolism.		
4549	12116921	Comparison between colour duplex ultrasound and MDCT Angiography in diagnosis of lower limb ischemia/	Younan, Mina fallah.			2012	The aim of the work is to evaluate multi-detector row CT angiography color coded doppler as less invasive techniques in the evaluation of patients with lower limb arterial diseases results will be compared with digital subtraction angiography the gold standard technique.		
4550	12117089	Hazards of lead toxicity on catfish (Clarias gariepinus)/	Saber, Asmaa saber foad.			2014	The aim of the work study the effect of lead chloride on the exposed catfish through: Recording the clinical picture of the treated catfish with lead chloride Evaluating the effect of lead chloride on hematological , biochemical as well as histopathological findings in the exposed catfish.		
4551	12117101	Epidemiological and Molecular characterization of paratyphoid isolates from pigeons in Assiut governorate/	Gaber, Alhussien Mamdouh Ali.			2013	The present work is designed to cover the following points: studying the incidence of paratyphoid infections in pigeons in Assiut governorate Describing the clinical signs and necropsy lesions with incidence of infection in pigeons from different localities in Assiut governorate isolated and identification of the etiological agents.		
							The present investigation was carried out to clarify the following points: prevalence of different parasites infecting some freshwater fish at Qena governorate including seasonal and monthly dynamics of the infection Morphological description of the recovered parasites.Egypt's aquaculture production is by far the largest of any African country and places it 11th in terms of global production. The aquaculture sector makes a significant contribution to income, employment creation and food security in the country, all of which are national priority areas given low per capita income levels, rising population, worsening food security indicators, and official unemployment levels which have remained at around 10% for the last ten years (Macfadyen, et al. 2011).Fish is a good source of high quantity animal protein, minerals, vitamins particularly vitamin A and D from fatty fish species as well as thiamine (B1), riboflavin (B2) and niacin important for human health and growth, worldwide. Furthermore, fish is important to man as a good source of protein in man's diet and as a vector of some human disease pathogens. One of the scientific importances of identifying a fish properly is to tell to some reliable extent the health condition of the fish, and certain parasitic infections present with some symptoms that bear on the external treatment of the fish. All species of fish are vulnerable to various parasitic infections depending on the species of fish and the type of stream inhabited.However, fish like any other animals could be infected by several kinds of pathogens including parasitic one, about 80% of fish diseases are parasitic especially in warm water fish (Eissa, 2002)Fish parasitology is an important field in aquatic sciences as fish parasites are a group of organisms that often produce disease condition in fish thereby increasing their susceptibility to other diseases, causing nutritive devaluation of fish and fish loss. Fish parasites and diseases constitute one of the most important problems confronting the fishery biologist today(Ravichandran et al. 2007). Pathological conditions resulting from parasites and diseases assume high magnitude of epidemics under crowded and other unnatural conditions (Ravichandran et al., 2010).The need to assess the parasitic infection arises because the fish suffering from parasitic infections resulted into severe damage to fisheries industry and for successful prevention and elimination of such infections, it is extremely important to achieve early and correct diagnosis (Ahmed, 1994).

النتائج :

4560	12117989		فاعلية إستراتيجية التساؤل الذاتي في تدريس التاريخ على تنمية بعض مهارات التفكير التأملي والتحصيل لدى طلاب الصف الأول الثانوي = أحمد، سارة عبدالستار الصاوي.			2013	توصلت نتائج البحث إلى إعداد قائمة بمهارات التفكير التأملي اللازمة لطلاب الصف الأول الثانوي، كما توصلت إلى فاعلية إستراتيجية التساؤل الذاتي في تنمية بعض مهارات التفكير التأملي والتحصيل الدراسي لدى طلاب الصف الأول الثانوي، كما أشارت إلى وجود فروق ذات دلالة إحصائية عند مستوى ٠٠٠١ بين متوسطات درجات مجموعة البحث في إختباري (مهارات التفكير التأملي والتحصيل) في التطبيقين " القبلي – البعدي " وذلك لصالح التطبيق البعدي.		
4561	12118806		Prevalence of Epilepsy in primary school children in Qena city, Egypt/	Abd el-hafez, Mahmoud Abd el-hamed.		2013	Aim of work is planned to determinate prevalence of epilepsy in primary school children in Qena city seizure manifestations in positive cases indentification of different types of epilepsy , response to treatment and common risk factors in epileptic patient of primary school children.		
4562	12118821		Evaluation the effect of the timing of Adiministration of Misoprostol rectally in reducing blood loss during cesarean section/	Mohamed, Sayed Aboulabas .		2011	This study will be done to determine the best of administration of misoprostol recally during cesarean section and its role in reducing blood loss.		
							Aim of the work to evaluate the effectiveness of intratympanic steroid application in patients suffering from ISSNHL if used as follows: As a primary therapy a salvage therapy after failure of systemic steroids or as an adjuvant therapy with systemic steroids. Idiopathic Sudden sensorineural hearing loss (ISSNHL) is considered an otologic emergency requiring immediate and careful clinical intervention, followed by appropriate and specific treatment (Ahn et al., 2007).ISSNHL is defined as the rapid decline in hearing in less than 3days >20 DB in >3contiguous audiometric frequencies without any identifiable cause (Byle., 1984). ISSNHL occurs over a short period of time and may vary from a mild to profound hearing impairment in otherwise normal hearing individuals. The disorder has an estimated incidence of 5-20 cases per 100,000 populations (Mattox et al., 1977).In some cases the patient feels a pop or senses the sudden onset of tinnitus and the hearing drops precipitously, in other cases the hearing drops over a few minutes or few hours, other patients awakens in the morning with hearing loss. This condition, however constitute a medical emergency because the window of opportunity for treatment is narrow and early administration of steroids is more efficacious than watchful waiting (Rauch, 2004).No single treatment exists leading to complete recovery to pre-hearing loss levels. Proposed treatments have included vasodilators, steroids (Intratympanic or systemic), antiviral agents, hyperbaric oxygen and plasmapheresis (Slattery et al., 2005).literature review, the quantitative results of each study are converted into a common metric (effect size). There by allowing comparison of results across studies.To evaluate the effectiveness of Intratympanic steroid application in patients suffering from ISSNHL if used as follows: As a primary therapy, a salvage therapy after failure of systemic steroids or, as an adjuvant therapy with systemic steroids. In the vast majority of patients with ISSNHL, no specific cause can be identified. Therefore, the disease is called "Idiopathic" an exclusion diagnosis. A review of 837 patients with sudden hearing loss between 1989 and 1993 found that 88% were ultimately deemed idiopathic (Fetterman et al., 1996). The most popular theories as to cause ISSNHL include viral infection, vascular insufficiency, immune mediated reaction, and intra-labyrinthine membrane rupture. 60% of patients with ISSNHL have an elevation in serum viral titers compared with 40% of control (Wilson et al., 1983). Cytomegalovirus (CMV), mumps, and rubella have been identified in the inner ear of patients with ISSNHL (Cole, 1988).There are 4 types of direct and indirect evidence for the viral theory of ISSNHL: 1- Temporal association of ISSNHL with active viral upper respiratory illness. 2- Serologic evidence of active virus infection. 3- Histopathologic examination of post mortem human temporal bones. 4-Animal experiments demonstrating virus penetration of inner ear (Mattox et al., 1977).		

4563	12118832	Intratympanic corticosteroids injection for sudden idiopathic sensorineural hearing loss/	El Taieb, Mohamed Ramadan Abdel Samea.			2013	There are 3 types of circumstantial evidence to support the vascular theory of ISSNHL: 1- Sudden onset. 2- Case reports of sudden deafness with known systemic vascular disease. 3- Histopathologic demonstration of cochlear changes caused by vascular occlusion (Rauch, 2004). Certain prothrombotic risk factors and genes have been associated with ISSNHL (O'Malley and Haynes, 2008). Studies have shown that there are alteration in the blood and red cell filterability. And an association between ISSNHL and slow blood flow in the vertebrobasilar system, it has been reported that reduction in cochlear blood flow results in cochlear hypoxia due to edema of the capillary cells. Spontaneous perilymphatic fistulae have also been implicated in ISSNHL (Banerjee and Parnes 2005). ISSNHL is classified with some of these inner ear disorders as immune mediated. McCabe, 1979 first introduced the concept of autoimmune inner ear disease. There may be other immune mediated but not autoimmune causes of ISSNHL (Freedman et al, 1996). Also it was found that there is association of ISSNHL with known inner ear diseases as Wegner's disease, Cogan's syndrome (main target organs cornea and inner ear) and temporal arteritis (O'Malley and Haynes, 2008). Cochlear membrane rupture is a cause of sudden hearing loss (SHL), either spontaneous in cases of ISSNHL or occur in a patient with a history of temporal bone trauma and stapedectomy that damage the internal membranes of the cochlea and results in hearing loss. The concept of spontaneous cochlear membrane rupture is different, so there seems to be little objective evidence to support the idea that a substantial percentage of ISSNHL is caused by spontaneous cochlear membrane rupture (O'Malley and Haynes, 2008). Other diseases that can result in SHL must be excluded to diagnose ISSNHL as: Acoustic neuroma, Meniere's disease, syphilis, diabetes mellitus, multiple sclerosis, Lyme disease, mumps, polyarthritis nodosa, Cogan's syndrome and migraine (Fetterman et al., 1996). Some studies have described the postmortem pathologic findings in the temporal bone of patients with sudden deafness. The temporal bones were prepared in the standard manner for light microscopic study including fixation in 10% formalin, decalcification with ethylene diamine tetra-acetate, embedment in celloidin, serial sectioning at a thickness of 20 um and staining of every tenth section with haematoxylin and eosin (Schuknecht, 1993).		
4564	12118843	Effect of Tonsillectomy on the Immune system/	Shabeeb, Fatma Alzahraa Mohammed Ahmed.			2013	The Aim of this essay is to demonstrate the immunological role of tonsils and effect of tonsillectomy on the immune system. The palatine tonsils are lymphoepithelial organs located at the junction of the oral cavity and the oropharynx. They are strategically positioned to serve as secondary lymphoid organs, initiating immune responses against antigens entering the body through the mouth or nose. The greatest immunological activity of the tonsils is found between the ages of 3 and 10 years. As a result, the tonsils are most prominent during this period of childhood and subsequently demonstrate age-dependent involution (1). Human tonsils are known to be immunologically reactive lymphoid organs which manifest specific antibodies and B- and T-cell activity in response to a variety of antigens, carrying out the functions of humoral and cellular immunity (1). The human immune responses are divided into two types: (a) Humoral immune response, which is dependent on B cells, plasma cells and antibodies. (b) Cellular immune response, which is dependent on T cells and cytokines. The lymphocytes are the most important cells in the immune system (2). Inflammatory diseases of the tonsils constitute the most common cause of primary care visit to physicians. Tonsillectomy represents one of the most common operations performed in children. It is defined as a surgical procedure performed (with or without adenoidectomy) that completely removes the tonsil including its capsule by dissecting the peritonsillar space between the tonsillar capsule and the muscular wall (3). Although Immunological functions of the tonsils and possible effects of their removal are still controversial. In tonsillectomized children the incidence of infections of the upper respiratory tract was not increased compared to the non-tonsillectomized. After tonsillectomy there are many changes in the cellular and humoral immune systems (4). Adult patients with chronic tonsillitis definitely benefit significantly from tonsillectomy. Younger adult patients perceive greater surgical benefit than older adult patients (5). The aim of this essay is to demonstrate the immunological role of tonsils and effect of tonsillectomy on the immune system. The tonsils begin developing early in the third month of fetal life. They arise from the endoderm lining, the second pharyngeal pouch, and the mesoderm of the second pharyngeal membrane and adjacent regions of the first and second arches. The epithelium of the second pouch proliferates to form solid endodermal buds, growing into the underlying mesoderm; these buds give rise to tonsillar stroma. Central cells of the buds later die and slough, converting the solid buds into hollow tonsillar crypts, which are infiltrated by lymphoid tissue (6,7). The palatine tonsils are		
4565	12118870	Risk factors of hepatitis c virus and level of knowledge about hepatic viruses in Qena university hospital/	Mohamed, Mohamed Abdel Fatah.			2012	The aim of the work evaluate the most important risk factors for transmission of HCV in our local community Assess the previous knowledge of the population about the risk factors types , etiology , mode of transmission symptoms , treatment and prevention of infection with viral hepatitis by questionnaire including these risk factors Raise awareness amongst the population in our local community regarding infection with hepatic viruses and how to prevent exposure to this infection.		
4566	12118915	Role of 64 Multidetector computed tomography and virtual bronchoscopy in patients with tracheobronchial lesions in comparison with the fiberoptic bronchoscopy/	Mohamed, osama Abdul Rahman.			2012	Aim of the work is to assess the role of 64 MDCT and virtual bronchoscopy in patients suspected to have tracheobronchial lesions in comparison with the fibroptic bronchoscopy.		

4567	12118942		The Role of Multislice computed Tomography (MscT) in Diagnosis of cerebral Aneurysms/	Mohalil, Mahmoud Abo el-Aziz.			2013	The Aim of this work is to review the value of MDCT anigiography as a non invasive technique in diagnosis of cerebral aneurysms and its complications.		
4568	12119003		Principles of mangement of scapular fractures/	Mahmoud, Mohamed Abdallah.			2013	Aim of the work is to study the principles of management of scapular fractures.		
4569	12119040		Comparative study between Active and passive dilatation of ureter before ureteroscopy for ureteric stones/	Mustafa, Mohammed Abbas.			2013	we compare clinical outcomes of ureteroscopy after active or passive dialtion of ureter operative and postoperative outcomes will be in both groups.		
4570	12119068		Astudy of thyroid & parathyroid hormones in children with thalassemia major/	Muhammed, Muhammed Talaat - Hurb.			2013	Aim of the work to study the thyroid & parathyriod glands function in children with Beta-thalassemia and find out the endocrinal changes that could develop in transfusion dependent and transfusion non- dependent patients and try to find the influence of iron overload on thyroid & parathyriod glands.		
4571	12119606		Neurophysiological changes in patients with chronic liver disease/	Abd El Megid, Amr Mahmoud.			2013	Aim of the work Detection of neurophysiological changes in patients in patients with chronic liver disease Determination of different types of neurophy detected.		
4572	12119622		Evaluation of the Mechanical properties for polymer modified asphalt Mixtures /	Moubark, Safaa Abd El Sabour.			2014	Heavier loads and higher traffic volume demand higher performance of pavement. Excellent performance of pavement requires bitumen that is less susceptible to high temperature rutting or low temperature cracking. To improve its properties, Bitumen needs some modifiers such as polymers. This study is in favour of using polymers (polypropylene and Polyvinyl chloride) as modifiers because of low-cost situation and having good correlation with asphalt pavement. The conventional bitumen (60/70) penetration grade was used in this research, modified with Polypropylene (P.P) at four different modification levels namely 1%, 3%, 5% and 7% by weight of the bitumen and Polyvinyl chloride with 2%, 4%, 6% and 8% by weight of the bitumen. The conventional test such as penetration test and softening test dna epecsren ncrctele was used at first to determine physical properties of modified and un modified bitumen and then marshal mix design was used to determine the optimum bitumen content and then mechanical test such as Marshall Stiffness, compressive Strength, Indirect Tensile Strength and Critical energy Release rate were conducted in this research. The results indicated that, the addition of polymers (polypropylene and polyvinyl chloride) generally improved the mechanical properties of the mixture Regardless of the percentage of polymers that added and (PP) content of 5% and (P.V.C) content of 8% by weight of asphalt mixture can be recommended for the improvement of the performance of asphalt concrete mixtures and it can be noticed that the performance of (P.P)-modified asphalt mixtures is better compared with (P.V.C) modifier because it has the highest Marshall Stiffness, indirect tensile strength and unconfined compressive strength . Experimental testing has revealed the enhancement in the physical and mechanical properties of bitumen and asphalt mixtures when Polymers were added.		
								The possibility of strengthening the existing networks could be accomplished by increasing the water sources and/or inflow rates at the existing pump stations or by new additional stations according to results of real studies. Also, strengthen of an existing network could be done by establishing new pipelines in parallel with existing ones and increasing the equivalent diameters or completely replacing the pipelines with new ones with large diameters according to the costs. The present study is applied to Assiut city network as a real case study. Assiut city network consists of two pumping stations (sources of water) with flow rate Q equals 400 l/s, and 800 l/s, respectively, with the same pressure head (Hmax=70 m) . The total length of the pipelines is about 29.6 KM with different diameters ranging from 300 to 1200 mm. The study is conducted using the mathematical simulation model, EPANET. The model was used to simulate, study and analysis the operational conditions of the network with two pump stations throughout eleven operation cases. The operation cases were divided into three main categories according to the pump flow rates and pressure head, in addition to two cases for future needs, at year 2025 and 2040. The first group contains three cases, includes the increase of the pressure head only, where the second group includes other three cases; depending on the variation of the pumps flow rates only while the pressure head was kept constant with the original values. The last group consists of five cases as it covers the influences of the variation of both the pressure head and the flow rate on the water pressure and velocities in the Abstract iii network pipelines. For future cases, for year 2025 and 2040, the consumption rates at those years were estimated according to criteria of the Egyptian Code. Depending on the results of the three groups as mentioned before in which the best operation conditions were chosen and selected as the core of the future best operational conditions of the pump stations. Verification of the present study using data of Assiut city network was done and the following results could be conducted as:- 1- By switching off PM1 and increasing the head of PM2 by 30 m, the pressure head at region located closer to the large pump station dropped		

4573	12119708	Studying of some hydraulic and economical parameters influencing the designing of water distribution pipe networks :	El- Sadek, Wael Mohamed Mahmoud.			2014	to approximately 4 m during time of maximum demand. 2- In case of increasing only the flow rate of the large pump to 2-times of its capacity, to be 1600 l/s whereas no changes occurred in the small one, there was a slight improvement in the pressure along the network. 3- In case of increasing the flow rate of the large pump PM2, by the flow rate of the small one PM1, reaching to 1.5 times its original flow rate; to be 1200 l/s, the results were similar to those of the case that the flow rate of smaller pump was duplicated. 4- The best operational conditions of the pump stations are that (Q = 400 l/s, H = 70 m) for PM1 and (Q = 1600 l/s, H= 70 m) for PM2. 5- At year 2025, the pressure head at times of maximum demands will drop to be 47 m and the velocities in some pipelines will exceed to more than 1.80 m/s. At year 2040 the pressure head will DROP to 32 m and the velocity will be more than 2.2 m/s. The current network needs strengthening and capacities re-building of both pump stations and the pipelines. Increasing the equivalent diameters of the pipelines by attaching new lines or totally replacing them is required as the water velocity according to the analysis will exceed its permissible limits.

4576	12123417	فاعلية برنامج إرشادي معرفي سلوكي لخفض إدمان الإنترنت لدى طلاب المرحلة الثانوية =	راشد، هشام عواد.			2014	تعد شبكة الإنترنت أحد أقوى الوسائل الحديثة التي غزت العالم ولكن لا يمكن أن ننكر ما لهذا التقدم من إيجابيات وسلبيات. وإدمان الإنترنت أحد الآثار السلبية للإستخدام السيئ للإنترنت، ويعد المراهقون في مرحلة التعليم الثانوي أكثر عرضة لإدمان الإنترنت، لذا عملت الدراسة الحالية على إعداد برنامج إرشادي معرفي سلوكي يساعد طلاب مرحلة التعليم الثانوي لخفض إدمان الإنترنت والتي تزايدت بشكل ملحوظ في الآونة الأخيرة. استهدفت الدراسة معرفة فاعلية برنامج إرشادي معرفي سلوكي لخفض إدمان الإنترنت لدى طلاب المرحلة الثانوية، وتكونت عينة الدراسة من (40) طالباً يعانون من إدمان الإنترنت تتراوح أعمارهم ما بين (15-17) عام، وتم استخدام المنهج الوصفي والتجريبي وتمثلت أدوات الدراسة في مقياس إدمان الإنترنت ((إعداد: بشري إسماعيل)، برنامج إرشادي معرفي سلوكي لخفض إدمان الإنترنت لدى طلاب المرحلة الثانوية ((إعداد: الباحث)، وأشارت نتائج الدراسة إلى فاعلية البرنامج الإرشادي المعرفي السلوكي في خفض إدمان الإنترنت لدى طلاب المرحلة الثانوية، كما أشارت النتائج إلى استمرار تأثير البرنامج حتى فترة المتابعة التي استمرت لمدة شهرين بعد الإنهاء من تطبيق البرنامج. تتعد مشكلة الدراسة في محاولة الإجابة على السؤال الرئيسي التالي : ما فاعلية برنامج إرشادي معرفي سلوكي في خفض إدمان الإنترنت لدى طلاب المرحلة الثانوية؟ ويترجع من هذا السؤال عدة أسئلة فرعية وهي : 1- هل توجد فروق في إدمان الإنترنت وفقاً للجنس (ذكور، إناث) على مقياس إدمان الإنترنت؟ 2- هل توجد فروق في إدمان الإنترنت وفقاً لنوع التعليم الثانوي (عام، فني) على مقياس إدمان الإنترنت؟ 3- هل توجد فروق بين متوسطي رتب درجات أفراد المجموعة الضابطة والمجموعة التجريبية على مقياس إدمان الإنترنت؟ في القياس البعدي؟ 4- هل توجد فروق بين متوسطي رتب درجات أفراد المجموعة التجريبية في القياسين القبلي والبعدي على مقياس إدمان الإنترنت؟ 5- هل توجد فروق بين متوسطي رتب درجات أفراد المجموعة التجريبية في القياسين البعدي والتتبعي بعد شهرين من تطبيق البرنامج على مقياس إدمان الإنترنت؟ تهدف الرسالة الحالية إلى التحقق من فاعلية برنامج إرشادي معرفي سلوكي في خفض إدمان الإنترنت لدى طلاب المرحلة الثانوية مع التحقق من مدى استمرار وثبات أثر البرنامج بعد فترة المتابعة. يتسم النظام التعليمي في الوقت الراهن بالإزاحة المستمرة في أعداد المتعلمين مما أدى إلى إتساع الفروق الفردية بينهم. وأصبحت الفصول الدراسية خاصة في مرحلة التعليم الأساسي تضم تلاميذ يتفاوتون في قدراتهم على التعلم ففهم الفائزون، والعاثون، وذوو صعوبات التعلم، لذا كان من الضروري توفير بيئة تعليمية مناسبة لهؤلاء التلاميذ بغضائهم المختلفة باعتبار أن مرحلة التعليم الأساسي هي الركيزة واللبنة الأساسية لمراحل التعليم اللاحق. وتعد صعوبات التعلم أحد المشكلات التعليمية التي يعاني منها العديد من التلاميذ حيث يظهر التلاميذ ذوو صعوبات التعلم انخفاضاً ملحوظاً في التحصيل عن زملائهم العاديين في جانب أو أكثر مما يؤثر سلباً على الأداء العام لهم، على الرغم من أن ذلك لا يتناسب مع قدراتهم العقلية في الدراسة. ويرجع الإهتمام بالتلاميذ ذوي صعوبات التعلم في مرحلة التعليم الأساسي إلى ما كان يلاحظه المربون من وجود أعداد من التلاميذ الذين يتخفون بالتعليم العام، لكنهم لا يلبسون أن يتخفوا عن أقرانهم في تعلم المفاهيم والمهارات المتضمنة بالمناهج والمقررات الدراسية، دون أن تظهر عليهم مؤشرات تدل على إختلال حسي أو جسماني أو عقلي، فهم في الغالب يتمتعون بذكاء عادي أو يزيد على العادي أحياناً. والتلاميذ ذوي صعوبات التعلم لا يعانون من مشكلات نفسية أو إعاقات جسدية أو عقلية أو حسية (سمعية، بصرية)، أو مشكلات صحية، وكذلك لا يعانون من حرمان ثقافي أو أسري، وإنما يعانون من اضطرابات في العمليات العقلية التي تشمل : الانتباه والتذكر والإدراك وتكوين المفهوم، مما يترتب عليه قصور في تعلم المفاهيم والمهارات الأساسية سواء في المدرسة الابتدائية أو في مراحل التعليم الأخرى.		
4577	12127309	فاعلية مقرر الكتروني مقترح في الدراسات الاجتماعية لتنمية بعض المفاهيم والمهارات الوظيفية لدى التلاميذ ذوي صعوبات التعلم بالمرحلة الإعدادية /	مصطفى، أحمد عبد الحميد أحمد.			2014	تعد القراءة الناقدة من أهم وأبرز أنواع القراءة، وذلك لما تمثلته من أهمية في حياة التلاميذ؛ إلا أن العديد من الدراسات الحديثة أكدت ضعف التلاميذ في اكتساب مهارات القراءة الناقدة، وأشارت نتائجها إلى ضرورة الإهتمام بتنمية هذه المهارات لديهم خلال المراحل التعليمية المختلفة. كما لاحظ الباحث من خلال عمله في مجال تدريس اللغة العربية انخفاض درجات تلاميذ الصف الخامس الابتدائي في اختبارات التحصيل الشهرية لمادة اللغة العربية، وكذلك ضعف التلاميذ في تقويم المقروء والحكم عليه، وأخذهم للمعلومات والأفكار الواردة بالموضوعات الدراسية المقررة على أنها مسلمة لا تقبل النقد أو محاولة إبداء الرأي فيها، مما يؤكد الحاجة إلى تنمية مهارات القراءة الناقدة لدى التلاميذ حتى لا يتقبلون كل ما يقرعونه على أنه قضية مسلمة بل يعملون فيه غولهم فيقبلون ما يرونه صحيحاً ويرفضون ما دون ذلك.		

						ومع ظهور التعلم الإلكتروني وانتشاره في البلاد وحدث حالة من الانهيار به لدرجة أن البعض طالب بإلغاء الفصول التقليدية. وإحلال محلها الفصول الإلكترونية في المدارس والجامعات بدأت البحوث العلمية والتجارب العملية تكشف لنا جوانب القصور في التعلم الإلكتروني، والتي منها غياب الجانب الإنساني في التعلم الإلكتروني، والإصابة بالإطوائية والملل، وحدث بعض حالات الغش والتدليس. من هنا ظهر مفهوم التعلم الخليط كأحد حلول تكنولوجيا المعلومات الواقعية بدمجه للتعلم الإلكتروني مع التعلم التقليدي (وجها لوجه) في نموذج واحد. للاستفادة بمزايا كل منهما لتحقيق الأهداف التربوية المنشودة. ولما كانت مشكلة البحث الحالي تتمثل في تدني مستويات التحصيل المعرفي ومهارات القراءة الناقدة لدى تلاميذ الصف الخامس الابتدائي، ونقصور إستخدام الوسائط الإلكترونية في تعليم القراءة وتعلمها. لذا كانت الحاجة ماسة لإجراء دراسة في هذا المجال لدراسة فاعلية إستخدام مدخل التعلم الخليط في تدريس القراءة على التحصيل وتنمية مهارات القراءة الناقدة لدى تلاميذ الصف الخامس الابتدائي.		
4578	12129940	فاعلية إستخدام مدخل التعلم الخليط في تدريس القراءة على التحصيل وتنمية مهارات القراءة الناقدة لدى تلاميذ الصف الخامس الابتدائي /	المرفاقي، سعيد السيد أحمد عبدالعال.		2013	The matrix method for solving schrodingers equation into a representation of the kinetic energy operator on a discrete lattice is introduced the method is illustrated by studing stability of some heavy charm spectra agood agreement is found between our calculations and the published experimental and theoretical data.		
4579	12132084	Studying of some charmonium properties by using matrix method/	Mustafa, Asmaa sayed Ahmed.		2014	Evauation of newly formalized pollen supplemental diets through determining the consumption rate of each diet testing the impact of these diets on honey bee colonies measuring the increase in sealed working area and hypopharyngeal gland development. Honey bees are hymenopterans defined as a subset of bees in the genus Apis, primarily distinguished by the production and storage of honey and the construction of perennial, colonial wax nests. Honeybees are the only extant members of the tribe Apini, all in the genus Apis. Only members of the genus Apis are true Honeybees, although some other types of related bees produce and store honey for minor honey productionHoney bees study has gained a special interest due to their importance for the human being as well as maintaining the agricultural biodiversity. Losing them could affect not only dietary staples such as apples, broccoli, strawberries, nuts, asparagus, blueberries and cucumbers, but may threaten our beef and dairy industries if alfalfa is not available for feed.Arguably, the real value of honey bees is more appropriately a deeply layered assessment of quality in life. Most calories consumed by humans are from crops that do not depend on insect pollination (corn, wheat, etc.), but as countries develop, higher quality foods are desired which are often insect pollinated (Wilson, 2011).Rearing honey bee queens is one of the most interesting and rewarding aspects of beekeeping. It is a topic that has received a great deal of attention and consideration through the years. It provides a means to maintain young, vigorous queens in colonies and is the foundation of good colony management to ensure giving maximum egg laying as well as minimum swarming tendency. This also enables a degree of selection for desirable and good colony characteristics (Laidlaw, 1979).As royal jelly is always fed directly to the queen or the larvae as it is secreted; it is not stored. This is why it has not been a traditional beekeeping product. where the only situation in which harvesting becomes feasible is during queen rearing, when the larvae destined to become queen bees are supplied with an overabundance of royal jelly. Thus queen rearing is crucial for royal jelly production for business purposes (Krell, 1996). Here in the Southern of Egypt, specifically Qena through Aswan, the only way for obtaining the queens is by importing them from those Egyptian cities situated in northern part. Consequently, it is significantly important to not only abridge the difficulty of travelling efforts, time, and risk, but finding an officially accredited alternative source as well; to provide dependable advices and recommendations for the uprising young beekeepers. So that, we are going to provide them with their need through theproposed work that focuses on searching a new method for queen rearing mainly. Aim of Work: • Evaluation of newly formalized pollen supplemental diets, through determining the consumption rate of each diet. • Testing the impact of these diets on honey bee colonies; measuring the increase in sealed workers brood area and hypopharyngeal gland development• Assessment of the acceptance percentage of the grafted larvae into the colony in the Apiary of Faculty of Agriculture, South Valley University. • Evolution of new method for a successful mass rearing of the honey bee queens.		

4580	12132099	Evolution of Mass rearing for the honey bees Queens of <i>Apis mellifera</i> Via A new Method/	Elsayeh, Walaa Ahmed Hussien Abdelaziz.			2014	• Evaluation of the queens produced by the new method along with their offspring; through comparing them with queens reared by other well known methods		
							To determine parts of DNA of eight coral reef fishes of family serranidae , genera epinephelus and cephalopholis by using twenty primers (10 nucleotides) To study the phylogenetic differences among the fishes in eash genus of the two genera epinephelus and cephalopholis. Genetics is the scientific study of the principles of heredity and the variation of inherited traits among related organisms which were discovered at the beginning of 20th century. The molecular genetics is the field of science that combines molecular biology and genetics, also molecular genetics defined as the branch of genetics that studies the structure and function of DNA at its most basic level (Weiling, 1991; Fulton, 2008 and Beauchamp et al., 2011).Advances in molecular biology techniques have provided the basis for uncovering virtually unlimited numbers of DNA markers. Over the last decade, polymerase chain reaction (PCR) has become a widespread technique for several novel genetic assays based on selective amplification of DNA. This popularity of PCR is primarily due to its apparent simplicity and high probability of success (Kumar and Gurusubramanian, 2011).The development of DNA amplification using the Polymerase Chain Reaction (PCR) technique has opened up the possibility of examining genetic changes in fish populations over the past years (Ferguson et al., 1995 and Williamson, 2001). Randomly Amplified Polymorphic DNA (RAPD) is a random amplification of anonymous loci by PCR, it has several advantages and has been quite widely employed in fisheries studies, the method is simple, rapid and cheap, it has high polymorphism, only a small amount of DNA is required no need for molecular hybridization and most importantly, no prior knowledge of the genetic make-up of the organism in question is required (Okumus and Çiftci, 2003).The Red Sea is considered as a secondary center of biodiversity as it contains high diversity of fishes and corals. More than 1,000 fish species (Goren and Dor, 1994; Golani and Bogorodsky, 2010). The genetic studies on the marine fishes in general and Red Sea fishes in particular are almost lacking. This study used Random Amplified Polymorphic DNA (RAPD) to identify discrete genetic markers of eight species in two genera (Epinephelus and Cephalopholis) of family Serranidae common coral reef fish in the Red Sea. This technique uses the polymerase chain reaction (PCR) to amplify random regions of species genomes (Random Amplified Polymorphic DNA) and has been termed RAPD-PCR.We demonstrated the use of the technique in revealing genetic variation in four species of genus Epinephelus (Epinephelus chlorostigma, Epinephelus summana, Epinephelus tauvina and Epinephelus fasciatus) and four species of genus Cephalopholis (Cephalopholis oligosticta,Cephalopholis sexmaculata, Cephalopholis hemistiktos and Cephalopholis argus). The aims of this study 1. To determine parts of DNA of eight coral reef fishes of family Serranidae, genera Epinephelus and Cephalopholis by using twenty primers (10 nucleotides). 2. To study the phylogenetic differences among the fishes in each genus of the two genera Epinephelus and Cephalopholis. 3. To demonstrate the phylogenetic relationship among the fishes inside each genus

4582	12132125	carbenem resistant enterobacter isolated from Assiut university hospital/	Mahmoud, Ekram Abd el rahman.			2013	The international association for the study of pain (ISAP) defines pain as unpleasant sensory and emotional experience associated with actual or potential tissue damage.The International Association for the Study of Pain (ISAP) defines pain as "an unpleasant sensory and emotional experience associated with actual or potential tissue damage" (Jonathan and Theodore, 2011). It is the most common reason for physician consultation in the united state and can significantly interfere with a person's quality of life and general functioning (Breivik et al., 2008). Pain is divided into two major groups: physiological pain and pathological pain (Zhuo, 2007). Physiological pain is important for animals to avoid potential injury, while pathological pain is unpleasant, lasts for an extended period of time after injury (Zhuo et al., 2011). chronic pain can be classified into inflammatory pain and neuropathic pain by the underlying mechanism (Li et al., 2011). Neuropathic pain is a progressive disease resulted from injury or disease of the nervous system, including the peripheral nerve, dorsal root ganglion (DRG), spinal cord or brain (Li et al., 2011; Zhuo et al., 2011). It is often caused by nerve injury or diseases such as diabetes, acquired immunodeficiency syndrome or cancer (Koichi and Masamichi, 2011). It is often associated with a continuous burning character together with the presence of abnormal sensory symptoms, such as hyperalgesia (an increased response to a stimulus which is normally painful; patients with hyperalgesia perceive pain spontaneously) and allodynia (pain as a result of a stimulus which does not provoke pain) (Siniscalco et al., 2011).		

4583	12132137	physiology of Neuropathic pain/	Rafaie, Rasha Abdeen.	2013	The neurophysiological and neurochemical changes are poorly understood. Previous studies showed that nerve injury can result in changes in gene expression, protein synthesis and intracellular signaling in nociceptive pathways, all of which contribute to neuronal membrane remodeling and hyperexcitability associated with neuropathic pain (Jonathan and Theodore, 2011). Aim of the Work: The aim of this review is to understand the pathophysiology of the neuropathic pain.

4586	12132530	Ecological and physiological studies on the mycobiota of some grains in upper Egypt/	Abdel- Mageed, Mahmoud Ali Mohamed.	2014	Nine crops are of major importance namely wheat rice maize barley sorghum sugar beet common phaseolus bean soybean and groundnut which contribute to the greater part of food worldwide these crops are attacked by devastating seed borne fungi and cause losses of cereal grains . Corn is considered as the third most important crop in the world after wheat and rice, because it is a dietary staple food in many countries in the world being consumed in different forms (Thiel et al. 1996; Nago et al. 1997; Youssef 2009; Rafiq et al. 2010 and Yaouba et al. 2012). Corn quality is often reduced because of drying injury, although the causes and impairment mechanisms are poorly understood (Cordova-Tellez and Burris 2002). Igawa et al. (2007) reported that maize kernels are processed primarily for livestock feed (78%) and to some extent for human consumption (13%).Nago et al. (1997) reported that there is very little information concerning attempts to reduce mycotoxin contamination in maize using traditional processing methods in Africa, although many maize-based food products exist. In Benin, about 40 different maize processing methods have been recorded. Corn is susceptible to contamination by aflatoxins; the fungal metabolites that contaminate agricultural products and threaten food safety. Aflatoxins are produced by three species of Aspergillus, namely A. flavus, A. parasiticus and A. nomius (Hendrickse 1997; Peraica et al. 1999 and Fung and Clark 2004). Bamigboye (2013) studied Fungi involved in the biodegradation of maize-cob. He found Eleven fungi species were isolated which include Rhizopus oryzae, Aspergillus flavus, A. niger, Mucor racemosus, P. atrovenetum, P. expansum, P. chrysogenum, P. restictum and Botryotrichum piluliferum Rice (Oryza sativa L.) Rice is a staple crop or economic importance in many countries and its production was 600 million tons in the year 2000 (Correa-Victoria et al. 2004). Rice and other agricultural commodities are susceptible to fungal damage before and after harvest. It is one of the most important cereals in the world, serving as food for about 50 % of the world's population (Ladha et al. 1997).Reddy et al. (2004) reported that rice is the most important staple food crop in India and the bulk of rice is grown in kharif or wet season. Frequent and heavy rainfall and floods particularly near harvest in coastal areas in eastern, southern and western regions of the country wet the crop and make panicles more prone to invasion by Aspergillus spp. Miraglia and Brera (2000), Hussaini et al. (2007) and Reddy et al. (2009) reported that mycotoxins potentially present in moldy rice include aflatoxins, ochratoxin A and Fusarium toxins. Khosravi et al. (2013) found that Aspergillus and Fusarium genera were the most frequent fungal contaminants in fresh and stored rice grains and followed by Mucor and Rhizopus Leeson and Summers (1997) reported that grain sorghum (Sorghum bicolor L. Moench) is an important commodity crop for the semi-arid regions of the world. In the United States, sorghum is one of the most important crops in the Midwest regions, and sorghum production ranks third among cereal crops. Sorghum is a starch-rich grain with similar starch content to maize. However, sorghum has been underutilized for biobased products and bioenergy. The major barriers to promoting sorghum utilization are the poor wet-milling properties and potentially lower digestibility of sorghum starch, which is about 90–95% that of corn. Waliyar et al. (2008) reported that mycotoxin contamination and grain mold of sorghum are considered as the most important constraints of grain quality and production, globally. Sorghum grains suffer from infection and colonization by several fungi during panicle and grain developmental stages.Mutegi et al. (2010) mentioned that, Sorghum bicolor is an important world crop, used for food (as grain and in sorghum syrup or "sorghum molasses"), fodder, the production of alcoholic beverages and biofuels. Fenster (2003) reported that in the United States the white sorghum products are used to a small extent to substitute for wheat in products for people allergic to wheat gluten. The white food sorghums are processed into flour and other products, including expanded snacks, cookies and ethnic foods, and are gaining popularity in areas like Japan (United States Grains Council 2001). Shiden et al. (2013) reported that a total of seven fungal genera Alternaria, Aspergillus, Fusarium, Helminthosporium, Mucor, Penicillium and Rhizopus sp. were detected in sorghum seed samples.

							The term pyran structure applies to a six - membered ring possessing one oxygen hetero -atom singly bonded in a cyclic system of two double bonds and one tetrahedral atomic center according to the position of the saturated carbon atom the heterocycles can be classified as 2H and 4H isomers or more systematically as 2- and 4- oxines of the parent oxygen compounds 2H pyran 1 and 4H pyran 2 . Here, we report an efficient one-pot multicomponent method for the synthesis of polyfunctionalized 4H-pyrans in ethanolic medium at PH=8.42-8.52 using of the safe and cheap basalt and gabbro as new naturally heterogeneous basic catalysts, and using of classical heating and microwave irradiation, and comparing that with synthesis by piperidine as a known base catalyst (Tables 2, 3, 4; Scheme 1). Thus, heating of mixtures of aromatic, aliphatic, and heterocyclic aldehydes with malononitrile and ethylacetoacetate or ethylbenzoylacetate in refluxing ethanol or by microwave irradiation and in the presence of catalytic amount of grinded basalt or grinded gabbro afforded the corresponding 2-amino-3-cyano-4H-pyran-5-carboxylates 1a-p. Structures of the isolated products were established based on the suitable elemental and spectroscopic analysis data. 4H-pyrans 1a and 1e were reacted with malononitrile in refluxing ethanolic piperidine solution to yield 1:1 adducts. The 4,6-diazanaphthalenes 5 were formed rather than 1,3,8-triazanaphthalenes 6 (Scheme 2). On the other hand, 4H-pyrans 1a, 1c, 1e and 1i were treated with hydrazine hydrate in refluxing ethanolic piperidine and by using microwave irradiation also to afford the corresponding pyrano[2,3-c]pyrazoles 8a-d in good yields (Table 5, Scheme 3). the same time, pyrans 1a and 1e were refluxed in acetic acid in the presence of ammonium acetate to give the corresponding 2-aminopyridines 9a,b (Scheme 4). O C CN 2H5OOC H3C NH2 Ar CH3COONH4 N C CN 2H5OOC H3C NH2 Ar 1a, 9a Ar = 3-benzyloxyphenyl ; 1e, 9b Ar = 2,3-dimethoxyphenyl Acetic acid Scheme 4 Also, 2-amino-4H-pyrans 1l and 1h were heated with acetic anhydride to give the corresponding ethyl-2,5,7-trimethyl-4-oxo-3,5-dihydro-4H-pyrano[2,3-d]pyrimidine-6-carboxylate derivatives 12a,b (Scheme 5). Pyrans 1a, 1e, and 1l were reacted with semicarbazide hydrochloride and thiosemicarbazide in ethanolic piperidine solution to give the corresponding ethyl-3-cyano-6-methyl-2-(1-semicarbazido-5-pyridine carboxylate derivatives 16a-c and the corresponding ethyl-3-cyano-6-methyl-2-(1-thiosemicarbazido)-5-pyridine carboxylate derivatives 17a,b respectively (Scheme 7). On the other hand, pyrans 1 were refluxed in acetic acid in the presence of concentrated sulfuric acid to give the corresponding 1,4-dihydropyridine derivatives 19a-d (Scheme 8). In the same time, 2-amino-4H-pyran 1e was reacted with 2-(4-chloro-benzylidene)-malononitrile in refluxing ethanolic piperidine solution to yield 5-amino-6,7-dihydro-4H-pyrano[2,3-b]pyridine derivative 20 (Scheme 9). Pyrans 1 were reacted with 2-cyanoacetamide and cyanoacetic acid hydrazide in ethanolic piperidine solution to give the corresponding 1,8-diazanaphthalene derivatives 21a,b and naphthyridine derivatives 22a,b respectively (Scheme 10). In the same time, pyrans 1 was reacted with cyclohexanone and cyclopentanone in ethanolic piperidine solution to give the corresponding 10-amino-4-aryl-2-phenyl-5,6,7,8-tetrahydro-4H-1-oxa-9-aza-anthracene-3-carboxylic acid ethyl ester derivatives 23a,b and 9-amino-8-(2,3-dimethoxy-phenyl)-6-phenyl-1,2,3,8-tetrahydro-5-oxa-4-aza-cyclopenta[b]naphthalene-7-carboxylic acid ethyl ester 24 respectively (Scheme 11). Also, pyran 1h was condensed with aromatic aldehyde such as pchlorobenzaldehyde in ethanolic piperidine solution to give the	1	9

4587	12132549	Synthesis of some 4H-pyrans and their transformations into other heterocyclic systems/	Ahmed, Rasha "Ahmed Nabil" Maghraby.		2014	corresponding 2-[(4-chloro-benzylidene)-amino]-3-cyano-6-phenyl-4-(3,4,5-trimethoxy-phenyl)-4H-pyran-5-carboxylic acid ethyl ester 25 (Scheme 12).The term pyran structure applies to a six-membered ring possessing one oxygen hetero-atom singly bonded in a cyclic system of two double bonds and one tetrahedral atomic center. According to the position of the saturated carbon atom, the heterocycles can be classified as 2H and 4H isomers or more systematically as 2- and 4-oxines of the parent oxygen compounds, 2H-pyran 1 and 4H-pyran 2 1-7. 4H-pyran 2 and its alkyl, alkoxy, and halogen derivatives 8-13 also are labile substances 1, 2.4H-pyran 2 seems to be thermodynamically somewhat more stable than 1. Stability increase may be achieved by the introduction of substituents into suitable positions of the heterocyclic ring. Although no systematic studies have been carried out, compounds like 3 14, 4 15 and 5 16 are typical examples of stabilized pyransCase (4) also demonstrates the preferential stability of 2-aminopyrans with respect to their imino tautomers, contrary to the behaviour of analogous hydroxypyran, which exist exclusively as tautomeric oxoforms 15-20. This thesis deals with the chemistry of the stabilized 4H-pyran.		
4588	12134853	Chemical and technological studies on sweet sorghum /	Abazied, Sakina Ramadan.		2013	Sweet sorghum is belonging to the Genus Sorghum bicolor (L.) Moench which is the best multipurpose crop; sorghum grain is used for human food and as feed for animals; the plant stem and foliage are used for green chop, hay, silage, and pasture; in some areas the stem is used as building material; juice of sweet sorghum stalk is used for making syrup, gaggery and ethanol; bagasse and green foliage is considered an excellent fodder for animals as a biomass for gasification system as organic fertilizer or for paper manufacturingSorghum is the fifth most important cereal crop in the world after wheat, rice, corn and barley. Moreover, sweet sorghum has a great tolerance to a wide range of climatic and soil conditions. It is a short duration crop of 110-130 days as compared to 12- 24 months in sugarcane. In addition its water and fertilizer requirement is much less, resulting in lower cost of cultivation than sugarcane. There are approximately four thousand varieties of sweet sorghum through out the world. Ripe sweet sorghum typically consists of approximately 75% cane, 10% leaves, 5% seeds and 10% roots by weight. It could produce 21 tones of crushable stalks, 1.25 tones of grains and 7.15 tones of leaves and stem tops per Feddan. Sorghum syrup is obtained by concentration of the juice extracted from sorghum stalks. Like sugar cane syrup, sweet sorghum syrup can be used as a popular food and liquid sweetener in various food products which would save sugar cane for sugar production. Accordingto SCC (1), the area cultivated with sugar cane for syrup production was about 12479 feddans. In Egypt, the production of sucrose was about 2.1 million tons meantime, the consumption was about 2.8 million tons. Sweet sorghum can be an additional or an alternative to sugar cane for syrup production in order to close the vast gap between the sugar production and consumption. High contents of carbon dioxide in the atmosphere that are contributing towards global warming is said to be caused by the use of fossil fuels around the world. On the other hand, the ever rising cost of fossil fuel internationally has forced major world economics to examine renewable and cheaper alternatives to fossil fuel to meet their energy demands. Bioethanol has emerged as the most suitable renewable alternatives to fossil fuel as their quality constituents match diesel and petrol, respectively. In addition, they are less polluting than their fossil fuel counterparts. Environmental concerns and the desire to beless dependent on fossil fuel have intensified worldwide efforts for production of ethanol from starch and sugar producing crops. Added in small amounts, 10 % of ethanol to gasoline that fuels our cars, it reduces greenhouse emissions like carbon monoxide and nitrogen oxides. Bioethanol used as a replacement for gasoline can reduce vehicle carbon dioxide emissions by 90 %. Among the biomass energy crops sweet sorghum is the first important competitor. In fact sweet sorghum has been cultivated as energy plant in many countries. Sweet sorghum stalk are rich in sugars which can beprimarily used for biofuel production. It can produce up to 7000 L of ethanol /ha. The Department of energy of the U.S.A. estimated that after 1990 sweet sorghum can top all crops such as cereals and sugar cane as the best resource for alcohol production. Program of Brazil has also selected sweet sorghum together with sugar cane and cassava as the three main biomass resources. Sweet sorghum has major advantages compared to other sugar and biomass crops. Firstly, sorghum is a species showing extensive genetic variation, including drought and heat tolerant genotypes, which enable the usage of marginal land that is not suitable for cultivating other crops. Secondly, competition between the use of land for food or for energy is less because the grains can be used for food or feed while stems can be used for biofuel production. The stem juice of sweet sorghum is rich in fermentative sugar and is a desirable alcoholic fermentation material. In addition to fermentative sugar, other kindsof sugars are also found in the stem juice of sweet sorghum. There are also some organic acids and minerals in the juice, measuring their contents enables us to use sweet sorghum better with multi-purpose.		

4589	12134932	master.	Anew Method to Study Bottomonium /	Nahool, Tarek Abeel-Wahab Mohamedain Khalaf.				The Well-Know Numerov's method for Solving Schrodinger's equation is reintrouced by transforming it into a matrix form.Accurate eigenvalues and eigenvectors are calculated for varity of bottomonium spectra. The method gives high accuracy results are in a good agreement with other methods and with experimental results.	2014	2014	Hasan Galal Saad,Yasser M.A. Mustafa.	
								تكونت الرسالة من مقدمة، وتمهيد، وخمسة فصول، وخاتمة. واحتوت المقدمة على الحديث عن أهمية علم التوحيد، وبيان أهمية موضوع الدراسة (دلائل التوحيد في سورة يونس) وأهدافه، وأسباب إختياره، والدراسات السابقة، وخطة البحث، والمنهج المتبع في البحث. وجاء في التمهيد بيان مجمل عن سورة يونس، سبب تسميتها ومكان نزولها وكذلك عدد آيات السورة وكلماتها وحروفها، وبيان لخصائص السور المكية عامة وسورة يونس خاصة. وتناول الفصل الأول دلالة السورة على الإيمان بالله تعالى، وذلك من خلال ثلاثة مباحث، حيث خصص المبحث الأول لبيان دلائل سورة يونس على توحيد الربوبية، جاء فيه تعريفه، وأدلة من السورة على توحيد الربوبية، وكذلك أدلة معاصرة من السورة على توحيد الربوبية، والمبحث الثاني خصص لبيان دلائل السورة على توحيد الألوهية، جاء فيه تعريفه، وكذلك أدلة من السورة على توحيد الألوهية، أما المبحث الثالث فخصص لبيان دلالة السورة على توحيد الأسماء والصفات، جاء فيه تعريفه وبيان لموقف الفرق الإسلامية منه ومنهج أهل السنة والجماعة في هذا الباب، ثم بيان دلائل أسماء وصفات الله من سورة يونس عليه السلام، وتناول الفصل الثاني دلالة السورة على الإيمان بالملائكة، وجاء فيه الأدلة على وجود الملائكة وصفاتهم وأعمالهم، وأدلة من سورة يونس على الإيمان بالملائكة، وتناول الفصل الثالث دلالة السورة على الإيمان بالكتب المنزل، وجاء فيه التعريف بالكتب المنزل وما يجب علينا تجاهها، كما جاء فيه أدلة من سورة يونس على الإيمان بالكتب، كما تناول الفصل الرابع دلالة السورة على الإيمان بالرسل، جاء فيه دلائل السورة على الوحي، وتطرق إلى الحديث عن الوحي (تعريفه وأنواعه)، وعرض لشبهات منكويه، وجاء فيه أيضا دلائل السورة على الإيمان بالرسول، وتطرق إلى الحديث عن من ذكر من الرسل قبل النبي محمد صلى الله عليه وسلم في سورة يونس موضوع الدراسة، وإثبات نبوة النبي محمد صلى الله عليه وسلم، وأما الفصل الخامس فجاء فيه دلالة السورة على الإيمان باليوم الآخر، حيث اشتمل على تعريف البعث وأدلة من السورة على إمكانية حدوثه، وأدلة من السورة على الإيمان باليوم الآخر وما فيه من ثواب وعقاب. وأما الخاتمة فجاء فيها أهم النتائج التي توصلت إليها الدراسة.	2013			
4590	12135999		دلائل التوحيد في سورة يونس /	عبدالكريم، مها محيي الدين.				هدفت الدراسة إلى التعرف على مدى فعالية استخدام التعلم الإلكتروني في إكساب أطفال الروضة بعض مفاهيم التربية من أجل السلام، وذلك مقارنة بالطريقة العادية. وقد ظهرت الحاجة إلى هذه الدراسة نظراً لندرة الدراسات التي تناولت استخدام التعلم الإلكتروني في إكساب أطفال الروضة بعض مفاهيم التربية من أجل السلام، ونظرا لضرورة تطوير مناهج رياض الأطفال بما يتناسب مع الاتجاهات الحديثة التي ظهرت في عصرنا الحالي، كما أنه يوجد قصور لدى أطفال الروضة في مفاهيم التربية من أجل السلام. ولتحقيق أهداف الدراسة تم الإجابة عن السؤال التالي: ما فعالية استخدام التعلم الإلكتروني في إكساب أطفال الروضة بعض مفاهيم التربية من أجل السلام ؟ وتم ذلك من خلال اختبار صحة الفرض التالي: يوجد فرق ذو دلالة إحصائية بين متوسطي درجات أطفال المجموعة التجريبية وأطفال المجموعة الضابطة في القياس البعدي لاختبار مفاهيم التربية من أجل السلام المصور لطفل الروضة لصالح درجات أطفال المجموعة التجريبية. وفق اتباع الخطوات التالية: أولاً: تحديد قائمة مبدئية بمفاهيم التربية من أجل السلام المناسبة لطفل الروضة. استطلاع رأي السادة المحكمين حول صلاحية قائمة مفاهيم التربية من أجل السلام المناسبة لطفل الروضة _ .التوصل إلى القائمة النهائية لمفاهيم التربية من أجل السلام المناسبة لطفل الروضة _ .تحديد مفاهيم التربية من أجل السلام المرجو إكسابها لطفل الروضة من خلال استخدام التعلم الإلكتروني _ ثانياً: تصميم موقع تعليمي إلكتروني على شبكة الإنترنت لإكساب أطفال الروضة بعض مفاهيم التربية من أجل السلام، وعرضه على المتخصصين لتقييمه. ثالثاً: التجربة الاستطلاعية للموقع التعليمي الإلكتروني ومعالجة ما به من أخطاء أو مشكلات. رابعاً: إعداد اختبار لقياس مدى توافر بعض مفاهيم التربية من أجل السلام لدى أطفال الروضة وتقييمه. خامساً: اختيار عينة الدراسة من أطفال المستوى الثاني من الروضة(2KG) وتقسيمها إلى مجموعتين إحداهما تجريبية والأخرى ضابطة. سادساً: تطبيق الاختبار قبلها على مجموعتي الدراسة (التجريبية – الضابطة). سابعاً: تنفيذ تجربة الدراسة. ثامناً: تطبيق الاختبار بعدياً على مجموعتي الدراسة (التجريبية – والضابطة). تاسعاً: رصد درجات أطفال المجموعة التجريبية والضابطة التي حصلوا عليها من اختبار مفاهيم التربية من أجل السلام المصور لطفل الروضة، وحللت النتائج إحصائياً، وتم التحقق من صحة الفرض بحساب قيمة "ت"، وتم حساب حجم تأثير استخدام التعلم الإلكتروني في إكساب أطفال الروضة بعض مفاهيم التربية من أجل السلام، فكانت النتائج كما يلي: أن الفرق بين متوسطي الدرجات التي حصل عليها أطفال المجموعة التجريبية في القياس القبلي والبعدي لاختبار مفاهيم - التربية من أجل السلام المصور لطفل الروضة، له دلالة إحصائية لصالح درجات القياس البعدي .الفرق بين متوسطي درجات القياس القبلي والقياس البعدي التي حصل عليها أطفال المجموعة الضابطة في اختبار - مفاهيم التربية من أجل السلام المصور لطفل الروضة ليس له دلالة إحصائية .أن الفرق بين متوسطي درجات المجموعتين التجريبية والضابطة الذين حصلوا عليها في القياس البعدي لاختبار مفاهيم - التربية من أجل السلام المصور لطفل الروضة له دلالة إحصائية، وهذا الفرق لصالح درجات القياس البعدي التي حصل عليها أطفال المجموعة التجريبية، ومن ذلك نستنتج صحة فرض الدراسة .أن حجم تأثير استخدام الموقع الإلكتروني على درجات أطفال المجموعة التجريبية في القياس البعدي لاختبار مفاهيم التربية - من أجل السلام لطفل الروضة أعلى من 0.8 وبالتالي يكون حجم التأثير مرتفع؛ حيث بلغ 5.543 مما يشير إلى فعالية استخدام التعلم الإلكتروني في إكساب أطفال الروضة بعض مفاهيم التربية من أجل السلام	2012			
4591	12136007		فاعلية إستخدام التعلم الإلكتروني في إكساب أطفال الروضة بعض مفاهيم التربية من أجل السلام =	عبدالجليل، نعمة حسن عبدالدائم.				أهمية الدراسة :- ترجع أهمية هذه الدراسة إلى:- إلقاء الضوء على جامعة جنوب الوادي بإعتبارها جامعة مستقلة في معرفة دورها في التنمية السياسية للطلاب -1 تسهم هذه الدراسة في التعرف على جانب من جوانب تنمية شباب الجامعة والتي أصبحت في وقتنا الحاضر مفهوما -2 رئيسيا عند أي مناقشة لقضايا الشباب أو إتجاهاتهم ومشكلاتهم ألا وهو التنمية السياسية وأيضا تفيد البيانات والنتائج التي تسفر عنها الدراسة في توجيهه أنظار القائمين على إدارات الكليات بأهمية التنمية -3 السياسية للطلاب، والعمل على زيادة برامج التوعية والتنمية السياسية والإهتمام بتنوع الأنشطة الطلابية أن هذه الدراسة تعد من الدراسات التي تكشف عن الإهتمام بالتنمية الساسية في التعليم الجامعي بإعتبارها مكملة -4 للدراسات السابقة التي أجريت في هذا المجال	2012			
								منهج وأدوات الدراسة :- اعتمدت الدراسة الحالية على المنهج الوصفي التحليلي الذي اعتمد على الإستبانة كأداة له حيث تم تطبيقها على عينة من طلاب الكليات النظرية (حقوق، تربية، آداب) والعملية (العلوم، الطب) بجامعة جنوب الوادي. نتائج الدراسة :-				

							كشفت الدراسة عن دور أعضاء هيئة التدريس وإدارات بعض الكليات والمناهج التعليمية والأنشطة الطلابية في تحقيق التنمية السياسية للطلاب والمعوقات والصعوبات التي تحول دون تحقيق التنمية السياسية والمرتبطة بالمحاور السابقة وفي ضوء هذه النتائج تم وضع تصور مقترح لتفعيل دور أعضاء هيئة التدريس وإدارة الكليات وتطوير المناهج التعليمية وعمل برامج تعليمية جديدة تعُد من محتوى المقررات وتسمى لإكساب الطلاب المهارات اللازمة لتنمية الإتجاه السياسي لديهم، وكذلك تفعيل وتعزيز الأنشطة الطلابية وإحداثيات الطلاب لتحقيق التنمية السياسية لطلاب الجامعة ومن أهم هذه النتائج والتوصيات:- 1- التربية السليمة تساعد في إعداد القوي البشرية اللازمة والمدرية للنهوض بالتنمية السياسية، وتزويدها بالمعارف والقيم -المهارات التي تهيئها بنجاح مع خصائصالمجتمع الجديد 2- ربط أعضاء هيئة التدريس بين المواضيع الدراسية والقضايا المجتمعية وهذا يتضح بكثرة في كليات الطب والعلوم -والأهمية قلل من تحقيق التنمية السياسية لطلاب الجامعة 3- عدم إهتمام إدارة الكلية بتزويد المكتبة بالكتب والمراجع السياسية قلل أيضا من تحقيق التنمية السياسية للطلاب بالجامعة 4- يغلب على المناهج التعليمية الجمود والتكرار ، ولاتواكب التغيرات السياسية ولا المجتمعية، ولا تنمي حرية التعبير عن -ال رأي لدي الطلاب قلل أيضا من تحقيق التنمية السياسية للطلاب بالجامعة 5- لا يوجد تنوع في الأنشطة الطلابية بجامعة جنوب الوادي مما يقلل من مشاركة الطلاب لعدم مناسبة الأنشطة لميولهم -واتجاهاتهم 6- توصي الدراسة بعقد دورات تدريبية في كل كليات جامعة جنوب الوادي لأعضاء هيئة التدريس لتحديد وتطوير فكرهم -بضرورة الإهتمام بالجوانب السياسية وتعليمها للطلاب 7- توصي الدراسة جميع إدارات الكلية بالإهتمام بالطلاب والإستفادة منه في تطوير الكلية - 8- تطوير المناهج والمقرارات الداسية بصورة تتلائم مع ظاهرة تزايد المعرفة ومراعاة التغيرات السياسية بالساسة بالمجتمع -والإهتمام بالنشاط كجزء أساسي من المنهج 9- تفعيل دور مجالس الإتحادات الطلابية والأخذ برأيهم وإقتراحاتهم 10- تبني فكرة إنشاء معهد لإعداد القادة بجامعة جنوب الوادي للنهوض بإقليم جنوب الوادي إداريا وسياسيا

The potential of dominant casuarina rizospheric bacteria and fungi on casuarina growth.		
4612	12142269	Evaluating the Effect of some plant Extracts on Frankia Casuarina and rhizospheric microoganisms/	Sayed, Mohamoud sayed Ali.				2011			

4613	12142285		Impact of wind power on power system stability during fault occurrence/	Rihan, Mahmoud sameh.			The aim of the thesies is to investigate the impact of gust as case of wind speed variation on the stability of wind farms composed of fixed speed wind trubines based on SCIG and on the stability of wind farms composed of variable speed wind trubines based on DFIG.The continuous increasing in the pollution level and in the same time increasing in fuel price are factors lead to the increase in using renewable energy sources specially wind energy. Wind power production faces many challenges, one of the important challenges is that of the rapidly change in wind speed which depends on the weather condition. A change in wind speed affects on the generated power from wind turbine. SCIG and DFIG are famous kinds of wind turbine, each of them has advantages and disadvantages, SCIG is cheap but its operation has a harmful effect on system stability. DFIG keeps the system stable but it is very expensive technology for many countries. The thesis proposes a gust as a case of wind speed variation. The thesis uses Matlab/Simulink program to simulate the wind speed variation according to International Electrotechnical Commission 61400-1 (IEC 61400-1). The thesis focuses on the impact of gust which represents the wind speed variation according to reference IEC 61400-1 on stability ofwind farm connected to grid when the wind farm is composed of Squirrel Cage Induction Generator (SCIG) and when it composed of Double Fed Induction Generator (DFIG). The thesis investigates the stability of wind farm by studying the voltage stability as one of power system studies. In this thesis the voltage stability analysis is achieved by using two different kinds of Voltage Stability Indices (VSI) indicated by VSI_1 and VSI_2 which are used to indicate the voltage stability condition.The thesis designs a hybrid wind farm consists of an equal number of SCIGs-based wind turbine and DFIGs-based wind turbine without STATCOM connected to wind farm. The thesis designs this kind of wind farm to overcome the instability of SCIG and expensive price of DFIG. Key words: IEC 61400-1, Gust, Squirrel Cage Induction Generator (SCIG), Double Fed Induction Generator (DFIG), Hybrid wind farm and Voltage Stability Index (VSI).THESES ORGANIZATION Thesis is organized in 7 chapters. Notation, list of table, list of figures and abbreviations are shown after the list of contents. Literature references are mentioned in square brackets by numbers. Equations are numbered in format (x.y) and figures are numbered in format Figure x.y where x is the chapter number and y is the number of the item		
4614	12142316		Environmental chemical studies on some red sea protectorates/	Mohamed, Tarek Abubakr Gamal.		2010	The first chapter, is an introduction about the sources of ionizing radiation and man-made radiation sources The pathways and transport of radionuclides in aquatic systems were outlined briefly . The environmental behavior of radionuclides in the aquatic and marine ecosystems were discussed . In the second experimental techniques chapter description of apparatuses and studied area, sampling and samples preparation were indicated. Methods of analysis and set-up of used systems were given. Theoretical calculations were shown. Sedimentological were mentioned. Organic matter ;and carbonate percentages were listed. In the third result and discussion chapter measurements have been carried out. The specific activities of 238U. 232Th and 40K are measured, then the radium equivalent activities (Raeq) and the absorbed dose rate in air are calculated. The specific activities of 238U, 238Pu ;and 239+240pu are measured the isotopic ratios 234U/238U and 238 pu;239+240pu are determined A comparison of the specific activities of 238U is performed Also the specific activities of 89Sr and 90Sr are measured .The purposes of this study is to detect any radioactive contamination		

4615	12142356		Facts controllers for wind driven induction generator/	Radwan, Abdel-raheem youssef Abdallah.		2011	wind electrical power system is recently getting lot of attention, because they are cost competitive, environmental clean and safe renewable power source, as compared with fossil fuel and nuclear power generation. A special type of induction generator, called a doubly fed induction generator (DFIG), is used extensively for high-power wind applications. They are used more and more in wind turbine applications due to ease controllability, high energy efficiency and improved power quality. This thesis aims to develop a method of a field orientation scheme for control both the active and reactive powers of a DFIG driven by a wind turbine. The proposed control system consists of a wind turbine that drives a DFIG connected to the utility grid through AC-DC-AC link. The main control objective is to regulate the dc link voltage for operation at maximum available wind power. This is achieved by controlling the de and qe axes components of voltages and currents for both rotor side and line side converters using PI controllers. The complete dynamic model of the proposed system is described in detail. Computer simulations have been carried out in order to validate the effectiveness of the proposed system during the variation of wind speed. The results prove that , better overall performances are achieved, quick recover from wind speed disturbances in addition to good tracking ability. Generally, any abnormalities associated with grid asymmetrical faults are going to affect the system performance considerably. During grid faults, unbalanced currents cause negative effects like overheating problems and mechanical stress due to high torque pulsations that can damage the rotor shaft, gearbox or blade assembly. Therefore, the dynamic model of the DFIG, driven by a wind turbine during grid faults has been analyzed and developed using the method of symmetrical components. The dynamic performance of the DFIG during unbalanced grid conditions is analyzed and described in detail using digital simulations		
4616	12142426		Le triptyque de paul claudel (lotage le pain dur , le pere humilie) etude analytique et critique/	El- taher, yosra mohammed helmy.		2011	paul claudel est un poete et auteur dramatique concernant le poete nous pouvons dire la poesie de claudel comme son theatre est nourriede son experience de lamour et de la foi de sa vision de lunivers et de la via.

							disorders in dairy cows causing high economic losses due to prolonged days open and prolonged intercalving intervals, resulting in involuntary culling. Uterine function is often compromised in cattle by bacterial contamination of the uterine lumen after parturition; pathogenic bacteria frequently persist, causing uterine diseas. The development of uterine disease depends on the immune response of the cow as well as the species and number of bacteria. A total of 100 Holstein Frisian cows were used to determine the most susceptible m.os that are responsible for endometritis and to find the most sensitive antibiotic that killing the bacteria and subsequentially decrease the intercalving interval and improve the pregnancy rate. The cows in farm were routinely gynecologically examined at 30 dats interval. Cows found not pregnant after 90-120 days from the last calving were examined rectaly as will as vaginal examination. Sampling for bacteriological examination was performed immediately after clinical examination. Cows were classified into two groups. The first group included animals (9 cows) considered normal or apparently normal (may has subclinical endoetritis) and served as a control. However the 101 second group (91 cows) and diagnosed as had endometritis and served as treated group. For each cow, a transcervical guarded swab was collected from the uterine body. Swabs were processed for bacteriological examination as it cultured within 1 h of collection. All isolates were tested for the in vitro antibiotic sensitivity. Cows with clinical endometritis were subjected to the treatment regimen using the most sensitive antibiotic to the causative m.os (cefoprazone 4 gm) as intrauterine route and cefoprazone 4 gm intramuscular every 24 hours for 5 days. Each cow was reexamined 14 d after treatment. Clinical cure initially was defined as the absence of any pus discharge at follow up examination. After termination of the treatment protocol all cow followed the normal herd reproduction management practice in the bedding period. Different species of bacteria isolated from uterine samples (Staph, Strept, E.coli and Klebsella). The infection is either single infection (Staph only) (7 cows) or mixed infection (84 cows) while the control group has no bacterial growth (9 animals). It was found that the incidence of the mixed infection is higher than that of the single infection. Staph was the only M.os which cause single infection while the other M.os were usually mixed. Mixed infection was classified into: mixed infection with 2 M.os, mixed infection with 3 M.os and mixed infection with 4 M.os. infection with Staph and E.coil is the 102 higher incidence in the infection with 2 M.os (33 %), (30 animal) while the infection with Strept and Klebsella is the least in incidence in infection with 2 M.os (only one animal). The character of the Secretion varies according to bacterial infection as turbidity varies according to the type of M.os as it is low in case of infection with Staph in cobination with other		

4618	12143070	Some Studies on Postpartum Endometritis /	Mohammed, yahia Abbass Amin.		2012	M.os and moderate in the infection with the Strept in combination with E.coli and reach its maximum range in the infection of E.coli in cobination with Klebsella or in the infection with 3 M.os or the 4 M.os. The days open to pregnancy increase as the bacterial infection increase either in number of bacterial infection of the M.os cause the infection. Pregnancy rate increase or decrease depending on the type of the bacterial infection as it increase in infection with 4 M.os while it decrease in infection with 2 M.os which indicate the effect of the type of the M.os (virulence of the infection). The present study revealed that more number and severity of the M.os infection the more severity of uterine inflammation and the longest PP period to pregnancy and that noticed in the cows that were infected by mixed infection (4 M.os or 3 M.os) have the longest PP period to pregnancy and this is due to the high ratio of the M .os infection or due to the high virulence of the M.os or both which cause the maximum inflammation of the uterus of the infected cow (the heights values of secretion turbidity, congested mucous membrane, inflamed 103 uterine horn and thichned cervix). Cows that were infected by (E.coli + Klebsella) also have the longest PP period to pregnancy although the infection occur by 2 M.os only and this is due to the high virulence of the infected M.os that cause sever inflammation lead to prolongation of the PP period to pregnancy and subsequnt subfertility		
4619	12143104	Experimental study on desalination using forward osmosis process/	Radwan, Mohamed sayed.		2011	As a result of water scarcity and increasing demand for freshwater advancing the science of water desalination is vital in the development of susainable and new technologies forward osmosis has been introduced as anew and cost effective desalination process.		
4620	12143149	Some Microbiological studies on salmonellae isolated from Milk/	El- Nady, Emam Abobakr Mohammed.		2012	Aim of the work considering all hazard which are associated with salmonella species infections the present study was planned to deal with the following items: isolation of salmonella species from raw milk samples by using two different selective media indentification of salmonella species by using API 20 E system and PCR technique.		
4621	12143188	Some studies on helminthes infestation of poultry in Qena province/	Hassan, emam sayed Mohammed.		2011	Accordingly the aim of the present work is to investigation the gastrointesimal infection poultry in Qena province with special reference to their prevalence and fluctuation during the various seasons study the morphological feature of detected parasites.		
4622	12143214	clinical And pathological studies on nitrates toxicity in goats/	Khalil, Atef Mohamed hussein.		2011	this thesis performance of over head transmission lines with series condensers deals with the benefits of using capacitors banks for series compensation of the transmission lines and how to apply and arrange these capacitor banks along the transmission line.		
4623	12143867	pathological and Toxicological studies of lead on albino rats/	Said, zeinab Al-Amgad sayed.		2012	Carcinoma of the prostate is the second leading cause of cancer related deaths. Detection of cancer prostate in its preinvasive stages may offer a promise for studies of chemoprevention. Purpose: This study aimed at determination of the incidence of different premalignant lesions in the prostate gland and the association of these lesions with prostate adenocarcinoma. Materials and method: The present study was performed on 410 prostate biopsy specimens. They were collected from Mansoura Urology and Nephrology center, Mansoura university in a retrograde manner. Three types of biopsy specimens were encountered: needle, Trans-urethral resection and total prostatectomy specimens. The cut slides were used for staining with routine H&E stain as well as immunohistochemistry for High Molecular Weight Cytokeratin (HMWCK) in problematic cases. Results: The mean age of patients was 59.2 years. Foci of PIN were encountered in 130 cases. Atypical adenomatous hyperplasia was found in 12 cases. Four needle biopsy specimens contained foci of atypical small acinar proliferation. Using HMWCK, basal cell layer disruption was encountered in 45% of low grade PIN and 61 % of high grade PIN cases. Meanwhile, all AAH cases showed attenuated interrupted basal cell layer. Conclusion: High grade PIN is the most likely precursor lesion for prostate adenocarcinoma		
4624	12143878	Applications of genetic Algorithms control system engineering/	Rashwan, Ahmed Mohammed .		2011	The present thesis deals with the applications of geomorphological and hydrogeological condition of the stretch area, wich parallel the international border between Egypt and Palestine from Rafah to Ras El Naqap. the studied area attains 5280 km², it is limited by longitudes 34 25 52 and 34 54 29 E and latitudes 29 30 32 and 31 19 11 N. The investigations of the climatic of Sinai Peninsula shows that the climate up to Upper Pleistocene was humid. Now the climate of the studied area behaves as arid climate, locally it behaves as semi - arid especially the stretch area south the Mediterranean Sea		
						The upper beak extends in a hook like infront of the lower beak. It measures 53.80 mm long. - SEM shows that the tip and the lateral sides of the upper beak are covered by numerous flakes of keratin. At the free tip of the beak, these keratinized flakes have irregular appearance which may be due to desquamation of the epithelium during manipulation of foods. - The oral roof constitutes 87.73%, while the pharyngeal roof constitutes 12.27% of the oropharyngeal roof length. It is clear that the length of the oral roof is about 6.5 folds that of the pharyngeal roof. - The rostral part of the palate is characterized by the presence of median palatine ridge, rostral and caudal lateral palatine ridges, narrow part of the choanal slit and three rows of palatine papillae. The position, direction and length of these rows as well as the number of papillae they contain are different.		

4625	12143892	some developmental studies on the roof of the oropharynx of the duck/	Madkour, Fatma Abbass Mohammed.			2011	- The median palatine ridge (30.72 mm) consists of two parts; rostral continued (18.10 mm) and caudal interrupted (12.62 mm). The interrupted part bears 2-3 projections, it continues caudally within the proximal end of the choanal slit as a median fold. - SEM reveals that, at the level of the beginning of the caudal lateral palatine ridges, the median ridge is characterized by the presence of 4-5 transverse furrows. - Between the lateral edge of the upper beak and the rostral as well as caudal lateral palatine ridges being the lateral palatine groove which is narrow rostrally and becomes deeper and wider caudally. - The choanal slit measures 27.62 mm long. It constitutes 38.30 % of the length of the palate. Its narrow part constitutes about 55.87 % and wide part 44.13 % of the length of the choanal slit		
4626	12143908	Study of Gas- solid flow in 90 degree pipe bend/	Mohamed, osama hamdy.			2011	Numerical and experimental investigations of swirling and non-swirling (axial) vertical pneumatic conveying dryer are performed. In the numerical study, the Eulerian-Lagrangian model is used to simulate the two-phases. The gas phase is simulated based on Reynolds Averaged Navier-Stokes equations (RANS) employing four turbulence models, namely: standard k-ε model, RNG-based k-ε model, extended k-ε model and low-Reynolds number k-ε model. Meanwhile 3-dimensional particle tracking procedure is used for the solid phase. The pressure-velocity coupling is performed according to the SIMPLE algorithm which is extended to compressible flow. The model takes into account the lift and drag forces and the effect of particle rotation as well as the particles dispersion by turbulence effect. The solid particles dispersion by turbulence flow is simulated by Stochastic Separated Flow model (SSF) and the wall roughness is simulated by the virtual wall model. The effects of interparticles collisions and turbulence modulation by the solid particles, i.e. four-way coupling, are also included in the model. An anisotropic model is used to calculate the Reynolds stresses and the turbulent Prandtl number is calculated as a function of the turbulent viscosity. Two approaches for turbulence modulation are tested in the present study. The first one is based on volume and temporal double averaging while the second is based on volume averaging only. The experimental study is carried out on a pilot scale vertical pneumatic transport system. The swirl is imparted to the flow by axially rotating pipe of the same diameter as the drying pipe. Crushed limestone of different sizes is used to represent the solid phase. Measurements of pressure and temperature distributions along the dryer are performed at different inlet conditions. In addition, several extraction probes are installed along the conveying duct to collect solid samples for solid temperature and water content measurements. The experiments are carried out for pneumatic transport with heat transfer only (inert particles) and for pneumatic drying. The pneumatic transport tests are performed for three thermal conditions namely: isothermal (both phases are introduced at the same temperature), cooling (hot particles are introduced in cold gas stream) and heating (cold particles are introduced in a hot gas stream). Comparisons between present model predictions and available experimental results from literature as well as the experimental data obtained in the present study show good agreement.		
							Propofol (Diprivan) is a new intravenous anaesthetic, and has been found that the quality of induction with propofol is superior to that of methohexitone or thiopentone. Although cardiovascular and respiratory depression occurred with some cases, they were probably dose related and do not appear to present serious clinical problems. The present work was designed to evaluate the pharmacological properties of propofol and its clinical efficiency as a new intravenous anaesthetic agent. The pharmacological part of the study include acute toxicity study, in vivo experiments on intact anaesthetized animals, and in vitro experiments on isolated tissues. Animal toxicity study on white albino mice which was injected intraperitoneal in progressive increasing doses with the aim to calculate the median lethal dose of propofol, its behaviour and physiologic functions effects, and postmortem picture. In vivo experiments were designed to investigate the effects of different doses of propofol on respiration of intact anaesthetized cats, the effects of different doses of propofol on carotid arterial blood pressure by single shoots or continuous infusion and its possible site of action, and E.C.G. of chloralosed artificially ventilated cats. The effects of different doses of propofol on carotid arterial blood pressure of the spinal cats. The effects of different doses of propofol on intact		

						gastrocnemius-sciatic nerve stimulation preparation and its interaction with the non depolarizing muscle relaxant pancuronium. In vitro experiment was carried out on the following isolated tissue preparation :- (1) Effect of different doses of propofol on isolated perfused mammalian heart. (2) Effect of different doses of propofol on noradrenaline induced contraction and its possible cumulative effect on isolated rabbits aortic spiral strip and its interaction with verapamil. (3) Effect of different doses of propofol on histamine induced contraction on isolated guinea pig tracheal spiral strip. (4) Effect of different doses of propofol and its possible site of action on the tone of isolated loop of rabbit jejunum. (5) Effect of different doses of propofol on barium chloride, acetylcholine, and histamine induced contraction on isolated guinea pig ileum. (6) Effect of different doses of propofol on acetylcholine and potassium chloride induced contractions and its possible interaction with d-tubocurarine on isolated rectus abdominis muscle of toad. (7) Effect of different doses of propofol on direct and indirect electrically induced contractions on isolated rat phrenic nerve diaphragm preparation. Acute toxicity study showed that :- After injection of different doses of propofol, the animals were sedated, lost of searching out spontaneous activity and righting reflex with good muscle relaxation, with periods of apnoea and irregular respiration with occasional gasps and cyanosis and terminating in respiratory arrest.

4630	12143987	utilization of some unconventional protein sources in the Diet of Tilapia/	Mickdam, Elsayed Mohammed elsayed.			2010	The present work was carried out to evaluate using sunflower (SFM) and cotton seed (CSM) meals as potential feed ingredients in the grower and finisher diets of broiler chickens and their effects on the growth performance, carcass quality, blood metabolites (serum total lipids, cholesterol and glucose) and immunocompetaqnce. Two hundred and fifty two Hubbard chick of one day old were fed a basal recommended control starter diet containing 23% CP and 3200 Kcal ME / Kg (without inclusion of sunflower meal or cottonseed meal) during the first two weeks of age, then divided into 7 equal groups and fed the grower diets containing 21% CP and 3200 Kcal ME / Kg for two weeks, then finisher diets containing 18% CP and 3200 Kcal ME / Kg till the end of the experiment at six weeks of age. The grower and finisher experimental diets were formulated without (control diets) or with inclusion of SFM, CSM or mixture of SFM and CSM to provide 20 or 30% from the recommended total dietary protein where the control diet did not contain either SFM or CSM. The broiler chicks were distributed at random into 7 litter pens and fed the experimental diets. The experimental arrangement is to study the effects of inclusion of SFM and / or CSM to provide 20 or 30 % of the recommended dietary protein on growth performance, carcass quality, blood metabolites and immunocompetance. of the broiler chickens. The chicks were vaccinated against Newcastle and Gumboro diseases at proper time. Body weight of the chicks and consumed diets were weekly recorded and the feed conversion ratio was calculated. Blood samples were collected from the wing vein of the broilers at 20, 30 and 40 days of age to separate sera for analyzing the total lipid, cholesterol and glucose. At the end of experiment, 5 chicks from each group were collected and slaughtered to evaluate the carcass quality data. The results of the study revealed that body weight and body gain of the broiler chicks fed the diets with SFM, CSM or mixture from them to provide 20 % of the total crude protein of the grower and finisher diets were not significantly differ from that of the broiler chickens fed the control diet. body weight and body gain of the broiler chicks fed the diet with SFM or CSM or mixture from them to provide 30 % of the total crude protein of the grower and finisher diets were significantly decreased compared to that of the broiler chickens fed the control diet or those fed diet contained SFM or CSM or mixture from them to provide 20% of the recommended total crude protein of the grower and finisher diets. Feed consumption of the broiler chicks fed the diet with SFM, CSM or		
4631	12144010	Monitoring of blood serum copper status in sheep/	Abdallah, Rawia Mounier.			2011	This work was conducted in the sheep farm of Faculty of Agriculture, Al-Azhar University and in several sheep localities in Egypt to clarify : the prevalence and incidence of caseous lymphadenitis in sheep. Isolation of the organisms from the affected lymph nodes showing abscesses, faecal samples, the wool (Animal sources) and from the fomites that are utilized in the farm (Farm components). Identification using different diagnostic methods as bacteriological biochemical tests, haematological methods, histopathological findings and pathogenicity test. Effect of C. ovis on general health conditions of sheep as the temperature, weight of animals and their blood picture (R.B.Cs, W.B.Cs, differential counts, estimation of Hb, PCV, total serum protein, urea and cholesterol) of both infected and control animals. Effect of some commercially available disinfectants on the C. ovis in vitro. Control the diseased animals after using sensitivity test for chosen the specific antibodies, using the appropriate disinfectants for control and disinfection the contaminated farmIncreasing the inclusion of SFM, CSM or mixture of them to provide 30 % of the total crude protein of the grower and finisher diets increased the feed consumption compared to that of the control group or the groups fed the diets supplying only 20 % of the total protein from SFM, CSM or mixture of them. Feed conversion ratios of the broiler chicks fed the diets containing SFM, CSM or mixture from them to provide 20 % of the crude protein of the grower and finisher diets were significantly increased compared to that of the broiler chickens fed the control diet and feed conversion ratio was increased with increasing the level of inclusion of SFM and / or CSM in the diets. The abdominal fat in the carcass of the broiler chicks fed the SFM and or CSM-diets were higher than those fed the control diet. Inclusion of SFM and / or CSM in the diets of the broiler chickens at the different levels had no significant effects on carcass quality and giblet weight percentages		

4632	12144035	Studies on the endoparasitic infections of some Red Sea fishes /	Ahmed, Nahla Hossam El-din Mohamed.			2012	أثناء هذه الدراسة تم جمع 180 سمكة من 8 أنواع و اجنلس و هي الكشكوشة، الملاص أبو ربيع، الدريني، البوري، العنبر البلدي، الكثر أبو لولو، السيجان و البطيط. تم جمع الأسماك من ثلاث مناطق تقع شمال الغردقة بنحو 5 كيلو متر و هي المعهد القومي لعلوم البحار و المصايد فرع البحر الأحمر، منطقة أبو قلاوه و منطقة شعب سعد. تم فحص هذه الأسماك في الفترة من ديسمبر 2010 و حتى نوفمبر 2011 من ناحية الإصابات الطفيلية الداخلية الموجودة بالقناة الهضمية و كانت الطفيليات الموجودة هي التريماطودا (سينوكرياديم ليماني، هيكتانجام سيجاني، ساكوسيلوم أوبيسم، سينوكاليفينا ميكرودينى، هاماكرياديم ميوتابيلي، هليكومترا هيبوديتيس ياماجوتي و نيوليپوريا موريتينزس) السيسطودا (رينوبوتريم سينيس) و التريماطودا الطور الثالث من يرقات الأنيساكيس سيميليكس و بروكاسالينس إيلاتينسيس. أثناء إجراء هذه الدراسة وجد أن 128 من الأسماك التي تم فحصها مصابة بالطفيليات بنسبة 71.11% و قد سجلت أسماك الملاص أبو ربيع و السيجان أعلى نسبة من الإصابة حيث بلغت نسبة الإصابة فيها 100 % و كانت أقل نسبة إصابة في أسماك البوري بنسبة إصابة 11.11%. وصلت نسبة نيدان التريماطودا في الأسماك المصابة إلى 47.05% بينما تواجدت التريماطودا بنسبة 45% و كان أقل تواجد لنيدان السيسطودا و التي كانت نسبتها 7.95%. و قد سجلت أسماك الثالازوما كلانزينجري أعلى إصابة بالتريماطودا حيث بلغت الإصابة بها 71.10% بينما سجلت أسماك الكثر أبو لولو أقل إصابة بها(20.00%). من ناحية أخرى كانت أعلى إصابة بنيدان السيسطودا في أسماك الكثر أبو لولو حيث بلغت 28.89% بينما كانت أقل إصابة بها في أسماك الدريني (3.30%). سجلت أسماك السيجان أعلى إصابة بنيدان التريماطودا و التي بلغت 60.22% بينما كانت أقل إصابة بها في أسماك الملاص أبو ربيع (20.23%). أعلى إصابات طفيلية سجلت في الأسماك المجمعة من منطقة أبو قلاوه بينما كانت أقل الإصابات من الأسماك المجمعة من منطقة شعب سعد. دراسة الهستوبالوجيا لأسماك الملاص أبو ربيع أوضحت حدوث التهاب مزمن في المعدة و الأمعاء و كذلك وجود بعض التغيرات في أنسجة الكبد و البنكرياس.

4635	12144597	prevalence of salmonellae in poultry products and meat products in luxor city/	Ahmed, zeinab Ahmed Mohammed.			2012	Gastroenteritis is an important cause of morbidity and mortality in children as well as adults. Although the causative agents depend on the patients' age, predisposing conditions and geographical area, non-typhoidal Salmonellae are important food-borne pathogens that cause gastroenteritis. Over the period of this study, out of 420 adult patients complaint of gastroenteritis in Main Hospital and Emergency Hospital, non-typhoidal Salmonellae strains were isolated from 18 cases (4.28%) and out of 150 patients complaint of gastroenteritis in Mansoura Children Hospital, non-typhoidal Salmonellae strains were isolated from 4 cases (2.66%). from 80 food handlers studied in MUHs, non-typhoidal Salmonellae strains were isolated from 3 cases (3.75 %). The recovery of non-typhoidal Salmonellae strains was higher (100%) after enrichment in selenite F broth than by direct plating (84%). Non-typhoidal Salmonella gastroenteritis was more common in outpatients, age group < 20-49 years and warmer months. The incidence of non-typhoidal Salmonella was higher in asymptomatic food handlers than symptomatic food handlers. Salmonella enteritidis was the most prevalent serotype (52%), followed by Salmonella typhimurium (40%) and finally Salmonella virchow (8%). High resistance to ampicillin, chloramphenicol tetracycline and trimethoprim-sulphamethoxazole are detected among the three serotypes	
4636	12144602	Effect of some neurotransmitters on some blood parameters of Male abline rats/	Ahmed, Mohammed youssef salah.			2011	Neurotransmitters are chemicals that are used to relay, amplify and modulate electrical signals between a neuron and another cell. They are broadly classified into two groups according to chemical structure and rapidity of action. The first group includes the small molecular weight rapidly acting neurotransmitters such as acetyl choline, biogenic amines and the amino acids aspartate and glutamate which is considered the major "workhorse" neurotransmitters of the brain and play a major role in the prognosis of head trauma. The second group include neuroactive peptides having larger molecular weight and slower action as substance P and opioid peptides (Biberthaler et al., 2004). The excitatory amino acids, glutamate and aspartate play a role in the pathogenesis of postschismic and posttraumatic brain insult. The changes of excitatory amino acids in the cerebrospinal fluid of patients with traumatic brain injury are incompletely understood. The excitatory amino acids concentrations in the cerebrospinal fluid increase after acute head injury and remain higher for at least one week post injury in severely injured patients. The more severe the trauma, the more obvious the excitotoxicity induced by excitatory amino acids and the worse the outcome (Zhang et al., 2001). It was found that glutamate excitotoxicity is a putative mechanism of secondary damage after traumatic brain injury. Dynamic research on severely injured patients indicated that the peak value of glutamate mostly appeared within 48 hours post-injury; it decreased with the improving or remaining of the neurological status, and increased with the deterioration, but was still higher than that of the control seven days post-injury (Zhang et al., 1998). The peak value of excitatory amino acids of severely injured patients was conspicuously higher than that of mildly injured patients.	

4637	12144609		HISTOMORPHOLOGICAL STUDIES ON THE PANCREAS OF THE QUAIL/	MOHAMMED, eLSAYED SEDDEK IBRAHIM.		2012	The histomorphological changes occurring in the testis of 20 donkeys ranging from birth to adulthood were studied. In addition, some morphometric parameters of the tubular and interstitial components of the testis were measured during the same period. The testis of the donkey was completely descended in the scrotum around birth. It was covered by a thick tunica albuginea consisting of outer and inner fibrous layers in addition to middle vascular one. Discrete bundles of smooth muscle cells were demonstrated in the outer fibrous layer of the tunica albuginea. These cells give the tunica albuginea a contractile function, which may aid in sperm transport. The present study emphasized an irregular arrangement of the testicular lobules of the donkey during various stages of the postnatal life. Such arrangement does not allow some lobules to have direct contact with the mediastinum testis. The latter was located paraxially, toward the epididymal border and extended about two thirds of the testicular length, it is thick at the head extremity and gradually faded out caudalwards. The tubular compartment of the donkey testis showed an increasing volume percentage on the expense of the interstitial tissue during the various postnatal ages due to increased tubular length convolutions. Such compartment increased from about 13% in neonates to about 78% in mature donkeys		
4638	12144621		L'affiche électorale et la rhétorique de la persuasion à la présidentielle française 2007 /	Ahmed, Mohamed Abd Elchafi.		2012	Propaganda poster election is not just a paper stuck on the walls or in any place, but this is kind of posters is one of the most main- important tools which used and exploited by any of the candidates during the election period in all its forms and types, in particular the presidential election. in view of what the label of promoting the image of candidate among the citizens to establish a certain mental image through Version Email poster of the image and the background and logo of the electoral atmosphere, which play an important role in the formation of a preconceived idea when the receiver of this message is visible. The study aims to identify the communication strategies in the propaganda poster electoral communication strategy and its mechanisms, and political communication history, concept and meaning of pointing out its key also touched on the concept of political marketing and the origins and developments highlighted after the French presidential election, 2007, explaining the elements in an attempt to show the close relationship between propaganda poster electoral and politics. As well as the research has examined how the output is the political analyst, various messages in posters advertising French for both candidates subject of the study of letters iconic and plastic arts and language, stressing the shift is the ad from the phase information to the process of argumentation, finally speak about the manipulated plan by the poster, which in turn reach the highest level of persuasion. Study concluded that the propaganda poster may play a crucial role in the midst of the fray in terms of a desired positive image which urges on the feet of the voter to choose but the question remains to what extent there is a consensus between intentional voter and deliberate candidate and whether there is a consensus actually among the positive image formed already in the mind of the receiver and the image that the sender tried to set in his mind ... Experience on the ground is only capable of resolving the conflict.		
4639	12144682		Folkloric elements in zora neale Hurstons Novels A Thesis submitted for the fulfillment of an A. degree in English literature/	Ahmed, Riham Fouad Mohammed.		2011	There will be an attempt to examine Amis's treatment of the revolutionary protagonist in some of his selected works. It shall also throw the light on the disorder and chaotic theme that was left by the Second World War and well expressed and introduced by Amis. It shall observe its entity and effects, trying to objectively prove that Chaos essentially lead to the following terms: rebelliousness, fear, alienation, misunderstanding, sexual problems, crime, and a lot more of circumstances that affected the whole community. In other words, the positive face of chaos, personified in the revolutionary creative techniques and themes are going to be used in analyzing the negative face of chaos and its consequences in our lives. The thesis shall examine as well how deeply Amis's personality and his individual life affected the characters of his novels; In an attempt to reach the truth of the connection between them and how far, they are related. The thesis is going to be divided into the following: Introduction, Four chapters and Conclusion		

4640	12144720		Hematological ,Biochemical , parasittological , And Ecological studies on cattle egret (Bubulcus ibis) in sohag governorate/	Ahmed, Mokhtar Mostafa Mohammed.			2011	The present study was designed to characterize the hematological abnormalities in children with acute glomerulonephritis, nephrotic syndrome and chronic kidney failure and to figure out the impact of hemodialysis on the hematological outcome in children with ESRD. To achieve this aim six children with acute glomerulonephritis, six children with nephrotic syndrome, seven children with chronic kidney failure (CKF) before initiation of hemodialysis, five patients with CKF on chronic hemodialysis for less than one year and nine children with CKF on chronic hemodialysis for more than one year were enrolled in this study. Additionally, 11 healthy children with matched age and sex were included as a control group. All patients and controls were subjected to hematological investigations including complete hemogram, serum iron, serum TIBC, serum ferritin, prothrombin time, APTT, fibrinogen concentration and platelet aggregometry. Note: Our results could be summarized as follows: In the group of acute glomerulonephritis (AGN; GI), there were statistically significant decrease of Hb concentration, RBCs count and HCT compared to control group, while, there were significant increase of RDW and serum ferritin, compared to controls. In the group of nephrotic syndrome (NS; GII), there was statistically significant decrease of RBCs count and significant increase of RDW, compared to the control group. In the group of undialyzed chronic kidney failure patients (GIIIA), there was statistically significant decrease in Hb concentration, RBCs count and HCT and serum iron and statistically significant increase of RDW and serum ferritin, compared to the control group. There were statistically significant increase of serum iron and serum ferritin in GIIC (patients with chronic kidney failure undergo dialysis for more than one year) compared to GIIIA (undialyzed chronic kidney failure patients) while there was statistically significant decrease of TIBC. Additionally, there was significant positive correlation between serum iron and the duration of hemodialysis in our series of dialyzed patients. In the group of AGN there was statistically significant increase of neutrophils and decrease of lymphocytes compared to controls. Similar results were demonstrated in the group of nephrotic syndrome		
4641	12144764		Epidemiological study on fascioliasis as Azoontic disease Among Human and Animals in Qena governorate/	Gahlan, Asmaa Gahlan youssef.			2011	The present study was designed to characterize the hematological abnormalities in children with acute glomerulonephritis, nephrotic syndrome and chronic kidney failure and to figure out the impact of hemodialysis on the hematological outcome in children with ESRD. 4642	12145970		Comparative study between different drugs commonly used in the Egyptian market in the management of iron deficiency anemia during pregnancy /	Atyea, Mohamed Ibrahim.			2013	Cholelithiasis has always been a challenge for surgeons dealing with biliary pathology. Both diagnosis and treatment have evolved over the last years with the introduction and universal application of advanced imaging modalities as well as endoscopic and laparoscopic procedures. In patients with suspected common bile duct (CBD) stones, their identification before open or laparoscopic cholecystectomy plays an important role in extra hepatic biliary tree surgery. Clearance of the CBD before or during cholecystectomy prevents many postoperative complications. There are numerous options for pre-operative diagnosis of suspected CBD stones, including conventional ultrasonography (US), liver function test (LFT), magnetic resonance cholangiography (MRC), endoscopic retrograde cholangiopancreatography (ERCP), and intra-operative US. The optimal method for investigating suspected CBD stones has not yet been determined. The aim of the study was to compare pre-operative conventional ultrasonography, magnetic resonance cholangio-pancreatography and intra-operative cholangiography in diagnosis of common bile duct stone as regard sensitivity, specificity, positive & negative predictive values and accuracy. This study was carried out on thirty patients with calculous obstructive jaundice on basis of clinical signs, laboratory workup and transabdominal ultrasound and preoperative MRCP.		

						There were twenty females (66.7 %) and ten males (33.3 %), their age ranged from 18 to 63 years with a mean age of 41.7 ± 13.3 years. All cases were subjected to thorough history taking and complete clinical examination. Laboratory investigations (aspartate aminotransferase, alanine aminotransferase, total and direct bilirubin, alkaline phosphatase and gamma-glutamyl transferase) followed by ultrasonography, magnetic resonance cholangiopancreatography (MRCP). Patients underwent open cholecystectomy. IOCAemia is a global problem and is associated with maternal morbidity and mortality (Muhammad & Anis-ur-Rehman, 2005). Iron deficiency is thought to be the most common cause of anaemia globally, although other conditions, such as folate, vitamin B12 and vitamin A deficiencies, chronic inflammation, parasitic infections, and inherited disorders can all cause anaemia. In its severe form, it is associated with fatigue, weakness, dizziness and drowsiness. Pregnant women and children are particularly vulnerable. (WHO, 2011). The WHO defines anemia as hemoglobin below 13g/dL in men over 15 years, below 12g/dL in non pregnant women over 15 years, and below 11g/dL in pregnant women (WHO, 2005). Women during their reproductive years are at risk of iron deficiency due to blood loss from menstruation in particular that 10% who suffers heavy losses (>80ml/month). It is obvious that contraceptive practice also has an important effect on the development of anemia, while the non-medicated intrauterine devices increase menstrual blood loss by 30-50%, oral contraceptives have the opposite effect. The two most common causes of anemia in pregnancy and the puerperium are iron deficiency and acute blood loss. Iron requirements increase during pregnancy, and a failure to maintain sufficient levels of iron may result in adverse maternal-fetal consequences, (ACOG, 2008). Pregnancy is associated with physiologic changes that may complicate the diagnosis of hematologic disorders. There is an increased iron requirement during pregnancy because blood volume expands by approximately 50% and total red blood cell mass expands by approximately 25% (300 mL) during a singleton gestation (3). The greater expansion in plasma typically is reflected by decreases in Hb and Hct levels, (ACOG, 2008) Anemia during pregnancy has considerable risk factor for both mother and fetus. Fetal consequences are an increased risk of growth retardation, prematurity, intrauterine death, amnion rupture and infection. Maternal consequences of anemia include cardiovascular symptoms, reduced physical and mental performance, reduced immune function, tiredness, reduced peripartur blood reserves and finally increased risk for blood transfusion in the postpartum period. For clinical management, proper diagnosis and therapy are mandatory to reduce maternal and fetal risks and to enable optimal obstetrical outcome of both, (Breyman, 2002) The management of anemia during pregnancy remains an important issue in prenatal medicine. Correct diagnosis and treatment lead to effective management of fetal and maternal risk and improved prenatal outcome, (Christian, 2002). Iron supplementation decreased the incidence of iron deficiency anemia and enhanced iron status during pregnancy. Diet alone cannot supply the 30-40mg iron (Fe) that is required for absorption of 4-6mg iron (Fe) per day needed during the later stage of pregnancy so iron supplementation is strongly recommended for all pregnant women in developing countries, (Jai, 2004). Traditional therapeutic options of iron deficiency anemia during pregnancy were administration of oral iron or in severe cases administration of blood transfusion. While Oral iron shows limited effectiveness in cases of severe anemia due to various factors such as side effect, lack of compliance and often limited intestinal absorption and bioavailability (Sifakis & Pharmakids, 1999).		
4643	12145979		Hypertension and Anaesthesia /	Emam, Dalia Anwer.		Plasma lipid profile in Egyptian hypertensives. This study included 65 patients with essential hypertension, 13 renal hypertensive patients, 21 diabetic hypertensive patients and 19 Egyptian normal controls. The following laboratory investigations were done for all subjects: plasma total cholesterol, total triglyceride, HDL-C, LDL-C, phospholipids, FFA, immunoturbidimetric assay of apo A-I and apo B and lipoprotein electrophoresis pattern on cellulose acetate support medium. Total cholesterol and triglycerides were increased significantly in essential hypertensives, renal hypertensives and diabetic hypertensives compared with those of the control group. HDL-C, alpha lipoprotein and apo A-I were lower in essential hypertensive patients, diabetic hypertensive patients, hypertensives with renal failure compared with control values. The lowest levels were found in renal hypertensive patients. LDL-C and apo B were higher in essential hypertensive patients, diabetic hypertensive patients and hypertensives with renal failure. The change was worst in diabetic hypertensive patients. TC/HDL-C ratio was significantly higher in essential hypertensives, diabetic hypertensives and renal hypertensive patients. Of all the studied hypertensive groups the worst lipid profile in comparison to control values was found in diabetic hypertensive patients. Obese hypertensives had significantly higher triglycerides, phospholipids, pre-beta lipoprotein and apo B in comparison to non-obese essential hypertensive patients. HDL-C, alpha lipoprotein and apo A-I were lower in obese hypertensive patients than in non-obese hypertensive patients. Male essential hypertensive patients had significantly higher apo B and significantly lower HDL-C in comparison to female essential		

4644	12145987		Relation between vaginal candidiasis diagnosed after 39 weeks and prolonged pregnancy/	Abdel-latif, Ahmed Dabash.		2013	Plasma lipid profile in Egyptian hypertensives. This study included 65 patients with essential hypertension, 13 renal hypertensive patients, 21 diabetic hypertensive patients and 19 Egyptian normal controls. 4645	12145999		Comparison of three different routes of administration of misoprostol for labor induction in the third trimester of pregnancy /	El-Sayed, Abdel-Hamid Mahmoud.		2013	The primary aim of antepartum fetal surveillance is timely recognition of fetal compromise to enable appropriate intervention and to prevent further serious complications. If the fetus would otherwise die in utero, delivery might save its life. Abnormal Doppler parameters appears to affect the decision of mode of delivery and if the fetus can tolerate stress of labour or not. Because of low specificity, a single abnormal MCA Doppler US result is not useful for timing delivery, so combination with umbilical artery Doppler parameters increase the sensitivity and specificity significantly. Abnormal aortic artery and renal artery Doppler parameters are valuable with MCA and UA but cannot be used separately to evaluate fetal compromise or exclude it. In fetuses suspected to have IUGR, while an abnormal MCA pulsatility index is a better predictor of adverse perinatal outcome than an abnormal UA or RA pulsatility index, a normal UA pulsatility index may be useful in identifying those fetuses not likely to have a major adverse perinatal outcome, especially before 32 weeks gestational age. Outcomes of SGA fetuses with a normal PI in comparison with outcomes of those with an abnormal value and concluded that SGA fetuses with a normal MCA PI are at a lower risk for adverse outcomes than those with an abnormal PI. Depending on other clinical factors, reduced, absent, or reversed umbilical artery end-diastolic flow is an indication for enhanced fetal surveillance or delivery. If delivery is delayed to enhance fetal lung maturity with maternal administration of glucocorticoid, intensive fetal surveillance until delivery is suggested for those fetuses with reversed end-diastolic flow.		
4646	12146008		A Prospective Comparative study between different surgical techniques in cleft lip and repair /	Abd El-Aziz, Osama Hassan El-Banna.		2013	The primary aim of antepartum fetal surveillance is timely recognition of fetal compromise to enable appropriate intervention and to prevent further serious complications. If the fetus would otherwise die in utero, delivery might save its life. Abnormal Doppler parameters appears to affect the decision of mode of delivery and if the fetus can tolerate stress of labour or not. Because of low specificity, a single abnormal MCA Doppler US result is not useful for timing delivery, so combination with umbilical artery Doppler parameters increase the sensitivity and specificity significantly. Abnormal aortic artery and renal artery Doppler parameters are valuable with MCA and UA but cannot be used separately to evaluate fetal compromise or exclude it. In fetuses suspected to have IUGR, while an abnormal MCA pulsatility index is a better predictor of adverse perinatal outcome than an abnormal UA or RA pulsatility index, a normal UA pulsatility index may be useful in identifying those fetuses not likely to have a major adverse perinatal outcome, especially before 32 weeks gestational age. If delivery is delayed to enhance fetal lung maturity with maternal administration of glucocorticoid, intensive fetal surveillance until delivery is suggested for those fetuses with reversed end-diastolic flow. Around the primitive mouth, 5 processes develop: 1- One frontonasal process which projects down from the cranium. Two olfactory pits develop in it and rupture into the pharynx to form the nostrils. Definitively, this process forms the nose, the nasal septum, nostril, the philtrum of the upper lip and the premaxilla - the V-shaped anterior portion of the upper jaw which usually bears the four incisor teeth. 2- Two maxillary processes on each side, which fuse with the frontonasal process and become the cheeks, upper lip (except the philtrum), upper jaw and palate (apart from the premaxilla). 3- Two mandibular processes which meet in the midline to form the lower jaw. The following anomalies are associated with defects of fusion of facial processes: 1-Macrostroma and microstroma are conditions where either too small or too large		

							closure of the stomodaeum occurs. 2-Cleft upper lip which may be: □ Median cleft lip this is only very rarely like the upper lip of a hare, although this may occur as a failure of development of the philtrum from the frontonasal process. □ Lateral cleft lip which is more common, it may be unilateral or bilateral, complete or incomplete, occurring as failure of fusion of the maxillary and frontonasal processes. It may be associated with cleft palate. 3-Cleft lower lip occurs very rarely but may be associated with a cleft tongue and cleft mandible. 4-Cleft palate is a failure of fusion of lateral shelves of maxillary processes. The following stages may occur: (a) Bifid uvula. (b) Incomplete cleft palate, which may involve the soft palate only or associated with the posterior part of the hard palate also. (c) Complete cleft palate, which may be unilateral, or bilateral (Harold Ellis, 2006).		
4647	12146016		The study of Helicobacter Pylori infection among type II Diabetic patients /	El-rawy, Mohamed Sabry.		2011	Diabetes mellitus (DM) is a syndrome with disordered metabolism and inappropriate hyperglycemia due to either a deficiency of insulin secretion or due to combination of insulin resistance and inadequate insulin secretion to compensate. It has multisystem effects on both biochemical and functional consequences. Type II diabetes, both defects exist i.e. combination of peripheral insulin resistance and inadequate insulin secretion by pancreatic beta cells. For example, all overweight individuals have insulin resistance, but diabetes develops only in those who cannot increase insulin secretion sufficiently to compensate for their insulin resistance. Their insulin concentrations may be high, yet inappropriately low for the level of glycemia. Rates of diabetes are increasing worldwide. The World Health Organization (WHO) has estimated that the global prevalence (for all age groups) would rise from 2.8% in 2000 to 4.4% in 2030. At least 171 million people currently have diabetes, and this figure is likely to more than double to 366 million by 2030. Diabetes mellitus is one of the main causes of microvascular (i.e., retinal, renal), macrovascular (i.e., coronary, peripheral vascular) and neuropathic complications. It also leads to end-stage renal disease (ESRD). Diet control is a basic part of management in every case. Treatment cannot be effective unless adequate attention is given to ensuring appropriate nutrition. Together with dietary treatment, a programme of regular physical activity and exercise should be considered for each person. <i>Helicobacter pylori</i> (H. pylori) are motile, flagellated, gram-negative, spiral bacterium (Lopes, 2010) which survives the acid environment of the stomach by producing the enzyme urease (McColl, 2010 and Lopes, 2010). The exact route of transmission of H. pylori is unknown; currently favored mechanisms appear to be gastro-oral and fecal-oral routes (Tan and Wong, 2011). Infection with H. pylori can lead to inflammation of the gastric mucosa with subsequent ulceration (McColl, 2010; Lopes, 2010 and Tan, 2011). Infection is a major cause of chronic gastritis, a condition that initiates the pathogenic sequence of events leading to atrophic gastritis, intestinal metaplasia, dysplasia and subsequently cancer (Kabir, 2009 and Lopes, 2010). Infection with H. pylori is a co-factor in the development of duodenal or gastric ulcers (develop in 1 to 10%), gastric cancer (in 0.1 to 3%) and gastric mucosa associated lymphoid tissue (gMALT) lymphoma (in <0.01%) (McColl, 2010). While the bacterium is not a direct cause of cancer, its presence and resultant reduction in acid production are necessary factors in causation (Lopes, 2010). The risk of these disease outcomes in infected patients varies widely among different populations and the great majority of patients with H. pylori will not have any clinically significant complications (McColl, 2010 and Lopes, 2010). The prevalence of H. pylori infection varies between countries; in Europe, the prevalence varies between 7 and 33% (Ford and Axon, 2010). Infection is usually acquired in childhood (Tan and Wong, 2011); in developing countries, the infection is typically acquired before 10 years of age, while in developed countries there is an age-related increase in prevalence (Tan, 2011 and McColl, 2010). The major risk factor for H. pylori infection is the socio-economic status of the family during childhood, in particular the level of sanitation and household hygiene (Steinstrom et al, 2008), however genetic susceptibility also appears to play a role (Tan and Wong 2011). The predominant genotype varies greatly between regions and accounts for some of the gastric cancer risk seen in some population groups, such as Japan and South Korea which tend to harbor more virulent strains (Tan and Wong, 2011). The role of screening and eradicating H. pylori in the general population and in targeted populations, as a means to reduce the incidence of gastric cancer is an area of		

							much debate .There is growing evidence that adopting such an approach in populations at high risk of gastric cancer may reduce the future incidence of gastric cancer (Ford and Axon, 2010). Diabetes mellitus (DM) is one of the important causes of dyspepsia. Disordered gastrointestinal motor function is now recognized as a major cause of DM. Beside DM the H. pylori is also a well established cause of dyspepsia (Devrajani et al, 2010). The incidence of H. pylori is increased in DM (Saluja et al, 2002). Delayed gastric emptying and antral dysmotility are important causes of dyspepsia in diabetes. The role of H. pylori infection in diabetic dyspepsia is mainly related to blood glucose concentration. Hyperglycemia may induce the infection by H. pylori or the silent infection may get reactivated and produce symptoms of dyspepsia in diabetes (Devrajani et al, 2010).		
4648	12146020		Management of head Injury in the intensive care unit /	Sayed, Wael Farouk.		2013	The human body is not a static entity, but is in a constant state of flux. Tissues are synthesized and broken down continuously, processes which need energy. In the critically ill patient there is a variety of factors which prevent the individual from meeting his energy requirements. These include anorexia; possible associated gastrointestinal disease; increase or altered requirements; and altered vitalization. The imbalance between reduced intake and augmented or altered requirement results in effects which are similar to those of starvation. Indications for parenteral nutrition include : acute hypercatabolism (multiple trauma; burns; septicemia); pyloric stenosis; pancreatitis; cardiac surgery; gastrointestinal cutaneous fistulae; inflammatory bowel disease; cancer surgery; caecostomy. The choice of appropriate intravenous nutrient solutions clearly depends on knowledge of changes in the substrate endocrine relationships that take place during the perioperative period. These changes are influenced by starvation, trauma, anesthesia, and excess glucose administration. T.P.N. may be taken in the form of peripheral intravenous nutrition in patients with limited protein caloric requirement but for hyper catabolic and hypermetabolic patients and patients receiving long term T.P.N. central access becomes necessary. Nutritional assessment of patients depends on a detailed history, including dietary history. Physical examination and the use of certain variables, for example anthropometry of arm, serum prealbumin and retinal blinding system. The object of nutritional assessment is to detect and categorize patients with different types and degrees of malnutrition and related these to the risk of morbidity and mortality. Careful monitoring is required after the infusion is begun to evaluate the progress of the nutritional status. Sheldon et al., (1983), designed a monitoring protocol for T.P.N. Signs of success are positive nitrogen balance, weight gain, response of serum protein and delayed hypocalcaemia. When becoming normal, this is an early index of the return to normal following adequate nutritional repletion. Complications of T.P.N. may be grouped into three categories technical, metabolic and septic. The most common complications of T.P.N. are related to catheter placement through a crowded thoracic inlet, pneumothorax is the most common complication. Air embolism is the most serious. Traumatic brain injury (TBI) is defined as functionally significant disruption of brain function manifested as immediately apparent cognitive or physical impairments that result from blunt or penetrating trauma or rapid acceleration or deceleration forces. This definition excludes lacerations or contusions of the face eye or scalp and fractures of facial bones alone. Additionally, injury to brain resulting from brain trauma, hypoxic-ischemia (anoxic) inflammatory toxic or metabolic encephalopathies, primary ischemic or hemorrhagic strokes seizure disorders, intracranial surgery and cerebral neoplasm also are outside the definition of TBI (163). TBI has dramatic impact on the nation's health it accounts for 15-20% of deaths in people aged 3-35 years old and is responsible for 1% of all adult deaths. Approximately 1.4 million people in the UK suffer a head injury every year resulting in nearly 150000 hospital admissions of these approximately 3500 patients require admission to ICU. In addition to the high mortality approximately 60% of survivors have significant ongoing deficits including cognitive competency major activity leisure and recreation. This has a devastating financial emotional and social impact on survivors left with lifelong disability (165).		

							The principal mechanisms of TBI are classified as (a) focal brain damage due to contact injury types resulting in contusions laceration and intracranial haemorrhage, (b) diffuse brain damage due to acceleration/deceleration injury, types resulting in diffuse axonal injury or brain swelling (184). Outcome from head injury is determined by two substantially different mechanisms/stages (a) the primary insult (primary damage - mechanical damage) occurring at the moment of impact. In treatment terms this type of injury is exclusively sensitive to preventive but not therapeutic measures. (b) The secondary insult (secondary damage delayed non - mechanical damage) represents consecutive pathological processes initiated at the moment of injury with delayed clinical presentation. Cerebral ischemia and intracranial hypertension refer to secondary insult and in treatment terms this type of injury is sensitive to therapeutic intervention. The key of management is to deal with these patients as emergencies. This relies on early recognition of those patients with potential intracranial injuries, immediate correction of factors leading to secondary injuries, rapid diagnosis of intracranial pathology, computerized tomography and magnetic resonance imaging and then immediate delivery to the definitive management (177). Aim of work □ Understanding the pathophysiology after traumatic brain injury for adequate and oriented treatment. □ Evaluating the importance of monitoring the injured brain to enable the detection of harmful physiological events before they cause irreversible damage to the brain. □ To discuss the problem of traumatic brain injury and its assessment, resuscitation and intensive care management.		
4649	12146030		Different Techniques of Laminoplasty in management of Cervical Spondylotic Myelopathy /	Alkhooly, Ahmed Ali Zein Al-Abdeen Ahmed.			2013 Cervical spondylotic myelopathy and Radiculopathy is believed to be the commonest disease of the spinal cord and roots in the middle aged and elderly. The mechanism are thought to be either slowly progressive compression with neuronal damage mediated by ischaemia, or trauma most often of minor but repetitive type; but both mechanisms probably operate in many patients. The natural history of patients with cervical spondylotic myelopathy has been studied from a large series of patients by several workers, prior to the wide spread implementation of the operations now performed commonly for this condition only about 20% of unoperated cases exhibited a slowly progressive course, the majority tend to plateau or improve spontaneously often for many years progression and recurrence of clinical features were most frequent in patients with diffusely narrow spinal canals This study included (30) patients with cervical spondylotic myelopathy. Their complaints were: Difficulty in handling fine objects, spastic gait disorder, neck pain, sphincteric disturbances and upper extremities pain or numbness. Patients were examined by plain radiography (all cases) and MRI (for all cases). In our series most patients (70%) were above 55 years old and (30%) of patients were below 55 years old. The age range form 31 to 70 years. Males were more affected (60%) than females (40%). The cervical spin. Consists of three atypical and four typical cervical vertebrae. Typical cervical vertebrae, C-3 to C-6, include a vertebral body, two pedicles, two lateral masses, two laminae, and a bifid spinous process . The seventh cervical vertebra is slightly different in that it has a transitional form; it has a larger spinous process that is not bifid. Atypical vertebrae include the atlas (C1), the axis (C2), and the 7th cervical vertebra (C7)(14). Typical cervical vertebra has a relatively small oval-shaped body that is wider mediolaterally than anteroposteriorly(14,15). The uncus or uncinat process, also known as the neurocentral lip, modifies the cylindrical shape of the body to become saddle-shaped(14,16). The uncinat processes are situated exactly laterally at the upper and middle cervical levels (C3 - C 5) and at the lower cervical vertebrae (C6 - C7) they become dorsolaterally with relatively lesser height. The uncinat processes		
4650	12146042		Epidemiological studies of Avian influenza in poultry in upper Egypt (Luxor, Qena) /	Ibrahim, Enas Mohamed.			2012 Behera province, as many provinces in Egypt, has been facing the problem of Spreading of small rural backyard poultry flocks with capacity ranging from the number of 500 to 10,000 birds (Sector 3: Small-Scale Commercial Production System and Sector 4: The Village or Backyard System (FAO 2007) beside the problem of continuous live birds markets persistence which due to inadequate governmental control on these sectors of production and commerce and also may be due to high rises in poultry prices after emerging of AI in Egypt that made small farming practices looks profitable to villagers, so this study was carried through the period from January 2010 to December 2011 on different districts of Behera province. A total of 300 cloacae fecal samples were taken from poultry (broilers, layers, local live chicken markets and free ranging village chickens) at during January 2010 till December 2011. Chickens were sampled opportunistically from various sources in Behera province		

							Also, data were collected using structured questionnaires including household information, poultry species, flock size and composition, poultry management system, type of housing and feeding, sources of feed and water, extent to which housing is shared with other species, and main sources of poultry. The questionnaires also captured poultry disease prevention measures, poultry disease prevalence and causes, poultry vaccination programs and their effectiveness, general poultry disease management and strategies for sustainable disease control, and extension service delivery. The current study was conducted to monitoring AI using commercially available rapid antigen detection test procedures in small-scale commercial poultry farms (sector3), free ranging village poultry and live birds markets in selected districts of Behera governorate and to investigate biosecurity practices in the examined small-scale commercial poultry farms (sector3) using a specially designed questionnaire directed to farms owners. In addition, determination of some epidemiological parameters including relative risk (RR), attributable risk (AR), odds ratio (OR) and omega measure was done. Lastly, application of the obtained results from epidemiological studies in prevention and control of AI in Behera Province as a model of the Egyptian Provinces as a whole research works on the structure and molecular biology of AIV during the last years . Such knowledge is crucial to understand the antigenic variability ,pathogenic molecular base and the mechanisms involved in the ability to infect and cause disease in several species, including human .All these aspects are essential for developing safe and more effective vaccines.(Noda, 2006). The virus is transmitted by direct contact between infected and susceptible birds or indirect contact through aerosol droplets or exposure to virus contaminated fomites (Easterday et al., 1997) Infection of domestic poultry by avian influenza (AI) viruses typically produces syndromes ranging from asymptomatic infection to respiratory disease and DROP in egg production to severe, systemic disease nearly with 100% mortality (Swayne and Halvorson, 2003; Allwright et al., 1993; Panigrahy et al., 1995; Swayne et al., 1996 and Jorgensen et al., 1998).The severity of gross lesions has been extremely variable, depending greatly on the host species, pathogenicity of the infecting virus, and presence of secondary pathogens. (Brugh and Beard, 1986; Capua, et al., 2000; Clavijo, et al., 2001 and Swayne and Beck, 2005).they exhibit diversity in morbidity and mortality . Therefore, as a preventive strategy against endemic as well as pandemic influenza, it is important to reduce the spread of H5N1 influenza A viruses in duck populations (Kim et al., 2008). Avian influenza viruses are generally non pathogenic in wild birds but sometimes cause significant morbidity and mortality upon transmission to other species, including domestic birds and mammals (Murphy and Webster, 1996 and Webster et al., 1992).Waterfowl represent the natural reservoir of all subtypes of influenza A viruses , including H5N1 . Ducks are especially considered major contributors to the spread of H5N1 influenza A viruses because		
4651	12146347	Doctoral.	The physiological response of Aluminum-stress on sorghum and maize plants under compost applied/	Mohammed, Nehal Mohammed Abd ElMobdy.		2015	The objective of study was to investigate the effects of AL ³ stress		A.M.Ismail, H.R.M.Galal.
4652	12146352		Prevalence of fascioliasis in slaughtered animals in Sohag abattoirs /	Mohammed, Mohammed Hussein.		2013	The present study was attempted to determine the prevalence rates of fascioliasis among farm animals and man, by using coprological and serological techniques as well as to compare between the excretory / secretory (E/S) and crude Fascioliasis, caused by Fasciola hepatica and Fasciola gigantica ,commonly known, as liver flukes, is a disease of herbivorous animals. It has a worldwide distribution in a large variety of grass-grazing animals as sheep, goats, cattle, buffaloes, horses and rabbits. In Egypt, donkeys and camels as well, are hosts for Fasciola gigantica. Fascioliasis may occasionally affect man (Haseeb et al., 2002; Sanad and Al-Megrin, 2005).antigens in the serological diagnosis by using ELISA technique. Fasciola ova were demonstrated in fecal samples of farm animals with prevalence rates amounting, to 18.0% buffalo, 14.0% cattle, 12.0% sheep, 9.0% goat and 0.0% equine. On the other hand, 5.0% of the examined human were proved to harbour Fasciola ova. While, in the serological examination, the results by using E/S antigen amounted to 20.0% buffaloes, 16.0% cattle, 15% sheep, 10% goat and 3.2% equine, while in human the results was 5%. On the other hand, the results obtained by using crude antigen amounted to 24% in buffaloes, 21% cattle, 17% sheep, 12% goat and 5% equine while in human the result was 8%. Also, about 1050 samples from different plants were collected to detect the percentage of infection of these pknts by encysted metacercariae. The results of examination were 1% in lettuce end 2% in watercress in Giza Governorate while in El-		

						Fayoum the result was 3% in watercress. Also, the laboratory examination of the snails collected from Abu-Rawash indicated that <i>L. cailliaudi</i> is domestic snail and play a great role in the transmission cycle of fascioliasis and none of <i>B. alexandrina</i> and <i>P. acuta</i> plays a role in transmission cycle in Egypt, <i>Fasciola gigantica</i> used to be the only species prevailing in domestic animals with considerable veterinary importance. Recently, it appears that <i>Fasciola hepatica</i> has been introduced to Egypt, possibly with living cattle and sheep imported from endemic countries (Allam, 1992). Fascioliasis give rise to important economic losses such as great expenses with anthelmintics, liver condemnation, production loss due to mortality, lower production of meat, milk and wool; reduced weight gain, and impaired fertility (Parr and Gray, 2000; Marques and Schroferneker, 2003). Fascioliasis becomes a public health disease that markedly affects human welfare in Egypt (Motawea et al., 2001). Two clinical stages are recognized in fascioliasis. An acute stage coincides with the larval migration and worm maturation in the hepatic tissues, and a chronic stage coincides with the persistence of <i>Fasciola</i> worms in the bile ducts (Haseeb et al., 2002) Fascioliasis is controlled by a combination of anthelmintic therapy and management measures. These methods are costly and may lead not only to anthelmintic resistance, but also to undesirable residues in food or the environment (Perez et al., 2002). Consequently, the control is one of the important aims in our work. Aim of the work: The present work is planned to study (1) The prevalence of fascioliasis in slaughtered animals in Sohag abattoirs. (2) Histopathological changes due to fascioliasis. (3) Parasitological examination to fasciola.		
4653	12146362	Studies on cysticercosis in slaughtered animals Sohag abattoirs /	Abdel-Aal, Hossam El-Din Kamal.		2013	Twenty-seven multigravous Holstein-Friesian cows in a commercial dairy herd were used to investigate the effects of feeding two complete diets differ in CP level, high (19.3%) or low CP (16.9%), with or without supplementation of protected methionine on productive and reproductive performance, milk composition, BCS, and blood metabolites. Therefore, outcome four groups were formed as follows: Group1 (7 cows): received high CP level (19.3% on DM basis) diet non-supplemented with pMet. Group2 (6 cows): received as that of group 1 diet, but supplemented with pMet. Group3 (7 cows): received low CP level (16.9% on DM basis) diet non-supplemented with pMet. Group4 (7 cows): received as that of group 3 diet, but supplemented with pMet. Protected methionine dose (12 g/cow/d) was designated to compensate partially the theoretically calculated deficiency level of methionine resulting from reducing dietary CP to the level (16.9% CP) that has been expected to achieve the target concentration of MUN (18 mg/dl) for optimal protein nutrition and reproductive performance. The main results can be summarized as follows: A. Nutrient digestibility coefficients and the nutritive values of the experimental rations: Except for EE, digestibility of nutrients was significantly improved by increasing dietary CP level. Consequently, the nutritive values (TDN, DCP, DE, ME and NEL) were significantly higher for high level of CP diets. On the other hand, digestibilities of DM, OM, CP, EE, CF and NFE were not affected by pMet supplementation. B. Milk yield: Feeding cows diets with decreasing percentage of CP decreased the milk production compared with those fed high dietary CP (32.6 vs 33.4 kg/d) in early lactation, but in mid or late stages of lactation it did not. Additionally, the production response to pMet supplementation was greater with the low level of CP diets compared with the high level (2.00 vs 0.300 kg/d, respectively This study was carried out to investigate the following: 1- Incidence of cysticercus species in slaughtered animals in Sohag abattoirs. 2- Predilection seats of <i>C. bovis</i> and relation between the incidence of <i>C. bovis</i> and sex, age, seasonal variation in examined carcasses. 3- Macroscopically and microscopically examination of infested meat samples. 4- Incidence of Taeniasis among human population in Sohag Governorate. 5- Compare the sensitivity of ELISA test with post-mortem		

4654	12146368		Morphopathological Studies on Liver in Fattening Calves in Egypt /	Mohamed, Amany Sayed Gaber.		2012	The present study aimed to evaluate some selective immunological, antioxidant and biochemical parameters as well as growth promoters effects of Saccharomyces cerevisiae supplementation as a feed additives in calves Thirty buffalo calves were divided into 3 groups. Group I: control one, Group II: treated orally with Saccharomyces cerevisiae (Sc) at a dose rate 30g once daily/calf for 12 weeks and Groups III: treated with 60g Sc once daily/calf for 12 weeks . The treatment with Saccharomyces cerevisiae resulted in significant increase in the body weight ,blood glucose level, total protein ,albumin and A/G ratio ,while AST, LDH activities, globulin concentration ,uric acid and creatinine levels are insignificantly changed. The level of MDA is significantly decrease .Meanwhile catalase , GSH level , serum lysozyme ,bactericidal activity and serum NO level are significantly increased .we are concluded that Saccharomyces cerevisiae treatment in the calves has desirable effects on the body weight , serum antioxidant enzymes and some immunological parameters. Also has no toxic effect on kidney or liver functions.In the present study, liver tissue samples for morpho-pathological studies were collected from slaughtered fattening calves aging from 2 to 4 years from Qena, Sohag, Giza and Cairo abattoirs. The samples were collected in a period from December 2008 to March 2012. After slaughtering, gross liver lesion in one hundred and fifty six cases from 1500 examined livers were found. These were classified pathologically in fattening calves into:I- Dystrophic changes:- It was found in four lesions (hydropic degeneration, fatty degeneration or change, glycogen infiltration and hyaline droplet degeneration). In cases of hydropic degeneration grossly, liver showed pale irregular area on its surface while microscopically, showed foamy appearance of its cytoplasm. In cases of fatty degeneration or change liver grossly, appeared yellow and greasy in ticture while microscopically, its hepatocytes overloaded with fat with lipofuscin pigment in addition to narrowing of blood sinusoids. In cases of glycogen infiltration, liver grossly, appeared firm in consistency while microscopically, hepatic cellwas vacuolated with H&E stain and PAS positive with PAS stain. In cases of hydropic degeneration, liver grossly, appeared reddish brown and firm in consistency while microscopically, the hepatic cell cytoplasm contained small homogenous eosinophilic materials II- congestion:- Grossly, liver appeared dark red in color and oozing blood on cut surface. Microscopically, all vasculatures of the liver were dialated and engorged with blood.		
4655	12146385		The politics of race and gender in the poetry of Nikki Giovanni and sonin sanchez/	Abbadly, Amel Mohammed Hssan.		2012	Resistance is the means of expression through which people declare their objection to distressing and depressing situations. Social, political, economic, and physical resistance to the condition of oppression permeates the history of the African American people. Intellectual resistance at the same time permeates the written record. The thesis represents the different strategies of resistance adopted by the African American poetess, Sonia Sanchez. The diversity of Sanchez's revolutionary poetry reflects the depth and progression of her thought with each new volume of poetry exemplifying a mind in transition. The thesis is divided into four chapters and a conclusion. The introduction, the first chapter deals with the background of the poetess and the history of oppression exercised against the African Americans. In the Second Chapter, "Oppression and Resistance", Sanchez enumerates the corruption, preservation and ills African Americans experienced as a result of the materialistic tendency of the century. Abstract - 2 - As a way of resistance, Sanchez is stressing the idea of identity. She is telling African Americans that Blackness is beautiful. However, she encourages people to take action as the means of fulfilling dreams and attaining a better future. The third chapter, "The Racist and Sexist Status of Black Woman" deals with the feminist concerns of Sonia Sanchez. It shows how women suffered and how negative images or stereotypes are always associated with Black woman. The legacy of struggle against racism and sexism is a common thread binding African American women. Sanchez asks African American women to embrace their Blackness. Blackness here means a way of living and turning away from acquired false western values. Sanchez stresses the need of Black women to love themselves and to love and respect their Black men		

4656	12146405		Study on some Microorganisms of public health hazards in some of locally manufactured cheese at Aswan city /	Ali, Amal Saad Mohammed,		2012	A total of 620 samples were collected from meat, meat products and human beings. Fourhundreds samples from meat and meat products were collected from supermarkets and butcher's shops (80 from each of meat, minced meat, luncheon, sausage and hamburger) while samples collected from human beings were 220 samples, 150 divided into 75 samples from each of hand swabs and stool specimens collected from some individual whom their occupation necessitate their contact and handling meat and meat products. Another 70 stool specimens were collected from patients suffered from severe gastrointestinal disturbances. Samples were prepared and examined bacteriologically for isolation and identification of pathogenic and potentially pathogenic microorganisms of family Enterobacteriaceae. The data presented in the aforementioned results could be summarized as following: Several pathogenic and potentially pathogenic bacteria were isolated from meat, minced meat, luncheon, sausage and hamburger. Types and incidence of these pathogens were represented as following: E.coli, Klebsiella pneumonia, Klebsiella oxytoca, Proteus vulgaris, Proteus mirabilis, Proteus rettgeri, Citrobacter freundii, Citrobacter diversus and Enterobacter spp with a percentages of 15.0, 8.8, 6.3, 15.0,12.5, 18.8, 6.3, 2.5 and 12.5% from examined raw meat, respectively. The microorganisms isolated from examined minced meat samples were E.coli, Klebsiella pneumonia, Klebsiella oxytoca, Proteus vulgaris, Proteus mirabilis, Proteus rettgeri, Citrobacter freundii, Citrobacter diversus, Salmonella Spp, Shigella Spp and Enterobacter Spp at a rate of 25.0,11.3, 6.3, 18.8, 6.3, 10.0, 18.8, 6.3, 2.5, 2.5 and 15.0%, respectively. Meanwhile, the types and incidence of microorganisms isolated from examined luncheon samples were represented as the following E.coli, Klebsiella oxytoca, Proteus vulgaris, Proteus rettgeri, Citrobacter freundii, Citrobacter diversus and Enterobacter Spp 35.0, 10.0, 12.5, 18.8, 10.0, 7.5 and 25.0%, respectively. Also, E.coli, Klebsiella pneumonia, Klebsiella oxytoca, Proteus vulgaris, Proteus mirabilis, Proteus rettgeri, Citrobacter freundii, Citrobacter diversus, Salmonella Spp and Enterobacter Spp were isolated with a percentage of 40.0, 8.8, 5.0, 13.8, 8.8, 10.0, 12.5, 13.8, 1.3 and 18.8%, respectively from examined sausage samples. Regarding hamburger samples the isolated organisms were E.coli, Klebsiella oxytoca, Proteus vulgaris,

4663	12147141		Effect of kisspeptinlo on the reproductive function in ruminants with Aspecial reference to endocrimeactions and postpartum ovarian activity/	Abdel- rahman, Ahmed Ezzat Ahmed.		2011	Effect of low dietary calciun on the metabolism of some macro-elements Ca,P,Mg,K,and Na)and some micro elements Cu,Zn,Mn,and Fe as well as on the digestibility of various nutrients were evaluated in three consecutive metabolic trials. The trials were carried out on six growing ruminants (two lambs, two kids and two camel) which have nearly the same age (9-12 months for lambs and kids and 1.5-2 years for camels and the same live body weight (av. 30, 15 and 175 kg) for lambs kids and camels, respectively. Lambs and kids were housed individually in metabolism cages while camels were housed in separate pens with fastened faecal collection bags. The animals were fed the control balanced diet (trial) for 33 days followed by the low calcium diet (trial 2) for the same period and then returned back to the control balanced diet (trial 3) for the same previous period. In trial 1 and 3 the calcium levels were 0.63, 0.63 and 0.67% DM of the diets for lambs, kids and camels, respectively, while in trial 2 the respective calcium levels were 0.15, 0.14 and 0.22% DM of the diets. The levels of other minerals were nearly similar in all trial.Fecal urinary and blood samples were collected along the three trials.		
4664	12147197		Epidemiological and immunological studies on chicken coccidiosis/	Osman, Nabila Mahmoud Mohamed.		2010	The prevalence of infectious coryza among different chicken farms at Assiut, Elmenia, Sohag, Kena and El-Wady-El-Gadeed Governorates was studied. Seven hundreds and thirty alive and freshly dead chickens of different ages and breeds were subjected to clinical, post-mortem and bacteriological examination. Isolated Haemophilus organisms were identified morhologically, biologically, biochemically, and serologically as Haemophilus paragallinarum serotype 2. Infected birds showed signs of nasal discharge, swelling of the infraorbital sinus, facial swelling, retardation of growth in growing birds and DROP of egg production in laying birds. The course of the disease in non complicated cases was 7-12 days but in complicated coryza the signs were sever and the course was extended up to 3-4 weeks. Isolated Haemophilus organisms were pathogenic to chicken embryos causing death within 24-48 hours with congestion of the dead embryos and its membranes. In chickens the pathogeficily of the isolates depended upon the route of infection, all 15 isolates were pathogenic to chickens by intrasinus inoculation but only 11 isolates were pathogenic by intranasal inoculation. Flocks showing atypical signs, lesions and course were complicated with Mycoplasma gallisepticum and E-coli. Experimentl mixed infections, by Haemophilus organisms and Mycoplasma gallisepticum or E-coli resulted in prolonged course, signs and lesions as those observed in the field. It was found that monovalent bacterins prepared either from serotype 1 or serotype 2 protect the vaccinated birds against challenge with homologous strains but not against heterologous strains which indicated that

4670	12151622		فعالية برنامج إرشادي لتخفيف حدة الشعور بالوحدة النفسية لدى عينة من أطفال الروضة المعاقين بصريا / حسين، منى رفاعي.			2012	أولاً : مقدمة الدراسة : إن طفل الروضة المعاق بصريا يعيش عالماً ضيقاً محدوداً نتيجة لعجزه ويود لو استمتاع التخلص منه والخروج إلى عالم المبصرين، فهو لديه حاجات نفسية لا يستطيع إشباعها، واتجاهات اجتماعية تحاول عزله عن مجتمع المبصرين إذ يشعر الطفل بأنه غير منسجم مع الآخرين وأنه بحاجة إلى أصدقاء وأنه ليس هناك من يشاركه أفكاره ويمتلكه إحساس بأنه وحيد ويشعر بإهمال الآخرين وهو ليس جزءاً من جماعة من الأصدقاء وأن الناس مشغولون عنه وأن علاقته بالآخرين لا قيمة لها. ثانياً : مشكلة الدراسة: يشكل الشعور بالوحدة النفسية مشكلة من المشاكل النفسية التي تحتاج من المهتمين بشئون الطفل إلى دراسة واهتمام. يمكن تحديد مشكلة الدراسة من خلال تساؤل واحد رئيسي هو : ما مدى كفاءة وفعالية البرنامج الإرشادي الذي طُبّق في هذه الدراسة لتخفيف الشعور بالوحدة النفسية لدى أطفال الروضة المعاقين بصريا ؟ ثالثاً : أهداف الدراسة :		

						تهدف الدراسة الحالية إلى : الكشف عن الأنشطة التي توظف خصيصاً لتعديل الشعور بالوحدة النفسية -1 للطفل المعاق بصرياً. التعرف على تصميم برنامج إرشادي لتخفيف الشعور بالوحدة النفسية لدى طفل الروضة -2 رابعاً : أهمية الدراسة : تتحدد أهمية الدراسة فيما يلي : الوقوف على برنامج إرشادي للطفل المعاق بصرياً في محاولة جاهدة لتخفيض حدة الشعور بالوحدة النفسية .. خامساً : فروض الدراسة : توجد فروق ذات دلالة إحصائية بين رتب درجات الأطفال في القياسين القبلي والبعدي في الشعور بالوحدة النفسية -1 توجد فروق ذات دلالة إحصائية بين رتب درجات الأطفال في القياسين البعدي والتتبعي في الشعور بالوحدة النفسية -2 سائلاً : حدود الدراسة : تشتمل حدود الدراسة على الآتي : تكونت عينة الدراسة من (10) عشرة أطفال من أطفال الروضة وتتكون من أطفال من الجنسين ذكور وإناث تتراوح أعمارهم ما بين 4 – 6 سنوات بالمركز النموذجي لرعاية المكفوفين بجسر السويس بالقاهرة . ب[بالنسبة لأدوات الدراسة : (مقياس الشعور بالوحدة النفسية . (إعداد : الباحثة 1) (استمارة بيانات شخصية . (إعداد : الباحثة 2) (المستوى الاقتصادي للأسرة . (إعداد : محمود منسي 3) ج[المنهج المتبع في الدراسة: المنهج شبه التجريبي لعينة الأطفال المعاقين بصرياً في الروضة حيث أنه يقوم على وجود مجموعة من الأطفال هي المجموعة التجريبية وذلك لتخفيف الشعور بالوحدة النفسية . سابعاً : نتائج الدراسة وجود فروق ذات دلالة إحصائية بين رتب درجات أطفال المجموعة التجريبية في القياسين القبلي والبعدي في الشعور • بالوحدة النفسية لصالح القياس البعد عدم وجود فروق ذات دلالة إحصائية بين رتب درجات أطفال المجموعة التجريبية في القياسين البعدي والتتبعي في • الشعور بالوحدة النفسية
4671	12151697	فعالية العلاج السلوكي في خفض بعض اضطرابات السلوك المدرسي لدي أطفال الروضة الموهوبين =	وزيرى، نهى أحمد فهمي..		2012	مشكلة الدراسة :- تثير مشكلة الدراسة العديد من الأسئلة :- 1- ما أكثر اضطرابات السلوك المدرسي إنتشارا لدي أطفال الروضة الموهوبين؟ 2- ما أسباب اضطرابات السلوك المدرسي لدي أطفال الروضة الموهوبين؟ 3- ما تأثير خفض بعض اضطرابات السلوك المدرسي علي الأطفال الموهوبين؟ 4- مافعالية برنامج قائم علي العلاج السلوكي في خفض بعض اضطرابات السلوك المدرسي لدي أطفال الروضة الموهوبين؟ 5- ما مدي إستمرارية برنامج قائم علي العلاج السلوكي في التأثير علي خفض بعض اضطرابات السلوك المدرسي لدي -5 أطفال العينة الموهوبين بعد فترة المتابعة؟ أهداف الدراسة :- هدفت الدراسة إلى التعرف علي برنامج قائم علي فعالية العلاج السلوكي في خفض بعض اضطرابات السلوك المدرسي (الحاجة المنخفضة للتحصيل – العدوان- التلق) لدي أطفال الروضة الموهوبين. أهمية الدراسة :- تتبع أهمية الدراسة من الإعتبرات التالية:- أهمية التعرف علي اضطرابات السلوك المدرسي للأطفال الموهوبين في مرحلة مبكرة باعتبارها المحور الأساسي لتكيف الطفل وتوافقه في الفصل الدراسي وبالتالي تؤثر علي موهبته تقديم برنامج قائم علي فعالية العلاج السلوكي في خفض بعض اضطرابات السلوك المدرسي لدي أطفال الروضة -2 الموهوبين أهمية ما تسفر عنه الدراسة الحالية من نتائج وتوصيات ومقترحات، قد تفيد العاملين في المجال التربوي لمساعدة هذه -3 الفئة من الأطفال الموهوبين ذوي اضطرابات السلوك المدرسي يمكن أن تستخدم نتائج هذه الدراسة من قبل العاملين في مجال الموهبة في علاج حالات أخرى مطابقة، أو تعديلها بحسب -4 طبيعة العينة والظروف التي يمكن تطبيقها عليها نتائج الدراسة :- توصلت الدراسة إلى النتائج التالية :- توجد فروق ذات دلالة إحصائية بين رتب درجات أطفال المجموعة التجريبية ورتب أطفال المجموعة المضابطة علي -1 قائمة السلوك المدرسي (الحاجة المنخفضة للتحصيل، العدوان، التلق) في القياس البعدي لصالح المجموعة التجريبية لا توجد فروق ذات دلالة إحصائية بين رتب درجات أطفال المجموعة التجريبية علي قائمة السلوك المدرسي (الحاجة -2 المنخفضة للتحصيل، العدوان، التلق) في القياسين البعدي والتتبعي
4672	12151893	الامن النفسي للأطفال وعلاقته بغياب الأب :	بربري، منى عبده أحمد.		2012	أهداف الدراسة :- (. حاضرى و غائبي الأب ومعرفة الفروق بينهما)التعرف على درجة الأمن النفسى لدى الأطفال -1 التعرف على مدى الإختلاف فى البناء النفسى للأطفال منخفضى ومرتفعى الأمن النفسى من حيث صورة الذات، قوة -2 الأنا، صورة (الأب الأم)، إدراك الواقع، الصراعات أهمية الدراسة :- تكمن أهمية الدراسة فى الإعتبرات التالية :- تناولها لإحدى الموضوعات البحثية المهمة فى الصحة النفسية وهو الأمن النفسى وعلاقته بغياب الأب فى مرحلة -1 الطفولة لدى طلاب المرحلة الأولى من التعليم الأساسى من الجنسين وإنعكاسها على نمو شخصياتهم والوقاية من الآثار السلبية المترتبة على ذلك تحاول الدراسة الحالية الوصول إلى مستوى التفسير الفاهم من خلال إستخدام المنهج الوصفى بالإضافة إلى المنهج -2 الكليليكي فى محاولة لكشف عن البناء النفسى للأطفال منخفضى ومرتفعى الأمن النفسى من حيث صورة الذات، قوة الأنا ،صورة (الأب/ الأم)، إدراك الواقع، الصراعات عينة الدراسة :- تقتصر عينة الدراسة على عينة قوامها (234) طفلاً (131 طفلة،103 طفل) وتوزعت تبعاً لغياب وحضور الأب إلى (130) طفل وطفلة من الأطفال غائبي الأب، و (104) طفل وطفلة من الأطفال حاضرى الأب. أدوات الدراسة :

							Rectal prolapse is a condition that has been fascinated surgeons for a long time. Despite its long recognition, the etiology & pathogenesis of true rectal prolapse remain controversial. But it is recognized that associated functional problems, such as incontinence and constipation, are common. Also the management of prolapse remains a challenging condition as there's no single ideal surgical treatment has been identified. There should be two primary objectives in treating these patients. The first is to carry out a procedure that safely corrects the prolapse with minimal morbidity, without mortality and with least recurrence rates, with preserving rectal, urinary and sexual functions. The second is to cure or significantly improve the associated incontinence and the underlying defecation disorder. This study included ten patients with complete rectal prolapse, 6 patients had constipation and 4 had incontinence. All patients were submitted to full clinical examination, sigmoidoscopy, barium enema and anorectal manometry. 4 patients had redundant sigmoid colon and were operated by resection rectopexy. The remaining 6 patients were operated by rectopexy alone, 2 with mesh and 4 with suture rectopexy.		
4676	12165997	Histomorphological and morphometrical studies on endochondral ossification in the Japanese Quail/	soilman, soha Mohammed Abdel latif.			2013	The prevalence of infectious coryza among different chicken farms at Assiut, Elmenia, Sohag, Kena and El-Wady-El-Gadeed Governorates was studied. Seven hundreds and thirty alive and freshly dead chickens of different ages and breeds were subjected to clinical, post-mortem and bacteriological examination. Isolated Haemophilus organisms were identified morphologically, biologically, biochemically, and serologically as Haemophilus paragallinarum serotype 2. Infected birds showed signs of nasal discharge, swelling of the infraorbital sinus, facial swelling, retardation of growth in growing birds and DROP of egg production in laying birds. The course of the disease in non complicated cases was 7-12 days but in complicated coryza the signs were sever and the course was extended up to 3-4 weeks. Isolated Haemophilus organisms were pathogenic to chicken embryos causing death within 24-48 hours with congestion of the dead embryos and its membranes. In chickens the pathogenicity of the isolates depended upon the route of infection, all 15 isolates were pathogenic to chickens by intranasal inoculation but only 11 isolates were pathogenic by intranasal inoculation. Flocks showing atypical signs, lesions and course were complicated with Mycoplasma gallisepticum and E-coli. Experimental mixed infections, by Haemophilus organisms and Mycoplasma gallisepticum or E-coli resulted in prolonged course, signs and lesions as those observed in the field. It was found that monovalent bacterins prepared either from serotype 1 or serotype 2 protect the vaccinated birds against challenge with homologous strains but not against heterologous strains which indicated that		
4677	12166049	Modeling and simulation of Different system topologies using dynamic voltage restorer (DVR) for investigating voltage sag compensation/	Ahmed, shazly Abdo Mohamed.			2014	The performance of a solar distillation unit using porous medium solar collector is the Subject of this work. the porous medium acts as a heat sink when the value of solar insulation is high and acts as an additional source of heat when the value of the solar isolation decreases (e.g. afternoons and nights) . In Addition the porous medium ensures the presence of a thin layer of saline water always completely wetting the surface exposed to solar radiation . The performance of the unit is modeled by three models the predicted result. are compared with experimental results obtained from a prototype of the solar distillation unit .the unit is operated using saline water-. the distillation process in this case is a desalination process. the three "models developed are the steady state model. The simplified model (short. Still) The generalized model The steady state model reasonably predicts the values of the water and glass. Cover temperatures in spite of this the predicted results of the steady state model are not. In good agreement with the experimental data with regard to the quantity of water' and still efficiency.		
4678	12166066	Prognostic factors after hepatic resection for hepatocellular carcinoma in cirrhotic liver /	Aly, Abdallah Mohamed Taha,			2013	The aim of this work is to evaluate clinical, surgical and pathological factors affecting the outcome after hepatic resection for hepatocellular carcinoma regarding hospital mortality, hospital mortality, morbidity, recurrence and overall survival. This study included 25 patients who were suffering from hepatic metastases from colorectal cancer. The were divided into 2 groups. 16 patients had hepatic metastases from previous colorectal cancer surgery (group A), 9 patients underwent synchronous resection of colorectal cancer and hepatic metastases (group B). Criteria for patient selection were:- 1. No evidence of extrahepatic metastases including control of primary site in group A. 2. Less than four metastatic lesions within the liver. 3. No evidence of celiac or portal lymph node involvement. History for each patient was taken including age, sex, symptoms, signs, and history of previous colorectal surgery in group A, examination of all patients was done including general and abdominal examination. Investigations: -including laboratory investigations, abdominal ultrasonography, CT abdomen & pelvis and colonoscopy or barium enema. 16 patients were admitted for hepatic metastasectomy and the choice of surgical procedure was dictated by the extent of liver disease (group A). 9 patients underwent synchronous resection of colorectal cancer and hepatic metastases (group B). follow up of the patients was done in the out-patient clinic for period ranged from 2-23 months, the mean follow up was 14.5 months.		

							Follow up included of physical examination, CEA level, liver function tests, and abdominal ultrasonography every 2-3 months. In absence of suspected relapse, chest x-ray and abdominal CT were performed at 6 monthly interval. Conclusion and recommendations		
4679	12166085		Stephen Greenblatt's critical theory :	Awad, Abdelnaim Ibrahim.		2013	The thesis adopts a twofold purpose: firstly, to examine the contributions of two major critical tendencies, namely New Historicism and Cultural Materialism, secondly, to examine the contributions of the critical enterprises of two considerable literary critics, namely the American New Historicist critic Stephen Greenblatt and the British Cultural Materialist critic Alan Sinfield, to the development of contemporary literary criticism. Moreover, the thesis attempts to provide a contrastive study between New Historicism and Cultural Materialism in general, and Greenblatt and Sinfield in particular. Generally speaking, the thesis adopts a historical orientation in order to trace the development of Cultural Studies towards the emergence of the New Historicist enterprise as well as tracing its evolution towards the rise of the Cultural Materialist project. Therefore, the thesis attempts to examine the historical background, the cultural formations, and the major influences that led to the emergence of New Historicism and Cultural Materialism in general, and Stephen Greenblatt and Alan Sinfield's critical enterprises in particular. Particularly, the thesis adopts a two-fold methodology: descriptive and contrastive. On the one hand, the thesis aims to represent the underlying theoretical assumptions as well as practical premises of New Historicism and Cultural Materialism especially those of Greenblatt and Sinfield. On the other hand, it attempts to establish a contrast between New Historicism in general and Greenblatt and Sinfield in particular. Trying to do justice to the main topic of the thesis, the analysis focuses on and contrasts the New Historicist politics of conservatism, particularly Greenblatt's entrapment model of subversion-containment as well as the Cultural Materialist politics of dissidence especially Sinfield's strategy of faultlines. Since the contrastive methodology constitutes the backbone of the thesis, the study inevitably works at three levels: the theoretical assumptions and the practical methodologies of New Historicism and Cultural Materialism; Greenblatt's and Sinfield's critical enterprises; and the politics of conservatism and the politics of dissidence. Moreover, the thesis represents the New Historicist conservative reading of literature in contrast to the Cultural Materialist dissident reading of it. Furthermore, the thesis focuses on Greenblatt's monolithic concept of power in contrast to Sinfield's multi-dimensional one. Strictly speaking, the thesis aims to historicize the New Historicist enterprise and the Cultural Materialist project in general, and Stephen Greenblatt's politics of conservatism as well as Alan Sinfield's politics of dissidence in particular. In other words, the thesis considers the historical circumstances, including the economic, political, social, cultural, academic, and literary atmosphere, which surrounded the emergence of American New Historicism and British Cultural Materialism in literary criticism as well as the emergence of their major representatives Stephen Greenblatt in North American academy and Alan Sinfield in British academy. Historicizing the two critical tendencies is of pivotal importance in order to grasp not only the bases of the theoretical assumptions and the critical practices of the New Historicist enterprise and the Cultural Materialist project but also the bases of the intellectual ideologies of their most Conclusion and recommendations		
4680	12166111		Role of endoscopic retrograde cholangiopancreatography in the Management of biliary strictures/	Mohamed, Mohamed Abdelshafy.		2013	ERCP is the most useful test for the definitive diagnosis of major bile duct complications. ERCP provides an accurate diagnosis in the vast majority of cases, it is usually more accurate than cholangiography via T-tube. In cases of retained or recurrent common duct stones and no T-tube in place, endoscopic sphincterotomy with stone extraction is the preferred treatment. ES is the procedure of choice for removal of common duct stones post cholecystectomy. A coordinated multidisciplinary approach to the diagnosis and treatment of patients with biliary injuries is now the standard. Endoscopic sphincterotomy still carries the incidence of some complications as perforation at the sphincterotomy site, hemorrhage pancreatitis and cholangitis. Perforation is the most devastating complication with an associated mortality of 25%.		
4681	12166149		Efficacy of Tamoxifen and L- carnitine on sperm ultrastructure and seminal oxidative stress in patients with idiopathic oligoasthenoteratozoospermia/	Ali, hassan Mohammed ibrahim.		2014	Ideally the infertile couple should be diagnosed and treated as a unit. It has been estimated that male infertility represents approximately 40–50% of the cases presenting to fertility clinics (Class, 1991; Irianni and Coddington, 1992). Evaluation of the male infertility is currently limited to assessment of a few aspects of sperm function and largely depends on descriptive criteria as the classical parameters of semen analysis: sperm concentration, motility, and morphology (Aitken, 1990; Tesarik and Testart, 1989). However, inter-laboratory, inter-clinician, inter-patient and intra-patient variabilities have questioned the usefulness of this 'agnostic screen' (Kruger et al., 1988; Freund, 1966; Fredricsson, 1979; Overstreet, 1984; Working, 1988). Investigators have also attempted to measure movement characteristics via computerized system for sperm track reconstruction (Aitken, 1990) and to apply hyperactivated sperm motility as an end-point of capacitation correlated with fertilizing capacity in animal model (Yanagimachi, 1994) as an additional correlate. Unfortunately, <24% of all human spermatozoa incubated 3 to 24 h conform to this model (Robertson et al., 1988). Simple and rapid assessment of male fertility is an objective which has eluded investigators since male infertility was first recognized. In truth, there may never be a single.		

4682	12166205		Flow characteristics in natural and compound channels with groynes /	Mostafa, Mona Mahmoud.		2013	In the present work, the heat transfer process of the closed two-phase offset thermosyphon is experimentally and theoretically studied. The experimental model is designed and constructed such that the effect of various parameters controlling the thermosyphon behavior can be studied. Inclination angles, filling ratio, the ratio between condenser to evaporator length and offset length are the operating parameters of the offset thermosyphon. The experiments are carried out for the value of heat flux of 7.35, 13.8, 22 and 28.3 kW/m² for each experiment. Water as working fluid is charged with a ratio of 25, 50, 75, 100 and 125% with respect to the evaporator volume for each thermosyphon configuration. The effect of offset length of 100, 130 and 180 mm is examined for each operating condition. The effect of inclination angles of -15 (ccw), 0 (vertical), 15, 30 and 45o are examined. Three different values of the ratio between condenser to evaporator length of 3, 1.5 and 1 are used. According to the measured values of the problem variables, the value of mean heat transfer coefficient is calculated. A correlation is proposed to estimate the Nusselt number as a function of Rayleigh number and problem parameters. Moreover, the thermal performance of elbow shape thermosyphon is experimentally and theoretically studied. The effect of problem parameters on heat transfer process is discussed. Filling ratio and the ratio between condenser to evaporator length, at vertical position, are the operating parameters of the elbow thermosyphon. In the theoretical model the governing equations describing the problem of heat transfer in linear thermosyphon are approximated to a set of linear algebraic equations using finite difference technique. Computer program is developed to solve these approximated governing equations. from the model, liquid film velocity, vapor velocity, liquid film thickness and wall temperature can be obtained. The agreement between the results of previous experimental works and theoretical results is fairly good in most investigated conditions. The theoretical model is used to predict the performance of offset and elbow thermosyphon by determining the equivalent linear thermosyphon for each type.		
4683	12166265		Comparative study of the efficacy and tolerability of three progesterone formulations (progesterone vaginal gel (Crinone 8%), progesterone vaginal suppositories and injectable progesterone) for luteal phase support during assisted reproduction /	Adel-Ghany, Mohammed Fathy.		2013	Aim of the work:- The aim of this study is to demonstrate the comparative efficacy and tolerability of 3 different progesterone formulations used for Luteal phase and early pregnancy support during assisted reproduction :- 1- Progesterone vaginal gel (Crinone 8%). 2- Progesterone vaginal suppositories. 3- Progesterone intramuscular injection. In order to establish the optimal formula and its route of administration for this purpose. a) To foretell the future management of patients with advanced east cancer depending on sound scientific oncological ormations rather than on emperical clinical trials ,a prospective in forty patients with advanced breast cancer. s study comprises clinical study including historY,examination and breasts,staging,investigations,histopathological biochemical assays for determination of estrogen receptors and protein estimation of biopsied Detenn1nation of estrogen and progesterone receptors in the specimens incl udes the following st eps :) Tissue storage in minus 700 Cf Freezer after trimming of fat and debris,transport on icetto laboratory and freezing in liquid nitrogen. Preparation of cytosol by pulverization of frozen tissue, addition of suitable buffer(phosphate for progesterone receptors and TED buffer for estrogen receptors),homogenization and centrifugation. samples are prepared as follows: (JH)-17 B-estradiol 104 Ci/riM for estrogen receptors or (JH)R5020 55.4 Ci/clu is added at 2 X 10-8M(final concentration in 2 microliter ethanol to 250 microliters diluted cytosol ,incubated' for overnight at 4°C. Parallel samples are preincubated for 10 minutes with a 100 fold excess of unlabeled 17 B-estradiol.		

4684	12167837		Campylobacteriosis among school children as one of zoonotic food- borne diseases /	Hassan, Asmaa gaber Mubarak.		2013	Microbiological study on some biogenic amines produced by food borne bacteria Biogenic amines are highly toxic substances that associated with food intake as a result of microbial decarboxylation process of amino acids. Several studies reviewed the role of food borne-bacteria in biogenicamines formation. So, this study was designed to aim the following items:- I. Microbiological evaluation of some food samples: I.1. Microbiological examination: Meat, fish, cheese, pasturma, luncheon and herring were randomly collected from local market at Mansoura city, Egypt. Total viable count, proteolytic bacteria and Enterobacteriaceae member were determined. Obtained data showed that the predominance of proteolytic bacteria among the other tested groups was noticed. Meanwhile, the Enterobacteriaceae came in the last order. I.2. selection of biogenic amines producers: During the isolation, the bacterial isolates are randomly chosen and enumerated in potassium phosphate buffer (pH 7.0). This buffer containing amino acids of histidine, ornithine and lysine either separately or in combined form as a sole source of nitrogen and carbon. After that, the pH values were measured as indication of histidine, ornithine or lysine decarboxylases enzyme. The data obtained showed that ten bacterial isolates were selected according to their activity to decarboxylase enzymes for further studies. 1.3. pH indications of decarboxylases activities as a function of NaCl concentration: The data obtained showed that histidine, ornithine and lysine decarboxylase enzyme were respond to 1 and 3% NaCl. Meanwhile, 5% of NaCl was suppressor for decarboxylases enzyme. I.4. Quantitation of biogenic amines in meat samples inoculated with selected bacterial isolates: It is showed from the data that isolate No. CK1 produced high amount of histamine (31.8 mg/100g sample), but it was less productive for spermidine compared to other. Also, it is found that isolate No. CHS1 was superior to the other examined strains in spermidine production that being 46.6 mg/100g sample. On the other hand, ?-phenylethyl amine was not found in inoculated samples with tested strains except isolate No. CHS2 that produced 0.173 mg/100g sample. Tryptamine was found in amounts of 0.55, 6.11, 8.47 and 4.30 mg/100g sample by isolate No. CHS1, isolate No. CK1, isolate No. CK2 and isolate No. CHS2, respectively. Cadaverine was produced by isolate No. CHS1, isolate No. CK1, isolate No. CK2 and isolate No. CHS2 in amount of 0.167, 0.467, 0.15 and 0.983 mg/100g sample, respectively. I.5. Identification of biogenic amines producers: The data obtained		
4685	12167852		vibriosis in siganus rivulates in red sea/	Ali, Essam Ali Nouredin.		2014	total of 360 apparently healthy and clinically abnormal tilapia and mullet fishes were collected from different brackish water fish farms around Qarun lake and Shakshouke village in El-Fayoum province. The specimens represented 240 fish samples caught from polyculture earthen ponds were examined for vibriosis affections. They included 60 apparently healthy with another 60 clinically abnormal tilapia spp. and 60 apparently healthy with another 60 clinically abnormal mullet spp. It was found that the prevalence of vibriosis covertly affected fish was 25% in tilapia spp. and 26.67% in mullet spp., while the prevalence of clinical cases of vibriosis was 23.33% in tilapia spp and 25% in mullet spp. In addition a total of 60 apparently healthy and 60 clinically abnormal tilapia spp. caught from monoculture earthen ponds located around Qarun lake and Shakshouke village in El-Fayoum province were examined for vibriosis affection. In order to compare the prevalence of covert and clinical cases of vibriosis in monocultured and polycultured tilapias. It was found that the prevalence of vibriosis covertly affected fish was 13.33% in monocultured tilapia spp and 25% in polycultured tilapia spp., while the prevalence of clinical cases of vibriosis was 35% in monocultured tilapia spp. and 23.33% in polycultured tilapia spp. Both tilapia spp and mullet spp. were subjected to clinical and post-mortem examinations for detection of vibriosis related clinical abnormalities and post-mortem changes. Vibriosis clinically affected tilapia spp. showed lethargy, skin darkening with some erosions and petechial hemorrhages on different parts of the body. Scale loss and tail and fin rot were also seen in some ones. Internally, congestion of liver, spleen and intestine with ascetic fluid in the abdominal cavity were detected. The detected signs and post-mortem lesions from vibriosis clinically affected mullet spp. were similar to those seen in tilapia spp. but more pronounced, wide spread skin hemorrhages, eroded fins, scale loss and congestion of internal organs like liver, spleen and intestine were clea		
4686	12167899		The role of Multi- Detector cT in diagnosis of urinary bladdder cancer/	Mahmoud, Hend Nabil .		2014	Aortic disease is a highly morbid set of conditions that requires prompt diagnosis and treatment. Aortic disease spans congenital aortic anomalies such as aberrant subclavian artery, right aortic arch, double aortic arch and coarctation; and acquired aortic disease including aortic aneurysm, aortic dissection, intramural hematoma, penetrating atherosclerotic ulcer, Takayasu arteritis, midaortic dysplastic syndrome and aortic leak.		

							The aorta can be imaged directly with a number of modalities: X-ray radiography, transesophageal echocardiography, single slice computed tomography (CT), magnetic resonance imaging (MRI), aortography, and multidetector computed tomography. Because some diseases of the thoracic aorta are life threatening, the aorta must be evaluated fully when pathology is suspected. For comprehensive diagnostic assessment of the thoracic aorta, the lumen, aortic wall, and periaortic region must be viewed to assess intraluminal, mural and extramural disease. Aortic pathology can involve any or all of these three locations. Imaging techniques must have the capability of evaluating the entire thoracic aorta as well as the origin of the arch vessels to define the extent of involvement. In some patients the status of the aortic valve and annulus also must be delineated. Imaging studies are needed for initial diagnosis and in some instances, for surveillance of disease progression over time. This study aimed to assess the current role of Multi-detector row Computed Tomography in the evaluation of thoracic aortic diseases. 60 nonconsecutive patients 42 male and 18 female ranged in ages from one month to 84 years were enrolled in this prospective study. All patients were referred for evaluation or further assessment of a known or suspected aortic disease. All patients were subjected to the following: - o Full history taking with special emphasis on history of renal impairment as well as allergy to contrast agents. - o Thorough clinical examination. - o The previous imaging modalities including plain chest x-ray and echocardiography are checked. - o Multi-detector row CT imaging adopting the following technique: - CT Angiography of the thoracic aorta. - Non-contrast MDCT of the thorax when IMH is suspected. - Two- and three-dimensional post-processing techniques (MIP, VRT, MPR and curved MPR). MDCTA examination revealed 75 different aortic pathology in 60 patients with congenital anomalies in 23 patients (38.33 %) and acquired pathology in 37 patients (61.66%). Among congenital anomalies; Coarctation was the commonest pathology noted (52 %); it was diagnosed 13 times out of 25 congenital pathology; followed by aberrant subclavian artery (6 times; 24%) then double aortic arch comes in the third place (4 times; 16%) and finally right aortic arch was diagnosed less often (2 times; 8%). Thoracic aortic aneurysm was the commonest aortic disease collectively (47 %) as it was diagnosed in 28 out of 60 patients enrolled in this study; and constituted about 62 % of acquired aortic pathology		
4687	12167930	Effect of intubation and anterior mucosal flap suspension on outcome of external dacryocystorhinostomy/	Elsoghair, Usama A.			2014	Summary Epiphora is a very troublesome symptom that may annoy the young as well as the old in both sexes. In uilt-1 In imiimgf fljiilinm (unpi'i ly, lull ikiiih ulnuM Hin hit liitml apparatus are needed. In this essay, the surgical anatomy, theories of tear conduction and pathology of diseases affecting the lacrimal drainage system are reviewed . A full account on the investigations of the lacrimal drainage system, which include a set of modalities ranging from the simple fluorescein dye Jones testing to the more sophisticated radionuclide and magnetic resonance imaging is discussed .The surgical techniques available nowadays for treatment of epiphora are: a) Excision of the sac (dacryocystectomy) F.xcision ofthe snc is indicated in: • Elderly patients with chronic or recurrent dacryocystitis. • Extirpation of a malignant tumour. b) Drainage into the nose (lacrimal bypass procedure) The conventional surgical approach to restore drainage when the blockage is at the distal end of the nasolacrimal sac is dacryocystorhinostomy (DCR).		
4688	12167968	Twenty four hours ambulatory blood pressure and duration of hypertension as major determinants for intima media thickness and atherosclerosis of carotid arteries/	Mustafa, Abd el-hakim erian.			2014	Portopulmonary hypertension is likely best defined as pulmonary hypertension with portal hypertension, whether or not that portal hypertension is secondary to underlying liver disease. Although cirrhotic liver disease is the most common cause of portal hypertension .A small minority of patients have another etiology for their disease, these include extra hepatic portal vein obstruction, non cirrhotic portal fibrosis and idiopathic portal fibrosis. This suggest that portal hypertension, not the underlying liver disease, is the underlying etiology of portopulmonary hypertension. Heamodynamically, portopulmonary hypertension is defined by the presence of the following feature in patients with portal hypertension: raised pulmonary arterial pressure (mean pressure determined by right-heart catheterization of >25mmHg at rest and >30mmHg during exercise); raised pulmonary vascular resistance (>240 dyne s-1 cm-5) in the presence of a pulmonary arterial occlusion pressure; or a left-ventricular end-diastolic pressure of less than 15mmHg. The number of new POPH cases have been increase with each passing years. There were 11 cases in 2002, 14 cases in 2003, 17 cases in 2004, 28 in2005, and 30 cases in 2006 .In addition, because of the significant implication for appropriate candidacy for liver transplantation, the disease Blood pressure monitoring is an important component of assessing as well as determining an individual's cardiovascular disease profile. Studies have shown similarities as well as differences in the performance levels between different blood pressure (BP) monitoring tools. Low degree of correlation between systolic or diastolic conventional blood pressure (SBPc		

							and DBPc respectively) and similar ambulatory blood pressure (AMBP) parameters has been reported in general population, untreated and treated hypertensive groups. This implies that for any given measurement, a conventional or clinic (BPc) value could be high when compared to that of AMBP or vice versa (Mancia et al., 2000). Bliziotis et al., suggests that while AMBP is as reliable as home blood pressure, the two are superior to BPc in their association with pre-clinical organ damage assessed by echocardiographic left ventricular mass index (Bliziotis et al., 2012). AMBP has demonstrated convincingly that it provides a more comprehensive picture and close representation of a patient's BP profile hence it is generally regarded as a more reliable tool at diagnosing target organ damage and cardiovascular events over and beyond BPc (Bliziotis et al., 2012; Dechering et al., 2009; Hansen et al., 2007; Majane et al., 2007; Wang et al., 2006; O'Brien et al., 2003; and Mancia et al., 2000). Despite the demonstrated reliability of AMBP over BPc reported in studies from our laboratory and others elsewhere, we have also shown in another study that a high quality, single visit, systolic BPc independently associates just as well with multiple organ changes of the heart, kidney and large arteries as AMBP (Woodiwiss et al., 2009). This investigation did not however include a measure of arterial wall thickness namely carotid intima-media thickness (C-IMT), a surrogate marker of atherosclerosis. The joint guidelines of the European Societies of Hypertension and Cardiology proposes C-IMT as an intermediate marker of target organ damage due to atherosclerosis (Mancia et al., 2007). This is consistent with a growing body of evidence that shows that CIMT may predict cardiovascular events such as myocardial infarction and stroke, both atherosclerotic related conditions (Kotsis et al., 2005; Lorenz 2006). In the Cardiovascular Health Study involving about 4000 individuals, those with thicker common and internal carotid intima media thickness were found to have a 5-fold higher risk of developing stroke and a 46% higher risk of developing myocardial infarction (Polak 2009). Investigations of associations between the blood pressure tools discussed above, AMBP and BPc with C-IMT would provide interesting and valuable information to clinicians and researchers alike. Only a few studies looking at such associations have been conducted but the dimension of a different ethnicity as well as the phase of epidemiological transition the study population is in has not considered. Most studies directly comparing associations of C-IMT with AMBP and BPc were conducted on Caucasian populations in the middle to late phases of epidemiological transition. One of the few such studies explored the associations of intima-media thickness (IMT) at both the carotid and femoral arteries with AMBP and BPc in a general population. In that study AMBP predicted C-IMT over and beyond highly standardized SBPc in models that included AMBP components additionally adjusted for SBPc and other co-variables. The BP measurements in that study however preceded the arterial ultrasound examination by a median of 26 months (Dechering et al., 2009). continue to receive increase attention		
4689	12167995	physicochemical studies on charge transfer complexes involving some pharmaceutical drugs/	Rabiee, ramadan Abd el- naim Mohamed.			2014	Applications of computational hueckel molecular orbital theory (hmo) to the basicities of some substituted pyridines, the nuclear magnetic resonance spectra of such compounds and the charge transfer stability and spectra of molecular complexes formed between pyridines and iodine molecules are reported. The different calculated electronic and energetic parameters of pyridine derivatives are interrelated with their corresponding experimental properties such as protonic acidbase equilibria, the proton chemical shift and the thermodynamic charge transfer complexes stability constants. Electronic adsorption spectra in the wavelength range of 250-750 nm were recorded for the mixtures solutions of the studied drugs (ATE, PCT, and ANP) with the α-acceptor iodine in the different chlorinated solvents: CHCl₃, CH₂Cl₂ and C₂H₄Cl₂. The electronic spectra of these mixtures solutions are characterized by the instance appearance of new bands which do not belong to the donors or acceptor, beside the presence of the iodine band [15,16,20] (located at around 500 nm in case of CH₂Cl₂), cf. Figs. 1-3. The new spectralband characteristic for the ATE-I₂ mixture solution in CH₂Cl₂ was located at 378 (cf. Fig. 1) and that of the ANP-I₂ mixture solution in CH₂Cl₂ was located at 418 nm (cf. Fig. 3), whereas the electronic absorption spectra of the PCT-I₂ mixture solution in CH₂Cl₂ was characterized by the appearance of two new bands located at 292 and 363 nm (cf. Fig. 2). In case of ATE-I₂ and ANP-I₂ interactions, it is worthy to mention that either of the donors (ATE and ANP) has no absorption		

							in the wavelength range that could perturb the resulting new band in each case. Thus the resulting new spectral band for each of these interactions (ATE-I2 and ANP-I2) located at 370 – 418 nm (cf. Figs. 1 and 3) could be assigned as a charge transfer (CT) absorption band. On the other hand, the broad spectral band located at around 500 nm in each ATE-I2 and ANP-I2 mixture solutions in CH₂Cl₂ (cf. Figs. 1 and 3) which is characteristic to the electronic transition of the free iodine [15,16,20] exhibits a hypsochromic shift as a result of complexation with the added donor. This observed blue shift of the free iodine band upon complexation could be attributed to a perturbation of the iodine molecular orbital (σ^*) by a repulsive interaction between the iodine molecule in the CT complexes [15,16, 20,21]. Accordingly, a more repulsive (energy) interaction would result in a large blue shift of the free iodine band and the new charge transfer band. It has been established that the hypsochromic shift of both the free iodine band and the CT band as a result of complexation parallels the equilibrium constant for the formation of the complexes [15,16,20] and the basic strength of the donors [15,16,20,21]. It is therefore reasonable to consider the extent of the blue shift in the CT band as being a measure of magnitude of the interaction between the donor and the iodine molecule. The above-described large blue shift in the free iodine band and the CT band (as a measure of the amount of CT interaction, i.e., complex formation) is increased. This behavior suggests that the compounds ATE and ANP mainly behave as n-donors. So that it is worthy to determine the ionization potentials of these donors molecules. By making use of the empirical relation of Alosi and Pignataro [102], the ionization potential (IP) of each donor (ATE and ANP) has been estimated from the energy of the corresponding CT transition. The calculated IP values of ATE and ANP are 7.66 and 7.20 eV, respectively, in CH₂Cl₂, c.f. Table 2, which indicate that the compounds ATE and ANP are CT donors of middle strength and the formed complexes are of the n-σ kind. The IP values of either ATE or ANP donors (c.f. Table 2) is lower than those of amines [103], which indicates that both of the compounds used, ATE and ANP, are not true amines and that these are CT donors of middle strength. Further, by applying Job's method [93], continuous variation method, for each drug donors/iodine interactions, the plot performs one maximum at ~0.5 mole fraction of [drug]/[drug-I₂] corresponding to the 1:1 drug:I₂ stoichiometric ratio in solutions (cf. Figs. 4 and 5). This stoichiometric ratio emphasizes that the formed CT complexes have the formulas ATE.I₂ and ANP.I₂ (outer CT complexes) or ATEI⁺.I⁻ and ANPI⁺.I⁻ (inner CT complexes).		
4690	12170252		Study on the prevalence and immunodiagnosis of schistosomiasis in Qena governorate/	Elsagheir, Asmaa Mohammed Ahmed.		2014	Nosocomial infection is one of the most common problems in hospitals and medical institutes especially for immunocompromised patients. Many pathogens are implicated in nosocomial infections, among them Enterobacteriaceae which can cause different types of infections. <i>Klebsiella pneumoniae</i>, as a member of Enterobacteriaceae, is highly prevalent in hospitals and causes many nosocomial infections at different organs of the body. Many studies paid attention to infections caused by <i>K. pneumoniae</i> due to its different virulence factors such as the presence of antiphagocytic capsule, as well as spread of multi-drug resistance among its clinical isolates in many countries. In the present work, Gram-negative isolates were collected from different hospitals in Cairo. Out of them, 102 isolates were identified as <i>K. pneumoniae</i> using both automated microscan and manual biochemical tests. Minimum inhibitory concentrations (MICs) for all <i>K. pneumoniae</i> isolates were determined according to CLSI guidelines to different classes of antimicrobials. There was high level of resistance among the isolates as 52 (51 %) isolates showed phenotypic resistance to extended spectrum beta-lactams. Confirmatory tests for extended spectrum beta-lactamases (ESBLs) were performed according to CLSI guidelines and all of them showed positive phenotypic results. Plasmid profile was performed for all ESBL-producing <i>K. pneumoniae</i> isolates by alkaline lysis method and the results showed different sizes and numbers of plasmids in the tested isolates		

4691	12172357	Glycogen storage diseases among pediatric patients/	Hassaan, Mohammed Hosny.	2014	PB19 is a very small (22 nm) non enveloped virus with a negative single-stranded DNA genome. It is the only member of the family parvoviridae known to be pathogenic in humans. The only natural host cell of PB19 is the human erythroid progenitors. In healthy individuals, the major presentation of PB19 infection is erythema infectiosum. However, in patients with underlying hemolytic disorders, infection is the primary cause of TAC. In immunosuppressed patients, persistent infection may develop that presents as PRCA and chronic anemia. In utero infection may result in hydrops fetalis or congenital anemia. Moreover, PB19 infection may be implicated in the development of childhood acute leukaemia (Weir, 2005). This study attempts to confirm the relation between the human PB19 infections as one of the predisposing factors of aplastic crisis in patients with haemolytic anaemias and its association with acute leukaemias. To reach that; we retrospectively investigated 85 pediatric patients selected from the Hematology Out Patient Clinic and inpatient unit of Mansoura University Children's Hospital. Ten healthy subjects with matched age and sex were included as controls. Patients were classified into five groups. group I included 25 patients with hemolytic anemia in aplastic crisis, group II included 20 patients with hemolytic anemia without aplastic crisis, group III included 20 leukemic patients under chemotherapy, group IV included 20 patients of recently diagnosed acute leukemia and 10 healthy subjects as controls in group V. All patients were subjected to proper history taking, full clinical examination to evaluate the fever, pallor, rash, HSM and LN. Routine laboratory investigations were performed including complete blood count, reticulocytic count, ESR and serum bilirubin (Total & Direct). Serological testing of PB19 antibodies (IgM and IgG) using ELISA were done to all cases and control groups. Detection of PB19 DNA was performed by PCR to 8 patients from the group of hemolytic anemia with aplastic crisis, 18 patients of acute leukemia receiving chemotherapy and 20 patients of recently diagnosed acute leukemia. In the present study; age and gender had insignificant differences among studied groups (P= 0.75, P=0.77 respectively). There was statistically significant difference in the prevalence of PB19 IgM (P= 0.02), IgG (P= 0.01) and PCR (P= 0.004) among studied groups. In group I IgG had the highest positive rate (56%) followed by IgM (36%) and PCR (25%). Also, in group II IgG had the highest positive rate (35%) followed by IgM (5%). This higher prevalence of PB19 IgG antibodies among patients with chronic blood		
4692	12172370	prevalence , clinical and histopathological features of steatohepatitis in chronic hepatitis C virus/	Helal, Mohamed Mounir.	2014	Hepatitis C virus (HCV) is considered to be the leading cause of liver disease in human. The poor survival after diagnosis has led to the introduction of screening programs and ultrasound scanning. Unfortunately, the results of programs are still unsatisfactory. Hence there is a need for powerful markers for early diagnosis. This study was conducted on two groups of patients admitted to Mansoura University Hospitals, thirty one of them were cirrhotic patients, and the thirty seven were suffering from hepatocellular carcinoma (HCC). In addition to 20 healthy subjects were selected as control group being without past history of liver disease and their age range was (26–60) and seventeen of them were female and the other three were male. The following investigations were performed to study the following parameters: a- Full clinical history and examination : b-Biochemical investigation : The results revealed the following findings: 1-In the hepatic cirrhosis group 1.serum albumin , serum bilirubin : There was a significant decrease in serum bilirubin versus health subjects. 2.liver enzyme tests : There was a significant increases in serum Aspartate aminotransferase (AST) (u/l), Alanine aminotransferase (ALT) (u/l) and Alkaline phosphatase (ALP) (KAU). 3.serum prothrombin time : There was a significant increases in serum (PT) (second) versus control. 4.Serum Alphafetoprotein and ferritin : There was a significant increase in serum Alpha-fetoprotein (AFP) (ng/ml) and serum Ferritin (ng/ml) II-In hepatocellular carcinoma group 1.serum Albumin : A significant decrease in serum albumin (gm/dl) comparable to the cirrhotic and healthy groups. 2.serum bilirubin : There was a significant decrease in serum bilirubin (mg/dl) versus healthy subjects and non significant increase versus cirrhotic patients. 3.liver enzyme tests: Liver enzyme activities showed a significant increases in (ALP) (K.A.U) versus healthy subjects and cirrhotic patients and (AST), (ALT) (u/l) increases significant versus healthy subjects but decreased non-significant versus cirrhotic patients. 4.Serum prothrombin time : There was a significant increase versus control subjects but a non significant increase versus cirrhotic patients. 5. Serum AFP and Ferritin : There was a significant increase in AFP versus control subjects and cirrhotic patients while Ferritin increased significant versus control but non significant versus cirrhotic patients.		
4693	12172383	Epidemiological study of major neurological disorders in Qena governorate , Egypt/	Zaki, Ahmed fathy.	2014	cases or malignant gastric tumours were registered in Kasr il-jiliny Center of Radiation Onco-logy and iuclear Medicine (WisMROCK) during the period of 1970 - 19d4 . They constitute 0.55 percent of the total malignant cases . Tyey were 59 males and 53 females with sex ratio of 1.11 : 1.The mean age for male patients was 51 i 19 years and for fema-les 47.7 * 19.9 years • The most common pathological type was adenocarcinoma . The majority of patientb present with aodominal pain, vomiting ,weight loss,anorexia and dyspepsia • The main line of treatment is surgery which was performed in 79 cases , while radiotherapy was used in 61 cases, chemotherapy alone was used in 16 patientb • Finally , 14 cases received no active treatment . All these results direct the attention to the necessity 01 establishing accurate cancer incidence and mortality statistics in our country.		

4694	12178050	master.	Geology of Gabel Nuqara, central eastern desert, Egypt/	Hassan, Thatwat M.S.		2015	Gabel Nuqara Area , central eastern desert, egypt, is covering an area of about 200 km² and bounded by latitudes 26° 38 00 and 26° 4500 N .the dokhan volcanics are divided into two occurrence (northern southern) that separated by Qena- Safaga asphaltic road and comprise.	16/3/2015. 4695	12179851		Automatic detection of human face under different imaging conditions/	Ahmed, Mourad elsayed khalil.		2015	Detection of human faces within images an important role in many facial image related applications such as face recognition verification facial expression analysis pose normalization and 3D face reconstruction . Detection of Human faces within images plays an important role in many facial image- related applications such as face recognition/verification, facial expression analysis, pose normalization, and 3D face reconstruction. The performance of these applications is usually to a large degree dependent on accuracy of face detector. Detection of faces is easy for human beings; however, for machines it is not an easy task at all. The difficulty comes from high inter-personal variation (e.g., gender, race), intra-personal changes (e.g., pose, expression), and from acquisition conditions (e.g., lighting, image resolution). Despite the considerable amount of the previous studies on the subject, face detection is not completely solved and it remains a very challenging task. The existing methods need improvements in their accuracy, and a novel robust method that can work under various imaging conditions are required. In this thesis, we propose a new approach that brings us a step closer to this goal The principal objective of this thesis is to investigate a novel approach toward robust automatic face detector in uncontrolled imaging conditions. We propose an efficient approach that efficiently combines generalized Hough transform by Random decision Forests. Random forests (RF) have become a popular technique for classification, prediction, studying variable importance, variable selection, and outlier detection. There are numerous successful applications examples of RF in a variety of fields, such as object detection, pedestrian detection, and object tracking and action recognition. Random Forests are probabilistically efficient technique that can operate quickly over large datasets The proposed Hough forests can be regarded as task-adapted codebooks of local appearance with a randomized selection of features which allows fast supervised training and fast matching at test time, codebooks are built upon a pool of heterogeneous local appearance features, In this thesis, a codebook is learned for the face appearance features that models the spatial distribution and appearance of facial parts of the human face. We train a Random decision Forest that directly maps the image patch appearance to the probabilistic vote about the possible location of the face centroid; the detection hypotheses then correspond to the maxima of the Hough image that accumulates the votes. The Random decision forests construction and prediction abilities depend on the model parameters. The parameters that most influence the behavior of a decision forest for detecting faces are studied through experiments on a large set of publicly available datasets. And an extensive evaluation of the proposed approach on various databases shows the usefulness of the method. In comparisons with the state-of-the-art, we show that the suggested method improves the detection rate and accuracy outperforming the state-of-the-art methods.		
4696	12179866		On the bacterial-challenged medical culicid culex pipiens (Diptera: Culicidae) via isolation and molecular characterization of an inducible antibacterial gene/	Ali, salwa ibrahem sebak.		2015	Insects represent one of the Most successful groups of evolution within the animal kingdom (About 65% of all animal species) in terms of species number accounting for nearly one million species and 1018 individuals .		

						insects represent one of the most successful groups of evolution within the animal kingdom (about 75% of all animal species) in terms of species number, accounting for nearly one million species and 1018 individuals. Insects are exposed to a wide range of microbes throughout their life cycle and some species feed on animal or human blood infected with microorganisms and parasites. The amazing diversity and evolutionary success argue for an effective system of defense against infections. During evolution, insects developed a complex and effective innate immune system, which apparently differs from the adaptive immune system of vertebrates. However, there is no evidence for clonal selection mechanisms in insects and their immune system that shows no memory, their defense mechanisms are rapid, lasting up to a few days, and offering a particularly powerful resistance to microbial infections (Royet, 2004; Ratcliffe et al., 2011 and Vilcinskis, 2013). Mosquitoes significantly contribute to insect biodiversity and biomass, representing around 3500 described species, a few hundreds of them pose serious medical and economical risk (Fang, 2010). Mosquitoes are unquestionably the most important arthropod vectors of disease. The maintenance and transmission of pathogens that cause malaria, lymphatic filariasis and numerous viral infections are absolutely dependent on the availability of competent mosquito vectors (Youdeowei and Service, 1983). Like other insects, mosquitoes have highly effective immune systems that protect them from pathogens such as bacteria or fungi (Marquardt and Beaty, 1996) Immunity is the capability of the body to resist harmful microbes from entering it. Defense against infection is divided into two main forms termed innate immunity and adaptive immunity. The innate defense mechanisms are present in different forms in all multi-cellular organisms while adaptive defense mechanisms have evolved more recently in vertebrates. In vertebrates, the interaction of innate and adaptive immune mechanisms is essential for the generation of effective immunity to infection (Macpherson and Austyn, 2012). Innate (natural) immunity: This is a first-line defense system of multi-cellular organisms (both vertebrates and invertebrates) mounted in response to various microbial invaders such as bacteria, fungi, and viruses (Kimbrell and Beutler, 2001; Hoffmann, 2003; Kim and Kim, 2005; Haghayeghi et al., 2010 and Merklings and van Rij, 2013). Insect innate immune responses include cellular and humoral responses. The cellular arm involves haemolymph coagulation, melanization, phagocytosis and encapsulation processes

4698	12179952	دور رياض الأطفال في تحقيق التربيـه الاقتصاديـه لأطفال ما قبل المدرسه/	فرغلي، سميـه محمود محمد.	2014	وسعت الدراسة الحالية إلى اختيار صحة الفرضين الآتيين: يوجد فرق دال إحصائي بين متوسطي درجات القياسين القبلي والبعدي للمجموعة التجريبية في مقياس المفاهيم -1 الاجتماعية المصور في اتجاه القياس البعدي. توجد فروق إحصائية بين المفاهيم الاجتماعية قيد الدراسة من حيث قوة تأثير البرنامج المقترح في تمييزها لدى أطفال -2 المجموعة التجريبية. وذلك من خلال المنه شبه التجريبي في البحث حيث تم استخدام تصميم المجموعة الواحدة ذات القياسين القبلي والبعدي التي تكونت من(35) طفلاً تتراوح أعمارهم بين (4-5) سنوات بروضة الأطفال الملحقة بمدرسة تلـه الابتدائية بنات(2) بمدينة المنيا ، واستخدمت أداتين رئيسيتين هما : مقياس المفاهيم الاجتماعية المصور و برنامج مقترح لتنمية تلك المفاهيم و كليهما لأطفال مرحلة ما قبل المدرسة ومن إعداد الباحثة، وقد أسفرت الدراسة عن: 1- فاعلية استخدام القصص الإلكترونية في تعليم أطفال ما قبل المدرسة بصفة عامة و في تنمية المفاهيم الاجتماعية لديهم -1 بصفة خاصة. وجود اختلافات بين المفاهيم الاجتماعية (قيد الدراسة) لدى أطفال مرحلة ما قبل المدرسة من حيث درجة تأثرها -2 . باستخدام القصص الإلكترونية من خلال البرنامج المقترح			

						2014	تتناول البحث شرح لأنواع الأخشاب المختلفة المحلية والمستوردة، والصناعات التي استخدمت فيها هذه الأخشاب وطرق زخرفتها في مصر على مر العصور كما تضمن شرح الطرق المستخدمة في البحث والتفتيح عن الآثار المظمورة في التربة والآثار المغمورة تحت سطح الماء كما تناول أهم الطرق العلمية المستخدمة في تاريخ الآثار وأجريت دراسة تطبيقية لتاريخ عيّنات من الأخشاب المصرية القديمة وكذلك تاريخ أخشاب المركب التي تم اكتشافها في منطقة مسنود 1978 وطريقة الحفلات السنوية للأشجار بمعامل التاريخ بغزنا وتناول أيضا دراسة الخواص التشريحية والفيزيائية والميكانيكية والكيميائية للأخشاب، وكذلك الطرق المستخدمة في فحص الأخشاب والتعرف على نوعها والتعرف على مظاهر وعوامل تلفها كما تناول شرح الواد المستخدمة في علاج وصيانة الأخشاب وكذلك الطرق المستخدمة في علاج الأخشاب المستخرجة من الماء أو التربة الرطبة، وأجريت الدراسة التطبيقية العملية لعلاج عيّنات من أخشاب المركب موضوع البحث بطرق العلاج المختارة وهي : طريقة السكروز وطريقة البلمرة بالإشعاع وطريقة القفونية الذائبة في الأسيتون وطريقة البولي إيثيلين جليكول، ونوقشت النتائج	
4699	12179974		تقييم دور موارد التقوية في علاج بعض أنواع الأخشاب الأثرية :التألفه :	علي، محمود سيد محمود.		2014	تتناول الرسالة: الحرية والسلطة من حيث السيادة فيها للشرعية المنبثقة من قيم الجماعةفقطهر مبدأ تقيد سلطات الحاكم وخضوعه لمبدأ الشرعية التي بمقتضاها ينصل القانون بمجرد صدوره عن إرادة من وضعه والامر يختلف في النظام الإسلامي عنه في النظم الوضعية فإن كل محايّد ومنصف يعلم علم اليقين أن الإسلام له فضل سبق في ارساء وترسيخ مبدأ المشروعية فقد كان النظام السياسي الإسلامي أول نظام حد من سلطات الحاكم . أهم الصعوبات :- تتناول الرسالة: الحرية والسلطة من حيث السيادة فيها للشرعية المنبثقة من قيم الجماعةفقطهر مبدأ تقيد سلطات الحاكم وخضوعه لمبدأ الشرعية التي بمقتضاها ينصل القانون بمجرد صدوره عن إرادة من وضعه والامر يختلف في النظام الإسلامي عنه في النظم الوضعية فإن كل محايّد ومنصف يعلم علم اليقين أن الإسلام له فضل سبق في ارساء وترسيخ مبدأ المشروعية فقد كان النظام السياسي الإسلامي أول نظام حد من سلطات الحاكم . أهم الصعوبات :- إن هذا الموضوع فتنأوله العديد من كبار الفقهاء الدستوريين كانت هذه ذاتها عقيّة واجهت الباحث والصعوبة الأخرى هي وعندما قامت ثورة الخامس والعشرين من يناير وهذا أدى إلى توقف تام في البحث صدر قرارات من قبل القوات المسلحة مثل تعطيل العمل بأحكام الدستور ويؤلى المجلس الأعلى للقوات المسلحة غداة شئون البلاد بصفة مؤقتة لمدة ستة أشهر أو انتهاء انتخابات مجلسي الشعب والشورى ورئيس الجمهورية حل مجلسي الشعب الشورى وتشكيل لجنة لتعديل بعض مواد الدستور وتحديد الاستفتاء عليها من الشعب وبعد صدور النتيجة بموافقة الشعب المصري على الدستور وإدخال بعض التعديلات وتم تشكيل لجنة تأسيسية لوضع الدستور "لجنة المائدة" ولكن لعدم دستورية قانون مجلس الشعب تم حل المجلس وتم حل اللجنة التأسيسية بحكم من محكمة القضاء الإدارى وانتهى عمل اللجنة بإصدار دستور جديد للبلاد وتم تحديد مناهج متنوعة مثل المنهج التاريخ والمنهج التحليلي والمنهج الوصفي وهذه المناهج هي الأساس في الاعتماد على تقديم البحث .	
4701	12180811		فعالية التقنيات التربوية على تعلم مهارات الركل والحصول المعرفى فى رياضة كرة القدم لدى طلاب كلية التربية الرياضية بقنا / حسين، الشريف محمد أحمد.			2015	مقدمة ومشكلة البحث : يزايد الإهتمام بعلم النفس الرياضي في الآونة الأخيرة ؛ حيث أصبح يهتم بالجوانب التطبيقية لنظرياته ومبادئه وذلك للاستفادة من السلوك والخبرة ؛ الأمر الذي قد يسهم في تطوير الأداء الرياضي وتسهيل أفضل النتائج في المنافسات الرياضية. وقد تزايد في السنوات الأخيرة إستخدام برامج تدريب المهارات العقلية psychological skills training program مع الرياضيين مع إختلاف مستوياتهم ونوع النشاط الرياضي والمرحلة السنية وفي هذا المعنى يشير راينز مارتنيز (rainer martens,1987) إلى أن برنامج تدريب المهارات العقلية يعد جزءا رئيسيا وهاما لبرنامج التدريب الرياضي، ويعتبر ضرورة أن يتم تطبيق هذا البرنامج على نحو متوازى مع برنامج التدريب البدني والمهارى والخططى، ويقترح أن يتضمن المهارات العقلية التالية (التصور العقلي، تنظيم الطاقة النفسية، إدارة الضغوط، تركيز الانتباه، وبناء الأهداف). والتدريب العقلي يسهم في تعلم واكتساب المهارات الحركية بجانب تنمية المهارات العقلية ؛ حيث يقدم في المرحلة الأولى الإطار الكلي للمهارة المراد تعلمها والمعلومات المرتبطة بها وفي المرحلة الثانية يساعد من خلال التصور العقلي على تنمية وإتقان المهارة من خلال التبادل مع الأداء الحركي وفي المرحلة الثالثة يسهم في عزل كافة مشتتات الإنتباه والتركيز على الأداء. كما شهدت السنوات الحديثة تزايد إشتراك الناشئ في برامج الرياضة التنافسية للأنشطة المختلفة، ويتوقع أن يصاحب ذلك أعباء التدريب أو ما يطلق عليه التدريب المكثف وما يتطلبه من بذل الكثير من الوقت والجهد كما زادت الحاجة إلى تدريب المهارات العقلية على نحو لا يقل عن الإهتمام بالتدريب للقدرات البدنية والمهارية والخططية. ويرى محمد العربي شمعون، وماجة محمد إسماعيل (2001م) أنه من الواجب تعليم المهارات العقلية للناشئين بنفس الطريقة التي يتم بها تعلم المهارات البدنية والفنية، وإذا حدث مثل ذلك فإن اللاعب الناشئ يمكنه إستخدام هذه المهارات وتطويرها منذ الصغر مما يساعد على الارتقاء بمستوي الأداء بطريقة أفضل من طريقة المحاولة والخطأ، وسوف يمتلك اللاعب الناشئ حصيلة كبيرة من المهارات العقلية والتي إذا تم تطويرها في توقيت مناسب يمكن الإستفادة منها في حياة الرياضية. شهد العالم في السنوات الأخيرة جملة من التحديات المعلوماتية ذات أبعاداً تربوية، حيث شكلت هذه التحديات بإبعادها المختلفة منطلقاً لدعوات عديدة بضرورة إصلاح النظام التربوي بجميع مداخله وعلياته ومخرجاته. ومع بداية القرن الحادى والعشرين لمسنا تطورات هائلة في مجال التعليم والتكنولوجيا والإصالات والمعلوماتية ، ومن أبرز تلك المجالات استخدام التقنيات الحديثة في مجال التنمية الإقتصادية والإجتماعية، ويجب أن يستفيد التعليم من التقنيات الحديثة من أجل تحقيق التنمية وإعداد القوى البشرية اللازمة، وذلك لمزيد من الإستفادة من التقدم العلمى. ويعد استخدام التقنيات التربوية في عمليّتي التعليم والتعلم من أحدث المجالات التي تعمل على تطوير وتحسين العملية التعليمية، فالتقنيات التربوية تعتبر نموذج متكامل ذو أنماط متعددة يستخدمه المعلم مكملاً لنوره في التعليم ومساعدته في مواجهة العديد من المشكلات كمرعاة الفروق الفردية بين المتعلمين والمساهمة في تقديم برامج متميزة تساهم في تحسين عملية التعلم وتعمل هذه التقنيات التربوية في تكامل لمعالجة المنهج، ولإثراء العملية التعليمية، وإثارة عقل المتعلم مما يساعد على الإتيان لعملية الشرح، والتركيز، والإستيعاب، والإسترجاع. كما أننا في حاجة ماسة إلى دراسة المداخل المختلفة لإيجاد العلاقات التطبيقية في مجال التقنيات التربوية والتربية الرياضية، بحيث يجب أن تنال رياضة كرة القدم حظها من إستخدام هذا الأسلوب فينتقل التدريس من أساليب تعتمد على الشرح والنموذج والتلقين، إلى أساليب أخرى تجعل من المتعلم إيجابياً في العملية التعليمية بحيث تسهم في إكتسابه لمهارات الحركية في رياضة كرة القدم. وبالرغم من بداية الألفية الثالثة لم تدخل التقنيات التربوية إلى حيز التنفيذ في النظام التعليمي للتربية الرياضية، على مستوى مراحل التعليم المختلفة، إلا بعض المحاولات لأبحاث علمية على مستوى كليات التربية الرياضية، ولم تطبق نتائجها ولم تخرج إلى حيز التنفيذ. وتعتبر الشغافيات من أكثر أنواع التقنيات التربوية إنتشاراً وطواعية في عملية التعليم والتعلم، وهي وسيلة تعليمية تؤثر في السلوك المعرفي للمتعلم حيث تساهم في الربط بين النواحي المرئية والنواحي التجريدية للمهارة الحركية سواء ككل أو كأجزاء.	
4702	12181259		الأفعال المركبة مع djf في اللغة المصرية القديمة : محمد، شيماء عبدالستار أحمد.			2014	تناولت الرسالة دراسة لغوية تجمع بين الأفعال المركبة مع [djf] في اللغة المصرية القديمة في عصرها المتأخر والقبطي، وأمكن من خلال الدراسة الوقوف على دلالات وضع الفعل في اللغة المصرية القديمة وعلاقته بالفعل المركب معه.	

						وكما تناولت فصول الرسالة دراسة وتحليل عدد من الأمثلة الخاصة بكل فعل مركب مع djt وأوضح معنى الفعل قبل وبعد إسناد djt له وبين وإذا كان هذا الفعل لازم أو متعدى والدور الذى أضافه تركيبه مع djt فى هذا السياق حيث دخول djt على أى فعل تحول معناه وبالتالي فهو يتحول من فعل لازم إلى فعل متعدى لمفعول، والمتعدى إلى متعدى لمفعولين. وأوضحت الدراسة أن دخول الفعل djt على الفعل فى اللغة المصرية القديمة فى العصر المتأخر (سواء فى ال L.E. أو الديموطيقية) لا يغير من بناء الفعل الصوتى سواء كان الفعل ثنائى أو ثلاثى أو رباعى صحيحاً أو معطلاً أو مشدداً إنما يغير معناه بالكامل فيصبح الفعل معنوى، وذلك على خلاف ما حدث فى القبطية حيث أن دخول الفعل † على جذر الفعل ظهر لنا تركيب جامد يختلف عن الفعل المشتق منه، ولكن لم يغير فى جذر الفعل شئ. واهتمت الرسالة بتوضيح وشرح الصيغة الفعلية الخاصة بكل مثال ذكر فيه فعل مركب مع djt لتحديد إذا مكان تركيب الفعل مع djt فى ال L.E. أو الديموطيقية غير من شكل الصيغة الفعلية وتركيبها أم لا، فأتضح للباحث أن جميع الصيغ الفعلية التى ورد معها أفعال مركبة مع djt لم يحدث بها أى تغير فيما عدا صيغتي الأمر والنهى (نفي الأمر)، حيث أن الأفعال المركبة مع djt عندما تأتى بصيغة الأمر منها تكون imj sdm والمفعول المباشر الذى يتبعه يكون ضمير متصل، أما النهي فالأفعال المركبة مع djt لها أكثر من طريقة للنهي.					
	2015	تناولت الدراسة تاريخ تطور آلة العود العربى وتاريخ تطور آلة العود الغربى. تناولت أساليب العزف على آلة العود العربى وأساليب العزف على آلة العود الغربى والإضافات التى أدخلت على آلة العود العربى. أوضحت تسوية أوتار العود فى البلاد الأوروبية وتسويتها فى البلاد العربية. اختبرت اللجنة من المؤلفات الغربية وعزفها والتمارين التدريبية المقترحة للعزف على التسوية الجديدة. عرضت لنموذج من المؤلفات العربية وعزفها ثم ناقشت النتائج.				حسين، عمر عبد الستار أحمد. عبدالله، وائل محمد الصغير أحمد.	برنامج تدريبي لتحسين الأداء على آلة العود من خلال بعض الأجناس العربيه لدى عيئه من طلاب كلية التربية التوحيه بقنا/تقديم الأداء الإدارى فى ضوء إدارة الوقت للقاتمين على النشاط الرياضى بجامعة جنوب الوادى/	4703	12181332		
	20145	هدف البحث :- يهدف البحث إلى وضع إستراتيجية مقترحة للأنشطة الطلابية بإدارات رعاية الشباب بجامعة أسبوط فى ضوء إدارة الوقت وذلك من خلال التعرف على:- الواقع الفعلي للأنشطة الطلابية بإدارات رعاية شباب جامعة أسبوط فى ضوء إدارة الوقت. احتياجات الطلاب من الأنشطة الطلابية بإدارات رعاية شباب جامعة أسبوط فى ضوء إدارة الوقت. تساؤلات البحث:- إدارة الوقت. ما الواقع الفعلي للأنشطة الطلابية بإدارات رعاية شباب جامعة أسبوط فى ضوء إدارة الوقت؟ ما احتياجات الطلاب من الأنشطة الطلابية بإدارات رعاية شباب جامعة أسبوط فى ضوء إدارة الوقت؟ إجراءات البحث :- منهج البحث :							4704	12181338	
	2014	استخدم الباحث فى دراسته المنهج الوصفي (الدراسات المسحية) بخطواته وإجراءاته وذلك لمناسبته لهذه الدراسة وأهدافها هدف البحث :- مما لا شك فيه أن رياضة الكاراتيه Karate من الرياضات التى تتميز بكثرة وتنوع الأساليب الدفاعية والأساليب الهجومية للتكويته القتال الفعلي ، أما الكاتا القتال الوهمي فلها خصوصية فى مكوناتها فهناك جملة حركية مركبة مثل "بصاي – داي كاتا BASSAI-DAI" مكونه من 42 حركة وتؤدي فى 60 ثانية بينما "كانكوا- داي كاتا Kunku-Dai" مكونة من 65 حركة وتؤدي فى 90 ثانية ،هنا نجد أن هناك تباين فى زمن الأداء للجلتين بالإضافة أن عدد الحركات المكونة للجلتين مختلف مما يشير أن حجم الحمل المنفذ للجلتين غير متساوي، مما دفع الباحث لأجراء الدراسة للمعرفة أثر استخدام المقطوعات التدريبية عند تنفيذها وتنفيذها بالأسلوب الفردي والمزدوج على مستوى الجملة الحركية للاعبين رياضة الكاراتيه.							4705	12181996	
	2015	يهدف البحث إلى المساعدة على سرعة إلتقان عظمه القص والعصلات العاملة عليه، وكذلك تحسين الحالة الوظيفية والبدنية لعصلات القص الصدري المتأثرة من جراحة القلب المفتوح ، الحد من الآلام المصاحبة لحركات المريض ، رفع كفاءة عضلة القلب بعد الجراحة . وأجريت هذه الدراسة على عينة بلغت100 فرد ممن أجريت لهم عملية جراحة القلب المفتوح . حيث كان عدد المستفيدين من العينة 86 فرد وهؤلاء كانوا من غير المنتظمين فى الجلسات وذلك لعدة أسباب خاصة بانتمائهم الجغرافي والتكلفة الباهظة للتنقل والحركة، وعدم قدرتهم على تحمل مثل هذه الأعباء، ليصبح العدد الكلى للعينة 14 فرد منهم 9 أفراد مجموعة تجريبية و5 أفراد مجموعة ضابطة.				عبد المعطى، سارة عباس قاسم.	تأثير برنامج تأهيلي حركى لحالات جراحه القلب المفتوح/	4706	12181999		
	2015	واستخدم الباحث المنهج التجريبي لملامنته لطبيعة الدراسة والهدف منها، حيث تم تصميم البرنامج ووضع المحاور الخاصة به.									
		وأشارت أهم النتائج إلى اختفاء آلام المريض والتنام عظم القص خلال الثلاثة أسابيع الأولى من الجراحة التى تعقب الخروج من العناية المركزة ، أن لأجهزة العلاج الطبيعي (التنس – الليزر- الموجات فوق الصوتية) تأثير كبير على التنام عظم القص واختفاء الألم فى خلال الثلاثة أسابيع الأولى بعد الجراحة مباشرة، عودة المطاطية الطبيعية لعضلات الرقبة والبطن الصدر ، وكذلك رفع القوة العضلية لعضلات الرقبة والبطن الصدر . و زيادة قوة وكفاءة عضلة القلب. وعلى ذلك أوصى الباحث بضرورة تطبيق أجهزة العلاج الطبيعي (التنس – الليزر- والموجات فوق الصوتية) على المرضى بعد جراحة القلب المفتوح									
	2015	يهدف البحث إلى تصميم برنامج تعليمي باستخدام الوسائط المتعددة للتعرف على تأثير استخدام البرنامج التعليمي على تعلم المهارات الفنية الإرشادية وتأثير استخدام البرنامج التعليمي على تعلم بعض جوانب التربية الصحية والاسعافات الأولية وتأثير استخدام البرنامج التعليمي فى التحصيل المعرفى للمهارات الفنية الإرشادية وفى ضوء أهداف البحث وجد الباحث أنه توجد فروق ذات دلالة احصائية فى القياسين البعدين بين المجموعة الضابطة والمجموعة التجريبية الأولى فى التحصيل المعرفى والناحية العملية للمهارات الفنية الإرشادية والتربية الصحية والاسعافات الأولية وقد استخدمت الباحثة المنهج التجريبي لمناسبتة لطبيعة البحث ومن خلال تحليل نتائج البحث توصلت الباحثة الى استخدام البرمجية التعليمية أكثر فاعلية وإيجابية للمتعلين عن الصور المسلسلة وشريط الفيديو والأسلوب التقليدي كما ساعدت الوسائط المتعددة المعلم على تقليل الجهد والوقت وشرح المهارات واتاحة الفرصة أن يكون دوره ايجابياً فى تصحيح الأخطاء كما نجد أن المجموعة التجريبية تفوقت على المجموعة التجريبية الثانية التى استخدمت شريط الفيديو عن المجموعة التجريبية الأولى التى استخدمت الصور المسلسلة عن المجموعة الضابطة التى استخدمت الأسلوب التقليدي مستوى التعلم والتحصيل المعرفى للمهارات قيد البحث.				ثلثوت، إبراهيم أحمد على محمد.	تأثير برنامج تعليمي باستخدام الوسائط المتعدده على بعض المهارات الاساسيه لكرة السله والتحصيل المعرفى لدى تلاميذ الحلقة الثانيه من التعليم الاساسي/	4707	12182006		
	2015	يهدف البحث إلى إعداد برمجيه تعليميه معده بخرائط الشكل(٧)ومعرفة تأثيرها على الذكاء الحركي والجانب المعرفي والمهارى لبعض المهارات الاساسيه قيد البحث لدى الطالبات فى كره السله. قد استخدمت الباحثة المنهج التجريبي بتصميم المجموعتين احداهما تجريبية والاخرى ضابطه وتطبيق القياسات القبليه والبعديه للمجموعتين نظرا لمناسبتة لطبيعة البحث وتحقيقا لأهداف البحث وفروضه.				عطينو، مختار عبدالله. هريدى، محمد السيد عبد الحميد.	فعاليه استراتيجيه الشكل (٧)على مستوى الأداء المهارى لبعض مهارات كره القدم بدرس التربية الرياضيه لدى تلاميذ الحلقة الثانيه من التعليم الاساسي/	4708	12182020		
	2014	استهدف البحث إلى وضع منهج مقترح للتربية الرياضية للمرحلة الإعدادية من منظور تطوير المحتويين التعليمي والتربوي للألعاب الجماعية وذلك من خلال:					منهج مقترح للتربية الرياضيه وفقاً لنظام الفتره بالمرحله الاعاديه/	4709	12182025		
	2015										

						التعرف على مدى أهمية الأهداف العامة للتربية الرياضية للمرحلة الإعدادية المحددة والموضوعة من قبل الوزارة التعرف - على مدى ملائمة محتوى المنهج الحالي للألعاب الجماعية والأهداف التعليمية للمرحلة الإعدادية التعرف على مدى ملائمة محتوى المنهج الحالي للألعاب الجماعية والأهداف التربوية للمرحلة الإعدادية بناء المنهج المقترح للتربية الرياضية للمرحلة الإعدادية في ضوء تقويم المنهج الحالي وبما يتناسب وخصائص المرحلة استخدم الباحث المنهج الوصفي والتجريبي طبقاً لطبيعة هذه الدراسة، استخدم المنهج الوصفي كمرحلة أولى لوصف ما هو قائم والتوصل إلى المنهج المقترح ، واستخدم المنهج التجريبي كمرحلة ثانية لتجريب المنهج المقترح على عينة الدراسة مستخدماً التصميم التجريبي لمجموعتين إحداهما ضابطة والأخرى تجريبية وذلك على عينة من الموجهين الأوائل للتربية الرياضية للمرحلة الإعدادية على مستوى الجمهورية. وتم اختيار العينة التجريبية من تلاميذ المدارس التجريبية للغات بالقازيق. واستخدم الباحث (الملاحظة المقابلة الشخصية – القراءات			
4710	12182034	رؤيه مقترحه لتطوير اقسام التريبه البدنية فى ضوء بعض الاتجاهات الاداريه المعاصره بالمدارس الابتدائيه بدوله الكويت/	العازمي، ريم عبدالله حمود.		2015	تحديد الاحتياجات التعليمية لاستخدام التقنيات التربوية لطالبات بقسم التربية البدنية والرياضة بكلية التربية الأساسية بدولة الكويت، وضع برنامج مقترح للتقنيات التربوية في ضوء احتياجات الطالبة المعلمة.			
						استخدمت الباحثة المنهج الوصفي باستخدام الاستبيان علي مجموعة من الطالبات المعلمات بكلية التربية الأساسية بقسم التربية البدنية والرياضة بدولة الكويت عددهن (32) طالبة معلمة بالفرقة الرابعة بالفصل الدراسي الثاني 2009 / 2010.			
						وكانت أهم النتائج اعتماد البرنامج التعليمي المقترح لاستخدام التقنيات التربوية لأهميتها في درس التربية البدنية والرياضية .			
						المتابع لمجريات الأمور يلاحظ أن مايشهده العالم المعاصر من تطور سريع الخطى وتباين دولة وشعوبه في ادراك هذا التطور واللاحق به قد لايمكن تفسيره الا من خلال تباين تلك الشعوب والثقافات في ادراك اهمية الوقت ومدى ترشيد استخدامه ، فالمطورون ينظرون الى هذا العنصر بكل تقدير وعناية فهم يضعون لكل لحظة من لحظات الزمن حساباً للإستبان به ، أما من هم دون ذلك فالوقت بالنسبة لهم مجرد ظاهرة طبيعية تروح وتغدو بلا نهاية ولا ينقصها شيء مما يشتهك من ايام او سنين تمر دون عمل مثمر او نشاط هادف ، فعلاوة على ان كل تصرف يقوم به الفرد في حياته لابد له من وقت يستغرقه ، نجد ان استغلال الفرد للوقت المتاح بكفاءة وفعالية يعد من اهم المعايير الفاصلة بين التصرفات الادارية الرشيدة وماعداها من تصرفات .

4735	12196831		Sero-prevalence of influenza virus type A among migratory birds/	Eldamrany, Nahla Mohamed.		2014	Avian influenza (AI) is a worldwide viral disease of poultry (Easterday et al., 1997). AI viruses have been isolated from numerous wild and domestic avian species (Alexander, 2000) and the order Anseriformes including ducks, geese and swans are regarded as the primordial reservoir hosts of these viruses (Hinshaw et al., 1980). AI is a zoonotic, globally important disease, predominately of birds, caused by segmented negative-strand RNA viruses of the Influenza virus A genus, in the Orthomyxoviridae family (Webster et al., 1992; Alexander, 2007a). Avian influenza viruses (AIVs) are classified as either highly pathogenic avian influenza (HPAI) or low pathogenic avian influenza (LPAI), based on their virulence in domestic poultry. During the past decade, HPAI H5N1 viruses emerged in Asia causing outbreaks in poultry and cross-species transmission to human (Ellis et al., 2004; Chen et al., 2005; Liu et al., 2005; Gilbert et al., 2006; Kilpatrick et al., 2006). Wild aquatic birds are considered the reservoir for all subtypes of (AIVs), with most infections thought to be unapparent (Webster et al., 1992). Wild bird populations represent the natural reservoir for all known hemagglutinin (HA) and neuraminidase (NA) subtypes of AI virus (Webster et al., 1992). Wild and migratory birds, particularly Anseriformes and Charadriiformes, play an important role in the epidemiology and ecology of AIV (Olsen et al., 2006; Munster et al., 2007; Stallknecht et al., 2007; Artois et al., 2009), as do movements of poultry and poultry products (Sims et al., 2005; Webster et al., 2006). A wide range of LPAI subtypes is known to circulate in numerous wild birds species (Easterday et al., 1968; Slemons et al., 1974; Webster et al., 1976; Hinshaw et al., 1980), and they are believed to perpetuate in aquatic bird populations (Suss et al., 1994). So, bird to bird and bird to mammal transmission may result in the establishment of influenza viruses in new hosts, with some possibly evolving into HPAI viruses in poultry (Haromoto and Kawaoka, 2001). The claim that migratory birds are responsible for the long-distance spread of HPAI H5N1 rests on the assumption that infected wild birds can remain asymptomatic and migrate long distances (Gilbert et al., 2006). Migratory water birds were at the top of the list of suspects for the spread of H5N1 viruses (Normile, 2005; Webster et al., 2006) especially after the discovery of thousands of Bar-headed Geese (<i>Anser indicus</i>) killed by HPAI H5N1 in Qinghai Lake, China (Chen et al., 2005; Liu et al., 2005). Migratory routes of birds are grouped together as "flyways" to assist international management and conservation efforts 1- Serosurveillance of AI in migratory birds collected from Naser lake, Al alaqi, Ballana village and Saluga and Ghazal (protected area) 2- knowing risk management and the protection of especially free-ranging poultry. 3- investigate the occurrence of AIV infections in wild birds in Aswan Province in the South of Egypt. 4- The results of such investigation are very important for knowing the risk incidence of transmission of influenza virus type A from migratory birds to our domestic birds.		
4736	12196955		"Morphological Analysis of the Pyramidal Cell Dendrite Structure"/	ALSAYED, ALSAYED ABDELHAMID MOHAMED.		2015	Dendritic trees come in many shapes and sizes. Although similarities in dendritic morphology is often used to classify neurons into discrete subtypes, no two dendritic trees are exactly same: individual dendritic segments appear tortuous and rather arbitrary in the locations of branch points. The morphologies of dendrites directly influence synaptic integration and neuronal excitability. The passive properties of dendrites can present barriers to effective propagation of voltage signals from distal synaptic locations to the soma and axon, where action potentials are generally initiated (Rall and Rinzel, 1973). The intrinsic conductance and capacitance of dendritic membrane weakens and broadens synaptic potentials in a distance-dependent manner that is exacerbated by the asymmetry of tapering dendrites (Rinzel and Rall, 1974). However, tapering dendrites also have progressively decreasing diameters and surface areas, which will increase the local input impedance and reduce local capacitance at more distal dendritic locations (Rall and Rinzel, 1973; Kubota et al., 2011). By generation of large and fast local synaptic responses at distal locations, tapering dendrites limit the functional impact of voltage attenuation in dendritic trees, a process known as "passive normalization," and optimize the conduction of synaptic currents within dendrites (Cuntz et al., 2007). According to Mainen and Sejnowski (1996), the structure of dendritic trees also influences the excitability of neurons and the pattern of action potential output even when dendritic trees have the same total dendritic length and surface area (van Elburg and van Ooyen, 2010). By influencing the transfer of current between soma and dendrites, the geometry of dendritic branch points can regulate the impact of variable dendritic topology on synaptic integration and excitability (van Ooyen et al., 2002). The morphological data of Kubota et al., (2011) revealed several conserved morphological characteristics of dendritic trees common to 4 subtypes of neocortical interneurons examined in rat prefrontal cortex. First, cross-sectional areas at any given point within a dendrite were proportional to the summed length of all dendritic segments distal to that point. Consistent with this observation, total cross-sectional area was almost perfectly conserved at bifurcation points. Second, dendritic cross-sections became progressively more elliptical at more proximal, larger diameter, dendritic locations. Further Computer simulations revealed that these conserved morphological features in interneurons limit distance dependent filtering of somatic Excitatory Postsynaptic potentials (EPSPs) and facilitate distribution of somatic depolarization into all dendritic compartments (Kubota et al., 2011).		

							Because light microscopy lacks the resolution to accurately measure dendritic dimensions at the sub μm level, we combined light microscopy (LM) and reconstructions of serial electron microscopy (EM) to compare dendritic dimension and shape in distinct types of neocortical pyramidal cells. These data were compared to that obtained from densely spiny dendritic bifurcation points of non-labelled pyramidal dendrites in rat prefrontal cortex. Further, we studied the microtubules organization in bifurcation points of these pyramidal neurons. The aim of this study is to investigate the morphological principles potentially underlying the morphology of dendritic trees in cortical principle neurons, pyramidal neurons in rat prefrontal cortex.		
4737	12196959	"Morphological Analysis of the Pyramidal Cell Dendrite Structure"/	ALSAYED, ALSAYED ABDELHAMID MOHAMED.			2015	Dendritic trees come in many shapes and sizes. [] وتحققت أيضًا نتائج الفرض الثاني من خلال وجود فروق ذات دلالة إحصائية عند مستوى 0.01، في الاتجاه نحو التسامح مع الآخر لصالح التطبيق البعدي ، وقد بلغت قيمة إيتا أعلى من 20، مما يشير إلى ارتفاع حجم تأثير البرنامج المستخدم في الدراسة الحالية على الطلاب عينة البحث		
4739	12196988	صورة المرأة في الرواية العبرية المعاصرة :	متولي، محمد محمد أحمد محمد.			2014	لم تكن المرأة بعيدة عن المعضلات التي واجهها المجتمع الإسرائيلي ، بل كانت طرفا من أطراف تلك المعضلات ، وخاصة أن صراع المرأة لم يكن فقط مع المجتمع ، بل كانت المرأة أيضا في حالة صراع مع الديانة اليهودية التي كبلتها بقيود عديدة ، أرادت المرأة أن تزيح عن كاهلها مثل هذه القيود. ونظرا لأهمية دور المرأة داخل أى مجتمع ، فقد اهتمت جزء كبير من الأدباء العالمية بالمرأة ودورها في المجتمع ، فلم يخل أى أدب من الالتفات ناحية المرأة دراسة ونقدا. والأدب العبري بطبيعة نشأته وتطوره مصوغ بصبغات متنوعة ومتعددة متأثرة بالأدب المختلفة ، وعليه فقد سار على نهج الأدب الأخرى تتناول المرأة في كافة درويهِ.		

							المجتمع الإسرائيلي ليس كغيره من المجتمعات في أي دولة أخرى من الدول التي لها ثقافة تاريخية متوارثة , ولها طابع انشائي في طبيعة العلاقات المتبادلة بين أفرادها , وإلما يقتد لمثل هذه العوامل التي تجعله مجتمعا متوأمنا , فهذا المجتمع لم يكن إلا ماثية البوثة التي انصهر فيها اليهود القادمون من البلدان المختلفة –شرقية كانت أم غربية– وكان يهودي كان قائما وفي جعبته ثقافته التي اكتسبها من المجتمعات القدام منها فحاولت الصهيونية طمس كل هذه الثقافات وإخفاء معالمها وإعادة صياغتها كثقافة جديدة ينتهجها الجميع. يمكن القول إن الصهيونية قد نجحت في صياغة هذا المجتمع إلا أنها لم تفلح في محو خطوط التماس المتواجدة بين فئات المجتمع , وهذا يعني أن هذا المجتمع ظل يحمل هوية الثقافات المتعددة. ومن ثم صار هذا المجتمع أرضا خصبة لولادة العديد من المشكلات التي تتعلق بواقع الطوائف والثقافات المتعددة في هذا المجتمع . ومن هنا صار الأدب العبري بمختلف ألوانه يضرب بفتناته ليصنع لنا سجلا مكتنا بالصور الحقيقية التي يعيشها هذا المجتمع مستخدما الرمزية تارة والواقعية تارة أخرى.		
4740	12197034	بعض مشكلات الحياة اليومية للمكفوفين في المجتمع المصري :	محمود، أسماء حسين أحمد.			2014	تتناول هذه الدراسة بعض مشكلات الحياة اليومية للمكفوفين في المجتمع المصري وهي دراسة اجتماعية ميدانية لحالات مختارة من الشباب الجامعي، وتهدف إلى التعرف على المشكلات التي تواجه المكفوفين في حياتهم اليومية وكيفية تكيفهم معها. تتمثل الأهمية النظرية لهذه الدراسة في محاولة تقديم إضافة علمية للمكتبة الاجتماعية في مجال ذوي الإعاقة البصرية. وتتمثل الأهمية التطبيقية لهذه الدراسة في محاولة تقديم مقترحات لحل مشكلات المكفوفين في محافظة قنا لتنفيذها على أرض الواقع يتمثل المجال المكاني للدراسة في كلية الآداب بجامعة جنوب الوادي بمحافظة قنا. أما المجال البشري فتمثل في عينة الدراسة والتي بلغت (خمس وأربعين) طالبا وطالبة من المكفوفين بمرحلة الليسانس والدراسات العليا بكلية الآداب بقنا. وبالنسبة للمجال الزمني فإن هذه الدراسة استغرقت نحو خمس سنوات ونصف استخدمت الدراسة منهج المسح الاجتماعي واختارت عينة عمدية بلغت 45 طالبا وطالبة من المكفوفين والكفيفات بلغ عدد الذكور 30 طالبا وعدد الإناث 15 طالبة من طلاب كلية الآداب بقنا جامعة جنوب الوادي طبقت عليهم دليل دراسة الحالة. وقد أظهرت نتائج الدراسة مدى تنوع المشكلات التي تواجه المكفوفين في حياتهم اليومية فمن المشكلات الجامعية عدم طباعة الكتب الجامعية بطريقة برايل وهي الطريقة التي يستخدمها المكفوفون للقراءة والكتابة فيضطر الطالب الكفيف إلى إعادة نقل الكتب وكتابتها من جديد أو تكليف بعض الأشخاص بتسجيلها صوتيا وقد أظهرت النتائج وجود بعض المشكلات الاجتماعية منها نظرة المجتمع للمكفوفين والتي تنسم بالشفقة أو عدم الوعي بقدراتهم. ومن المشكلات الأسرية قيام بعض الأسر بتدنيل الابن الكفيف أو إهماله أو إخفائه وحرمانه من التعليم

During embryonic development, the mesenchymal tissue transformed into a cartilage template and the bone tissue is formed on remnants of this cartilage tissue. The growth cartilage of the long bone is formed of chondrocytes which secrete and maintain the surrounding cartilage extracellular matrix. The chondrocytes of the growth cartilage are organized into three dynamic zones; resting, proliferative and hypertrophic zones. Resting cells act as stem cells for the proliferative chondrocytes. The proliferative chondrocytes undergo a continuous division and differentiation into hypertrophic chondrocytes. Hypertrophic chondrocytes die by a mechanism described by many authors as apoptosis; however some recent studies confirmed the hypertrophic chondrocytes die by non-apoptotic modes of physiological	#####	Prof. Dr. GAMAL KAMEL MOHAMED ALI Dr. YASSER ABDEL GALIL AHMED Dr. EMAN AHMED ABDEL RHEEM
4743	12197184	التدريس الفرقي مقارنة بالتدريس الفردي: دراسة التحصيل في اللغة الإنجليزية كلغة أجنبية والاتجاهات لدى تلاميذ المرحلة الابتدائية/	إسماعيل، نجوى يسين محمد.			2014	تناولت الدراسة أثر استخدام استراتيجية التدريس الفرقي على التحصيل في اللغة الإنجليزية كلغة أجنبية لدى تلاميذ الصف السادس الابتدائي ، ودراسة اتجاهاتهم نحوها. تكونت مجموعة الدراسة من (66) تلميذا وتلميذة بالصف السادس الابتدائي بمدارس السادات الابتدائية بقنا، حيث تم اختيار فصلين عشوائيا ليتمل أحدهما بالمجموعة التجريبية (43) التي درست بأسلوب التدريس الفرقي ، والآخر ليتمل بالمجموعة الضابطة (43) والتي درست بالطريقة التقليدية. تم جمع بيانات الدراسة من خلال اختبار التحصيل في اللغة الإنجليزية ، واستبيان قياس اتجاهات التلاميذ نحو التدريس الفرقي. وقد تم تحليل البيانات كمي ا وكيفي ا. استخدمت الدراسة الإحصاء الوصفي (المتوسط، الانحراف المعياري، التكرارات، والنسبة المئوية)، اختبار ت" للعينات المستقلة، اختبار "ت" للمجموعات المتزاوجة، ومعامل ارتباط سبيرمان لتحليل البيانات". ولمعرفة حجم التأثير الناتج عن استخدام التدريس الفرقي (المتغير المستقل) على معدل التحصيل في اللغة الإنجليزية كلغة أجنبية لتلاميذ المجموعة التجريبية (المتغير التابع) تم الاستعانة بمربع إيتا. دلت نتائج الاختبار القليل على مدى تجانس المجموعتين إضافة إلى تدني مستوى التحصيل لنسبة عالية من مجموعة الدراسة. كما أظهرت نتائج التطبيق البعدي للدراسة تحسن ا ملحوظ ا في التحصيل للمجموعة التجريبية مقارنة بالمجموعة الضابطة. كما أشارت النتائج إلى وجود فروق ذات دلالة احصائية في الأجزاء الأربعة لاختبار التحصيل (الاستماع التحدث القراءة الكتابة) لصالح تلاميذ المجموعة التجريبية نتيجة تعلمهم - - - اللغة الإنجليزية باستخدام التدريس الفرقي. بالإضافة لذلك، توصلت الدراسة إلى وجود اتجاهات إيجابية لدى تلاميذ المجموعة التجريبية نحو استخدام التدريس الفرقي. وانتهت الدراسة إلى أن استخدام التدريس الفرقي كان له تأثير إيجابي على ارتفاع معدل تحصيل التلاميذ في اللغة الإنجليزية. وفي ضوء النتائج التي تم التوصل إليها فقد خلصت الدراسة إلى أن التدريس الفرقي يمكن أن يستخدم بفعالية في تدريس اللغة الإنجليزية كلغة أجنبية لتلاميذ الصف السادس الابتدائي ، كما أنه يعمل على تزويد المعلم بمعلم آخر يساعده في وضع الأهداف، كتابة خطة الدرس، تنفيذ الدرس، وتقويم نتائج عملية التدريس. وقد أوصت الدراسة على وجوب دمج استراتيجية التدريس الفرقي في الصفوف الدراسية لتعلم اللغة الإنجليزية كلغة أجنبية، وتدريب مدرسي اللغة الإنجليزية على التدريس باستخدام التدريس الفرقي بكافة أنواعه.		
4744	12197212	أثر برنامج تدريبي في تنمية الكفايات التدريسية لمهارات التفكير العليا لدى معلمي العلوم قبل الخدمة/	قيس، شيرين مرقس مصري.			2015	بناءً على الملاحظة الشخصية، ونتائج الدرسات السابقة، ودراسة الواقع الفعلي لبامرج إعداد المعلم بكلية التربية بقنا، فقد وضعت أن هناك قصور في الكفايات التدريسية لمهارات التفكير العليا لدى معلمي العلوم قبل الخدمة، لذا فقد سعت الدرس الحالية إلى التعرف على أثر برنامج تدريبي في		

							تنمية الكفايات التدريسية لها ا رت التفكير العليا لدى معلمى العلوم قبل الخدمة. ولتحقيق هذا الهدف تم اتباع الإج اراءات التالية: تحديد مها ا رت التفكير العليا، والكفايات التدريسية لها ا رت التفكير العليا، وتحديد وصياغة الأهداف الإح ا رنية المرجو تحقيقها من خلال البرنامج، وإعداد البرنامج المقترح لتنمية الكفايات التدريسية لها ا رت التفكير العليا (الابتكاري، والنقد، وحل المشكلات)، وإعداد أداتا الد ا رسة (اختبار تحصيلي للمحتوى المعرفي من البرنامج، وبطاقة ملاحظة للمحتوى المهاري من البرنامج)، واج ا رة التجربة الاستطلاعية، وتم إتباع المنهج شبه التجريبي (تصميم المجموعة الواحدة مع قياس قبلي-بعدي)؛ حيث تم تطبيق الأداتين على مجموعة الد ا رسة قبل تطبيق البرنامج، ثم تطبيق البرنامج عليهم، ثم تطبيق الأداتين عليهم مرة أخرى بعد إتمام تطبيق البرنامج. وقد أشارت نتائج الد ا رسة إلى فاعلية البرنامج المقترح في تنمية الكفايات التدريسية لها ا رت التفكير العليا بشقيها المعرفي والمهاري . يُعتبر المعلم المفتاح الرئيس لنجاح العملية التعليمية لأنه المسئول الرئيس عن تنفيذ أهدافها، ونظ ا رُ للتلطو ا رت الكبيرة والتغى ا رت السريعة المتلاحقة التي يشهدها العصر الحالي في مجالات الصناعة والتكنولوجيا، وما يصاحب ذلك من انفجار معرفي أدى إلى تغى ا رت سريعة شاملة في الحياة بكافة مجالاتها بما فيها العملية التعليمية، فقد انعكس ذلك على المعلم بوصفه عنصر ا رُ أساسياً وفاعلاً في النظام التربوي، مما أدى إلى التفكير في ضرورة تطوير الكفايات المهنية للمعلم؛ ليتمكن من القيام بأدواره ومواكبة هذا العصر واللاحق بمتغى ا رته. ونظ ا ر لأن مادة العلوم من المجالات الأكثر عرضة للتأثر بهذه المتغى ا رت، لذا ينبغي التطوير المستمر لإعداد المعلم عامة ومعلم العلوم خاصة؛ لكي يقوم بدوره في إكساب وتنمية مها ا رت التفكير العليا التي يحتاجها الفرد ليعيش ويتكيف مع متطلبات هذا العصر، لاسيما أن الدور الرئيس لمعلم العلوم مساعدة التلاميذ ليكونوا علماء الغد من خلال تشجيعهم على البحث والاكتشاف، مما أدى إلى تغيير دور المعلم من مجرد ناقل للمعرفة، إلى موجه ومدير ومصمم تعليمي؛ يصمم المواقف والأنشطة والوسائل والاست ا رتيجيات التي توفر للتلاميذ سبل البحث حول المعرفة ونقدها وتقييمها. كما أصبحت مهمة المعلم الرئيسية في تدريس العلوم تعليم التلاميذ كيف يفكرون لا كيف يحفظون (عبدالرحمن محمد السعدني وثناء مليجي السيد عودة، ٢٠٠٦ : ٢٢٢)، لذا يجب أن تهتم كليات التربية بتدريب الطلاب المعلمين على : (وعليش زينون، ٢٠١٣ : ٢٢٣) تنمية مها ا رت التفكير والنقد، وأن يحظى المعلمون أثناء الخدمة أيضاً بفرص كافية لتنمية وتطوير فاعليتهم المبتكر والذي : مها ا رت التفكير والنقد لديهم (عبدالسلام مصطفى عبدالسلام، ٢٠٠٩ : ٥٦١) يؤمن بأهمية إكساب تلاميذه مها ا رت التفكير يوفر فرصاً ثرية لتنمية التفكير الابتكاري لديهم (نافذة قطلمي ونزيه حمدي ويوسف قطلمي وتيسير صبحي وصابر أبوطالب، ٢٠١٠ : ٣٧٠-٣٧١)، ومن المنطقي أنه لا يمكن أن ينمي المعلم تفكير تلاميذه ما لم يكن هو نفسه مبتك ا رُ لطرق ووسائل وأنشطة تدريسية، وما لم يكن محباً للابتكارية ومهتماً بتنميتها (إسماعيل عبدالفتاح عبدالكافي، وإذا لم يسه المعلم لتنمية تفكير التلاميذ، فإن فرصتهم في النجاح سواء في الحياة : ٢٠٠٥ : ١١١) الأكاديمية أو في الحياة العادية تصبح محدودة للغاية (ناديا هائل سرور، ٢٠٠ : ٢٨١).		د/فتحى عبدالرسول محمد حسن د/محمد النصر حسن محمد د/أمال محمد إبراهيم إسماعيل
4745	12197235	ماجستير	التربية الوقائية في الفكر التربوي الإسلامي و كيفية الاستفادة منها .	أنس محمد ذهاب موسى.	جامعة جنوب الوادي ، كلية التربية بقنا.	قنا: #####	هدفت هذه الدراسة الى الكشف عن التربية الوقائية في الفكر الاسلامي وكيفية الاستفادة منها وذلك من خلال :- التعرف على مفهوم واهداف واهمية التربية الوقائية في الفكر التربوي الاسلامي التعرف على مجالات التربية الوقائية في الفكر التربوي الإسلامي- التعرف على مهوم التربية الوقائية وأهميتها والاسس التي تبنى عليها - وضع تصور مقترح لتفعيل التربية الوقائية في الفكر التربوي الإسلامي من خلال بعض مؤسسات التربية- وقد غُستخدمت الباحثة في دراستها المنهج الوصفي ،كما استعملت الباحثة بالمنهج الاستدلالي .		د/فتحى عبدالرسول محمد حسن د/محمد النصر حسن محمد د/أمال محمد إبراهيم إسماعيل
4746	12197268		La technique du Nouveau Roman d'après La Modification de Michel Butor : étude analytique et linguistique/	HASSAN· Emad Khalil.			2015 La littérature est le moyen utilisé par les écrivains pour méditer sur la vie des peuples du monde. Elle varie selon le peuple et plutôt selon l'époque. Elle exprime de la réalité des hommes. La littérature française ne cesse d'évoluer depuis son origine à travers des siècles jusqu'à nos jours. Les réalités de la société française sont à la base des oeuvres littéraires françaises. Il est clair que chaque période de la littérature française est confrontée à des problèmes sociaux spécifiques. Les écrivains et les philosophes de chaque époque, qui étaient observateurs minutieux des faits sociopolitiques, les transposent dans leurs oeuvres. Ils accordaient aux événements une réflexion vigoureuse et une analyse profonde. Généralement, ils voyaient qu'un texte littéraire peut acquérir des réalités sociales, politiques, religieuses et économiques de l'époque.L'importance de cette étude a pour but de montrer ce que nous voyons, au XXème siècle, des orientations nouvelles dans la manière aussi bien de penser que d'écrire. Ces nouvelles orientations reflètent de nouveaux axes dans le monde du roman qui encouragent le refus des structures traditionnelles dans tous les aspects de la vie humaine y compris la littérature. C'est à partir de ce moment que le Nouveau Roman français est né. Nous remarquons que Michel Butor, le romancier français dont l'oeuvre qui est à la base de cette étude, fait partie de ce groupe d'écrivains de cette nouvelle tendance qui révoluait contre le style du passé.		

							رواية تروية متأخرة La technique du nouveau roman d'après La modification de Michel Butor, étude analytique et linguistique vise à étudier le "Nouveau Roman" et ce qui concerne sa théorie et sa technique à travers La Modification de Michel Butor, qui se fait admettre comme une tendance de la littérature française contemporaine. Michel Butor, dans La Modification, propose ses nouvelles idées romanesques sous tous les aspects, en ce qui concerne les principes du "Nouveau Roman" et aussi la réalisation de ces principes. Il vise par cela à transformer une vision du monde et d'une oeuvre romanesque. Renonçant au roman traditionnel, ainsi qu'au roman psychologique, Butor construit son oeuvre autour d'une réalité non-interprétée, sans définition, ce qui est en effet l'idée fondamentale du "Nouveau Roman". Il veut nous montrer que le monde en relation avec l'homme n'a pas de forme fixe. Cette idée nouvelle, pour la présenter dans une oeuvre romanesque, Butor applique dans ce roman aussi une forme nouvelle : l'usage du pronom personnel "vous" pour le personnage au lieu du "il" et du "je" traditionnels du narrateur. Pourtant, Butor n'abandonne pas tout à fait les procédés traditionnels; ceux-ci ont effectivement une grande part dans le roman. Ainsi, grâce à son génie de théoricien ou de technicien du roman, en mélangeant ces deux procédés, Butor arrive à faire de La Modification un "nouveau roman" parfait. La Modification est une expérience prenante pour le lecteur qui accepte de mettre une certaine attention dans sa lecture. Butor utilise tout du long le vouvoiement pour décrire le voyage d'un homme dans le train Paris-Rome, alors qu'il compte rejoindre sa maîtresse. Nous suivons tout son cheminement de pensée, toutes ses réflexions et ses multiples décisions qui changent du trajet. Nous voyons à quel point il est difficile de savoir ce qu'il désire, à quel point le temps qui passe trop lentement l'empêche de rester sur un choix de vie. L'utilisation du pronom "vous" oblige aussi le lecteur à s'identifier au personnage, à être concerné par les idées qui lui viennent sans cesse. Donc, nous pouvons dire que le héros est supprimé, parce que le héros, c'est le lecteur. Butor commence son roman où son personnage principal s'installe dans un compartiment de troisième classe à Paris et se termine quand le train entre en gare de Rome. Entre deux femmes, entre deux villes que le train roule, cet homme s'abandonne à tout ce qui lui passe sous les yeux, dans l'esprit ou dans la mémoire. Le passé le plus complexe bascule étrangement dans l'avenir. Ainsi, ce roman peut-il se concevoir tel le cheminement d'un protagoniste menant sa vie selon une trajectoire circulaire, le ramenant en apparence à son point de départ. Donc,		
4747	12197273		الغرف التجارية المصرية :	عيسى، مصطفى يونس أحمد.		2014	تسلط هذه الدراسة الضوء على تاريخ أحمد المؤسسات الاقتصادية المصرية وهي الغرف التجارية في الفترة من عام 1933 والتي كانت بداية المرحلة الرسمية من تاريخ هذه الغرف بصدر القانون رقم 14 لسنة 1933، وحتى عام 1951 الذي شهد صدور القانون رقم 189 لسنة 1951 والذي يعد من أهم القوانين التي صدرت للغرف التجارية المصرية والذي لا تزال الغرف تعمل في ظل الكثير من نصوصه بعدما أدخلت عليه الحكومة المصرية تعديلات في عام 2002. وقد قسم هذا الموضوع إلى تمهيد وأربعة فصول وفقاً للمنهج الموضوع. حيث يتناول التمهيد الغرف التجارية المصرية قبل عام 1933، فيبدأ بتعريف الغرف التجارية المصرية ومهمتها كمدخل ضروري للدراسة، كما يلقي الضوء بعد ذلك على ظروف نشأة الغرف التجارية الأجنبية في مصر. ثم يتناول نشأة الغرف التجارية المصرية ونشاطها في مصر قبل عام 1933، وأخيراً يلقي الضوء على نشأة وتأسيس اتحاد عام الغرف التجارية المصرية. ويسلط الفصل الأول الضوء على الهيكل التنظيمي للغرف الجارية المصرية. حيث يبدأ بتناول التطور التشريعي لهذه الغرف خلال فترة الدراسة. ويتعرض للجهود التي سبقت إصدار القانون الأول لهذه الغرف، وكذا الجهود التي بذلت من أجل إصدار التشريعاتين الثاني والثالث، موضحاً أوجه القصور في هذه التشريعات، وأهم ما نصت عليه، وكذا أهم تعديلاتها. كما يتناول تنظيم الغرف التجارية في إطار هذه القوانين، من خلال تعرضه لتشكيل الغرف، والتعاون فيما بينها، ومصادر تمويلها، ومقراتها (مبانيها). وأخيراً يتعرض لتشكيل مجالس إدارات الغرف التجارية في ظل هذه القوانين؛ حيث يلقي الضوء على أعضاء الغرف التجارية والشروط الواجب توافرها فيهم طبقاً لتلك القوانين، ثم يتعرض أخيراً لموظفي الغرف.		

4748	12197282		ISOLATION AND FUNCTIONAL charACTERIZATION OF BIOACTIVE PEPTIDES from GOAT MILK/	Mohammed· Ahmed Shaban Ahmed.			milk and dairy products have long been recognized as a significant component of a balanced diet. Milk is a natural source which contains various essential nutrients and biologically active compounds with potential health benefits (Rogelj, 2000; Shah, 2000; Lourens-Hattingh and Viljoen, 2001). Goat (Capra hircus) milk ranks fourth after cow, buffalo and sheep milk in terms of world milk production (Amigo and Fontecha, 2011). Goats produce approximately 2% of the world's total annual milk supply (FAO, 1997). In Egypt, regarding small ruminants, there has been a steady increase in goat population numbers between 2000 and 2009, from 3.43 to 4.55 million head over this period. The goat population is concentrated in both Upper Egypt and Middle Egypt regions with percentages of 36 % and 23.5%, respectively (SADS, 2009; El-Nahrawy, 2011). The tonnage supply of milk from goat in Egypt was 0.015 million tons in 2008 (Haenlein and Abdellatif, 2004). More than any other dairy farm animals, goat is a main supplier of milk and dairy products for rural people and its importance appears in two ways: home consumption as results of the progressive increased populations of people (Haenlein, 2004). The second aspect of importance for goat milk is increasing the attention on cows' milk allergy (CMA) especially among infants has lead to an increase in the demand for goat milk as ideal substitute for cow milk owing to their low allergenic potential compared with cow milk on the basis of characteristics of αS1 casein (Roncada et al., 2002; Sampson, 2004; Almaas et al., 2006a; Park, 2009; Simos et al., 2011). The third aspect of importance is the health benefits of goat milk and their bioactive peptides which have not been explored sufficiently. Díaz-Castro et al., (2012) proved that goat milk seems to have better in vivo antioxidant properties than cows' milk, since rats fed a goat milk based diet had lower levels of lipid peroxidation in plasma (measured as thiobarbituric acid reactive substances) than rats fed a cows' milk based diet. Kullisaar et al., (2003) showed that fermentation of goat milk improved the antioxidant properties in humans, suggesting that such beneficial effects might be related to the release of bioactive peptides from the milk proteins during fermentation. Comparing to cow or human milk, goat milk has been recommended as a nutritionally healthy and therapeutically functional food source for children or sick people suffering from various allergies, as well as those who seek better nutrient absorption, greater nutrient bioavailability and higher buffering capacity (Rosenblum and Rosenblum, 1952; Walker, 1965; Taitz and Armitage, 1984; Park, 2015).		
4749	12197303		أثر الطب اليوناني على الرازي وابن رضوان :	عبدالمعزم شعبان أحمد عبدالإمام.		2014	تتناول الدراسة موضوع " أثر الطب اليوناني على الرازي وابن رضوان " دراسة تحليلية نقدية ، جامعة جنوب الوادي ، كلية الآداب بقنا، قسم الفلسفة، وتهدف الدراسة إلى بيان أهمية الطب اليوناني من خلال المناهج المختارة، وتوضيح تأثير الطب اليوناني على "الرازي" و"ابن رضوان" ، وإظهار جوانب الاتفاق والاختلاف مع مراعاة الوقوف على إظهار إبداعاتهما الطبية في تاريخ الطب العربي. وتتكون الدراسة من مقدمة وخمسة فصول، وخاتمة، وقائمة بالمصادر والمراجع. أما المقدمة فتتناول فيها الباحث التعريف بموضوع البحث وأهميته وتساؤلات الدراسة والمنهج المستخدم في البحث. أما الفصل الأول وعنوانه "الطب اليوناني بين هيبوقراط وجالينوس" وتتناول فيه الباحث بيان دورهما الطبي في تطور تاريخ الطب اليوناني، وإبداعاتهما العلمية، وإسهاماتهما الطبية في تاريخ الطب العربي . أما الفصل الثاني وعنوانه "انتقال الطب اليوناني إلى العالم الإسلامي" تتناول فيه الباحث أهمية حركة الترجمة وكيفية انتقال المؤلفات الطبية اليونانية وخاصة مؤلفات "هيبوقراط وجالينوس" وكذلك دور الأطباء العرب والمسلمين في مرحلة التأليف والإبداع العلمي. أما الفصل الثالث وعنوانه "أثر الطب اليوناني على الرازي" فقد تناول فيه الباحث موقف "الرازي" الطبي من الطب اليوناني، وكذلك أهم إسهاماته الطبية في تاريخ الطب العربي. أما الفصل الرابع وعنوانه "أثر الطب اليوناني على ابن رضوان" فتألفت فيه موقف "ابن رضوان" من الطب اليوناني ، ثم عرضت فيه لأهم إسهاماته الطبية في تاريخ الطب العربي. أما الفصل الخامس وعنوانه "المنهج عند الرازي وابن رضوان" تناولت فيه المنهج عند "الرازي" و"ابن رضوان" ووضحت فيه الأسس التي يقوم عليها المنهج التجريبي . وقد خرجت الدراسة ببعض النتائج والتي من أهمها: • إن الطب اليوناني قبل "هيبوقراط" و"جالينوس" كان يعتمد في الأساس على الخرافات والنجل والشعوذة . • أكمل "جالينوس" ما بدأه "هيبوقراط" فأحيا طبيه وشرح كتبه ، وصنف عدداً من المؤلفات الطبية ، كانت من أهم المصادر الأساسية في تاريخ الطب • إن انتقال المؤلفات الطبية اليونانية تم من خلال مرحلة الترجمة ، حيث كان للمترجمين العرب والمسلمين أثر بارز في . التعرف على مؤلفات "هيبوقراط" و"جالينوس" وغيرهم من أطباء اليونان • اتخذ "ابن رضوان" موقفاً إيجابياً تجاه الطب اليوناني .		
4750	12197316		Three-dimensional (3D) transvaginal ultrasound - clinical implementation in assessing uterine disorders/	El-Naggar· Shaymaa Mahmoud.			The uterus is a hollow, pear-shaped pelvic organ with typical dimensions of 8x5x3 cm. The fundus refers to the rounded upper part of the uterus and the uterine body to the main chamber. The openings of each fallopian tube (ostia) are seen where they connect to the upper angles of the uterus (cornu) demarcating the fundus from the body. The isthmus is the constricted lower part of the uterine body and includes the internal cervical os (opening to the uterine body). The cervix protrudes into the vagina, connecting the uterine cavity at the internal os to the vagina at the external os (external uterine opening). This forms a sulcus (fornix), which is deepest posteriorly and separates the cervix into an intravaginal and supravaginal portion. The ratio of lengths of the uterine body to cervix is 2–3:1 in women of reproductive age and nearer 1:1 in postmenopausal women and prepubescent girls (Clark and Gupta; 2005). The objective of an U/S examination is to get a spatial impression of the examined organ. With the conventional technique, the examiner has to imagine a 3D idea of the shape, size, and position of the organ being examined. By Transvaginal 2DU/S, the examination of the uterine lesions is limited to the transverse and sagittal planes, which sometimes give an inadequate view of the uterus and its corresponding pathology (Merz., 1999).		

							Two-dimensional ultrasonography (2D U/S) is widely used for solving diagnostic problems in gynecology. However, the ability to obtain certain views of the pelvic organs with 2D U/S is inherently limited. This is due to limitations in the scan planes that can be obtained by the abdominal or vaginal probe as well as the limited mobility of the vaginal probe during transvaginal ultrasonography (Bega et al., 2003).Three dimensional ultrasonography (3D U/S) is a multiplaner simultaneous 3 axes sectional image displayed on the same screen. These 3 planes (frontal, sagittal, and coronal) can be displayed anatomically and topographically layer by layer (Ebrashy et al., 2004). 3D allows volume examination on the monitor simultaneously in three perpendicular planes. All three planes are located in a separate window and each of them can be rotated at90 degrees to each other in all three axes. After acquiring the required volume, the presence of the patient is no longer needed, so the examination last no more than 3 minutes. It has the ability to register all three imaging planes simultaneously as well as to visualize surfaces 3 Dimensionally (Steiner et al., 1994).Three-dimensional ultrasonography, especially when combined with sonohysterography (SHG), provides detailed information regarding the internal and external contours of the uterus, obviating the need for surgical intervention for diagnosis alone (Ebrashy et al., 2004 and Ghi et al., 2009).Aim of the work Evaluation of the diagnostic accuracy of three-dimensional (3D) ultrasound as a non invasive method for diagnosis of uterine disorders.		
4751	12197345	أساليب التفكير لدى عينة من الطلاب المعاقين حركيا وعلاقتها ببعض المتغيرات النفسية/	موسى، عمر عمر على.		2015	إن الإعاقة الحركية الناتجة عن حوادث السير وغيرها من الحوادث الأخرى هي إحدى أنواع الإعاقات المختلفة التي قد يصاب بها الإنسان في أي زمان و مكان ، حيث إن الإعاقة الحركية تتخذ أشكالاً مختلفة بحسب نوع الإصابة و حجمها ، ومن ذلك الشلل الكلي والشلل الجزئي و حالات البتر . و الإعاقة التي تصيب الإنسان لا شك تترك أثراً سلبية على حياته بصورة عامة . كما أن حجم المعاناة يزيد عندما تحدث الإعاقة بشكل مفاجئ ، مما يجعل المعاق حركياً عرضة للإصابة بالأزمات النفسية المختلفة. وتشير أساليب التفكير Thinking Styles إلى الطرق و الأساليب المفضلة للفرد في توظيف قدراتهم ، واكتساب معارفهم ، وتنظيم أفكارهم والتعبير عنها بما يتلاءم مع المهام والمواقف التي تعترض الفرد . فأسلوب التفكير المتبع عند التعامل مع المواقف الاجتماعية في الجوانب الحياتية قد يختلف عن أسلوب التفكير عند حل المسائل العلمية مما يعني أن الفرد قد يستخدم عدة أساليب في التفكير وقد تتغير هذه الأساليب مع الزمن (Sternberg, 1992:68). و يرى عدنان يوسف العتوم (2004) أن لكل فرد أسلوبه الخاص في التفكير ، ومن الصعوبة بمكان التنبؤ بطرق تفكير الآخرين ، كما أن أسلوب التفكير يقيس تفضيلات الأفراد اللغوية و المعرفية و مستويات المرونة لديهم في العمل والتعامل مع الآخرين وهناك بعض التصورات النظرية لأساليب التفكير والتي تختلف عن بعضها البعض من حيث عدد وطبيعة هذه الأساليب أو الطرق التي يفضلها ويتبعها الأفراد في تفكيرهم ، ومنها نموذج بايفيو Paivio(1971) والذي يتصور وجود نوعين من تفضيلات الأفراد و طرقهم في التفكير هما : طريقة التفكير اللفظي Verbal Thinkinhg Method وطريقة التفكير التصوريImagery Thinking Method ويمكن النظر إلى أسلوب التعلم على أنه تلك العملية المعرفية المادية ، والتي يقوم فيها الفرد باستيعاب المعلومات ، والتي يتم على أساسها تحسين المهارات ، والسلوكيات ، والاتجاهات الخاصة بالفرد ، سواء كان ذلك بطريقة مؤقتة ام دائمة Marci(2009) . ولقد احتل موضوع أسلوب التعلم مكاناً بارزاً لدى الباحثين في المجال التربوي لعدد من السنوات ، فقد أنه خلال العقود السابقة ظهرت العديد من النظريات والنماذج ، التي تحاول تفسير الأساليب التي يتم الاعتماد عليها في عملية التعلم (Zhang, 2002) . وقد تعددت مسميات أساليب التعلم بتعدد الباحثين ، فمن خلال دراسة قام بها رضا أبو سريع (1995: ص 2) ، أظهرت أن تعدد أساليب التعلم ، والاختلاف في المصطلحات والمسميات ، ناتج عن اختلاف الباحثين و أساليبهم في البحث ، لكن معاني هذه المسميات و خصائصها متقاربة . وتقوم الفكرة الأساسية الخاصة بأساليب التعلم على أن الأفراد يختلفون فيما بينهم في الكيفية التي يتم من خلال تلقي المعلومات (Pashler, McDaniel, Rohrer, Bjok, 2009) و عليه ، فإنه يمكن النظر إلى أساليب التعلم على أنها تلك السمات الشخصية المعرفية ، و الوجدانية ، و السلوكيات النفسية ، التي تؤثر على قدرة المتعلم على تلقي المعلومات ، والتفاعل مع البيئة التي تتم فيها عملية التعلم (Ashley-Dennison, 2010) . وبذلك تعد المعرفة الخاصة بأساليب التعلم ذات أهمية حقيقية ، إذ أنها تساعد المعلم في توجيه الممارسات التدريسية الخاصة به ، وفقاً لأساليب التعلم المفضلة . ويعتبر عاصف على باكير(2001) أن الانجاز الرياضي الهدف الرئيسي الذي تسعى إليه الفرق الرياضية ، حتى تتمكن من تحقيق الفوز في المباريات والوصول إلى المستويات العليا ، ويجب أن تكون العملية التدريبية متكاملة في مختلف الجوانب البدنية والمهارية والخططية والتفسيية.وليس الاهتمام بجانب على حساب الجانب الآخر حيث يعد الجانب النفسي أحد الجوانب الاساسية والتي تلعب دوراً مهماً في قدرة اللاعب على مواجهة المواقف المختلفة أثناء المباريات الرياضية . ويعرف عبد اللطيف خليفة (2000) دافعية الإنجاز بأنها استعداد الفرد لتحمل المسؤولية والسعي نحو التفوق لتحقيق أهداف معينه ، والمثابرة للتغلب على العقبات والمشكلات التي قد تواجهه ، والشعور بأهمية الزمن والتخطيط للمستقبل . ويشير عبد اللطيف خليفة (2000) ، إلى أن دافع الإنجاز عاملاً مهماً في توجيه سلوك الفرد وتنشيطه ، و في إدراكه للموقف ، فضلاً عن مساعدته في فهم و تفسير سلوك الفرد ، وسلوك المحيطين به ، ويعد الدافع للإنجاز مكوناً أساسياً في سعي الفرد تجاه تحقيق ذاته ، وتوكيدها ، حيث يشعر الفرد بتحقيق ذاته من خلال ما ينجزه و فيما يحققه من أهداف ، وفيما يسعى إليه من أسلوب حياة أفضل ومستويات أعظم لوجوده الإنساني . ويشير أحمد عبد الخالق ، مياسة النبال (1992: ص 176) ، إلى أنه من أهم المتغيرات التي تؤثر في دافعية الإنجاز لدى الطلاب هو مفهومهم عن الذات ، فالطلاب ذوي المفهوم المنخفض للذات يميلون دائماً للفشل ، فضلاً عن أدائهم المنخفض ، إلى جانب ذلك نجدهم لا يسمعون إلى النجاح ، ويترعون إلى تجنب الأعمال الصعبة ، ويستسلمون عند مواجهة أية مهمة تنسجم بالصعوبة .			
4752	12197349	الكفاءة الذاتية الصحية والمساعدة الوجدانية وإدارة الحياة وعلاقتهم بالصلاة النفسية لدى مرضى الأورام السرطانية /	علي، محمد عبدالقادر عبدالموجود.		2013	هذفت الدراسة الراحة نحو معرفة مدى تأثير التباين في كلا من الكفاءة الذاتية الصحية، المساعدة الوجدانية وإرادة الحياة في الصلاة النفسية لدى مرضى الأورام السرطانية. وقد تكونت العينة من (ن = 60) مريضاً بأورام القولون والمستقيم السرطانية، بمتوسط عمري قدره 55.73+ 7.09 ، واستخدم الباحث استمارة جمع البيانات، ومقياس المساعدة الوجدانية ، ومقياس الصلاة النفسية وهما من إعداد الباحث، ومقياس الكفاءة الذاتية (شويخ، 2007) . ومقياس إرادة الحياة (الخشاب، 2002) ، وأسفرت النتائج عن وجود علاقة ارتباطية دالة إحصائياً بين كلا من الكفاءة الذاتية الصحية ، والمساعدة الوجدانية والصلاة النفسية. وعدم وجود ارتباط بين هذه المتغيرات وإرادة الحياة. فضلاً عن وجود تأثير واضح لكل من الكفاءة الذاتية الصحية والمساعدة الوجدانية على الصلاة النفسية ، وإخفاء التأثير لإرادة الحياة عليها. وقد أسفرت الدراسة الراحة من عدة نتائج أهمها :			

						توجد علاقة ارتباطية دالة إحصائية بين كلا من الكفاءة الذاتية الصحية، الصلابة النفسية والمساعدة الوجدانية، فحين لا توجد علاقة بين إرادة الحياة وباقي متغيرات الدراسة لدى مرضى الأورام السرطانية لا يوجد تأثير للمتغيرات الديموجرافية على كلا من الكفاءة الذاتية الصحية، الصلابة النفسية والمساعدة الوجدانية وإرادة الحياة، ماعدا تأثير متغير العمر على إرادة الحياة. يوجد أثر واضح للكفاءة الذاتية الصحية على الصلابة النفسية لدى مرضى الأورام السرطانية -3. يوجد أثر واضح للمساعدة الوجدانية على الصلابة النفسية لدى مرضى الأورام السرطانية -4. لا يوجد تأثير لإرادة الحياة على الصلابة النفسية لدى مرضى الأورام السرطانية -5. ونوقشت النتائج في ضوء الدلالات النظرية والتطبيقية لنتائج الدراسة ومدى اتساقها مع دراسات اهتمت بهذه المتغيرات. الطفل ثروة الأُمه وأساس مستقبلها والطفولة هي الغرس المسؤول لبناء مستقبل الأُمه في أى مجتمع يهدف لبناء الإنسان الذى يعمر به أرضه والأطفال هم بهجه الحياه ومُتمعه النفس وزينه الحياه الدنيا كما قال عنهم رب العزه سبحانه " المال والبنون زينه الحياه الدنيا " .
4753	12197376	أعاني الطفل في العصر الجاهلي والدولة العربية/	أحمد، رضا أبو الفضل شاكر.		2014	تتناول الدراسة المشكلات البيئية للجزر البيئية للجزر النيلية في محافظتي قنا والأقصر دراسة في جغرافية البيئة ذلك الفرع الذي يعد من أبرز التطورات العلمية التي ظهرت في السبعينيات من القرن الماضي وقد تزايدت الأهمية العلمية والتطبيقية لعلوم البيئة والتخطيط البيئي بسبب تعاضل التأثير السلبي للنشاطات البشرية المتعددة على عناصر الوسط البيئي مما أدى إلى الإخلال بتوازنها ويمثل دور العلوم البيئية في تشخيص المشكلات البيئية وتحديد عواملها طبيعية كانت أم حضارية واختيار وسائل معالجتها والاستجابة لأخطارها والتصدي لها. تقع الدراسة في 326 صفحة بما فيها الملاحق والمصادر والمراجع والملخص وتشمل على خمسة فصول يسبقها مقدمة وتليها خاتمة وثبت المراجع وتحتوي على 51 شكلا و25 صورة و42 جدول. يبدأ الفصل الأول بدراسة الملامح الجغرافية الطبيعية لبيئة الجزر النيلية وذلك من خلال التعرف على أبعادها ومساحتها وأبعادها ثم نشأتها وتطورها الجيومورفولوجي ويتناول الجزء الثاني من هذا الفصل الملامح البيئية البشرية وذلك من خلال دراسة السكان لمعرفة أعدادهم وتركيبهم النوعي والعمرى والاقتصادي والتعليمي وأثر ذلك على البيئة ويتناول الفصل الثاني دراسة مكونات وتصنيف النظم البيئية وتم من خلاله التعرف على النظام البيئي وعناصره الحية (التنوع الحيوي النباتي والحيواني بالجزر) والغیر حية (والتي تضم التربة والمناخ والمياه) وقد تم تقسيم هذا النظام الرئيسي إلى عدة نظم فرعية ضمت نظما طبيعية كنهج النيل والمجاري المائية الموسمية التابعة له إلى جانب الجزر والحواجر الرملية، هذا بجانب النظم البيئية البشرية والتي تضم النظام البيئي الزراعي والنظام البيئي العمراني. وقد تم في الفصل الثالث دراسة المشكلات الجيومورفولوجية ببيئة الجزر والتي تشمل مشكلات تهديد وتعرية جوانب الجزر وأسباب هذا التهديد وصولا إلى التوصيات التي تحد من هذه المشكلة وكذلك مشكلة انخفاض منسوب السطح وغيرها من المشكلات المرتبطة بالإرساب وأهم الآثار البيئية التي ترتبت على مثل هذه المشكلات بينما أهتم الفصل الرابع بدراسة المشكلات البيئية للنظام البيئي الزراعي ومنها التدهور النوعي للتربة وتلويثها ومشكلة التجريف والتصحر وأهم الحلول المقترحة لحل هذه المشكلات وتقييم الأثر البيئي لهذه الحلول. كما عالج الفصل الخامس والأخير وأهم مشكلات النظام البيئي العمراني ولما تمثله من ضغط على هذه البيئة ويأتي في مقدمتها مشكلات البيئة الأساسية والقمامة وتدني خدمات التعليم والصحة ويختتم الفصل بأقتراح تخطيط تنموي للجزر يستند على أسس بيئية ويهدف لتحقيق التنمية المستدامة لبيئة الجزر.
4755	12197464	شعر صدر الإسلام بين التقليد والتجديد/	سلام، شوری عبد المبدی أحمد.		2014	أحدث ظهور الإسلام تحولاً جذرياً في حياة الأمم ونظماً في طور التجزئة القبلية إلى طور التوحيد في إطار دوله عربيه تدنن بالإسلام وتتخذ القرآن الكريم مثلاً أعلى وكان لابد لهذا الحدث العظيم أن يعكس صداه القوى في في الحياه الانديه لهذه الامه.
4756	12197486	الجملة المعقدة في العبرية الحديثة : دراسة لغوية تحليلية على رواية " الملجأ البابلّي لإسحاق جورميزانو جورين/	عبد الله، محمد أحمد على.		2014	مشكلة الدراسة و أهميتها: تعد دراسة الجملة المعقدة في اللغة العبرية الحديثة من الم وضوعات ذات القيمة العلمية ؛ نظر أ لأن هذه اللغة أصبحت لها قوانينها اللغوية التي يجب كشف خصائصها وسماتها، وخاصة أن عبرية العهد القديم ، لم تعد تستخدم الآن كلغة حية للتعبير عن كافة مجالات الحياة في المجتمع الإسرائيلي، كذلك تقتصر الدراسات اللغوية العبرية ولاس بما الحديثة إلى الاهتمام الكافي بالدراسة اللغوية التحليلية من قبل الباحثين في الجامعات المصرية وف قا للمناهج اللغوية الحديثة، ومن هنا تكّى أهمية هذه الدراسة التي تحاول تطبيق أحد المناهج اللغوية الحديثة على مجال من المجالات اللغوية للعبرية الحديثة ألا وهو المجال التركيبي ، والذي يختص بدراسة نظام الجملة ، والتراكيب اللغوية داخل الجملة ، وكذلك يرجع اختيار الباحث لموضوع الجملة المعقدة في العبرية الحديثة لعدم وجود دراسات لغوية سابقة تناولتها بصورة خاصة، وإيما جاءت معظم الدراسات اللغوية السابقة متناولة الجملة المعقدة ضمن طياتها بصورة عام ة، وتحاول هذه الدراسة الاهتمام بالشكل التركيبي للجملة المعقدة في العبرية الحديثة بصورة خاصة، والفصل بين الوظائف التركيبية للأجزاء المكونة له ا، وكذلك الفصل بين الأنماط التركيبية المختلفة للجملة المعقدة في العبرية الحديثة، وكذلك معرفة الأنواع المختلفة للعبارات الفرعية التابعة في الجملة المعقدة في العبرية الحديثة وكيفية التمييز بين هذه الأنواع المختلفة من خلال أدوات التبعية الخاصة بكل عبارة فرعية تابعة. أهداف الدراسة: - إدراك أهمية المناهج اللغوية الحديثة في الدراسات اللغوية التحليلية - تهدف الدراسة إلى تحليل الجملة المعقدة ومعرفة الأنماط التركيبية لها في العبرية الحديثة من خلال رواية الملجأ البابلّي . تهدف الدراسة إلى إبراز قواعد لغوية جديدة فيما يخص الدراسة التركيبية للجملة المعقدة في العبرية الحديثة. تهدف الدراسة إلى بيان سمات الجملة المعقدة في العبرية الحديثة من خلال دراسة تطبيقية على أحد النصوص الأدبية الحديثة المادة العلمية المستخدمة في التحليل اللغوي ، فقد اعتمدت فيها على نموذج نظري لأحد الأدباء العبريين البارزين في العصر الحديث ، ألا وهي رواية " מקלט בבבל، الملجأ البابلّي " وهي عبارة عن رواية عاطفية تدور أحداثها بين الدكتور " חלי זה סילווח " ح لى دا سيلفا " التي تعمل محاضرة وهي امرأة جميلة تقارب الخمسين من عمره ا، متمردة على شرفيته ا، وبين " משה רחמים " موشيه رحيم " طالب من كفر سالم " פפר שלם " شاب يتصف بالصلابة والتمرد (1) . و تدور أحداث هذه الرواية على خلفية حرب لبنان " الاجتياح الإسرائيلي للبنان والعليان الداخلي الذي اشتعل في المجتمع الإسرائيلي في عام 1982 م". ذكر البروفيسور " עמיאל אקלעו، عميل القمعي " في كتابه " מפתחות לבוסותן مفتاح البستان" قائلا : إن رواية " الملجأ البابلّي " هي حدث أدبي مركزي ، تفتح الطريق أمام أشكال أدبية جديدة ، تحد من التوتر الداخلي الذي هو في الأساس يمثل المشهد الاجتماعي، والسياسي ،

						والتقافي لإسرائيل، وقد صدرت هذه الرواية عن دار نشر " بيמת كדם לספרות " عام 1998 م. ويكتب هذه الرواية هـ و يحقن גורמזמאנו גורן " إسحاق جورمزانو جورين " الذي ولد في مدينة الإسكندرية في مصر عام 1941 م (1)، ومكث بها حتى بلغ العاشرة، حيث هاجر إلى إسرائيل مع والديه عام 1951 م، وعاش في معسكر انتقال لمدة أربع سنوات ، ثم درس الأدب الإنجليزي والفرنسي في الجامعة العبرية وجامعة تل أبيب ، كما حصل على درجة الماجستير في الإخراج م (2 - المسرحي من جامعة نيويورك، التي مكث فيها لمدة ست سنوات 1974وبعد عودته من الولايات 1980). المتحدة الأمريكية أسس عام 1982 م بالاشتراك مع زوجته الممثلة شوشנה גורן " شوشانا جورين "، والممثل المسرحي רפאל אהרון " رفائيل أهارون بيמת كדם مسرح كديم " الذي يهتم بتقديم الثقافة الشرقية في المجتمع الإسرائيلي ، وقد أصدر مجلة " بيמת كדם לספרות " ييمت قديم لسفروت " عام 1986 م ، و قام بتدريس الكتابة المسرحية والسينمائية في جامعتي تل أبيب، وبار إيلان. وعمل "جورين" محرر برامج ، ومساعداً بقسم الدراما في إذاعة קול ישראל " صوت إسرائيل في الفترة من 1970 حتى 1974 م، كما أعد العديد من المسرحيات الإذاعية. وقد بدأ جورين حياته الأدبية بكتابة " (. المسرحية ، إذ كُتبت عدة مسرحيات للأطفال عرضت في إسرائيل وأمريكا ومنها مسرحية משה ומוריס ומשה " موشيه وموريس وموشيه "، ومسرحية דקלים וחולות " أشجار نخيل و رمال "، كما كتب عدة روايات من أبرزها קוץ אלסנדרוני صيف سكندري "، בלאנש " بلانش"، בדרך לאצטדיום " في الطريق إلى الإستاد "، לבי " במזרח אגדת חייו של ר " יהודה הלוי " " قلبي في الشرق " أسطورة حياة يهودا اللاوي. المنهج المتبع في الدراسة: لقد انتهج الباحث في هذه الدراسة نهجاً يجمع بين الوصف والتحليل، حيث تمثل المنهج الوصفي في استقراء الأنماط التركيبية المختلفة للجملة المعقدة في العبرية الحديثة في الرواية محل الدراسة، ثم استعان الباحث بعد ذلك بالمنهج التحليلي الذي قام من خلاله بتحديد عناصر الجملة المعقدة في العبرية الحديثة، وبيان وظائفها النحوية، وكذلك الأنماط التركيبية المختلفة للجملة المعقدة والعبارات الفرعية التابعة في الجملة المعقدة، وهو ما وضح الباحث من خلال بعض الأمثلة التطبيقية التي تناولها في فصول هذه الدراسة.	
4757	12197599	Phylogenetic characterization of Newcastle disease virus strains isolated from chicken in relation to vaccination inefficiency/	Hassan· Mohamed Ismail.		2014	Newcastle disease (ND) is one of the most economically important and prevalent poultry diseases around the world. (NDV), the prototype avian paramyxovirus serotype 1 (APMV-1), belongs to the genus Avulavirus, in the family Paramyxoviridae and is the causative agent of ND (Mayo, 2002). Although APMV- 1 is considered as a single serotype, antigenic and genetic diversity have been recognized (Aldous et al., 2003; Kim et al., 2007b; Maminiaina et al., 2010). APMV-I strains have at least three genome lengths: 15,186, 15,192, and 15,198 nt (Czegledi et al., 2006). NDV possesses an approximately 15,000 –nucleotide long, negative sense single-stranded RNA genome which contains six genes in the order of 3'-NP- P-M-F-H N-L-5' , encoding eight proteins the nucleoprotein(NP), phosphoprotein(P), V, X, matrix(M), fusion(F), hemagglutinin neuraminidase(HN), and large polymerase proteins(L), respectively.(Seal et al., 2000)The key contributor to APMV-1 pathogenicity is the formation of an active fusion protein upon cleavage of the precursor F protein (F0) as well as the presence of a number of basic residues in the fusion protein cleavage site (FPCS) (Toyoda et al., 1987; Glickman et al., 1988).The envelope of NDV contains two transmembrane glycoproteins, F protein, which forms spike-like protrusions on the outer surface of the virion; F protein mediates fusion of the virion envelope with the cellular plasma membrane (Nagai et al., 1989). The HN protein is responsible for the attachment of virus tosialic acid-containing receptors on the host cell. In addition, HN has neuraminidase activity (NA) that cleaves sialic acid from sugar side chains, thereby, releasing progeny virions from the surface of infected cells (Lamb, and Parks. 2007).The HN protein also interacts with the F protein for fusion promotion activity (Morrison et al., 1991); it induces protective immunity to NDV in chickens (Meulemans et al., 1988). Both HN and F glycoproteins are important for virus infectivity and pathogenicity (Nagai et al., 1976).There are two different systems of classifying NDV genotypes, based on the FPCS sequence with nominal discrepancies. The first system classifies NDV into 6 lineages with 13 sub-lineages (Kim et al., 2007) and three additional sub lineages were added later (Snoeck et al., 2009). The second system divides NDV into class I (with 9 genotypes) and class II (with 11 genotypes) (Kim et al., 2007b).The class I viruses with a genome size of 15,198-nt are distributed worldwide in wild birds and generally avirulent to chickens and have been isolated from live bird market samples (Kim et al., 2007; Miller et al., 2010). The class II Phylogenic characterization of NDV field isolates and assessment its relation to vaccine failure through the following steps. 1. Samples collection from outbreaks among the vaccinated chicken farms showing ND clinical signs. 2. Virus propagation in the embryonated eggs. 3. Heamagglutination test (HA) and heamagglutination inhibition test (HI) to identify NDV. 4. Pathotyping of obtained NDV isolates using MDT test. 5. RRT-PCR to confirm the NDV cRNA in HA &HI positive samples.	

						Salmonella is a major food-borne pathogen, frequently associated with human gastroenteritis throughout the world. The global burden of human gastroenteritis due to Salmonella has been estimated 93.8 million cases, resulting in 155,000 deaths /year (Majowicz et al., 2010). In addition to the risks to public health, Salmonella spp. Infections imposes economical losses to both healthcare systems and the poultry industry (Collard et al., 2008).More than 2,600 serovars of Salmonella have been identified, some of which are responsible for human illness and diseases in a wide variety of animals (Gast, 2008).Poultry considered a major reservoir for many non-host specific motile serovars of Salmonella, and often human infection is attributed to consumption of contaminated poultry products, such as eggs and meats (Gast, 2003) and all motile serovars of them are zoonotic with variable infection intensities Although Salmonella enterica subsp. enterica serovar Enteritidis (S. Enteritidis) and S. Typhimurium are commonly isolated from poultry and often cause human infections (Humphrey, 2000; Herikstad et al., 2002; Galanis et al., 2006), other poultry-originating emerging serovars are also reported (van Pelt et al., 2003; Bangtrakulnonth et al. , 2004)]. Also, S. infantis and S. kentucky causing severe typhoid-like symptoms sometimes leading to death. These serotypes can be responsible for disease outbreaks leading to severe economic losses (Calenge et al., 2010)The intestinal tract is the primary source of salmonella, where colonisation is favored by intensive animal production (Antunes et al., 2003).Infections with non-typhoidal Salmonella (NTS) are a significant cause of illness and death worldwide. About 1.4 million cases are observed in the United States annually, out of which 600 are fatal (Lin-Hui and Cheng-Hsun, 2007). NTS are also among the most common causes of invasive bacterial childhood disease (Stevenson et al., 2007) for which antimicrobial chemotherapy can be life saving.Antibiotic agents are essential for human health to treat bacterial infections and widely used in animal husbandry for several purposes including therapeutics, prophylaxis and growth promotion. However, the increase in antibiotic resistance is attributable to the misuse or excessive use of antibiotics in human and veterinary medicine)Pappaioanou, 2004).Antimicrobial resistance is a global public health problem. Although all countries are affected, the extent of the problem in the developing countries is unknown (Ang et al., 2004), especially the emergence of multi-drug resistant (MDR) Salmonella strains (Van

4759	12197603	Postpartum Reproductive Study of Anestrous Buffaloes Treated With CIDR™/	Ibrahim· Ayman Mohammed Ahmed.		2014	The long post-partum anoestrus in buffalo is a major factor for long calving interval and low reproductive efficiency. This study was conducted on 29 buffalo randomly from different farmers during the period from May to October (2012). The animals were suffering from prolonged postpartum anestrous (3 - 9 months). The main purpose of this study was to evaluate the effect of P4 supplementation (CIDR) in the course of ovsynch protocols in the treatment of post-partum an estrous buffalo with subsequent resumption of cyclicity and reduction of calving interval. The buffaloes under the study were marked by ear tag numbers and had been divided according to the treatment and insertion of the CIDR device into three groups as following; 1-Control group (CTL): include 6 buffaloes have only ovsynch protocol without CIDR insertion. 2-CIDR-A group: include 10 buffaloes have CIDR within ovsynch protocol.3-CIDR-B group: include 13 buffaloes have CIDR inserted before ovsynch protocol. The blood sample were collected at the days of study as following; day - 10, 0, 4, 7, 9 and 60) for determination of P4 levels and phosphorus level. Pregnancy diagnosis was determined at 60 days post insemination by using rectal palpation. The overall question for this study was whether initiation of the CIDR plus Ovsynch protocols produces differences in the rates of synchronized pregnancy and ovulation compared to Ovsynch protocols in anestroussupplementation from a CIDR insert before and as a part of the ovsynch protocols would improve fertility. In the present study, providing exogenous P4 improved the conception rate in the post partum anestrous buffalo as following 1-Control group: The conception rate was 66, 7 %. 2-CIDR-A group: The conception rate was 30%. 3-CIDR-B group: The conception rate was 53, 8%.from the previous result our present study suggests that: Using of CIDR before applying the GPG synchronization regimen could be more beneficial in improving the conception rates in buffaloes. Since the animals may utilize more phosphorus and other metabolites in activating the follicular dynamics and ripening the conceiving oocyte in the ovulatory follicle. · Using of ovsynch protocol (GPG) in postpartum buffalo had a higher significant pregnancy rate than using of CIDR within or before GPG.		

4760	12197611	فاعلية وحدة دراسية في العلوم باستخدام الألعاب الإلكترونية التعليمية في تنمية مهارات التفكير التخليى واكتساب المفاهيم العلمية لدى تلاميذ المرحلة الإعدادية/ سليم، رأفت سليم عبد العزيز .			2014	يتناول هذا الملخص عرض مشكلة البحث، وأسئلة البحث، وحدود البحث وأهدافه، وأهميته، وفروضه ، وخطواته ، وأهم النتائج التي توصل إليها البحث، وتقديم أهم التوصيات والبحوث المقترحة في ضوء النتائج التي تم التوصل إليها وفيما يلي بيان ذلك . مشكلة البحث : تحددت مشكلة البحث الحالي في تدني مهارات التفكير التخليى وتدني اكتساب المفاهيم العلمية لدى تلاميذ الصف الثاني الإعدادى مما يستدعى البحث عن استراتيجيات تدريسية جديدة يمكن أن تساعد في حل مشكلة البحث. أسئلة البحث: يجيب البحث الحالي عن السؤال الرئيس التالي: ما فاعلية وحدة دراسية في مادة العلوم باستخدام الألعاب الإلكترونية التعليمية في تنمية مهارات التفكير التخليى واكتساب المفاهيم العلمية لدى تلاميذ الصف الثاني الإعدادى؟ وينتزع من هذا السؤال الرئيس الأسئلة الفرعية التالية: 1- ما مهارات التفكير التخليى التي يمكن تنميتها لدى تلاميذ الصف الثاني الإعدادى؟ 2- ما مدى توافر مهارات التفكير التخليى لدى تلاميذ الصف الثاني الإعدادى؟ 3- ما صورة وحدة دراسية في مادة العلوم مصاغة باستخدام الألعاب الإلكترونية التعليمية؟ 4- ما فاعلية وحدة دراسية في مادة العلوم باستخدام الألعاب الإلكترونية التعليمية في تنمية مهارات التفكير التخليى لدى تلاميذ الصف الثاني الإعدادى؟ 5- ما فاعلية وحدة دراسية في مادة العلوم باستخدام الألعاب الإلكترونية التعليمية اكتساب المفاهيم العلمية لدى تلاميذ الصف الثاني الإعدادى؟ أهداف البحث: يهدف البحث الحالي إلى: 1- تحديد مهارات التفكير التخليى التي يمكن تنميتها لدى تلاميذ الصف الثاني الإعدادى. 2- تعرف فاعلية وحدة دراسية في مادة العلوم باستخدام الألعاب الإلكترونية التعليمية في تنمية مهارات التفكير التخليى لدى تلاميذ الصف الثاني الإعدادى 3- تعرف فاعلية وحدة دراسية في مادة العلوم باستخدام الألعاب الإلكترونية التعليمية اكتساب المفاهيم العلمية لدى تلاميذ الصف الثاني الإعدادى أهمية البحث: ترجع أهمية البحث الحالي إلى أنه: يقدم نموذجاً لتدريس إحدى الوحدات الدراسية لمنهج العلوم بالمرحلة الإعدادية باستخدام الألعاب الإلكترونية التعليمية يمكن - الاستفادة به عند تدريس موضوعات العلوم بمراحل التعليم المختلفة 2- يقدم نموذجاً إجرائياً لكيفية تصميم وحدة (دورية العناصر وخواصها) من كتب العلوم المقرر على تلاميذ الصف الثاني الإعدادى باستخدام الألعاب الإلكترونية التعليمية مما يساعد معلمى العلوم على كيفية تنفيذ دروس مادتهم باستخدام نفس الطريقة 3- لفت انتباه المسؤولين عن تعليم العلوم إلى ضرورة الاهتمام بالتفكير التخليى لدى المتعلمين 4- لفت انتباه واضعى مناهج العلوم إلى ضرورة الاهتمام باكتساب المفاهيم العلمية لدى المتعلمين. فروض البحث: 1- يوجد فرق ذا دلالة إحصائية بين متوسطات درجات أفراد المجموعة التجريبية ومتوسطات درجات أفراد المجموعة الضابطة على مقياس مهارات التفكير التخليى [الأبعاد – الدرجة الكلية] بعد تطبيق البرنامج لصالح أفراد المجموعة التجريبية 2- يوجد فرق ذا دلالة إحصائية بين متوسطات درجات أفراد المجموعة التجريبية ومتوسطات درجات أفراد المجموعة الضابطة على اختيار المفاهيم العلمية [الأبعاد – الدرجة الكلية] بعد تطبيق البرنامج لصالح أفراد المجموعة التجريبية 3- توجد علاقة ارتباطية موجبة دالة إحصائية بين درجات أفراد المجموعة التجريبية على مقياس مهارات التفكير التخليى . ودرجاتهم على اختيار المفاهيم العلمية بعد تطبيق البرنامج
4761	12197624	لبنان في عهد الرئيس شمعون : حسن، نهلة يسن.			2015	تسلط الدراسة الضوء على لبنان في عهد الرئيس شمعون وهي فترة مهمة في تاريخ لبنان شهدت تحولات سياسية واقتصادية كان لها أثرها الواضح عليه بدء من عام 1952م وهو العام الذي شهد اندلاع الثورة اللبنانية التي اطاحت بالرئيس بشارة الخوري بسبب تقشي الفساد والمحسوبية في عهده والتي أتت بالرئيس كميل شمعون الذي كان في صفوف المعارضة آنذاك. وتنتهى بعام 1958 الذي شهد أحداث الأزمة اللبنانية. عندما حملت التبهات حول عزم الرئيس شمعون ترشيح نفسه لفترة رئاسية ثانية. معتمدا على أنصاره الذين يمثلون الأكثرية في البرلمان اللبناني، وهو الأمر الذي طالما عارضه الكثيرون. الأمر الذي ادخل لبنان في نفق مظلم لم تخرج منه إلا بعد رحيل الرئيس شمعون عن سدة الحكم. وسوف يتم مناقشة موضوع الرسالة من خلال تمهيد وأربعة فصول، وفقا للمنهج الموضوعي- مع مراعاة المنهج الزمني. رحلة ما قبل المدرسة هي واحدة من أهم المراحل كما أن لديها تأثير كبير ليس فقط على مستقبل الفرد ولكن أيضا المجتمع. لذلك، رعاية الأطفال ما قبل المدرسة أمر لا مفر منه مثل الاضطرابات العاطفية والمشاكل النفسية للأطفال واجبت يكون لها تأثير كبير على حياة القادمة الخاصة بهم. حياة الإنسان مثل سلسلة التي تربط الحاضر بالماضي. اضطرابات لما قبل اجه - أطفال المدارس هي صعبة للغاية للتعامل معها في المستقبل. ومع ذلك، رعاية الأطفال ما قبل المدرسة وتحديد الاضطرابات، والاضطرابات السلبية خاصة تؤدي إلى ارتباط عال والصحة النفسية الجيدة. ونتيجة لذلك، أصبح من الضروري بالنسبة لنا أن مشاهدة الأطفال بعمق حتى تتمكن من تحديد وقت مبكر من الاضطرابات التي تعوق تنميتها، تشخيص عليها، ومعرفة أسبابها ومحاولة حلها. علاوة على ذلك، واضطرابات الكلام لها بعض الآثار النفسية التي تجعلها تستحق دراسة خاصة في ما قبل - المرحلة الدراسية. هذه الاضطرابات قد يؤدي الأطفال إلى الصراع الداخلي لأنها لا يستطيعون التعبير عن أنفسهم. هذا يمكن أن يجعل الأطفال معزولة وقلق حول محيطها. لذلك، تحول الدراسة الحالية لإعداد برنامج إرشادي (بالنسبة للأطفال والآباء والأمهات) للحد من الاضطرابات العاطفية للأطفال مرحلة ما قبل المدرسة الذين يعانون من اضطرابات الكلام2-مشكلة الدراسة: مشكلة الدراسة الحالية تكمن في الإجابة عن السؤال الرئيس التالي:
4762	12197629	عبداللطيف، نجلاء شوقي. فعالية برنامج إرشادي (للأطفال والوالدين) لخفض الاضطرابات الانفعالية لدى أطفال ما قبل المدرسة المضطربين كلامياً/			2015	ما هو فعالية acounseling برنامج (للأطفال والآباء والأمهات) للحد من الاضطرابات العاطفية لمرحلة ما قبل - أطفال المدارس الذين يعانون من اضطرابات الكلام؟الأسئلة التالية تأتي تحت مظلة السؤال الرئيسي السابق:1. ما هو فعالية acounseling برنامج (للأطفال والآباء والأمهات) للحد من الاضطرابات العاطفية لمرحلة ما قبل - أطفال المدارس الذين يعانون من اضطرابات الكلام؟. ما هي درجة استمرارية فعالية برنامج إرشادي (للأطفال والآباء والأمهات) للحد من الاضطرابات العاطفية لمرحلة ما قبل - أطفال المدارس الذين يعانون من اضطرابات الكلام؟.أهداف الدراسة: الدراسة الحالية تهدف إلى:

					التعرف على مدى فعالية برنامج إرشادي في خفض الاضطرابات العاطفية (القلق الاجتماعي - الخجل - سلبى تقدير الذات) للأطفال ما قبل المدرسة الذين يعانون من اضطرابات الكلام - التعرف على مدى استمرارية فعالية برنامج إرشادي في خفض الاضطرابات العاطفية (القلق الاجتماعي - الخجل - اضطرابات withs احترام الذات السلبى) للأطفال ما قبل المدرسة
4763	12197638	أثر استخدام بعض أساليب التدريس القائمة على الذكاءات المتعددة على تحسين مهارة التمرير في كرة القدم لدى تلاميذ المطيري، سعد سعيد دغيم .		2014	أصبح التقدم العلمي والتطور التكنولوجي سمة عالمنا المعاصر، وحتى يستطيع الأفراد التفاعل مع هذا العالم، والمساهمة في تطوير مجتمعهم أصبح الاهتمام بالثروة البشرية ضرورة حتمية لتقدم المجتمعات، ومن الطبيعي أن عصر التكنولوجيا الحديثة وتكنولوجيا المعلومات، لابد أن يتطلب تغييرات جوهرية في جميع مجالات الحياة، ويعد مجال التعليم من المجالات الأساسية التي يتناولها هذا التغيير، بدءاً من المفاهيم والمسميات الأساسية إلى كافة مكونات النظام التعليمي. وهناك العديد من الأساليب والطرق التي تعمل في تكامل لمعالجة المنهج ، ولاتراء العملية التعليمية ، وإثارة غل المتعلم مما يساعد على الانتباه لعملية الشرح ، والتركيـز ، والاستيعاب ، والاسترجاع (7 : 0/9) وبالرغم من أن هناك مداخل متنوعة ومتعددة ومختلفة للتدريس لكل منها إيجابيات وسلبيات إلا أنه ظهرت مداخل جديدة للتدريس تعمل على تحديث العملية التعليمية وتحقق الهدف بطريقة سليمة وبأقل جهد في التدريس والتعلم (16 : 0/2) أن من أعظم النعم التي كرم الله بها الإنسان أن حياه عقلاً معجزاً في ملكاته وإنجازاته، بما أودعه في هذا العقل من قدرات تعمل وتتفاعل فيما بينها في تنسيق إلهي متكامل، مما دعا الباحثين في علم النفس إلى الاهتمام بالجانب العقلي المعرفي للإنسان ، وكان موضوع الذكاء من الموضوعات التي استمر الجدل والخلاف حولها لسنوات طويلة، ومن ثمرة هذا الخلاف ظهور نظريات واتجاهات عديدة حاولت فهم وتفسير العقل البشري منها الاتجاه التقليدي لدراسة الذكاء بقياسه، واتجاه الذكاءات المتعددة أن التربية في جوهرها عملية إنسانية تهدف إلى بناء الإنسان بناء متكاملًا في جميع النواحي الجسميّة، العقليّة، والوجدانيّة إلى أقصى حدّ تصل إليه قدراته، واستعداداته، وتزويده بالقدرة الضروري من المعرفة الأساسية التي تتناسبه وبالوسائل التي تتناسب مع احتياجاته والعمل على إزاحة المعوقات التي تعرقل مسيرة تعلمه، ومن أهم تلك الوسائل أنشطة الذكاءات المتعددة والتي تسهم في تنمية التوافقات العضلية والعصبية والحسية الحركية ومن ثم تحسين الكفاءة الحركية، كما تسهم في رفع مستوى تركيز الانتباه والقدرة على الإحساس والتصور والتذكر والتمييز الحركي والبصري مما يطور من الاستعداد الذهني وبالتالي يمكن أن تكون وسيطاً ممتازاً لتعليم الكثير من المفاهيم والخطوات الفنية للألعاب الرياضية في جو ممتع ومحبب للنفس. (14 : 84) يشير أحمد أمين (2006م) إلى أن الاهتمام الكبير بالعقل البشري وإمكانياته وأساليب نموه وتطويره يبرز لنا بدون شك ملامح منظومة تربوية مميزة لمستهل الألفية الثالثة، فهي منظومة تراهن على تفتيح عقول الأفراد ورغبتهم، وأيضاً تنمية إمكانياتهم وقدراتهم الذهنية والنفسية والبدنية على أفضل وجه، لتكون في مستوى تطورات المجتمع ، وسعيًا لتحقيق ذلك أُنشِئت الجهود نحو التخطيط لتطوير المناهج الدراسية وتحليل ودراسة البيات التعلم، وفي ضوء ذلك أهتمت بعض النظريات السيكولوجية بتفسير أسباب الاختلاف بين الطلاب في طرق التعلم ومنها نظرية أسلوب التعلم" Learning- style theory، ونظرية الذكاءات المتعددة، "، "Multiple intelligences theory" (4: 1). يؤكد جابر عبد الحميد (2003م) نقلاً عن جاردنر Gardner " ، حيث يرى أن عند كل إنسان سبعة ذكاءات على الأقل مستقلة ولكن بشكل نسبي وهذه الذكاءات هي (لفظي لغوي - منطقي رياضي - مكاني بصري - إيقاعي موسيقي- حركي جسمي- بيني اجتماعي – داخلي شخصي)، ولقد أضاف في السنوات الأخيرة الذكاء الطبيعي والذكاء الوجودي والذكاء الروحي، وأن أداء أي مهمة يتطلب التفاعل بين عدة ذكاءات.(6: 9) يشير محمد طه (2006م) إلى أن نظرية الذكاءات المتعددة استلّزت اهتمام العديد من التربويين في الولايات المتحدة الأمريكية وحول العالم، حتى وجد جاردنر Gardner(1994م) نفسه مندهشاً من هذا الإقبال على نظريته، ويرى اليكس Alex(2000م) أنه بالرغم من أن نظرية الذكاءات المتعددة أوجدت جدلاً في الدوائر النفسية، إلا أنها تلقّت دعماً أكثر في الدوائر التربوية، لانسجامها مع المفاهيم التربوية، كما يرى جاردنر Gardner(1994م) أن نقطة البدء في التطبيقات التربوية لنظرية الذكاءات المتعددة هي بناء النظام التربوي على أساس الفروق الفردية بين الناس في بروفيلاتهم العقلية، وبالتالي في نقاط قوتهم وضعفهم، ولأهمية التطبيق التربوي للنظرية فإن جاردنر Gardner(1994م) أشرف نفسه على محاولة مجموعة من العلماء في مدينة إنديانا بوليس بولاية إنديانا الأمريكية، تصميم أول مدرسة تقوم مناهجها على أساس نظرية الذكاءات المتعددة وأسماها Key School، كما ترأس فريقاً بحثياً بعنوان Project Spectrum، ويهدف إلى تصميم مجموعة مقاييس يمكن من خلالها تحديد البروفيلات العقلية لتلاميذ المدارس في المراحل العمرية المختلفة، والذي قام بتصميم خمسة عشر مقياساً لقياس أنواع الذكاء المختلفة في بيئات طبيعية غير مصطنعة إضافة إلى ذلك فقد تواصلت الجهود في المشروع Project Zero الذي يستهل نظرية الذكاءات المتعددة في فهم قدرات الأطفال وتطويرها.(22: 237-235)

							Saccharomyces, 0.5% and 5% of diet respectively, was beneficial than individual administration.		
4767	12197676		Molecular characterization of methicillin resistant Staphylococcus aureus (MRSA) causing mastitis in lactating dairy cows/	Mohamed- Samy Gamal Al-saied.			Cattle are the most producing animal for milk and meat, it can produce 83.3% of the total milk all over the world (FAO, 2008), and so mastitis is the most predominant infectious disease causing economic losses in dairy industry. The total annual cost of mastitis in cattle is about (1.8 billion \$) (Al-azem et al., 2013) this losses due to cost of treatment, discarded milk, veterinary care and decrease milk yield (Seegers et al., 2003; Fetrow and Anderson, 1987).The reports indicates that more than 137 microbes are the etiological agents of mastitis, in between there are an important microbes such as staphylococci, streptococci and coli forms, while S. aureus is the most prevalent cause (Giesecke et al., 1994).S. aureus was discovered in Scotland, 1880 by the Surgeon Sir Alexander Ogeston (Ogeston, 1984). It is a gram positive bacterium related to family Staphylococcaceae appear as clusters and has many virulence factors help in the pathogenesis of the diseases and escape host defense mechanism (Martin and Bradley, 2004).S. aureus is capable of causing per acute, acute, sub-acute, chronic, and gangrenous mastitis, while the majority of intra mammary infections are subclinical (Radostitis et al., 2007).There are some strains of S. aureus called MRSA have the ability to resist antimicrobials during treatment due to rapid alteration in the resistance mechanism and genetic changes in bacteria (Doworkin et al., 2007). MRSA can resist most antimicrobials especially methicillin,tetracycline and cephalosporins due to carrying mec A gene and blaZ gene (EFSA, 2009).Mec A gene is a part of a large fragment of DNA, present in a specific site of S. aureus chromosome and responsible for synthesis of penicillin binding protein 2a (PBP2a) that has low affinity for B-lactam antibiotics and substitutes for the other PBPs in the cell wall synthesis when they are inhibited by B-lactams (Boyle et al.,2003).Routine techniques for diagnosis of MRSA, through isolation of S. aureus strains from clinical specimen on the specific media, application of antibiotic susceptibility test, chromogenic media and automated method by API-Staph system (Joshi and Devkota, 2014) while PCR technique using mec A gene primer is the accurate method for diagnosis of MRSA (Katayama et al., 2000).This study aim to: ☐ Detect of the prevalence of S. aureus mastitis in lactating dairy cattle in Egypt. ☐ Compare between the prevalence of S. aureus mastitis in mastitic and apparent healthy lactating dairy cows. ☐ Determine the susceptibility of isolated S. aureus strains to methicillin antibiotics. ☐ Detect mec A gene responsible for methicillin-resistance in MRSA. ☐ Compare between the conventional methods and PCR technique in diagnosis of MRSA.		
4768	12197681		Studies on fungi associated with fresh cow meat in Qena Governorate/	Aly, Asmaa Sabry Yassein Mohamed.			Meat has been defined as the flesh of animals which are suitable as food (Forrest et al., 2001). This includes all processed or manufactured products which might be prepared from these tissues i.e. meat may be fresh, cured, dried or otherwise processed. Fiala (2008) forecasted the consumption of meat worldwide to rise by 72% between 2000 and 2030, and Steinfeld et al. (2006) projected the global production of meat to more than double between 2000 and 2050 due to the increasing world population, rising incomes and urbanization. In 2007, an average European Union Citizen ate 91 kg of meat per year (Saarnivaara et al., 2009) and also, consumption of meat is continuously increasing worldwide. The annual per capita consumption increased from 10 Kg in the 1960s to 26 kg in 2000 and will reach 37 kg by the year 2030 (Heinz and Hautzinger, 2007).Meat is every edible part of any slaughtered animals, whether the same is in its natural state or has been subjected to freezing, chilling, salting, canning or other preservative processes (OYSGN, 1978). Meat is a contested area of food production and consumption. Historically, meat has been a scarce and highly appreciated foodstuff, a source of energy and protein, and a palatable food carrying the images of strength, powder and masculinity (Twigg, 1983; Fiddes, 1991). Even today, meat is an important part of western food cultures, and is increasing in importance in other parts of the world. For many people, a meal without meat is a rare exception. However, during the past few decades, meat has increasingly become a subject of controversies relating to health and safety, the environment and animal welfare (Vinnari and Tapio, 2009).Meat is one of the best source of proteins, vitamins and minerals which are essential nutrients required for proper growth and maintenance. The chief constituents of meat are water, protein, fat, phosphorus, iron and vitamins (Eze and Ivuoma, 2012). Also meat has long been known for its nutritive composition which could explain why it is being consumed by many people worldwide. The protein profile of meat consists of amino acids that have been described as excellent due to the presence of all essential ones required by the body. A large proportion of the world's populations rely on meat as a source of food. It has also been proved that protein and vitamins (especially A and B12) in meat could not be substituted by plant sources, further justifying the nutritive importance of the former (Collins and Setona, 2011).Meat is one of the highly perishable foods because of its high nutritional contents, enzymatic action and the presence of microorganisms		
4769	12197687		تأثير برنامج تعليمي باستخدام جوانب وأبعاد الحركة على مستوى الأداء لمهارة دفع الكرة لدى تلاميذ الحلقة الثانية	محمود، جاد عبد الله محمد.			ترجع أهمية جوانب الحركة إلى أنها تمثل الجوانب الأساسية في العملية التعليمية للمهارات الحركية حيث أنها تساعد على اختزال تعقد بيئة المنافسة , واختزال الحاجة للتعليم المستمر , وتوجه النشاط التعليمي , وتسهيل التعلم , وتسهيل الاتصال , وإثراء البناء المعرفي للطفل , وحل المشكلات.		

				من التعليم الاساسي /			وتعد الحلقة الثانية من التعليم الاساسي هي المرحلة الاعيادية فهي تعتبر مرحلة اساسيه في بناء الفرد من حيث الشخصيه المتكامله واعداده بقدر يمكنه من أداء واجباته نحو المجتمع في شتى المجالات المختلفه , وتلعب التربيه البنيه دورا كبيرا في عمليه بناء هذه الشخصيه المتكامله. تعتبر مسابقات الميدان والمضمار احدهم مظاهر الانشطه البنيه, والحركات الطيعيه التي يمارسها الانسان منذ بدء الخليقه , والتي كان يمثل ادائها في حركات الجري والوثب والرمى كما انها تمارس نظرا لقيمتها التربويه ولدورها الهام في تحسين الحاله البنيه , بالاضافه الى انها تشكل القاعده الاساسيه لمراحل التعلم الدراسيه المتنوعه , كما انها ايضا تعتبر مظهرا من مظاهر الحكم على مدى تقدم المجتمعات . مما سبق من خلال عمل الباحث كمدرس للتربيه الرياضيه ومن خلال تحليل الدراسات والمراجع العربيه والاجنبيه ,وجد ان هناك الكثير من الدراسات التي تعتمد على بناء البرامج التعليميه لمسابقات الميدان والتي اهتمت فقط بتعليم المهارات بشكل مباشر او استخدام ادوات وطرق تعليم تدعم الاداء المهارى المباشر كاستخدام الالعب الصغيره او القصص الحركيه او طرق واساليب مقترحه لتحسين الاداء المهارى دون التطرق الى تعليم المهارات الرياضيه الاساسيه في ضوء جوانب الحركه الاساسيه والتي اوضحها Rudlf laban(1957م)(49)من خلال تقسيم ابعاد وجوانب الحركه والذي يساعد التلميذ على التحكم والسيطره وأداء الحركات الانتقاليه بثبات وإتزان لجسمه خلال الاداء في مسابقات الميدان في ضوء معرفته لمفاهيم الجسم ومفاهيم الجيد ومفاهيم الحيز والمكان ومفاهيم العلاقات بالافراد والادوات والاجهزه. هدف البحث: يهدف البحث الحالى إلى بناء برنامج تعليمي مقترح في ضوء ابعاد وجوانب الحركه لتلاميذ الحلقة الثانيه من التعليم الاساسي وذلك للتعرف على : تأثير البرنامج المقترح على مستوى الاداء المهارى لمسابقة دفع الجلة . فروض البحث : توجد فروق ذات دلالة احصائيه بين متوسطات درجات القياسين القبلى والبعدى للمجموعه الضابطه في مستوى الاداء _1 . المهارى لمسابقة (دفع الجلة) لصالح القياس البعدى توجد فروق ذات دلالة احصائيه بين متوسطات درجات القياسين القبلى والبعدى لمجموعه التجريبيه في مستوى الاداء _2 . المهارى لمسابقة (دفع الجلة) لصالح القياس البعدى توجد فروق ذات دلالة احصائيه بين متوسطات درجات القياسين البعدين للمجموعتين التجريبيه والضابطه لصالح _3 المجموعه التجريبيه في مستوى الاداء المهارى لمسابقة (دفع الجلة) لصالح القياس البعدى لتلاميذ الحلقة الثانيه من التعليم الاساسي . نسبة التحسين بين المجموعتين التجريبيه والضابطه _4 منهج البحث: استخدم الباحث المنهج التجريبي نظرا لملائمته لطبيعته البحث وتم ذلك باستخدام التصميم التجريبي لمجموعتين احدهما تجريبية والاخرى ضابطه.		
4770	12197692	ماجستير	DEVELOPMENT OF WEAR MONITORING SYSTEMS IN HEAVY INDUSTRIES USING REVERSING ENGINEERING.	MAHMOUD ALI , YAHIA ELSAYED.	جامعة جنوب الوادى -كلية الهندسة بقنا.	قنا: #####	The wear monitoring in the heavy and dusty industries like cement industry is a very important process and should be done perfectly and reliably. All the monitoring templates for these systems that supplied with the cement grinding and crushing machines is manual till now. It takes many times for a valuable number of records give us a reliable data about the wear occurred, but the time mean cost in the production field. We developed another portable hand held system using reverse engineering process in order to upgrading the manual wear monitoring systems to satisfy the industry needs in reducing the time and costs accurate system reports. The way to do such work is to follow the reverse engineering concepts and focusing on manual measuring methods that still used today's. [Reverse engineering definitions and steps for approach were mentioned and followed on study beginning with studying the manual measuring methods from all its side (that how it be done) and the readings per wear part, also the important results needed from the measuring process]. The next step in reverse engineering process that CAD modelling is the model for the parts need to be manufacturing, transferring to the stress analysis process that prove on the parts will work properly after manufacturing these step done by 3D CAD modelling software solidworks different versions. The next step is to make CAM modelling that converts the data cloud in the CAD model into traces, passes and lines could generate program consists of many orders guide the CNC machine to producing the needed parts. The next step is to CNC manufacturing with the available CNC machine in the college labs taking all the manufacturing and tool machining into account. Finally checking on the final product and make the necessary validation quality control tests by making trials runs and measuring surfaces could prove on . Much many efforts must be done, especially in the next phase for "Egypt" via increasing researches related to our problems that we are faced. We are well known our resources but we must try to exploit then develop it by a way or another.	#####	Under Supervision of Prof. Dr. Eng. Abdel Fattah Mohammed Hashem Assoc. Prof .Dr. Gamal Tag Abdel Gaber Assoc. Prof. Dr. Mohammed Korrany HassanAssoc. Prof. Dr. Mohammed Korrany Hassan
4771	12197711		What is the physiological response of various fertilizers on flax under water stress?/	Hassan· Nora Hassan Youssef.			2014		

							The plant physiology and metabolism are considerably altered by the variation in the surrounding nutritional and environmental factors. This alteration consequently affects the plant growth and productivity. Water deficiency induced by drought and / or salinity could be regarded as one of the major factors that exert considerable alteration of plant growth and metabolism. The degree of these alterations depends on the plant type, the plant growth stage as well as the level of water stress exerted. In addition, agriculture is an essential source for employment. Moreover, the revenue from agricultural exports plays an important role in supporting the country's economy as it is a resource of foreign currency, which alleviates the burden on the balance of payment and enables the country to import the needed food and industrial commodities. The adverse effects of water stress on plants may lead to disturbances in plant metabolism. Therefore, research for the mechanism of plant structural and functional adaptation of drought tolerant species is a field of increasing importance. Many trials have been made to help the plants to overcome these disturbances using variable treatments in laboratory aiming to be applied in future in the field to alleviate the harmful effects water stress on plant growth and the relevant metabolic activities , plant treatments with some exogenously added substances were used. So that, many challenges faced researches in Egypt and we try to answer these problems in detail:Challenge 1:- Water deficit (drought) A major challenge in agricultural practice and research today is how to cope with the environmental stresses including drought in an economical and an environmental sustainable approach. Drought, in conjunction with high temperatures and solar radiation, poses the most important environmental constraint on plant survival and crop productivity. With increasing aridity and a growing global population, modern agriculture is faced with a major challenge to meet increasing food demand with reducing water resources. This appears to be even more difficult when we know that modern agriculture is essentially based on intensive production systems which require large quantities of irrigation water. Improving water-use efficiency (WUE) can help to meet the higher demand for water with a lower supply (Ennajeh et al., 2010). In the face of a global scarcity of water resources, drought has already become a primary factor for limiting crop production in the world. At present, around 18 % of the global farmland is irrigated (more than 240 million hectares), producing about 40 % of the global food supply. Permanent or temporary water-deficit stress limits the growth and distribution of natural and artificial vegetation and the performance of cultivated plants more than any other environmental factor. Hamed (2009) stated that desertification, desiccation and lack of rainfall cause the dominance of drought problem. In Egypt, water availability is considered the prime constraint that determines the addition of new cultivated areas. Agricultural expansion needs a huge amount of irrigation water which is already not sufficient to meet all the expected demands (Farouk and Amany, 2012). This will probably increase water shortages in many parts of the world. Chaves et al. (2003) reported that agriculture is the major user of water resources in many regions of the world. Generally drought stress occurs when the available water in the soil is reduced and atmospheric conditions cause continuous loss of water by transpiration or evaporation. Drought stress tolerance is seen in almost all plants but its extent varies from species to species and even within species (Jaleel et al., 2009).		
4772	12197713		EFFECT OF PHOSPHATE AND PETROLEUM OIL ON THE GENETIC STRUCTURE OF RED SEA FISHES-GROUP/	MOHAMMAD, MOHAMMAD ALLAM AHMAD.		2015	Genetic data have become increasingly more important for conserving, managing threatened and endangered species (Allendorf and Luikart, 2007). Also, genetic data have been used for identifying species and populations that have reduced genetic diversity that may face a greater risk of extinction (Quattro and Vrijenhoek, 1989 and Saccheri et al., 1998). In addition, genetic data can also be used to infer the number of populations or evolutionary groups present (Waples, 1995; Parker et al., 1999; Spruell et al., 2003; Waples and Gaggiotti, 2006; Currrens et al., 2009 and Ardren et al., 2010), information that can be useful in defining management and recovery units. Recently genetic data have been used to address more complex conservation issues including the estimation of effective population size (Peterson and Ardren, 2009 and Small et al., 2009).Molecular techniques have been used as a tool for population structure studies by analyzing dispersal, colonization patterns and gene flow between populations over a variety of geographic scales, however a need for expanding the array of molecular tools available in the context of population genetics. Inferences made from datasets may be influenced by the use of different molecular techniques as for example, allozymes evolve at a slower rate than mitochondrial DNA (which is maternally inherited) and nuclear DNA such as microsatellites (Duran et al., 2004)In the fact, many molecular methods are available for studying various aspects of wild populations, captive brood stocks and interactions between wild and cultured stocks of fish, they are basically categorized undertwo types of markers; protein and DNA. Most of the molecular markers have		

						been used in inter- and intraspecific variations. One of these markers is intersimple sequence repeat (ISSR) markers. (Zietkiewicz et al., 1994 and Okumuş and Çiftci, 2003).The ISSR (Inter-simple-sequence-repeat) method has been added to the growing list of molecular tools. In addition, variable ISSR patterns have potentials as dominant markers for studying genetic diversity of many fishes. ISSR technique was used because it is simple and reliable tool for assessing the molecular genetic variability within and among many living organisms with highly reproducible results and abundant polymorphism (Ratnaparkhe et al., 1998; Tong et al., 2005; Kol and Lazebnyi, 2006 and Kramer et al., 2007).Protein plays an important role in the metabolism and regulation of water balance. It is the basic building nutrient of any growing animal and also play crucial roles in the maintenance of life. Proteins perform the vast majority of the biochemistry required by living organisms. (Usydsu et al., 2009 and Uversky and Dunker, 2010). Protein is a translated phenotypic expression of a genetic code and the variations in the genome usually result in change in the structure of proteins (Bye and Ponnaiah, 1983).Electrophoresis is analysis of biochemical systematics in various taxa. Each species is identified for the number of species-specific proteins by means of high-resolution starch or polyacrylamide and isoelectric focusing (Ferguson, 1974 and Basaglia and Marchetti, 1990). According to (Mc.Laughlin et al., 1982) the molecular mobility of proteins in an electric field depends on their molecular weight, conformation and surface electric charge.Wasim, et al., 2007 and Habib and Samah, 2013 reported that fish are considered as an important source of a cheaper and high quality animal protein, but according to (Saravanan et al., 2011) fish are used as excellent indicator of certain aquatic pollution due to their high sensitivity to environmental contaminants which may damage certain physiological and biochemical processes when contact with the organs of fishesThis study was carried to reveal the effect of phosphate and the petroleum oil on the genetic and biochemical structure of three different species of Red Sea fishes (Lethrinus borbonicus, Siganus rivulatus and Mulloidichthys flavolineatus) which belonged to three different families Lethrinidae, Siganidae and Mullidae respectively, order: Perciformes, class: Actinopterygii.		
4773	12197715	ولادة الأقاليم في العصر السلجوقي عصر السلاطين العظام١٠٩٩ م" - ٤٩٢ هـ / ١٠٣٧ - ٤٣٢ م /	حجازي، أم هاشم محمود جابر.		2015	أدى السلاجقة ذو □ را مه □ ما على مسرح التاريخ، لازالت آثاره باقية، وقد كانوا من الجماعات التركية التي صنعت لها مج □ د وتاريخي □ خا وحضارة في أوطان جديدة ، واقتبست من الحضارات الأخرى مثل الفرس وغيرهم، وسكنوا إقليم ما وراء النهر ثم انتقلوا إلى إقليم خراسان، حيث سمح لهم السلطان محمود الغزنوي بالانسياج في إقليم خراسان وأخذوا في التوسع بحثًا عن الاستقرار ، حتى تمكنوا من إقامة دولة مترامية الأطراف بزعامة طغرليک سنة (٤٢٩ هـ / ١٠٣٧ م). وازدادت تلك القبائل في التوسع حتى وصلت إيران، والعراق، وأسيا الصغرى، والشام، وبعد أن ورثوا أملاك الغزنويين اعترفت بها الخلافة العباسية سنة (١٠٤٠ هـ / م) ثم دخلوا بغداد في عهد طغرليک سنة ٤٤٧ هـ / ١٠٥٥ ، وقضوا على ٤٣٢ آخر ملوك البويهيين(الملك الرحيم) فإزداد نفوذهم في حاضرة الخلافة العباسية، وبخاصة بعد قضائهم على حركة أبي الحارث البساسيري، وإعادة الخليفة العباسي إلى مقر الخلافة بعد طرده منها، فأصبح السلاجق ة سادة الموقف بعد أن حققوا وحدة العالم الإسلامي في المشرق. ومما لا شك فيه أن يكون وراء هذا التاريخ الحافل لدولة السلاجقة ولادة وضعوا اللبنة الأولى لمثل هذه الدولة، لذا جاء موضوع بحثي "ولادة الأقاليم في العصر السلجوقي يلقي الضوء على الدور السياسي والحضاري الذي قام به ولادة الأقاليم في ترسيخ أركان الدولة السلجوقية والذين استطاعوا بعد ذلك تكوين دولة سجلت مكانها في التاريخ، وبخاصة في الفترة المليئة بالتغيرات السياسية والاقتصادية والاجتماعية (م) وهم - ٤٩٢ هـ / ١٠٣٧ - والثقافية، وهي فترة السلاطين العظام (٤٣٢ - ١٠٩٩ السلطان طغرليک (٤٢٩ هـ / ١٠٣٨ م)، والسلطان آلب أرسلان (٤٥٥ هـ / ١٠٦٣ م)، والسلطان ملكشاه (٤٦٥ هـ / ١٠٧٢ م)وقد واجهت الدراسة بع □ ض الصعوبات التي تتعلق بندرة المادة العلمية وما تحويه بطون الكتب من قصور منتثرة عن موضوع البحث، كما كان التناقض والتباين في الروايات التاريخية الذي تتناول تلك الفترة، وكان هذا من المسائل التي تتطلب جهدا مضنيا ودراسة متأنية للوصول إلى الغاية المرجوة والاقتراب من الحقيقة التاريخية لهؤلاء الولاة. وقد قسمت الدراسة إلى مقدمة وثلاثة فصول يعقبها خاتمة ثم ملحق للبحث ثم أوردت قائمة بأهم المصادر والمراجع التي استعنت بها في دراستي : أ □ ما التمهيد: تحدثت فيه عن جغرافية أقاليم الدولة السلجوقية في العصر السلجوقي، ورسمت لها صورة واضحة عن الموقع والحدود، ثم تحدثت عن سلاطين السلاجقة العظام وأقيمت الضوء على والي الإقليم وشروط اختياره. والفصل الأول: تناولت فيه "التطورات الإدارية في عهد سلاطين السلاجقة العظام" حيث الحالة السياسية للدولة العباسية عند دخول السلاجقة العراق، ثم التطور الإداري في عهد كل من السلطان طغرليک (٤٢٩ هـ / ١٠٣٨ م)، والسلطان آلب أرسلان		

						(. /١٠٦٣ م)، والسلطان ملكشاه (٤٦٥ /١٠٧٢ م ٤٥٥ وأ □ ما الفصل الثاني: جاء الحديث فيه عن "مهام ولاة الأقاليم ووظائفهم في الدولة السلجوقية حيث التعرف على الإمارات التي كانت متبعية في الدولة السلجوقية، وتناولت " الحديث عن إمارة العامة والتي شملت إمارة الاستكفاء وإمارة الاستيلاء، وأي □ ضا تحدثت عن إمارة الخاصة ويكشف عن "مراسم ومهام تعيين ولاة الأقاليم في الدولة السلجوقية وتحدثت فيه عن مراسم تعيينهم، والمهام التي تؤول إلى الوالي كما أننى لم أغفل الجهاز الإداري المعاون للوالي تناولت طبيعة العلاقة بين السلطان السلجوقي وولاية الأقاليم. أ □ ما الفصل الثالث والأخير: تناولت فيه الحديث فيه عن " الدور السياسي والحضاري لولاية الأقاليم" حيث تحدثت عن الثورات التي قام بها ولاة الأقاليم ضد سلاطينهم من أجل السيطرة على الحكم، وتحدثت فيه أي □ ضا عن الدور الاقتصادي والاجتماعي الثقافي لولاية الأقاليم وأنهيته بتشجيع ولاة الأقاليم للعلماء والادباء في أقاليم الدولة السلجوقية. أما الخاتمة: فقد تناولت فيها ما توصلت إليه من نتائج عن دور الولاية في تطور شتى نواحي الحياة في الدولة السلجوقية، وخاصة أن هؤلاء الولاة ك □ ونوا دو" لا مستقلة بهم.		
4774	12197726	فاعليه برنامج مقترح فى الدراسات الاجتماعيه قائم على النظرية البنائية لتنمية بعض المفاهيم والوعى الأمنى ومهارات اتخاذ القرار لدى تلاميذ المرحلة الإعداديه/	سلام، باسم صبرى محمد .		2014	تشهد المجتمعات عديد من التغيرات فى مناحي الحياة المتعددة السياسية والاجتماعية والاقتصادية، ونتيجة للتقدم الهائل وظهور العديد من التقنيات الحديثة التى ظلت الكثير من أعباء الإنسان ، إلا أنها من ناحية أخرى أدت إلى ظهور المشكلات والأخطار التى تتعلق بشعور الإنسان بالأمان ، مما يعنى أن هناك حاجة إلى تربية أممية. وتهدف التربية الأممية إلى إعداد التلاميذ للحياة فى المجتمع باستقرار ونجاح، بإكسابهم معلومات واتجاهات ومهارات لتحقيق الأمان ، بحيث يؤثر ذلك على سلوكهم تجاه أنفسهم والآخرين ، وفى فهمهم للخطر ومصادره، وكيفية اتقائه وتجنبه ، ويمكن أن يتحقق ذلك من خلال تنمية المفاهيم الأممية والوعى الأمنى ومهارات اتخاذ القرار المرتبطة بالأمان وتظهر أهمية تنمية المفاهيم الأممية والوعى الأمنى خاصة من الأخطار الطبيعية ، فقد أدى حدوث زلزال عام ١٩٩٢ م فى مصر إلى عديد من الخسائر البشرية ،وعند البحث عن الأسباب و□جد أن تلك الخسائر تضاعفت بسبب عدم توفر القدر الكافى من التربية الأممية والوعى الأمنى . كما تمر مصر بظروف صعبة فى جميع النواحي خصوصاً السياسية ، بعد ثورة ٢٥ يناير ٢٠١١ م ؛ فظهرت تجربة ديمقراطية جديدة ، الأمر الذى جعل كثرة الاحتجاجات والتظاهرات أمراً عادياً ،فصاحب تلك الاحتجاجات والتظاهرات سلوكيات غير أممية كأعمال حرق وتكسير وتخريب من قبل بعض المتظاهرين ، إضافة إلى استغلال فئة من البلطجية ومثيرى الشغب تلك التظاهرات فى حدوث أعمال بلطجة ترهب وتؤذى المتظاهرين ، مما يجعل وجود وعى أممى وتنميته مفاهيم الأمان أمراً ضرورياً عند الخروج للتظاهر السلمى .وتكثى أهمية تحقيق الأمان من الإنترنت؛ حيث يستخدم الكثير من المراهقين الإنترنت استخداماً سيئاً بهدف الوقوف على معرفة القيم والعادات الغربية ومحاوله تقليد هذه القيم والثقافات مما ينعكس على سلوكياتهم بالسلب ، الأمر الذى يؤدى إلى ظهور المشكلات الاجتماعية والأخلاقية والصحية والتعليمية لديهم . وينصح الكثير من العلماء والباحثين بأهمية الاهتمام بتلاميذ المرحلة الإعدادية وضرورة فهم طبيعتها ومتطلباتها ، لأنها تمثل مرحلة خطيرة ومهمة ، تظهر فيها بعض التغيرات الاجتماعية والجنسية والحركية والإنفعالية والعقلية ، والتى إذا أساء المراهق التعامل معها جعلته معرضاً للعديد من الأخطار مما يعنى وجود وعياً أممياً يمثل أمراً ضرورياً ، كما تنسم بالاستقلالية والاعتماد على النفس ومحاوله الانفراد باتخاذ القرارات ، ويمكن الاستفادة من ذلك فى توجيه التلاميذ توجيهاً صحيحاً لتنمية مهارات اتخاذ القرار المتعلقة بمشكلات الأمان من الأخطار التى تهددهم .ويمثل مناهج الدراسات الاجتماعية بالمرحلة الإعدادية أقرب المناهج إلى حياة التلاميذ وتجييبهم أممياً ، فيعد من أهم حقوق التلاميذ البينية التى ينبغى أن تهتم بها تلك المناهج لإعداد الأجيال الحالية والمستقبلية هو حقهم فى العيش فى بيئة آمنة وملائمة تضمن لهم الصحة والسلامة . ويمكن تنمية المفاهيم الأممية والوعى الأمنى ومهارات اتخاذ القرار بمناهج الدراسات الاجتماعية من خلال نماذج تطبيقية للنظرية البنائية كما فى نموذج التعلم التوليدى ، فمن الأساسيات التى تعتمد عليها تلك النظرية وذلك النموذج زيادة الوعي بين من يعرفه وما يريد معرفه وذلك من خلال تنمية المفاهيم والوعى، مما يساهم فى ازدياد حساسية الإنسان للطريقة التى يستطيع بها القيام بنشاطاته وافكاره حتى يساعد على حل مشكلاته واتخاذ القرارات السلمية .تحدثت مشكلة البحث فى" وجود قصور فى المفاهيم الأممية والوعى الأمنى ومهارات اتخاذ القرار المرتبطة بالأمان لدى تلاميذ المرحلة الإعدادية ". وقد تبين ذلك القصور من خلال ما أشارت إليه نتائج وتوصيات الدراسات السابقة ، ونتائج تطبيق الاستبيان الذى طبقه الباحث على مجموعة من معلمى ومعلمات الدراسات الاجتماعية بالمرحلة الإعدادية حول مدى اهتمام وتضمن مناهج الدراسات الاجتماعية بالمرحلة الإعدادية أهداف وموضوعات تساعد فى تحقيق الأمان لدى التلاميذ ، ودور المعلمين فى ذلك ، والمقاييلتين الشخصيتين مع عدد من الأسر عن سلوكيات أبنائهم غير الأممية ، ومع عدد من أفراد الدفاع المدني والطوارئ حول مدى تمكن الأفراد بصفة عامة وتلاميذ المرحلة الإعدادية لمهارات الأمان عند حدوث اخطار طبيعية ،بونتائج تحليل أهداف مناهج الدراسات الاجتماعية بالمرحلة الإعدادية توصيات منظمة الصحة العالمية (WHO).		

4775	12197730	ماجستير	EFFECT OF FIRE ON STRUCTURAL BEHAVIOR AND BOND STRENGTH OF NORMAL AND HIGH STRENGTH CONCRETE BEAMS .	مصطفى على،مروة أحمد	جامعة جنوب الوادي - كلية الهندسة بقنا.	1/1/20 14. قأ:	This thesis presents results from an experimental study on the effect of fire on the structural behavior and bond strength of normal strength concrete (NSC) and high strength concrete (HSC) beams. Sixteen full scale beams (150×300×2800 mm) were tested till failure under four-point flexural loading, The investigated parameters include cover thickness (3 and 5 cm), type of cooling (water and air), and time of firing (3 and 5 hours). Except of the control beams, beams were heated to a degree of temperature of 600 o c according to the ISO 834 standard fire curve and then were cooled before testing. The test set-up was designed to evaluate displacement changes of simply supported beams subjected to static loading and effect of fire on bond strength between concrete and steel. Test results for NSC and HSC beams were compared for each of the test variables. The test results show that the relationships between time and temperature distributions in the beam sections are very similar and are unrelated to the strength of the concrete, with the exception of the upper part of the beam section. Deflections were measured at each load increment. Cracking loads, crack propagation and ultimate loads were recorded. Reduction of ultimate loads, increase in deflection and reduction in concrete compressive strength due to fire exposure were observed. Test results show that the bond and compressive strength decrease significantly as the temperature to which concrete is subjected is increased .The loss in bond and compressive strength may be attributed to the micro cracks in concrete developed at high temperatures. The concrete containing mineral admixtures were found to be able to retain their properties better at high temperatures. Mineral admixtures can be preferably used in concrete to achieve higher resistance in structures with high risk of fire.	#####	Supervised by: Associate Prof. Dr./ Alaa Ibrahim Arafa Dr./ Hemdan Okasha Ahmed
4776	12197736		الأثر النحوي في معالم التنزيل للبعوى (ت ٥١٠ هـ) :	عبدالكريم، محمود عبدالله نور الدين،		2015	إن هذه الرسالة تكشف عن الأثر النحوي للآيات القرآنية، وما يلقي به هذا الأثر من تكتير للمعاني وإعجاز بالإيجاز، حيث يختلف المعنى باختلاف الإعراب قصير الكلمة القرآنية كأنها كلمتان أو ثلاث، والجملة كأنها جملتان أو ثلاث على حسب الأرجح الإعرابية المحتملة، وبذلك تصبح الكلمة أو الجملة القرآنية كالماسة المشعة أني نظرت إليها ألقت إليك بأضواء بيانية، وقد اتخذت الدراسة من كتاب معالم التنزيل للبعوى (ت510 هـ) وهو من كتب التفسير المشهود لها – ميدانا تطبيقيا، وذلك بالتنعيم الحصري لما جاء في هذا الكتاب من هذا القبيل، وقد بلغت المواضع ثمانين موضعا.		
4777	12197769	ماجستير	دراسة ترميم وعلاج وصيانة السراييوم (مدفن العجول المقدسة) بمنطقة سفارة.	مصطفى حسنين،حجاجي خيمس.	جامعة جنوب الوادي - كلية الآثار بقنا.	1/1/20 14. قأ:	يشتمل موضوع البحث "دراسة ترميم وعلاج وصيانة السراييوم (مدفن العجول المقدسة) بمنطقة سفارة" على ستة فصول وإنتهى بالمخرجات المستنتجة من الدراسة وقائمة من المراجع العربية والمعرية والجنبية التي تم إستخدامها في البحث : وتناول كل فصل جانب من جوانب الموضوع على النحو التالي، الفصل الأول تناول النواحي التاريخية والأثرية والجيولوجية لمنطقة سفارة وكانت عبر العصور ودورها التاريخي الذي لعبته كجبانة ملكية رسميللبلاد، ومكان سعيد للدفن من وجهة نظر المصريين القدماء، وقد وجد من خلال الدراسة أن اسم سفارة جاء تخليدا لإسم الإله الجنائزي سوكر او سكر رغم انه في العصور الوسطى قفلت المنطقة قبيلة عربية تحمل نفس الاسم، ولقد كان الملك مينا موحد القطرين هو اول من لفت الانتباه الى اهمية هذه المنطقة عندما قام ببناء قلعة حربية على مقربة من المنطقة أصبحت فيما بعد حاضرة البلاد وعاصمتها الأولى وأطلق عليها " من نفر " الأثر الجميل " ثم حورت الاسم فيما بعد التسمية في العربية الى "منف" وفي اللاتينية الى " ممفيس " وكانت سفارة هي الجبانة الرسمية لهذه البلاد . الفصل الثاني إشتمل على وصف التركيب الجيولوجي والطبقي للصخور المحتوية على مقبرة السراييوم. والفصل الثالث تناول هذا الفصل دراسة مظاهر وعوامل التلف المؤثرة على السراييوم . والفصل الرابع تناول دراسة المكونات المعدنية والسيج الصخرى للوحدات الصخرية المكونة للسراييوم . والفصل الخامس تناول الدراسة التجريبية لإختبار أفضل المواد المقوية المقترحة إستخدامها لتقوية الواحدات البنائية للسراييوم . والفصل السادس تناول أساليب ترميم ومعالجة السراييوم والأعمال التطبيقية للسراييوم .		إشراف:- د.م.أ/عبد عبدالله الدربي د.م.أ/نجاح جمعة محمود الرشيدى .
4778	12197811		The effect of different saline environments on the endophytic fungi of some medicinal plants and their secondary metabolities synthesis /	El-Dawy, Eman Gamal Abd-El Nasser Mohamed.		2015	Medicinal plant defined as “any plant, which in one or more of its organs contains substances that can be used for therapeutic purposes, or which are precursors for chemo pharmaceutical semi synthesis”. This definition distinguishes those plants that are already scientifically tested from those not subjected to a scientific study but are used in the traditional systems of medicine (Saranraj and Sivasakthi, 2014). They include annual and perennial species and may be cultivated or occur in the wild (Anvarkhah et al., 2013). Plants have the major advantage of being the most effective and cheaper alternative source of drugs (Pretorius and Watt, 2011). The local use of natural plants as primary health remedies, due to their		

						pharmacological properties is quiet common in Asia, Latin America and Africa (Bibitha et al., 2002). Researches on use of plants as the source of drugs and dietary supplements are increasing in recent years (Dhanalakshmi et al., 2013). Potential of higher plants as source of new drugs is still largely unexplored. Among the estimated 250,000 – 500,000 plant species, only a small percentage has been investigated phytochemically and the fraction submitted to biological and pharmacological screening is even smaller. Thus, any phytochemical investigation of a given plant will reveal only a very narrow spectrum of its constituents (Dhanalakshmi et al., 2013). Historically, pharmacological screening of compounds of natural or synthetic origin has been the source of innumerable therapeutic agents. Random screening as tool in discovering newbiologically active molecules has been most productive in the area of antibiotics (Gerhartz et al., 1985; Kroschwitz and Grant, 1992). More than 80% of the world's population relies on traditional medicine for their primary healthcare needs. Plants used in traditional medicine contain a wide range of ingredients that can be used to treat chronic as well as infectious diseases. A vast knowledge of how to use the plants accumulated in areas where the use of plants is still of great importance (Diallo et al., 1999). The medicinal value of plant lies in some chemical substances present in them (Dhanalakshmi et al., 2013). It has been reported that natural products (their derivatives and analogs) represent over 50% of all drugs in clinical use, in which natural products derived from higher plants represent about 25% of the total (Lawal et al., 2010). The World Health Organization estimated that over 80% of the people in developing countries rely on traditional remedies such as herbs for their daily needs and about 855 traditional medicines include crude plant extracts (Tripathi and Mukherjee; 2003). This means that about 3.5 to 4 billion of the global population rely on plants resources for drugs (Farnsworth, 1998). Consumers are increasingly interested in complementary and alternative medicines, including herbal medicine, as they perceive these forms of healing as being both safe and effective. This trend in use of alternative and complementary healthcare has prompted scientists to investigate the various biological activities of medicinal plants (Dhanalakshmi et al., 2013).		
4779	12197854	فاعلية برنامج لتطوير النمو المهني لمعلمي التربية الرياضية في الكرة الطائرة /	متوفى، هشام أسامة عبدالرازى.		2015	الإهتمام بتدريب المعلمين أثناء الخدمة يعتبر إهتماما يرفع كفاءة النظام التعليمي من خلال إطلاع المعلمين على الجديد والمستحدثات سواء في طرق وتقنيات التعليم أو محتوى المناهج أو في نظم وأساليب إدارة المنظمات التعليمية، ورفع الكفاءة الإنتاجية للمعلمين يكون عن طريق زيادة كفاءتهم الفنية وصلف مهاراتهم التدريسية مما يعود بالنفع على الطلاب، حيث لوحظ أن هناك علاقة طردية بين المعلمين والطلاب فكلما زادت فعالية المعلمين زاد تأثيرهم على الطلاب ويساعد ذلك على تحقيق الأهداف وتنمية المواهب. ومما سبق يتضح لنا مدى أهمية إعادة النظر بشكل مستمر في تأهيل المعلمين وتدريبهم المستمر بما يتناسب مع التغيرات الجديدة، وبما يمكنهم من التعامل مع ما أفرزته الثورة العلمية والتكنولوجية من وسائل وتقنيات، وضرورة تغيير أسس العملية التربوية ومناهجها وأساليبها تبعاً لذلك. وإذا كان هذا المبدأ ينطبق على أى معلم بوجه عام فإنه ينطبق على معلم التربية الرياضية بوجه خاص فهو ركن أساسى من أركان العملية التعليمية وحجر الزاوية فيها، فهو يعمل على تنمية القدرات والمهارات المختلفة لدى المتعلمين عن طريق معرفة حاجاتهم وميولهم وطرق تفكيرهم، هذه بالإضافة إلى الدور الريادى الذى يلعبه فهو رائد رياضى- إجتماعى يساهم فى تطور المجتمع وتقدمه عن طريق تربية النشء التربية الصحيحة. وتعد لعبة الكرة الطائرة ضمن الألعاب الجماعية التى تأثرت إيجابيا وبشكل واضح من خلال تطور العلوم المختلفة المرتبطة بالجمال الرياضى، كما أنها تحتل مكانة بارزة بين الألعاب المختلفة وهى ضمن الأنشطة الرياضية داخل مناهج التربية الرياضية للمرحلة الإعدادية التى تعد من أهم المراحل السنية لبداية ممارسة الأنشطة الرياضية عامة والكرة الطائرة خاصة. ولعبة الكرة الطائرة تحتاج إلى طرق التعلم الحديثة التى تلعب دورا هاما عند إكتساب وإتقان المهارات الحركية حيث أنها مهمة وضرورية لتعلم المتعلمين فى مختلف الأنشطة الرياضية، وتساعدهم على إختزال زمن إكتساب المهارات الحركية وإتقانها، والمهارات الفنية عنصر أساسى ومهم، ولا يمكن ممارسة الكرة الطائرة بصورة صحيحة إلا من خلال عملية تعلم المهارات الفنية، لذلك لا بد من إعداد المعلم بصورة مستمرة للتعرف على طرق التعلم الحديثة لتحقيق أهداف مناهج التربية الرياضية بصفة عامة وأهداف مناهج الكرة الطائرة للمرحلة الإعدادية بصفة خاصة.		
4780	12197870	Staphylococcus aureus problem in local hatcheries in Luxor governorate/	Ahmed, Rehab Youssef Salama.		2014	Hatchery hygiene is recognized as an important factor in healthy poultry production. Rodgers et al., (2003). Poor standards of hatchery hygiene may lead ultimately to an explosion of pathogenic organisms resulting in Sevier economic loss. The environment of a poultry hatchery is very susceptible to contamination by microorganisms which can adversely affect hatchability of the eggs and can result in embryonic deaths. Typical microorganisms which are believed to adversely affect chick quality and cause embryonic deaths include E. coli, Staphylococci species, Streptococci species and Aspergillus Fumigatus. Sheldon and Brake, (1991). Therefore, the development and maintenance of an effective hatchery sanitation program is essential for the successful operation of a poultry hatchery. Investigations have revealed large microbial populations in many		

						hatcheries despite the application of various sanitation measures. The degree of contamination was first measured numerically by the microbiological examination of hatcher fluff, a method developed by Nichols et al., (1967); Furuta and Maruyama, (1981); Chen et al., (2002). The greatest level of microbial air contamination in a hatchery occurs at hatching, when dust, fluff and bacteria can become airborne and circulate throughout the hatchery. Davies and Wray, (1994). Efficiency of hatchery sanitation procedure is evaluated by microbiological examination of fluff, dead-in-shell (Dis) embryos and hatchery environment. Examination of fluff and Dis embryo indicates the presence of pathogenic microorganisms in the hatchery environment. However, the probe into the sources and reservoirs of these contaminants within hatchery and microbiological examination of hatchery environment are required. Application of effective disinfectant at manufacturer's recommended dilution level is included in any hatchery sanitation program Deeming, (1998). Yolk sac infection is the main infectious cause of chick mortality during the first week of the post-hatching period. Rai et al., (2005) and Yassin, (2009) and is the main cause of chicks mortality accounting for large economic losses to the poultry industry. Ulmer Franco, (2011). It can cause mortality rate of about 5-10%; however the condition has also been associated with much higher mortality especially in chicks during first week of age. Rahman et al., (2007). Contamination of unhealed navels has been suggested as a cause of yolk sac infection in newly hatched chicks Fassenko and O'Dea, (2008). Yolk sac infection (YSI) is a major cause of mortality in broilers during their first week of life. Jordan, (1996). (YSI) occurs in all flocks resulting in decreased hatchability, increased mortality and increased cull rate due to retarded growth. Mosqueda and Lucio, (1985). Yolk sac infection occurs mainly due to bacterial contamination of the eggshell at the broiler breeder farm, shortly after the egg is laid, while the cuticle is still moistened. Saif et al., (2003). It was suggested that Poor fertile egg storage conditions, poor egg disinfection, and humidity levels during incubation may also promote egg contamination. Bains, (1979). Another important route of yolk sac infection is the bacterial penetration through a poorly healed navel. Wray et al., (1996).		
4781	12197886		The Quantum Thermodynamic Functions of Plasma in terms of Green's Functions/	Ahmed, Ragaa Ahmed Abbas.		2014 In this thesis, we calculated the quantum thermodynamic functions of plasma, such as equation of state, osmotic pressure and excess free energy as well as the distribution functions, by using Green's function technique. We used this technique by the fact that thermodynamic functions can be calculated from the mean value of the potential energy according to a general quantum statistical formula. It should be pointed out that the mean value potential is given in terms of wave functions, Green's functions, screened potential, Hartree and Hartree-Fock approximation. Also, the screened potential was used in deriving the previous mentioned thermodynamic functions. On the other hand, we calculated the excess free energy and the osmotic pressure until the third virial coefficient for one and two component plasma. In special case for the one component plasma (OCP) (the model of identical point charges immersed in a uniform background, while the continuous charge density of the background is chosen to be equal and opposite to the average charge density of the point charges, so that the system as a whole is electrically neutral) for example the electron gas. Also, the model under our consideration is a two-component plasma (TCP) ; i.e. neutral system of point like particles of positive and negative charges. We plotted the curves, which illustrate the results in terms of the plasma parameters and compared our results with other well known results in the low density. The quantum excess energy results, until the third virial coefficient, were compared with other results for one and two component plasma We obtained the quantum binary and triplet distribution functions in terms of Green's functions technique. The triplet distribution function was calculated in two form; one of them is based on the Kirkwood Superposition Approximation (KSA) which assumes that the potential in a set of three particles is the sum of three pair potentials, this is equivalent to assuming that the triplet distribution function is the product of the three binary distribution functions. The other form was calculated by integrating the triplet distribution function by using the mean value potential. The results were given		

							in terms of the Born parameter . Also, we calculated the distribution functions in terms of the distance between two charges r by using the screened potential. Lastly, the numerical calculations for the electron gas were also given.		
4782	12197909		النص الجاهلي: تشكيلات الإيقاع تشكيلات المعنى/ خلف الله محمد محسن عبد الشافعي.	Ali' Ayman Mahmoud Ismail.		2014	يهدف البحث الى وضع برنامج تدريبي باستخدام أسلوب التدريب بالإيقاع ومعرفة تأثيره على تحسين بعض القدرات البدنية الخاصة بالسلاسل الحركية قيد البحث على عارضة التوازن لناشئات الجيمباز والتعرف على تحسين مستوى أداء السلاسل الحركية قيد البحث على عارضة التوازن لناشئات الجيمباز وقد استخدمت الباحثة المنهج التجريبي بطريقة القياسات القليلة والبدنية كتصميم تجريبي يتناسب مع أهداف البحث ووجد الباحث أن البرنامج التدريبي باستخدام أسلوب التدريب بالإيقاع أحدث تأثيراً ايجابياً على عينة البحث الأساسية ووجد تحسن في بعض القدرات البدنية الخاصة بالسلاسل الحركية قيد البحث على عارضة التوازن لناشئات الجيمباز تحت 10سنوات والمتمثلة في القوة العضلية للرجلين والظهر والمرونة للظهر ومفصل الفخذ والعمود الفقري والمدى الحركي لمفصل الفخذ في اتجاه البسط والقبض والتوافق العضلي العصبي والتوازن الحركي وحدث تحسن في مستوى الأداء المهارى للسلاسل الحركية قيد البحث على عارضة التوازن لناشئات الجيمباز تحت 10سنوات وحدث تحسن في الربط بين المهارات الحركية التي تتكون منها السلسلة الحركية وتحسين التوقيت الزمني الصحيح لأداء السلسلة الحركية وتوصى الباحثة بضرورة التدريب على بعض السلاسل الحركية على عارضة التوازن لناشئات الجيمباز في مرحلة سنية مبكرة حتى تكتسبها الناشئات بشكل قمة المثالية في الأداء ومراعاة التدرج في التدريب على بعض السلاسل الحركية على عارضة التوازن لناشئات الجيمباز والتدرج من حيث (السهل- الصعب)وبضرورة اهتمام المدرسين باستخدام تمرينات ذات أساليب مختلفة خاصة أسلوب التدريب بالإيقاع على تحسين القدرات البدنية المختلفة ومستوى الأداء المهارى لبعض السلاسل الحركية على عارضة التوازن لناشئات الجيمباز ومراعاة خصائص المراحل السنية عند العمل مع الناشئين وذلك حتى يمكن التخطيط للارتقاء بمستوياتهم بما يتناسب مع إمكانياتهم البدنية والجسمية والحركية والعضلية والاجتماعية.		
4783	12198024	ANALYSIS AND DESIGN OF IMPROVED PERFORMANCE MICROSTRIP ANTENNA ARRAY USING FDTD METHOD/				2014	In recent year communication systems had been taken more interest in wireless systems due to easy use and availability everywhere any time. Front end is considered the main part of wireless equipment, antenna play the main roles in front end. Microstrip patch antennas have many advantages make it one of research interest point in last decades. This thesis concentrates on major parts for enhancing the performance of microstrip patch antennas (MPAs). In the first part finite difference time domain method (FDTD) is used to analyze and study the operation of the microstrip patch antenna. 3D simulation for Maxwell's equations is carried here with Liao's absorbing boundary conditions for the problem space. The FDTD method is used to calculate the scattering parameters of the patch antenna and visualize the EM waves through the patch. The calculated scattering parameters from the FDTD equations are compared with the simulated results. Good agreement between the calculated and simulated results is achieved In the second part of this thesis, the mutual coupling effects between the elements of classical microstrip patch antenna arrays (MPAAs) has a great interest and can affect the performance of MPA. A compact meander shaped defected ground structure (DGS) is applied to reduce the mutual coupling (MC) between elements of microstrip antenna array with 0.5 0 elements spacing. The proposed antenna array consists of two elements. Four meander shaped slots in the ground plane are used between elements to reduce the coupling between the array elements. The antenna is simulated using CST microwave studio software, fabricated on FR4 substrate with dielectric constant of 4.3 and thickness of 1.6 mm by etching the groundplane of the microstrip antenna and measured. The results show that a reduction in mutual coupling from -23 dB to -52 dB is obtained between elements at the operating frequency of the antenna array. The gain is increased by 0.6 dBi. A small shift in operating frequency from 4.74 to 4.8 GHz is introduced. The measurement results prove the high efficiency of this configuration.The last part in this thesis has two topics the first topic is the dual band microstrip patch antenna (DBMPA) design on FR4 substrate with dielectric constant of 4.3 and thickness of 1.6 mm by etching the patch using loaded C-shape slot with three stubs, the patch has 2.4 GHz and 3.5 GHz resonance frequency. The second topic is designing isolated elements DBMPAA with small mutual coupling using C-shape DGS, the MC reduction has been achieved for the low frequency because of the high frequency has low MC without the DGS. The results show that a reduction in mutual coupling from -25 dB to -47 dB is obtained between elements at the low operation frequency of the antenna array. Good agreement between the FDTD calculated and simulated results is achieved. The proposed DBMPAA loaded with C-shape DGS fabricated and measured. Good agreement between the simulated and measured results is achieved.		

4784	12198079	Study of Some Efficient Algorithms for humanface detection in image/	Hefny, Noha Abo El-Wafa.			The great increase of computational software resources in the last decade has provided the computers with the means to solve many computer vision tasks like object tracking and recognition. The great increase of computational software resources in the last decade has provided the computers with the means to solve many computer vision tasks like object tracking and recognition. Within these tasks, face detection of humans occupy one of the most important roles. Automatic human face detection from images in surveillance and biometric applications is a challenging task due to the variances in image background, view, illumination, articulation, and facial expression. Recognition of human faces is useful in any user identification system or face database management. Detection of face humans can be used as a initializing step to human motion, lip, or gestures tracking, as a localization step for face recognition as well as for image databases queries. The purpose of this research is to study various techniques for face detection and face recognition and compare their performance by implementing them, then investigate the possible improvements on these techniques increase their efficiency or to find new technique that has more advantages such as reduce the execution time and its flexibility. In this way, the objective of this thesis is obtained by proposed new algorithm in face detection, and another algorithm of face recognition Chapter 1 presents the motivation behind this thesis and defined the fundamental problem considered with real applications. It also summarized the contributions made toward this problem. Chapter 2 presents a brief study of the fundamental concepts of the face detection operation and definitions related to color spaces behind different skin and face detectors. Some of face detection techniques based on color models are described. Chapter 3 introduces a proposed new algorithm that can detect human faces from an image, skin color as a tool for detection with different filtering steps, using Template Matching. The proposed algorithm performance compared to the previous methods, such as Zahra, and Viola-Jones techniques. Numerical results underline the robustness of the presented approach for tested images of faces which have a specific complexion varying under certain range are shown. Chapter 4 describes some basic definitions of face recognition. We study the face recognition algorithms such as Principal Component Analysis (PCA), Independent Component Analysis (ICA), Multilinear Principal Component Analysis (MPCA) and Linear Discriminant Analysis (LDA). Neural networks with Gabor filters, Neural networks and Hidden Markov Models, and Fuzzy neural networks have been discussed. Chapter 5 presents a new approach for face recognition based on similarity measure method. In addition, We apply various measure classes to increase the efficiency of the proposed method. Experimental results show that these similarity measures can give an useful way for measuring the similarity between fuzzy sets for face recognition. Chapter 6 summarizes the highlights and the results of this thesis and presents some open problems.		
4785	12198085	القضايا النقدية والبلاغية في شعر الماحي :	نصر، مسعود صبرى نوبي.		2014	إن هذه الدراسة بعنوان القضايا النقدية والبلاغية في الشعر الماحي وهي تتناول شعر محمد مصطفى الماحي وهو شاعر من شعراء العصر الحديث وثمة أسباب عديدة جعلتني أقدم على اختيار شعر الماحي مجالاً لدراستي النقدية البلاغية منها : أولاً فلة الدراسات النقدية التي تكشف عن شخصية الماحي وتتناول حياته وأسرته والمدرسة الشعرية التي ينتمي إليها فقد انحصرت هذه الدراسات في دراستين أولاًهما بعنوان "محمد مصطفى الماحي وحياته وشعره " وهي للباحث محمد علي عبد المجيد وقد حصل بموجبها علي درجة الماجستير من كلية اللغة العربية بأسبوط جامعة الأزهر الشريف في عام ألف وتسعمائة وثلاثة وتمتين ميلادية إلا أنها لم تف بالمطلوب وتناولت شعره بشكل عام أما الدراسات الثاقبة فكانت بعنوان " الاتجاه الديني بين محمود غنيم ومحمد مصطفى الماحي " منح بها الباحث إبراهيم محمود غنيم ومحمد مصطفى الماحي" منح بها الباحث إبراهيم محمود أمين حجازي درجة الماجستير في كلية اللغة العربية بالمنصورة جامعة الأزهر الشريف في عام ألفين وستة ميلادية ومن هذا المنطلق ولهذه الأسباب والدوافع جاءت هذه الدراسة النقدية والبلاغية لشعر محمد مصطفى الماحي سعياً نحو الكشف عن قرائه الإبداعية وإلقاء الضوء على رمز من رموز الشعر العربي البارزين أما المنهج النقدي المتبع في هذه الدراسة فهو المنهج التكاملي فقد كنت حرصاً علي استقراء نصوص الماحي الشعرية .		
4786	12198184	شعر الأطفال عند أحمد سويلم حتى 2010/	محمد، بخيته حامد ابراهيم.		2014	فقد أواخر القرن الماضي بدأ الاهتمام بالطفولة بظهور ، وأصبح موضوع أدب الأطفال من الموضوعات الهامة على ساحة الأدب العربي؛ إذ أن الأطفال هم رجال المستقبل وهم مرآة المجتمع، فكان لا بد من أن نتكاتف الد ا رسات، وتولى ذلك الجانب بمزيد من الاهتمام والرعاية والد ا رسات العلمية ؛ لأن "الطفولة في عصرنا الحديث، أصبحت مهمة في ذاتها ولذاقتها، وتعد مرحلتها أهم مرحلة في بناء الإنسان. والأدب الذي يقدم للأطفال من أهم العناصر في تكوين هذه المرحلة، وبالتالي يدخل في صنع الإنسان وبنائه. والمطل أثناء نموه العقلي يبدأ في التعرف بالحياة على أساس أن خب ا رتها الماضية سبيل إلى فهم أعقق للحاضر ، ومن ثم فقد يكون أدب الأطفال أقوى سبيل يعرف به الأطفال الحياة بأبعادها الماضية، والحاضرة، وحتى المستقبلية. ويحتاج عقل الطفل وخياله إلى الأجناس الأدبية المختلفة، لتغذى جوانب تفكيره، وتقوى نواحي الخيال فيه، ولتكون وسيلة من وسائل التعليم والتنشيط بالتسلية والمشاركة في الخبرة. ومن هنا كان أدب الأطفال من أقوى الدعامات في التكوين السليم للإنسان". (والشاعر واحد من تلك الأجناس الأدبية المختلفة، وهو " لغة القلوب ، و مرآة النفوس ، يعبر عن) الخلق العامضة، ويكشف عن الإحساسات الدفينة، يخاطب الوجدان والعاطفة، ويستلهم الوحي والخيال، وينفذ إلى أعقق شيء في الإنسان والطبيعة، يقوم على اللفظ الرشيق والتصوير الدقيق والتشبيه الديق والنعم الحلو" (٢) وبما أن الشعر هو واحد من تلك الأنواع الأدبية التي يتعامل من خلالها الأدباء مع الأطفال ، فقد جاءت الرسالة		

						تتناول هذا الجانب بالد ا رسة والكشف والتحليل عند شاعر معين أعطى الكثير من وقته للأطفال كتابة وإبداعا وهو الشاعر أحمد محمد محمد سويلم الذى أصدر العديد من الدواوين التى تبين إيمانه بهذه المرحلة المهمة فى حياة الإنسان، فمجمعنا يعلم "أن مرحلة الطفولة هى أروع المراحل التى يمر بها الإنسان فى رحلة حياته، وأن الطفولة كلما ذكرت فإن القلب ا ردة والطهر والنقاء تذكر معها، ويجول فى خواطرنا قول الشاعر: وصن ضحكة الأطفال يا رب إنهما إذا غردت فى ظمأى الرمل أعشيا" (٣) وغير خاف على الجميع أن " لأدب دوره (الحنسارى فى حياة المجتمعات على مر العصور ، ولأدب دوره المؤثر فى توعية أف ا رد المجتمع بقضاياهم المجتمعية والإنسانية والفكرية خصوصا إذا قدم رسالته فى قالب فنى جميل وممتع وينظرة علمة إلى أدب الطفل سنجد أن فيه ذلك التعبير الواضح عن المجتمعات والبيئات المختلفة بما فيها من جوانب اجتماعية وقيم وثقافات وعادات". (١) ره: □□□□□ ب □ □ □ □ وع □ □ □ □ و P □ □ □ □ وى □ □ □ □ F شعر الأطفال لون من ألوان أدب الأطفال، ولكن "ليس المهم أن نقدم أى شعر للأطفال، بقدر أن يكون شع ا ر يحسه ويتذوقه الأطفال، ويشعرون به حين يقرعونه أو يسمعونهم يقرعون أو يسمعون شع ا ر". (٢) ولما كان أدب الأطفال ميدانا خصبا للباحثين تتوق أنفسهم للإسهام فيه بنصيب، من أجل هذا تأقت نفسى لحوض هذا المجال، واقتحام هذا الميدان؛ لكى أضرب لى بسهم فيه. وقد تحقق هذا الأمر، وتم اختيار شعر الأطفال كنموذج لد ا رستى فى أدب الأطفال وقد كان من الأهمية بمكان أن أبحث عن شاعر له إسهامات فى شعر الأطفال لم يتناوله أحد بالد ا رسة من قبل، وقد شأنت إ ا ردة الله أن يكون الشاعر أحمد سويلم هو من أبحث عنه . هدف ا درا : إن غاية ما تهدف إليه الد ا رسة هو تناول شعر الأطفال عند أحمد سويلم والتحليل والنقد للكشف عن مدى تمكنه من تنويع الأدوات اللغوية ألفاظا، وأسلوبيا، وصياغة فى قالب شعري يستوعبها الأطفال، ويتذوقونها بحيث تتأل قبولهم، وتحوز إعجابهم، وتوصل إليهم رسالة الشاعر التى ا ا ردها من خلال قصائده.
			تقع منطقة الدراسة فى الركن الجنوبى الشرقى من الصحراء الغربية وتمتد حدود المنطقة من خور توشكى وحوضه جنوبا حتى الحدود الجنوبية لخور كلالشة وحوضه شمالا وتهدف الدراسة إلى تحديد الأشكال الجيومورفولوجية المميزة للمنطقة وتكألف الدراسة من ستة فصول تسبقها مقدمة وتعقبها خاتمة ويبدأ كل فصل بمقدمة وينتهى بخاتمة. وقد تم اختيار الموضوع لعدة أسباب منها أن هذه الدراسة تمثل إمتدادا للدراسات عديدة سابقة تناولت أجزاء من توشكى أيضا توافر المادة العلمية مادة الدراسة وأيضا رغبة فى إعداد دراسة جيومورفولوجية لها أبعاد تنموية وتخطيطية. وتهدف الدراسة إلى تحديد الأشكال الجيومورفولوجية المميزة للمنطقة ودراساتها دراسة تفصيلية وإنشاء قاعدة بيانات جغرافية لمنطقة الدراسة تسهم فى حصر إمكانيات المنطقة. تم اختيار الموضوع بناءً على عدة أسباب، أهمها : ١- أن هذه الدراسة تمثل إمتدادا لدراسات عديدة سابقة تناولت أجزاء من منطقة -١ توشكى أو بعض الأشكال الجيومورفولوجية بها، ولذلك أراد الطالب أن يواصل هذه الدراسات التى تهدف فى النهاية إلى دراسة المنطقة دراسة تفصيلية بغية منها المخططون فى المستقبل القريب. ٢- محاولة تقديم دراسة جيومورفولوجية تساعد فى تحديد العلاقة بين العمليات والأشكال الجيومورفولوجية من جانب وتنمية المنطقة من جانب آخر. ٣- كان تتوفر المادة العلمية من مصادر مختلفة، والتي تمثل أرضية للدراسة أثر كبير فى اختيار موضوع الدراسة، بالإضافة إلى أن هذه المنطقة من المناطق الواعدة ؛ لذا أراد الطالب دراستها. ٤-،ميل الطالب إلى التخصص فى الجيومورفولوجيا ذات الأهتمام بالأبعاد التطبيقية -٤ ورغبته فى إعداد دراسة جيومورفولوجية لها أبعاد تنموية وتخطيطية. قدرة الطالب على تطبيق تقنيات الاستشعار عن بعد ونظم المعلومات الجغرافية - ٥ فى الدراسة الجيومورفولوجية، لتوضيح إمكانية إسهام هذه التقنيات فى دراسة الجيومورفولوجيا والخروج بنتائج مفيدة فى البحث. وتهدف الدراسة إلى: ١- تحديد الأشكال الجيومورفولوجية المميزة للمنطقة، ودراساتها دراسة تفصيلية، ورسم -١ خريطة جيومورفولوجية تفصيلية لها). ٢- محاولة الوقوف على طبيعة العلاقة بين العمليات والأشكال الجيومورفولوجية من -٢ جانب ومواقع التنمية الموجودة بالمنطقة من جانب دراسة لبعض الخوارزميات الفعالة الخاصة بكشف الوجه البشرى هدفت الدراسة إلى محاولة القاء الضوء على معوقات التنمية (زراعية - سميكية - صناعية - تعدينية - سياحية - عمرانية) بمنطقة البحيرة سواء معوقات طبيعية أم بشرية. ناقشت الدراسة إمكانية الزراعة كاستخدام احدى للمنطقة وذلك فى ضوء العجز المائى وارتفاع تكلفة استصلاح الفدان أو تركها منطقة حماية طبيعية وتحديث عن مؤشرات تغير الخصائص الكيميائية والبيولوجية لمياه البحيرة وانكاسها على مستقبل مياه مصر وفرض قيود التوسع العمرانى بالمنطقة، وعُيّن بدراسة مدى ارتباط النشاط الزلزالى بأسوان بتناقص المنسوب ببحيرة ناصر وتأثيره على مشروعات التنمية المقترحة حول البحيرة. كما ناقشت المعطيات الجغرافية للوصول الى تنمية مستمرة بالمنطقة.	٢٠١٤	حمادى، صفاء محمد مالك. التنظم البيئي بمنطقة بحيرة ناصر /	4787 12198231
			لم تتجه الدراسات فى مجال الآثار والفنون الإسلامية إلى الأهتمام بالبعد الوطني للتحف الزجاجية ، وهو البعد الذى يحدد الوظيفة التى صنعت من أجلها التحفة الزجاجية . فقد كان للوظيفة دور بارز فى تحديد معظم أشكال تلك التحف وبعض زخارفها وأحيانا ألوانها ودرجاتها . ومع تعدد وظائف واستخدامات التحف الزجاجية فى العصر الإسلامى ، تحدت أشكالها والزخارف المنفذة عليها والوان الزجاج المصنوعة منه. ولهذا وقع اختياري لموضوع " الوظيفة فى التحف الزجاجية فى العصر الإسلامى فى ضوء مجموعات المتاحف " . أسباب اختيار الموضوع : دراسة معظم التحف الزجاجية التى نشرت من قبل من الجانب الفنى المتمثل فيما تشتمل عليه تلك التحف من زخارف 1 باعتبارها تحفا فنية ، ولم تكن هناك أى محاولات لمعرفة وظيفتها على الرغم من أنها تحفا تطبيقية لها وظائف واستخدامات الإرتباط الوثيق بين وظيفة التحفة الزجاجية وبين شكلها وزخرفتها ولونها ، فمن الملاحظ أن معظم التحف الزجاجية وإن 2 لم يكن كلها شكلت وزخرفت وصنعت من زجاج ذو ألوان ودرجات محددة وذلك بالأسلوب الذى يجعل التحفة متمائنة مع تعدد وتتوع استخدامات التحف الزجاجية فى العصر الإسلامى فمنها ما تم استخدامه فى التجميل أو الطعام والشراب أو 3 الوزن والكيل أو فى الاستخدامات الطبية أو حتى فى الإضاءة ، وبالتالي اختلفت أشكال وزخارف والوان كل نوع عن النوع الآخر .	٢٠١٥	بهجات، هالة رفعت محمود. الوظيفة فى التحف الزجاجية فى العصر الإسلامى فى ضوء مجموعات المتاحف /	4788 12198284

						إن دراسة وظيفة التحف الزجاجية تساعد في التعرف على بعض عادات وتقاليد الشعوب الإسلامية، وذلك من خلال 4. التعرف على كيفية إستخدامهم لكل نوع من أنواع التحف الزجاجية. من أهم الأسباب التي دفعتني إلى دراسة هذا الموضوع عدم وجود دراسة متخصصة قائمة بذاتها تتناول الوظيفية في 5. التحف الزجاجية في العصر الإسلامي أهداف الدراسة: تهدف الدراسة إلى التعرف على وظيفية التحف الزجاجية، وذلك من خلال وصف وتحليل تلك التحف من الجانب 1. الوظيفي مما يعطي صورة كاملة للقارئ عن كيفية استخدام التحف الزجاجية بأنواعها المختلفة تهدف الدراسة إلى عرض مدى تأثير وظيفة التحفة الزجاجية على شكلها المتمثل في الحجم والشكل العام وكذلك الأشكال 2. الجزئية ، مما يساعد على سهولة استخدام كل تحفة للوظيفة التي صنعت من أجلها تهدف الدراسة إلى عرض مدى تأثير وظيفة التحف الزجاجية على بعض زخارفها. وأن الوظيفة لم تفرض نفسها على 3. الزخارف مثلما فرضت نفسها على شكل التحفة، فهناك أنواع من التحف الزجاجية فرضت عليها الوظيفة استخدام الزخارف . وأحياناً أخرى تفرض عليها استخدام زخارف محددة ، وهناك أنواع أخرى فرضت عليها الوظيفة خلوها من الزخارف تهدف الدراسة إى عرض مدى تأثير وظيفة التحف الزجاجية على صناعتها من ألوان ودرجات معينة من الزجاج، بحث 4. تكون متماثية مع الوظيفة تهدف الدراسة إلى توضيح مدى إهتمام المسلمين بتطبيق مبادئ العقيدة الإسلامية في إستخداماتهم للتحف، ومدى تأثير 5. ذلك على بعض أشكال التحف الزجاجية وكذلك على بعض زخارفها
4789	12198305	الإجماع بين النحاء والاصوليين /	أبو زيد، مبارك على بكير.		2014	أصول النحو هي الأدلة الإجمالية التي بُنى عليها علم النحو وهي عند النحاة (سماح، وإجماع، وقياس، واستصحاب حال (1) ، فلا بد من تعريف كلمة أصل . الأصل لغةً :هو أساس كل شيء وقاعدته يقول الراغب الأصفهاني : " وأصل الشيء قاعدته التي لو توهمت مرتفعه لارتفع بارتفاعه سائر ها «ذلك قال الله تعالى (2) وقد تأصل كذا ،ومجد أصيل ،وفلان لا أصل له ولا (2) (فصل:" 3 وقال ابن فارس : ("أصل (الهمزة والصاد والام ،ثلاثة أصول متباعة بعضها من بعض (أحدهما أساس الشيء ... " 1، والأصل في اصطلاح النحاة : تدل كلمة أصل عند النحاة على معان عدة منها:أساس الشيء : "الأصل ف اللغة أساس الشيء وهو ما ينتهي عليه غيره .وف الاستعمال هو أولى حالات الحرف أو الكلمة دون أن يطرأ عليها أي تغير ... " 5) القاعدة الأصلية للشيء التي تحول عنها :مثل ميقلت ،وميعاد ،وميزان 2- والأصل:موقات،وموعاد،وموزان لأنه من الوقت والوعد والوزن :..." 6)وعلم أصول النحو هو : "علم يبحث عن أدلة" ، النحو الإجمالية من حيث هي أدلته وكيفية الاستدلال بها وحال المستدل " 1 .) الأصل في اصطلاح الفقهاء : تدل كلمة أصل ف استخدام الأصوليين على عدة معان (2) منها : - الدليل :يقال :أصل هذه المسألة الإجماع ،أي دليلها الإجماع،"وأصل هذه المسألة 1 الكتاب والسنة أي دليلها" (3) - الرجح :مثل :قولهم :الأصل ف الكلام الحقيقة ،أي الرجح ف الكلام حمله على الحقيقة 2 لا المجاز. القاعدة :يقال :إباحة الميتة للمضطر على خلاف الأصل ،أي على خلاف القاعدةالعامه 3 - المستصحب : يقال :الأصل براءة الذمة ،أي يستصحب خلو الذمة من الانشغال 1 يشيء،حتى يثبت خلافه. ومعنى أصول الفقه : " هي أدلة الفقه ،وجهات دلالتها على الأحكام الشرعية ،وكيفية حال المستدل بها من جهة الجملة لا من جهة التفصيل ... ")
4790	12198326	دور التربية الإسلامية في الحد من الجريمة في ضوء بعض التغيرات المعاصرة/	نجدى، اسلام فتحى تمام.		2015	تعتبر الجرائم ضد الإنسانية من الجرائم الدولية الخطيرة ومن الأعمال اللاإنسانية التي ترتكب ضد مجموعة من السكان المدنيين من البشرية والأسرة الإنسانية، ومن الجرائم التي حُرمت من قبل الأديان والشرائع السماوية ووجدت استنكاراً واسعاً من الضمير الإنساني والمنظمات الحقوقية العالمية والإقليمية والوطنية. وترتكب هذه الجرائم من قبل أفراد يعملون استناداً لأوامر أعلى من حكوماتهم، ومنها جاءت ضرورة اتخاذ خطوات هامة من قبل أعضاء المجتمع الدولي لمواجهة هذه الجرائم بما لايسمح لمرتكبيها المغلطين ومن هم ورائهم بالإفلات من العقاب تحت غطاء من حصانة رئاسية أو دبلوماسية أو تمسك بالسلطة الأفعال الجرمية للدولة بتطبيق مبدأ أعمال الدولة.
4791	12198474	التطورات السياسية في سوريا 1954-1958م/	محمود، إبراهيم محمد.		2015	وقد تناولت هذه الدراسة مع التطورات السياسية في سوريا خلال الفترة من 1954 - 1958 أو كان يطلق عليه من قبل العديد من المؤرخين والكتاب "الجمهورية البرلمانية الثانية" منذ ذلك الحين، عاد هذا البلد إلى الحكم المدني والتمتع بالسيادة البرلمانية والديمقراطية في المقارنة مع القاعدة العسكرية السابقين التي تميزت عن طريق التحكيم. ولكن هذه سلسلة من الحكومات الضعيفة قصيرة المدى ولم يحقق تسوية كما لحن الحياة السياسية في سوريا لم يكن وفقا لرغبات الجماعة الحاكمة من الحزبين التقليدية (الشعبية والوطنية). كما التحولات الداخلية على المسرح السياسي السوري وتدابعت الحرب الباردة كالت في ذلك الوقت كان السبب المباشر لخلق حالة من الاضطراب السياسي وعدم الاستقرار في البلاد. ظهور القوميين الراديكالي والبعثيين والشويعيين السوريين خلال تلك الفترة وتوسيع قوتها أيضا. وادى ذلك إلى زيادة الصراع onpower بينها وبين الأحزاب التقليدية. الأحزاب المتطرفة، من ناحية أخرى، لا يكون له نفس كبير الشعبي الذي يحتوي على الأحزاب التقليدية، وبالتالي، فإن هذه الأحزاب لم يستعد للعمل الدستوري وبقي إلى السلطة ليس فقط من قبل المعارك الانتخابية لكنه سعى إلى جعل العلاقات في الجيش لاستخدام على أنها أداة في صراعهم ضد الأحزاب التقليدية، وهذا جعل تنطوي على المسؤولين في الجيش في الشؤون السياسية، والتي أدت بشكل واضح إلى ازدواجية الحاكم منذ عام 1955 بزيادة في السنوات المقبلة. وبحلول عام 1958، وكان العسكريون تماما الأطراف political. البلد الغلبا، بدلا من، التوصل إلى اتفاق لتشكيل جبهة وطنية وتقديم برنامج سياسي يعبر عن تطلمات الشعب مع مختلف شرائح تتناضل من أجل بناء مجتمع مدني وتحقيق الاجتماعية و العدالة السياسية، تتصارع باغان مع بعضها البعض للاستيلاء على السلطة لتحقيق الهدف والأغراض التي جعلت القاعدة أضعف بكثير من الأحداث العظيمة التي واجهت البلاد خلال تلك الفترة الخاص.

						بالإضافة إلى هذه التحولات السياسية الداخلية، كانت هناك مناقشات بين -Arab وزيادة حدة الصراع بين الاتحاد السوفياتي والولايات المتحدة خلال الحرب الباردة والتي دفعت الدول العربية والأجنبية لاستغلال الانقسامات الداخلية في سوريا مما أدى لتعميق هذه الخلافات وربط السياسة الداخلية لسوريا حتماً مع السياسة الإقليمية والدولية في نفس الوقت. وبالتالي، أصبحت سوريا مركزاً للينفصاح التجاذب بين المعسكرين المتنافسين الذي قاد البلاد لكثير الخارجى conspiries والقلاقل وعدم الاستقرار في الوضع الداخلي وشملت هذه الدراسة أربعة فصول، إلى جانب ذلك، فصل تمهيدى، ومقدمة وخاتمة. في مقدمة جتنا حول موضوع الدراسة وأهميته وأسباب لدينا لاختيار هذا الموضوع، أعطينا لمحة عامة عن بعض المصادر والمراجع الهامة التي استخدمناها في هذه الدراسة. في الفصل التمهيدي، كان الخطاب حول فترة حكم العسكريين للبلاد منذ 1949 - 1954. لذا جاء هذا الفصل تحت عنوان "الوضع السياسي في سوريا قبل 1954. The الفصل الأول بعنوان" نهاية القاعدة العسكرية والعودة إلى حكومة مدنية إلى البلد في 1954. We ناقشت أحداث انقلاب فبراير 1954 ضد نظام العقيد أدیب الشيشكلي شركة، للإطاحة به، مغادرة البلاد والعودة إلى حكومة مدنية للبلاد. وعلاوة على ذلك، تابعنا الانتخابات الرئاسية في سبتمبر - 1954 October وتشكيل مجلس نيابي. وكان عنوان الفصل الثاني "القوى السياسية والصراع على السلطة في سوريا"، لاستكشاف القوى السياسية على المشهد السياسي السوري خلال هذه الدراسة 1954- 1958 والصراع على السلطة، فضلاً عن تدخلات العسكر في الحياة السياسية الشؤون التي أدت إلى الاضطراب والتوتر على الساحة السياسية، علاوة على ذلك، الأزمات الوزارية التي أنجزت هذا الوضع غير مستقر. وخصص الفصل الثالث لدراسة التدخلات الخارجية في الشؤون الداخلية السورية، والموقف من سوريا من تحالف بغداد ومبدأ أيزنهاور، لذلك هذا الفصل المعنون "التحالفات الغربية والمؤامرات ضد سوريا" انتهى الخطاب للدراسة تحت عنوان "التوجه السوري نحو مصر وتحقيق الوحدة في عام 1958". للتليل على الظروف التي أدت السوريين يصرون على إقامة الوحدة مع مصر عام 1958 وتتبع الجهود والخطوات التي أنجزت هذا الحدث القريد. وجاء الاستنتاج بعد الانتهاء من دراسة هذا الموضوع من جميع جوانبه، لاستعراض النتائج والملاحظات من هذه الدراسة	
4792	12198505	Evaluation the effect of the timing of administration of misoprostol rectally in reducing blood loss during cesarean section /	Mohamed , Sayad aboalabas .			2011 Caesarean section is one of the most commonly performed major operations in women through out the world. Rates are escalating, with studies from the United States of America, the United Kingdom and China reporting rates between 20%and 30% (Martin et al., 2002). The demographic and health survey in Egypt 2004 were approved that The hospital caesarean section rate was 22% in Egypt. Variations by place of delivery were evident, although determinants of caesarean section characteristics were more important in Postpartum hemorrhage is defined as a blood loss of more than 1 000 mL in the first 24 h following cesarean delivery(Adamson et al., 2008) Postpartum hemorrhage (PPH) is leading cause of maternal morbidity and mortality world wide and the number of maternal deaths due to ppH is estimated to exceed 100,000 each year (Mousa et al., 2009) Misoprostol (15-deoxy-l 6hydroxy-16-metliyl prostaglandin EI [PGE1]) is asynthetic PGE1 analog, originally intended for use to prevent nonsterodial anti -inflammatory drug (NASID)-induced gastric ulcers (Watkinson et al.,1988). Owing to uterotonic properties, its has become one of the most useful druges in obstetrics (Chong et al., 2004). The drugs low cost, ease of administration through multiple routes, stability, and safety profile make it a good option in resource —poor setting (Derman et al., 2006),and in patients who are vomiting unable to take medications, or under anesthesia (Kwast et al., 1986). This study will be done to determine the best time of administration of misoprostol rectally during cesarean section and its role in reducing blood loss. postpartum hemorrhage (PPH) continues to be the leading cause of maternal morbidity and mortality worldwide and that is according to the estimates of the World Health Organization in 1998. Average blood loss during delivery progressively increases with the mode of delivery, vaginal delivery (500 ml), cesarean section (1000 ml) and emergency hysterectomy (3500 ml) of blood. Excessive blood loss as estimated by a 10% DROP in hematocrit post-delivery or by need for blood transfusion, occurs in approximately 4% of vaginal deliveries and 6% of cesarean births.PPH has many potential causes, but the most common by a wide margin is uterine atony i.e. failure of the uterus to contract and retract following delivery of the baby. PPH in a previous pregnancy is a major risk factor and every effort should be made to determine its severity and cause. A reduction of operative blood loss at cesarean section is beneficial to the patients in terms of decreased postoperative morbidity and a decrease in risks associated with blood transfusions. The routine use of misoprostol is associated with a significant reduction in the occurrence of postpartum hemorrhage. In countries with high incidence of anemia among pregnant women either due to nutritional or environmental factors, even a relatively small reduction of postpartum blood loss would be a significant measure relevant clinically. Different management protocols for prevention of PPH have been used and these are being continuously revised to achieve improved success rates and reduce discomfort to the patients. The third stage of labor is potentially the most dangerous part for the mother, and active management is necessary. i.e.(administration of a uterotonic medication before the placenta is delivered, early clamping and cutting of the umbilical cord, and application of controlled traction to cord) The main risk is the occurrence of post partum hemorrhage PPH is the most common cause of maternal morbidity and mortality worldwide. In developing countries the PPH is the main cause of maternal deaths which defined as bleeding from the genital tract of 500 ml or more in the first 24 hours following delivery of the baby. Uterine atony is the most common cause of immediate heavy PPH.	
4793	12198537		حسن، خالد محى الدين محمد.	دور إدارة المدرسة الثانوية العامة في ضوء معايير		2014 يشهد العالم المعاصر ثورة من التقى ا رت والتحولت في جميع المجالات، الأمر الذي جعل	

					من تجويد وتطوير التعليم أمر ضرورى من أجل التكيف مع هذه التغي ا رت السريعة، فأصبح اسنم ا رر التطوير والتقييم سمة أساسية من سمات العصر، وأضحى تطبيقهما واستحداث الآليات لتفعيلهما ضرورة لا غنى عنها فى كل مناحى الحياة، تحقيقًا للجودة الشاملة، ومواكبة للتغي ا رت المعاصرة والمستقبلية المحتملة فالدول التى تملك نظاماً تعليمياً متطو ا رُ متجدداً تقدم لأبنائها بيئة تعليمية متجددة صالحة، تسمح باكتشاف النواحي والمتفوقين والموهوبين من بين أبنائها، وبالتالي تكون قادرة فى مستقبلها القريب أن تكون فى مصاف الدول المتقدمة. ولكن النظم التعليمية تواجه فى معظم دول العالم المتقدمة والنامية على السواء تحديات كثيرة، وبعض هذه الدول ترى أن النظام التعليمى بحاجة إلى تحديث جذرى فى أهدافه ومفاهيمه وطرقه...، وتحديث أجهزته وأنشطته التربوية، وذلك عن طريق وضع است ا رتيجية للتخطيط التربوى فى هذه الدول، مما دعى إلى الحاجة لنوع جديد من المدارس متصلة عضوياً بالمجتمع، وبما حولها من (مؤسسات مرتبطة بحياة الناس متصلة بمؤسسات الثقافة والإعلام...مدرسة متصلة بمؤسسات الحكم المحلي(٢). وللوصول لمدرسة بهذه المواصفات لابد من تطوير مدرسى شامل يستهدف الارتقاء بمستوى الممارسات المدرسية ومن أهمها تطوير أدوار إدارة المدرسة الثانوية العامة للوصول إلى مستوى معايير محددة للجودة التعليمية. وتعد إدارة المدارس الثانوية العامة أحد الركائز الأساسية، التى من خلالها يتم تطوير العملية التعليمية، وتنبؤاً مكانة عظيمة فى صلب العملية التعليمية. والإدارة المدرسية الناجحة فى التعليم الثانوى العام أساس تحسين العملية التعليمية والتربوية والارتقاء بمستوى الأداء عن طريق توعية وتبصير العاملين بمسئولياتهم وتوجيههم التوجيه التربوى السليم(١). ومن المعلوم أن و ا زرة التربية والتعليم قد انتهت عام ٢٠٠٣ من مهمة حيوية وهى بناء المعايير القومية للتعليم فى مصر، لتحقيق مبدأ الجودة الشاملة باعتبار المعايير القومية محددة لمستويات الجودة المنشودة فى منظومة التعليم والتعلم بكل عناصرها(ولتطبيق هذه المعايير واستجابة للاحتياجات القومية). فى تطوير التعليم والارتقاء بجودته، تم إصدار الق ا رر رقم(٨٢) لسنة ٢٠٠٦ بإنشاء الهيئة القومية لضمان جودة التعليم والاعتماد، وبعد ذلك صدر الق ا رر الجمهوري رقم (٢٥) لسنة ٢٠٠٧ باللائحة التنفيذية للهيئة، باعتبارها كياناً للاعتماد معترفاً به عالمياً معروفاً بق ا ر ا رته العادلة والموضوعية وبريادته وتميزه فى مجال ضمان جودة التعليم على المستوى المحلى والاقليمي والدولى مع الحفاظ على الهوية المصرية. ويعمد تطوير التعليم بصفة أساسية على تطوير إدارته ويستتبع ذلك توضيح دور الإدارة المدرسية والقائمين عليها من مدير ووكيل، لذلك يعد إدخال الاعتماد التربوى فى منظومة الإدارة المدرسية ضرورة ملحة لرفع مستوى الأداء الإداري وتحسينه وتطويره. ولتحديد أدوار إدارة المدارس الثانوية العامة أثر وأصبح فى تمكينهم من قيادة مدارسهم للحصول على الاعتماد التربوى، وإهمال هذه الأدوار يؤدى إلى فشل المدرسة فى تحقيق متطلبات الاعتماد التربوى والحصول عليه. ولقد أكدت بعض الد ا رسات أهمية الدور البارز لإدارة المدرسة الثانوية العامة فى ضوء معايير الاعتماد التربوى، وأشارت بعض الد ا رسات السابقة للإدارة المدرسية، والاعتماد، ومنها د ا رسة أمل عثمان كحيل (٢٠٠٧)، إلى أهمية تحويل المدارس التقليدية إلى مدارس مستقبل، تمتلك مها ا رت التغيير والتطوير فى كافة العملية التعليمية، بما فيها تطوير الإدارة المدرسية(٣). وتوصلت د ا رسة محمد توفيق سلام (٢٠٠٧) إلى أهمية نشر ثقافة جودة التعليم والاعتماد لقيادات التعليم ومديرى المدارس والمعلمين بكافة مراحل التعليم المختلفوننتيجة لما أظهرته الد ا رسات السابقة، فإن (،الاهتمام برفع فعالية إدارة المدرسة الثانوية العامة أصبح أم ا ر حتمياً حيث بات جزءاً أساسيا من عناصر تطوير الحطة الإست ا رتيجية التعليمية فى مصر وفى ضوء ما سبق، يتبين أهمية توضيح دور إدارة المدرسة الثانوية العامة فى تفعيل (معايير الاعتماد التربوى داخل المدرسة وخارجها. حيث أن الإست ا رتيجية السليمة لتطوير النظم التربوية، هى التى تأخذ فى حسابها تطوير إذا رت هذا النظام وتجديده).	
4794	12198565	محمد، زمزم حلمي أحمد.	طرق الاستدلال عند الإمام القرافي/	2014	تطلق هذه الد ا رسة من فكرة أساسية هي: طرق الاستدلال عند الإمام الق ا رفي تلك الطرق التى لها دورٌ كبيرٌ فى تشكيل فك ره ؛ لاعتماد علم أصول الفقه على هذه الطرق الاستدلالية والفروع التى تندرج تحت هذه الطرق واعتبارها مقدمات أولية وضرورية ، يرجع إليها الأصوليون فى تقرير قواعد الاستنباط والأحكام الشرعية .لقد كانت طرق الاستدلال عند الق ا رفي بمثابة الخطوات التى وضعها فى منهجه الاستق ا رنى ، ولم يركن إلى منطق أرسطو فى وضع أساسيات تلك الطرق الاستدلالية؛ بل كان له منهجٌ مختلفٌ غير فيه من سماتها، وحدد لها شروطاً جديدة فى إطار يخدم أصول الفقه ومباحثه ، فأثبت مهارته المنطقية وسيادته فى هذا المجال التى حملتها مؤلفاته فى ثنائهاثناياها ، حتى أصبح ا رندا للمنهج التجريبي على نحو لم يسبق له مثيل فى عصره. إن هذه الد ا رسة تتضمن وصفاً كاملاً لطرق الاستدلال عندالإمام الق ا رفي، وهى طريقة الحد، طريقة القياس، طريقة الاستق ا رء، وطريقة العلة .طريقة الحد: وفيها عرض الإمام الق ا رفي لفكرة التصور والتصديق، ومفهوم الحد وشروطه وأقسامه ، دلالاته المنطقية والفقهية، كما عرض للمفاهيم الأخرى المرتبطة بمفهوم الحد، كمفهوم الرسم، والجنس، والنوع، والفصل، والخاصة، العرض العام، والأع ا رض الذاتية والمفارقة، وسعى الق ا رفي إلى تطبيق هذه المباحث المنطقية على المباحث الأصولية ؛ وأشار إلى بعض هذه التقسيمات خاصة من حيث دلالاتها العقلية ، وفى هذه الطريقة ظهر تأثره الواضح بنظرية الحد الأرسطية، فجابت بعض أرائه متطلبات مع ا رءأرسطو.وبالنسبة لطريقة القياس: وضع فيها الإمام الق ا رفي الفرق بين القياس المنطقي الأرسطي، الذى عده الق ا رفي عملية انتقال من العام إلى الخاص، وبين القياس الأصولي الذى سار فى الاتجاه المعاكس ، وهو الانتقال منالخاص إلى العام أي الوصول إلى قاعدة عامة .أما طريقة الاستق ا رء: قد استخدم فيها الإمام الق ا رفي نوع ا من الاستق ا رء،يعتمد على الملحظة والتجربة من خلال منطلقاته للحالات الجزئية، وتتبع الحكم فيها لتأخذ نفس حكم الجزئيات المتشابهة معها وهذا النوع من الاستق ا رء أقرب إلى الاستق ا رء العلمي الناقص لأنه اكتفى بإكثر أو أغلب الجزئيات للوصول إلى نتائج ظنية احتمالية يعكس الاستق ا رء عند أرسطو،	

							الذي اشترط احصاء جميع الجزيئات للوصول إلى نتيجة يقينية ، وفي هذه الطريقة اتضح لنا كيف كان للقي ا رغي تأثري ر قو ي على نحو لم يسبق لميمثل في فلسفة العصر الحديث ، ونخص منهم بالذات فرنس بيكون ، وجون ستوارت مل في اتباع خطوات منهج القرافي الاستقرائي.		
4795	12198599	microbial and environmental studies on some strains isolated from hypersaline soil in Egypt/	Ahmed, Zeinab Sayed Ahmed Sayed.			2015	The groups of extremely salt-loving halophilic microbes that produce red, pink, and purple hues in hypersaline ponds were among the earliest microorganisms to be recognized and described. The word halophile is derived from two Greek words, "halos" and "philus," meaning, "salt" and "loving" respectively (Leichtw, 1978). Halophilic bacteria can grow in very high salt concentrations without denaturation of its proteins, giving them some biotechnological importance (Eisenberg & Wachtel, 1987; Danson, 1988). The proteins themselves appear halophilic in that they are only stable in solvents of very high salt concentration (Danson, 1988).The order Halobacteriales consists of a large group of aerobic microbes that live and grow in hypersaline (i.e. brine) environments such as the Great Salt Lake and the Dead Sea. Members of this order are the most halophilic organisms known to exist, thriving in environments 10 times saltier than seawater; hence, collectively they are referred to as the 'extreme halophiles' (Grant et al., 2001).However, the extreme halophiles are well adapted to their hypersaline environment, as evidenced by their predominance in these habitats, requiring at least 1.5 M NaCl for growth and 3.5- 4.5 M NaCl for optimal growth (Grant et al., 2001). To prevent dehydration and maintain osmotic balance with their surroundings, the extreme halophiles have a high intracellular concentration of salts, as high as the NaCl concentration in their environment. They counterbalance high extracellular salt concentrations by accumulating KCl within the cell up to concentrations close to saturation (Chin et al., 2010; Golyshina, 2011; Cray et al., 2013b; Harrison et al., 2013; Krisko & Radman, 2013; Oren, 1999; Roberts, 2005)Their enzymes have evolved particular features that confer to them stability and solubility in high salt concentrations. Furthermore, chloride and sodium ions are involved in salt bridges that lock subunits together (Pace, 1997; Yakimov et al., 2014).High numbers of taxonomically diverse extremely halophilic microorganisms were identified, that differ in salt requirements and metabolic capabilities (Oren, 1994, 2002; Grant et al., 1998, 2001; Anton et al., 2000; Madigan et al., 2003). Among these halophilic microorganisms, Archaea are the most common (Anton et al., 2000; Oren, 2002). In extremely halophilic microorganisms, the distinction of halophilic Archaea from halophilic bacteria became apparent in the 1970's through the molecular phylogenetic work of Woese, who proposed the three domain view of life (Grant & Larsen, 1990). While halophilic microorganisms represented many different taxonomic groups in the bacterial domain, those in the archaeal domain fell into a single order (Halobacteriales) and family Halobacteriaceae (Grant & Larsen, 1990).These extreme halophiles grow best at high salinities (3.4- 5 M NaCl) but they tolerate only 2 M magnesium (Bolhuis et al., 2004). They form dense blooms (upto 108 cells ml-1) and Common species of halobacteria are rods, cocci or disc-shaped, flat discs (Halococcus), squares (Haloflex), rectangles (Halobacterium) and triangles (Halorubrum) (Grant et al., 2001). Although triangular and even square cells with sharp corners measure 2- 5 µm wide, but less than 0.2 µm thick.They are either Gram-negative or Gram- positive, and many are pleomorphic (Anton et al., 1999; Oren et al., 1999; Oren, 2002; Walsby, 2005). The current study was conducted in order to isolate halophilic bacteria from both red sea and mediterranean sea coasts. the obtained isolates (57 in total) were identified, according to their phenotypic and genotypic characteristics, as belonging to three groups		
4796	12198625	نموذج مقترح لتسويق المنشآت الرياضية المدرسية في دولة الكويت/	المعمران، خالد راشد محمد .			2015	تشهد دولة الكويت في الوقت الحالي تطور هائل في جميع المجالات وتعتبر الرياضة من أهم هذه المجالات التي أخذت قدر كبير من الأهتمام في دولة الكويت ولا شك ان الرياضة تعتبر من أهم الدعام التي تقوم عليها اى دولة متقدمة ولاشك انها تبرز مدى التقدم الذي وصلت اليه هذه الدولة خاصة مع التطور الهائل في تكنولوجيا المعلومات والاتصالات وكذلك التطور الهائل في المجال الطبي والمجال الاداري والاقتصادي وهذه المجالات أسهمت بدورها في تقدم الرياضة. وتعددت مجالات الاستثمار المختلف في دولة الكويت وهذه المجالات تكون لها محددات خاصة تعمل على تنظيمها بصورة سليمة وقانونية وهذه المحددات هي التي تعطيها القوة الدافعة للاستمرار في هذه المجالات من أجل استقرار عملية التنمية. وإذا كان هواة الرياضة يستطيعون تحمل تكاليف ممارسة رياضة فردية فإن تنظيم الأنشطة الرياضية على المستوى المحلي والدولي يتطلب الكثير من المال وقد كان بعض أثرياء اليونان قبل الميلاد يتولوا رعاية الرياضة والرياضيين فيوفر لهم المال والأجهزة اللازمة للتدريب وفي عصر النهضة بأوروبا كانت الطبقة الأرستقراطية توفر الرعاية والمال للرياضيين تعزيزاً لمكانتهم الاجتماعية.ويشير عبد العزيز أبو عنية (2004م) إلى أنه نظراً للتقدم العلمي الهائل الذي نعيشه هذه الأيام والسابع والمنتجات التي لا حصر لها، والانفجار السكاني الذي يعيشه العالم الذي شكل ضغطاً مستمراً على موارد الأرض المحدودة، مما سارع في ظهور ما يسمى بـ "تشييد التسويق" للمحافظة على الموارد من النضوب، وظهرت "منافذ التوزيع" لإعادة المنتجات المستهلكة للمصانع لإعادة تصنيعها. كما ظهرت حركة تسمى بـ "التسويق الاجتماعي" نتيجة لحركات المستهلكين وعدم رضاهم عن بعض المنتجات التي تشكل خطراً عليهم ومشاكل تلوث البيئة الناتجة عن المخلفات اصناعية ودخان المصانع والسيارات والمواد المستهلكة. ويتفق كلاً من محمد سعده (2009م)، حسن الشافعي (2006م) على أنه إذا قمنا بتوضيح أهمية التسويق الرياضي نجد أنه يسمى إلى الآن ارتقاء بمستوى الأنشطة الرياضية في مجالات التربية البدنية والرياضية والتعليم، والتدريب والإدارة والترويج وجذب اهتمام الجمهور نحو ممارسة الرياضة مع توضيح قيمتها للانسان. وتعزيزها وتدعيمها إلى أن تصبح أسلوب حياة، إلى جانب ما يمكن أن يتحقق من ربح وعائد مادي. (36: 69)، (12: 85) ويتفق كلاً من كولين وكاهي Collen & Kahie (2006م)، كوتلر ودوبويس Kotler & Dubois (2000م) على أن التسويق هو الميكانيزم الاقتصادي والاجتماعي الذي يشبع رغبات ومتطلبات الأفراد والجماعات عن طريق خلق وتبادل المنتجات. ويشير كلاً من فراند وماكرثي Ferrand & Mccarthy (2009م)، إيرلس Earls (2008م)، فلارنون Fullerton (2007م) إلى أهمية التسويق الرياضي بالمؤسسة الرياضية بصفة خاصة وهي كالتالي: ضرورة العمل على زيادة موارد المؤسسة من التسويق للخدمات الرياضية •		

							ضرورة العمل على توفير فرص المنافسة بين المؤسسة والمؤسسات الأخرى الارتقاء بمستوى الخدمة الرياضية المقدمة من طرف المؤسسة ضرورة العمل على تحديد نوع الخدمة الرياضية التي يمكن أن تقدمها المؤسسة الرياضية يجب الاهتمام بتوضيح الأهداف التسويقية للمستفيدين والعاملين بإدارة التسويق الاهتمام بعمل دراسات مسحية عن التسويق المحلي والدولي للخدمة الرياضية الاهتمام بتدريب الكوادر الإدارية المتخصصة في وضع الخطط التسويقية بالمؤسسات يجب مراعاة دراسة الظروف البيئية المؤثرة على الخدمات الرياضية		
4797	12198671	المركزية واللامركزية ودورها في اتخاذ القرار بالهيئة العامة للشباب والرياضة بدولة الكويت/	العمر، عبدالرحمن بدر عمر عبدالله.		2015	لقرار هو أداة وسيلة للتعبير عن مدى نجاح الإدارة أو عدم الاستثمار في الموارد البشرية والمادية واستغلال الوقت المتاح لتحقيق أهداف محددة، والتي ترغب فنية من الصعب التاري للحصول على إعادته، ولكن يمكن مواجهة الوضع لاتخاذ جندية القرار، فإن الغرض من أي قرار هو مواجهة موقف معين أو القيام بإجراءات محددة أو حل للمشاكل القديمة، ومن ثم اللجوء إلى خطة علمية وعملية صنع القرار عندما تفرض الصوت من قبل الإدارة بوصفها الهيئات الإدارية الدعمة الأساسية. مشيرا إلى أهمية وخطورة القرارات والخاصة دور في تحقيق أهداف الإدارة أن ينظر في اللوائح الإدارية للمشكلة الحديثة من تعدد وتعدد أهدافها. كما أنه لم يعد التنظيم الإداري تسعى لتحقيق هدف واحد، بل إلى تحقيق العديد من المجمع والمتشابهة الأهداف، إضافة إلى المشاكل التي تواجه المديرين في هذه ويهف The organizations بحث على: التعرف على الدور المركزي لللامركزية ودورها في صنع القرار العام للشباب وهيئة الرياضة في الكويت. واحدة من أهم الاستنتاجات: إن المركزي المفاهيم الهامة التي ترتبط إلى حد كبير وتركيز السلطة في شروط المرجعية والإدارة المركزية تعني وتشير إلى (كبار إدارة) لاتخاذ جميع القرارات التي تنظم تشغيل الهيئة العامة للشباب والرياضة. واحدة من أهم التوصيات: الإدارة المركزية لا يساعد على الإفراج عن روح الإبداع لمختلف التنظيمية المستويات واللامركزية في إدارة Altnriveh تعطي الإداري مزيد من الحرية في التصرف واتخاذ القرارات.			
4798	12198823	أثر نموذج التعلم البنائي الاجتماعي في تدريس العلوم في تصويب التصورات البديلة وتنمية بعض عادات العقل والمهارات الحياتية لدى التلاميذ/	أحمد، نشوى محمد صبرى.		2014	بعد العصر ال ا رهن عصر التكنولوجيا والتطور المعرفي في جميع مجالات الحياة العلمية والعملية ، وهو ما انعكس على ما تقدمه المدرسة من طرق ووسائل تدريس مختلفة لمساعدة التلاميذ على تلبية احتياجاتهم وطموحاتهم ، وهذا أدى إلى إبط ا رز الدور الفعال للعلوم في مختلف مجالات الحياة العلمية والعملية ، حيث يلاحظ أن أي تطور علمي يصاحبه تقدم هائل في المعرفة العلمية بمختلف المجالات ، لذا لا ينبغي للتعليم أن يبقى يمانى عن هذه التطو ا رت حتى نصل إلى مستقبل أفضل والذي يتأتى من خلال تعليم متميز في عالم يموج بالتغي ا رت والتدفق المستمر للمعلومات . وتنادي الاتجاهات الحديثة في طرق تدريس العلوم بالاهتمام والتركيز على نشاط الطلاب وإجابتهم وإكسابهم المهارات والاتجاهات العلمية التي تمكنهم من اكتشاف المعلومات بأنفسهم وذلك بتوفير بيئة التعلم الملائمة للتلاميذ والتي تساعدهم على التعامل مع مواقف الحياة اليومية ومشكلاتها. (عبد السلام مصطفى ، ٢٠٠٦ وتعتبر المرحلة الإعدادية أحد الم ا رحل : ١٨) . من الطفولة إلى الم ا رةقة والبلوغ تتميز بالكثير من التغي ا رت العقلية والنفسية والاجتماعية التي تؤثر بصورة فعالة على حياة الفرد ، ونظ ا ر لأهميتها فقد نادي العديد من المربين بضرورة الاهتمام بطرق تدريس وتعليم التلاميذ فيها من خلال استخدام طرق واست ا رتيجيات تعمل على تنمية المهارات التي تؤهلهم لاجتياز هذه المرحلة ، ومن هذه المهارات المهارات الحياتية وعادات العقل . حيث ذكر (حسام مازن ، ٢٠٠٢) أنه لكي تعمل التربية على مسيرة التقدم العلمي والتكنول وحي ، فإن عليها التوجه نحو إكساب المهارات الحياتية اللازمة للمواطن المتطور علميا وتكنولوجيا ، حيث أصبح من الأهمية دمج المهارات الحياتية في المناهج التعليمية لإعداد مواطن قادر على مواجهة كل الظروف والمستجدات ، وقد أشار تقرير اليونسيف ٢٠٠٥ إلى أهمية اكتساب المتعلمين للمهارات الحياتية الأساسية كوسيلة لتمكينهم من مواجهة المواقف المختلفة التي يتعرضون لها ، وإكسابهم المعارف المبنية على السلوك الصحيح ، ومن أبرز هذه المهارات المهارات الاتصال والمهارات التفكير ومهارات اتخاذ القرار ، ومهارات التعامل مع البيئة ، والمهارات الشخصية الاجتماعية . حيث تعتبر المهارات الاجتماعية أحد الأسس المهمة التي يركز عليها تعليم الإنسان لأنها تساعد على اكتساب الحب ا رت وتوفير له فرص التفاعل والاتصال وتقدم له ممارسات تدريبية تمكنه من التعامل مع المجتمع الذي يعيش فيه . (خميس محمد خميس ، ٢٠٠٩) . ويرجع الاهتمام بالمهارات الاجتماعية إلى كونها عاملا مهما في تحديد التفاعلات اليومية للفرد مع المحيطين به ، والتي تعد في حالة كفايتها من عوامل التوافق النفسي . (١٧ : للتلاميذ على المستويين الشخصي والمجتمعي) طريف شوقي ، ٢٠٠٢ كما أنها تسمح للتلاميذ بالد ا رسة على نحو مستقل والعمل ضمن مجموعات ، وإقامة صداقات مستمرة ، والاستجابة على نحو مناسب للتغذية ال ا رجة والإرشادات التي يتلقونها من المعلم ، ومن دون هذه المهارات تقل فرصة التلاميذ للتعلم (Schoenfeld et al ، 2008 ومن المهارات الاجتماعية التي يسمى تدريس العلوم إلى تحقيقها : المبادرة في المحادثة ، تكوين الصداقات) . ، الاستماع والتذكور ، الوضوح في التعبير ، المشاركة التعاون ، الاتصال ، التأييد والمساندة . (حسام مازن ، ٢٠١١ : ٢٥٤-٢٥٣) ، ومن دون المهارات الاجتماعية قد يواجه التلاميذ عدد أ من النتائج غير المرغوبة (Fisher, Warner & Klein, 2004) . التي تتضمن تفاعلا ضعيفا مع المتعلمين من زملائهم وتدنيا في التحصيل الأكاديمي ، لذا فإن المواد الد ا رسية التي تقدم في جميع م ا رحل الد ا رسة ينبغي أن تعمل على تحقيق الهدف			

						الاجتماعي من التربية من خلال اعداد الفرد القادر على معرفة نفسه ومعرفة من حوله وكيفية التعامل معهم . (Schoenfeld et al, 2008) . كما ينبغي أن تتضمن مناهج المرحلة الأساسية منها ١ رت الحياتية التي يحتاجها التلميذ للتياق بالنشطة هادفة في بيئته وخاصة مناهج العلوم التي تعتمد علي ربط مادةالعلوم بخب ١ رت التلاميذ وحياتهم اليومية ، ومساعدتهم علي التفاعل مع المواقف الحياتية.	
4799	12198829	الأعراض الجسدية وعلاقتها بالإكتئاب :	عويضة، حسين أبوالمجد سيد.		2015	تعد مشكلات (الفن-الجسم) من الدراسات السابقة أن الأعراض الجسدية في الأكتئاب أكثر انتشارا في البلاد النامية وغير الغربية لها . اقترحت مجموعة من الدراسات السابقة أن الأعراض الجسدية في الأكتئاب أكثر انتشارا في البلاد النامية وغير الغربية عن البلاد الصناعية والغربية حيث تنتشر لديها الأعراض النفسية للاكتئاب مما خلق مجالا للبحث في العلاقة بين الاكتئاب والأعراض الجسدية وخاصة في البلاد النامية مثل مصر. يتذكر حسن عبد المعطي أن المريض بالأعراض الجسدية لا يشكو من الناحية النفسية بل إنه يشكو من الناحية الحسية حيث يتوجه للعلاج الطبي الذي لا يستطيع أن يساعده بسبب أن اضطرابه الأساسي يعود إلى أسباب نفسية وليست جسمية وهو لا يعبر عنه الاضطرابات أو الأعراض السيكوسوماتية . ومن هنا برهن ستين مولر علي أن الأعراض الجسدية مثال لأهمية العلاقة بين الجسم والعقل في مجال الطب والطب النفسي. ويتفق كل من عبد الستار إبراهيم وماوندكار وترفدي وهيدو وآخرين والتوني وآخرين وأحمد عكاشة وطارق عكاشة في أن الأعراض الجسدية شائعة جاء في الأكتئاب وهي في الواقع آلام غامضة وتشمل هذه الأعراض ألم المزمن – آلام الأطراف – آلام الظهر – مشاكل في الجهاز الهضمي – التعب - الإعياء - اضطرابات في النوم – التغيرات في الشهية الصداع – واضطراب جنسية .. إلخ ومعظم المرضى المصابين بالأكتئاب صعب جدا، وغالبا تهمل الأعراض الجسدية وأعراض القلق في الكشف عن الأكتئاب وخاصة في مراكز العناية الصحية لعداة ما يظهر مرضى الأكتئاب مجموعة من الأعراض الجسدية ويشكل هذا النمط في كثير في الأحوال خطر على علي المرضى الذين يعانون من الاضطرابات الاكتئابية حيث يعزوا المرضى الأعراض إلى أمراض عضوية .وأظهرت مجموعة من الدراسات أن الاضطرابات الاكتئاب والقلق ترتبط بقوة مع الأعراض الجسدية ولكن هذه العلاقة غير الواضحة فتمت أكثر من دراسة لفحص العلاقة بين الأكتئاب والقلق أم لا وفي دراسات متعددة كانت العلاقة غير واضحة بين الأكتئاب والأعراض الجسدية.	
4800	12198844	معالم السنن (شرح سنن أبي داود) للإمام الخطابي (ت388هـ) /	الصالح، ابراهيم أحمد عبدالله عبد الوهاب.		2014	كتاب سنن أبي داود هو واحد مميز . لا يوجد ل كتاب مماثل مثل ذلك في الدين. حصولها على موافقة من جميع الناس. ولذلك، فقد أصبح كحكم بين العلماء والفقهاء مع الطوائف المختلفة. كل عالم يجد احتياجاته. وبالتالي فإن تعتمد شعب العراق ومصر والمغرب وبلدان أخرى كثيرة على الكتاب مرجعا ذلك. فيما يتعلق بأهمية الكتاب، يقول إبراهيم الحربي، عندما كتب أبو داود هذا الكتاب، تم منحه إل فهم الحديث تماما كما قال الله لديه آل جبار منح رسوله داود (صلي الله عليه وسلم) الاختاءالحديد بن العربي -referring- على نسخة من هذا الكتاب الذي كتبه أبو وقال Dawood --، "إذا لم يكن لدى الفرد أي علم إلا كتاب الله ثم هذا الكتاب مرجعا، وقال انه لا يحتاج أي شيء آخر." قال الإمام الخطابي: "مما لا شك فيه، الله مغتبط لديها وكشف الكتاب نبيانا لكل شيء. Thermore، الله يقول سبحانه وتعالى في القرآن الكريم في الآية يقرأ (لدينا لا شيء المهمة في كتاب (آل 38 Ana'm). الله سبحانه وتعالى قال لنا أنه لم يتوك شيئا من أمور الدين دون موضحا انه في القرآن. ومع ذلك، كان هذا التفسير على اثنين أنواع: أولا، وأسلوب واضح أن تتاولت ذكرى (ذاكر) في النص. كانت الثانية في أسلوب الخفية التي شملت على معنى التلاوة ضمنا. تفسير هذا النمط wasentrusted إلى النبي (صلي الله عليه وسلم). وقد أشار الله هذه المسألة في قوله تعالى أن يقرأ (ولقد أوحى إليك و ذكرى أنك mayst شرح للبشرية الذي هاث تم الكشف عنها، وعليهم تمكين) (سورة النحل: 44) أيا كان يجمع بين القرآن وحصل على السنة في التين من بلاغة. وقد جمعت أبو داود في كتابه عن مبادئ الحديث من (44) أصول أمهات السنن و الفقه. لا الباحث معالجة له ولا وقت لاحق واحدة سوف تصل علمه وفيما يتعلق بكتاب Ma'alem آل السنن في شرح سنن أبي داود عن طريق الإمام الخطابي، وهو واحد من الكتب المفيدة. آل جعلت الخطابي في هذا الكتاب من الواضح ما كان من الصعب في الموضوع من كتاب السنن. وأوضح ما كانت مخيأة في معناها،أنطهرت جوانب الأحكام، اشارت إلى مجالات استخراج وخصم من خطيه، وكشف معنى المشاركة في القرآن، لصالح طلابه.	
4801	12198867	Les aspects linguistiques et stylistiques dans quelques contes de Guy de Maupassant/	Bagato, Amani Mohammad Abdel –Maguid.		2014	Un coup d"oeil d'ensemble sur le XIXe siècle français révèle avant tout sa complexité. Au rythme heurté des événements politiques correspond tout un enchevêtrement de courants d"Idées et de mouvements littéraires. Complexité d"autant plus sensible que nous sommes encore tout près du dit siècle ; aussi ne songeons-nous pas à le résumer d"un mot, comme le « siècle de la Renaissance », le « siècle classique » ou le « siècle des lumières ». Privés de ce moyen commode de l"embrasser d"un seul regard, nous sommes en revanche préservés de la tentation de le simplifier abusivement, et peut-être sentons-nous mieux ainsi sa richesse et sa diversité, du romantisme au réalisme, du réalisme au symbolisme.Guy de Maupassant passe son enfance à Fécamp avec sa mère et son frère, il rencontre Flaubert, ami de son oncle. Mobilisé à vingt ans, il participe à la guerre de 1870, expérience qui sera une source d"inspiration fonctionnaire accablé d"ennui, il s"entraîne à l"écriture sous l"influence exigeante de Flaubert ; devient chroniqueur pour différents journaux. Guy de Maupassant est le fils spirituel de Flaubert. Ses principes sont le mot exact, le travail de la phrase et le réalisme. Sa technique réside dans : - Le récit dans le récit,Le discours argumentatif, - L"économie de l"expression, la litote le trait léger et significatif, la notation impressionniste, - Le parler authentique. À l"école de Flaubert, Maupassant avait appris à découvrir dans chaque chose « un aspect qui n"ait été vu et dit par personne». Plus qu"à la trame de ses récits (histoires de chasse, anecdotes gaillardes, farces paysannes, fait divers parisiens), l"intérêt de ses contes tient à la peinture vraie des milieux, des moeurs , des types les plus divers, qu"il s"agisse du monde rustique, des bourgeois ou des employés .La passion de ce qu"il appelait « l"humble vérité»De fait, loin d"étaler une documentation massive, Maupassant se distingue par son sens de la mesure: choisissant les traits les plus caractéristiques, il crée, avec une remarquable sobriété et une grande simplicité de style « la couleur, le ton, l"aspect, le mouvement de la vie même.»	

						Maupassant est essentiellement un classique. Son génie n'est pas apparu brusquement, mais il s'est développé au contact de modèles éminents : Balzac, le grand ancêtre ; Flaubert, le maître du roman moderne ; Zola enfin, chef de file des naturalistes. C'est en suivant les conseils de Flaubert que le jeune Maupassant a corrigé son style, supprimant les lourdeurs, se méfiant des abus d'une rhétorique trop scolaire, allant, toujours vers un dépouillement plus poussé de l'écriture et l'effacement de l'artiste. À lire l'oeuvre de Maupassant, l'impression qui domine est celle d'une étrange simplicité : simplicité du vocabulaire, de la syntaxe, des situations choisies et des personnages mis en scène. Dans un cadre familial, une intrigue réduite à un petit nombre d'éléments se déroule de façon linéaire. C'est un avec, le récit d'une farce, d'une aventure, plaisante ou malheureuse, un souvenir qui donne toujours l'illusion d'être fidèlement empruntés au réel. Comme les titres l'indiquent [La Ficelle , Le Petit Fût] , tout l'art de Maupassant est de donner à une historiette , aussi insignifiante soit elle , une portée morale , insignifiante soit-elle , une portée morale , amusante ou grinçante , destinée à faire réfléchir le lecteur. On remarque dans les contes que la conclusion est inattendue, voir l'absence de fin, qui, brisant les conventions romanesques et l'attente du lecteur, induisent une signification symbolique et suscitent une pluralité d'interprétations. Mais Maupassant se garde bien d'intervenir et de proposer un jugement personnel : Le conte, comme la vie, n'est ni juste ni injuste. Elle n'a pas de morale.		
4802	12198929	المتغيرات الاجتماعية المرتبطة بالعنف الأسري ضد الأطفال :	مصطفى، نسرين صلاح.		2015	ظاهرة العنف الأسري واحدة من أهم الظواهر الاجتماعية الآخذة في النمو والتزايد وقد تزايدت بكتافة عالية على الصعيد العالمي والإقليمي والمحلي وهذه الكثافة تعد وظيفة أو نتيجة لفاعلية متغيرات عديدة تعيشها الأسرة قد تدفع لانتشار العنف حتى أن كثيرا من البحوث تشير إلى انتشار العنف بأشكاله ومستوياته المتنوعة , وانتشار هذه الظاهرة لها آثار متعددة وصحية واجتماعية تؤثر على الطفل الذي هو رجل المستقبل , ولذلك فالإهتمام بالطفولة ويؤمن حقوقها اهتمام بالإنسان كصاحب حقوق على مجتمعه, يجب الاعتراف بها وتأمينها له , إضافة إلى اعتبارها نقطة بداية للوصول إلى التنمية المستدامة إذ إن التنمية البشرية ستؤدي عاجلا أو آجلا إلى التنمية الاقتصادية والاجتماعية. مع الإشارة هنا إلى أن تنمية الطفولة لا تعني إصدار قوانين وتشريعات فقط , إنما هي سياسة تنموية يجب أن تتكامل مع السياسة التنموية السائدة في المجتمع الآخذة في الاعتبار مشكلات الحاضر والمتطلعة دوما إلى المستقبل الواعد. وينصب اهتمام هذه الدراسة في التعرف على تأثير بعض المتغيرات الاجتماعية التي تعيشها الأسرة الريفية والحضرية والتي يفترض أنها ترتبط بالعنف الأسري ضد الطفل. وركزت الدراسة على المتغيرات الآتية (المستوى التعليمي –التفكك الأسري- الحالة الاقتصادية – نمط الأسرة – مهنة الوالدين – المرأة المعيلة – حجم الأسرة – عمل المرأة)في كل من الريف والحضر.		
4803	12198936	فاعلية حقبة تعليمية محوسبة في تنمية مهارات التمثيل الرياضي و التعلم ذاتي التنظيم لدى تلاميذ المرحلة الاعدادية/	محمد، مصطفى محمود عطية.		2014	المحوسبة حزمة تعليمية (CIP1) هي واحدة من المنحى فرد طرق التعلم، والتي توفر الخبرات التعليمية في شكل قطع وأوجدات صغيرة. كل واحد منهم له هدف محدد، بحيث يحصل التلميذ المعلومات بالطريقة التي تريد وفقا لقرائنه.تصميم (CIP) يعتمد بشكل كبير على تكنولوجيا الوسائط المتعددة التي تقدمها الكمبيوتر وفقا لاركناز الأساسية، التي التعليمية التقليدية حزمة بنيت على ذلك، حتى يعرف الباحث بأنها "تربية والتعلمنظام تنظيم محوسب مصممة على أساس تكنولوجيا الوسائط المتعددة، لمساعدة المتعلم في تقرير المصير، تعلم فعال من خلال توفير عدد من المصادر، البدائل والأنشطة والأمثلة التعليمية، والمبادئ التوجيهية تنجبه للتعلم،المرتدة، ما قبل وما بعد واختبارات طويلة. من أجل الوصول إلى مستوى منيقتان التعلم، وتحقيق أهداف متعددة المحدد "حاولت الدراسة للاستثمار ميول التلاميذ للتعامل مع الكمبيوتر وبرمجيات الوسائط المتعددة لعلاج بعض أوجه القصور، التي حذفت من قبل التقليديةطرق التدريس وبرامج الوسائط المتعددة التقليدية. وبالتالي فإن الهدف مننتنير دراسة تحديد في "التعرف على فاعلية (CIP) على تطوير التمثيل الرياضي ومهارات التعلم ذاتي التنظيم للتلاميذ الإعدادية".>ووفقا لهذه الدراسة مهارة التمثيل الرياضية التي تعرف بأنها "مهارة التلميذ إلى التقديم والفقر بالتتابع - حتى انتهى - لمدة ثلاثمراحل (تنظيم وتفسير أو مشاكل الرياضيات، ولكل مرحلة أوضحت النحو التالي:المنظمة: قدرة التلميذ على فرز وتصنيف وترتيب الرياضياتأفكار أو عناصر المشكلة الرياضية وسجلت ذلك التفسير: قدرة التلميذ على اختيار وتطبيق عدة أشكال التمثيل (لفظية، رمزية، بيانيا، كائن، بشكل موقع، ...) لشرح الأفكار الرياضية أو حل المسائل الرياضية أو القضايا.		
4804	12198974	صورة المجتمع بين المقاومة العربية والعبرية في الأدنلس/	إبراهيم، هيثم محمود.		2014	يكاد يجمع الباحثون في الأدب العبري للقرون الوسطى أن الأدنلس شهدت _ آنذاك _ أزهى عصور الأدب العبري ازدهاراً، وحتى الآن يعد اليهود أدب تلك المرحلة العصر الذهبي للأدب العبري، ولا غرو فإن معظم النتاجات الأدبية شعر□الإنثر□ اخرجت من رحم الأدب العربي، وتأثير البنية الأدنلسية الإسلامية، وما ضمنه الإسلام من حقوق وحسن معاملة لأهل الذمة، في سياسة انتهجها معظم حكام المسلمين آنذاك، وأكبر معطيات ذلك ما بقي إلى الآن من نتاج وتراث أدبي يشهد عليه القاصي والداني.إن البحث في التأثيرات العربية والإسلامية على المؤلفات العبرية واليهودية تصدت له دراسات عديدة بلغات مختلفة ولا يزال الباحثون يكتشفون مدى تأثير العرب وثقافتهم على اليهود ومؤلفاتهم في تلك الفترة. وقد لوحظ أن معظم هذه الدراسات أولت الشعر اهتمام□ا كبير□ا مقارنة بالنثر الفني المتمثل في فن المقامات، غير أن الجدير بالذكر هنا أن المقامة العبرية حظيت بالعديد من الدراسات في الفترة الأخيرة؛ ولاسيما الدراسات التي تبحث في مدى تأثرها بالأدب العربي بشكل عام والمقامات العبرية بشكل خاص.وقد توصلت معظم هذه الدراسات إلى نتيجة مهمة، تؤكد تأثير الأدب العربي على المقامات العبرية في الأدنلس. هذا، وقد أثبت الباحثون أن المقامات العربية المشرقية للهمداني والحريزي كانت المعين الرئيس، الذي نهل منه المقاميون اليهود مواد مقاماتهم وأفكارها، حتى وصل الأمر إلى وجود نصوص كاملة نقلها المقاميون اليهود إلى مقاماتهم،مع إجراء بعض التغييرات الطفيفة، وادعائهم أنها من قريحتهم. هذا بالإضافة إلى مصادر عربية أخرى توصل الباحثون إلى تأثيرها على المقامات العبرية. كل ذلك يدعو إلى مزيد من البحث عن المصادر الأصلية التي اعتمد عليها اليهود في مقاماتهم؛ ولاسيما المصادر العربية التي وجدت في الأدنلس في الفترة نفسها، الأمر الذي يدعو إلى البحث في المقامات العربية بالأدنلس.لقد فطن شموئيل شنتيرن هذا الاتجاه؛ وبالفعل لقد توصل إلى مصادر أخرى تكمن في المقامة العربية الأدنلسية، وأثبت أن الحريزي – رائد المقامة العبرية_ كتب		

							نشرات لكل الموجة خدمات البث في الخدمات من عينة الدراسة. استخدمت الباحثة استمارة تحليل المضمون مجتمع الدراسة الميدانية ومثل ذلك في جميع الاتصالات في شبكات المصرية الموجهة، والتي بلغ عددها 124. عينة الدراسة الميدانية تم تمكين الباحث، في دراسة ميدانية لها، تعتمد على عينة عشوائية بسيطة تتكون من 600 قناة متنوعة شملت جميع programmatics (A منير - A برامج مقدم - المنبع - محرر - A محضر - A المشرف برامج)؛ بالإضافة إلى منيري الإدارات المختلفة لشبكة البث الموجه.		
4808	12199201	A new Method to study Bottomonium/	nahool, tarek Abdel-wahab Mohamedian khalafallah.			2014	Particle physics is the study of the particles that make up the universe, and the interactions that take place between them. It is also referred to as elementary particle physics, by which we mean that we would ideally like to understand the universe in terms of its "elementary" constituents that are not composed of other particles. Why do we study particle physics? The questions "What is the universe made of?" and "How does it work?" are of fundamental interest for their own sake. In addition, understanding the universe as it is now might help us answer the question "where did it come from?" Aside from these weighty questions, what about immediate material benefits? Like much of fundamental research, it is impossible to know now what benefits might be realized from particle physics. However, it is worth noting that in 1897 the quest to understand the universe led to the discovery of the electron by J.J. Thompson. The Standard Model provides a unified framework for our current understanding of fundamental forces and particles. The fundamental particles include leptons, quarks and gauge bosons. Leptons include electrons and their heavier cousins the muons and taus as well as associated neutrinos. Interactions between the fundamental particles are seen as arising from the exchange of gauge bosons: photons for electromagnetic, W and Z bosons for weak and gluons for strong interactions. The Standard Model also predicts the existence of the Higgs boson, which couples with many of the other fundamental particles to give them mass [1]. The elementary particles included in the Standard Model are shown in Figure (1.1). The Standard Model recognizes two types of elementary fermions: quarks and leptons. In all, the model distinguishes 24 different fermions: six quarks: the up quark, down quark, strange quark, charmed quark, bottom quark, and top quark; and six leptons (electron, electron neutrino, muon, muon neutrino, tau particle, tau neutrino), each with a corresponding anti particle. The 12 fundamental fermionic flavours are divided into three generations of four particles each. Six of the particles are quarks. The remaining six are leptons, three of which are neutrinos, and the remaining three of which have an electric charge of -1: the electron and its two cousins, the muon and the tau. There are also 12 fundamental fermionic antiparticles that correspond to these 12 particles. For example, the anti electron (positron) e^+ is the electron's antiparticle and has an electric charge of +1. Table (1.1) shows the 12 fundamental fermionic flavours and fundamental fermionic antiparticles are listed in Table (2.2) [2]. Particles obey the Bose-Einstein statistics are called bosons, In the Standard Model, vector (spin-1) bosons (gluons, photons, and the W and Z bosons) mediate forces, whereas the Higgs boson (spin-0) is responsible for the intrinsic mass of particles. Bosons differ from fermions in the fact that multiple bosons can occupy the same quantum state (Pauli Exclusion Principle). Also, Bosons can be either elementary, like photons, or a combination, like mesons. The spin of bosons is integers instead of half integers. There are only five particles that considered as elementary particles [3].		
4809	12199205	أثر التعرض للشبكات الاجتماعية على الإنترنت في إدراك القضايا والأحداث الجارية لدى عينة من الشباب الجامعي/	أحمد، نوره عبد الله محمود.			2014	في ظل الثورة الاتصالية التي ساهمت في صنعها شبكة الإنترنت، والتي فتحت آفاق جديدة للتواصل ألغت من خلالها الحدود الزمنية المكانية، ظهرت أشكال جديدة من المواقع أصبحت من أكثر المواقع تأثيراً في العالم وتسمى بمواقع التواصل الاجتماعي، والتي تقدم العديد من الخدمات الاتصالية، وباتت تتنافس وسائل الاتصال التقليدية مثل الصحف والإذاعة والتلفزيون لما لها من خصائص تفاعلية آنية وبأشكال وطرق متعددة (١). شبكات التواصل الاجتماعي لعبت أدواراً عديدة سياسية واقتصادية واجتماعية في حياة الشعوب في كافة أنحاء العالم. وبات تأثيرها يتصدر أحداث الساعة؛ نظراً لارتباط قطاع كبير من الأفراد بتلك الشبكات، وأصبح تأثير الشبكات الاجتماعية على النواحي السياسية والاقتصادية والاجتماعية واضحاً، حيث تلعب مواقع التواصل الاجتماعي دوراً كبيراً في التواصل بين الأفراد وكان لها دور كبير في الحشد لثوارت الربيع العربي وعلى رأسها الثورة المصرية (٢)، وقد لعبت شبكات التواصل الاجتماعي دوراً رئيسياً في إحداث تحولات سياسية في دول الربيع العربي، وأصبح أي مواطن عادي لديه حرية غير مسبقة في إظهار آرائه في مختلف الموضوعات، فليست لديه خطوط حمراء، ويتم نقل صوته وأفكاره لكل الناس وهذا ما كان محروماً منه		

						الشباب. وبناء على الاستخدام المتزايد لمواقع التواصل الاجتماعي، جاءت أهمية دراسة أثر تعرض الشباب الجامعي لمواقع الشبكات الاجتماعية على الانترنت في إدراك القضايا والأحداث الجارية، للتعرف على أسباب هذا التعرض، ومعرفة أنماط وعادات تعرضهم لها «مدى مشاركتهم وتفاعلهم على مواقع الشبكات الاجتماعية»، ودور هذه المواقع في إدراك القضايا والأحداث الجارية على الساحة المصرية والعربية والعالمية. قامت الباحثة بتقسيم الدراسة إلى أربعة فصول، يتناول الفصل الأول الإطار المنهجي، ويتناول الفصل الثاني تعريف، نشأة وتطور مواقع التواصل الاجتماعي، ويشتمل الفصل الثالث على الإطار النظري للدراسة والمتمثل في مبحثين الأول يتناول نظرية التماس المعلومات، والثاني يتناول المدخل التفاعلي، أما الفصل الثالث وهو نتائج الدراسة الميدانية فقد اشتمل على مبحثين الأول يتناول مدخل معرفي للقضايا والأحداث الجارية التي خضعت للدراسة، والثاني يتناول خصائص عينة الدراسة والمؤشرات التحليلية للنتائج الدراسة الميدانية، ثم التطرق إلى اختبار فروض الدراسة، وانتهت الدراسة بعرض لأهم النتائج التي توصلت إليها الباحثة، واختتمتها بمجموعة من المقترحات، وتقديم ملخص للدراسة باللغة العربية والإنجليزية، واستعرض المراجعين العربية والأجنبية، وملاحق الدراسة.
4810	12199232	تأثير استخدام تدريبات الوسط المائي و البيئة الرملية على بعض عناصر اللياقة البدنية الخاصة والمستوى الرقمي لمتسابقى 800 متر جرى/	علام، كرم محمود.		2014	أصبح التدريب الرياضي علما له أصوله وقواعده المختلفة، التي تساعد الفرد للوصول إلى أعلى مستوى رياضي ممكن في نوع النشاط الممارس، عن طريق تنمية القدرات البدنية والمهارية والفسيولوجية والنفسية والارتقاء بها لدرجة تتناسب مع احتياجات ومتطلبات هذا النشاط وفقا لقدرات الأفراد وخصائصهم. ويرى "محمد حسن علوي" (1990م) أن رياضة مسابقات الميدان وسباقات المضمار من الرياضات التي تتكرر جميع عناصر اللياقة البدنية، فعلى مستوى هذه العناصر تتوقف النتائج التي يحصل عليها اللاعبين في مسابقاتها المختلفة ولذلك تتطلب ممارسة مسابقات ألعاب القوى المختلفة الارتقاء بمستوى عناصر اللياقة البدنية مثل "القوة، السرعة، التحمل، المرونة، الرشاقة، التوافق العضلي والعصبي". ويعد سباق جرى المسافات المتوسطة (800 متر) من السباقات التي اختلف عليها العديد من الآراء العلمية حول إيجاد أسلوب أو وسيلة تدريب مناسبة تساعد على تنمية القدرات البدنية الخاصة بمتسابقى جرى المسافات المتوسطة ومن ثم تحقيق المستويات العالية. يعتبر سباق 800 متر جري مجرد تدريباً لاكتساب قوة التحمل والجلد حيث يعمل الجهاز العضلي لمدة قصيرة وبسرعة منتظمة وعلى ذلك يجب أن تكون الأجهزة الحيوية الداخلية للجسم في أحسن حال حتى تقوم الدورة الدموية والنفسية بنشاطها أثناء العمل. واتفق كلا من "خيرية السكري وآخرون" (2004م)، بانكلي وآخرون Binkley et al (1996م)، ساندرا وريبى Sanders & Rippe (1994م)، برنت Brent (1993م) على أن التدريب داخل الوسط المائي يؤدي إلى تطوير القدرات البدنية الخاصة والمرتبطة بنجاح الأداء المهاري لنوع الرياضة التخصصية للاعب كالقوة، التحمل، المرونة فهو يعمل على مرونة المفاصل واستطالة العضلات وتقويتها دون التعرض لأي إصابات أو مضاعفات، وذلك عن طريق تدريبات ضد مقاومات الماء باستخدام أدوات، وأثقال متدرجة، واستخدام حركات مشابهة لنموذج الأداء الفني من حيث الشكل، العضلات المستخدمة، المسار الزمني للقوة). ويذكر "ركي محمد حسن" (2004م) أن التدريب في الرمال أحد السبل التدريبية السهلة، التي تهيئ وتعد للجسم القدرة على التحكم خاصة إذا ما استخدم كنوع من الإحماء الخاص وأيضاً بأن التدريب في الرمال يعمل على المساعدة المباشرة على رفع قدرة العضلات وعلى الامتداد الكامل لها، وأيضاً لقد حظي التدريب في الرمال الآن وبخاصة في الأونة الأخيرة باهتمام الكثير من العلماء وبعض الباحثين. ومن خلال عمل الباحث تدريباً بمنتدى شباب الجزيرة لمتسابقى جرى المسافات المتوسطة ومتابعته لبعض البطولات المحلية التي يقمها نادي الجزيرة لألعاب القوى وكذلك بطولات الجمهورية التي ينظمها الاتحاد المصري لألعاب القوى تبين أن هناك انخفاض في المستوى الرقمي لمتسابقى جرى المسافات المتوسطة بالنادي مقارنة بقرانهم من متسابقى الجمهورية. ومن خلال متابعة الباحث للمتسابقين قد لاحظ ظهور بعض التغيرات في الأداء أثناء مراحل السباق مثل (انخفاض السرعة بشكل عام وملحوظ أثناء السباق)، لذلك مما يؤدي إلى انخفاض المستوى الرقمي للمتسابقين نتيجة ضعف القدرات البدنية الخاصة وهذا ما دعي الباحث للقيام بهذا البحث العلمي وذلك لمعرفة أي الأسلوبين (الوسط المائي – البيئة الرملية) أفضل تأثيراً على بعض عناصر اللياقة البدنية الخاصة والمستوى الرقمي لمتسابقى 800 متر جرى.
4811	12199247	اثر استراتيجيه لعب الأدوار في تنمية الوعي الاقتصادي الاستهلاكي لدى أطفال الروضة/	العديسي، كوثر محمد الشاذلي .		2014	تعتبر السنوات الأولى في حياة الإنسان من سنوات حياته المهمة ومن المراحل المتميزة، فإنها الفترة التكوينية الحاسمة من حياته؛ إذ يتم فيها بناؤه ووضع البذور الأولى لشخصيته بكل جوانبها. وفي ضوء ذلك فقد تعد مرحلة رياض الأطفال إحدى المراحل المهمة في حياة الإنسان؛ نظراً لأن فيها يبدأ تكوين الطفل وإعداده، وفيها تتشكل العادات والاتجاهات، وتكتسب القيم والأنماط السلوكية، كما أنها فترة تعرض واستطلاع وتجريب يستمتع فيها الطفل بأى عمل جديد يتمكن من طاقه عبد الوعوف عامر، ٢٠٠٨، إقائه والنجاح فيه (أمل حسونة، ٢٠٠٠ وتصحيح لمرحلة رياض الأطفال) (٨، ٧)، (١). ومن، والاجتماعية والنفسية وبشكل تدريجي (فرماوي محمد فرماوي وحياة المجادي، ١٩٩٩، ٥٥ قيمتها إذا صلت على تلبية احتياجات الطفل الجسمية والعقلية الاحتياجات الاجتماعية التي ينبغي تلبيتها لدى الطفل تنمية الوعي الاقتصادي الاستهلاكي؛ حيث أشار إلى أن الوعي يعد الخطوة الأولى في تكوين الجوانب، (حسن شحاتة وزينب النجار، ٢٠٠٣، ٣٣٩ الوجدانية بما تتضمنه من الاتجاهات والقيم، وذلك لأنه في ظل الظروف التي يواجهها المجتمع المصري النامي من ضغوط اقتصادية، وتنامي المشكلات المتصلة باستهلاك الغذاء والمياه والطاقة، وقصور الثقافة الاستهلاكية لدى بعض أفرادها، وتعاظم التأثيرات السلبية لثقافة الاستهلاك على النواحي الاجتماعية والاقتصادية والثقافية، فيجب أن تكون تنمية الوعي الاقتصادي الاستهلاكي من أهم أهداف المجتمعات عامة، فإن ترشيد الموارد عنصر مهم من عناصر التنمية الاجتماعية والاقتصادية، ومن ثم فلا بد من تشجيع تنظيم الاستهلاك الفردي والأسري، لاسيما الاستهلاك لدى الأطفال حيث إن نمط استهلاك الفرد يتوقف على مدى وعيه وعلى نوعية المعلومات والعادات والاتجاهات الاقتصادية الاستهلاكية التي تكونت وتأسست لديه منذ الصغر (أحمد إبراهيم، ممنوح عبد الرحيم الجعفري وهالة إبراهيم الجرواني، ٢٠١٠ وتحتاج الروضة لتنمية الوعي الاقتصادي) (٤، ١٤٠). الاستهلاك لدى الأطفال حيث إن نمط استهلاك الفرد يتوقف على مدى وعيه وعلى نوعية المعلومات والعادات والاتجاهات الاقتصادية الاستهلاكية التي تكونت وتأسست لديه منذ الصغر (أحمد إبراهيم، ممنوح عبد الرحيم الجعفري وهالة إبراهيم الجرواني، ٢٠١٠ وتحتاج الروضة لتنمية الوعي الاقتصادي) (٤، ١٤٠). أساليب وطرق فعالة في هذا الصدد، ولعل من الأساليب الفعالة استراتيجية لعب الأدوار التي عرفها بأنها طريقة التمثيل التي تعتمد أساساً على الطفل بحيث، (إبراهيم عبد الله الحميدان، ٢٠٠٥، ٩٤) تقوم المعلمة بشكل مسبق قبل شرح الدرس بتوزيع الأدوار على الأطفال مع الاستعداد لتمثيلها. إلى الأسباب التي جعلت استراتيجية - ١٠٦، ولقد أشار يحيى محمد نبهان (٢٠٠٦، ١٠٧) لعب الأدوار من أهم وأوفى الاستراتيجيات التعليمية بأغراض تعليمية التعلم في مرحلة رياض الأطفال؛ وانبعثت تلك الأهمية من إتيانها حاجيات الأطفال في هذه المرحلة.
4812	12199266	فاعليه برنامج ارشادى لتحسين جودة الحياه النفسيه للمراهقين الموهوبين/	عزت، فاطمه محمد الشهير.		2014	تعد المراقبة مرحلة مهمة في حياة الفرد؛ لأنها تمثل مرحلة انتقالية بين الطفولة والرشد،

						ولما تشمله من تغيرات نفسية واجتماعية وجسمية تؤثر على مشاعره وسلوكه، و□يك □ ون فيها الفرد اتجاهاته، وينشغل بأزمة الهوية وتحقيق الذات، ويمر المراهق بكثير من الصعوبات والتحديات والتناقضات؛ لاسيما المراهق في عالم اليوم الذي يواجه الصراع بين حاجاته ورغباته ومتطلبات وقيم المجتمع المحيط به، والتي تترك أثا □ را كبيرة على شخصيته، وعلى تقدمه الأكاديمي والنفس والاجتماعي إذا لم يحسن فيها رعايته وتوجيهه ومساعدته على التوافق. والمراهق الموهوب – الذي يمثل قاطرة المجتمع وقائدته وأغلي ما يمتلكه أي مجتمع ، فيعتمد عليه في حل مشكلاته وتذليل الصعاب ومواجهة تحديات المستقبل - يعاني من مشكلات بعضها مشابه لما يعانيه أقرانه العاديون، وبعضها الآخر ينبع من خصائصه التي يتميز به أعرفه، خاصة إذا تواجد في بيئات لا تقبل هذا الاختلاف والتميز، ولا توفر له الرعاي ةالتي يحتاجها، فيتعرض الموهوب لصراعات داخلية وخارجية، ومشكلات عدم التوافق الشخص ي والاجتماعي . وعاني الموهوب من مشكلات عديدة، كالكمالية ، والتقلبات المزاجية ، والشعور بالاختلاف، والعزلة عن الآخرين، وصعوبة تكوين صداقات مع الأقران، وعدم تقم المحيطين لاحتياجاته المتنوعة ، والشعور بالذنب، واهتزاز مفهوم الذات، والحساسية الشديدة نحو الذات والعالم، والإحباطات والضغوط النفسية الناتجة عن التباين الشديد في مظاهر النمو. والموهوب لا يتقبل ذاته للتوقعات العالية التي يطالب بها ذاته، كما يطالب بها الآخرون وأي □ ضا للتقييم الدقيق لذاته ولأدائه، فلا يتقبل الأخطاء أو الأعمال الغير كاملة، بالإضافة لمشاعر الاختلاف عن الآخرين بسبب موهبته (أمال عبدالسميع باطنة، ١٩٩٨ ؛ عبد الرحمن سيد سليمان، بالإضافة لمعاناته في علاقته بأفراد أسرته، فهم لا -٢٤٧٠ : وصفاء غازي أحمد، ٢٠٠١). (٢٥٣ يركز طبيعة الموهبة واختلافه عن الآخرين، وما ينتج عن هذا من احتياجات مختلفة، وتنب □ عا لذلك لا يتفهمون كئي □ را من تصرفاته، كما أن الموهوب تحكمه نظرة كمالية نحو ذاته والآخرين، وربما يحاسبهم من هذا المنطلق فيؤثر هذا على تفاعلاته داخل كما أن مدرسة الموهوب الحالية لا تقدم له تحديات أكاديمية ملائمة، فالمنهج قاصرة لا تتلى احتياجاته، والأساليب التقليدية للتعليم لا تمكنه من الاستكشاف والتحليل، ولا توجد نشاطات كافية في المدرسة لممارسة هواياته، ويمر الموهوب بخبرات سلبية في المدرسة؛ فلا يجد زملاء يشاركونه نفس الاهتمامات والأفكار، ويضطر الموهوب لإخفاء موهبته ليدعم علاقته مع زملائه، كما أن معلمه غير معد للتعامل معه، ولا يدرك اختلافه عن الآخرين ومتطلبات موهبته، ولذا لا يقدم له الدعم الذي يحتاجه (Pekrun,Goetz,Titz,&Perry, 2002). كما يفترض بعض الموهوبين إلى وجود هدف واضح محدد في حياتهم،فجد أن ٦٦ ٪ من الموهوبين في المراهقة المبكرة لم تظهر لديهم علامات وجود هدف، وريم ا يعد هذا تعدد الاهتمامات، ورغبة الموهوب في الوصول للكمال، ولعدم فهمه لطبيعة الموهبة، فيشعر الموهوب بانخفاض جودة حياته النفسية(Bronk,Finch,&Talib, 2010). وجودة الحياة النفسية متغير إيجابي في الشخصية لكونه محد □ دا من محددات الصح ةبا من مطالب النفس البشرية (حامد عبد السلام زهران، ٢٠٠٥□وه و أح د : النفسية، ومطل (١١ الغايات من الحياة لدى جميع البشر وإن اختلفت توجهاتهم في السعي نحو تحقيقه. وترجع أهمية متغير جودة الحياة النفسية لما أشارت إليه الدراسات من قيمة هذا المتغير في السلوك، وذلك نظ □ را للصلات المتبادلة بينه وبين العديد من الخصائص الإيجابية المتمثلة في الإحساس بالرضا، والثقة، والتواصل، والوعي بالذات والآخرين، والتعامل الإيجابي مع الذات والعالم، ولا ترتباطه بفترة الفرد على مواصلة حياته بفعالية، وشعوره بأن لدي ه حياة ذات قيم ة وهي حاجات (Seligman & Csikszentmihalyi, ومعنى تستحق أن يعيش من أجلها (2000 يتطلّبها النمو النفسي السوي للشخصية الإنسانية. كما أن شعور الفرد بحياة نفسية جيدة يوسع من وعيه، ويزيد من انفتاحه العقلي، وينقي تفكيره، ويسمح بالمزيد من المرونة في حل المشكلات والاستجابات الإبداعية، وتشجيع الانخراط في تعلم أكثر عمقا (Levenson, 2003). ولوجود الحياة النفسية تأثيرات إيجابية عديدة على حياة الفرد، فالفرد السعيد يكون أكثر إنتاجية وجودة في عمله، وأكثر اجتماعية وإيجابية في علاقاته مع الآخرين، كما أنه يقدم دعم □ م اجتماع□يا لمن حوله، ويصبح أكثر إبداع □ عا ومساعدة وعط □ ة للآخرين، وثقة بالنفس، وأكثر رف □ م لذاته، ويصبح كذلك قاد □ را على التعامل معها ومع قدراته، ويتغلب على الصعوبات التي تقبله في حياته، ويتمتع بحالة صحية أفضل، وتنخفض لديه مستويات التوتر والقلق (Lyubomirsky,King,&Diener, 2005;Lopez,2009). وشعور الموهوب بانخفاض جودة الحياة النفسية من الممكن أن يؤدي إلى التثنت والاستسلام للأثر السلبية لضغوط الأقران وضيق الأفق ويقال التعاون، والاستمتاع بالحياة، ويزيد العزلة وانخفاض مستويات النجاح الشخصي والمهني فيما بعد (Fredrickson&Branigan,		
4813	12199299	Recent Modalities in Management of Iatrogenic Biliary Injuries/	Saada, Ahmad Mohamed Elsayed.			2014 Surgical procedures performed within the biliary tract are very common. The incidence of IBDI has increased recently, and has been associated with increased use of laparoscopic cholecystectomy worldwide. It is essential to be careful in the proper visualization of the surgical area and the identification of structures before ligation or transection in order to decrease the risk of bile duct injuries during surgery. Anatomical anomalies of the bile ducts and hepatic arteries significantly increase the risk of IBDI. The most frequent cause of IBDI is misidentification of the bile duct. About 70%-80% of all IBDI are a consequence of misidentification of biliary anatomy . When biliary injury develops, early recognition and appropriate treatment are most important. Early and correct treatment allows avoidance of serious complications in patients with IBDI. The best treatment for an iatrogenic wound of the biliary tract is prevention by adequate education of surgeons in the performance of a safe technique of cholecystectomy. Great care must be exercised during		

						other biliary tract operations, difficult gastrectomies, pancreatic operations, endoscopic biliary tract investigations and operations in order to preserve the bile ducts. It is very important for every surgeon to be aware of the variants of biliary duct anatomy. It is recommended that, the routine use of intra-operative cholangiography in association with careful dissection of the blood supply to avoid any unexpected bleeding is essential. During cholecystectomy cystic structures can be identified by critical view of safety technique, by cholangiography, by infundibular technique, or by dissection of the main bile duct with visualization of the cystic duct or common duct insertion . When a laparoscopic procedure is performed by two surgeons the incidence of BDI significantly decreases, and thus a second opinion from a colleague before cutting any suspicious vital structure may be recommended .The negative effects of conversion or even aborting the procedure are minor compared with the negative effect of BDI. Failure of progression of the dissection, inability to grasp and retract the gallbladder, anatomic ambiguity, and poor visualization of the field due to bleeding should trigger the surgeon not to go on and consider alternative methods. Conversion to open procedure, proceeding with partial cholecystectomy, or even aborting the operation and placing cystostomy tube are all viable and acceptable options to decrease the risk of BDI. After partial resection the remnants of the gallbladder may be removed later on. Injuries recognized during the operation must be repaired immediately by a specific technique suited to the specific injury. The injury should be repaired by an experienced hepatobiliary surgeon. If it is impossible, a patient should be transferred to a referral hepatobiliary surgery center, after adequate drainage of a subhepatic region. A delayed elective reconstruction is associated with fewer complications compared to acute repair under suboptimal circumstances and has a success rate of 90% in experienced centers. Diagnostic work up and treatment of bile duct injuries needs a multidisciplinary approach (gastroenterologists, radiologists, surgeons). Surgical reconstruction for delayed detected bile duct injuries in the early postoperative phase is associated with a higher risk for complication compared with elective repair after 6-8 weeks.		
4814	12199356	Role of laparoscopy in unexplained chronic abdominal pain/	Moussa· Mohammed Abd Elmateen .		2014	Chronic abdominal pain is a difficult complaint. It leads to evident suffering and disability, both physically and physiologically. It is associated with poor quality of life and significant levels of depressive symptoms. Much is known about the prevalence, societal burdens, and suffering associated with chronic abdominal pain. (Gouda and Emad 2010); Camilleri 2006); Ferrell 1995); Magni et al, 1992) Chronic abdominal pain is common disorder in general practice and in hospitals. Although patients with this type of pain may undergo numerous diagnostic workups, including surgery, their pain remain a challenge to all known diagnostic and treatment methods. After all more than 40% of the patients presenting with chronic abdominal pain had no specific etiological diagnosis at the end of their diagnostic workup (Paajanen et al, 2005) Many common organic and functional diseases can cause it. The most common organic condition includes intestinal adhesions (Peters and Van Den Tillaart 2007); Van Goor 2007), biliary causes (Dumont and Caniano 1999); Johnson 2001) and appendicular causes (Fayez et al, 1995). While functional conditions include irritable bowel diseases (Mertz 2003), functional dyspepsia (Tack and Lee 2005) and various motility disorders (Abell and Werkman 1996) . Abdominal wall pain is common and frequently mistaken for visceral pain. (Lindsetmo and Stulberg 2009); Costanza 2004). After ruling out common diseases by careful investigations, many patients are still undiagnosed and represent a major diagnostic challenge to the surgeon. (Galili et al, 2009) With the introduction of laparoscopic surgery, a new tool has been added to our knowledge. The use of this new technology in the diagnosis and management of chronic abdominal pain has been tried in previous studies. (Salky and Edye 1998) ; Klingensmith et al, 1996); Mueller et al, 1995) Laparoscopy can identify abnormal findings and improve the outcome in a majority of patients with chronic abdominal pain, as it allow the surgeon to see and treat many abdominal conditions that cannot be diagnosed otherwise. (Paajanen et al, 2005) ; Kingensmith et al, 1996)) It is a safe and effective tool and can establish the etiology and allow for the appropriate intervention in such cases. (Onders and Mittendorf 2003) Abdominal adhesions are the most likely findings, especially in a patient with a past history of abdominal operations. Other findings such as appendiceal pathology, hepatobiliary causes and endometriosis can be discovered and dealt with. (Szomestini et al, 2006) ; Salky and Edye 1998)		

						Major abdominal operations result in random and unpredictable intraabdominal scar tissue formation. Intraabdominal scar tissue may result in chronic abdominal pain, recurrent episodes of bowel obstruction or both. Laparoscopic adhesolysis may provide relief of symptoms in patients with prior abdominal surgery with chronic abdominal pain. (Vafa et al, 2002) However some author denies the value of laparoscopy in adhesolysis and considers it controversial and not evidence based and therefore do not recommend it as a treatment for adhesions in patients with chronic abdominal pain. (Ikrad 1992) ; swank et al, 2003) Other authors says it is a safe and effective management option for patients with prior abdominal surgery for chronic abdominal pain or recurrent bowel obstruction. (Vafa et al, 2002)		
4815	12199386	تصور مقترح لإنشاء جامعة جنوب الوادي المفتوحة من بعد في ضوء خبرات بعض الدول/	إسماعيل، امته عبد الخالق عبد الصادق.		2014	يشهد القرن الحادي والعشرين تقدماً هائلاً في مجال التكنولوجيا عامةً وتكنولوجيا المعلومات والحاسبات والاتصالات خاصةً ، كما أنتج هذا العصر العديد من الآيات تصنيع المعرفة والمزيد من الوسائل التكنولوجية الحديثة التي جعلت العالم قرية صغيرة ، حيث عرف العصر ١ ا لراهن بعصر الثورة المعلوماتية والتكنولوجية ، عصر التلاحم العضوي بين الحاسبات والعقل البشري ، فيه تغزو الحاسبات كل مجالات النشاط الإنساني المعاصر ، وتقوم تكنولوجيا الحاسبات ، ولاسيما الإنترنت بدور كبير في نقل مظاهر الثورة إلى جميع أنحاء العالم ، ومن ثم فرضت الثورة المعلوماتية ضرورة وجود الإنسان الفعال المتعدد المهارات والقادر على التعلم المستمر والقابل للتدريب والتأهيل لمواجهة احتياجات العصر المستمرة .ويتألف إعداد هذا الإنسان الف □ عال من خلال الاهتمام بالتعليم ولاسيما التعليم الجامعي ، حيث يعد التعليم الجامعي مسئولاً عن تقدم العلم والحضارة في الدول ؛ لكونه مرحلة تعليمية تنسم بالتخصص العلمي وإعداد الأفراد للحياة العملية ، فهو أداة لتحديث وتطوير المجتمع في ظل ما تقدمه الجامعة من أنشطة تعليمية وبحث علمي وخدمة للمجتمع (١)، كما يعد التعليم الجامعي محور اهتمام معظم المجتمعات المتقدمة والنامية على حد سواء باعتباره الرصيد الاستراتيجي الذي يغذي المجتمع بكل احتياجاته من الكوادر البشرية التي يحتاج إليها للنهوض بأعباء التنمية وتوفير الرزية العلمية والفنية المتخصصة في مجالات الحياة المختلفة (٢) . وقد نال التعليم الجامعي حظاً وافراً □ من التطورات الهائلة في مجال تكنولوجيا المعلومات والاتصالات والحاسبات ، حيث أسهمت المستحدثات التكنولوجية والإلكترونية في مواجهة الكثير من المشكلات التي يعاني منها التعليم التقليدي وبعض الآثار السلبية لمشكلات المجتمع والتي من أهمها:-الانفجار السكاني : حيث النمو المتعدد المتلاحق للسكان ، والذي أسفر عن زيادة سريعة في أعداد □ الطلاب في الفصول المختلفة ويمكن مواجهة ذلك بإعداد نظم تعليمية حديثة وأشكال جديدة من التعليم يمكن أن تتكيف مع المشكلة ، حيث استنبأ أنواع جديدة من التعليم ، منها التعلم من بعد والتعليم المفتوح مع تغيير دور المعلم من المصدر الرئيسي للمعرفة إلى منظم وموجه للعملية التعليمية (٣) . مشكلة الفجوة بين أعداد الطلاب الراغبين في التعليم والإمكانيات المتاحة لاستيعابه م (الفجوة بين العرض □ والطلب) ، وتظهر هذه الفجوة بوضوح في مؤسسات التعليم العالي التي تعجز عن استيعاب المتخرجين □ من الثانوية العامةالهادر الكبير في الطاقات البشرية، إذ أن العملية التعليمية بشكلها التقليدي تتطلب أن يتفرغ كل من (الخبراء والإداريين والمستفيدين جميعاً لها، إذ أن عليهم جميعاً التواجد في الزمان والمكان المحددين، فلا يمكن للخبراء القيام بأعمال أخرى ، ولا يمكن للمستفيدين أن يحصلوا على ال فائدة من العملية التعليمية نتيجة لتعارضها مع برنامج عملهم ، الأمر الذي يفرض على المستفيد الاختيار بين الدراسة والعمل ، وذلك أيضاً يعود لاعتماد العم لية التعليمية على عنصرَي الزمان والمكان وكل ذلك يسهم في تفاقم المشاكل الاقتصادية وتعطيل القوى العاملة والحد من طاقاتها وإمكانياتها. مشكلة عدم القدرة على مواكبة الانفجار المعرفي وزيادة المعلومات بحيث لا يمكن لمؤسسات التعليم التقليدي أن تستوعبها، الأمر الذي يستلزم ضرورة العمل على توسيع نطاق المؤسسات التعليمية التي تشمل على تخصصات حديثة وبرامج تعليمية متطورة كالكلية و الجامعات الإلكترونية بمفاهيمها الجديدة(١) . وكل هذه المشكلات أدت إلى أن يكون هناك أنماط غير تقليدية من التعليم الجامعي ، ومن أهمها الجامعات المفتوحة من بعد والتي تركز على فكرة أساسية وهي أن التعليم الجامعي لا يمكن أن يتم إلا بالدعم بنظام معلوماتي تكنولوجي متطور(٢) . وفي ضوء ما سبق فإن هذه المتغيرات المعاصرة والمتلاحقة فرضت على الجامعات ومؤسسات التعليم العالي المختلفة دور □□□□□□□ في مواجهة هذه التحديات حتى تستطيع تح قيق أهدافها من إعداد لقوى البشرية والكوادر المتخصصة في المجالات المختلفة وتأهيلهم ، وإجراء البحوث العلمية بما يفى بمتطلبات التنمية واحتياجات المستقبل ؛ لذا التجهت الأنظار إلى التعليم الجامعي المفتوح من بعد ، وهو تعليم يوثق الصلة بين نظم التعليم الجامعي وتكنولوجيا التعليم بمعناها الواسع ، من حيث اعتماده على المعارف والتطبيق التقني (٣) . ويسعى التعليم المفتوح إلى توفير الفرص التعليمية بعيداً عن الشروط النمطية التقليدية التي يتسم بها التعليم النظامي لمقابلة حاجات تربية لأولئك الذين حرموا من التعليم النظامي أو من يريدون المزيد من التعليم.		
4816	12199404	Factors affecting the outcome of assisted reproductive technology/	Abo Elwafa, Yasser Ahmad.		2014	Assisted reproductive technology (ART) is any treatment or procedure that includes the handling of oocytes and sperm or embryos outside the body for the purpose of establishing a pregnancy. The first IVF baby was conceived in 1978 (Louise Brown) in Lancashire, England. However, IVF has been used in the United States since 1981 (Von Wald and Thornton, 2007) . In vitro fertilization (IVF) and many other assisted conception treatments are now routinely carried out in clinical practice and are proving to be more efficient and cost effective than some traditional medical therapies and tubal surgery. Conventional IVF is the name given to the original test tube baby treatment method and involves addition of a measured volume of prepared sperm suspension to a dish containing the retrieved oocytes. Most other variants of conventional IVF still share several similarities with it. where they differ is mainly in the method used to produce fertilization of the oocytes		

							and the site of deposition of the gametes or embryos in the female genital tract (Meniru, 2004). Assisted reproductive technology (ART) includes methods for assisted fertilization by intracytoplasmic sperm injection (ICSI) using sperm isolated from the ejaculate or obtained by microsurgical epididymal sperm aspiration (MESA) or testicular sperm extraction (TESE), assisted embryo hatching, and preimplantation genetic diagnosis (PGD) (Andersen et al., 2006). Other forms of ART involve the tubal transfer of oocytes and sperm (gamete intrafallopian transfer; GIFT), zygotes (zygote intrafallopian transfer; ZIFT) or embryos (tubal embryo transfer; TET) via laparoscopy (Basso and Olsen, 2005). In vitro fertilization (IVF) was initially designed to overcome the problem of tubal infertility but is now widely held to represent the treatment of choice for unexplained infertility, male factor, endometriosis, and ovarian dysfunction resistant to ovulation induction (Templeton et al., 2006). The introduction of ICSI has rendered severe forms of male infertility amenable to treatment and further widened the scope of IVF. This has been reflected in the rapid expansion of indications for IVF and an estimated current annual number of IVF cycles worldwide approaching 500,000 resulting in 1 in 100 to 1 in 150 babies born in the western world being conceived by IVF (Van Steirteghem et al., 2006). The degree to which IVF merits this growth in application remains unclear, however, since prospective randomized trials comparing the effectiveness of IVF with simpler fertility treatments are still lacking. Despite the relative lack of data objectively supporting the use of IVF, it has attained a central role in the treatment of infertility throughout the world. In recent years, data have emerged which allow us to re-evaluate how to assess these indications. It has become clear that factors other than the cause of infertility itself are of importance in determining the chance of IVF success (Macklon et al., 2005).

4820	12199590	مؤقتات تطبيق التخطيط الاستراتيجي بالتعليم الثانوي العام بمصر /	شحاته، مشيرة أحمد عبد الرحيم.			2014	التعليم المصري قد دخل القرن الحادي والعشرين تواجه العديد من التحديات. التحدي الأكثر أهمية هو عدم الاستقرار، وذلك بسبب تغير ونقص الموارد البشرية والمادية اللازمة للعملية التعليمية. التعليم الثانوي له أهمية خاصة في النظام التعليمي. كما أنه يقع بين التعليم الأساسي والتعليم العالي أو الجامعي. بالإضافة إلى دورها كما أنه يلعب دوراً مزدوجاً إما لإعداد الطلاب للحياة العملية أو مواصلة تعليمهم العالي أو university study. ونتيجة لهذه الأهمية للتعليم الثانوي، شهدت هذه المرحلة اهتماماً كبيراً لـ education and the role of secondary education في هيكلة المناهج الدراسية، ومنذ زارة التربية والتعليم بدأت استراتيجيتها الجديدة لتطوير مختلف مراحل التعليم. العديد من الدراسات والتقارير والأبحاث وأشار إلى أن التعليم الثانوي لديه الكثير من المشاكل. أنه لم يعد يهتم أهدافها المقدسة في الجودة التي هي واضحة عن مستوى خريجها أو اقتصاديا الذي يرتبط إلى معطف وعدد من الخريجين القادرين على المشاركة في إنتاج process. Also الروية للتعليم الثانوي أن وإنما هي أداة لنشر المعلومات الأكاديمية ومنح الشهادات. لهذا السبب أعطى المسؤولين والعلماء التعليم اهتماما كبيرا للتخطيط الاستراتيجي واستخدامه في مجال التعليم. لأنها تعتبر استخدامهم في المؤسسات التعليمية عملية أساسية لأنه يؤدي إلى تطوير كفاءة الأداء. قامت وزارة التعليم استراتيجيتها وطنية لإصلاح التعليم قبل الجامعي في مصر. مصر (2007 / 2008-2011 / 2012). وتشمل أهدافها تطوير وتحديث التعليم الثانوي في تقسيمين (العامة والخاصة). كما تضمنت توفير فرص تعليم عالي الجودة لخريجي التعليم الأساسي، وتحسين كفاءتها وإعدادهم للتعليم مدى الحياة. هذا يبين لنا أهمية التخطيط الاستراتيجي في تحقيق نجاح المؤسسة التعليمية وتحسين مستوى التعليم. ولكن هذا لا يمنعنا من القول أن هناك العديد من التحديات والعقبات التي يواجهها تطبيقه. للأسف وزارة التعليم لم تعط اهتماما لهذه العقبات ودراسات حول تطوير التعليم الثانوي العام باستخدام التخطيط الاستراتيجي، وكذلك لم تنتظر في إمكانية تطبيق التخطيط الاستراتيجي والعقبات من هذا التطبيق. هذا هو السبب زيارتها الباحث فكرة هذه الدراسة بأنها محاولة للوصول إلى أهم المؤقتات التي تواجه تطبيق التخطيط الاستراتيجي في التعليم الثانوي العام في مصر. مشكلة الدراسة: التعليم الثانوي في مصر يواجه الكثير من التحديات بما في ذلك التحديات الثقافية والتكنولوجية. عندما ننظر إلى التعليم الثانوي وعلاقته بالمتغيرات السريعة في المجتمع المصري، وسوف نجد أنه معزول تقريبا من هذه المتغيرات، بالإضافة إلى العديد من المشاكل التي العامة لقاء التعليم الثانوي مثل انخفاض الكفاءة والخبرة و training of العمال والقادة في إدارة أيضا غياب المشاركة الفعالة، the weakness دور المجتمع المحلي، وعدم وجود تقييم الأداء والرضا الفعالة لجودة العملية التعليمية. بالإضافة إلى أنها تفتقر إلى قدرات ومهارات التخطيط التي يحتاجها الزوابع، مدراء والمبادئ. ونظرا لأهمية التعليم الثانوي العام وذلك من خلال التحسين المستمر للنظام التعليمي بشكل عام وخصوصا secondary education، وأساليب التخطيط الاستراتيجي وقد استخدم، التي تعتبر واحدة من أكثر important styles في تحسين educationalestablishmentnow. But التعليم الثانوي العام يواجه بعض العقبات في تطبيق التخطيط الاستراتيجي. هذه العقبات يمكن إدارة والمالية أو المتعلقة الانتصاف البيانات أو الأهداف. وفقا للقطر السابقة، فإن مشكلة الدراسة هي تحديد أهم المؤقتات التي تواجه التخطيط الاستراتيجي في التعليم الثانوي العام في مصر من وجهة نظر العاملين منه ومنها تطوير رؤية استراتيجية المقترحة للتغلب على العقبات تطبيق التخطيط الاستراتيجي في التعليم الثانوي العام في مصر.		

							هدفت الدراسة إلى رصد احتياجات وسلوك البحث عن المعلومات لدى المستفيدين في مجال علم النفس، وكذلك تحديد الغرض من حصولهم على المعلومات، والقنوات المستخدمة للحصول على المعلومات. تطوير نظم المعلومات المتخصصة في علم النفس بما يتوافق واحتياجات المستفيدين منها. وقد استخدم المنهج الميداني، واعتمد في جمع البيانات على استبانة أعدت للمستفيدين في مجال علم النفس من المكتبات، كما تم إعداد قائمة مراجعة للمكتبات الأساسية التي ينتمي إليها مجتمع الدراسة. توصلت الدراسة إلى وجود فروق ذات دلالة إحصائية بين المتخصصين في علم النفس واحتياجاتهم من المعلومات باختلاف : الوظيفة، والعمر، والنوع. لا توجد فروق ذات دلالة إحصائية بين المتخصصين في علم النفس وسلوك البحث عن المعلومات باختلاف : الوظيفة، والعمر، والنوع. لا توجد فروق ذات دلالة إحصائية بين القدرات اللغوية لمجتمع المتخصصين في علم النفس باختلاف : الوظيفة، والعمر، والنوع.		
4821	12199597	سلوك الإقباط المسيحيين في البحث عن المعلومات في محافظتى الأقصر وقنا/	البقلي، أمين شعبان امين.			2014	إن من أهم العلوم الشرعية بعد تفسير كلام الرحمن الرحيم هو علم الحديث ولعل شرفه من شرف صاحبه صلى الله عليه وسلم ، وأشرف علوم الحديث بلا منازعة هو علم الجرح والتعديل، والذي به يميز بين ما هو منقول عن النبي صلى الله عليه وسلم ، وبين ما هو مفترى به عليه صلى الله عليه وسلم ، وذلك لما نقّش بعد عصر الصحابة من قن واضطرابات سياسية وتشيع، وكثر الكتب. وكثر وضع الأحاديث سواء نصرة للمذهب ، أو حفا على الإسلام، وتكلم في العلوم الشرعية كل صالح وطالح ، مما جعل الحاجة ماسة لهذا العلم للتثبت من الرواة في صحة المنقول عن النبي صلى الله عليه وسلم ، والتخزين من أهل البدع والأهواء ، ولقد أشارت الآيات البيئات إلى التثبت من حقيقة الأخبار قال تعالى : "يا أيها الذين آمنوا إن جاءكم فاسق بنبأ فتبينوا أن تصيبوا قوما بجهالة فتصيبوا على ما فعلنتم نادمين" اعتمدت في بحثي على المنهج الاستقرائي لتمشيه مع موضوع البحث ، وذلك بالبحث عن الأقوال، والأدلة ، والنتائج في مصادرها ، كما استعنت بالمنهج التحليلي للحاجة إليه في الوصول إلى النتائج ، والمعلومات. فيعد التعرف على حياة الإمام القطن العلمية، ومكانته العلمية، وشيوخه وتلاميذه ثم التعرف على نشأة علم الجرح والتعديل ، ثم تطوره في القرن الثاني الهجري ، ومن ثم قمت بإعداد مراتب للجرح عند الإمام القطن ، ثم قمت باستقراء الاصطلاحات النقدية للإمام القطن، وذلك بالبحث عنها في مصادرها من كتب الجرح والتعديل ، والمعل، وكتب الرجال، وجمعت المادة العلمية من خلال هذه الكتب، وخاصة كتب تلاميذ الإمام القطن، والتي تعكس منهج الإمام القطن في جرح الرواة ، ثم اعتنيت بما انفرد به الإمام القطن من اصطلاحات نقدية خاصة به في جرح الرواة، ثم إبراز جهوده في علل الحديث ، ثم تأثره بمن سبقه من نقاد الحديث، وتأثيره فيمن بعده من نقاد الحديث أيضا ، وأخيرا وضعت جدولا للاصطلاحات النقدية ودلالاتها.		
4822	12199598	منهج الإمام يحيى بن سعيد القطان ت(198هـ) في جرح الرواة /	محمود، ربيع محمود يوسف.			2015	تعتبر المرحلة الإعدادية من المراحل التعليمية الهامة نظراً لكونها مرحلة انتقالية من الطفولة إلى المراهقة والبلوغ، وتتميز بالكثير من التغيرات الجسدية والعقلية والنفسية والاجتماعية التي تحدث فيها والتي تؤثر بصورة فعالة وبالغة على حياة الفرد. وترجع أهمية هذه المرحلة نظراً إلى أن ما يحدث فيها من تغيرات ينعكس أثرها على الفرد، كما أن أثر هذه التغيرات ينعكس على ما يحدث من اتجاهات التعلم فيها بعد، ولذلك اهتمت الدراسات التربوية بتنمية هذه المرحلة لتقليل الصعوبات التي تواجه الكفاءة في تلك الفترة. تحدث خلالها، كما ظهرت نظريات تربوية تصف علم نفس المراهقة وطرق التدريس الأكثر صلاحية لهذه المرحلة. نظراً لأهمية هذه المرحلة، فقد نادي العديد من المربين بضرورة الاهتمام بالتلاميذ فيها من خلال تنمية العديد من المهارات لديهم، ومن هذه المهارات مهارات التفكير الناقد. وترجع أهمية تنمية مهارات التفكير الناقد لدى هؤلاء التلاميذ في هذه المرحلة إلى أن أسلوب التفكير الذي يكتسبه التلميذ من خلال المراحل تعلمه، هو ما يحدد أسلوب تفكيره الذي سيستخدمه فيما بعد طوال حياته، هذا إلى جانب أنها تؤدي إلى فهم أعمق للمحتوى المعرفي الذي يتعلمه وتقوده إلى الاستقلالية في التفكير، وتحريه من التبعية والتمحور حول الذات، وتشجع روح التساؤل والبحث وعدم التسليم بالحقائق دون تحري كافي، وكذلك تجعل من الطالب المتدرب ذات معنى، وتعزز من سعي التلميذ لتطبيقها وممارستها، وترفع من المستوى التحصيلي له حيث تجعله أكثر إيجابية وتفاعلاً ومشاركة في عملية التعلم، وتزيد من ثقته بنفسه وترفع من مستوى تفكيره لذاته ونتيجة له فرص النمو والتطور والإبداع (عبدالعزیز المغصیب، ٢٠٠٧). كما أشار رياض الزغبى (٢٠٠٨) إلى أن التفكير الناقد يتضمن إثارة الأسئلة والتساؤل وهذا مهم بالنسبة للتلميذ حيث يتعلم إثارة الأسئلة الجيدة وكيفية التفكير السليم وذلك من أجل التقدم في مجال التعلم والتعليم وفي مجال المعرفة ، حيث إن المجال المعرفي يبقى حياً ومتجداً طالما هناك أسئلة تثار وتعالج بجدية. ويشير على أرشد وآخرون (٢٠٠٢) إلى أن التفكير الناقد يحترم استقلالية التلميذ، ويدعو إلى العقلانية، ويساعد الفرد في استيعاب المعارف والآراء المتعددة بعد التثبت من صدقها، وتبني اتجاهات وآراء يقبلها العقل، وتمييز الآراء التي تستند إلى أدلة منطقية من الآراء الضعيفة. ولعل تنمية مهارات التفكير الناقد لدى تلاميذ المرحلة الإعدادية، يحتاج إلى استخدام استراتيجيات فعالة في التدريس، ومن هذه الاستراتيجيات التي قد يكون لها الأثر في ذلك، استراتيجيات "كتابة العلوم"، فقد أشارت بعض الدراسات إلى فاعليتها في تحقيق العديد من أهداف تدريس العلوم مثل مساعدة التلاميذ في بناء المعرفة في الكيمياء، ومساعدتهم على النقد البناء، وكذلك تطوير وزيادة أداء التفكير الناقد في الأحياء، وفي تخفيض مستويات تفكير عليا أكثر عمقا لدى التلاميذ، وأيضا زيادة الفهم لبعض الظواهر الطبيعية (Pook, 2005) ، (Quitadamo, Kurtz, 2007)، هذا وقد أشار كثير من المربين إلى أهمية هذه (Scantlebury, 2007) ، (Shepardson, Britsch, 2001). الاستراتيجية، حيث يري البعض منهم أهمية إتاحة الفرصة للمتعلمين للتعبير عن استجاباتهم كتابة وذلك من خلال القيام بالأنشطة العلمية أو الإجابة عن الأسئلة التي يطرحها المعلم أو الأقران كما يشير بعضهم إلى ، (Richmond, Kurth)، أثناء المراحل الدراسية المختلفة (1999 أهمية التفاعلات الاجتماعية واستخدام اللغة المكتوبة والشفوية في الإحصال على حد فئتهم فيها ارت التكتابة يؤدي بشكل عام إلى تنمية التفكير الناقد ، (Shepardson)، سواء (1996 لدى الطلاب ويطور لديهم مهارتي التحليل والنقد بشكل خاص (1998 وتتصلح هذه الاستراتيجيات كطريقة من طرق تفريد العلوم والتعلم الفردي لأنها تارعي الفروق الفردية بين التلاميذ حيث يكتب كل تلميذ ما يفهمه من الدرس بنفسه، وبذلك يستمتع المعلم بمعرفة مقدار نمو كل تلميذ على حدة، وهي تساعد التلاميذ على التعلم وتنظيم المعرفة، وعلى اكتساب وتخليق وتحليل المعلومات بينما يقوم هؤلاء التلاميذ بتكوين الإحساس بفتح الحل، والكتابة هي أيضا عنصر أساسي لتوضيح		
4823	12199604	اثر استخدام استراتيجيه "كتابة العلوم" في التدريس على تنمية بعض مهارات التفكير الناقد لدى تلاميذ المرحلة الإعدادية/	محمد، أسماء عبد الحارث سعد الدين.			2012	تعتبر المرحلة الإعدادية من المراحل التعليمية الهامة نظراً لكونها مرحلة انتقالية من الطفولة إلى المراهقة والبلوغ، وتتميز بالكثير من التغيرات الجسدية والعقلية والنفسية والاجتماعية التي تحدث فيها والتي تؤثر بصورة فعالة وبالغة على حياة الفرد. وترجع أهمية هذه المرحلة نظراً إلى أن ما يحدث فيها من تغيرات ينعكس أثرها على الفرد، كما أن أثر هذه التغيرات ينعكس على ما يحدث من اتجاهات التعلم فيها بعد، ولذلك اهتمت الدراسات التربوية بتنمية هذه المرحلة لتقليل الصعوبات التي تواجه الكفاءة في تلك الفترة. تحدث خلالها، كما ظهرت نظريات تربوية تصف علم نفس المراهقة وطرق التدريس الأكثر صلاحية لهذه المرحلة. نظراً لأهمية هذه المرحلة، فقد نادي العديد من المربين بضرورة الاهتمام بالتلاميذ فيها من خلال تنمية العديد من المهارات لديهم، ومن هذه المهارات مهارات التفكير الناقد. وترجع أهمية تنمية مهارات التفكير الناقد لدى هؤلاء التلاميذ في هذه المرحلة إلى أن أسلوب التفكير الذي يكتسبه التلميذ من خلال المراحل تعلمه، هو ما يحدد أسلوب تفكيره الذي سيستخدمه فيما بعد طوال حياته، هذا إلى جانب أنها تؤدي إلى فهم أعمق للمحتوى المعرفي الذي يتعلمه وتقوده إلى الاستقلالية في التفكير، وتحريه من التبعية والتمحور حول الذات، وتشجع روح التساؤل والبحث وعدم التسليم بالحقائق دون تحري كافي، وكذلك تجعل من الطالب المتدرب ذات معنى، وتعزز من سعي التلميذ لتطبيقها وممارستها، وترفع من المستوى التحصيلي له حيث تجعله أكثر إيجابية وتفاعلاً ومشاركة في عملية التعلم، وتزيد من ثقته بنفسه وترفع من مستوى تفكيره لذاته ونتيجة له فرص النمو والتطور والإبداع (عبدالعزیز المغصیب، ٢٠٠٧). كما أشار رياض الزغبى (٢٠٠٨) إلى أن التفكير الناقد يتضمن إثارة الأسئلة والتساؤل وهذا مهم بالنسبة للتلميذ حيث يتعلم إثارة الأسئلة الجيدة وكيفية التفكير السليم وذلك من أجل التقدم في مجال التعلم والتعليم وفي مجال المعرفة ، حيث إن المجال المعرفي يبقى حياً ومتجداً طالما هناك أسئلة تثار وتعالج بجدية. ويشير على أرشد وآخرون (٢٠٠٢) إلى أن التفكير الناقد يحترم استقلالية التلميذ، ويدعو إلى العقلانية، ويساعد الفرد في استيعاب المعارف والآراء المتعددة بعد التثبت من صدقها، وتبني اتجاهات وآراء يقبلها العقل، وتمييز الآراء التي تستند إلى أدلة منطقية من الآراء الضعيفة. ولعل تنمية مهارات التفكير الناقد لدى تلاميذ المرحلة الإعدادية، يحتاج إلى استخدام استراتيجيات فعالة في التدريس، ومن هذه الاستراتيجيات التي قد يكون لها الأثر في ذلك، استراتيجيات "كتابة العلوم"، فقد أشارت بعض الدراسات إلى فاعليتها في تحقيق العديد من أهداف تدريس العلوم مثل مساعدة التلاميذ في بناء المعرفة في الكيمياء، ومساعدتهم على النقد البناء، وكذلك تطوير وزيادة أداء التفكير الناقد في الأحياء، وفي تخفيض مستويات تفكير عليا أكثر عمقا لدى التلاميذ، وأيضا زيادة الفهم لبعض الظواهر الطبيعية (Pook, 2005) ، (Quitadamo, Kurtz, 2007)، هذا وقد أشار كثير من المربين إلى أهمية هذه (Scantlebury, 2007) ، (Shepardson, Britsch, 2001). الاستراتيجية، حيث يري البعض منهم أهمية إتاحة الفرصة للمتعلمين للتعبير عن استجاباتهم كتابة وذلك من خلال القيام بالأنشطة العلمية أو الإجابة عن الأسئلة التي يطرحها المعلم أو الأقران كما يشير بعضهم إلى ، (Richmond, Kurth)، أثناء المراحل الدراسية المختلفة (1999 أهمية التفاعلات الاجتماعية واستخدام اللغة المكتوبة والشفوية في الإحصال على حد فئتهم فيها ارت التكتابة يؤدي بشكل عام إلى تنمية التفكير الناقد ، (Shepardson)، سواء (1996 لدى الطلاب ويطور لديهم مهارتي التحليل والنقد بشكل خاص (1998 وتتصلح هذه الاستراتيجيات كطريقة من طرق تفريد العلوم والتعلم الفردي لأنها تارعي الفروق الفردية بين التلاميذ حيث يكتب كل تلميذ ما يفهمه من الدرس بنفسه، وبذلك يستمتع المعلم بمعرفة مقدار نمو كل تلميذ على حدة، وهي تساعد التلاميذ على التعلم وتنظيم المعرفة، وعلى اكتساب وتخليق وتحليل المعلومات بينما يقوم هؤلاء التلاميذ بتكوين الإحساس بفتح الحل، والكتابة هي أيضا عنصر أساسي لتوضيح		
							المعرفة ("Science writing Proquest", 2000).		

						وعلى الرغم من أهمية تنمية مهارت التفكير الناقد لدى تلاميذ المرحلة الإعدادية والأهداف التي يمكن الوصول إليها من خلال استخدام استراتيجيات كتابة العلوم في التدريس،		
4824	12199608	المسائل الأصولية وأثرها في استنباط الأحكام الشرعية في أضواء البيان في إيضاح القرآن بالقرآن للشافعي ت 1393 هـ /	محمد، صبري فايز مدني.		2015	من المسلم أن البحث العلمي لابد أن يلتزم صاحبه فيه منهجا معينا يسير عليه، وطريقة محددة يسلكها فيه. وقد التزمت في هذا البحث المنهج الآتي : أولاً: قمت بحصر المسائل الأصولية التي أوردتها الشيخ الشنقيطي في أضواء البيان مع بيان آراء علماء الأصول في هذه المسائل ، ولم أذكر الأدلة تحاشياً للإطالة ثانياً: سرت في بحث كل مسألة من المسائل على النهج العلمي المتكامل ، بدءا بالتعريف وتحرير محل النزاع، وذكر أقوال المذاهب في المسألة مع بيان أدلة كل مذهب والمناقشات الواردة عليها كما ذكرها الشيخ الشنقيطي، ثم إن كان هناك أدلة أخرى استدل بها كل مذهب في حكم هذه المسألة ولم يذكرها الشيخ الشنقيطي أذكرها بعد كلمة قلت ، ثم أذكر ترجيح الشيخ الشنقيطي في المسألة ، إن كان له ترجيح، وغالبا ما كان يرجح- رحمه الله- ، ثم أبين بعد ذلك الأثر الأصولي في حكم هذه المسألة. ثالثاً: قمت بنقل الآيات القرآنية من المصحف الشريف بالرسم العثماني، مع عزو الآيات إلى سورها؛ بذكر رقم الآية، واسم السورة. رابعاً: خرجت الأحاديث النبوية الشريفة، والآثار المروية عن الصحابة- رضي الله عنهم- وذلك بالإحالة على مصدر الحديث أو الأثر، بذكر المصدر، والجزء، والصفحة، والكتاب، والباب، علماً بأن الحديث إن كان مذكوراً في الصحيحين فبني اكتفيت بتخرجه منهما، وإن لم يكن في أي منهما فبني أقوم بتخرجه من المصادر الأخرى المعتمدة، وأذكر ما قاله أهل الحديث فيه ما استطعت إلى ذلك سبيلاً. خامساً: أشرت إلى مصادر الآيات الشعرية الموجودة في البحث ، مع نسبة الآيات إلى قائلها. سادساً: قمت بترجمة موجزة لكل علم ورد في البحث، إلا الأعلام المشهورة، كالملائكة والأنبياء ونحوهم، أما الأعلام التي هي مظنة عدم المعرفة، فبني أعرف بها، وذلك بذكر الاسم، والشهرة، واللقب، وسنة الميلاد، والوفاة وشيء من الأعمال والصفات والمصنفات ونحو ذلك حسب المستطاع وأكتفي بالترجمة عند ذكر العلم أول مرة.		
4825	12199609	استخدام نموذج التعلم البنائي في توظيف القواعد النحوية المقررة لتنمية مهارات الأداء اللغوي المنطوق لدى طلاب الصف الأول الثانوي	أبو بكر، حمادة محمد السيد .		2013	تعد اللغة العربية من أهم الظواهر الاجتماعية التي لا غنى للإنسان عنها، وبخاصة اللغة المنطوقة التي ميزت الإنسان عن شتى المخلوقات، إذ لا يستطيع العيش بدونها، فهي أداته التي تعينه على الاتصال بالآخرين، فلا يوجد على سطح الأرض أية جماعة إنسانية دون لغة تتفاهم بها، ولذلك لما خلق الله سيدنا آدم لعمارة الكون علمه اللغة فقال تعالى: "و علم آدم الأسماء كلها ثم عرضهم على الملائكة فقال أنبئوني بأسماء هؤلاء إن كنتم صادقين". (البقرة: ٣١) وتعد اللغة العربية مثلاً لا صديقاً للغات الحية التي تتضمن بداخلها الإرث الثقافي والحضاري لأمتها، ومحدثيها، حيث إنها لغة القرآن الكريم، والحديث النبوي الشريف، والتراث العربي العريق، وقد عكف العلماء -سدامي ومحدثين- على دراستها وتحليلها لمعرفة نظمها، وطريقة تأليف تراكيبها، وما تؤديه هذه التراكيب من معان لغوية صحيحة. وقد أكد أهميتها وعظم شأنها كبار العلماء، ومن هؤلاء التعالبي حينما ذكر في «مؤلفه فقه اللغة وأسرار العربية»: "والعرب خير الأمم، والعربية خير اللغات والألسنة □ والإقبال على تفهمها من النبذة؛ إذ هي أداة العلم، ومفتاح التفقه في الدين، وسبب إصلاح المعاش والمعاد". (التعالبي: ٢٠٠٠، ٢٩٠) وتمثل اللغة العربية في المنهج الدراسي إحدى المواد المهمة في تحقيق المدرسة لوطناتها، فاللغة تعد من أهم وسائل الاتصال بين الطالب وبينته، وهي الأساس الذي تعتمد عليه تربيته في جميع النواحي: الجسمية، والعقلية، والاجتماعية، وهي أداته للتعلم واكتساب المهارات، كما أنها وسيلته للتفاهم في كل مواقف الحياة. (قحى بونس: ١٩٩٦، ٣٣) وعلم النحو أحد علوم العربية التي نشأت في ظل القرآن الكريم؛ لأن به يستقيم اللسان العربي من الانحراف، ويؤكد على هذا ابن خلدون بقوله: "أركان علوم اللسان أربعة هي: اللغة، والنحو، والبيان، والادب، والأهم منها النحو". ابن خلدون: ٢٠٠٢، ٦٢٠) والنحو له أهمية كبيرة تمتد إلى مهارات الاتصال اللغوي المتمثلة في الاستماع، والتحدث، والقراءة، والكتابة، فيدونه يفتد التواصل قيمته من حيث الفهم والإفهام. حيث إن النحو في أية لغة من مقومات الاتصال الصحيح السليم، فالخطأ في الإعراب وفي ضبط الكلمات يؤثر في نقل المعنى المقصود، وبالتالي يؤدي إلى العجز عن فهمه. رشدي طعيمة ومناخ: ١٩٩٨، ٥٣) كما يعد تعلم القواعد النحوية مهارة من المهارات التي تكتسب بكثره المran والتدريب عليها تدريباً متكرراً في المواقف التدريسية المختلفة. (صالح سمك: ١٩٨٦، ٧٦١) مع صالح سمك فيما ذهب إليه بأن "تعليم ، ويتفق حسن الخليفة (٢٠٠٣، ١٠٧) اللغة العربية أصبح مهتماً بالتمهير؛ أي أن اللغة لا تخرج عن كونها مجموعة من المهارات والعادات التي لا يكفي في اكتسابها المعرفة وحدها، بل لابد من الممارسة والتكرار". ومرضى الزهراني (، وقد أشارت دراسة كل من عبد الحى السيد(٢٠٠٣، ٥٦) أن تحديد المهارات النحوية يعد خطوة مهمة؛ حيث تمثل الركيزة الأولى (٢٠٠٥، ٧٩) في التحكم على اللغة لكل من المعلم والمتعلم، كما أن وضوحها يساعد المعلم على اختيار الاستراتيجيات والطرق، والوسائل، التي تحفز المتعلم على ممارستها واكتسابها بصورة منظمة. وعلى الرغم من هذه العناية بتعليم النحو إلا أن تدريس مقررات قواعد اللغة العربية في المراحل التعليمية المختلفة تعاني من صعوبات عدة في تدريس النحو وتنضج في النفور الشديد من قواعد اللغة العربية، وشكوى الطلاب من عدم فهمهم لها، وكثرة الأخطاء النحوية الشائعة على ألسنة الطلاب، وفي استخداماتهم اللغوية. (محمد إبراهيم الخطيب: ٢٠٠٥، ٣٨)		
						كما أشارت دراسة كل من محمد الخطيب (٢٠٠٤)، وسلوي محمد (٢٠٠٨) إلى		

							أن مقررات قواعد اللغة العربية في المراحل التعليمية المختلفة تعاني من صعوبات عدة في تدريس النحو، وتتضح هذه الصعوبات في النفور الشديد من قواعد اللغة العربية، وشكوي الطلاب من عدم فهمهم لها، وكثرة الأخطاء النحوية الشائعة على ألسنة الطلاب وفي قراءاتهم واستخداماتهم اللغوية في حياتهم اليومية، إضافة إلى شكوي المعلمين والموجهين من انخفاض مستوى طلابهم، وعلى الرغم من الاهتمام الذي يوليه الباحثون لهذا العلم والبحث في مختلف جوانبه إلا أن هذا الاهتمام على ما يبدو لم يوفق كثيرًا في تبسيط قواعد اللغة العربية. وإن كثيرًا من المهتمين ممن حاولوا تشخيص الحالة وصلوا إلى أن تدريس اللغة العربية في واقعه الحالي لا يكسب اللغة الوظيفية التي يوظفها الدارس في تنمية مهاراته بشكل متوازن، وإنما يقدم معارف لغوية محتشدة عسيرة الفهم بتجريداتها وتفرعاتها ثم يبعدها عما يحتاجه الدارس في ممارسته اللغوية الحيوية.(محمد الزهراني: ٢٠٠٧ ، ١٦) و[]يلاحظ أن الضعف والانحيار لم يقتصر على طلاب التعليم العام بل تعداه إلى كل شرائح المجتمع، فإذا تتبعنا طالب التعليم العام في المرحلة الجامعية لوجدنا استنكارًا شديدًا لضعفه في اللغة وكثرة أخطائه، وهكذا تجاوزت الشكوي إلى الخريجين ممثلين في العاملين بوسائل الإعلام، وصفحات الجرائد والمجلات (محمود ٣٢) تتضح في القصور في عملية التعبير اللغوي؛ بحيث لا يتمكن أحدنا من الانطلاق والتحدث في المناقشات. (محمود السيد: دبت، ١٧) ويتضح مما سبق أن علاج القصور النحوي يتمثل في الاهتمام بتدريس النحو الوظيفي وتفعيله، وأن النحو الوظيفي هو لب النحو وخصائصه؛ إذ []يقدم للطلاب بصور مبسطة وأمثلة من استخدامهم اللغوي بعيدًا عن اختلاف المدارس النحوية ووجهات نظر حيث ذكر أن "النحو الوظيفي من ، النحاة، ويدعم هذا الرأي سام عمار (٢٠٠٠) ١٩٥ سبل علاج الضعف لدي طلاب التعليم العام". .

		تقييم دور مواد التقوية في علاج بعض أنواع الأخشاب الأثرية "دراسة تطبيقية على منشآت أثرية مختارة بصعيد مصر" Evaluation of the role of consolidation materials in the treatment of some types of deteriorated archaeological wood "Applied study on chosen archaeological buildings in Upper Egypt" تحتوى على أربعة فصول تم ترتيبها على النحو التالي : الفصل الأول : دراسة تطبيقية لتصنيف بعض أنواع الأخشاب المستخدمة بالمنشآت الأثرية بصعيد مصر يتضمن هذا الفصل أيضا دراسة لأهم الصفات التشريحية التي يمكن استخدامها في التعرف على الأخشاب التي تستخدم في تنفيذ العمال الخشبية الأثرية. كما يتضمن هذا الفصل مقدمة عامة عن مناطق الدراسة وهي ممثلة في اربعة محافظات وهي: "سوهاج " جرجا-برديس - أخميم" , البحر الأحمر " القصير" , قنا "قرشوط بهجورة - نجع حمادى " ,الإقصر "إسنا) يليهما مقدمة عن المنشآت الأثرية المختارة للدراسة في هذا الفصل . هذا بالإضافة الى دراسة عملية مفصلة تم من خلالها تصنيف كل أنواع الأخشاب الأثرية التي تم استخدامها في المنشآت الأثرية موضوع الدراسة بطرق علمية عن طرق عمل قطاعات ميكروسكوبية مختلفة لعينات من هذه الاخشاب ومقارنتها بعينات حديثة واخرى مرجعية من نفس النوع للتأكد من التعريف الدقيق لهذه الأخشاب الأثرية . الفصل الثاني :عوامل ومظاهر تلف الأخشاب الأثرية بالمنشآت الأثرية المختلفة بصعيد مصر " دراسة مقارنة بعينات متقادمة معمليا" الفصل الثالث :التجارب والاختبارات العملية لتقييم دور بعض مواد التقوية في علاج الأخشاب الأثرية الجافة الفصل الرابع :الدراسة التطبيقية تبدأ هذه الدراسة بتناول الجزء المتبقى من بلوكنة خشبية لأحد المنشآت التاريخية بصعيد مصر.						
	2013				حلمي، مرفت محمد جمال.	أثر برنامج تدريبي قائم على بعض الاستراتيجيات المعرفية وما وراء المعرفية في تحسين مهارات الاسترجاع وكفاءة السعة العقلية لدى عينة من طلاب الجامعة المتعثرين دراسيًا/	12199618 4827	

							وفي نفس الوقت تولي نظريات التعلم المعرفي أهمية قصوى لكيفية تشغيل، ومعالجة الفرد للمعلومات ،وكيفية اكتساب الفرد للمعرفة ذاتها والإستراتيجيات التي يستخدمها لاكتسابها. ويشير جوند عزت عبدالهادي (2000: 141) أن هذه النظرية تعني بتوضيح، وبحث الخطوات التي يسلكها الأفراد في جمع المعلومات، وتنظيمها، والاحتفاظ بها، وتذكرها من حيث انها تركز إهتمامها على المدخلات، وطريقة التخزين ،وطريقة الاسترجاع ويوضح عماد عبدالرحيم الزغول (2001: 133) أن نظرية معالجة المعلومات تعد من الاتجاهات المعرفية المعاصرة التي تعتني بدراسة عملية التعلم ،والذاكرة البشرية. ويذكر رجاء محمود أبو علام (2004: 105) أنه يمكن إرجاع معظم نماذج تجهيز المعلومات، ومعالجتها إلى (1968 Atkinson & Shiffrin) فقد اقترحا نظرية في الذاكرة متعددة المراحل، بدء من استقبال المعلومات التي تمر ببسلسلة من التحويلات إلى أن يتم تخزينها تخزيناً دائماً في الذاكرة.ثم ظهرت العديد من النماذج التي تقسر مراحل تخزين المعلومات، ووفر الألب التربوي النظري العديد من هذه النماذج.وفي هذا الصدد يشير عبدالمنعم الدردير و جابر محمد عبدالله (2005: 47) إلى إهتمام بعض الباحثين في الأونة الأخيرة بوضع تصورات كيفية التعلم بدلاً من التصورات الكمية (مقدار التغير في السلوك الملاحظ) أي التعرف على الفروق الفردية في العمليات المعرفية لتفسير التغير في السلوك الملاحظ بدراسة الظروف، والأساليب التي يتبعها الطلاب عند تعاملهم مع المعلومات فظهر مصطلح أساليب التعلم، والتي تعد نوعاً من الإستراتيجيات العامة التي يستخدمها الطلاب. ونتيجة لملاحظات Alan Baddely عالم النفس الإنجليزي للمهارات التي تقاس بها الذاكرة قصيرة المدى ،والتي يراها شديدة البساطة لعمل الذاكرة صاغ مصطلح الذاكرة العاملة Working Memory. يؤكد Baddely (1996) أن مفهوم السعة العقلية للذاكرة العاملة استخدم ليشير إلى مجموعة من العمليات التي تشكل الاحتفاظ بالنشط Active Maintenance بالمعلومات المتعلقة بالمهام أثناء أداء المهام المعرفية كال تفكير، وحل المشكلات حيث تمثل الذاكرة المكون المعرفي الأكثر تأثيراً في تنشيط المعلومات داخل الذاكرة الإنسانية ،والاحتفاظ بها للقيام بالعديد من الاستخدامات المعلوماتية خاصة التحصيل، ويتم ذلك من خلال النظم الفرعية المتصلة بها ،وهذا يعني الدور الوظيفي للسعة العقلية للذاكرة العاملة في المهام المعرفية الخاصة بالتعليم والتفكير المنطقي والفهم.
			الاتجاه نحو ختان الإناث وعلاقته ببعض سمات الشخصية لدى طالبات الجامعة/	يوسف ، سامية أسعد محمد .		2011	هدف البحث الحالي إلى التعرف على العلاقة بين الاتجاه نحو ختان الإناث وعلاقته ببعض سمات الشخصية لدى طالبات جامعة جنوب الوادي بقنا ،والتعرف على العلاقة بين الاتجاه نحو ختان الإناث والمرحلة الدراسية ،والفروق بين الشعب العلمية والأدبية في الاتجاه كذلك بين الريف والحضر ، والفروق بين المرتفعين والمنخفضين على مقياس الاتجاه نحو ختان الإناث في سمات الشخصية. تكونت العينة النهائية من (477) طالبة من طالبات من مختلف التخصصات ، مقسمة بين طالبات الشعب العلمية والأدبية تتراوح أعمارهن بين (18 إلى 22سنة) ،هبطن عليهن مقياس الاتجاه نحو ختان الإناث من(إعداد: الباحثة)،ومقياس العوامل الخمسة لسمات الشخصية (تعريب وتعقبن : رجب علي شحيا،2003). توصلت النتائج إلى وجود علاقة ارتباطيه جزئية بين الاتجاه نحو ختان الإناث وبعض سمات الشخصية. كذلك وجود فروق في الاتجاه نحو ختان الإناث تبعاً للمرحلة الدراسية كمتغير تصنيفي ،جود فروق في الاتجاه بين طالبات الشعب العلمية والأدبية لصالح الشعب العلمية ،بذلك وجود فروق دالة بين مرتفعي ومنخفضي الدرجات على مقياس الاتجاه في سمات الشخصية ،ولم تكن الفروق دالة بين الريف والحضر ،وتوصل البحث إلى أن الشخصية الانبساطية أكثر قبولاً للممارسات التي اعتاد عليها المجتمع ،ومن هنا كانت من الشخصيات التي تؤيد ختان الإناث ،بالتالي نجد إمكانية التنبؤ بالمتغير المستقل بمعلومية المتغير التابع .
			فاعلية استخدام مدخل التعلم الخليط في تدريس القراءة على التحصيل وتنمية مهارات القراءة الناقدة لدى تلاميذ الصف الخامس الابتدائي/	المرقاقي، سعيد السيد أحمد عبد المال .		2013	تعد القراءة الناقدة من أهم وأبرز أنواع القراءة، وذلك لما تمثله من أهمية في حياة التلاميذ؛ إلا أن العديد من الدراسات الحديثة أكدت ضعف التلاميذ في اكتساب مهارات القراءة الناقدة، وأشارت نتائجها إلى ضرورة الاهتمام بتنمية هذه المهارات لديهم خلال المراحل التعليمية المختلفة. كما لاحظ الباحث من خلال عمله في مجال تدريس اللغة العربية انخفاض درجات تلاميذ الصف الخامس الابتدائي في اختبارات التحصيل الشهرية لمادة اللغة العربية، وكذلك ضعف التلاميذ في تقويم المقروء والحكم عليه، وأخذهم للمعلومات والأفكار الواردة بالموضوعات الدراسية المقررة على أنها مسلمات لا تقبل النقد أو محاولة إبداء الرأي فيها، مما يؤكد الحاجة إلى تنمية مهارات القراءة الناقدة لدى التلاميذ حتى لا يتقبلون كل ما يقرءونه على أنه قضية مسلمة بل يعملون فيه عقولهم فيقبلون ما يرونه صحيحاً ويرفضون ما نون ذلك.ومع ظهور التعلم الإلكتروني وانتشاره في البلاد وحدث حالة من الانهيار به لدرجة أن البعض طالب بإلغاء الفصول التقليدية، وإحلال محلها الفصول الإلكترونية في المدارس والجامعات! بدأت البحوث العلمية والتجارب العملية تكشف لنا جوانب القصور في التعلم الإلكتروني، والتي منها غياب الجانب الإنساني في التعلم الإلكتروني، والإصابة بالانطوائية والممل، وحدث بعض حالات الغش والتدليس.من هنا ظهر مفهوم التعلم الخليط كأحد حلول تكنولوجيا المعلومات الواقعية بدمجه للتعلم الإلكتروني مع التعلم التقليدي (وجهاً لوجه) في نموذج واحد؛ للاستفادة بمزايا كل منهما لتحقيق الأهداف التربوية المنشودة، ولما كانت مشكلة البحث الحالي تتمثل في تدنى مستويات التحصيل المعرفي ومهارات القراءة لدى تلاميذ الصف الخامس الابتدائي، وقصور استخدام الوسائط الإلكترونية في تعليم القراءة وتعلمها؛ لذا كانت الحاجة ماسة لإجراء دراسة في هذا المجال لدراسة فاعلية استخدام مدخل التعلم الخليط في تدريس القراءة على التحصيل وتنمية مهارات القراءة الناقدة لدى تلاميذ الصف الخامس الابتدائيهدف البحث: هدف البحث الحالي إلى: تنمية مهارات القراءة الناقدة لدى تلاميذ الصف الخامس الابتدائي.- رفع مستوى تحصيل تلاميذ الصف الخامس الابتدائي - في مادة القراءة. سؤالا البحث: حاول البحث الحالي الإجابة عن السؤالين التاليين: ما فاعلية استخدام مدخل التعلم الخليط في تدريس القراءة على التحصيل لدى تلاميذ الصف -١ الخامس الابتدائي؟ ما فاعلية استخدام مدخل التعلم الخليط في تدريس القراءة على تنمية مهارات القراءة الناقدة -٢ لدى تلاميذ الصف الخامس الابتدائي؟ فرضا البحث: سعى البحث الحالي إلى اختبار صحة الفرضين التاليين:١- وجود فروق ذات دلالة إحصائية بين متوسطات درجات تلاميذ المجموعة التجريبية ، ومتوسطات درجات تلاميذ المجموعة(التي درست باستخدام مدخل التعلم الخليط) الصابطة (التي درست بالطريقة المعتادة) في التطبيق البعدي لاختبار التحصيل لصالح المجموعة التجريبية.

4832	12199695		The Effect of Instructional Scaffolding on Developing Some Oral Reading Skills of EFL Primary Students/	Hamdan, Hayam Abdel Halim.			2012	Reading is a complex cognitive process. mastery of all aspects of reading is essential for academic success. According to Paris (2005) learning to read is one of the greatest accomplishments in childhood because it is the foundation for learning and academic achievement. No skill is more important to student achievement than the ability to read and derive meaning from the printed page (McGuire, 2008). However, learning to read is not an easy task and is probably the most complex mental activity people have to do in their whole lives. It is a slow and difficult process and takes time, effort and practice Reading in a foreign language such as English might be a problem for some people. In this respect, Snow, Burns and Griffin (2008) claimed that there are three potential stumbling blocks in reading, namely, the difficulty in understanding and using the alphabetic principle, the failure to transfer the comprehension skills of spoken language to reading and the lack of motivation and appreciation for reading. Griffin (2008) further added that children who face early reading problem lack prior knowledge and relevant skills such as the ability to produce words, to distinguish sounds, to master the mechanics of reading and the ability to identify letters. This difficulty leads to low motivation and can be problematic for language teachers as "the motivation of reading to read is powerful" (Nuttal, 1996, p.3). Nevertheless in order to help children to read, it is important to get them to read extensively. Reading objectives in the early language learning stages place an emphasis on 'learning to read' which involves an understanding of the alphabetic principle, phonemic awareness, decoding, word recognition and phonological and orthographic processing (Lyon, 1997). However, many students fail to acquire basic reading skills in the early elementary years (Lyon, 1999). Ehri (1994) pointed out that reading difficulties relate to problems in phonemic awareness, poor decoding skills or word recognition. Supporting this view, Samuels and Flor (1997) believed that poor word recognition or an inability to decode is considered the primary cause of reading comprehension failure. Blachman (2000) reported that children who read poorly in first and second grade tend to remain poor readers throughout school. Supporting this view, Lyon (1998) asserted that approximately 75 percent of the children who struggle with reading in third grade will still be poor readers at the end of high school. Consequently, each subsequent year, these children face increasing obstacles to reading.		
4833	12199706		فاعلية وحدة مقترحة في التربية الصحية على تنمية الوعي الدوائي لدى الدارسين بفضول تعليم الكبار /	سالم، هبة حمدي جعفر .			2013	أصبحت قضية التنمية البشرية ، محوراً رئيساً يّ تدور حوله جهود المجتمعات من أجل النماء والتقدم ، وتتسع أفاق التنمية لتشمل تنمية الإنسان إلى أقصى ما يمكن أن تصل إليه قدراته وطاقاته على مدى الحياة ، فالعنصر البشري المتّع لم يمثل جوهر التنمية الاقتصادية و الاجتماعية ، ولا وسيلة لذلك إلا بالتعليم ، ومن هنا ف إن جوهر التنمية البشرية ينطلق أساساً من الأهداف الأساسية للتربية الحداثيّة التي دعت إلى أهمية إستمرارية التعليم من أجل ملاحقة التغيرات الحادثة في المعرفة والتي كانت سبباً في ظهور التعليم غير النظامي كالتعليم المستمر والتعليم من أجل الحياة والتعلم الذاتي والتعليم الكبار . وتعد مشكلة الوعي والتعليم الكبار من أخطر المشكلات التي تواجه التنمية البشرية إقتصادياً وإجتماعياً ؛ فتعليم الكبار وسيلة هامة لتحقيق التنمية المجتمعية الشاملة ، وذلك لأنه يختص ب فئة من الأفراد تقوم على علقته م التنمية والإنتاج وتنشيط المؤسسات الاقتصادية ، ولهذا دوره الهام في إحداث التنمية الإجتماعية . سعد طه علام (٢٠١٢ : ٢٠٥) (*) . وإذا كان هدف تعليم الكبار في العقود السابقة معرفة الحد الأدنى من مهارات القراءة والكتابة والصّح ا ب للدارسين والذي أطلق عليه محو الأمية الهجائية ، إلا أن هذا الفكر قد تغير بفعل التغيرات العلمية والتكنولوجية المتلاحقة وأصبح المفهوم الذي يستحق الاهتمام هو محو الأمية الحضارية الذي يتناول قضايا أخرى جديدة مثل الوعي الغذائي والبيئي والسكاني والصحي . محمد رفعت حسنين (٢٠٠٠م من أه م ركائز التنمية البشرية في المجتمع ، تحقيق التعليم الأساسي : ٢٧٦) . على الأمية ، والاهتمام بالناحية الصحية والثقافية وتحسين الأحوال الصحية للمرأة والطفل .. وغيرها . ويشير كَ لا من Carlos, z. (2005) – (أن الجوانب الصحية من أهم الإحتياجات للدارسين بفضول (2001 تعليم الكبار . فالعبد الصّحي من الأبعاد الأساسية للتنمية البشرية ، وهو مطلب أساسي ، وهدف إستراتيجي تسعى دول العالم ومنظّماته وأفراد إلّ ي بلوغه وتعمل جاهدة على النهوض به من أجل حياة صحية سليمة يسهم من خلالها الفرد في مجالات التنمية المختلفة له ولأسرته ومجتمعه . ويتطلب ذلك إعداد الفرد للحياة المعاصرة وتزويده ب المعارف وا لإتجاهات والسلوكيات نحو العلم والتكنولوجيا ليشارك بمعرفته وتفكيره مشاركة فعالة في بيئته ومجتمعه ويكون قادراً على مواجهة وحل المشكلات الصحيّة ، وهذا يعني زيادة الحاجة إلى التربية العلميّة حيث ترتبط بالتربية الصحية ارتباطاً وثيقاً بالتربية العلمية وتمثل أحد جوانبها الهامة والتي		

						يمكن من خلالها تزويد الأفراد بالمعارف والمهارات وإلا اتجاهات المرتبطة بكيفية التعامل مع ما يستحدث من قضايا ومشكلات تتعلق بسلامتهم وصحتهم. ولعل هذا الأمر يستلزم من القائمين على إعداد المناهج التعليمية بشكل عام توجيه المزيد من الإهتمام بالقضايا والمشكلات الصحية في مناهج العلوم ، فهي الوسيط التربوي الذي يمكن من خلاله توفير الخبرات التي يمكنها مساعدة التلاميذ على ما تنشده التربية العلمية والصحية من أهداف وتوفير الفرص لتحقيقها ، هذا إلى جانب الإهتمام بتطوير مناهج تعليم الكبار بشكل خاص ، فهم عصب التنمية البشرية ، والحاجة إلى أفراد أصحاء يساهموا في دفع عجلة التنمية يتطلب عناية خاصة بهم في الجوانب الصحية المختلفة. ويرتبط الوعي الدوائي بالتربية الصحية حيث أنه كثر يراً ما تحدث مشكلات صحية للأفراد نتيجة سوء إستعمال الدواء ، فقد أشارت دراسة كلاً لأم ن إيمان قحطي جلال (٢٠٠٧) و هاله إسماعيل أحمد (٢٠٠٨) إلى أن م ن مجالات التربية ال صحية الهامة مجال التعامل مع الدواء .
4834	12199734	الإبداع الإداري في ضوء الاتجاهات الإدارية المعاصرة والإفاده منه في تطوير أداء مديري المدارس الثانوية العامة/ الأنصاري .	إبراهيم، محمد صبري		2012	تعد الإدارة أداة تطوير أساسية لمؤسسات المجتمع، سواء على المستوى الكلي أو على مستوى مؤسساته وقطاعته الفرعية، وأن الفرق بين الدول المتقدمة والدول النامية هو فرق أساسي في الإدارة بالدرجة الأولى وخير مثال على ذلك أن ما يعانيه التعليم المصري المعاصر من مشكلات وأزمات تعوق حركة تقدمه نحو التنمية الشاملة لا ترجع إلى الفقر أو النقص في الموارد البشرية والمادية بقدر ما هو أزمة في إدارة التعليم. ويعد النظام الإداري الذي ساد في القرن العشرين والذي بنيت معظم مبادئه على دراسات كتب الإدارة الغربية الذين راجت أفكارهم من أمثال تيلور، كبلور، فيبر، برنارد وغيرهم ممن ساهموا في وضع المبادئ الإدارية ما هو إلا عبارة عن نموذج للإدارة يساعد على تحقيق الحركة الديناميكية للمنظمة ولكنه لا يحقق الجودة في الأداء (1). ومن أهم ما نجده في مجال الإدارة هو ظهور التقنيات الحديثة في الإدارة والتنظيم التي انتشرت في معظم مؤسسات المجتمع الحديثة خاصة اليابان والدول الغربية والولايات المتحدة والتي أصابت التربية نصيب منها، ولا يقتصر الأمر على ميكنة الإدارة وعلى استخدام الحاسبات الالكترونية بل الأمر يتجاوز هذا كله إلى استخدام تقنيات إدارية لا تحتاج بالضرورة إلى الآلة مثل: مداخل الجودة، إعادة بناء العمليات، الإدارة بالأهداف، الإدارة المتمركزة حول المدرسة أو الموقع، إدارة الفريق، إدارة الوقت، إدارة الأزمات (2). وهذه الاتجاهات الإدارية هي تعبير عن الثورة الإدارية التي وجدت فيها الدول المتقدمة ضرورة تطوير الحياة ودفع عجلة التقدم تعبيراً عن التقدم التكنولوجي الذي وصلت إليه في مختلف المجالات. ويتأثر التعليم إلى حد كبير بقدر ما يواجهه مدير المدرسة من مشاكل وصعوبات تعيقه عن أداء عمله في النواحي الإدارية والفنية التي يمارسها يومياً، فإن نجاح مدير المدرسة في أداء رسالته يتوقف على مدى قدرته على التعامل مع المجتمع المدرسي والتصدي للمشكلات التي تواجه إدارة المدرسة سواء المتعلقة بالمعلم أو التلميذ أو المنهج أو الامتحان أو المبنى المدرسي أو أولياء الأمور وغيرها، وهذا يتطلب من مدير المدرسة توفر مجموعة من السمات لحل هذه المشكلات. ولما كانت الإدارة المدرسية أداة لتحقيق أهداف العملية التربوية من خلال الاستخدام الأمثل للإمكانات والتسهيلات التربوية المتاحة وإيماناً بأهمية الإدارة المدرسية، تجلت الحاجة إلى إبراز الدور المهم والفاعل الذي يمكن أن تقوم به الإدارة المدرسية في تنمية الإبداع ، وذلك من خلال تتبع وجهة نظر الميدان لدينا ممثلاً في إدارات مدارسنا (1). ولما كان مدير المدرسة يقع في قمة الهرم المؤسسي في هذه المؤسسة التربوية فإنه يتحمل العبء الأكبر في قيادة تلك العناصر وتوجيهها في عمليات التخطيط والتنفيذ والتقييم وفق روي تربوية تنعكس على التطوير المهني لمعلمين والاستخدام الأمثل للموارد البشرية ومصادر التعلم سواء كانت في البيئة الداخلية المدرسية أو المجتمع المحلي الذي يعد رافداً رئيساً يغذي المدرسة بإمكانياته المادية وخبراته العلمية والعملية فيكون الاتصال بين المدرسة والمجتمع اتصالاً تفاعلياً قائماً على التأثير والتأثيرين(ومدير المدرسة المعصري لا ينبغي أن يقف عن حد معين من الكفاءة ولا أن) . يقتنع بما وصل إليه من أدائه لعمله بإخلاص، غير أنه من الضروري أن يكون لديه الطموح والدافعية القوية لأبعد من ذلك بكثير، بحيث يكون على استعداد تام للتكيف مع متطلبات العصر من خلال تجوير الطاقات الإبداعية الكامنة في النفوس وحفز القدرات في العاملين معه بحيث يصبح الإبداع والتجديد والمرونة هي المحك الأساسي الذي يدير به العملية التعليمية لمدرسته وفي تحركاته في المجتمع المدرسي(3). لذا فإن الإبداع يقود إلى التجديد والتطوير ومدير المدرسة المبدع عامل رئيسي لنجاح المدرسة، وهذا من خلاله تستطيع المدرسة أن تواكب ركب الحضارة، وأن يكون لها موقع على الخريطة التعليمية . وفي ظل عدم توافر المناخ الملائم للإبداع والذي قد يكون سبب وجود بعض العوامل التي تحول دون تمكين الأفراد من إظهار ما لديه من قدرات إبداعية، يتجه مديري المدارس إلى البحث عن الحلول السهلة والبسيطة المضمونة النتائج بالنسبة للمشاكل التي تواجههم أو يتعاملون معها بحيث لا تدخلهم هذه الحلول في تعقيدات إدارية أو مشاكل مع الآخرين. من هنا كان هذا البحث للقيام بدراسة الإبداع الإداري في ضوء بعض الاتجاهات الإدارية المعاصرة و الإفاده في تطوير أداء مديري المدارس الثانوية العامة .
4835	12199915	مرويات محمد بن مسلم بن تدرس الملقب بابي الزبير المكي في الكتب المستخراسة حديثه/ يوسف، أحمد محمد عبد الرحمن.	يوسف، أحمد محمد عبد الرحمن.			فقد حظيت السنة النبوية بمكانة عظيمة في الشريعة الإسلامية مما جعلها محل إهتمام المسلمين خاصهم وعامهم ؛ نظرا لأنها سنة خير خلق الله ، محمد بن عبد الله ﷺ . فهو المصدر الثاني للتشريع بعد القرآن الكريم ، فالسنة بنص القرآن الكريم من الوحي ، بذلك نطق القرآن الكريمهي العلم الذي تجرت منه بحار العلوم الفقهية ، والأحكام الشرعية ، وتزينت بجواهره التفسير القرآنية والشواهد النحوية ، وهي العلم الذي يملك بصاحبه نهج السلامة ، ويوصله إلى دار الكرامة ، وهي العلم الذي يرجع إليه الأصولي وإن برز في علمه ، والفقيه وإن برز في تكلمه وفهمه ، والنحوي وإن برز في تجويد لفظه ، واللغوي وإن اتسع في

						يعتبر البحث إنطلاقة جديدة بالقوات المسلحة الذي يفتح المجال أمام الكثير من الباحثين إلى دراسات مختلفة تهدف إلى 2. ثانيا :- الأهمية التطبيقية للبحث:- قد تسهم النتائج التطبيقية للبحث الحالي موضوع الدراسة في توجيه القائمين على تدريب الأفراد في القوات المسلحة 1. المصرية إلى تأهيل ووقاية الأفراد من الإصابات أثناء التدريب وكيفية التعامل مع الإصابات المختلفة من خلال معرفة أسباب كل إصابة حيث تعتبر هذه الأهداف الدعمة الأساسية التي يركز عليها الجنود في أداء واجبهم والقيام بمهامهم للدفاع عن وطنهم قد تسهم أيضا نتائجه في تعديل قادة القوات المسلحة إلى أسلوب التدريب المتبع داخل ميدان إجتياز الموانع والعمل على 2. توفير عوامل الأمن والسلامة داخل ميدان إجتياز الموانع للوقاية من حدوث الإصابات المختلفة أهداف البحث :- يهدف البحث إلى تصميم برنامج (تأهيلي – وقائي) لبعض الإصابات التي تحدث بميدان إجتياز الموانع العسكرية لجندى المشاة بالقوات المسلحة المصرية ومعرفة أثره على :- 1.تحسن مستوى اللياقة البدنية لجندى المشاة 2.تقليل نسبة الإصابة الشائعة في ميدان الموانع العسكرية فروض البحث :- توجد فروق دالة إحصائية بين القياس القبلي والقياس البعدى في تحسن مستوى اللياقة البدنية لجندى المشاة لصالح القياس البعدى توجد فروق دالة إحصائية بين القياس القبلي والقياس البعدى في تقليل نسبة الإصابات الشائعة في ميدان الموانع العسكرية 2. لصالح القياس البعدى		
4838	12200000	أثر برنامج قائم على إستراتيجيات ضبط المثير في الدراسات الاجتماعية لتنمية بعض مفاهيم التربية الاقتصادية والمهارات المهنية والتفاعل الاجتماعي لدي التلاميذ المعوقين عقليا القابلين للتعلم/	مصطفى، غادة قصي .		2013	مع نساتم الحرية التي ملأت المنطقة العربية ومع تعالي الأصوات الخافتة التي تنادي بالحقوق المسلوبة ، تأتي حقوق الأشخاص ذوي الإعاقة لتطالب بالمساواة ، ونفض كل ما علق بها من وصف بالعجز وعدم القدرة لنيل هذه الحقوق ، وتبديل صور التمييز غير المقبولة في زمن الحرية الذي لاحت بواكيره على الأفق . لقد اتجه العالم في الآونة الأخيرة اتجاها أكثر جدية وعمقا نحو الاهتمام بالأشخاص ذوي الإعاقة ، بقصد رعايتهم وتوفير كافة الخدمات الصحية والاجتماعية والترىوية اللازمة لهم ، وذلك لتحقيق الكفاية الذاتية والاجتماعية والمهنية التي تمكنهم من الحياة والتوافق مع المجتمع ، ولاستبدال مفاهيم الإعاقة بأخرى معيرة عن حالة الاندماج المجتمعي .وفي هذا يشير (ديان برادلي وآخرون ، ٢٠٠٠ توفير الفرص المناسبة لهم للمشاركة الوظيفية التامة في الحياة ، وذلك من خلال التدريب على المهارات التي من شأنها تحسين أدائهم الوظيفي في البيئة العامة من خلال التفاعل والتواصل والقدرة على تحسين علاقتهم الاجتماعية . فالتأيت أن قدرتهم على التعلم أبطأ من أقرانهم في نفس الفئة العمريه ، وأنهم يواجهون صعوبات في الاحتفاظ بما اكتسبوه من مهارات ، وصعوبات في تعميم المهارات الوظيفية الأكاديمية على المواقف المستخدمة أو على المواقف الصعبة ومما يزيد الأمر صعوبة أن هذه الفئة لديها قصورا في بعض الجوانب الجسميه(Ryndak & Alper , 1996, 25) . والحركية والصحية والمهنية وأساليب التواصل والتفاعل الاجتماعي والمشكلات النفسية والشخصية (حليم بشاي ، فتحى عبد الرحيم ، ٢٠١٩٢٢) . الأمر الذي يؤدي إلى القصور في أداء مهارات السلوك التكيفي والتي تمثل مكونا رئيسيا في مناهجهم ومطلبا أساسيا لاستقلاليتهم وقبيل الآخرين لهم . ومن ناحية أخرى تقل درجة نكاه التلميذ القابل للتعلم بأكثر من ٢٥ درجة عن التلميذ العادي أي أن درجة نكاه تعادل ثلاث أرباع القدرة العقلية للفرد العادي المساوي له في العمر ، وهناك تباين في الأعمار العقلية بين التلميذ السوي والتلميذ المعوق عقليا كلما زاد العمر الزمني ، ويقلل هذا مشاكل تعليمية واجتماعية تزداد في حداثا كلما ازدادت درجة الإعاقة الفكرية التي تؤدي إلى قصور في بعض الوظائف والعمليات العقلية الضرورية للعمل الأكاديمي وخاصة في الذاكرة والانتباه والإدراك والتذكر (إبراهيم الميرز ، ٢٠١٠ ويواجه التلاميذ المعوقون عقليا القابلين للتعلم مشكلات واضحة في التكيف مع ، ٢٢) البيئة ، حيث يميلون إلى الانسحاب من المواقف الاجتماعية ، ويميل بعضهم إلى التمرد والعنوان الموجه نحو الذات أو الآخرين ، إلى جانب ضعف قدرتهم على إقامة علاقات اجتماعية مع أقرانهم العائدين ، وغالبا ما يميلون إلى مشاركة الآخرين الأصغر منهم سنا في نشاطاتهم الاجتماعية والشعور بالخوف وعدم الأمان (أمل الهجرسي ، ٢٠بالإضافة إلى ذلك فإن تلاميذ هذه الفئة ، ٢٧٦ تتوافر لديهم مشاعر من الغضب والإحباط مما ينتج عنه سلوكا اجتماعيا غير مقبول قد يؤدي إلى ظهور مشكلات في البيئة ، الاجتماعية (نعيمة الحسن ، ٢٠٠٣ ، ٧) وتوصلت بعض الدراسات إلى أن التلاميذ المعوقين عقليا القابلين للتعلم يغلب على سلوكهم التبلد الانفعالي وعدم الإكترار بمن حولهم ويؤثرون الانعزال والانسحاب من المواقف الاجتماعية ، والشعور بالدونية والإحباط وضعف الثقة بالنفس ، وهذا الأمر يؤدي بهم إلى سلوكيات مضادة للمجتمع ، وأوصت بتقديم البرامج التربوية لتساعدهم على تنمية مهارات التفاعل الاجتماعي لخفض أنماط السلوك غير المقبول اجتماعيا (أميرقواسر أيضا ك ل من الروسان وهارون ٢٠٠١ محتوي م ناهج المعوقين عقليا عد ذا من الأبعاد والمهارات والمفاهيم والتي تشكل في مجموعها المادة التعليمية لهم ومن هذه المهارات (المهارات الأكاديمية والاستقلالية والمهنية والاقتصادية والاجتماعية) . وتشير الأدلة النظرية والواقعية إلى أن هناك ح ذا أدنى من مستويات التفاعل الاجتماعي التي ينبغي أن تتوفر لكل شخص ، فإذا □ حرم منها يصبح أقرب إلى الشعور بالوحدة النفسية ويهدد توافقه النفسي ، و أن انخفاض مهارات الكفاءة الاجتماعية يؤدي إلى فشل الحياة الاجتماعية وتكرار الضغوط ، وفشل العلاقات المتبادلة بين الأشخاص (دانيل جولمان ، ٢٠ ، ١٦٥)		

4839	12200037	ماجستير	Clinical value of three dimensional (3D) ultrasound in Obstetrics.	Osama Ahmad ، Mohamed Ali	جامعة جنوب الوادي - كلية الطب البشرى .	أقا:	2014	The continual technical advances made in the field of prenatal ultrasound (US) have rapidly improved diagnostic and therapeutic capabilities. Although current standard of care is almost exclusively to perform two-dimensional (2D) ultrasound, three-dimensional (3D) and recently four dimensional (4D) ultrasound have found its way into clinical practice over the last 10 years. In the future, additional clinical indications may be specifically identified for 3DUS due to its ability to evaluate anatomical structures and pathologic findings with multiplanar and surface-rendered images. We agree with Pretorius et al. (2003) when they affirm that 'although three-dimensional ultrasound will not replace two-dimensional ultrasound, many additional benefits will be identified and its use will continue to grow'. 3DUS can enhance the diagnostic capability of 2DUS in evaluating fetal malformations. 3DUS was able to discover some complicated fetal malformations that were missed by 2D US and to determine the fetal malformations more precisely than 2DUS did. 3DUS was particularly superior to 2DUS in identifying malformations of the cranium/face, spine/ extremities, and body surface. Malformations of the cranium/face and spine/extremities are often associated with specific curved deformities that cannot be displayed completely on 1cross sectional image. It is therefore difficult for conventional 2DUS to delineate the 3D shape of these malformations and their relationships to neighboring structures (Mertz et al., 2004). 3D neurosonography of the fetal brain offers significant improvements compared with conventional 2D sonography. These improvements include shorter time of data acquisition in three orthogonal planes with an unlimited number of planes, the possibility of comprehensive and thorough analysis of the obtained dataset, volume rendering, volumetric studies, and color and power Doppler studies (Azumendi et al., 2003).	#####	Prof / Sayed Ahmad Mohamed Taha Dr / Abdel Aziz Ezz-eldin Tammam.
4840	12200041		دور الجامعه فى تنميه بعض القيم الاقتصاديه والاجتماعيه لذى طلابها فى ضوء بعض بعض التغيرات العصريه/	عتريس، نجاح مختار.			2013	تعتبر التنمية الرأسيه والاقيه الركيزتان الاساسيتان للتنمية الاقتصادية الزراعية وتهدف التنمية الزراعية الراسيه الى رفع كفاءة استخدام الموارد المتاحة حاليا الى ان لها حدود معينة قد تقف عن تجاوزها كما انها ليست موضوع بحثنا. أما التنمية الزراعية الاقيه فتهدف الى اضافه وحدات انتاجيه جديده عن طريق استصلاح واستزراع اراض جديده لم تكن منغلقة فى الانتاج الزراعى من ذى قبل وهذه ليس لها حدود. يهدف هذا البحث الى اجراء دراسة تطبيقية لأماط مختلفة من العاملين باحدى الشركات الزراعية التي تم تصنيفها وتسلموا اراضي استصلاح مقابل الوظيفة بمنطقة وسط الدلتا وذلك عن طريق تحليل الانتاجية الزراعية لأهم الزروع الاستراتيجية القاتمين بزراعتها لتقرير المستوى الانتاجي الذي وصلت اليه انتاجية هذه الاراضي وكذلك التعرف على حجم المداخلات المستخدمة في مثل هذه الاراضي وكذلك مخرجاتها بالنسبة لكل محصول مزرعي، وكذلك التعرف على حجم المداخلات والمخرجات في مثل هذه الاراضي ليتسنى اتخاذ القرارات الانتاجية. كذلك يهدف البحث نحو التعرف على لصعوبات التى تعرض مشاريع التوسع الزراعى الاقوى عامة وافراد الحائزين المملكين لاراضى استصلاح خاصة ليتسنى الوقوف على ممكنات زيادة المساحات الارضية الواجب اضافتها للرقعة الزراعية وفقا للخطة. وبالإضافة الى الوقوف على السياسة الزراعية التى يتبعها أفراد الحائزين المملكين لاراضي الاستصلاح ومدى جناوها الاقتصادية كما يهدف ايضا الوصول الى نظام الحيازة الأكثر ملائمة وكفاءة اقتصادية كذلك يهدف الوقوف على الحدود القصوى للتوسع الزراعى الاقوى فى جمهورية مصر العربية وحجم هذا التوسع ف السنوات المقبلة حتى عام 2000.

4842	12200149		تطوير الكليات التكنولوجية المصرية فى ضوء بعض الخبرات العالمية المعاصرة/	جلال، إبراهيم خليل محمد .			2012	هدفت الدراسة الحالية إلى التعرف على مفهوم الكليات التكنولوجية المصرية وأهدافها ، وواقعها في ضوء خبرات بعض الدول المتقدمة وتحديد أهم المشاكل التي تواجه الكليات التكنولوجية المصري ة في ضوء النتائج، ووضع تصور مقترح لتطوير الكليات التكنولوجية في ضوء خبرات بعض الدول المعاصرة . واعتمد الباحث على المنهج الوصفى التحليلي ، وذلك لوصف أوضاع الكليات التكنولوجية المصرية في مصر ، كما اعتمد الباحث في الدراسة الميدانية على الاستبانة و ذلك باختيار أعضاء هيئة التدريس في الكلية التكنولوجية بجنوب الوادي والبالغ عددهم (٨٠) عضو أساسى ومتعاقد للوقوف على واقع الكليات التكنولوجية المصرية والتوصل لبعض مقترحات التطوير في ضوء استجابات أفراد العينة . ولقد مرت الدراسة بمجموعة من الإجراءات ، بدأت بالإطار النظري للدراسة حيث اشتمل على ثلاثة فصول ، تناول الفصل الأول الإطار العام للدراسة وتناول الفصل الثاني واقع ومشكلات الكليات التكنولوجية المصرية ، وعرض الفصل الثالث بعض الخبرات المعاصرة في مجال الكليات التكنولوجية ، ثم عرض الباحث نتائج الدراسة الميدانية ونتائج تطبيق الاستبانة ، وانتهت الدراسة بوضع تصور مقترح لتطوير الكليات التكنولوجية لتواكب التطورات التكنولوجية الحديثة.نتائج الدراسة : أسفرت الدراسة عن النتائج التالية : ١- عجز الكليات التكنولوجية عن تحقيق مع ظم الأهداف التي أسست من أجلها ، خاصة فيما -١ يتعلق بتقديم خدمات للبنية المحيطة ، وعجز هذه الكليات عن أن تكون مراكز تدريب معتمدة تقدم تدريب مهنيا وفنيا للعاملين في قطاع الأعمال . ضعف تحقيق الأهداف الخاصة برفع كفاءة الخريجين وتزويدهم بالمهارات المطلوبة في سوق -٢ العمل ، ومساعدة الخريجين على الحصول على فرص عمل ، وذلك لعدم وجود أى بروتوكولات		

								تعاون بين هذه الكليات وقطاع الأعمال ، وعدم تفعيل دور إدارة الخريجين في هذه الكليات لفتح قنوات إتصال بينها وبين المجتمعات الصناعية التي توفر فرص عمل لهؤلاء الخريجين . تقتصر وظيفة الكليات التكنولوجية على توفير تعليم فنى ومهنى فوق متوسط للطلاب الملتحقين - ٣ بهذه الكليات ، بينما عجزت هذه الكليات عن إعادة تأهيل الطلاب للالتحاق بالجامعة وذلك لضعف البرامج التي تقدمها هذه الكليات وعدم الاعتراف بجدارتها من قبل الجامعة ، بالإضافة إلى تدن ى نظرة الجامعات للتعليم الفني وعدم وضوح رسالة هذه الكليات في نظام التعليم العالي المصرى.		
4843	12200163		أثر نموذج التقصي الجماعي في تدريس التاريخ على التحصيل وتنمية التفكير الجماعي لدى طلاب المرحلة الثانوية/ الحليم . عثمان، رمضان هدهد عبد			2013	تواجه المجتمعات الإسلامية والعربية بصفة خاصة تحديات مصيرية فرضت نفسها على هذه المجتمعات تتمثل في التقدم التكنولوجي الهائل والثورة المعلوماتية الضخمة والحشد الكبير من المعرفة والحقائق والمعلومات، مما يتطلب إعداد جيل قادر على التعامل مع هذه المتغيرات ومواكبتها ، إذا فالإنسان أغلى ثروة يملكها الوطن، ويعد تنمية قدرات التفكير للإنسان أفضل استثمار للمستقبل فهو قادر على تغيير الواقع وتحسينه باستغلال الطاقات الكامنة لديه وتوجيهها إذا ما أتاحت له فرص التعليم المناسبة ، والتي تحدث تغييرات إيجابية في القدرات العقلية والأدائية كما في الاتجاهات والمواقف والقيم الخلقية والاجتماعية من أجل إعداد إنساناً يبني الوطن ويقف في وجه هذه التحديات . إذا ينبغي على التربية مواجهة هذه التحديات والتصدي لها بإعداد الفرد المتعلم إعدادا سليما ، بحيث يكون قادراً على مواكبة التطور المتسارع في مجال تخصصه ، وذلك من خلال تنمية قدراته ومهاراته في التفكير والتحليل والنقد ووزن الأدلة والبراهين وتوظيف مصادر المعرفة المتاحة في عمليتي التعليم والتعلم وتربيته تربية تمدّه بالمعارف والمهارات وأساليب التفكير اللازمة للحياة في عصر المتغيرات السريعة والتطورات المتلاحقة (خالد عمران، ١٩٧، ٢٠٠٧) . ويعد التفكير بجميع أنواعه من أهم الأهداف التربوية التي تسعى المؤسسات التربوية إلى تحقيقها، حيث تهدف إلى تنمية قدرات المتعلمين المختلفة حتى يتمكنوا من التوافق مع المجتمع الذي يعيشون فيه ويتفاعلون معه ليصبحوا قادرين على حل المشكلات التي تواجههم في مجتمعهم الحاضر والمستقبل. لذلك ركزت حركة الإصلاح التربوي في العقدين الأخيرين على تنمية قدرات التفكير عند الطلاب عن طريق إعدادهم لذلك وتوعيتهم لما سيكون عليه المستقبل الذي سيتطلب منهم مزيد من التخطيط القائم على التفكير بكل البدائل المتاحة لمزيد من الاستثمار والتطوير في شتى ميادين الحياة، وإن يتوفر لهم ذلك إلا ينبغي البرامج التي تعمل على تنمية قدرات ومهارات التفكير المختلفة لديهم ؛ وفي مقدمتها مهارات التفكير الجماعي مما يستوجب استخدام الطرق التدريسية المناسبة مع تلك البرامج لتفعيلها واستثمار ما لدى الطلاب من طاقات كامنة (وليد فياد ، ٢٠٠٨، ٢٠٠٧) . وقد ظهرت حركة " صناعة التفكير " التي مفادها أن التفكير لم يعد نشاطاً شخصياً أو مهمة فردية يقوم بها المفكر ليحقق هدفاً ذاتياً أو يحل مشكلة معينة ولكن أصبح نشاطاً جماعياً، وصار التفكير في ظل هذه الحركة تفكير في مجموعات أو " تفكير تعاوني " وينبغي أن تعتمد عملية إيجادالحلول أو مواجهة الاحتمالات المستقبلية على قاعدة بيانات موثقة وعلى الدروس المستفادة من تاريخ العلم وتاريخ الإنسانية. (محمد المفتى ، ٩٠ ، ١٩٩٧ - ١٠) . كما أن الممارسات التعليمية التعليمية في حجرات الدراسة لا تهتم بالأنشطة التعليمية التي تساعد على تشجيع التفكير الجماعي، فمن النادر أن يعطى المعلم أسئلة ، أو مشكلات ، أو تعيينات تحتاج إلى جهد مشترك تقوم به مجموعة من الطلاب للتعامل معها، ويجري التعليم في حجرات الدراسة بشكل جماعي ولكن بدون تفاعل بين الطلاب فكل منهم يفكر ويحسب ويحل مشكلة مستقلاً تماماً عن زملائه مما يحول دون تكوين العقل الجمعي أو تنمية التفكير الجماعي (محمد المفتى ، ٢٠٠٧ ، ١٦) .			
4844	12200266	ماجستير	Effect of dietary fat sources with antioxidant supplementations on growth performance and meat quality of Japanese quails.	Shimaa Abdelazeem ، Abuelwafa Mousa	جامعة جنوب الوادي - كلية الطب البيطري بقنا.	قنا:	2015	The present study was conducted to evaluate the effect of different dietary fat sources (fish oil, sunflower oil and animal fat) with two antioxidants (Se-vitamin E mix or L-carnitine) on growth performance and carcass traits of Japanese quails. In addition, blood biochemical parameters, meat chemical composition, meat quality tests and economical evaluation of quail diets were also studied. A total number of 189 unsexed Japanese quail chicks (Coturnix coturnix japonica) one day old which distributed randomly into 7 groups, a control and other six treated groups, each of 27 chicks and assigned to the seven experimental diets. Each group was subdivided into three replicates each of 9 chicks. Basal control and experimental diets were formulated to contain the recommended levels of CP and ME. Birds in the first group were fed ad-libitum on the basal control diet without addition of oils and antioxidants. This group was assigned as a control to which the other treated groups were compared. Chicks in the second, third and fourth groups fed on the experimental diets (D2, D3, D4) containing 3% FO, Sun O and AF and supplemented with 5g vitamin E-Se mix/kg diet. Birds in the fifth, sixth and seventh groups fed on the other three experimental diets (D5, D6, D7) containing the same level of FO, Sun O and AF (3%) but supplemented with 50 mg L-carnitine/kg diet. Each experimental group was treated according to the suggested design going be tested.	#####	Prof. Dr. Abdelatif Sh. Seddek Prof. Dr. Hassan A. Abdel-Raheem Dr. Sherief M. Abdel-Raheem
4845	12200280	ماجستير	Prevalence of microbial infection in camel's milk and antimicrobial activity against these isolates.	Hypy Mahmoud ، Mahmoud Abbass	جامعة جنوب الوادي -كلية الطب البيطري بقنا.	قنا:	2014	Camel's milk represents the principal milk for consumers in the arid and sub-arid areas where camels present the main animal source because camel can thrive under extreme hostile conditions and produce milk of high nutritional value. Regular consumption of camel's milk in those areas is mainly occurred in raw state or just soured by nomads. Unhygienic measures adopted during production, handling, processing, storage and distribution were responsible for the highly contamination of raw milk. The high rate of contamination of the raw milk with different types of microorganisms may induce undesirable and objectionable changes rendering them unfit for consumption, moreover it indicates that they may at times, constitute a public health hazards.	#####	Prof.Dr. Mohamed Wael abd Al-Azeem Dr. Serageeldeem Abd-Elaziz Ahmed sultan

							So the present work was planned to investigate Prevalence of microbial infection in raw Camel's milk (non heat treated) and antimicrobial activity against these isolates. A total 89 samples of Egyptian camel's milk (Camelus dromedarius) collected from different places from desert of Mersa Matruh 57 samples from Swani Samalos and Dabaa, 30 samples from Ras El-hekma and 2 samples from camel research center in Mersa Matruh governorate where are those areas considered as the largest gatherings of dairy camel in Egypt. These samples were examined bacteriologically, it has been found that most of the microbes isolated from these samples as the following:- □ Staphylococci spp was with percentage of 17.9% of the so Staphylococcus spp considered as major pathogen isolated from camel milk. □ E. coli isolated with percentage of 1.1%. □ Gram negative bacilli isolated with percentage of 1.1%.		
4846	12200287	ماجستير Cattle Egret as bio-indicator for detection of Lead and Cadmium pollution in Qena, Sohag and New-Valley Governorates.	Hosam Mohamed Toughan Soliman	جامعة جنوب الوادي - كلية الطب البيطري بقنا.	قنا:	2014	The aim of this study was to determine the levels of environmental pollution in three governorates in Upper Egypt; Qena, Sohag and New-Valley by using Cattle Egret as bio-indicator for environmental pollution. A total numbers of 61 were collected as follows: Qena (n=20), Sohag (n=22) and New-Valley (n=19). The level of lead and cadmium in feather, liver and bone of cattle egret was determined by using atomic absorption Spectrometry (AAS) method. Our results revealed that; the average means of lead levels in feathers in Qena, Sohag, and New-Valley regions were $(0.7 \pm 0.355, 0.566 \pm 0.447 \& 0.356 \pm 0.158)$ mg/ kg respectively. While the average mean of cadmium levels in feathers in Qena, Sohag, and New-Valley governorate were $(1.003 \pm 0.902, 0.304 \pm 0.107 \& 0.275 \pm 0.229)$ mg/ kg respectively. The average mean lead levels in the liver of cattle egret in Qena, Sohag, and New-Valley governorate were $(0.901 \pm 0.214, 0.266 \pm 0.233 \& 0.207 \pm 0.324)$ mg/ kg. While the average means cadmium levels in liver of cattle egret in Qena, Sohag, and New-Valley governorate were $(0.168 \pm 0.026, 0.130 \pm 0.050 \& 0.113 \pm 0.042)$ mg/ kg respectively. The average mean lead levels in bone of cattle egret in Qena, Sohag, and New-Valley governorate were $(1.84 \pm 0.346, 1.66 \pm 0.977 \& 0.862 \pm 0.566)$ mg/ kg respectively. While the average means cadmium levels in bone of cattle egret in Qena, Sohag, and New-Valley governorate were $(0.238 \pm 0.032, 0.098 \pm 0.036 \& 0.041 \pm 0.024)$ mg/ kg respectively. The highest lead concentration between the three tissues (bone, liver and feather) in the three governorate (Qena, Sohag and New-Valley) was present in bone in Qena governorate was $(1.84 \pm 0.346 \text{ mg/kg})$, while the highest Cadmium concentrations between the three tissues (bone, liver and feather) in the three governorate (Qena, Sohag and New-Valley) was recorded in feathers collected from the Qena governorate and was $(1.003 \pm 0.902 \text{ mg/ kg})$.	#####	Dr. Abdel-Lattif Shaker Seddek Dr. Zakaria Mokhtar Zaky Mohamed

4848	12200358	Study of Mathematical Models for Some Infectious Diseases/	Khalil· Mohamed Khalil Ibrahim			2013	Mathematical modes of infectious diseases provide new aspects in understanding the spread of diseases, and it suggests control strategies. Typically, these models are formulated with classical derivatives of integer order. Here we propose the use of generalized fractional derivatives. Fractional calculus (FC) has been extensively applied in many fields of science and engineering. Many mathematicians and applied researchers have tried to model real processes using the fractional calculus. This is because of the fact that the realistic modeling of a physical phenomenon does not depend only on the instant time, but also on the history of the previous time which can be successfully achieved by using fractional calculus. In this thesis, we are interested in the fractional order models of infectious diseases. Such models have become very important for decision-making about infectious disease intervention programs. Main claim is that a fractional model can give a more realistic interpretation of natural phenomena. Generalized models of infectious diseases are presented in this thesis by using ordinary differential equations of fractional orderChapter one An introduction and a survey of mathematical modeling of infectious of diseases are presented including those of fractional order. Some of the basic definitions of fractional calculus are presented. The idea of Homotopy analysis method (HAM) and generalized Euler method (GEM) for solving initial value problems based on fractional order ordinary differential equations are discussed in this chapter. Chapter two		

							In this chapter, two generalized epidemic models for infectious disease that spread in the host population and are presented. The first one is the model of Hantavirus infection model, while the second is the second one is the model of non-fatal disease in a population. The numerical solutions of the two models are presented in this chapter. Chapter three The main aim in this chapter is to discuss the models of Infectious diseases with drug therapy effect. The solutions of two generalized models of HIV-1 infection are presented. Chapter four This chapter is devoted for solving generalized models of viral population dynamics in host cells. The scope is indicated for the fractional order model of (HIV-1) infection and (HTLV-1) infection Chapter five This chapter attempts to find numerical solutions for a general class of fractional order model of infectious diseases with constant vaccination strategy or those with immune response term. For this purpose this chapter summarizes specific techniques for (HAM) and (GEM), as well as the applications of Caputo fractional calculus. This chapter gives an attention to the importance of the generalized model of childhood diseases with vaccination impact. Also generalized models of chronic viral infection with immune response are discussed in this chapter Chapter six Comparisons between the numerical results and the plasma viral load data obtained from ten patients during primary HIV-1 infection are presented. The comparisons prove that, the results of the fractional order model are closer to the experimental data than the results of the integer order model.		
4849	12200392	حسين، هالة حامد حسن .	دور المدرسة الثانوية العامة في تفعيل التربية المدنية للطلاب/		2013	علمنا اليوم يشهد التطور الهائل في كافة المجالات، لذلك يواجه الكثير من التحديات التي تفرض نفسها على الأفراد والمجتمعات في كل مكان. هذه التحديات: ثورة المعلومات، متواليات من العولمة، واتساع المعرفة، الفضاء الكوني والأنظمة الرقمية متداخلة والمعرفة والمعلومات؛ لذا الريح عاصفة من التغيير قد رافق كل الجوانب في الحياة، بما في ذلك انتشار الديمقراطية قامت مسؤولية إعداد اجتماعيا وسياسيا للإنسان أن يعيش بوصفه عضوا في المجتمع المحلي، ثم كعضو في المجتمع البشري من خلال حق المواطنة. ويتحقق ذلك من خلال التربية المدنية أن يعلم الإنسان أن يكون حرا في بلد الحرية والتعليم democracyCivic تقديم طلبية المدارس الثانوية العامة مع فرصة لمعرفة حقوقهم ومسؤولياتهم من خلال التردد على العالم السياسي الذي يعيشون فيه، حتى يتمكنوا من ل-themselves-see. كيف القضايا الموضوعية على جدول الأعمال العام، وكيفية مناقشة السياسة العامة، وتمكينهم من فهم مبادئ المواطنة وحقوق الإنسان، وممارسة الطرق الديمقراطية في البحوث والتشاور والدعم، وتكون على استعداد للوصول إلى حلول وسط أو التعديلات. بسبب التطورات والتغيرات التي تحدث في عالمنا اليوم، مصر تحتاج إلى نوع جديد من المدارس التي مرتبطة ارتباطا عضويا المجتمع والمؤسسات التي ترتبط بحياة الناس، ومتصلا قواعد العمل والإنتاج، نبض الرأي العام ومؤسسات الثقافة والإعلام، ولها أنشطة التي تؤثر بعمق على المجتمع. ونتيجة لذلك، أصبحت المدرسة معزولة عن المجتمع بسبب الهدف القصير على التعليم، والتي تنتهي في الحصول على الشهادة. الناس لا يهتمون بما يحدث داخل المدرسة، كما لم يعد يعني أن المدرسة ما يحدث خارج أسوارها. أيضا، تحولت أولياء الأمور ومجالس المعلمين لمجرد فارغة.			
4850	12200483	دندراوي، محمد الراوي.	الجيومورفولوجيا التطبيقية لوادي النيل فيما بين الأقصر وقنا :		2014	تُعد منطقة الدراسة فيما بين منبثي الأقصر وقنا، أي تقع منطقة الد ا رسة 52' شمالاً، ويحدها خط كننور 522 بين دائرتي عرض 32' 52'، 52 شرق وغرب النيل، أي بين خطي طول 92' 95' و 25' 99 شرقاً، ومساحتها 9292 كم 5، ومن وبلغ طول النهر 26.35 كم، يأخذ مجرى النهر طريقه فيها بين الضيق والاتساع والاستقامة والانحناء داخل المنطقة، ويبلغ متوسط عرض المجرى 652 م، بمتوسط عمق 6 م. اهتم هذا البحث في د ا رسة الجيومورفولوجيا التطبيقية للمنطقة وظاه ا رتها المختلفة التي من أبرزها المجرى والجزر النهرية، والسهل الفيضي وظهره المصح ا روي، إضافة إلى د ا رسة خصائص بعض الأودية التي تصب في منطقة الد ا رسة وأخطارها على المنطقة. يتألف البحث من ستة فصول يسبقها مقدمة تتناول تحديد منطقة الد ا رسة، والأسباب التي دعت إلى اختيار الموضوع، والهدف من الد ا رسة، ومشكلات وتساؤلات الد ا رسة، والد ا رسات السابقة سواء كانت جيولوجية أو جغ ا رفية وغيرها، ودور الد ا رسات الحقلية وم ا رحلها، وأهم الخ ا رط والمربيات الفضائية التي تقيد البحث، ومناهج وأساليب الد ا رسة، وتنتهي بخاتمة تم خلالها عرض النتائج التي توصلت إليها الد ا رسة والتوصيات التي ي رى الطالب أنها ذات فائدة وضرورية للمنطقة وأولويات مواجهة الأخطار. وقد تناول الفصل الأول الخصائص الجغ ا رفية العامة للمنطقة، والتي أهمها التركيب الجيولوجي والتركيب البنائي للمنطقة، والمناخ والنبات الطبيعي بالمنطقة، وشبكة التصريف المائي المنحدرة إلى منطقة الد ا رسة، كما تناول الخصائص البشرية بالمنطقة منها عدد القرى بالمنطقة وكثافتها السكانية، وأنماط العم ا رن المرتبط بالأشكال الجيومورفولوجية، وشبكة الطرق والترع والمصارف المائية المنتشرة بالمنطقة. ملخص البحث: 2 أما الفصل الثاني فتناول دور الجيومورفولوجيا التطبيقية للمجرى النهرى من حيث اتساع المقطع العرضي والتغي ا رت في اتجاه المجرى وبلغ المتوسط			

						السبوي لمعدلات النحت النهري بالمنطقة 2.22 كم في السنة، بينما وصلت معدلات الإرساب 2.23 كم 5 / عام لذا فإن النهر يميل إلى الإرساب، ونتيجة لحركة النحت والإرساب ظهرت أخوار مائية مهجورة قديمة دلالة على تغير موقع المجرى، وقد ساعدت هذه الأخوار والقنوات المهجورة على إمكانية زراعته وأقامة عدد من مراكز العمل كما يمكن الاستفادة من المجرى في إنشاء الصيد وأقامة الموانئ النهرية. وقد تناول الفصل الثالث الجيومورفولوجيا التطبيقية للجزر النهرية وخصائصها وبلغ عددها 29 جزيرة عام 5229 ، وهي في تزايد مستمر عدداً ومساحة وتندرج ترتيبها في تكوينها الجمعي ضمن التربة الرملية الخشنة. ويحدث للجزر النهرية هجرة وانقسام في بعض المناطق، والالتحام بالضفاف في مناطق أخرى، فقد التحم نحو 22 جزيرة حتى عام 5229 ، وتوجد جزر موسمية بلغ عددها 2 جزر، إضافة إلى الألسنة الرملية وكلها يمكن استخدامها بشريا في الزراعة وأقامة قرى ونشاط زراعي (إضافة إلى النشاط السياحي. وتضمن الفصل الرابع الجيومورفولوجيا التطبيقية للسيل الفيضي وبلغت مساحته 299 كم 5، ومتوسط اتساعه 4 ، Applied flood plain كم، والتربة ما بين رملية إلى رملية طميية، وتتصل به المزارع الفضية مما تزيد من مساحتها كما توجد مجموعة من الجسور الطبيعية Levee . ومن الجيومورفولوجية التطبيقية للسيل الفيضي يمكن زراعته وزراعة أجازه من المزارع الفضية والظهير الصحراوي Desert Hinterland ، وأقامة عمارة ومراكز زراعية والحصول على المياه الجوفية من أجل النشاط البشري. وتناول الفصل الخامس تقييم الأخطار الجيومورفولوجية على المنطقة كأخطار النحت والإرساب النهري، وأخطار السيول من الأودية المنحدرة إلى منطقة الدراسة.	
	4851	12200493	تقنين جرعات التدريب الاستشفائي لفترة المنافسات وأثرها على بعض متغيرات اللياقة الهوائية واللاهوائية للاعبين كرة الطائرة / الصغير، هالة محمد عبد المطلب.		2013	يهدف البحث إلى تقنين جرعات تدريبية استشفائية للاعبين الكرة الطائرة خلال فترة المنافسات وفقاً لتوزيع أزمته التدريب والراحة ومعرفة مدى تأثيرها وتم استخدام المنهج التجريبي وتمثل مجتمع البحث من لاعبي كرة الطائرة وعددهم 24 لاعبة وتم اختيار عينة البحث بالطريقة العمدية واستنتجت الباحثة أن أسلوب تدريبات التنفس العميق كوسيلة استشفائية خلال فترة المنافسات للاعبين. أصبح الاهتمام بعمليات الاستشفاء في مجال التدريب الرياضي الحديث لا يقل أهمية عن الإهتمام بموضوع تقنين حمل التدريب الذي يعد الوسيلة الرئيسية التي يستخدمها المدرب للتأثير على الرياضي بهدف الارتقاء بمستوى الأداء والإنجاز الرياضي ولا يمكن الوصول إلى النتائج الرياضية العالية اعتماداً على زيادة حجم وشدة التدريب فقط بدون مصاحبة عمليات الاستشفاء للتخلص من التعب الناتج عن أثر حمل التدريب حيث تتطلب طرق التدريب ضرورة التنسيق الكامل بين فترات الأداء وفترات الراحة ، وخاصة في الرياضات والألعاب التي تعتمد على الأداء المستمر مثل مختلف الألعاب الجماعية بما فيها الكرة الطائرة . هتميز طبيعته الأداء في الكرة الطائرة بأهميه الدور الحيوي الذي تلعبه فترة الاستشفاء، حيث لا تقتصر هذه العملية على فترة الانتهاء من التدريب أو المباراة، وإنما تستمر خلال المباراة ذاتها عندما ينخفض معدل اللعب ، كذلك وقت الراحة بين الأشواط ، وأثناء عمليات التبديل التي يخرج فيها اللاعب، أو خلال فترات الوقت المستقطع وذلك في الألعاب الرياضية التي يسمح فيها للقائمين بذلك حيث تؤدي نوبات اللعب السريعة إلى استهلاك الطاقة بطريقة لاهوائية ، ولكي يتمكن المدرب من التخطيط الجيد لفعلية أن يكون ملماً بجوانب التنسيق والربط بين تأثيرات الأحمال التدريبية وجرعات الاستشفاء لاختيار أكثرها ملائمة للاستخدام ، مع مراعاة عدم إغفال التخطيط الجيد لفترة المنافسات للاحتفاظ بالمستوى العالي الذي وصل إليه اللاعب / اللاعبة خلال فترة الإعداد بمراحلها المختلفة والعمل على تحقيق الفورة الرياضية . تبرز مشكلة البحث الحالي من خلال ما أشار إليه "علي فهمي البليك" وآخرون " (2008م) ، " أبو العلا عبد الفتاح " و " أحمد نصر الدين " (2003م) إلى أن غالبية المدربين يركزون على التدريب كمجموعة واحدة في توزيع درجات الحمل (الشدة – الحجم – الكثافة) وإغفال عملية الاستشفاء بالرغم من أهميته الذي أصبح في مجال التدريب الرياضي لا يقل عن أهمية حمل التدريب . لذا ترى الباحثة ضرورة إلحاق البرنامج التدريبي للاعبين الكرة الطائرة ببرنامج استشفائي متكامل يضمن وصول اللاعب إلى الحالة الطبيعية حتى ينمو لديه القدرة على الإستمرار في الأداء دون الوصول إلى مرحلة الحمل الزائد الذي قد يؤدي إلى انخفاض مستوى اللاعب ، مع مراعاة التنوع في استخدام وسائل الاستشفاء حتى لا يصل اللاعب إلى مرحلة الملل وأن تكون مناسبة لدرجة الحمل الذي يقع على عاتقه ، فيجب مراقبة كل لاعب أثناء المباراة والتدريب ومحاولة تقدير المجهود الذي يقوم به خلال المباراة أو الوحدة التدريبية حتى يتمكن من وضع فترة الاستشفاء المناسبة له والتي تمكنه من التخلص من التعب .	
	4852	12200533	عبد العظيم، ناهد سهري برشاوي.		2012	يخرج الأبناء إلى الحياة صفحه بيضاء يكتب الأب والأم عليها ما يشأن وتقع على عاتقه المسؤولية ما الأولى في تربيتههم وذلك من خلال الأساليب أو الطرق التي يتعاملون بها مع أبنائهم فإذا كانت أساليبهم سوية وصلح الأبناء والعكس صحيح، وإذا كانت أساليبهم هذه غير سوية أخرجوا للمجتمع مضطربين نفسيين وربما مرضى نفسيين، فأساليب التنشئة الوالدية التي يتبنّاها الوالدين في معاملتهما لأبنائهم وخاصة المراهقين بمثابة حجر الأساس لصحتهم النفسية ،ولأسيا مع التقدم التكنولوجي الذي يعتبر الإنترنت أبرز مخرجاته بما يحتويه من برامج متعددة مغريه خطيرة ، الأمر بيزداد خطورة وخصوصا على المستوى الدراسي والنفسى في ظل مرحلة حرجة لها خصائص خاصة، الأمر الذي يتطلب اهتمام ورعاية من الوالدين وتعديل من أساليبهم القديمة الواهية التي يستخدمونها مع أبنائهما في زمن التكنولوجيا التي زادت المشكلات النفسية والاجتماعية تعقيدا وتشابكا. تتزايد أهمية تلك الدراسة في ظل الظروف الاتصالية المتطورة التي أبرزت لنا ما يسمى بظاهرة عالمية الاتصال والتي تدفعنا إلى ضرورة الإلمام بهذه الوسيلة ومعرفة جميع جوانبها والاستفادة من الجوانب الإيجابية وتجنب السلبية منها . تخضع استراتيجيات ما وراء المعرفة باهتمام الباحثين في مجال الفهم في القراءة والاستماع والتي تشير إلى وعى القارئ أو المستمع بذاته وما يقوم به من عمليات معرفية في أثناء القراءة والاستماع مما يرتبط عليه مراقبة تلك العمليات وتنظيمها وإدراكه لعملياته المعرفية والخصائص المرتبطة بطبيعة المعرفة لديه والفهم القرأني في أساسه قائم على عملية التفكير هذا من ناحية أخرى فإن تلاميذنا ينقصهم الحس النقدي فإذا ما استمعوا إلى حديث أو قرأوا موضوعا أو نصا اخذوا بما سمعوا أو قرأوا لأنه لم تتم لديهم مهارات التفكير الناقد لكل ما هو مسموع أو مقروء وقد أهملت الدراسة الحالية بتنمية بعض المهارات الدنيا والعليا للفهم الناقد ومستوى الفهم الإبداعى وفي ضوء النتائج السابقة تدتت مشكلة الدراسة في وجود ضعف لدى معظم تلاميذ الصف الثاني الإعدادى في بعض مهارات الفهم القرأني والاستماع الناقد لقلّة استخدام استراتيجيات تدريس حديثة لعلاج هذا الضعف.

4857	12200897	أثر تنميت القدرات التوافقية على بعض مظاهر الانتباه ومستوى أداء بعض المبادئ الخططية الهجومية لدانشى كرة القدم/		موسى، هاشم عبد المريد عبد الحميد .			2013	تطورت المشاهد الرياضية بشكل كبير في الآونة الأخيرة، خصوصاً مع تزايد اهتمام العديد من البلدان في العالم للرياضة ومراحل خاصة من الناشئين، والتي هي حجر الأساس لإعداد الرياضة ومجهزة لاستضافة البطولة وإحضارها إلى أعلى المستويات الرياضية الإنجاز الذي جعل هذه الدول بمواصلة الجهود لإعداد الشباب على أسس واضحة العلمية.		
								وتوافق كل من "ج. "Rosak RACZEK(1990م) ، و "ج. Crog، س. هارتمان، ج. "Hpabl(2002) أن القدرة التوافقية لها أهمية كبيرة جداً في مجال التدريب بشكل عام والصغار على وجه الخصوص حيث flected مستوى القدرات التوافقية مباشرة في شكل مهارة أداء لهم أي درجة Madt أكبر من الكمال من قدرات التوافقية والتعلم بشكل أسرع وتحسين مهارات الأداء على نحو أفضل، أي الأداء الحركي يتناسب طردياً مع القدرة التوافقية ويوافق على المهتمين في تطوير الأداء الرياضي على التفوق في الرياضة هو نتاج عوامل كثيرة والبيولوجية والوظيفية والنفسية، والتي تعاني السنوات الأخيرة، وزيادة الانتباه إلى العامل النفسي ومسؤولة عن مساعدة الرياضيين لتحقيق الحد الأقصى للأداء وضمان الاستقرار في المنافسة لانتباه ل المهرة نفسية هامة للاعبين، وهذا هو الأساس لنجاح عملية التعلم والتدريب والمنافسة بأشكالها المختلفة، والاهتمام أو التركيز له تأثير سلبي على أداء أكبر عدد ممكن من اللاعبين العودة السبب في تندي مستوى أدائها في مسابقة لتتفقد التركيز، وكثيراً ما نجد لاعب بعد منافسة تبرر انخفاض مستوى الأداء أو الفشل "Pfkdh" القدرة على التركيز"، كما يعزو بعض المدربين وضعف أداء فرقههم التي Edrbunha إلى فقدان التركيز خلال المنافسة.		
								ويعتقد الباحث أن يحدث ذلك، ودمج جميع جوانب التدريب في مرحلة الشباب ينبغي إيلاء الاهتمام لجميع هذه الجوانب، بما في ذلك التكتيكية وخاصة مبادئ التكتيكية، التي هي أساس لتعريف الجانب الناشئة أهمية التكتيكية وكيفية بناء الخطط وتنفيذها وكيفية تحسين التفكير التكتيكي على طول الطريق إلى قمة الأداء التكتيكي في جوانبه المختلفة.		
								حيث يشير "طارق عبد المنعم" (2003) أن فريق إتيقان لمبادئ التكتيكي جعل لاعبي الهجوم الانتقال من محور الهجوم، وأيضاً بعيداً عن تحقيق محورها أيضاً التفاهم والانسجام بين تحركات لاعبين مختلفين، ويمكن لكل لاعب للاعلاق إلى خطوة جديدة وفقاً لموقع الكرة في thepitch وكذلك وفقاً للشروط زملائه والمنافسين حتى تتميز هذه الأعمال بتوافق الأراء والانسجام.		
								وحيقة أن الباحث إلى القطاع السابق لاعب ومدرب الناشئين قبا النادي الرياضي ومن خلال متابعة العديد من البرامج التدريبية للغة العمرية مرحلة تحت 14 سنة وشهدت العديد من الألعاب ... ويعتقد الباحث أن أهم الأسباب ل عدم وجود تحركات لاعبي متنوعة وليس الانتقال إلى المكان الصحيح للحركة الزميل والكرة والخصم وليس محافظة اللاعبين على عمق واتساع المناسب للفريق خلال الهجوم، والتكيف البطيء للموقف موقف السيارات حركي جديد ويثير الدهشة هو انخفاض مستوى التوافق مع قدرة هذا العصر الناشئة.		
								وكذلك يرى الباحث أن العديد من الأخطاء تحدث في الأداء الفني والمهارة خلال المنافسة وهذا يحدث في غيرها من الألعاب دون ولكن نظراً لفقدان الاهتمام خلال المنافسة أو عدم القدرة على الاحتفاظ بها لفترة طويلة.		
								وبدأت بعد ذلك الحاجة للباحث لتوجيه هذه الدراسة إلى محاولة التعرف على أثر تنمية القدرات التوافقية بعض مظاهر الاهتمام ومستوى أداء بعض المبادئ الهجومية التكتيكية.

4862	12201004	فعالية برنامج الإرشاد بالمعنى في تخفيف الضغوط النفسية لدى المراهقات الكفيفات/	إسماعيل، بسمة أحمد السيد .		2012	لقد خلق الله سبحانه وتعالى للإنسان الحواس لكي يستطيع التكيف مع بيئته اجتماعياً وعضلياً ونفسياً وقد وهبها الخالق لكافة الكائنات الأخرى لتعيش على الأرض وتسيح في ملكوت الله عز وجل. قد ظل الكفيف يعاني من الإهمال والنبذ والقسوة في المعاملة لفترة طويلة من الزمن عبر المراحل التاريخية لتطور الإنسانية؛ فقد كان طابع الحياة قديماً هو الصراع والبقاء فيها للأقوى ومع ظهور الأديان في العصور الوسطى بدأ الاهتمام بالمعاقين وتقديم الرعاية لهم؛ فقد بدأ الاهتمام بنوعي الإعاقات البصرية في المجتمع الإسلامي أولاً، ثم كان اهتمام المجتمعات الأخرى بهذه الفئة بعد ذلك؛ حيث تأسست في العصور الوسطى بيوت وملاجئ للمكفوفين. وعلى الرغم مما تسببه الضغوط للكفيف من آثار نفسية سيئة فإن الضغوط ليست جميعها شيئاً ضاراً أو حالة مرضية وغير سوية، بل قد تكون حالة صحية دافعة للسلوك الجيد ولنجاحه وتفوقه وحافزاً على تحقيق الإنجازات وقادراً على إثبات ذاته وجعله يشعر بالبهجة والتغاول والإقبال على الحياة والرغبة فيها والاستمتاع بها. والحقيقة أن الضغوط التي أصبحت تحيط بالمعاقين بصرياً من كل جانب كثيرة ومتعددة وذات درجات متفاوتة، وقد يرجع ذلك إلى التغيرات التي طرأت على الحياة الأسرية والاجتماعية والمهنية لديهم، وهكذا أصبح الضغط النفسي من أكثر الظواهر انتشاراً لدى الكفيف في الوقت الحاضر، والتي يعاني منها الشخص الكفيف في مواقف ومجالات مختلفة مما يستوجب ضرورة التعامل معها بفاعلية ، فالضغوط شأنها شأن معظم الظواهر النفسية الأخرى مثل القلق والعدوان والعنف والصراع والإحباط ، وبالتالي لا يستطيع الفرد الإحجام عنها أو الهروب منها. تعد الضغوط النفسية من أهم الموضوعات الحديثة التي تطورت في مجتمعنا الحالي. فهي ظاهرة من أهم وأخطر الظواهر التي تهدد حياة الكفيف		

									ومن أكثر الظواهر النفسية والاجتماعية تعقيداً وقد تزايدت مع تزايد سرعة التقدم التكنولوجي فعصرنا لم يعد عصر الحياة السهلة الميسورة بل تعقدت ظروف الحياة مع التقدم الحادث وشهدت تغيرات في كل جوانب الحياة مما دفعت التكيف إلى الوقوع تحت وطأة الضغوط ومواجهة العديد من المواقف المضاعفة التي تتطلب عليه الكثير من مصادر القلق والتوتر وعوامل الخطر والتهديد في كافة مجالات الحياة ومن ثم مواجهة الفرد للمطالب المتلاحقة التي قد تتجاوز إمكانياته وقدراته وتعرضه لكثير من مواقف الفشل والإحباط في تحقيق رغبته وإشباع حاجاته وانعكس آثارها على معظم جوانب شخصيته. فهمة البحث عن المعنى هي أن يجد المرء المعنى في الطريق؛ وما يحدث من صراع داخلي ليس بالضرورة □ معبراً عن مر. ض يستدعي العقاقير المهدنة، بل شيء من الصراع والحرارة والطاقة الديناميكية المعنوية الداخلية دليل وبرهان على □ سو□ ي □ ة الإنسان، وهي من مؤشرات الصحة النفسية؛ فحينما تكون في توتر بين ما أنجزته وبين ما لا يزال عليك أن تنجزه يصبح لحيتك الحرارة التي تدفكك إلى معتك إذن البحث عن المعنى والتسامي إليه يحاول أن يستثير روح المسؤولية للتعثور على معنى الحياة التي يجب أن يكونها الإنسان من ذاته هو لا من إسقاطات الغير كل الغير عليه. فالمعنى ليس نصائح أخلاقية، ولا حتى تعليم منطقي-(المعنى أعق من المنطق لمن تأمل!)- وإنما حفر في الضمير: الحفر في البئسة بدل الماء، ومن يضحى بضميره من أجل أحلامه كمن يحرق صورة جميلة من أجل الرماد.

							انصب اختيار الباحث على عصر الأسرة الثامنة عشرة لأنه عصر النهضة والقوة والازدهار لمملوكها آنذاك، كما أنه -5- موضوع لم يتم تناوله من قبل بالدراسة الوافية . ومن ثم فقد توجه اهتمام الدراسة في إبراز مظاهر السياسة الخارجية لمملوك الأسرة الثامنة عشرة، بدءاً من الشمال والشمال الشرقي لأتهما كيان سياسي مستقل لا يتفصلان ، ثم تطرقت الدراسة إلى أعمال السياسة الخارجية في الجنوب، وانتقلت من الشمال إلى الجنوب مرة واحدة، ذلك لأن الجنوب كان يُعد في عصر الدولة الوسطى كياناً واحداً متصلاً بمصر، وقد حدثت بعض الثورات في فترات الضعف، ولاسيما عصر الهكسوس، مما أدى إلى انفصال الجنوب عن مصر، وأصبح يمثل كياناً مستقلاً، لذلك أثر ملوك الأسرة الثامنة عشرة أن يقوموا ببعض التوسعات جنوباً لإرجاعه كما كان سابقاً. استناداً على النقوش والمنابر التي تركها الملوك وكبار رجال الدولة خلال عصر الأسرة الثامنة عشرة. وكذا محاولة استيضاح السياسة الخارجية في الغرب. و حماية الحدود الغربية. والتوسع وبسط النفوذ . إبراز ماهية ومفهوم الدعاية السياسية المصرية إبان الفترة موضوع الدراسة -7- . توضيح أصول الدعاية السياسية المصرية القديمة ومدى علاقتها بالأدب المصري القديم -8- . إجلال مظاهر الدعاية السياسية لمملوك عصر الأسرة الثامنة عشرة -9- . تبين مدى علاقة الزواج السياسي كأحد مظاهر الدعاية المصرية القديمة آنذاك -10-

(أ)الجص (ب) الزجاج الفصل السادس : دراسة تطبيقية لعلاج وترميم وصيانة نموذج من الزجاج المعشق بالجص يرجع الى العصر العثماني .								
		في عصر تتعاظم فيه أهمية العلم والمعرفة ، وفي زمن تنسم فيه الحضارة بالتسارع وترفع رايات المادية وتجعلها شعاراً لها ، وتعمل بقصد أو بدونه على إضعاف القيم الروحية وتغييبها ، ألا وأنه لا تزال الأولوية للقيم وللأخلاقيات ، فلا جدوى للعلم بدون سلوكيات تحكمه ولا قيمة لما يحويه الفرد من ثقافة ومعرفة دون قيم وأخلاقيات تحدد وتضبط وتهذب أفعاله . والقرآن الكريم ينشئ على أخلاق النبي الكريم صلى الله عليه وسلم فيقول : □وَأَيُّكُمْ لَعْنَى عَظِيمٍ □ [القام:4] إشارة إلى أهمية الأخلاق ومكانتها ويلخص الرسول صلى الله عليه وآله وسلم جوهر رسالته والغاية الأولى من بعثته في الأخلاق فيقول (إنما بعثت لأتمم مكارم الأخلاق) "رواه البخاري " تعد القيم قوة محركة لمسلوك الفرد وعمله ، وهي توجه اداء الطفل وجهة دون أخرى ، والقيم يتشربها الفرد من الحياة الاجتماعية ، لأنها تبدو كما لو كانت شخصية وملكا للفرد نفسه، وهي مرجعا للفرد في الحكم على الجمال والقيح والشر والخير كما يعد النمو الخلقي من أهم جوانب الشخصية الإنسانية ، ويكتسب هذا الجانب أهميته بما يحتاج هذا العصر من تطور مادي سريع ، يتطلب تمسك الفرد بما لديه من قيم ومبادئ أخلاقية يقاوم بها تيار الغزو الثقافي ، فالعديد من مشكلات المجتمع الراهنة ترجع لكونها مشكلات أخلاقية ، وتعبير مظاهرها عن أزمة أخلاقية ناتجة عن قصور في نمو الجانب الخلقي في شخصية أفراد (فرقية عبد الفتاح ، منى بدوى ، 2000 ، 196) كما أنه ليس من المتوقع أن ينمي الطفل لنفسه مبادئ سلوكية أو قيم خلقية بل هو يتعلمها عن طريق احتكاكه بالجماعة (مفيد نجيب ، زيدان نجيب ، 1989 ، 109) فالقيم تنمو بصورة واضحة ومستمرة كلما كان المناخ التعليمي صحبياً يتمتع فيه المتعلم بالإحساس بالأمن ومن تلك الأداب التي يجب أن يتخلق بها الأطفال منذ الصغر الصديق والأمانة ، والاستقامة ، والنظافة ، وإغاثة الملهوف ، واحترام الكبير ، وإكرام الضيف ، والإحسان إلى الجار، ومحبة الآخرين وتنزيه ألسنتهم عن السباب والشتائم ، وترفعهم عن دنيا الأمور كالكنذب ، مع تعويدهم مشاعر إنسانية كريمة وإحساسات نبيلة كالإحسان إلى اليتامى ، والبر بالفقراء ، والعطف على المساكين (عبد الله واصح علوان . 2007 ، 182) . ولإكساب الأطفال تلك الأداب من خلال مضمون جيد ، يضمن تحقيق أهدافه ، ينبغي أن يكون جذاباً فيؤكده(يعقوب الشاروني ، 1989:37) على أن المضمون إذ افقد الجاذبية فلن يصل منه شيء للمتعلمين ، وتعد تكنولوجيا المعلومات والاتصالات إحدى القوى المحركة والمؤثرة في عملية التعليم والتعلم وذلك نتيجة لما أفرزت عنه هذه التكنولوجيا من تقنيات وأساليب تفاعل وتواصل متعددة الأشكال والأنماط (نجلاء محمد فارس، 2008 ، 187) ، ويتوقع علماء الاتصال التربوي وتكنولوجيا التعليم مزيداً من الانفتاح التكنولوجي في أداء المعلم في العملية التعليمية. (زكريا لال ،علياء عبدالله ، 2008 : 227) . فاستخدام التكنولوجيا في مجال التعليم يساعد على إثراء العملية التعليمية ، ويسهم في تحقيق الأهداف المنشودة بما تنتجه من تأكيد على إيجابية المتعلم ونشاطه ، والإسهام في زيادة تحصيله للمعارف والمعلومات وتنمية قدرات التفكير الناقد ومهارات حل المشكلات لديه ، وإكسابه الاتجاهات والقيم المرغوب فيها ، وتعديل سلوكياته.	2013			عبدالله، إيمان سعيد أحمد.	فاعلية برنامج مقترح قائم على الصورة الرقمية في تدريس التربية الدينية لتنمية بعض القيم الخلقية لدى تلاميذ المرحلة الابتدائية /		12201117	4867

4869	12201150	ماجستير	أساليب التفكير لدى معلمى التربية الخاصة وعلاقتها باتجاهاتهم نحو المعوقين .	مغازى أبو الحسن،محاسن أحمد	جامعة جنوب الوادى - كلية التربية بقنا.	قنا:	2014	هدف البحث الحالى الى تعرف طبيعة العلاقات بين أساليب التفكير لدى المعلمين فى التربية الخاصة واتجاهاتهم نحو تلاميذهم المعوقين ، وهدف ايضا الى تعرف تأثير اختلاف نوع المعلمين (معلم – معلمة) على أساليب تفكيرهم ،كما هدف الى تعرف تأثير اختلاف نوع اعاقلة التلاميذ على أساليب التفكير لدى المعلمين فى التربية الخاصة . وتكونت عينة البحث من (140) معلما ومعلمة من معلمى التربية الخاصة ببعض المدارس التابعة لإدارة التربية الخاصة بقنا (مدرسة الأمل للسمع والبصير ، مدرسة الأمل للسمع والبصير ، مدرسة التربية الفكرية ، معهد النور للمكفوفين) بقنا ، و (109) ذكر ، و (81) أنثى للعام الدراسى 2012/2013 . وقد تم استخدام الأدوات الآتية : استبيان أساليب التفكير لدى المعلمين (تعريب وتقيين : عبدالمنعم احمد الدردير ،2004 ب) ، ومقياس اتجاهات المعلمين فى التربية الخاصة نحو تلاميذهم المعوقين ، ونحو المهنة (إعداد : الباحثة) .	#####	ا/د/ عبدالمنعم أحمد الدردير د/ ياسر عبدالله حنفى .
4870	12201166		فعالية برنامج إرشادي سلوكي لتخفيف الانحرافات الجنسية لدي المراهقين المعاقين ذهنيا/	محمود، العباسي محمود محمد .			2012	هدفت الد ا رسة الحالية الى التحقق من فعالية برنامج إرشادي سلوكي لتخفيف الانح ا رفات الجنسية لدي الم ا رهقين المعاقين ذهنيا القابلين للتعلم ،وتكونت عينة الد ا رسة من (عام - ، ١٠) تلاميذ من الذكور كمجموعة تجريبية وتنت ا روح اصارهم الزمنية بين (١٤) ١٨ واشتملت ادوات الد ا رسة على مقياس الانح ا رفات الجنسية - ومسنو ذكاء يت ا روح بين (٥٥ ، ٦٩)، والبرنامج الإرشادى لاولياء الامور والمعلمين ، والبرنامج الإرشادى السلوكى(اعدا الباحث) للم ا رهقين المعاقين عقليا،واستخدم الباحث الأساليب الإحصائية اللابا ا رمترية لمعالجة نتائج الد ا رسة والتي اسفرت عن وجود فروق دالة إحصائياً بين متوسطى رتب درجات المجموعة التجريبية فى القياسين القبلي والبعدي على مقياس الانح ا رفات الجنسية بأبعاده (النظرية – الاحتكاك الجنسي – العادة السرية) لصالح القياس البعدي ،وبعدم وجود فروق دالة إحصائياً بين متوسطى رتب درجات المجموعة التجريبية فى القياسين البعدي والتتبعي على مقياس الانح ا رفات الجنسية ممايدل على فعالية برنامجى الدراسة واسم ا رز اثرهما على مجموعة الدراسه. تؤدي مظاهر نمو الأعضاء الجنسية الأولية والثانوية للم ا رهق فى فترة البلوغ إلى تركيز اهتمامه على مسائل الجنس إلى الحد الذي يشغل معظم وقته وتفكيره فيقارن بين شكل جسمه وأجسام الآخرين من أق ا رنه من الجنس نفسه ويحاول الحصول على بعض المعلومات عن الجنس ويلجأ إلى مصادر غير دقيقة مثل الأصدقاء ، الشارع ، الخدم ، أقلام الجنس التي شاعت فى السنوات الأخيرة وتمثل خط ا رً بالغا على الم ا رهقين وقد يفوق ذلك كله الم ا رهقين إلى بعض المشكلات الجنسية خاصة ممارسة العادة السرية ، وتتناقص هذه المشكلات إذا توافرت ظروف تربوية مناسبة .ولا تختلف المظاهر الجنسية عند الأشخاص المعاقين عن العاديين لكن طرق التربية يجب أن تكون ادى بحيث يجب توجيه الفتيان والفتيات من أجل منع التعرض للإستغلال الجنسي مما يؤدي إلى مشاكل نفسية ، وقد يصير البعض على إستخدام العقاب ا لاء أي مظهر جنسي أو أساليب التهديد والتحويل والذي قد يؤدي إلى مشكلات نفسية متعددة.		
4871	12201182		فاعلية برنامج إرشادي قائم علممارسة بعض الأنشطة المدرسية في تخفيف العنف لدى طلاب الحلقة الثانية للتعليم الأساسي/	أحمد، المأمون طه محمد .			2013	تعد مشكلة العنف من أخطر المشكلات التي تواجه المجتمعات الحديثة، فهي غير مقبولة في المجتمعات ذات الحضارة الإنسانية الراسخة، ومع ذلك فقد انتشر ما يعرف بثقافة العنف، التي تجسد اتجاهات المجتمع نحو العنف، مثل تمجيد العنف في الأفلام ووسائل الإعلام سواء المرئية أو المسموعة أو المقروءة. فلا يمر يوم دون أن نطلعنا الصحافة بأخبار حوادث وقتل وانتقام ، رغم أن الإحصاءات والبيانات الرسمية، عن حوادث العنف لا تمثل الحقيقة بكاملها، نظراً لأن المجتمع يعاني من الزيادة السكانية الهائلة التي لا يقابلها توفير المتطلبات الأساسية للأفراد. وتتمس مشكلة العنف المحل الأول أسرة الشخص الذي يمارس العنف أو العدوان، كما أن العنف يخلق كثيراً من المشكلات لرجال الأمن والشرطة والمعلمين إلى جانب ضحايا العنف، كذلك تهم دراسة العنف كل المؤسسات الإصلاحية في المجتمع. وتعتبر وجهة النظر الحديثة العنف مرضاً أو اضطراباً اجتماعياً أكثر من كونه جريمة؛ ومن ثم لا بد له من البحث عن أسباب وطرق معالجته، فمظاهر أو جرس إنذار يجب على المجتمع أن يحسن قراءتها. Symptom العنف تعد مرضاً ولمعرفة ظاهرة العنف يجب معرفة دوافعها الكامنة في شخصية الفرد الذي يلجأ إلى العنف وكذلك بواعثها الاجتماعية، ومن هنا فإن دارس العنف لابد أن يدرس المناخ الاجتماعي الذي يقع فيه العنف، وقد يؤدي العنف إلى جرائم كثيرة منها القتل والسرقة والثورة والتمرد والعصيان والضرب والاعتداء والتدمير وإتلاف الممتلكات. (عبد الرحمن العيسوي، ١٩٩٠ : ٤٣٤) وفي ظل هذا أصبح العنف الطلابي يمثل قضية هامة في الوقت الحالي، وخاصة في البيئة الحضارية المزدحمة مما يؤدي لازدياد الشغب الطلابي الذي يعبر عن غضب الطلاب وعدم الرضا ويفرغ هذا العنف في تحطيم الممتلكات بل يصل الأمر لأكثر من هذا، فيمتد هذا الاضطراب من حرم المدرسة إلى آخر فهو يتخذ لدى الطلاب أشكالاً وصوراً متعددة، منها الضرب فيما بينهم، والعنف المتمند مع إدارة المدرسة. (عادل الشوقاي، ٢٠٠٧ : ١٧٥) فالعنف الطلابي أصبح يشكل ظاهرة خطيرة اجتاحت مدارسنا، انتقلت من الشوارع إلى المدارس بعد أن اجتاحت بيوتنا، الكل يرمي باللوم على الآخر. المنزل يلقى باللوم على الشارع... والمدرسة تلقي باللوم على الاثنين حيث تشير الدراسات إلى أن ٣٣ % من الأطفال الذين تمت دراسة حالاتهم يظهرون سلوكاً عدوانياً، فهي مشكلة خطيرة يلاحظها معظمنا، وتحتاج إلى أن تضبط في مرحلة مبكرة، وخطورتها أنه يمكن أن تقتصر أيضاً بالعنف في أثناء مرحلة الرشد والرجولة بعد، وذلك إن هناك دراسات تؤكد من خلال متابعة هؤلاء الأطفال أن نسبته كبيرة من هؤلاء يصحون راشدين عدوانيين. (سناء سليمان، ٢٠٠٨ : ٧١) فضلاً عن أن موجة العنف الطلابي في هذه الأونة أصبحت لافتة للنظر، لذلك تستدعي الاهتمام من الباحثين لدراستها ومحاولة تقديم تفسيرات لتتمكن من إيجاد حلول لها أو التقليل منها، ولقد أمتد العنف في البيئة المدرسية مما كان له الأثر السلبي على الأداء التعليمي والتربوي لدور المدرسة في المجتمع بما يؤثر على أداء رسالتها التربوية والاجتماعية، فقد كثرت الشكاوى منه، وأثر على عدم الاستقرار في المدرسة وانتشر التوتر فيها، ولا شك أن هناك عوامل عديدة تحرك هذا العنف وتسببه لدي بعض طلاب المدارس، وقد تكون اجتماعية أو اقتصادية أو نفسية، فالأمر يحتاج إلى البحث. (عادل الشوقاي، ٢٠٠٧ : ١٦٠)		

								فأصبحت تنتشر بين طلاب المرحلة الثانية من التعليم الأساسي هذه الظاهرة متمثلة في الضرب والاعتداء اللفظي بالقول والاعتداء البدني وإتلاف ممتلكات المدرسة وغيرها، وذلك نتيجة لأسباب غياب التوجيه السليم لطلاب هذه المرحلة، وتعدد الأسباب التي تقف خلف انتشار هذه الظاهرة. ويترتب على العنف الكثير من الأضرار والآثار السلبية في المدارس ولا تقتصر هذه الآثار على الضرر الجسمي والنفسي للطلاب فقط بل تقف عتية، أمام جهود المعلمين في تحقيق أهداف المؤسسة، لارتباطه بأنماط العنف الأخرى مثل القتل أو الاغتصاب أو السرقة إلخ خارج نطاق المدرسة والتساهل في مواجهه العنف الطلابي يترتب عليه زيادة العنف الاجتماعي وأجبل الأكثر عتف.		
4872	12201588	ماجستير	Effects of Digital Storytelling on Developing English Vocabulary of Preparatory School Students	Hameed Ali · Heba El Sayed Abdel	جامعة جنوب الوادى - كلية التربية بقنا	أقا:	2014	The present study investigated the effects of digital storytelling on developing English vocabulary skills of EFL third year students enrolled at Rawafea El Qussair Preparatory School, Sohag. Participants of the study are 80 female students .The control group students (n = 40) received traditional classroom instruction whereas the experimental group students (n = 40) received treatment (digital storytelling program). Data were collected through the English Vocabulary Test. Descriptive statistics, independent sample t- test, and Spearman rank order coefficient of correlation were used in data analysis. Findings revealed a significant improvement in English vocabulary performance of the digital storytelling group compared with the non – digital storytelling group. Findings also indicated significant gains obtained by the experimental group in the post – administration of the test as compared with the pre – administration. Moreover, the study concluded that digital storytelling has positive effect on developing the subjects' English vocabulary skills (i. e., recognition, recall and word usage) . Results of the study confirmed that the digital storytelling program is an effective instructional tool that enhances the students' English vocabulary performance . Key Words: digital storytelling , English vocabulary skills , recognition, recall, word usage.		Dr. Awatif H. Mahmoud Al – Shaar Dr. Mohamed Khairat M.Rashed
4873	12201693		Studies on the endoparasitic infections of some Red Sea fishes/	Ahmed, Nahla Hossam El-din Mohamed .			2012	In Egypt, the Red Sea has a major importance in the production of fishes. Fishes appeared seasonally where there are more than 150 species recorded from the Red Sea (Al-Kholy, 1972). Fisheries in the Red Sea are of considerable socio-economic importance to the Red Sea countries in terms of national food security and income generation for rural communities.Fishes are one of the main sources of protein supply to man, as it can serve to solve the malnutrition and deficiency of proteins in the world. According to Norman (1951) fish contains proteins and fats which are easily digested by humans. The economic importance of fishes was represented in the food resources for the countries laying on the Red Sea shores (Al-Kholy, 1972).Marine fish parasitology is a rapidly developing field of aquatic science. This is due to the growing importance of marine aquaculture, concerns on pollution effects on fish health and a generally increasing interest in marine environmental biology (Moller and Anders, 1986). The marine environment encompasses a wide variety of biological, chemical and physical parameters, which if altered beyond acceptable limits, such as under culture conditions, may weaken the fish leading to disease outbreaks (Roberts, 1989). It is important, therefore, that there is information on the occurrence of parasites of marine fish in their natural habitats (Roberts, 1989).Parasites are of economic importance in that they affect the productivity of fish through mortalities, decreasing growth rate, efficiency in feed conversion ratio and levels of the total plasma proteins due to a fall in absorbed amino acids that are essential for protein synthesis as well as lowering the quality of the meat (Fraser and Mays 1986).Williams (1967) recorded that, parasites of fishes may harm their hosts in a variety of ways: (a) by irritation of tissues and occlusion of the alimentary canal, blood vessels or other ducts. (b) By producing toxic products. (c) By depriving the fish from food. (d) By acting as vectors of pathogens. (e) By providing other pathogens.		
4874	12201728	ماجستير	القيم التربوية المتضمنة في القصص الرمزي بالقرآن الكريم و كيفية الاستفادة منها.	عبدالجواد محمد أحمد ، أماني المهدي	جامعة جنوب الوادى كلية التربية بقنا	أقا:	2014	هدفت الدراسة الحالية الى استنباط بعض القيم التربوية من بعض القصص الرمزي في القرآن الكريم والاستفادة منها في المؤسسات التربوية وخاصة في مدارس المرحلة الابتدائية وذلك من خلال كـ توضيح طبيعة وخصائص وأنواع القيم الإسلامية. التعرف على الدور الذي تلعبه القصة القرآنية وخاصة القصص الرمزي في غرس القم الإسلامية في نفوس النشء- التعرف على اهم القيم التربوية المتضمنة في القصص الرمزي بالقرآن الكريم وكيفية الاستفادة منها في تنمية الشخصية - المسلمة وضع تصور مقترح لتفعيل القيم الإسلامية من خلال القصص القرآني داخل الأنشطة التربوية بالمرحلة الابتدائية. وقد استخدمت الباحثة في دراستها المنهج الوصفي.	#####	أ.د/ فحى عبدالرسول محمد حسن أ.د/عبدالناصر راضى محمد أ.د/امال محمد إبراهيم
4875	12201862		فاعلية برنامج تدريبي قائم على نموذج وينلي المعدل في تنمية بعض مفاهيم الاقتصاد المنزلي والذكاءات المتعددتلدى طالبات الجامعة/	محمد، غادة " محمد حسنى " النوبى .			2012	تفتقر الجامعة الطالبات من مختلف التخصصات (النظرية أو العملية) الاقتصاد المنزلي المفاهيم الأساسية أيضاً، هؤلاء الطلاب لا يعرفون كيفية استخدام عقولهم متعددة في تطبيق هذه المفاهيم في الحياة الأسرية في المستقبل. أهداف البحث: تهدف الدراسة الحالية إلى: أ. التعرف على أثر البرنامج الموقت المقترح في ضوء wheatly النموذجي في تطوير مفاهيم الاقتصاد المنزلي بين طالبات الجامعة الذين يمثلون عينة البحث. ب. التعرف على أثر البرنامج المقترح في الدراسة الحالية على أساس التعديل في wheatly النموذجي في تنمية الذكاءات المتعددة لدى الطالبات الجامعيين الذين يمثلون عينة البحث. ج. تحديد تأثير التخصص الأكاديمي في تنمية الذكاءات المتعددة لدى طلاب الجامعات من الإناث الذين يمثلون عينة البحث.		

						فرضيات الدراسة: هناك فروق ذات دلالة إحصائية بين متوسطات درجات المجموعة التجريبية في اختبار المفاهيم الاقتصاد المنزلي في A. ب. هناك فروق ذات دلالة إحصائية بين متوسطات درجات المجموعة التجريبية في مقياس الذكاءات المتعددة في إدارة القبلي والبعدي لمقياس، لصالح تلك التطبيق البعدي لمقياس. هناك فروق ذات دلالة إحصائية بين متوسطات درجات المجموعة التجريبية في ورقة مراقبة سلوك الطالبات أثناء أداء المهام كمؤشر الذكاءات المتعددة في الإدارة قبل وبعد ورقة، لصالح تلك التطبيق البعدي لل ورقة. د. لا توجد فروق ذات دلالة إحصائية في متوسطات درجات عشرات الطلاب فيما يتعلق التخصصات الأدبية والتخصصات العلمية في تطوير مفاهيم الاقتصاد المنزلي في التطبيق البعدي للاختبار. لا توجد فروق ذات دلالة إحصائية في متوسطات درجات عشرات الطلاب فيما يتعلق التخصصات الأدبية والتخصصات العلمية في تطوير الذكاءات المتعددة في التطبيق البعدي لمقياس. لا توجد فروق ذات دلالة إحصائية في متوسطات درجات عشرات الطلاب فيما يتعلق التخصصات الأدبية والتخصصات العلمية في سلوكهم في ورقة المراقبة في التطبيق البعدي للرقعة وتحديدات للبحوث: وقد طرحت الدراسة الحالية ترسيم على ما يلي: أولاً: مكان ترسيم الحدود: تم تطبيق البرنامج التدريبي المقترح على مجموعة من طلاب السنة الرابعة لجامعة جنوب الوادي بما في ذلك ست كليات، ثلاثة منهم الكليات النظرية (الأدب والتجارة والقانون) والثلاثة الأخرى الكليات التطبيقية ((الزراعة والعلوم والطب البيطري الطب). ثانياً: تعيين الوقت: تم تطبيق البرنامج في العام الدراسي 2011/2012.	
4876	12201871	فعالية استخدام التعلم الإلكتروني في إكساب أطفال الروضة بعض مفاهيم التربية من أجل السلام/	عبدالجليل، نعمة حسن عبد الدايم .		2012	تهدف الدراسة إلى التعرف على فاعلية استخدام التعليم الإلكتروني في اكتساب بعض المفاهيم من التربية من أجل السلام روضة للأطفال. ويتم ذلك في مقارنة مع الطريقة العادية. قد كان ضروري لقيام هذه الدراسة نظراً لعدد قليل من الأبحاث التي تركز على استخدام التعليم الإلكتروني في الحصول على بعض مفاهيم التربية من أجل السلام روضة للأطفال، والتنمية لرياض الأطفال المناهج الدراسية لتلبية الاتجاهات الحديثة التي ظهرت في عصرنا وهناك أوجه قصور للروضة للأطفال مفاهيم التعليم من أجل السلام. لتحقيق هذه الأهداف، وقد أجاب الدراسة ما يلي: السؤال: كيف يتم استخدام التعليم الإلكتروني في اكتساب بعض المفاهيم التعليم من أجل السلام المتضررة من روضة للأطفال؟ وقد كان هذا يتم عن طريق اختبار مدى ملائمة هذه الفرضية التالية: هناك فروق ذات دلالة إحصائية بين متوسط درجات أطفال المجموعة التجريبية والأطفال في المجموعة الضابطة في القياس البعدي لاختبار مفاهيم التعليم للمصور السلام لرياض الأطفال للصفوف من أطفال المجموعة التجريبية. وقد تم ذلك من خلال الإجراءات التالية: أولاً: تحديد قائمة أولية من مفاهيم التربية للسلام المناسب للأطفال الحضانة. أراء الاستطلاع المحكمين حول صحة قائمة _ مفاهيم التربية من أجل السلام المناسب للأطفال الحضانة. وضع قائمة نهائية للمفاهيم التربية من أجل السلام _ تعتمد للروضة للأطفال. التعرف على مفاهيم التربية من أجل السلام التي سيتم اكتسابها _ لروضة للأطفال باستخدام التعلم الإلكتروني. ثانياً: تصميم موقع التعليم الإلكتروني على شبكة الإنترنت، واختيار ما من قبل المتخصصين. رابعاً: إعداد اختبار لقياس تحقيق توافر بعض مفاهيم التربية من أجل السلام روضة للأطفال وتكوينه. خامساً: اختيار عينة الدراسة حالة من (KG2) الأطفال،والسخرية ليصل إلى مجموعات سحب (التجريبية - الضابطة). سادساً :: تطبيق ما قبل القياس على مجموعتين من الدراسة (التجريبية - الضابطة). سابعاً: القيام تجريبية الدراسة. ثامناً: تطبيق قياس ما بعد على الفئات سحب (التجريبية - الضابطة). ثاسعاً: تسجيل درجات الأطفال في التجريبية مجموعة والمجموعة الضابطة التي تم الحصول عليها من المفاهيم اختبار التعليم للمصور السلام روضة للأطفال. الورد نتائج تحليلها إحصائياً، والتحقق من صحة الافتراض عن طريق حساب قيمة "T" الاختبار، وحساب حجم أثر استخدام التعلم الإلكتروني في الحصول على بعض مفاهيم التربية من أجل السلام روضة للأطفال	
4877	12201881	المجالس العلمية والاجتماعية بالعراق في العصر العباسي الأول 243 343 / 957 759 م/)	عبدالرحيم، عمر ممنوح عبد الرحمن .		2013	تناولت هذه الدراسة التاريخية والحضارية كثير من المصادر والمراجع الأساسية والمساعدة لمحصل عى المادة والمعلومات التاريخية التي شكمت البنية الأساسية لمحتويات هذه الرسالة ؛ وجاءت المصادر التاريخية والأدبية في بداية المصادر من حيث الأهمية ، حيث امتدت الدراسة بمعظم المعمومات والنصوص التاريخية لموضوع ، كما انبأ اعطت هذه المعمومات بصورة واضحة احيانا وخاصة المصادر الأدبية والتاريخية القريبة من نذا العصر	

						وأحياناً كانت تمدناً بمعومات نامة بصورة غير مباشرة ، حيث كانت تَبْنَى في بعض الأحيان بالحديث عن السياسة والأحداث التاريخية ، ولكن تعطى لنا مادة حضارية بدون قصد من المؤلف ، وتقيّدنا في بناء هذا الموضوع ، وتتناول أهم المصادر والمراجع بالدراسة والتحليل كالتالي: استندنا بجل المعمومات في هذا الموضوع ، ولما كان بعضيا معاصرا لمعصر العباسي الأول (131 231 ي/ 749 847 م) ، وبعضيا كان قريبا لهذا العصر فجاء بقدر كبير من - - الأهمية التاريخية لمد ا رسة ؛ ولما كانت هذه الد ا رسة تشمل مجالس العموم والاجتماع ؛ فإفادتنا المصادر الأدبية إفادة جمو في امامة المثام عن مكونات ومحتويات هذا الموضوع وجاء عسى أ رسيا : كتاب " الأغاني " للأصفهاني : ويو ابي الفرج عى بن الحسين بن محمد بن احمد - بن البيهيم بن عبد الرحمن بن مروان بن عبدالله بن مروان بن محمد بن مروان بن الحكم بن ابي العاص بن امية ابن عبد شمس القرشي الأموي (ت 356 ي/ 966 م) ، وى من أهم أدباء عصره عارفا بكل نواحي الادب والشعر والعمم والانساب والسير والتاريخ ؛ ويعتبر كتاب الأغاني من الم ولفات التي تتشكل موسوعة شاملة في الشعر والأدب والغناء ، واستعرض فيهاالخلق وعلاقات العمماء والأدباء بالخمفاء خلال العصر العباسي الأول ؛ واستخلصنا منو جل المعمومات عن المجالس العممية وكثي ا ر من المجالس الاجتماعية والتي ذكرنا بدون قصد في أثناء حديثنا عن العمماء والشع ا رء والأدباء الذين منحوا الخمفاء والوز ا رء والام ا رء وأثرياء القوم بالشعر والنثر ، والعلاقات بين الناس وأهل العمم ، وأعطلنا صورة واضحة جميلة عن ما يدور في هذه المجالس ، ومناسباتها ، وذكرياتها ، والاحتفالات بالمناسبات القومية والاجتماعية ؛ وما دار بها من مجالس عسمية ، وأخرى اجتماعية ؛ ومثل هذا الكتاب فائدة عظيمة لهذه الد ا رسة من حيث الأحداث التاريخية والأدبية والأخلاقية والاجتماعية وأحوال المجتمع الع ا رقي في هذه الحقبة .
4878	12201968	فعايله برنامج تدريبي في علاج بعض اضطرابات النطق لدى أطفال الروضة/	عليان، هاني شحات أحمد.		2010	يعد مجال اضطرابات النطق والكلام واللغة أحد مجالات التربية الخاصة التي نالت اهتماما كبيرا في الآونة الأخيرة نظرا لأنه مرتبط بعملية التواصل الاجتماعي بين أفراد المجتمع. وتعد الاضطرابات النطقية من أكثر الاضطرابات اللغوية شيوعا لدى أطفال الروضة، ولقد أصبحت ظاهرة تلفت الانتباه بين هؤلاء الأطفال بصورة لا يمكن تجاهلها ، مما حث العاملين في مجال علاج اضطرابات اللغة والنطق الاهتمام بهذه الفئة وتقديم البرامج العلاجية المناسبة لهم ؛ وذلك لأن اضطرابات النطق تجعل كلام الطفل غير مفهوم للآخرين واستمرارها لدى الطفل يجعله أكثر عرضة لصعوبات التعلم ومشكلات في التفاعلات الاجتماعية . ونظرا للمضاعفات العديدة لهذه الاضطرابات فقد تعددت الأساليب والطرق العلاجية المستخدمة في علاج اضطرابات النطق ، ومنها التعزيز والنمجة والتقليد والمحاكاة والتشكيل ولعب الدور والتلميحات واللعب الجماعي والعلاج اللغوي الجماعي ، والإدراك الفونيمى . تتبع مشكلة الدراسة الحالية في الإجابة على السؤال التالي : س ما مدى فعالية برنامج تدريبي في علاج بعض اضطرابات النطق لدى أطفال الروضة ؟ ويتفرع منه الأسئلة التالية :- س ١ هل توجد فروق ذات دلالة إحصائية بين رتب درجات أطفال المجموعة التجريبية و درجات أطفال المجموعة الضابطة على مقياس اضطرابات النطق في المقياس البعدي لصالح أطفال المجموعة التجريبية؟ س ٢ هل توجد فروق ذات دلالة إحصائية بين رتب درجات أطفال المجموعة التجريبية على مقياس اضطرابات النطق في المقياس القبلي والبعدي لصالح المقياس البعدي ؟ س ٣ هل توجد فروق ذات دلالة إحصائية بين رتب درجات أطفال المجموعة التجريبية في المقياسين البعدي والتتبعي بعد مرور ثلاثة أشهر من انت هاء تطبيق البرنامج التدريبي المقترح لصالح المقياس التتبعي؟ ثالثا : أهداف الدراسة : تهدف الدراسة الحالية إلى علاج بعض اضطرابات النطق (الإبدال – التشويه – الحذف) لدى أطفال الروضة ، ومعرفة مدى استمرارية فعالية البرنامج بعد مرور ثلاثة أشهر من انتهاء تطبيق البرنامج . رابعا : أهمية الدراسة : تكمن أهمية الدراسة الحالية في الآتي : تقديم برنامج تدريبي لعلاج بعض اضطرابات النطق (الإبدال – التشويه – الحذف) لدى أطفال الروضة والوقوف على مدى فعاليته ، ومن ثم إمكانية الإفادة من النتائج الممكنة التي إليها ف ي المؤسسات المختلفة التي تقدم خدمات التأهيل التخاطبي للأطفال ذوي الاضطرابات النطقية.

4879	12201970	ماجستير	فاعلية استخدام بعض الألعاب الصغيرة لتنمية الاستقلال الذاتي لدى تلاميذ الصف السادس من التعليم الأساسي بمحافظة سوهاج	أيوزيد حماد، ولاء محمود	جامعة جنوب الوادي - كلية التربية الرياضية.	فا:	2014	يعتبر الاستقلال الذاتي من مطالب النمو النفسي ومكون هام من مكونات الشخصية السوية، ومنذ مرحلة الطفولة يسعى الطفل نحو تأكيد ذاته من حيث كونه إنسان له عقل وإرادة خاصة به، ويصبح الطفل أقل اعتمادا على الآخرين وأكثر استقلالاً بنفسه، ومن أهم مهام النمو السوي إحساس الطفل بالاستقلال أي إحساسه بأنه إنسان مستقل، ومع ذلك فهو قادر على أن يتقبل مساعدة الآخرين وتوجيههم في المسائل الهامة، بهدف البحث إلى التعرف على فعالية بعض الألعاب الصغيرة على تنمية الاستقلال الذاتي لدى تلاميذ الصف السادس من التعليم الأساسي بمحافظة سوهاج، واستخدمت الباحثة المنهج التجريبي لملائمته لهدف وفروض البحث وذلك باستخدام التصميم التجريبي لمجموعتين إحداهما تجريبية والأخرى ضابطة، كما تم اختيار عينة البحث بالطريقة العمدية من تلاميذ الصف السادس بمدرسة جبل المستقبل الابتدائية بمحافظة سوهاج قوامها (60) تلميذ للجنة الأساسية تم تقسيمهم إلى مجموعتين إحداهما ضابطة والأخرى تجريبية، كما استخدمت مقياس الاستقلال الذاتي من إعداد الباحثة لجمع البيانات وتوصلت الباحثة إلى أن ممارسة الألعاب الصغيرة لها تأثير إيجابي على الاستقلال الذاتي لدى تلاميذ الصف السادس الابتدائي بمدرسة جبل المستقبل بسوهاج كما أن التلاميذ الذين ينتمون إلى بيئات متوسطة اجتماعيا والذين تعتمد عليهم الأسرة في تصريف شئون حياتهم وإتاحة الفرصة لهم للتعامل التقدي البسيط في البيع والشراء يزيد ذكائهم الاجتماعي واعتمادهم على أنفسهم، وتوصى الباحثة بإتاحة الفرصة لتلاميذ الصف السادس الابتدائي من ممارسة النشاط الرياضي بصفة عامة والألعاب الصغيرة بصفة خاصة لما لها من تأثير إيجابي على تنمية الاستقلال الذاتي لديهم، واستخدام الألعاب الترويحية في تنمية الاستقلال الذاتي لدى تلاميذ الصف السادس الابتدائي.	#####	د/أحمد كمال نصاري مصطفى د/أحمد عبدالعاطي حسين محمد
4880	12201983		Compost-sea water interactive effect on the physiological strategy of cotton /	Youssef, Nora Hassan.			2012	This investigation was conducted to study how to exploit sea water in the irrigation of large egyptian desert area in the planting cotton plant(Giza-90).Particular interest was focused on the effect of compost as abiofertilizing agent which mixed 10% of the sandy soil to can alleviate or at least modify the pattern of changes occurred by sea water treatments. No one denies that cotton (Gossypium barbadense) is one of the most economic plants in the world. It is a major crop widely grown in more than 80 countries for fiber and oil purposes. It is placed in moderately salt tolerant group of plant species (Munis, et al., 2010). Cotton is one of the most important economic fiber crops in the world. Cotton known as the 'King of fiber' and called as the 'White Gold' is the most vital crop of commerce to many countries including Egypt and India (Reddy, 2006).Cotton not only produces the natural fibers used in textiles and clothing, but also yields a high grade vegetable oil, multiple cellulosic byproducts, and whole seeds used as a primary source of fiber and protein in animal rations. Cotton is considered as being fairly tolerant to salinity (Ali, et al, 2005).Cotton is known to be relatively salt tolerant and is one of the crops suitable for the irrigation with saline water (Vulkan-Levy, et al., 1998).Although agricultural aspects of cotton are well known, little information exists on physiological and biochemical characteristics of cotton with particular reference to photosynthesis and stress metabolism, which control productivity and survival (Desingh and Kanagaraj, 2007).No one knows exactly how old cotton is. Scientists searching caves in Mexico found bits of cotton bolls and pieces of cotton cloth that proved to be at least 7,000 years old. They also found that the cotton itself was much like that grown in America today In the Indus River Valley in Pakistan, cotton was being grown, spun and woven into cloth 3,000 years BC. At about the same time, natives of Egypt's Nile valley were making and wearing cotton clothing Arab merchants brought cotton cloth to Europe about 800 A.D. When Columbus discovered America in1492 «the found cotton growing in the Bahama Islands. By 1500, cotton was known generally throughout the world.		
4881	12202019		التحليل السينمائي للأفلام الوثائقية لثورة 25 يناير المصرية في موقع اليوتيوب /	محمد، عبدالله عبدالرحيم.			2015	ثمة أسباب سياسية واقتصادية واجتماعية خلال الحقبة الأخيرة لحكم مبارك، أفضت إلى حدوث ثورة (25 يناير) ، تناولتها الأفلام الوثائقية بالطرح والتأريخ والتفصيل والتفسير وأسهمت التكنولوجيا الحديثة في الترويج لهذه الأفلام، من خلال مواقع التواصل الاجتماعي ممثلة في موقع اليوتيوب الذي يحظى بكثافة المشاهدة، الذي أسهم دوره في تعدد روى مشاهدي هذه الأفلام وتعليقاتهم، ووفقا لفرضيات السيميائية والتأويلية، لا يكتفي هذا الطرح بالتفسير الخارجي للظاهرة، ولكنه يولد العديد من المعاني والدلالات الكامنة خلف الظاهرة، لذا يمكن تحديد المشكلة البحثية في التحليل السينمائي للأفلام الوثائقية لثورة (25 يناير) المصرية في موقع اليوتيوب. تنتمي هذه الدراسة إلى الدراسات الوصفية الكيفية معتمدة على نظرية التأويل، حيث يعود تاريخ هذه النظرية إلى القرن السابع عشر في الكتابات اللاهوتية، حينما ظهر لفظ الهرمنيوطيقا على يد اللاهوتي "يوهان كورنراد دانهوفر (1654م)، فالتأويل هو الإطار التفسيري للسيميائية، التي تقول بطرح العديد من الدلالات، وهو ما يتفق مع التأويل القائل بأنه لا توجد حقائق، إنما يمكن الاقتراب منها من خلال طرح العديد من الروى والمياريوهات والتأويلات والدلالات حيث يمكن أن نرسم ظلال الحقيقة وليست الحقيقة ذاتها. تعتمد الدراسة بشكل رئيسي على منهج المسح، والأسلوب المقارن، ووحدة التحليل السينمائي المتمثلة في الوحدات القارنية، وتمثلت عينة الدراسة في خمسة أفلام هي الأكثر مشاهدة على موقع اليوتيوب وفقا للإحصائيات الموقع مع مراعاة عدم تناول أكثر من فيلم للمنتج الواحد. وهذه الأفلام هي فيلم قصة ميلاد ثورة من انتاج قناة الجزيرة، وفيلم سلمية انتاج قناة أون تي في، وفيلم الطبيب والشرس والسباسبى انتاج قناة النهار، وفيلم العاشرة في 18 يوم انتاج قناة دريم، وفيلم ملحمة شهداء الجامعات المصرية من انتاج وزارة التعليم العالي، الذي انتجه الاستاذ الدكتور عدلي رضا. استاذ الإعلام بجامعة القاهرة.		
4882	12202026		On Some Impulsive Differential Equations /	Abd El-Shaheed, Ismail Gad Ameen.			2012	Impulsive differential equations arise naturally in the description of Physical systems that are subjected to sudden changes in their states. Most often the dynamics take place during afinite time interval.Impulsive differential equations arise naturally in the description of physical systems that are subjected to sudden changes in their states. Most often the dynamics take place during a finite time interval. Most scientific problems and phenomena are modeled by impulsive differential equations: For examples, biological		

							systems such as heart beats, blood flows, population dynamics, theoretical physics, radiophysics, pharmacokinetics, mathematical economy, chemical technology, electric technology, metallurgy, ecology, industrial robotics, biotechnology, medicine and so on. This leads to the study of impulsive differential equations. Impulsive differential equations, that is, differential equations involving impulse effect, appear as a natural description of observed evolution phenomena of several real world problems. There are many good monographs on the impulsive differential equations [1, 11-15]. Many processes studied in applied sciences are represented by differential equations. However, the situation is quite different in many physical phenomena that have a sudden change in their states such as mechanical systems with impact, biological systems such as heart beats, blood flows, population dynamics [16,39], theoretical physics, radiophysics, pharmacokinetics, mathematical economy, chemical technology, electric technology, metallurgy, ecology, industrial robotics, biotechnology processes, chemistry [17], engineering [3], control theory [21,37], medicine [2,28] and so on. Adequate mathematical models of such processes are systems of differential equations with impulses. The theory of impulsive differential equations is a new and important branch of differential equations.		
4883	12202098		Geotechniicall and Sediimenttologiicall Studiies off tthe Quaternary Sediimentts att Qena Regiion Egyptt/	Ahmed· Ahmed Mohammed Ibrahim		2012	Quaternary sediments exposed along three main roads, (Qena-Safaga Qift-Quseir and Qena-Nag Hammadi road) were investigated on the basis of its geological and geotechnical properties. The main goals of this study are evaluation of the geotechnical properties of the Quaternary sediments which exposed at Qena region, engineering geological classification of these sediments, evaluation of old sand and gravels quarries, determination of the effect of the geological, the mineralogical and the chemical characteristics of the studied sediments on their geotechnical behavior, evaluation of geotechnical properties of banks sediment (Nile silt soil) and an improvement of its geotechnical properties using lime chemical stabilization. Forty eight samples were collected from Quaternary sediments to evaluate the geotechnical properties of the studied sediments. Grain size analysis, gradation parameters, natural water content, organic matter content, Atterberg limits, compaction parameters, free swelling were measured to classify the studied sediments geotechnically. Also the mechanical behavior of these sediments was interpreted on the basis of its geological characteristics. Quaternary sediments in the studied area were evaluated to assay its suitability for using as natural aggregates. Eighteen representative samples were selected for evaluating these natural aggregates for quarrying. Physical and mechanical investigations were carried out to determine the suitability of these aggregates for a specific engineering application. Study deals with the effect of hydrated lime as a treatment method in the improvement of the geotechnical properties of Nile silt soil. In this study, lime chemical stabilization was applied to treat and improve the geotechnical properties of the Nile silt soil. The results showed that the geotechnical properties of the Nile silt soil including plasticity, free swelling, unconfined compressive strength and California bearing ratio were improved due to treatment of the studied soil with lime.		
4884	12202148		برنامج مقترح لتنمية بعض كفايات التدريس الإبداعى للطلاب المعلمين شعبة اللغة العربية بكلية التربية بقنا/	عبدالله، ميمى نشأت عبدالرازق .		2012	يشهد العالم الآن تقدما واسعا في جميع مجالات الحياة، ويظهر ذلك من خلال الثورة العلمية والتكنولوجية، وهذا أدى بدوره إلى ازدياد الوعي بمشكلات التعليم وأهميته، ولما كان المتعلم هو المستهدف الأول لهذا الجهد التعليمي الكبي ر، والمعلم هو المكلف ببذل هذا الجهد حتى يصل به إلى ما يرجوه المجتمع، لذلك يشغل إعداده وتدريبه حيزا كبيرا من اهتمام المسؤولين عن العملية التربوية في مختلف بلاد العالم . ويعد التدريس عنصرا أساسيا من عناصر العملية التعليمية / التعليمية فيؤاسطته يقوم المعلم بتوظيف المحتوى التدريسي لمادته لتحقيق الأهداف المنشودة من تعليمها وتعلمه ا، والمعلم يمثل العامل الأساسي والفاعل في العملية التدريسي، وعليه فهما كانت الأهداف، والسياسات والخطط التربوية والمناهج والتنظيمات الإدارية والوسائل، فإن هذا كله في حقيقة الأمر لا يفوق الدور الأساسي والإيجابي الذي يقوم به المعلم في تسخير تلك الإمكانيات للوصول إلى تحقيق الأهداف المنشودة لقد عرفت برامج إعداد المعلمين العديد من التطورات، والتي كان من أهمها اعتماد مدخل الكفايات بدلا من اعتماد المعرفة كإطار مرجع ي في إعداد المعلمين، أي اعتماد ما يعرف بالتدريس القائم على الكفاية والتي أصبحت من أبرز ملامح التربية المعاصرة خاصة لدى الجهات المسؤولة والتي أصبح شغلها الشاغل إعداد معلمين أكفاء وتدريبهم وفق أحدث نظريات التعلم والتعليم؛ الأمر الذي جعل الكثير من المهتمين لا يتحدثون عن الكفايات إلا بربطها بالمعلمين(محمد الدريج، ٢٠٠، وإذا كانت رسالة التربية هي إعداد البشر لزم ينسجم بالتطور العلمية والتكنولوجية، ٢٩٩)(١). والثقافية، فلا بد من جعل المتعلم يشارك في العملية التعليمية مشاركة فعالة يتم فيها اكتساب المعارف والخبرات وت نميتها بما يؤهله للتعامل مع علوم المستقبل واكتشافاته وإبداعاته، كما يحتاج الطلاب المعلمون إلى فهم التدريس الذي سيصبح مهنتهم في المستقبل، لذا ينبغي عليهم أن يلاحظوا عملية التدريس سواء بحواسهم مباشرة أو بالاستعانة ببعض الوسائل التعليمية، وذلك		

						ليتمكنوا من معرفة الكفايات المرتبطة بها، ومن ثم يسعون إلى اكتساب هذه الكفايات وتنميتها. وتعد المهمة الرئيسية لبرنامج اللغة العربية مهمة لغوية قبل أي شيء آخر، ولكن ذلك لا يعني أن تنمية الإبداع بعيدة عن هذه المهمة، أو فرعية لا أهمية لها في البرنامج، بل يعني أن الهدف الواضح المحدد للبرنامج هدف لغوي يسهم في تنمية تفكير الطالب حيث يربط سلوكه اللغوي بقدراته العقلية عموما وتفكيره خصوصا(سمر رويحي الفصيل، ٢٠٠٣، ١٣٠). وبذلك فمعلم اللغة العربية في حاجة ماسة إلى كفايات التدريس الإبداعي ل لنهوض بثقافة الإبداع وتقليل الاعتماد على ثقافة الذاكرة في مجال تدريس اللغة العربية ومهاراتها. ويمكن القول بأن اعتماد نجاح معلم اللغة العربية في عمل -ه- إلى حد كبير -يرتكز على الكفايات التدريسية كما ونوعا والتي يكتسبها أثناء مروره ببرنامج إعداد -ه- فمن خلال هذه البرامج يمكن إكساب الطلاب المعلمين كفايات التدريس، فالمعلمون متعلمون مدى الحياة، لذا ينبغي أن يفكروا في تطوير أساليبهم التدريسية والبحث عن أفكار جديدة ودراساتها بعد مراجعتها من أجل التكيف معها واستخدامها، كما ينبغي على المعلمين استخدام مداخل تدريسية متعددة لمراعاة الفروق الفردية بين المتعلمين وتنمية الأفكار الإبداعية لديه، ومن هنا أصبحت الحاجة ماسة إلى إعداد معلم قادر على إحداث التعلم الفعال، يمتلك الأدوات التدريسية المناسبة والمعززة والفعال؛ لأن طرق التدريس التي تهتم بمشاركة المتعلم وتركز على التنوع في الأنشطة التعليمية واحترام استجابات المتعلمين يمكن أن تنمي القدرات الإبداعية لدى التلاميذ، في مقابل طرق التدريس التي تهتم بنقل المعلومات لأذهان التلاميذ وحفظها فقط، فإتباعها تهمل جوانب التعلم المهمة لديهم مثل: تنمية مهارات التفكير والإبداع.		
4885	12202183	فعالية برنامج تدريبي قائم على بعض إستراتيجيات التعلم المنظم ذاتي في تحسين الدافعية للإنجاز لدى طلاب الصف الأول الثانوي/ محمد، دعاء عطيا جاد الكريم.			2012	إن الصحوة التي نشاهدها الآن لتطوير التعليم تتأدى بالاهتمام به في جميع جوانبه، حيث تسعى إلى إعداد معلم قادر على القيام بدور نشط وإيجابي في عمليتي التعليم والتعلم، مما دفع علماء التربية والباحثين لضرورة البحث عن أساليب وإستراتيجيات تعلم، تساعد المتعلم في التغلب على العقبات وتنمي ثقته في قدرته على حل المشكلات التي يواجهها. فإن الإطار لفهم القاعدة النفسية للتعلم انتقل بشكل تدريجي خلال العقود الثلاثة الماضية من نظرة متركزة حول المعلم إلى نظرة متركزة حول المتعلم، وذلك المنظور وضع مسئولية متزايدة على المتعلمين (semra & ceren, 2006). فقد أسفر كثير من البحوث عن أن التعلم حين يتم من أجل التعلم بد" لا من أن يكون تلقية لمُتطلب خارجي أو رغبة في الحصول على مكافأة - يزداد احتمال الاحتفاظ به، ويزداد احتمال بلوغه مستويات أعلى من الفهم، وتضمنه اكتساب إستراتيجيات تعلم أكثر نفا، كما كشفت بحوث أخرى ع ن أن هذا التعلم يزيد من الدافعية المستمرة للتعلم ومن مشاعر الكفاءة الأكاديمية ومن اكتساب مهارات .استدلال متقدمة (جابر عبدالحميد، ١٩٩٠، ٢٤٥). حيث لم يعد الأمر مجرد تلقين الطلاب معارف أو معلومات، بل أصبح الاهتمام يكمن في كيفية اكتساب وفهم الطلاب هذه المعارف والمعلومات والتعامل مع ها من خلال اعتماد الفرد على ذاته وإمكاناته وقدراته واستعداداته من أجل تحقيق النجاح والتفوق (مسعد أبوالمعال، ٢٠٠٣). فقد أشار العديد من البحوث التربوية التي تركز حال □يا على عمليات التعلم إلى ما يسمى مركبات الاستعداد، أي جملة الاستعدادات ذات الأثر في عمليتي التعليم والتعلم، وتنتج عن هذه النظرة □يا.بني متعددة الأوجه منها ما يسمى التعلم المنظم ذات□ حيث بدأ الباحثون خلال السنوات القليلة الماضية تحديد ودراسة العمليات المتكاملة التي من خلالها يوجه الدارسون اكتسابهم المعرفة الأكاديمي،، فيما يعرف بالتعلم المنظم ذات□ي، إذ إن معرفة مكونات وإستراتيجيات هذا النوع من التعلم تحسن من فاعلية الذات ومشاعر الضبط وتجنب المتعلم المشاعر المصاحبة للفشل الأكاديمي، بل وتجعله يدرك كيف ينوع ويعمل أو يغير من عمليات التنظيم الذاتي لمواجهة المهام المتنوعة وتصبح لديه الدافعية للتعامل مع تلك المهام (ملفي عبدالباسط، ١٩٩٠). لسنوات القليلة الماضية، وذلك لأن الهدف الأساسي للتعليم هو تنشئة الطلاب وتشجيعهم على استخدام إستراتيجيات التعلم بشكل فعال، وملائم، وباستقلالية (Paris, et al., 2001). والتعلم وفقا لهذا المفهوم ليس أم □ را يحدث للطلاب، وإنما هو شيء يحدثونه بتعاملاتهم مع الموقف التعليمي بشكل نشط وفعال.لأنه يهدف إلى مساعدة الطلاب على تعلم كيف يتعلمون، بحيث يصبحون في النهاية غير معتمدين على المدارس والمدرسين، بالإضافة إلى مساعدة الطلاب على اكتساب مهارات التعلم التي ستخدمهم خلال الحياة كلها، وتضمن هذه المهارات كيف تحدد موقع المعلومات ومواضعه، وكيف تحللها، وكيف تركبها، أو تؤلف بينها وكيف تقوموا، وكلما أتاحت فرص أكثر للتعلمين ليجتروا باستمرار عن المعلومات ويوعوا في البحث أو يحكموا عليها ويستخدموها.		
4886	12202222	فعالية التدريب على المهارات الاجتماعية لتخفيف الطلق الاجتماعي لدى المراهقين/ إسكندر، إيفت كيرلس بني .			2012	لتدريب على المهارات الاجتماعية تخفيض الطلق الاجتماعي للمراهقين. هذفت هذه الدراسة إلى إعداد برنامج قائم على المهارات الاجتماعية للحد من الطلق الاجتماعي للمراهقين لتلاميذ المرحلة دعامية، عينة الدراسة تكونت من (40) تلميذاً وتلميذة من الأولى والثانية والثالثة الصفوف الإعدادية ما بين (12-15) سنة. واستخدمت الدراسة مقياس الطلق الاجتماعي من adescents التي كتبها أماني عبد EL maksod(2000)، ومقياس لتقييم أعدت المهارات الاجتماعية للaddescents التي كتبت من إعداد الباحث، ودراسة تستخدم أيضا برنامج التدريب على المهارات الاجتماعية التي researcher على استعداد لخفض الطلق الاجتماعي لتلاميذ المرحلة الدعامية. نتائج الدراسة: 1- توجد فروق ذات دلالة إحصائية عند مستوى (0.01) - مستوى بين العشرات من تلاميذ المجموعة الضابطة والتجريبية المجموعة في القياس البعدي على مقياس الطلق الاجتماعي لصالح المجموعة التجريبية. 2- توجد فروق ذات دلالة إحصائية عند مستوى (0.01) مستوى بين العشرات من تلاميذ المجموعة الضابطة والتجريبية المجموعة في القياس البعدي على مقياس المهارات الاجتماعية، لصالح المجموعة التجريبية. 3- توجد فروق ذات دلالة إحصائية عند مستوى (0.01) مستوى بين العشرات من تلاميذ المجموعة التجريبية في منصب و		

						متابعة قياس درجة على مقياس الفئق الاجتماعي وأبعاده، لصالح من 0.4 المجموعة التجريبية - توجد فروق ذات دلالة إحصائية عند مستوى بين درجات تلاميذ المجموعة التجريبية في ما بعد (0.01) ومتابعة قياس درجة على مقياس المهارات الاجتماعية وأبعاده، في صالح المجموعة التجريبية. حققت الدراسة الحالية على فعالية من التدريب على المهارات الاجتماعية في الحد من الفئق الاجتماعي.
4887	12202243		الآداء الوظيفي للموجه الفني بالمرحلة الثانوية في ضوء متطلبات الآداء التربوي/	مدني، سيد عباس عثمان.	2012	إن التغييرات السياسية والاقتصادية والاجتماعية السريعة المتلاحقة التي يشهدها العالم المعاصر كرد فعل للثورة المعلوماتية والتكنولوجية، وظهور العولمة، وما نتج عنها من انفتاح على ثقافات الأمم المختل فة، وتنوع مصادر المعرفة، و سهولة تداول المعلومات، والمنافسة في سوق العمل والاقتصاد العالمي، جعلت من تطوير التعليم وتحسينه ضرورة ملحة، تتجاوز المفاهيم والممارسات التربوية التقليدية، وتضمن جودة المنتج التعليمي؛ ومن هذا المنطلق سعت دول العالم إلى تطبيق مبادئ الاعتماد التربوي، وتحقيق ضمان الجودة في مؤسسات التعليم. والجودة في التعليم هي الانتقال من ثقافة الحد الأدنى إلى ثقافة الإتقان والتميز ، لذا حرصت المجتمعات وبشكل مستمر على العمل نحو تطوير المؤسسات التعليمية بما يفي باحتياجات الحاضر ويتلاءم مع معطيات المستقبل(١)، وفي ظل الاتجاهات التربوية الحديثة لتطبيق الاعتماد التربوي، تسعى نظم التعليم جاهدة لإعداد معايير للجودة والاعتماد في ضوء المعايير العالمية وما ينشده المجتمع من نظامه التعليمي.ولقد قامت مصر بعدة خطوات لتطوير التعليم وتحديثه، حيث أعدت وزارة التربية والتعليم في عام (٢٠٠٣ م) وثيقة المعايير القومية للتعليم؛ لتجويد جميع عناصر المنظومة التعليمية. كما أصدرت الوثيقة المتكاملة لمعايير جودة المدرسة الفعالة، لتطوير الآداء المدرسي الشامل بصفة عامة، والاحتكام إليها عند تقويمه(٢). وأنجحت هذه الخطوات بصنور القانون رقم(٨٢) لسنة (٢٠٠٦ م) بإنشاء الهيئة القومية لضمان جودة التعليم والاعتماد (NAQAAE) National Authority of Quality Assurance and Accreditation of Education لإقرار مدى استيفاء المدارس لمعايير الجودة والاعتماد التربوي. ولقد أصدرت الهيئة القومية لضمان جودة التعليم والاعتماد في عام (م) وثيقة معايير ضمان الجودة والاعتماد لمؤسسات التعليم قبل الجامعي؛ لمساعدة ٢٠٠٨ المدارس المصرية للحصول على الاعتماد التربوي.ولقد أصبح تطبيق الاعتماد التربوي في المدارس المصرية يمثل دافعاً ذاتياً لدى كافة المدارسين التربويين فيها للسعي الدائم للإفادة من فرص التنمية المهنية المستمرة التي تتاح لهم ليتمكنوا من الارتقاء المستمر بالنوعية التعليمية التي يقدمونها للتلاميذ كشرط أساسي لوفاء مدارسهم بمتطلبات الاعتماد التربوي(١). وهذا يجعل دور الموجه في ظل تطبيق الاعتماد التربوي دوراً حيويّاً ورئيسيّاً من خلال ما يقدمه من مساعدة للمعلمين في التنمية المهنية المستدامة. وتتبع أهمية التوجيه الفني من واقع الحاجة الماسة إلى جهاز دائم لتطوير العملية التعليمية وتتفق الأطر والأدبيات النظرية على أن أهداف التوجيه الفني ي تنحصر في مساعدة المعلمين على فهم وظيفتهم، وتحقيق النمو في مهنتهم لتحسين أدائهم المهني،و إك ساب هم مهارات إدارة الصف والتفاعل مع المتعلمين وفيهم مراحل نموهم ، ومراعاة الفروق الفردية بين المتعلمين، (٣) سليم ١ علمي ١ واستخدم طرق التدريس المناسبة لهم، بالإضافة إلى تقويم العملية التربوية (تقويم). لقد تطور مفهوم التوجيه الفني ت طور ١ كثير ١ ف ي السنوات الأخيرة ، حيث مر ال توجيه بعدة مراحل، فقديم ١ كان ي ١طلق على التوجيه (التفتيش)، وكان يقوم على أساس استخدام السلطة وتصيد الأخطاء وتوجيه النقد وانعدام التوجيه والإرشاد من جانب المفتش ، ومن هنا كان ينظر المعلم للمفتش نظرة تنسب ب الخوف والرهيبة . وهكذا كان العلاقة بين المعلم بين والمفتش ين علاقة معتلة لا تقوم على أساس صحي سليم من العلاقات الإنسانية الصحيحة). تشكل الصحة النفسية للطلاب جانباً مهماً من جوانب العمل التربوي من خلال استخدامها لآلياتها ووسائلها العلمية والمهنية وذلك عن طريق توفير الخدمات الوقائية والإرشادية والعلاجية للمشكلات والأزمات التي تعترضهم ، ومساعدة المدرسة على تهيئة الجو المدرسي الذي يسوده التفاهم ، ويعزز الأمن والأمنان في نفوس الطلاب وذلك من خلال البرامج التي تنفذ على المستوى الطلابي كإفراد أو جماعات أو على المستوى المدرسي ككل وبمشاركة البيئة التي توجد بها المدرسة لمواجهة المشكلات الطلابية وهناك عدة مشكلات تربوية تواجه مدارسنا من وقت لآخر منها ما يتعلق بالمدرسين ومنها ما يتعلق بإدارة المدرسة والطلاب وغير هم مما يؤثر تأثيراً سلبيّاً على تحقيق أهداف المنهج ومن هذه المشكلات التي تكاد أن تكون ظاهرة اجتماعية تربوية مقترنة بالمدرسة مشكلة حيث تشكل مشكلة العنف المدرسي مؤشراً خطيراً على School Violence العنف المدرسي سلوك المجتمع المدرسي وقد تمتد آثاره على البني تة المحيط ة. وتحدث أعمال العنف في المدارس على أنواع وفترات تختلف البعض لأول وهلة أنها مجرد أحداث يومية تنشأ لظروف طارئة وعارضة ، والخطر الذي ينشأ عنها فيما بعد تكون عواقبترخيمة على المجتمع والمشكلات السلوكية للمجتمع تنشأ من صغائر الأمور . (جابر ٢٤٦ - ٢٤٥ : عوض سيد ، أبو الحسن عبدالموجود ، ٢٠٠٤العنف سلوك يصدر من أفراد أوجماعه تجاه فرد آخر أو آخرين مادياً كان أو لفظياًإيجابياً أم سلبياً ، مباشراً أو غير مباشر نتيجة للشعور بالغضب أو الإحباط أو للدفاع عن النفس أو الممتلكات أو الرغبة في الانتقام من الآخرين ، أو الحصول على مكاسب معينة و يرتكب عليها ٤ : إلحاق أذى بدني أو مادي أو نفسي بصورة متعمدة بالطرف الآخر . (أميمه جادو ، ٢٠٠٥وياخذ سلوك العنف في المدرسة أشكالاً ١ مختلفة منها ارتكاب المخالفات والتخريص عليها والخروج عن طاعة المدرس ورفض تنفيذ أوامره والاعتداء على المدرسين والاعتداء على الآخرين وتحطم أثاث المدرسة وإتلافه، حيث نجد أن العنف الطلابي هو الطاقة التي تجمع داخل الإنسان ولا تنطلق إلا بتأثيرالمثيرات الخارجية ، وهي مثيرات العنف ، وتظهر هذه الطاقة على هيئة سلوك يتضمن أشكالاً من التخريب والسب والضرب بين تلميذ وتلميذ أو بين تلمي ذ ومدرس وتلعب الاتجاهات الوالديه دوراً أساسياً في تحديد شخصية الطفل وسلوكه في حاضرة ومستقبله فقد يسود أمس لوب التلق بل والتسامح مشوباً بالحب والحنو ، بينما قد يسود أسلوب النبذ والتشدد أو استخدام الع قاب البدني والمعنوي أو قد يسود أسلوب التساهل والإهمال والترفة أو نجد أسلوب التنذيب في المعامل ة ، والنموذج الأول يخلق شخص ية إيجابية فعالة بينما تخ لق إن ماذج الثلاثة التالية أنماط غير سوية من الشخصية . (نبيل عبد الفتاح) ١١٠ : حافظ وآخرون ، ١٩٩٧ ،
4888	12203375		العنف المدرسي وعلاقته بأساليب المعاملة الوالدية والأمن النفسى لدى تلاميذ المرحلة الإعدادية/	إسماعيل، أكرم محمد طلعت.	2010	والإرشادية والعلاجية للمشكلات والأزمات التي تعترضهم ، ومساعدة المدرسة على تهيئة الجو المدرسي الذي يسوده التفاهم ، ويعزز الأمن والأمنان في نفوس الطلاب وذلك من خلال البرامج التي تنفذ على المستوى الطلابي كإفراد أو جماعات أو على المستوى المدرسي ككل وبمشاركة البيئة التي توجد بها المدرسة لمواجهة المشكلات الطلابية وهناك عدة مشكلات تربوية تواجه مدارسنا من وقت لآخر منها ما يتعلق بالمدرسين ومنها ما يتعلق بإدارة المدرسة والطلاب وغير هم مما يؤثر تأثيراً سلبيّاً على تحقيق أهداف المنهج ومن هذه المشكلات التي تكاد أن تكون ظاهرة اجتماعية تربوية مقترنة بالمدرسة مشكلة حيث تشكل مشكلة العنف المدرسي مؤشراً خطيراً على School Violence العنف المدرسي سلوك المجتمع المدرسي وقد تمتد آثاره على البني تة المحيط ة. وتحدث أعمال العنف في المدارس على أنواع وفترات تختلف البعض لأول وهلة أنها مجرد أحداث يومية تنشأ لظروف طارئة وعارضة ، والخطر الذي ينشأ عنها فيما بعد تكون عواقبترخيمة على المجتمع والمشكلات السلوكية للمجتمع تنشأ من صغائر الأمور . (نبيل عبد الفتاح) ١١٠ : حافظ وآخرون ، ١٩٩٧ ،

							كما أن تعرض الأطفال للإساءة من قبل والديهم يؤدي إلى العنف لديهم كما يؤدي إلى ضعف التحصيل وفقدان الثقة بالنفس . (وليد سرحان ، ١٩٩٧ ومن هنا نجد أن ثقة الطفل في نفسه وفي غيره من : ٢٩ ٢٧) الرعاية التي ينتلق اها داخل الأسرة فالطفل الذي تلبى حاجاته ويجد من يده ويتحدث إليه ويشاركه اللعب والضحك ، يتصور العالم مكاناً آمناً والناس أهلاً للثقة ، أما إذا لم تتوفر الرعاية النفسية والاجتماعية العضوية للطفل داخل أسرته فإنه يشعر أن الناس غير جديرين بالثقة في نفسه وفي الآخرين وفي العالم المحيط به . (إبراهيم عيد ، ١٩٩٨ : ٧٣)		
4889	12203425		On Some Special Functions in means of fractional calculus/	Hussen, Ahmed Mohammed Yousef.		2012	Fractional calculus is [90] "the theory of integrals and derivatives of arbitrary order, which unify and generalize the notions of integer-order differentiation and n-fold integration". The idea of generalizing differential operators to a non-integer order, in particular to the order 1 2 , first appears in the correspondence of Leibniz with L'Hopital (1695), Johann Bernoulli (1695), and John Wallis (1697) as a mere question or maybe even play of thoughts. In the following three hundred years a lot of mathematicians contributed to the fractional calculus: Laplace (1812), Lacroix (1812), Fourier (1822), Abel (1823-1826), Liouville (1832-1837), Riemann (1847), Grunwald (1867-1872), Letnikov (1868-1872), Sonin (1869), Laurent (1884), Heaviside (1892-1912), Weyl (1917), Davis (1936), Erdelyi (1939-1965), Gelfand and Shilov (1959-1964), Dzherbashian (1966), Caputo (1969), and many others. Yet, it is only after the First Conference on Fractional Calculus and its applications that the fractional calculus becomes one of the most intensively developing areas of mathematical analysis. Its fields of application range from biology through physics and electrochemistry to economics, probability theory and statistics. On behalf of the nature of their definition the fractional derivatives provide an excellent instrument for the modeling of memory and hereditary properties of various materials and processes. Half-order derivatives and integrals prove to be more useful for the formulation of certain electrochemical problems than the classical methods. Fractional differentiation and integration operators are also used for extensions of the diffusion and wave equations and, recently, of the temperature field problem in oil strata. This thesis consists of five chapters.		
4890	12203458		بعض الأساليب المعرفية وعلاقتها بتوجهات أهداف الإنجاز لدى تلاميذ المرحلة الإعدادية/	أحمد، ناصر علي عبد اللاه.		2012	نتيجة للتقدم في دراسة الفروق الفردية في الإدراك وأساليب التعامل مع مواقف الحياة وظهور مفهوم التمايز النفسي، فقد برزت على ساحة البحث العلمي النفسي ما يسمى بدراسة الأساليب المعرفية ، ولقد تزايد الاهتمام بدراسة الأساليب المعرفية باعتبارها أبعاد هامة داخل المجال المعرفي وميزة هامة داخل مجال الشخصية ، حيث يلعب الأسلوب المعرفي للدور لا تقل أهميته بالنسبة للعملية التعليمية عن معرفة نسبة ذكائه ، وذلك لأن السلوك المعرفي للأفراد في المواقف التعليمية يتأثر بالأساليب المعرفية للأفراد .و قد شهدت السنوات الأخيرة اهتماما كبيرا من قبل الباحثين التربويين المهتمين بدراسة الأساليب المعرفية ، حيث إنها تمثل دور ا مهم ا في العملية التعليمية ، وتمثل كذلك الحصانة النفسية للفرد بما يتناسب وفطرته ويتفق مع منهجه. ويعتبر موضوع الأساليب المعرفية من الموضوعات التي حظيت بأهمية بالغة عند علماء النفس التربوي من حيث العمق في الدراسة وكذلك البحث ،حيث يساعد ذلك المعلمين في التخطيط لتعليم الأفراد ، وهذا وتتوسع الأساليب المعرفية لأنه لا يوجد أسلوب واحد يحقق أفضل النتائج لجميع التلاميذ إذ أن أسلوبا معينا قد يكون مناسباً لتلميذ معين بينما لا يناسب تلميذاً آخر بالدرجة نفسها ، لذا فإن الأساليب المعرفية تمثل عنصرا مهما في عملية التعلم .فالتحول من علم النفس السلوكي إلى علم النفس المعرفي صاحبه تأكيد أكثر على المسؤولية الملقاة على عاتق المتعلمين عن تعلمهم ولم تعد النظرة للمتعلمين على أنهم مستقبلون للمعلومات بل أكثر من ذلك فهم نشيطون في إعادتهم السادة المتعلمين وإعادة بناء المعرفة الموجودة وربطها بالمعرفة السابقة مما يسهم في تكوين بنيات معرفية أكثر استقرارا . 5991/الأساليب المعرفية من أنه يمثل أحد موضوعين أساسيين(تأتي أهمية موضوع : وقد ذكر أنور محمد الشرفاوي) 1 ظهورا في مجال علم النفس المعرفي في الفترة الأخيرة من تقدم علم النفس، كما أنها تسهم بقدر كبير في الكشف عن الفروق الفردية بين الأفراد، كما تأتي أهميتها كذلك من أنها تعبر عن الطريقة الأكثر تفضيلا لدى الفرد في تنظيم ما يمارسه من نشاط سواء كان معرفيا أو وجدانيا، دون الاهتمام بمحتوي هذا النشاط وما يتضمنه من مكونات،كما أنها تهتم بالطريقة التي بها يتناول الفرد المشكلات التي يتعرض لها في مواقف حياته اليومية		
4891	12203488		Ecotoxicological Studies on Freshwater Gastropods (Mollusca) at Qena Governorate, Upper Egypt/	Abo-Gabl, Heba Mohamed Fangary.		2012	In the present study toxicological effects of plant extracts of white cypress Callitris glaucophylla (heart wood), African mahogany Khaya senglalensis (seeds) and carrot Daucus carota (seeds) against Aedes acgypti and Culex annulirostris 4 th instar larvae were studied. Meanwhile, The susceptibility of both mosquito sepecies to synthetic insecticides, fenitrothion and lambda-cyhalothrin and the insect growth regulatator, methoprene was evaluated. Efficacy of sublethal concentrations of C. glaucophylla on the development of Ae. Aegypti larvae was compared to that of the synthetic insecticides. Binary mixtures of botanical extracts with or without synthetic insecticides were tested as integrated control against both mosquito species. The study involved also efficacy of two predaceous insects against immature stages of Cx. Annulirostris in different habitats.		
4892	12203533		Right-hemispheric dominance of dentate granule cells c-fos expression after spatial exploration in split-brain mice/	Mohammed, Hassan Ahmed Ahmed .		2012	Laterality of cerebral hemisphere has been well known based on dominance of higher brain functions in human such as language processing in the left hemisphere (Broca, 1861; Wernicke, 1874) and spatial navigation in the right hemisphere (Fenton and Bures, 1993; Maguire et al., 1996; Bohbot et al., 1998; Czeh et al., 1998; Nunn et		

							al., 1999; Burgess et al., 2002; Klur et al., 2009; Igloi et al., 2010). L-R asymmetry of macroscopic structure of the brain has been reported since 1968 first found in the plenum temporal, which was larger in the left than the right (Geschwind and Levitsky, 1968). In addition, dendritic branches were found to be greater in the left hemisphere speech area than the right, and the central sulcus located in the primary motor cortex was deeper and larger in the right hemisphere (Toga and Thompson, 2003). Recent technologies such as fMRI, PET and CT have also demonstrated L-R asymmetry in various brain regions such as temporal cortex, striatum and amygdala (Maguire et al., 1996, 1997 and 2000). Studies on the L-R asymmetry extended to involve the biochemical and molecular basis including asymmetric distribution of GABA binding sites in the cerebral hemisphere (Oke et al., 1980), nitric oxide lateralization in the hippocampus (Kristofikova et al., 2008), and dominance of dopaminergic D2 receptor in the right striatum (Afonso et al., 1993). Furthermore, the first description of L-R asymmetry has been done at the synapse level in the hippocampal pyramidal cells (Kawakami et al., 2003; Wu et al., 2005). Density of NMDA glutamatergic receptor subunit GluN2B and AMPA glutamatergic receptor subunit GluA1 in CA1 pyramidal cells are about 50% higher in synapses receiving afferents from the left and right CA3 pyramidal cells, respectively (Kawakami et al., 2003; Shinohara et al., 2008). Furthermore, size and shape of the spine synapses and induction of LTP were also found to be asymmetrical depending on the side of input in CA1 pyramidal cells (Kawakami et al., 2003; Wu et al., 2005 and Kohl et al., 2011). Surprisingly, the asymmetrical allocation of GluN2B disappeared resulting in right isomerism in inversus viscerum (iv) mutant mice, which have a point mutation in LrD and randomized laterality in internal organs (Kawakami et al., 2008). Thus iv mutant can serve as an interesting model to investigate physiological roles of brain asymmetry (Goto et al., 2010).		
4893	12203586		Distribution of UV-Index in Some Upper Egypt Regions/	El-Nobi- Eman Fouad El-Said .		2012	Tropospheric ozone is also highly variable in time, both seasonal and daily scales. Owing to the photochemical mechanisms that synthesize ozone, minimum ozone concentration is usually found early in the morning, while the maximum value is set in late afternoon. Changes in tropospheric ozone from day to day can be as large as a factor of 2 or 3. Regarding long-time trends, the WMO (1994) estimates an enhancement of boundary layer ozone levels of up to 50% in some populated Northern Hemisphere regions; Janach (1989) estimates a global averaged increase of 1–2% for tropospheric ozone between the 1960s and 1989; and the Intergovernmental Panel on Climate Change, IPCC (2001) assigns a small but significant positive radiative forcing to increased tropospheric ozone concentration, which is estimated to be some 8 DU between 1750 and current days. Although tropospheric ozone is very variable both in time and space, it has been suggested that in industrial areas of the Northern Hemisphere increased tropospheric ozone can overcompensate (as far as filtering UV-B is concerned) for stratospheric ozone depletion (Brühl and Crutzen, 1989). The sensitivity of erythral ultraviolet (EUV), will be discussed later, to atmospheric ozone is frequently expressed with the radiation amplification factor (RAF), also called sensitivity by Madronich (1992) or magnification factor by Bais et al. (1993a), defined as the percentage increase in EUV that would result from a 1% decrease in the column amount of atmospheric ozone (McKenzie et al., 1991; Madronich, 1995a ; Madronich et al., 1995b; Durzan and Smertenko, 2005). For that aim, the RAF has become a widely used standard index during last years (McKenzie et al., 1991; Madronich, 1993b; Bodhaine et al., 1997; Madronich et al., 1998; Dubrovsky, 2000; Zerefos, 2002; Serrano et al., 2008).		
4894	12203767		Studies on Helminth Parasites of Some Fresh Water Fish And Their Public Health Importance/	Saleh, Walaa M.Ahmed .		2012	As world's population is rapidly increasing, there is an increasing demand for food including animal protein. Fish protein is an important source of animal protein as it is highly nutritious, palatable and easily digested (Rifaat et al., 1980). Fish may harbour many pathogens including parasites, (Srisawangwong et al., 1997; Waikagul, 1998; Sukontason et al., 1999; Wongsawad et al., 2004 ; Kue and Wiwanitkit, 2005). Encysted metacercariae parasitic diseases have the upper hand in fish		

						parasitic diseases .The presence of encysted metacercariae are very common especially in freshwater fish as that may cause public health importance(Eissa, 2002). Humans acquire the infection from handling infected raw fish (fishermen and house wives) or eating insufficiently cooked fish (roasted, smoked or pickled). Animals and fish eating birds also get infected as they consume raw infected fish .In the past, these diseases were limited for the most part to populations living in low and middle-income countries, but the geographical limits and populations at risk are expanding and changing because of growing international markets, improved transportation systems, and demographic changes (such as population movements). The WHO ,(1995) has estimated that the number of people currently infected with fish-borne trematodes exceeds 18 million, but worldwide the number of people at risk, including those in developed countries, is more than half a billion.The present work aims to the following : 1-Determine the incidence of encysted metacercariae of zoonotic importance in some Nile fish e.g(Tilapia nilotica and Clarias lazera) in Sohag and El-Minia Province fish markets. 2- Study the morphology of these metacercariae .		
4895	12203792	Applications of some analytical methods to study the behavior of non-newtonian fluids /	Ali, Mahmoud Said Mubarak.		2012	The aim of this dissertation, which consists of four chapters, is provide an analytical solutions for some problems of different types of non-Newtonian fluids and study their behavior . In the following a brief discussion of the chapters is given. In chapter one, the objective of this chapter is to introduce and to illustrate the frequent and wide occurrence of non-Newtonian fluid behavior. Starting with the definition of a non-Newtonian fluid, different types of non-Newtonian fluids are briefly described, effects of chemical reaction, thermal radiation, thermophoresis, basic equations of micropolar, power-law and viscoelastic fluids. A basic idea of an analytical technique (HAM) which we used in this study has been presented In chapter two, we introduced an analytical solutions for a problems of heat and mass transfer of a non-Newtonian micropolar fluid, the following two problems have been studied: In the first problem (2.1), the effects of chemical reaction and heat source/sink on flow of a magnetomicropolar fluid past a continuously moving plate in the presence of radiation are studied. The governing equations for the problem are changed to dimensionless ordinary differential equations by similarity transformation. The effects of radiation parameter, magnetic field parameter, Prandtl number, Schmidt number, heat generation/absorption parameter and chemical reaction parameter on the velocity, angular velocity, temperature and concentration profiles have been discussed through graphs (see figures from 2.1:1 to 2.1:17). Also, Nusselt number and Sherwood number have been presented in tables. In the second problem (2.2), the problem of heat and mass transfer on the flow of non-Newtonian micropolar fluid with uniform suction/blowing, heat generation, thermal radiation, thermophoresis and chemical reaction is presented and discussed. The homotopy analysis method (HAM) is employed to compute an approximate solution of the system of nonlinear differential equations governing the problem. The effects of various physical parameters such as material parameter, suction parameter, heat generation/absorption parameter, Prandtl number, radiation parameter, thermophoretic parameter, chemical reaction parameter and Schmidt number on the velocity profile temperature profile and concentration profile are studied and shown in several plots (see figures from 2.2:1 to 2.2:15). Also, Nusselt number and Sherwood number have been presented in tables. In chapter Three, we introduced an analytical solutions for partial differential equations of heat and mass transfer of a power-law fluid, the following two problems have been studied:In chapter Three, we introduced an analytical solutions for partial differential equations of heat and mass transfer of a power-law fluid, the following two problems have been studied:In the first problem (3.1), the problem of heat and mass transfer on unsteady magneto hydrodynamic flow of non-Newtonian power-law fluid caused by an impulsively stretching plate in the presence of chemical reaction is studied. The effect of the integral power-law index ($n=0.5, 1.0, 1.5$) of the non-Newtonian fluid is investigated. The effects of the various dimensionless parameters entering into the problem on the velocity, temperature and concentration have been investigated. Also, Nusselt number and Sherwood number have been presented in tables. In the second problem (3.2), the problem of heat and mass transfer on MHD flow of a power-law fluid due to a linearly stretching sheet, heat and mass transfer characteristics using variable thermal conductivity is studied in the presence of a		

							non-uniform heat source/sink, porous medium and chemical reaction. The thermal conductivity is assumed to vary as a linear function of temperature. The similarity transformations have been used to convert the governing partial differential equations into a set of non-linear ordinary differential equations. One type of boundary heating is considered, namely prescribed power-law surface temperature (PST). The effects of various physical parameters such as magnetic field parameter, porosity parameter, Prandtl number, non-uniform heat source/sink parameter, thermal radiation parameter, Schmidt number, chemical reaction parameter and variable thermal conductivity parameter on the dynamics have been analyzed and shown in several plots (see figures from 3:2:1 to 3:2:18). Also, Nusselt number and Sherwood number have been presented in tables.		
4896	12203978		interaction effect of zinc treatment and salinity stress on two wheat cultivars /	Mohammed, Nehal Mohammed Abd EL-Mobdy.		2012	Salinity is one of the oldest enemies of agriculture. Excess amount of salts in the soil or irrigation water adversely affect plant growth and development. Nearly 20% of the world's cultivated areas are affected by salinity (Zhu, et al., 2010). Seedling growth, flowering and fruit set are influenced by high salt concentration leading to diminished economic yield (Sairam and Tyagi, 2004 and Bybordi and Tabatabaei, 2009). Salinity is considered as a severe problem in agriculture since it results in a noticeable reduction in crop productivity (Bybordi, et al., 2010b). Generally, salinity can affect germination, metabolism, the size of plants, branching, leaf size and overall plant anatomy. Salt also affects photosynthetic components such as enzymes, chlorophyll and carotenoids contents (Heidari, 2012). In fact, soil salinity is an important growth-limiting factor for nonhalophytic plants (Bybordi, et al., 2010b). Salts inhibit plant growth by osmotic stress, nutritional imbalance, and specific ion toxicity (Hussain, et al., 2010). Also salinity damage is mainly due to altered water relation caused by high salt accumulation in the intercellular spaces (Zhang, et al., 2006). One of the major constraints of salt stress is nutrient imbalance (Jadhav, et al., 2010). Abiotic pressure like salt stress and chemical insulate impose limitation on crop productivity and also limit land available for farming, often in regions that can ill afford such as constraints, thus highlighting a greater need for understanding how plants respond to adverse conditions with the hope of improving tolerance of plants to environmental stress (Joseph, et al., 2010). However, one of the cost effective strategies for counteracting salinity stress involves growing crops possessing inherent ability to tolerate saline conditions (Ashraf and Harris, 2004 and Sabir and Ashraf, 2008a). Furthermore incorporating factors that enable plants to tolerate salt stress could improve growth and production under saline conditions (Ashraf and Foolad, 2007, Sharifi, et al., 2007 and Ashraf, et al., 2008a). However alleviation of salinity problem is expensive and often represents only a temporary solution. In Egypt the cultivated regions restricted to the Nile Valley which depends on fresh water of the Nile river for irrigation does not exceed 4% of the total Egypt land area according to (Younis, et al., 1994). The toxic effects of salt on plants are the consequence of both a water deficit that results from the relatively high solute concentrations in the soil as well as a stress specific to Na ⁺ and Cl ⁻ resulting in a wide variety of physiological and biochemical changes that inhibit plant growth development and proteins synthesis (Taffouo, et al., 2010 a and b).		
4897	12204004		أثر البيئة الافتراضية في تدريس العلوم علي تنمية أنماط التعلم والتفكير والميول العلمية لدى تلاميذ الحلقة الثانية من التعليم الأساسي /	أحمد ، نشوي محمد صبري .		2010	إن التقدم العلمي الذي أحرزه الإنسان في العصر الحالي كان من الضخامة بحيث سمي هذا العصر بعصر العلم ، والذي من سماته الهامة التطور والتغير حيث يظهر كل يوم جديد في ميدان العلوم والتكنولوجيا ، ولقد كان من الطبيعي أن يتأثر تدريس العلوم بهذا التطور ، فلم يعد اكتساب التلاميذ للمعلومات هو الهدف النهائي ، بل أصبح هناك اهتمام بتنمية الجوانب الانفعالية في تدريس العلوم ومنها الميول العلمية ، فالميول أهميتها كقوة تدفع الفرد إلى بذل الجهد لاكتساب المعلومات والمهارات المرجوة ، كما أن تنمية الميول العلمية لدى التلاميذ قد تسهم في إعداد علماء المستقبل الذين يقوم عليهم تقدم المجتمع . فقد أصبحت قوة الأمم تقاس بما لديها من عقول مبدعة ، قادرة على الاختيار والانتقاء ، واكتشاف المعارف الجديدة وإثرائها وتحويلها إلى أساليب تكنولوجية توجه بها حركة الحياة والأحياء (علي أحمد مذكور ، ٢٠٠٣: ٢٣٥) فتقدم أية دولة يقاس بمقدار تقدمها العلمي ، ولذلك ينبغي توفير فرص التربية العلمية السليمة وتنمية الميل العلمي للقاعدة العريضة من التلاميذ في مرحلة التعليم الأساسي والتي تعتبر فترة هامة فهي تنسيق مرحلة التعليم الثانوي التي يتحدد فيها التحاق الطلاب بالشعب العلمية أو الأدبية . ولذا يجب الاهتمام بتنمية الميول العلمية في هذه المرحلة حتى تكون هناك فرص اكبر لظهور العلماء ، فكلما اتسعت قاعدة الهرم زاد ارتفاعه .		

						كما يجب الاهتمام في هذه المرحلة بتنمية أنماط التعلم والتفكير حيث يذكر (فيهم مصطفي، 2002: 18-19) أن تلميذ المرحلة الثانية من التعليم الأساسي تنمو قدرته على الانتباه لدرجة يستطيع معها أن يحل المشكلات المعقدة ، كما تزداد قدرته على التفكير المنفي على الفهم ، وربط الموضوعات التي يفهمها بخبراته السابقة ، كذلك يميل التلميذ إلى فرض الفروض لحل ما يقبله من مشكلات ، كما يميل إلى التحليل المنطقي والاستنتاج . وقد ألفت بعض البحوث الحديثة الضوء على الوظائف المعقدة للمخ ، والتي تتضمن مختلف جوانب التفكير التي يقوم بها كل نصف من نصفي المخ . وقد قسم تورانس "Torrance" أنماط التعلم والتفكير الخاصة بأداء النصفين الكرويين للمخ إلى ثلاثة أنماط هي: النمط الأيسر "left style" والنمط الأيمن "Right style" والنمط المتكامل "Integrated style" (صلاح أحمد مراد ، ١٩٩٤:٤٢٣-٤٢٩) ويتم في النمط الأيسر استخدام وظائف النصف الكروي الأيسر للمخ مثل الاستجابة للمثيرات اللفظية ، التعامل مع الرموز المجردة، التفكير المنطقي والتخيلي والتجريب في خطوات منظمة، وتفسير البيانات الخطية التتابعية ، أما النمط الأيمن فيتم فيه استخدام وظائف النصف الكروي الأيمن للمخ مثل التعامل مع مثيرات مصورة ومتحركة ، استخدام الخيال في التفكير ، التعامل مع الأشكال الفراغية والهندسية ، المبادأة والتفكير المجرد، استخدام الصور والتصورات ، إعطاء معلومات عن الحركة والتمثيل ، والاستجابة للمثيرات الوجدانية ، أما النمط المتكامل فيعني التساوي في استخدام وظائف النصفين الكرويين الأيسر والأيمن معا . (رفعت محمود بهجات، ١٩٩٩:١٦٦) ويستخدم كل تلميذ النصفين الكرويين ولكن الاختلاف يكمن في سيادة نصف كروي على النصف الآخر ، فالأفراد ذوي النمط الأيسر يسيطر على أدائهم وظائف النصف الكروي الأيسر ، والأفراد ذوي النمط الأيمن يسيطر على أدائهم وظائف النصف الكروي الأيمن ، أما الأفراد ذوي النمط المتكامل فيتساوي عندهم استخدام النصفين الكرويين ، وتوجد نسبة كبيرة من الأفراد تستخدم الوظائف العقلية الكامنة في النصف الكروي الأيسر فقط ولا تستفيد من الطاقات الكامنة في النصف الكروي الأيمن ، مما يعمل على استفاة الفرد فقط من 50% من الطاقات العقلية الموجودة لديه ، ولذا ينبغي أن يهتم تدريس العلوم باستخدام أساليب تدريسية حديثة تقوم على استخدام وظائف النصفين الكرويين الأيسر والأيمن معا حتى يمكن تنمية النمط التفكيرى المتكامل .	
	4898	12204024	المعتقدات المعرفية وأساليب التعلم وعلاقتها بالتحصيل الأكاديمي في اللغة الإنجليزية لدى طلاب الصف الأول الثانوي/	أحمد، أحمد محمود خليل .		2012 أهم البحث الحالي بدراسة المعتقدات المعرفية بأبعادها الأربعة (الاعتقاد في ثابت المعرفة الاعتقاد في بنية المعرفة ، الاعتقاد في القدرة على التعلم ، الاعتقاد في سرعة ا لتعلم) التي يعتقها الطلبة وأساليب التعلم وعلاقتها بالتحصيل الأكاديمي في اللغة الإنجليزية لدى طلاب الصف الأول الثانوي ، كما اهتمت البحث الحالية بدراسة تأثير النوع (ذكور/ إناث) ، كما اهتم البحث بمعرفة : هل يمكن التنبؤ بالتحصيل الأكاديمي لدى الطلاب (ذكور/ إناث) بمعلومية درجاتهم في الأبعاد الأربعة للمعتقدات المعرفية وأساليب التعلم ؟ . وقد تم عرض إطار نظري ومجموعة من البحوث السابقة ذات الصلة بمتغيرات البحث ، وتم تصنيفها إلى ثلاث محور رئيسية كما يلي: 1. البحوث التي تناولت المعتقدات المعرفية . 2. البحوث التي تناولت أساليب التعلم . 3. البحوث التي تناولت المعتقدات المعرفية وأساليب التعلم والتحصيل الدراسي . ويعد عرض البحوث قدم الباحث تعليقاً على كل محور على حدة من حيث: الهدف، العينة والأدوات ، والنتائج ثم تطبيق عام على البحوث المرتبطة كلها. مشكلة البحث : تتلخص مشكلة البحث في الإجابة على التساؤلات الآتية : 1) هل تختلف أساليب التعلم باختلاف مستوى المعتقدات المعرفية (مرتفعي / منخفضي) لدى طلاب المرحلة الثانوية ؟ 2) هل تختلف المعتقدات المعرفية باختلاف الجنس (ذكور – إناث) ؟ 3) هل يختلف التحصيل الدراسي باختلاف مستوى المعتقدات المعرفية (مرتفعي / منخفضي) لدى طلاب المرحلة الثانوية ؟ 4) هل يمكن التنبؤ بالتحصيل الدراسي في اللغة الإنجليزية لدى الطلاب بمعلومية درجاتهم في المعتقدات المعرفية وأساليب التعلم ؟ إنف البحث الحالية إلى : الكشف عن العلاقة بين أساليب الت علم في اللغة الإنجليزية لدى طلاب المرحلة الثانوية 1- والمعتقدات المعرفية لديهم . 2- (تذكور- إناث)دراسة الفروق في مستويات المعتقدات العرفية لدى طلاب المرحلة الثانوية 2- التعرف على الفروق بين مرتفعي ومنخفضي المعتقدات المعرفية في التحصيل الدراسي 3- لدى طلاب المرحلة الثانوية . الكشف عن مدى إسهام كل من المعتقدات المعرفية وأساليب التعلم في التنبؤ بالتحصيل 4- الدراسي في اللغة الإنجليزية لدى طلاب المرحلة الثانوية.	
	4899	12204054	//مواضع التعبير عن السماء والأرض في القرآن الكريم"	حمد الله، حمد الله عبد الحكيم محمد.		2012 وركز المبحث على الحديث عن أفاط الخلق والتكوين، ومنها : الخلق، والجبل، البديع، و الفطر، والنحو، والسطح، والطحو، والفرش، والمد، والرتق، والقق، والتسوية، وغير ذلك . وركزت الدراسة على إبراز الاختلافات بين هذه الألفاظ واختصاص كل لفظ بالتعبير عن مرحلة معينة من التكوين والإيجاد. المبحث الثاني: في التعبير عن الأوصاف والأحوال. وجاء موضحا ما تصل بالسماء والأرض من أوصاف وأحوال، واشتمل المبحث على قسمين: الأول: في التعبير عن أوصاف الأرض وأحوالها، ومنها: بساطها، والجرز، وحصيدا ، وخاشعة ، و ذلول، و سيلاء، ذات الصدع، وكفتا ... وغير ذلك من الأوصاف والأحوال التي تعلقـت بالأرض دون غير ها الثاني: في التعبير عن أوصاف السماء وأحوالها، ومنها : أبوابا، والع[إلى، وبناء ، ودخان ، وذات الحيك، وذات البروج، وذات الرجع، وسفقا، وطبقا، ومدارا...وغير ذلك من الأوصاف والأحوال التي تعلقـت بالسماء دون سواها. المبحث الثالث: عن مظاهر التحول الأخروي. وجاء للحديث عن أحوال القيامة وأهلها ميززا دور السماء والأرض في هذا الموقف العظيم وما يلحقهما من مراحل التبديل والتغيير؛ وقسمته إلى ثلاثة أقسام: الأول: الأرض ومظاهر التحول الأخروي، ومنها: إخراج الأتقال، وبارزة ، وترجف ، و □ حملت ، والدك، والرج، وزلزلت، وغير ذلك من مظاهر تعترى الأرض يوم القيامة. الثاني: السماء ومظاهر التحول الأخروي، ومنها : الطي، وانشققت، وانفطرت، كالمهل، وكشطت ، وواهية وغير ذلك من الأحوال التي تعترى السماء يوم القيامة.	

							الثالث: السماء والأرض ومظاهر التحول الأخرى، ومنها: التبدل، والتشقق وهي أحوال تعترئها معا. ثم جاء الفصل الثاني بعنوان: " توظيف الأدوات والصنع"، وتضمن خمسة مباحث: المبحث الأول: الأفراد والجمع. المبحث الثاني: الشرط. المبحث الثالث: الاستقهام،المبحث الرابع: القسم. المبحث الخامس: الأسماء الموصولة. وركز هذا الفصل على عدد من الصيغ والأدوات التي لعبت دورا كبيرا في إثراء المعنى، وجاءت موظفة في سياقها أبرع توظيف، وقد ارتبطت ارتباطا وثيقا بسياق السماء والأرض. ثم جاء الفصل الثالث بعنوان: "التنوع في خصائص البناء التركيبي" وتضمن ثلاثة مباحث: المبحث الأول: التقديم والتأخير،المبحث الثاني: الذكر والحذف. المبحث الثالث: الالتفات. وركز هذا الفصل على إبراز التنوع الأسلوبى للقرآن في التعبير عن أهمية الشيء ولفت الانتباه إليه مرة بتقديمه وأخرى بتأخيره وثلاثة ذكره أو حذفه أو بالالتفات عنه أو إليه.		
4900	12204251	بعض مشكلات إدارة رياض الأطفال بمحافظة قنا ومقترحات مواجهتها /	حمادى، عفاف محمد فؤاد.		2012	تعتبر مرحلة الطفولة المبكرة الفترة التكوينية الحاسمة في حياة الإنسان ، لأنها الفترة التي يتم فيها وضع البذور الأولى للشخصية التي تتبلور وتظهر ملامحها في مستقبل حياة الطفل ، وتعتبر من أخطر وأهم فترات الحياة الإنسانية ، لأن ما يحدث فيها من نمو يصعب تقويمه أو تعديله في مستقبل حياة الفرد (1) . إن إدارة وتنظيم الأجهزة المسئولة عن تربية طفل رياض الأطفال تخضع لميدان الإدارة التعليمية يعتبر ميدان الإدارة التعليمية من ميادين الدراسات الحديثة وليدة القرن العشرين ، وإن كانت الممارسة الفعلية لها قديمة قدم الحضارة البشرية نفسها ، لقد تطور مفهوم الإدارة التعليمية من ناحية أخرى ، ويلاحظ فيما سبق أن المبادئ الإدارية المجردة لكل منها واحدة ، أما الاختلاف فهو في المجال التطبيقي فقط (2). وتستخلص مما سبق أن إدارة رياض الأطفال يميز مستواها الإجرائي على مستوى دور الأطفال ، وتتعلق كل ما تقوم به الروضة من أجل تحقيق رسالة طفل رياض الأطفال ، وهي بهذا تصبح جزءا لا يتجزأ من الإدارة التربوية ككل ، أما تنظيم دور الرياض ، فهي العملية التي تهدف إلى تحديد الأعمال التربوية المراد إنجازها داخل الروضة مع وضع خطوط السلطة والمسئولية ، وإنشاء العلاقات التعاونية بين المجموعـة العاملة مع الإهتمام بحاجات ورغبات العاملين بالروضة والإهتمام بتكنولوجيا العمل التربوى داخل الروضة لتحقيق أهداف طفل تلك داخل الروضة . ومن هنا تعتبر الروضة مرحلة تربوية تعليمية ضرورية لتسهيل مسار العملية التربوية لتكون الطريق المشوقة والجسر القوي الذي يعبر من خلاله الطفل الصغير من جو الأسرة إلى جو المدرسة (1). يرى البعض أن أهداف مؤسسات الرعاية اليومية للأطفال فيما قبل المدرسة هي أهداف تنموية بمعنى أن برامجها لا بد من أن تخطط أساسا للوصول إلى متطلبات النمو المتكامل لطفل هذه المرحلة مع توافيقها مع متطلبات المجتمع (2) إن الخبرة والتجربة التي يكتسبها الطفل والتجربة من المنزل والجيران في بداية الأمر تؤهلانه ليتلقى تجارب وخبرات من خارج ذلك الإطار مما يزيد في خبراته ، تجاربه وإن التحاق الطفل بالروضة ، يوفر الفرص للطفل ليتفاعل مع غيره من الأطفال ويشاركهم نشاطهم وتصبح للروضة قيمتها إذا عملت على إشباع حاجات الطفل ولكي يتم ذلك لابد من تعاون مشترك بين المنزل والروضة (3) وانطلاقا من اهتمامنا بالطفولة ونتمشيا مع الاتجاهات التربوية المعاصرة ، عمدت وزارة التربية والتعليم في جمهورية مصر العربية إلى إصدار قرار بتنظيم العمل في رياض الأطفال – قرار وزاري (154) لسنة 1988م بشأن تنظيم رياض الأطفال في المدارس الرسمية (4) .

4905	12205103	ميول القراءة واتجاهاتها لدى الأطفال في صعيد مصر/	البقلي، أمين شعبان أمين .		2012	حضارة الكتاب في أي أمة من الأمم مظهر من مظاهرها الحضارية، بل لعلها أهم تلك المظاهر وأبعدها أثرا، لأنها الوعاء الذي يضم ثمرات عقول أبنائها وإبداعاتهم في شتى مناحي الحياة.			

						وليس من الإصراف القول بأن الكتاب مجرد كيان مادي ولكنه كائن حي يصنع الإنسان الكامل، ومن المؤكد أن حياة البشر قد تأثرت بهذه الوسيلة القديمة والأساسية من وسائل الاتصال. ويمكن أن نقول مطمئنين أن حضارات كوكبنا وثقافتها وما ارتقى عليه منمنج التفكير من دقة وترتيب وموضوعية إلا بعد اختراع الكتاب كما يورخون لها منذ ظهور عصر الطباعة في القرن الخامس عشر، والتي يعتبرونها ثورة حضارية نقلت الفكر والكتاب من دائرة المخطوط الضيقة إلى جمهور عريض قارئ، ولما بحاجة إلى التأكيد على أن الكتب قد بلغت في عصرنا هذا درجة هائلة من الانتشار والذووع ومصدرا مهما من مصادر المعلومات في صرح الحضارة، لا يستغنى عنه المتخصصون في التاريخ العام، وتاريخ العلوم والفنون، وتاريخ الكتب والمكتبات. وتعد القراءة من أهم وسائل كسب المعرفة والثقافة والحصول على معلومات فالقراءة عنصر فاعل في نمو المعرفة والمفاهيم والقيم إلى جانب تكوين الخبرات اللازمة لكل فرد، لأنها أرقى وسط ذهني شعوري يعيش فيه الفرد، وهي من أعظم وسائل الاتصال وأكثرها قدرة على إثنياع حاجات الإنسان، واحتراما لحرية تفكيره واختياره. والقراءة ضرب من ضروب الثقافة، والثقافة ضرورة ذاتية واجتماعية، ومهارة من المهارات التي تحتاج إلى الدراسة الواعية والفترة الفاحصة المتأنية التي تتخذ من المنهج العلمي أسلوبيات لها، وأداة موضوعية لبحث جوانبها، وذلك لما تمتاز به القراءة من أهمية بالغة نوه القرآن الكريم إلى خصوصيتها، ونادى بتفرداها في أول ما تنزل من وحى السماء على الرسول الأمين عليه الصلاة والسلام قول الحق سبحانه وتعالى: {اقرأ باسم ربك الذي خلق} خلق الإنسان من علق * اقرأ وربك الأكرم * الذي علم بالقلم * علم الإنسان ما لم يعلم} . وهكذا بدأت الآيات الكريمة بالقراءة وانتهت بالكتابة وهي نعمة من أجل نعم الله على عباده، وهذا الأمر الإلهي (اقرأ) بمثابة إشارة صريحة إلى أن مفتاح الدنيا والدين يكمن في القراءة. وقد عني علماء التربية بموضوع تعليم القراءة، وبخاصة تعليمها للأطفال، لما لها من أثر بالغ في حياتهم، وكان لجهودهم في البحث والدراسات النفسية والتجارب التربوية نتائج محدودة في ابتكار عدة طرق لتعليم القراءة. وإذا كانت القراءة أساسا بنائيا لكل إنسان متحضر، وإذا كانت تكليفا دينيا وواجبا ختميا وثقافيا ومعرفيا لكل إنسان فأنها تكون أشد أهمية وأكثر حيوية وإلحاحا لدى الأطفال في توسيع مداركهم والارتقاء بأنواقهم وميولهم القرآنية ومنحلا لتعلم حقائق المواد المختلفة، كما أنها أساس النجاح المدرسي في كل فرع من فروع المعرفة والمواد الدراسية.
4906	12205141	عثمان ، رشا عثمان خليفه.	بعض معوقات الدور التربوي لرياض الأطفال بجنوب صعيد مصر /		2012	أن مرحلة الطفولة تمثل ركيزة أساسية في حياة الإنسان ، حيث أن الخبرات والمواقف والسلوكيات التي يمر بها الطفل في حياته الأولى تترك أثارا باقية في حياته . لذلك يرى بعض الباحثين أن الطفل لاينمو نموا سليما الا اذا توفرت له بيئة تربوية غنية وملينة بالمتغيرات التي تتمشى مع قدراته وطاقاته وتعمل على تنمية جوانبه الجسموية والنفسية والاجتماعية والعقلية والتي تمكنه من الحياة كائنسان وهذه البيئة التربوية ما هي الا رياض الأطفال التي يلتحق بها الأطفال في مرحلة الطفولة المبكرة. إذا صدر القانون رقم (12) لسنة 1996 الخاص بإصدار قانون المظل والذي نص في احد مواده ان الهدف من تعليم الطفل هو تكوينه علميا وثقافيا وروحيا وتنمية شخصيته ومواهبه وقدراته العقلية والبدنية وهذا تأكيد على الدور التربوى الذى تقوم به رياض الأطفال . مشكلة الدراسة :- هناك العديد من المعوقات التى تعوق الدور التربوى لرياض الأطفال فقد عجزت عن تحقيق الاهداف المنوطة بها نظرا لانتقاهها الكثير من المقومات الرئيسة لنجاحها سواء الفنية منها او الاجتماعية التى تؤهلها للقيام بوظائفها التربوية والاساس الفلسفى الذى انشئت من اجله ايضا . منهج الدراسة :- تستخدم المنهج الوصفى لملامته لطبيعة واهداف الدراسة ويهتم هذا المنهج بتوفير اوصاف دقيقة للظاهرة المراد دراستها . ادوات الدراسة :- استطلاع رأى واستبانه موجحة لمعلمات رياض الأطفال للتعرف على المعوقات الدور التربوى لديهم
4907	12205191	عبدالله، ناهد يسين.	الجامعة الافتراضية في الولايات المتحدة الأمريكية وإنجلترا وسوريا وإمكانية الإفادة منها في مصر /		2012	من مشكلات التعليم الجامعي في مصر قلة عدد الجامعات بالصورة التي تمكنها من استيعاب خريجي التعليم الثانوي الراغبين في متابعة دراستهم الجامعية، وقلة الموارد المالية المخصصة للتعليم العالي للتوسع فيه وتجديده وتحسينه كما ونوعاً ، علاوة على ذلك فإن أنظمة التعليم العالي لا تتبنى الاتجاهات التربوية المعاصرة لتطوير أنماطه من حيث الطرق والتقنيات والإدارة لتساعد في استيعاب الأعداد المتزايدة من الراغبين في التعليم الجامعي ، كما أن مغادرة عدد كبير من الأساتذة المتميزين إلى أقطار عربية وأجنبية تمنح رواتب وامتيازات أعلى أفقد الجامعات المصرية الكثير من كفاءاتها وبعد الجهود والمحاولات التي بذلت لإصلاح التعليم الجامعي في مصر، تم إنشاء الجامعة المصرية للتعليم الإلكتروني، التي تهدف إلى تحسين نوعية التعليم العالي باستخدام التكنولوجيا الحديثة، وإنشاء قاعدة واسعة لتكنولوجيا المعلومات، واستخدام الأساليب الحديثة للتعليم الإلكتروني. وبذلك تتحدد مشكلة البحث الحالي في محاولة تطوير الجامعة المصرية للتعليم الإلكتروني وذلك في ضوء خبرات بعض الدول الأجنبية والعربية الرائدة في هذا المجال. أسئلة الدراسة: يسعى البحث الحالي للإجابة على الأسئلة التالية : 1- ما الجامعة الافتراضية - وما أهدافها - وأنواعها – ومتطلباتها - وعناصرها الاساسية؟ 2- ما نظام جامعة فونكس على الخط في الولايات المتحدة الأمريكية في ضوء القوى والعوامل الثقافية المؤثرة فيها؟ 3- ما نظام الجامعة الافتراضية الدولية في المملكة المتحدة في ضوء القوى والعوامل الثقافية المؤثرة فيها؟ 4- ما نظام الجامعة الافتراضية في سوريا في ضوء القوى والعوامل الثقافية المؤثرة فيها؟ 5- ما نظام الجامعة المصرية للتعليم الإلكتروني في ضوء القوى والعوامل الثقافية المؤثرة فيها؟ 6- ما أوجه الشبه والاختلاف بين نماذج الجامعات الافتراضية في دول المقارنة وكيف يمكن تطوير الجامعة المصرية للتعليم الإلكتروني في ضوء خبرات دول المقارنة؟ أهداف الدراسة : 1 . التعرف على الجامعة الافتراضية كصيغة حديثة لتطوير التعليم الجامعي ، والقيام بتحليل أهم عناصرها الأساسية. تحليل نظام الجامعة الافتراضية في كل من الولايات المتحدة الأمريكية، والمملكة المتحدة، وسوريا، وجمهورية مصر. العربية، وذلك في ضوء القوى والعوامل الثقافية الخاصة المؤثرة فيها الوقوف على أوجه الشبه والاختلاف في الجامعات الافتراضية في موضع المقارنة واستنتاج أهم الجوانب الإيجابية منها 3- وصياغة بعض التوصيات التي يمكن أن تفيد في تحسين وتطوير الجامعة المصرية للتعليم الإلكتروني وذلك من خلال الاستفادة من خبرات كل من الولايات المتحدة الأمريكية،والمملكة المتحدة، وسوريا في هذا المجال
4908	12205320	محمود، محمد أحمد عبدالله .	المشاركة المجتمعية كمدخل للإصلاح المدرسي في ضوء معايير الجودة والإعتماد/		2012	المشاركة المجتمعية ضرورة حتمية في التعليم حتى تستطيع المدرسة أن تحقق أهدافها وطموحات مجتمعها، فالمدرسة كمؤسسة مجتمعية لا تعمل في فراغ أو عزلة عن الظروف والعوامل المجتمعية التي تحيط بها، ولكنها جزء من المجتمع تتفاعل به وتتفاعل معه، لمساهمة في حل المشكلات وإصلاح التعليم وتطويره. مشكلة الدراسة: تعانى المشاركة المجتمعية من بعض الصعوبات التي تعيق تحقيق الإصلاح ا لمدرسى، وتتلخص مشكلة الدراسة في الإجابة على التساؤلات الآتية: ما المقصود بالمشاركة المجتمعية؟ وما أسسها ومتطلباتها وأنواعها والياتها ؟ -١

						ما المقصود بالإصلاح المدرسي؟ وما فلسفته وأهدافه؟ وما التحديات التي تواجهه ؟ -٢ ما مجالات الإصلاح المدرسي؟ وما دور المشاركة المجتمعية في مجالاته بالمرحلة الإعدادية؟ -٣ ما مفهوم الجودة ؟ وما مقوماتها؟ وما معايير المشاركة المجتمعية في ضوء الجودة والاعتماد؟ -٤ وما المراحل التي يمر بها الإصلاح المدرسي من خلال المشاركة المجتمعية لتحقيق الجودة والاعتماد للمدرسة الإعدادية؟ ما واقع المشاركة المجتمعية في مدارس التعليم الإعدادي في ضوء معايير الجودة -٥ والاعتماد في محافظة قنا ؟ ما التصور المقترح لتفعيل المشاركة المجتمعية في مدارس التعليم الإعدادي في ضوءمعايير الجودة والاعتماد في -٦ محافظة قنا ؟ أهداف الدراسة Objectives of the study : تتبع أهداف الدراسة الحالية من الاعتبارات الآتية : إلقاء الضوء على مفهوم الإصلاح المدرسي، وأهميته وفلسفته، وأهدافه، والدور الوظيفي -١ للمدرسة في إصلاح المجتمع والتربية، والتحديات التي تواجه الإصلاح المدرسي. التعرف على مجالات الإصلاح المدرسي ودور المشاركة المجتمعية في تحقيق الجودة -٢ والاعتماد للمدرسة الإعدادية. الكشف عن واقع المشاركة المجتمعية بالمدارس الإعدادية في ضوء معايير الجودة والاعتماد -٣ في محافظة قنا. وضع تصورمقترح لتفعيل المشاركة في المدارس الإعدادية في ضوء معايير الجودة والاعتماد -٤ في محافظة قنا. أهمية الدراسة تتناول الدراسة واقع المشاركة المجتمعية في محافظة قنا والعوامل المؤثرة فيها إيجابا وسلبا، والتي يمكن أن تسهم في حل مشكلات مدارس الحلقة المتوسطة. منهج الدراسة: تعتمد الدراسة الحالية على المنهج الوصفي، وهو المنهج الذي يشيع استخدامه في الدراسات إلى تصف الوضع الراهن للظاهرة وتفسيرها. أدوات الدراسة: الاستبانة التي تطبق على عينة من المجتمع المدرسي (مديري وإخصائى ومعلمى مدارس التعليم الإعدادى)، وعينة أخرى (تمثل شرائح المجتمع)؛ وذلك للتعرف على واقع المشاركة المجتمعية في محافظة قنا. حدود الدراسة تتمثل حدود الدراسة فيما يلي : ١)الحدود الموضوعية : تتناول الدراسة معايير المشاركة المجتمعية كمدخل للإصلاح المدرسي في ضوء معايير الجودة والاعتماد التربوى، في مجالات الإصلاح المدرسي التالية :- الإدارة المدرسية ٢- الأنشطة المدرسية ٣- المبانى المدرسية ٤- الوسائل التكنولوجية -١ الحدود البشرية (٢) سوف تقتصر الدراسة على: عينة من المجتمع المدرسي (مديري وإخصائى ومعلمى مدارس التعليم بالحلقة الثانية من التعليم الأساسى)؛ وذلك لأهم من المسؤولين عن المدرسة وعلى معرفة بمدى فاعلية المشاركة المجتمعية في الإصلاح المدرسي . عينة من أولياء الأمور (تمثل شرائح وأفراد المجتمع المحلي) المشاركين بمجلس الأمناء وغير - المشاركين أيضا؛ وذلك تحقيقا للحيادية وعدم انحياز مجلس الأمناء للمدرسة. ٣)الحدود الجغرافية : تقتصر الدراسة على عينة عشوائية من مدارس التعليم الإعدادى وعددها (٢٠) مدرسة في نفس الإدارات السابقة بمحافظة قنا وهي: قوص وقط وقفا ونجع جمادى ونقادة؛ لتنفيذ الاستبانة. الحدود الزمنية (٤): بحتى ٣٠ /٨/ ٢٠١١ . ٢٠١١/٨/ ٢٠١١ .

4910	12214310		The Effectiveness of a Program Based on "Podcasting" in Developing Some EFL Listening Comprehension Skills among Preparatory Stage Students	Al-Ammary, Alaa Shehata Amin Mohammad.		2015	The current study aimed at investigating the effectiveness of a program based on podcasts in developing some EFL listening comprehension skills of second-year preparatory students. To achieve this purpose, the researcher constructed and validated a questionnaire, a listening comprehension skills test and a program based on podcasts. Participants of the research included two classes (sixty students) from second-year preparatory students at Sohag governorate, Awlad Khalifa preparatory school at Dar El-Salam Administration. They were randomly selected and divided into an experimental group and a control group. Both groups were pre-tested using the listening comprehension skills test. Then, the experimental group students were taught listening using the program based on podcasts while the control group students were taught according to the teaching procedures included in the Teacher's Guide set by the Ministry of Education. After teaching the program, both groups were post- tested using the same tool utilized in the pre-testing. Findings of the research regarding the development of the students' levels of English listening comprehension skills showed a significant difference between both groups on the listening comprehension skills post-test in favor of the experimental group students. The researcher recommended that more attention should be given to teaching listening comprehension in the preparatory stage. Language is a peerless human phenomenon; it is mainly a system used for communication by a whole community. Effective communication skills are now required in every aspect of life. Teachers of English should have good command over the language and possess excellent communication skills. There are two types of communication; the first is verbal communication that includes oral and written communication. The second is nonverbal communication that includes expressive behavior and body language. Listening is one of the important oral skills in communication. Many researchers assert the effective role that listening skills play in developing language learning and communication. Kul (2010) emphasizes the important role listening comprehension occupies in teaching EFL, stating that listening is a pre-requisite to speaking, reading, and writing. Listening comprehension sets the foundation for the acquisition of speaking and promotes the development of linguistic competence Ridgway (2000) points out that listening is elementary in the classroom language because it provides input for the learner. Without understanding input at the right level, no learning can begin; therefore, listening is fundamental and demanding to speaking and other language skills. Buck (2001:120) states, "Our brains are well programmed to learn languages through sound and speech." Moreover, Rost (1994:53) states that listening plays an important role in second language instruction for several reasons. First, listening provides comprehensible input for the learner which is essential for any learning to occur. Second, listeners need to interact with speakers to achieve understanding. Third, listening exercises help learners direct their attention to new forms (vocabulary, grammar, interaction patterns) in the language. In addition, Saricoban (2002) indicates that listening provides the foundations for learning and functioning in a language. Buck (1995:118) says, "To arrive at understanding of the		

							message, listeners must understand the phonetic input, vocabulary and syntax (bottom- up processing), and at the same time, use the context of situation, general knowledge, and past experiences (top- down processing)."			
4911	12214377	Doctor	The Physiological Response of Aluminum-Stress on Sorghum and Maize Plants Under Compost Applied /	Mohammed, Nehal Mohammed Abd El Mobdy.			2015	The objective of this study was to investigate the effects of Al3+ stress: 0, 10, 20, 30, 40 and 50mM Al2 (SO4)3 16 H2O on growth, productivity and some related physiological activities of sorghum cv. Giza 15 and maize cultivars cv. Hagean 323 and a distinct variation of aluminum tolerance of these cultivars. Also, particular interest was focused on the effect of compost on stressed plants to alleviate or at least modify the pattern of changes induced by aluminum stress.	23/2/2015.	Ahamed Mohammed Ismail, Hamdy Ramdan Mohammed Galal.
4912	12214433		Studies on acetyl pyrrole, synthesis and characterization of some new aza and Sulfur heterocyclic derivatives/	Abdellah· Amany Salah .			2015	The present work includes the synthesis of some different compounds derived from pyrrole. Thus on reaction of acetyl pyrrole with CS2 it furnished the oxoketene gem-dithiol (2).Reaction of (2) with salicylaldehyde in acetonitrile as a solvent and marble as a catalyst and gives 2-mercapto-3-(1-methyl-1Hpyrrole-2-carbonyl)chromen-4-one (4) while on reaction the (2) with cinnamaldehyde and ethylcyanoacetate in tetrahydrofuran and drops of glacial acetic acid it furnishes 2-Mercapto-3-(1-methyl-1Hpyrrole-2-carbonyl)-4-oxo-6-phenyl cyclohexa- methyl-1H-pyrrol-1-2yl)-2-oxoethylidene]-3a,7a-dihy-drobenzo[1,3] dithiol-4,7-dione (6); 2-[2-(1-methyl-1H-pyrrol-1-2yl)-2-oxoethylidene]-3a,9a-dihydronaphtho[2,3-d][1,3]dithiol-4,9-dione (7); 2-(2,4-dithiabicyclo[3.2.1]octa-6-en-3-ylidene)-1-(1-methyl-1H-pyrrol-2-yl) ethanone (8) and 2-[2-(1-m-ethyl-1-H-pyrrol-2-yl)-2-oxo-ethylidene] dihydro[1,3]dithiolo[4,5-c]furan-4,6-dione (9) respectively.2.5- Treatment of (2) with malononitrile in THF/AcOH it gives thiopyrane derivative (10) while on reaction of dithiol (2) with thiosemicarbazide in refluxing ethanol, 3-mercapto-3-thiosemicarbazide-1-(2-pyrr-olyl)-2-propenone (11) was obtained. Reaction of dithiol (2) with indole in methylene chloride in the presence of monochloroacetic acid it gave 3-(1H-indol-3-yl)-3-mercapto-1-(1-methyl-1H-pyrrol-2-yl)propenone (12). Formylation of 1,2-dithione-3-thione (3) in the presence of DMF/ POCl3 it gives 5-(1-methyl-1H-pyrrol-2-yl)-3-thioxo-3H-[1,2]dithiol-4-carbaldehyde (17). When 1,2-dithione-3-thione (3) was heated under reflux with p-benzoquinone or 2,3-dichloro-1,4-naphthoquinone it gives 2-[2-(1-methyl-1H-pyrrol-2-yl)-2thioxoethylidene]-3a,7adihydrobenzo[1,3]dithiol-4,7-dione (18) and 3a,3a-dichloro-2-[2-(1-methyl-1H-pyrrol-2-yl)-2-thioxoethylidene]-3a,9a-dihydronaphtho[2,3-d][1,3]dithiol-4,9-dione (19) respectively.dienecarbonitrileReaction of (3) with salicylaldehyde in acetonitrile in the presence of marble it gives mercapto-3-(1-methyl-1H-pyrrole-2-carbothiyl) chromen-4-one (20). Treatment of (3) with cinnamaldehyde and ethyl acetoacetate in THF/AcOH it gives 1-[3-mercapto-4-(1-methyl-1Hpyrrole-2-carbothiyl)-biphenyl-2-yl]ethanone (21).α-Oxo ketene dithioacetals, which bear a carbonyl group at the α-C atom, are versatile intermediates in organic synthesis. α-Oxo ketene dithioacetals reacts as 1,3-electrophilic three-carbon synthones. Oxoketene dithioacetals behaves on the bases that, the α-carbon of ketene dithioacetals is reactive towards electrophiles and this electrophilic susceptibility makes the functionalization of ketene dithioacetals a convenient tool for the construction of diverse ketene dithioacetal scaffolds and other useful building blocks. These arylketones are well known for their use as a building block for the synthesis of various pharmaceuticals.(1-8) These are α,β-unsaturated carbonyl compounds with two electron-donating alkylsulafanyl groups on one end and an electron-withdrawing aroyl group at the other end of the double bond, i.e., they are "push-pull" alkenes.		
4913	12215097		أثر ضغوط العمل على الأداء الوظيفي لأعضاء هيئة التدريس ومعاونتهم بجامعة جنوب الوادي/	يس، فريدة صلاح الدين سيف الدين .			2015	من المعروف ان العديد من مركبات النواتج الطبيعية التي تحتوي على حلقة الثيازوليدين والثيوهيدانتوين لها نشاط بيولوجي هام كمضادات للميكروبات والالتهابات والتشنجات والملاريا والايذخ والسرطان والدرن والفيروسات والانتفازا وادوية النسلين والمسككات . في هذه الدراسة الباحث قام بوضع طريقة عامة لتحضير بعض مشتقات الثيازوليدين والثيوهيدانتوين كمركبات لها خواص بيولوجية هامة . اولا تحضير بعض مركبات الثيازوليدين-4-حمض الكربوكسيل كمخلوط من متشابهين. وتم ذلك عن طريق مفاعلة مخلوط من 1 مكافئ من السستين و 1 مكافئ من بعض الالدهيدات بالغليان وذلك في الميثانول المحمض واعطي كميات ممتازة من النواتج (93-76)%. وفي حالة محلول الفورمالدهيد 40% تم غليان السستين مع زيادة من محلول الفورماليد 6a في مخلوط من الميثانول/الماء (1:1) حيث اعطي 84% من المركب الاساسي للثيازوليدين-4-حمض الكربوكسيل. وعند استبدال الفورمالدهيد ببعض مشتقات البنزالدهيد b-i6 في الميثانول المحمض اعطي مخلوط من متشابهين من 2-ايزل ثيازوليدين-4-حمض الكربوكسيل b-i172 و 171b-i بناتج عال يتراوح بين 76-93 % وكانت نسبة المتشابهين تتراوح من 1.6:1 الى 1:1 ، مخطط 53.		

						في كل الحالات المتشابه الموجود بنسبة أكبر i-171b تكون البروتونات 2H و 4H في نفس الاتجاه بينما المتشابه الأقل تكون البروتونات 2H و 4H في اتجاهين متعاكسين ، مخطط 53. ومن الجدير بالذكر انه لوحظ وجود اثنان عندما يكون المركب في صورة محلول بين المتشابهين i-171b و i-172b وذلك عن طريق الايمين المفتوح-i-174b . حيث انه عند مفاعلة 4-خيتروينزالدهيد6c تم تكوين المتشابه الأكثر171c فقط وتم اثبات ذلك عن طريق تحاليل الرنين النووي المغناطيسي باستخدام المذيب (CDCI3/CD3OD) للمخلوط الناتج من التفاعل. ويترك المحلول لمدة 24 ساعة في درجة حرارة الغرفة تظهر المتشابهين-i-171b و i-172b بنسبة 2:3 . ولوحظ ايضا ان اقصى نسبة للشبيهين-i-171b و i-172b كانت 1:1 وذلك عند ترك المحلول لمدة 48 ساعة في درجة حرارة الغرفة ولم يلاحظ اي تغير في نسب الشبيهين i-171b و i-171b حتى بعد اسبوعين ، الاشكال 14-17. يعتقد ان المتشابه الأكثر i-171b لابد ان يكون في حالة اقتران مع الايمين المفتوح 174 والذي يعاني من هجوم عن طريق مجموعة الثيول من الاتجاه المعاكس ليعطي المتشابه الأقل i-171b ، مخطط 54. وعلى جانب اخر وبمفاعلة المستاتين مع 2-خيتروينزالدهيد 6d يعطي مركب الاوكزازولينون 177 كمركب وحيد بنسبة 46%. ويتركه عند درجة حرارة الغرفة لمدة 48 ساعة يعطي المتشابهين 177 و 175 بنسبة 1:11 على التوالي وعند ترك المركب لمدة اسبوع في المحلول لم يلاحظ اي تغير في نسبة المتشابهين. ومن الهام لفت الانتباه الي ان معدل التحول بين الشبيهين 177 و175 يكون اقل بكثير منه في حالة مشتقات التيازولينين-4-حمض الكربوكسيل. وهذا المعدل البطئ في التحول بين الشبيهين 177 و175 يعتقد ان يكون بسبب الشكل الفراغي للمركب 177 والذي يقلل من مساهمة الالكترونات الغير مشاركة على ذرة النيتروجين N-4 . حيث ان هذه الظاهرة تحدث فقط في حالة 2-خيتروينزالدهيد 6d. اوضحت دراسات الرنين النووي الغناطيسي ان مركبات الاوكزازولينون 177 تظهر اختلاف كبير في السلوك الخاص بالمركب وذلك عند تغيير المذيب المستخدم في تجارب الرنين النووي الغناطيسي. وذلك عند استخدام المذيب (CDCl3/TF4A) وجد ان مركب الاوكزازولينون 177 تفكك ليعطي مخلوط من متشابهين من مركبات التيازولينين i-171b و i-172بنسبة 1:3 على التوالي بالاضافة الي 2-خيتروينزالدهيد6d ، مخطط 56 الشكل 24. قد يكون تكوين المركب 177 تم عن طريق تكوين مخلوط من المتشابهين-i-171b و i-172b والذي بدوره يتفاعل مع جزي اخر من 2-خيتروينزالدهيد 6d ليعطي في النهاية الاوكزازولينون 177. ووضحت دراسات الرنين النووي المغناطيسي ان الشبيه الأقل 172d هو المسؤول عن عملية تكون الحلقة ليعطي الاوكزازولينون 177 وذلك بسبب التراحم الفراغي. وهنا يمكن القول بان هذه النتيجة اعطت دليل اضافي للاتزان الموجود بين الشبيهين الأكثر i-171b والاقل i-172b عن طريق الايمين المفتوح 174 ، مخطط 57.	
4914	12215138		دور الكفاءة الذاتية للعاملين كمستغبر وسيط في العلاقة بين أنماط القيادة السائدة والإبداع الإداري للعاملين :	عبدالله، هابدي محمد نجيب عبدالعال.	2015	تمثلت أهداف الرسالة في :- التعرف على طبيعة العلاقة بين الأنماط القيادية وبين الإبداع الإداري للعاملين بجامعة جنوب الوادي، والتعرف على طبيعة العلاقة بين الكفاءة الذاتية وبين الإبداع الإداري للعاملين بجامعة جنوب الوادي، وتحديد ما إذا كان هناك دور للكفاءة الذاتية كمستغبر وسيط في العلاقة بين أنماط القيادة والإبداع الإداري للعاملين بجامعة جنوب الوادي، وكذلك تقديم التوصيات التي يمكن لجامعة جنوب الوادي الاستفادة بها في تطوير الأنماط القيادية بها وخاصة التي يكون لها دور في تحقيق الإبداع الإداري للعاملين، وأخيراً تقديم دليل إرشادي مقترح للمساعدة في تنفيذ تلك التوصيات. ولتحقيق هذه الأهداف، طبقت الباحثة الدراسة على عينة مقدارها (383) مفردة، وتمثلت وحدة المعينة في العاملين الإداريين بالجامعة محل الدراسة. وقد توصلت الدراسة إلى العديد من النتائج، كان من أبرزها:- وجود علاقة إيجابية ذات دلالة إحصائية بين أنماط القيادة والإبداع الإداري - وجود علاقة إيجابية ذات دلالة إحصائية بين نمط القيادة المهتم بالمشاعر والإبداع الإداري - وجود علاقة إيجابية ذات دلالة إحصائية بين نمط القيادة المهتم ببيئة المهام والإبداع الإداري - وجود علاقة إيجابية ذات دلالة إحصائية بين الكفاءة الذاتية والإبداع الإداري - وجود دور الكفاءة الذاتية كمستغبر وسيط تفاعلي في علاقة أنماط القيادة بالإبداع الإداري - وجود دور الكفاءة الذاتية كمستغبر وسيط تفاعلي في علاقة نمط القيادة المهتم بالمشاعر بالإبداع الإداري - وجود دور الكفاءة الذاتية كمستغبر وسيط تفاعلي في علاقة نمط القيادة المهتم ببيئة المهام بالإبداع الإداري -	
4915	12215165	Lung- Protective Ventilation May Improve Postoperative Oxygenation/	Mostafa• Asmaa Mohamed .		2015	Anesthetists manage patients with both normal and injured lungs in the perioperative setting. The incidence of pulmonary complications after non-cardiac surgery is comparable with that of cardiac complications (2.7% vs. 2.5%, respectively).(1) Pulmonary complications, specifically respiratory failure requiring ventilation, are associated with high morbidity and mortality, increased costs, and length of hospital stay. Normal lungs need protection from multiple potentially injurious factors including, but not limited to, cardiopulmonary bypass (CPB), sepsis, trauma, lung ischemia–reperfusion, and blood product transfusion. Injured lungs need protection from ongoing injury. Anesthetic management, particularly mechanical ventilation, can influence the extent and course of perioperative lung injury More than 230 million of patients undergoing general anesthesia for major surgery require mechanical ventilation annually worldwide.(2) It has been reported that 5% to 10% of all surgical patients and up to 30% and 40% of those undergoing thoracic or abdominal surgery develop postoperative pulmonary complications.(3) Postoperative pulmonary complications adversely affect clinical outcomes and healthcare utilization, so that prevention has become a measure of the quality of perioperative care.(4)Mechanical ventilation is an essential supportive therapy to maintain adequate gas exchange during general anesthesia for surgery. Intraoperative mechanical ventilation Historically, anesthetists ventilate patients in the perioperative period with relatively large tidal volumes. Volumes as high as 15 ml/ kg ideal body weight have been suggested to avoid intraoperative atelectasis This far exceeds normal spontaneous tidal volumes (6 ml kg-1) common to most mammals.(6) The concept of lung protective ventilation using low VT ventilation was popularized by the publication of two landmark acute respiratory distress syndrome (ARDS) studies in the New England Journal of Medicine.(7,8) The ARDS Network low tidal volume study,(7) which combined a VT of 6 mL/kg predicted bodyweight and plateau pressure of no more than 30cmH2O, demonstrated a 22% reduction in mortality and a greater number of ventilator free-days in contrast to patients treated with traditional VT.	

4916	12215262		Neurophysiological changes in Diabetic patients with neuropathy/	Abdellah, Reham Ahmed .		2014	Diabetic neuropathy (DN) is the most common and troublesome complication of diabetes mellitus, leading to the greatest morbidity and mortality and resulting in a huge economic burden for diabetes care (Vinik et al, 1995). It is the most common form of neuropathy in the developed countries of the world and accounts for more hospitalizations than all the other diabetic complications combined, and is responsible for 50-75% of non-traumatic amputations (Holzer et al, 1998).Diabetic neuropathy (DN) is a set of clinical syndromes that affect distinct regions of the nervous system, singly or combined and it may be silent and go undetected while exercising its ravages; or it may present with clinical symptoms and signs that, although nonspecific and insidious with slow progression, also mimic those seen in many other diseases, therefore, diagnosed by exclusion (Herman et al, 2005).Neurologic complications occur equally in type 1 and type 2 diabetes mellitus and additionally in various forms of acquired diabetes (Dyck et al, 1993). Diabetic neuropathy also has a tremendous impact on patients' quality of life predominantly by causing weakness, ataxia and incoordination predisposing to falls and fractures (Vinik et al, 2005). Once autonomic neuropathy sets in, life can become quite dismal and the mortality rate approximates 25-50% within 5-10 years (Levitt et al, 1996). Definition Diabetic neuropathy is defined as the presence of symptoms and/or signs of peripheral nerve dysfunction in people with diabetes after the exclusion of other causes. A careful clinical examination is needed for the diagnosis, since asymptomatic neuropathy is common. A minimum of two abnormalities (symptoms, signs, nerve conduction abnormalities, quantitative sensory tests or quantitative autonomic tests) are required for diagnosis and, for clinical studies, one of these two abnormalities should include quantitative tests or electrophysiology (Boulton et al, 2004).		
4917	12215548		Intraperitoneal Administration of Local Anesthetics in Laproscopic Surgery/	Ahmed, Mostafa Ashraf .		2015	Intraperitoneal instillation of local anesthetics is a simple method of analgesia and should considered in addition to other morphine sparing analgesics such as NSAIDs, acetaminophen and incisional local anesthetics (1,2). Data from a nationwide survey in the UK of anaesthesia for gynaecological laparoscopy revealed that local anaesthetic solutions are administered commonly, particularly into the wound and the peritoneal cavity(3) For this type of ambulatory surgery and anaesthesia, the main advantage or using local anaesthetics is that they do not have the adverse effects of opioids which may delay recovery and discharge from hospital. These effects include postoperative nausea, sedation, (4) impairment of return of gastrointestinal motility, and pruritis. In addition, time to return of bowel function in the postoperative period may be reduced when the use of opioids is obviated by administering local anesthetics (5).Local anesthetics have been administered into the peritoneal cavity during minimally invasive procedures, such as laparoscopic cholecystectomy and gynecological laparoscopy for sterilization and diagnosis(6) in addition to open abdominal procedures, such as total abdominal hysterectomy.(7-9) The rationale for this route of administration is that the peritoneum is exposed to block of visceral nociceptive conduction, thereby providing an additional mechanism of analgesia. However, absorption from the large peritoneal surface may also occur, and may be a further mechanism of analgesia. Nonetheless, pain after laparoscopy may be moderate or even severe for some patients, and may require opioid treatment. Interestingly, the type of pain after laparoscopy differs considerably from that seen after laparotomy. Indeed, whereas laparotomy results mainly in parietal pain (abdominal wall), patients complain more of visceral pain after operative laparoscopy(10) Finally, shoulder pain secondary to diaphragmatic irritation as a result of CO2 pneumoperitoneum is a frequent postoperative observation after laparoscopy (35% to 60%) (11,12)Moreover, because of the pathophysiologic changes of renal blood flow induced by pneumoperitoneum, the safety of preoperative administration of NSAIDs may be questionable.(13)		
4918	12215555		Prevalence of Hepatitis B & C Viruses Infections Among Children Attending Qena University Hospital<br/	Abu-El Kasem, Safaa Mohammed .		2014	Hepatitis B and C are amongst the world's greatest infectious disease health problems (Shepard et al., 2005). Egypt is considered to be a region of intermediate prevalence for hepatitis B virus (HBV) infection, with a reported prevalence of 6.7% for hepatitis B surface antigen (HBsAg) (Lehman et al., 2009). Egypt also has an extremely high rate of hepatitis C virus (HCV) infection, with 14.7% of the population being seropositive for antibodies, and 9.8% positive for RNA (El-Zanaty et al., 2009).Blood transfusion is the principal route of transmission of HCV in children (Irshad et al., 2002). Recent evidence suggests that new cases are due to perinatal (vertical) transmission (Bortolotti et al., 1998). Although blood transfusion, circumcision, vertical transmission, and living in a house with an infected family member are the established risk factors for HCV transmission, approximately 70% of acquired infections are due to unidentified risk factors (Habib et al., 2001). A recent study of intrafamilial transmission showed that the incidence of offsprings to acquire HCV from anti-HCV–positive parents is slightly higher (incidence rate of 8.7/1000' per year) in the positive mother than in the anti-HCV positive father (6.6/1000) (Mohamed et al., 2005).		

							Acute infection is rarely recognized in children outside special circumstances and most chronically infected children are asymptomatic and frequently with normal or borderline Alanine Transaminase (ALT) value (Mohan et al., 2007). Although the natural history of HCV infection acquired in children seems benign in the majority of instances, the infection takes an aggressive course in a proportion of cases leading to cirrhosis and end-stage liver disease during childhood and even hepatocellular carcinoma (Strickland et al., 2000).		
4919	12215659	INVESTIGATIONS OF THE HAEMATO-BIOCHEMICAL AND PATHOLOGICAL CHARACTERISTICS OF THE CLINICAL MANGE IN CAMELS (Camelus dromedaries) IN ASWAN GOVERNORATE/	Ali, tsam Fathy Mohammed			2015	The current study was carried out on fifty five apparently healthy post hatching Muscovy ducks of both sexes ranging from 1-60 days old. They were divided according to their age into 5 groups. - The length of the stomach formed nearly 1.5 fold at 15 days old and 3.5 folds at 60 days old, while the weight formed nearly 4.5 folds at 15 days old and 29 folds at 60 days old when compared with that at one day old. - In all studied ages, the proventriculus length formed 42.7-47.7 % and the gizzard length 52.2-57.2 % of the total length of the stomach. While proventriculus weight formed 8.5-12.9% and gizzard weight 86.6- 91.4% of the total weight of the stomach. -The proventriculus began cranially opposite to the level of the cranial end of the liver at 1-15 days old, but in front of this level at 30 and 60 days old, it terminated caudally in front of the caudal end of the left lobe of the liver by a variable distances dependent on the age of the bird. The interior structure of the proventriculus had 4 thin longitudinal folds at one day old which became thicker and separated by grooves with the advancement of age. Moreover, at 15 days old, fine openings of the proventricular glands could be observed. At 30-60 days, these openings became numerous, oval or round in shape and uniformly distributed. - The esophago-proventricular junction was characterized internally by few faint longitudinal folds at one day old. With advancement of the age, 8-9 longitudinal folds could be distinguished. -The proventricular-gizzard junction distinguished externally dependent on its diameter at 1-7 days old, but up to 15 days old depending on its color in addition to its diameter. Scanning electron microscopical findings revealed that the demarcation between esophagus and proventriculus was recognized at one day old, became more obvious at 15 days old and was distinct at 60 days old. -The gizzard extended from the level of 4th intercostal space to terminate behind the last rib at a variable distances dependent on the age of the duck. - With the advancement of the age, the distance between the two blind sacs of the gizzard increased. While the ratio of their height to that of the gizzard decreased. - The gizzard lumen in all studied ages, appeared nearly S-shaped in the dorsoventral section through thick muscles of the gizzard and nearly rectangular surrounded in both sides by semi ellipsoid thick muscles in the dorsoventral section through the thick muscles and tendinous center.		
4920	12215822	Electrochemical studies on the corrosion behavior of electrodeposited Zn-Co-Fe alloy/	El-Sheref, Fatma El Zhraa Ali Hassan.			2014	The thesis is organized into the following chapters: Chapter (1) presents an introduction to the fundamental aspects of electrodeposition and corrosion of alloys. Chapter (2) presents a literature survey on the binary Zn-Co, Zn-Fe alloys and ternary Zn-Co-Fe alloys. Chapter (3) investigates the experimental ways used in the thesis. Chapter (4) investigates the results and discussion of the electrodeposition and corrosion of zinc and zinc alloys from a sulfate bath on steel substrate, corrosion behavior of zinc and zinc alloys electrodeposited galvanostatically on steel substrate and using of different substrate material types. Chapter (5) studies the influences of operating parameters, such as current density, deposition potential, deposition time, metal ion concentration and pH value for deposition of Zn-Co-Fe alloy. Chapter (6) presents the references of this thesis. Chapter (7) presents the summary and conclusion of this thesis. 1. ELECTRODEPOSITION Electrochemical deposition is called electrodeposition, electroplating or simply plating. Its extensive applications lie both in engineering and decorative purposes. Zn alloys are one of the most widely used in electronic and other industry. The main focus of this thesis is on morphology, structure and corrosion resistance of electrodeposited Zn and Zn alloys. In order to achieve a deposit with optimum morphology, structure in terms of corrosion resistance, it is imperative to understand the basic electrochemical fundamentals of electrodeposition. Electroplating is performed in a liquid solution, called an electrolyte, otherwise referred to as the "plating bath". The bath is a specially designed chemical solution that contains the desired metal (such as zinc, cobalt, or iron) dissolved in a form of submicroscopic metallic particles (positively charged ions). In addition, various substances (additives) are introduced into the bath to obtain smooth and bright deposits. The object that is to be plated is submerged into the electrolyte (plating bath). Usually placed at the center of the bath, the object that is to be plated acts as a negatively charged cathode. The positively charged anode(s) completes the electric circuit; those may be at opposite edges of the plating tank, thus causing film deposit on both sides of the cathode. A power source in the form of a battery or rectifier (which converts ac electricity to regulated low voltage dc current) is providing the necessary current.		

			يهدف البحث الحالي إلى :- تصميم برنامج تدريبي للتنمية العضلية المتوازنة لتحسين أو تطوير المستوى الرقمي لثنائي الوثب الطويل وتأثيره على بعض المتغيرات البدنية والمستوي الرقمي لثنائي الوثب الطويل تحت 18 سنة، واستخدم الباحث المنهج التجريبي الذي يعتمد على القياس القبلي والقياس البيني والقياس البعدي للمجموعة التجريبية الواحدة ، وقد أجرى البحث على عينة قوامها (10) متسابقاً منهم (7) متسابقين كعينة أساسية، و(3) متسابقين للدراسة الاستطلاعية. وقد أظهر هذا البحث تأثيراً إيجابياً على تنمية التوازن العضلي لكلاً من العضلات (العاملة والمقابلة) على جميع مفاصل الجسم وقد أظهر هذا البحث تأثيراً إيجابياً على المدى الحركي (المرونة) والقوة العظمى لجميع المفاصل وذلك بزيادة معدلات النمو بين متوسط القياس القبلي والبيني والبعدي لأفراد عينة الدراسة وقد أظهر هذا البحث تأثيراً إيجابياً على مستوى السرعة القصوى والقدرة العضلية للرجلين والتوافق وذلك بزيادة معدلات النمو بين متوسط القياس القبلي والبيني والبعدي لأفراد عينة الدراسة وقد أظهر هذا البحث أن البرنامج التدريبي بالأثقال للتوازن العضلي للقوة العضلية حقق التوازن العضلي للقوة العضلية بين العضلات (العاملة – المقابلة) للطرف العلوي والطرف السفلي لمتسابقين الوثب الطويل وقد أظهر هذا البحث أن تنمية التوازن العضلي تؤدي إلى الارتقاء بمستوى الأداء المهارى لمتسابقين الوثب الثلاثي والمتمتلئة في الاختبارات المهارية وقد أظهر هذا البحث أن وضع تدريبات الإطالة والمرونة ضمن البرنامج التدريبي أدى إلى تنمية المدى الحركي	2015			تأثير برنامج تدريبي للتنمية العضلية المتوازنة في بعض المتغيرات البدنية على المستوى الرقمي لثنائي الوثب الطويل / محمّد ، أسامة أبو المجد أحمد .	12215948	4921
			عاش جيل الأجداد لفترة طويلة حياة قوامها الحركة والنشاط وفرضت عليهم ظروف الحياة الشاقة آنذاك أعمالاً مهنية وبدوية وحركة دائية لكسب حاجاتهم الغذائية وتوفير متطلبات حياتهم، وقد أدى ذلك إلى تمتعهم ببيئة بدنية ومها ارت بدوية عالية ساعدتهم على الوفاء بمتطلبات الحياة. وعلى النقيض شهد جيلنا تطوراً حضارياً وعلمياً وتكنولوجيا تبعه تغيّرات واضحة في أنماط الحياة، أدى إلى انخفاض حجم الطاقة المبذولة لمواجهة الاحتياجات اليومية وواكبه الاعتماد على الآلة وتسريع حركة الحياة دفع الإنسان إلى السكن الحركي لفت ارت طويلة قترهل جسده مما أفقد العمل قيمته المعنوية والابتكارية التي يوفرها العمل البدوي. وتعد السمنة من المشكلات الصحية التي بدأت تزايد باستمرار على مستوى العالم وتؤدي إلى العديد من المشاكل الطبية والرجحية مثل ارتفاع ضغط الدم وأمراض الشرايين التاجية والأختناق أثناء النوم وتآكل المفاصل وآلام الظهر والتهاب المفاصل وزيادة معدل حدوث سرطان الثدي والبروستاتا والقولون وغير ذلك، ولمعرفة مدى ارتباط السمنة وضع العلماء مؤشر كمقياس كتلة الجسم ، وهو يساوي الوزن بالكيلوجرام مقسوماً على مربع الطول بالمتر، ويتراوح مؤشره الطبيعي بين ٢٠ و ٢٧ كجم . يهدف البحث إلى تصميم برنامج تمرينات هوائية باستخدام البيئة الساحلية على إنقاص الوزن لدى الرجال المصابين بالبدانة وذلك من خلال التعرف على: مدى تأثير ممارسة التمرينات الرياضية على إنقاص الوزن ومؤشر كتلة الجسم لدى الرجال المصابين بالبدانة. التعرف على مدى تأثير ممارسة التمرينات الرياضية على قياس محيطات الجسم ونسبة الدهون لدى الرجال المصابين بالبدانة. فروض البحث : Hypotheses ١. توجد فروق دالة إحصائية بين القياس القبلي والبعدي في إنقاص الوزن ومؤشر كتلة الجسم. ٢. توجد فروق دالة إحصائية بين القياس القبلي والقياس البعدي في قياس محيطات الجسم. ونسبة الدهون. الإستنتاجات:- اعتماداً على ما توصل إليه الباحث من نتائج في حدود عينة البحث والمنهج المستخدم وفي ضوء معالجته الإحصائية لهذه البيانات وفي نطاق أهداف البحث تمكن الباحث أن يستخلص من خلال المناقشة وتفسير النتائج الإستنتاجات التالية: ١ إن التمرينات الهوائية داخل الماء وعلى الشاطئ ذات تأثير إيجابي على المجموعة التجريبية في إنقاص الوزن. ٢ إن التمرينات الهوائية داخل الماء وعلى الشاطئ ذات تأثير إيجابي على المجموعة التجريبية في إنخفاض قياس المحيطات بالجسم. ٣ تأثرت نسبة الدهون بالجسم نتيجة لممارسة التمرينات الهوائية على الشاطئ وفي الماء ٤ إنخفاض مؤشر كتلة الجسم. ٥ أداء التمرينات الرياضية خارج الصالات الرياضية أضافت باباً من التنوع والتجديد في البرنامج الحركية. الباستنتاجات:- في ضوء النتائج التي توصل إليها الباحث في موضوع بحثه يوصي الباحث بما يلي : ١ تطبيق البرنامج قيد البحث وتعميم استخدامه في مراكز التأهيل والعلاج الطبيعي في المدن الساحلية كنوع من التجديد وكسر حاجز الملل والروتين خاصة للمصابين الذين يشعرون من إنقاص وزنهم. ٢ نشر الوعي الصحي بين أفراد المجتمع على كيفية الحد من البدانة بوضع ملصقات والنشرات والإعلانات ومحاضرات تثقيفية والبرنامج التثقيفي - الاستمراري في أداء تمرينات الرياضية حتى بعد انتهاء البرنامج الأماري. ٤ ضرورة التعليم والتثقيف على أهمية التمارين الرياضية المنتظمة للمصابين بالبدانة واكتساب الصحة العامة. ٥ - ٥ الاستعانة ببرنامج غذائي خاص (حمية غذائية) بجانب التمرينات الهوائية لإنقاص الوزن بفاعلية أكبر. ٦ الاهتمام بعلاج البدانة مبكراً لتجنب الوصول إلى أمراض مزمنة وإصابات ناتجة عن زيادة نسبة الشحوم بالجسم وزيادة وزن وكتلة الجسم الواقع على الجهاز الهيكلي وذلك لمختلف فئات المجتمع وفق طبيعة عملهم ومارسهم السنية.	2015			بغداد ، محمد ثابت إسماعيل. تأثير برنامج تمرينات هوائية في البيئة الساحلية لإنقاص الوزن على المصابين بالبدانة للفئة العمرية (25 سنة) /	12216490	4922

						السعي لاجراء بحوث مشابهة والتي يتناول فيها تأثير التمرينات الهوائية في البيئة الساحلية - ٧ على المصابين بالبدانة ولكن على ماحل عمرية أخرى وفي جميع الجوانب الفسيولوجية والبدنية والنفسية.
4923	12217863	السلوك القيادي وعلاقته بالذكاء الوجداني لدى مديري المدارس الابتدائية بالكويت/	الهجري، سارة على بداح .		2015	يعتبر الذكاء الوجداني من المفاهيم التي ظهرت مؤخرًا في التراث النفسي ، وتعددت الرؤى والاتجاهات التي فسرتها نتيجة لإختلاف الباحثين في تحديد هذا المفهوم فهناك من يرى أن الذكاء الوجداني ينتمي إلى ميدان القدرات العقلية ومنفصل عن سمات الشخصية وهو الاتجاه الذي تبناه كل من سالوفي وماير، وهناك من يرى أن الذكاء الوجداني هو سمة من سمات الشخصية وهو الاتجاه الذي تبناه جولمان، وهناك اتجاه ثالث يؤكد على أن الذكاء الوجداني يتكون من قدرات وجدانية معرفية وليست معرفية خالصة ويمثل هذا الاتجاه بارون. وتشهد كثير من الدراسات على أن من لديهم مستوى متميز من الذكاء الوجداني هم أنفسهم الذين نراهم متميزين في كل مجالات الحياة وهم الأكثر إحساسًا بالرضاعن أنفسهم، والتميز بالكفاءة في حياتهم وفي أعمالهم (دانيل جولمان، ٢٠٠٤، ٥٨). كما يؤكد جولمان(١٩٩٨) أن الأفراد ذوى الذكاء الوجداني المرتفع يتصفون بالقدرة على أداء أعمال تنصف بالتميز والتفرد مما يدفع إنتاجهم الإبتكاري قفًا إلى الأمام ، وهذا ما اكتنه العديد من الدراسات مثل دراسة ماير وآخرون (٢٠٠١) ، وعبد المنعم الدردير (٢٠٢٠). مشكلة الدراسة:- يمكن بلورة مشكلة الدراسة الحالية في محاولة الإجابة على التساؤلات الآتية: ١ هل توجد علاقة ارتباطية ذات دلالة إحصائية بين درجات السلوك القيادي بأبعاده المختلفة و درجات الذكاء الوجداني لدى مديري المدارس الإبتدائية بالكويت ؟ ٢ هل توجد فروق ذات دلالة إحصائية في متوسطات إجابات أفراد عينة الدراسة على - مقياس السلوك القيادي لدى مديري المدارس الإبتدائية بالكويت تعزى لمتغيرا ت (العمر، المؤهل العلمي، سنوات الخبرة الإدارية، الدورات التدريبية)؟ ٣ هل توجد فروق ذات دلالة إحصائية في متوسطات إجابات أفراد عينة الدراسة على - مقياس الذكاء الوجداني لدى مديري المدارس الإبتدائية بالكويت تعزى لمتغيرا ت (العمر، المؤهل العلمي، سنوات الخبرة الإدارية، الدورات التدريبية)؟أهداف الدراسة تهدف الدراسة الحالية إلى التعرف على طبيعة العلاقة بين السلوك القيادي و الذكاء الوجداني لدى مديري المدارس الإبتدائية بالكويت، كما تهدف الدراسة إلى الكشف عن الفروق بين متوسطات استجابات أفراد عينة الدراسة في السلوك القيادي وفقًا لمتغيرات العمر، المؤهل العلم ي، سنوات الخبرة الإدارية، الدورات التدريبية، أيضًا تهدف الدراسة إلى الكشف عن الفروق بين متوسطات استجابات أفراد عينة الدراسة في الذكاء الوجداني وفقًا لمتغيرات العمر، المؤهل العلمي، سنوات الخبرة الإدارية، الدورات التدريبية . أهمية الدراسة تعزى أهمية الدراسة الحالية للآتي: ١- تناولها لإحدى موض وعات الإدارة المدرسية التي ترتبط ارتباطًا وثيقًا بالإدارة التربوية - وهو السلوك القيادي لمديري المدارس الإبتدائية بالكويت ، مما يساعد على محاولة توجيه السلوك القيادي وتطوير القادة التربويين في كافة مراكز القيادة في العملية التعليمية من الإدارات العليا والوسطى والدنيا وبما فيها الإدارة المدرسية للاستفادة من ذلك وجعلها ايجابية وفاعلة في تطوير الإدارة التربوية ، بحيث يكونوا مبدعين وذوى آفق واسع . ٢- كما تأتي أهمية الدراسة من تناولها لأحد متغيرات الشخصية الإنسانية ألا وهو الذكاء الوجداني والذي يلعب دورًا مهمًا في سلوك الفرد وفي تكيفه ومواجهته للضغوط النفسية ، وكذلك يؤدي إلى النجاح في الحياة ، وله دور فعال في التحكم في المظاهر السلوكية وإدارتها وكيفية التواصل مع الآخرين، ومساعدة الأفراد في مواجهة التغيرات الاقتصادية والثقافية والبيئية التي يصعب مواجهتها باستخدام القدرات العقلية فقط . ٣- تستهدف الدراسة مديري المدارس وهم فئة لا تحظى بالاهتمام البحثي السيكولوجي بالرغم من أنها على رأس العمل ومخولة بقيادة الآخرين ومسئولة عن تطبيق المعايير القومية للتعليم بهدف الإصلاح والتحسين المدرسي والتأهيل للحصول على الاعتماد للمدرسة . ٤- ندرة الدراسات التي تناولت السلوك القيادي وعلاقته بالذكاء الوجداني في العالم العربي ٥- بسفة عامة والمجتمع الكويتي بصفة خاصة في حدود علم الباحثة. يمكن أن تكون لهذه الدراسة إضافة معرفية للمكتبة العربية ،ويمكن أن تكون لها - اكتمالأت ايجابية على الميدان الإداري التربوي بتوفير أساس سليم لتعديل ممارسات وأنماط السلوك القيادي لمديري المدارس بما يعزز علاقتهم الوظيفية بالمعلمين والطلاب ، ويوفر سبل نجاح العملية الإدارية والتعليمية. ٦- في ضوء نتائج هذه الدراسة أيضا يمكن إعداد برامج تدريبية وارشادية لمديري المدارس الإبتدائية لتساعدهم على تنمية الذكاء الوجداني لديهم وتعزيز السلوك القيادي الإيجابي ٧- يمكن أن تفيد الدراسة الحالية القيادات العليا وصانعي القرار لإتخاذ التدابير ومعالجة الصعوبات التي تعيق تطبيق الأنماط القيادية الإيجابية لدى مديري المدارس الإبتدائية.

4924	12218076	Study on the effect of the grain size on the activity concentration of soil, phosphate and building materials samples/	Ali· Sahar Elnobi Ibrahim.			Studies on environmental radiation levels and radionuclide distributions in the environment are important for several reasons: First, the basic purpose may be a desire to satisfy basic scientific curiosity and gain knowledge and an improved understanding of the world. Second, baseline information on radiation level and radionuclide distributions in the environment is essential in understanding human exposure from natural sources and distinguishing it from man-made contribution. Third, may be to assess the impact of human activities involving radioactivity and radiation on the environment, a process which may require differentiation of natural and anthropogenic sources of radioactivity and lead to assessment of dose from environmental sources (Harb, 2004). Fourth, studies of the dose from these sources and its effect on health impose the understanding of radiation damage. Fifth, the accumulation of data on radiation levels of a specific region is also essential in establishing rules and regulations relating protection. Last, our knowledge of the natural radiation levels serves as a historical record of the environment's quality and provides a reference database for future use, e.g. for epidemiological studies (Ebaid, 2001). Radiation is with us all the time. We are radioactive. We ingest appreciable amounts of radioactive ⁴⁰K (potassium – 40) and ¹⁴C (Carbon-14, or radiocarbon), as well as minute amounts of radioactive uranium, thorium, tritium, polonium and radium. We inhale radioactive ²²²Rn and the radon daughters, other naturally occurring radioactive gases and particulates, and small amounts of radioactive materials present in the atmosphere from nuclear weapons use and testing of decades ago. In addition, we are bombarded by cosmic rays, and we receive radiation from the ground, consumed products such as smoke detector, color television and other sources. Medical x – ray may be of importance too (Douglas, 1990). After the discovery of radioactivity in 1896 by A. H. Becquerel (Allisy,1996) the science of radioactivity has been extensively studied. Radionuclides are the sources of radioactivity and emit nuclear radiations which have become a part of our daily lives. The most common forms of ionizing radiation are alpha particles, beta particles and gamma rays (Lilley, 2001). The unit of activity is the Becquerel. One Becquerel (Bq) represents one disintegration per second. The reference unit of activity is the Curie (Ci); 1 Curie is equivalent to 37 Giga becquerels and fairly close to the activity of 1 gram of radium (Draganic et al. , 1993). Every person on earth is exposed to natural radiation. The most important source of radiation is radon gas ²²²Rn (United Nation Scientific Committee on the Effects of Atomic Radiation (UNSCEAR, 1977 report). In the past, many names have been given to such materials, such as Technologically Enhanced Naturally Occurring Radioactive Materials (TENORM) and Low Specific Activity (LSA) but now are more generally described as NORM (IAEA, 2006). Radioactivity may be defined as spontaneous nuclear transformation that results in the formation of new elements. These transformations are accomplished by one of several different mechanisms, including alpha particle emission, beta particle and positron emission and orbital electron capture. Each of those reactions may or may not be accompanied by gamma radiation.	
4925	12218400	التربية الوقائية في الفكر التربوي الإسلامي وكيفية الاستفادة منها/	محمد، نها موسى أنس.		2015	يمكن النظر إلى التعليم والدور الذي يمكن أن تلعبه في المجتمع في اتجاهين رئيسيين: دور وقائي من التعليم والعلاجي دور التربية والتعليم. دور وقائي من التعليم هنا يأتي في البداية، لذلك يختلف تماماً عن الدور العلاجي التربوي والتعليم والتي تأتي بعد وقوع المشكلة وتتميز التربية الإسلامية من خلال نهجين كبيرين. واحد منهم هو قدمت في التنقيف الوقائي، من خلال اتخاذ الاحتياطات والتدابير القانونية التي حماية من الوقوع في الخطأ، ومنع من تدهور الأكاذيب الباطلة والأخرى في التعليم العلاجي، والتي تأتي بعد الوقوع في الخطأ والوقوع في الجفوة في باهظة وتسعى التعليم الوقائي لتشكل الإنسان الذي لديه> سوف مستقلة غير تابعة لإرادة الآخرين. الرجل الذي غير قادرة على<التمييز بين ما هو ضار له ولمجتمعه، وما هو مفيد له ومجتمعه، الرجل الذي لديه التفكير النقدي، أن يجعله قادراً على توفر البدائل، والبدائل لانتقاد أكثر مفيدة وقيمة عالية، على الشخصية أو المستوى الاجتماعي. الرجل الحريص على البيئة الطبيعية والاجتماعية، ويعامل بوعي للاستثمار وتطوير في وإضافة إلى أن يكون مشاركاً فعالاً في تحسين ما تنطوي عليه هذه متغيرات المخاطر والاستفادة من الذي يعطيه الخير. لذلك تأتي الدراسة الحالية أن تكون محاولة متواضعة لشرح ضرورة وجمعية التنقيف الوقائي الإسلامي والحاجة الملحة لتكون تدرج في مختلف المؤسسات التعليمية. مشكلة الدراسة بسبب زيادة في مشاكل متكررة الأخيرة والاجتماعية، صحة<الأزمات التي تهدد حياة الإنسان ومستقبله. لذلك ارتفعت الداءات <المؤتمرات الدولية التي عقدت لطرح هذه المشاكل ووضع التشريعات <قوانين لحلها. ومع ذلك، فإن القوانين والتشريعات لم تكن قادرة على تحقيق الغرض المقصود ويشرح Yaken أن الكثير من المشاكل التي تظهر على الساحة الناجمة عن نوع خاطئ من الناحية العملية، لأنه لا يهتمون الوقاية من المشاكل التي يمكن تجنبها إلى عنوان، ولكن ل التصدي لها بعد ظهورها والتطور. Alhaddry يضيف أن "السبب الأزمات التي لحقت بها أمتنا في مجالات الحياة العامة، وخاصة في الحقل التعليمي، هو إهمال الجانب الوقائي، حيث الأمور أن تترك حدث عينا حتى يقع الخطأ، وعندما الخطأ وقعت نحن سارع تصل للبحث عن العلاج الذي أصبح يكلف مرتين أكثر مما يمكن أن يكلف الجانب الوقائي من هنا ويمكن أن يكون حاجة ملحة لاتخاذ الوقائي والتدابير التربوية للحد من هذه المشاكل والأزمات، ومعالمتهم. لذلك أصبح التنقيف الوقائي على وجه الاستعجال والضرورة ل<هو الشخصية التي قادرة على حماية نفسها من الوقوع في اهيمن مختلفة<أنواع التي تقود الفرد إلى تراجع في الانحراف والتدمير الذاتي>أسئلة الدراسة:1-ما هو مفهوم التنقيف الوقائي، وأهميتها والأسس التي بناء عليها؟2-ما هو مفهوم التنقيف الوقائي في تربية الإسلاميعتد وما أهدافها وأهميتها والأسس التي على أساس؟<3-ما هي حقول التنقيف الوقائي في تربية الإسلاميعتد؟4-ما هو التصور المقترح لتفعيل التنقيف الوقائي في الفكر الإسلامي من خلال بعض المؤسسات التعليمية؟ الغرض من الدراسة1- التعرف على مفهوم وأهمية التنقيف الوقائي والأسس التي تقوم على 2- التعرف على مفهوم وأهداف وأهمية وقائية>التعليم في أسس الفكر التربوي الإسلامي تحديد مجالات والتنقيف الوقائي في تربية الإسلامية<فكر 4-موضع تصور مقترح لتفعيل التنقيف الوقائي في الإسلامية3- الفكر التربوي من خلال بعض المؤسسات التعليمية<أهمية الدراسة. إبراز دور الفكر التربوي الإسلامي ورعايتها ل

4930	12219161	فعالية برنامج تكاملي للأطفال والآباء والمعلمين لخفض بعض اضطرابات التواصل لدى الأطفال التوحدين/	عليان، هاني شحات أحمد .		2015	نفدت الدراسة الحالية إلى معرفة فعالية برنامج تكاملي للأطفال والآباء والمعلمين لخفض بعض اضطرابات لدى الأطفال التوحدين، وتكونت عينة الدراسة من 21 طفلاً توحدياً، تم تقسيمهم إلى مجموعتين ضابطة وتجريبية كل مجموعة مكونة من 6 أطفال، وتم استخدام الأدوات التالية: مقياس تقدير ذاتية الطفولة (إعداد/عبدالرحيم أحمد البحري وعفاف عجلان، 1222) ، مقياس سموسون المعدل لذكاء الأطفال والكبار (تعريب وتقيين/عبدالرحيم أحمد البحري ، ومصطفى أبوالمجد سميان ، 1222) ، قائمة تقدير اضطرابات التواصل لدى الأطفال التوحدين "صورة الآباء – صورة المعلمين" (إعداد/ الباحث)، برنامج علاجي تكاملي لخفض بعض اضطرابات التواصل لدى الأطفال التوحدين (إعداد/الباحث)، برنامج إرشادي تدريبي لآباء ومعلمي الأطفال التوحدين لكيفية خفض بعض اضطرابات التواصل لدى هؤلاء الأطفال (إعداد/الباحث)، وأشارت نتائج الدراسة إلى فعالية البرنامج التكاملي في خفض بعض اضطرابات التواصل لدى الأطفال التوحدين عينة الدراسة التجريبية. وفي ضوء النتائج المستحصصة توصت الدراسة إلى مجموعة من التوصيات والمقترحات لتحقيق الفائدة العممية والعممية من الدراسة الحالية. يشيد مجال التربية الخاصة انتماء كلياً في الآونة الأخيرة من قبل القائمين على رعاية الأطفال ذوي الاحتياجات الخاصة، نظراً لإيمان المجتمعات بحق هؤلاء الأطفال في الرعاية والاندماج من أجل أن يحيا حياة كريمة مثلاً في أروام العاديين. ولذا تيمم الشعوب المتقدمة بتنمية ثروتها البشرية على اختلاف أنواعها ومستوياتها سواء الأسوياء من ذوي الاحتياجات الخاصة، حيث يعتبر الاندماج بفئات ذوي الاحتياجات الخاصة استمداً لجزء لا يستهان به من أفاد المجتمع. وتعد فئة الأطفال التوحدين أحد فئات التربية الخاصة التي بدأ الانتماء والعناية بها بشكل ملحوظ في الآونة الأخيرة، نظراً لأن التوحد يعد من أكثر الاضطرابات الثمانية صعوبة وتعقيداً؛ ذلك لأنه يؤثر على الكثير من مظاهر النمو المختلفة وبالتالي يؤدي إلى الانسحاب لمدخل، والانعزال على الذات، وهذا من شأنه أن يضعف اتصال الطفل بعالمه الخارجي المحيط به. وأشار الدليل التشخيصي والإحصائي للاضطرابات العقلية الخامس الصادر عن الجمعية الأمريكية لمعطل النفس - (American Psychiatric Association, 2013:50) (إلى أن الأطفال التوحدين يعانون من ضعف في التواصل اللفظي وغير اللفظي ونقص في التفاعل الاجتماعي مع وجود انتماءات ونشاطات نمطية مكررة. ويعاني الأطفال التوحديون من اضطرابات في التواصل تشمل التواصل اللفظي والتواصل غير اللفظي (Noens & Berekelaer-onnes, 2005)، إلى أن: وأشار عبدالله محمد الصبي (9007 : 64) مشكلات التواصل تنتشر بصورة كبيرة لدى الأطفال التوحدين، وبني من أكثر وأهم المشكلات لديهم، ويوجد من المصليين بالتوحد لا يستطيعون التعبير المعقوف، وعندما يستطيعون الكلام تكون لديهم بعض 30% المشكلات في التواصل المعقوف، ومثال على ذلك تأخر النطق وانعدامه، عدم القدرة على التواصل المعقوف مع الآخرين، عدم القدرة على تسمية الأشياء، كميات وجمل بدون معنى، التردد كالبغاء . وتوجد عدة اتجاهات علاجية تستخدم مع الأطفال التوحدين منها: العلاج السموي، العلاج بالفلن، ؛ إيب إريم محمود بنر، : العلاج بالموسيقى، العلاج بالمعب، العلاج المعقوف) سبي أحمد أمين، 9009 : 67 إلى أن الاتجاهات العلاجية للأطفال التوحدين كثيرة : 604 (. وأشارت دلا نعيم السعيد) 9002 : 601 ومعددة، إلا أنه لا توجد طريقة علاج مؤكدة وناجحة مع كل الأشخاص المصابين بالتوحد، لذا فإن من المفيد استخدام آراء من طرق العلاج المختلفة لعلاج الطفل الواحد، كما لا يجب إغفال دور الوالدين والمعلمين وضرورة تدريبهما لمساعدة في البرنامج العلاجي. وفي هذا المحتوى أكد فينكوفيتش (2008 أن أي تدخل علاجي للأطفال ذوي اضطرابات التواصل لابد وأن يشترك فيه الوالدين والمعلمون ؛ لأنهم هم الذين يتعاملون مع بطريقة دائمة، بعد إعطائهم تعميمات لكيفية التدخل ومتابعة العلاج حتى نضمن أن العلاج شمل البيئة الأوسع للطفل.
4931	12219171	حروف الجر بين المعنى والوظيفة في تفسير سورة آل عمران/	مهدي، خديجة فيصل محمد .		2015	وتعتبر حروف الجر واحدة من الأكثر استخداماً على نطاق واسع الأدوات والدور الأكبر في أداء المعاني. وبالإضافة إلى ذلك، فهي مهمة مثل دراسة الأسماء والأفعال، لأنها أجزاء من الكلام. لذلك، والبحث عن المعاني من هذه الرسائل في القرآن هي واحدة من أعظم مقاصد التفاهم و تفسير ذلك. لذلك، تتحدث هذه الدراسة عن دلالات ووظائف العربية والإنجليزية حروف الجر في سورة آل عمران. أيضاً، فإنه يهتم أهمية ترجمة معنى القرآن الكريم إلى كل لغات العالم، لتسهيل فهم المسلمين من غير الناطقين بالعربية، وخدمة لبني جلدتنا الناطقة باللغة الإنجليزية. بالإضافة إلى العمل، وقول رسول الله "قد وقال: "السلام عليكم ورحمة الله صلى الله عليه وسلم بلغوا (الرسالة) من" أداء حتى لو آية واحدة فقط ". (شيخ البخاري). ومع ذلك، فإننا ندرك أن ترجمة معاني القرآن الكريم مهما كانت الصحيح أنها ستتقصر على أداء المعاني العظيمة التي يحتويها في انه النص القرآني المعجز. ولذلك، تحليل المقارن هو واحد من أفضل طرق لهذه الدراسة، لأنه يهتم بدراسة مكونات لغة. وبالإضافة إلى ذلك، فمن يهتم بدراسة علم الأصوات، morphologysyntax، دلالات والبراغماتية. للسياقات التقابلية تحتل واحدة من اهتمامات اللغويات التطبيقية. هذه الدراسة - (حروف الجر بين دلالات ووظيفة في تفسير سورة آل عمران بين العربية والإنجليزية) - يعني أن طريقة التحليل التقابلي عاد الى اللغويات، والمتخصصين مع الكثير من المنفعة. وقد ساهم هذا الأسلوب لتصنيف لغات مختلفة من العالم لأسر متعددة اللغات، من خلال دراسة دراسة مقارنة

							إلى contrastive.Perhaps واحدة من أهم أسباب تطور ونجاح هذه الأسلوب في الدراسات اللغوية الحديثة هو اهتمام من معلمي اللغة والمنهج التخليبي learners.Contrastive كانت ناجحة في تفسير مشكلة التداخل في مجال تعلم اللغة، والاستفادة منه.	
4932	12219177		خصائص الشخصية القيادية المرتبطة بالتوافق النفسي وفعالية برنامج إرشادي سلوكي لتنميتها لدي طلاب المرحلة الثانوية/ عبد الله، الهام فتحى بغدادي .			2015	طالب في مدرسة ثانوية يمر بفترة تتميز بعدد من المتغيرات كما بوساطة المراهقة، وقال انه طالب في مدرسة ثانوية يمر بفترة تتميز عدد من المتغيرات كما المراقبة بوساطة، أو في حالة عدم الامتثال شخصيا وعاطفيا واجتماعيا ينحرف سلوكه عن المتوسط الشخص السلوك، فنجدهم في حاجة إلى ضبط عواطفهم وتقديمها الى حي الفكر والوجدان والشعور مهارات الخط. تقديم المشورة السلوكية هو وسيلة ل الأساليب الحديثة تعتمد على استخدام نظريات وقواعد التعلم وتشمل مجموعة واسعة من المهنين، والتي تهدف إلى إحداث تغيير إيجابي في بناء السلوك البشري، وخاصة سلوك عدم التوافق. وأشار رمضان عبد الحميد أيضا (2008) أنه يمكن تحقيق التوافق النفسي الاجتماعي للطلاب من خلال ممارسة القيادة الأدوار أو مع زملائه. بسيطة وترتبط بين النقاط السابقة، نجد أن أفضل وسيلة لتحقيق طالية في المدرسة الثانوية الشخصية والاجتماعية والأكاديمية هي ويهدف البرنامج التوافق المشورة السلوكية لتطوير القيادة الشخصية المرتبطة مع خط النفسي. عرض للمشكلة: يمكن تعريف المشكلة في الأسئلة التالية: بين طلاب المدارس الثانوية في الفترة العمرية (15-17 سنة)، واتفاقيهما النفسية؟ 1. ما لم طبيعة العلاقة بين الخصائص الشخصية للقيادة 2. ما هو السلوكية ارشادي فعالية في الخصائص النفسية الشخصية. يرتبط مع القيادة تمثينا مع برنامج التنمية طلبة المدارس الثانوية؟ ثالثا: أهداف الدراسة: وتهدف هذه الدراسة إلى: 1. التعرف على طبيعة العلاقة بين الخصائص الشخصية للقيادة بين طلاب المدارس الثانوية في الفترة العمرية (15-17 سنة)، واتفاقيهما نفسي. 2. التعرف على فعالية برنامج إرشادي سلوكي في القيادة الشخصية. الخصائص المرتبطة خط النفسي مع تطور المدرسة الثانوية طلاب. أهداف الدراسة: أهمية الدراسة هي كما يلي: - أولا: من الناحية النظرية: - 1. طبيعة الفئة العمرية التي تتعامل مع الدراسة الحالية على أنها أكثر دقة مراحل النمو وتتبع من خلالها الإنسان بسبب التغييرات الخاصة بهم جذرية وسريعة على الجوانب التي أثارها الجسدية والعقلية والنفسية والنمو الاجتماعي، و التأثير في المراحل التالية من العمر . 2. وتشمل بعض المواضيع الهامة في مجال علم النفس والصحة النفسية في على وجه الخصوص، كما تهدف إلى معرفة الخصائص الشخصية القيادية المرتبطة القيادة الشخصية النفسية وفقا لطلاب المدارس الثانوية.	

							basic 6.0 based on the Gaussian diffusion equation. This software is developed to predict concentrations of gaseous pollutants (eg. CO, SO2, NO2 and particulates) at a user specified receptor. This thesis contains four chapters, summarized as follows: Chapter one gives a general introduction for air pollutant dispersion models and its applications. Also, necessity and the aim of this study have been presented. In this regard the main aim of this work is restricted to study air pollutant dispersion in urban environment released from a line source with the aid Gaussian model using computer simulation. In this consideration the following have been carried out: 1. Developing a predictive model using computer program designed by the authors using Microsoft Visual basic 6.0 to predict		
4936	12219279	التصور العقلي وأثره على مستوى أداء مهارة الوثب الطويل لرياضي ألعاب القوى بدولة الكويت /	الصليبي، عبد الله ابنيه نزال .		2015	أهم التدريب العقلي بالمجال التنافسي إلى جانب عملية التعلم، في محاولة للتعرف على المشاكل والمواقف التي تواجه اللاعبين، وزيادة ضغوط المنافسة، وتقارب برامج الإعداد البدني والمهاري، والسابق بين الدول في إجازة البطولات العالمية والفوز بالميداليات الأولمبية، واختلف أسلوب تناول الدراسات في الإعداد للمنافسات لأنها توظف للاستخدام قبل الأداء مباشرة، وتضمن عدداً من الاستراتيجيات الإعداد العقلي مثل: التصور العقلي، مهارة تركيز الانتباه، والاستئثار، وممارسات الثقة بالنفس. شهد عام (1890) أولى المحاولات في الربط بين التدريب العقلي والأداء وكانت ذات طبيعة تأملية أكثر منها اعتماداً على التحليل، وهدفت إلى التحكم في الاسترجاع العقلي وقد أصدرت "واشبنورن Washburn" أول كتاب عن مظاهر التصور في الحركة عام (1916) يضم مجموعة من الأفكار أكثر منها حقائق علمية، ولكنها قدمت الأساس لمعظم البحوث بعد ذلك. يتفق كل من أحمد عبد الوافي (1998م)، أسامة أحمد (1998م)، محمد حسن (1997م) على أن التدريب العقلي هو تلك التدريبات المرتبطة بالعمليات العقلية العليا والتي لا يؤدي فيها اللاعب غالباً أداء حركي فعلي والتي تتضمن العديد من الوسائل كالتدريب على الاسترخاء والتدريب على الانتباه والتدريب على التصور العقلي لمحاولة التحكم في الأداء العقلي والحركي للاعب والتي تسهم في التحكم في الفلق والاستئثار والضغوط وكذلك مساعدته على سرعة تعلم واكتساب وإتقان المهارات الحركية وخطط اللعب والإسهام في إعداد اللاعب نفسياً قبل وأثناء وبعد المنافسة الرياضية. (4: 387)، (6: 13)، (36: 18) وينذكر محمد عنبر (1996م) في حين ظهر أول عمل علمي في هذا المجال على يد "جاكيسون Gacbson" عام (1932) حيث أكد على وجود انقباضات عضلية أثناء التصور الحركي من خلال استخدام جهاز الرسم الكهربائي للعضلات (Electromyogram (EMG)، أي أن الصورة العقلية التي تتكون خلال التدريب العقلي تتسبب في بعض الاستجابات الفسيولوجية وقد وضعت بعض المسلمات، منها أن عمليات التفكير ينتج عنها انقباضات في المجموعات العضلية المستخدمة لإنتاج الحركة التي يتم تصورها، وأن الأداء البدني يتضمن درجات من الارتباط بالنشاط العقلي. (43: 85) وظهرت برامج تدريب التصور العقلي أمثال "سير، كونزلي" Syerkonilly و"جايرون" Gauron، و"بنيت، برافيتز" Bennet&Priviatz، ووضعت مبادئ للتطبيق وتحدت الأهداف في تنظيم التوتر العضلي، وتعديل وتغيير الأفكار والاتجاهات السلبية إلى إيجابية، واستخدام الخبرات السابقة في الوصول إلى حالة الأداء المثالية، وتطبيق المهارات العقلية في تطوير الأداء في المنافسة، وعلى الرغم من اتفاق هذه البرامج في الكثير من المكونات، إلا أن هناك اختلافاً واضحاً بين واضعي البرامج فالبعض يركز على الإحياء الذاتي والآخر يدعم الوعي بالجسم. ويؤى أسامة كامل (2000م) أن التصور العقلي أعم وأشمل من عملية التصور البصري Visualization حيث أنه يشمل حواس أخرى إضافية إلى حاسة البصر، مثل السمع واللمس والشم والإحساس الحركي. (10: 316) ويوضح محمد العربي (2001م) أن للتصور العقلي دوراً واضحاً في برامج التدريب العقلي حيث يمثل لب عملية التفكير الناجحة، فالتصور وظيفة معرفية للكائن الحي وعامل أساسي في تطوير المهارات الحركية وتحسين مستوى الأداء، والتصور العقلي عملية شمولية تحمل طابعاً مركباً تشتمل على مكونات بصرية وحركية، لذلك يجب النظر إلى التصور العقلي على أنه أكثر من مجرد الرؤية فهو خبرة في عيون العقل لذلك يفضل استخدام جميع الحواس كلما أمكن ذلك. (31: 208) وأشار موراي Murray (1995م) إلى أن التصور العقلي ما هو إلا تكنيك عقلي يقوم ببرمجة عقل الإنسان لتكوين رد فعل ثم التدريب عليه بواسطة استخدام كل الحواس لخلق أو إعادة خلق الخبرة. (64: 1) وترجع أهمية برامج التصور العقلي إلى أنه لا يقتصر استخدامه على الاشتراك في المنافسة الرياضية، ولكن يستخدم في مجال الحركة بشكل عام وفي مراحل اكتساب المهارات الحركية، ويؤدي دوراً مهماً في عملية التعلم لا تقل أهمية عن الإعداد للمنافسات، وقد بدأ تطبيقه كأحد الأبعاد الرئيسية في المنهاج المدرسي في كل من السويد وأستراليا واحتل خمسة عشرة دقيقة من درس التربية الرياضية. يتفق كل من أسامة كامل (1995م)، عزة خليل (1995م)، محمود بسبوني وباسم فاضل (1994م) على أن التصور العقلي هو "تكرار استرجاع خط سير المهارة الحركية في ذهن اللاعب قبل أن يؤديها وعليه يتقيها من الأخطاء ويصلحها ذاتياً بهدف ترقية هذا الأداء بدون الأداء الفعلي لها. (8: 118)، (8: 26)، (46: 223)			
4937	12219657	Bioremediation of Different Types of Water Using Genus of Chlorella.	Bayoumi+Hani Saber M.A	South Valley University	قنا: 2014	This study was carried out to investigate the bioremediation efficiency of two unicellular green microalgae; Chlorella vulgaris (isolated from sewage water of El-Salhya sewage station, Qena) and Chlorella salina (isolated from lake Marriott). It is also aimed to indicate the efficiency of the same genus Chlorella present in different habitat to remediate different types of water samples (sewage, sea and well), reuse of these water samples in irrigation and cultivation of some economic plants; broad bean (Vicia faba L.) and wheat (Triticum aestivum L.) and to follow the changes that might take place in growth and some related physiological activities of the treated algae and plants. The cells of C. vulgaris and C. salina were inoculated in different mixtures of water samples; sewage (100% sewage wastewater), mixture1 (70% sewage : 30% sea water), mixture2 (70% sewage : 30% well water) and mixture3 (70% sewage : 15% sea : 15% well water). Each alga was inoculated by the concentration of 5%. The changes in physico-chemical characteristics of water samples were estimated prior and after treatment with	#####	Dr. Mostafa M. El-Sheekh Dr. Hamdy R.M. Galal Dr. Abba A.M. Farghl	

							algae as well as the removal percentage after 10 days. The results obtained during this investigation indicated that, water samples were mainly characterized by considerable levels of pH, salinity, BOD, COD, nitrate, ammonia, phosphate, sulphate, bicarbonate, chloride, calcium, magnesium, sodium and potassium. In addition, occurrence of considerable concentrations of heavy metals as Zn, Cu, Mn, Ni, Co, Fe and Cr were also recorded in the water samples. Moreover, the number of total Coli-form bacteria in water samples were determined before and after treatment with algae.		
4938	12219769	دكتوراه	Effect Of Klimadynon and 17 β -estradiol Treatment On Maternal Rats And Their Offspring	Sayed Mohamed-Zeinab Kamal.	South Valley University	قنا:	2015 Cimicifuga racemosa rhizome dry extract used for manufacturing the commercially available products Klimadynon® (CR BNO 1055). Cimicifuga racemosa a member of the buttercup family, is a plant native to the forests of North America, the common name is black cohosh. Estrogens in combination with progestins (Hormone Replacement Therapy (HRT)) helps to prevent the development of pathologies resulting from menopausal include hot flushes, night sweats, difficulty sleeping, reductions in cardiovascular health and enhanced risk for developing osteoporosis and Alzheimer's disease. However, because a greater incidence of breast, endometrial and ovarian cancer has been linked to some forms of HRT increased attention has been placed on finding viable and safe alternatives (natural estrogenic alternatives). The present work aimed to study the effects of klimadynon® (CR BNO 1055 extract) as natural estrogenic alternative and 17 β -estradiol as a reference compound for estrogenicity on maternal rats and their postnatal day 21 immature female youngs (PND21) in order to compare hormonal stimulation from each substance. In this study, eighteen pregnant albino rats and their 48 immature female offspring were used. The dams were assigned to three groups: 1-Control group, composed of six mothers rats and twenty one postnatal day 21 females younges. 2- Klimadynon group, composed of six mothers rats and nineteen PND21. Dams were dosed by gavage from GD7 to GD21 and from PD2 to PD21 with 33 mg/rat/day of Klimadynon® . 3-17 β -estradiol group, composed of six mothers rats and eight PND21. Dams were dosed by gavage from GD7 to GD21 and from PD2 to PD21 with 12.5 μ g/rat/day of 17 β -estradiol.	#####	Sayed Anwar Sayed Hassan Dorreia Abd-Alla Mohamed Zaghloul Hemely Abd-Elshafy Hassan
4939	12220014	ماجستير	AUTOMATIC DETECTION OF HUMAN FACE UNDER DIFFERENT IMAGING CONDITIONS	Khalil Ahmed-Mourad Elsayed	South Valley University	قنا:	2015 Detection of Human faces within images plays an important role in many facial image- related applications such as face recognition/verification, facial expression analysis, pose normalization, and 3D face reconstruction. The performance of these applications is usually to a large degree dependent on accuracy of face detector. Detection of faces is easy for human beings; however, for machines it is not an easy task at all. The difficulty comes from high inter-personal variation (e.g., gender, race), intra-personal changes (e.g., pose, expression), and from acquisition conditions (e.g., lighting, image resolution). Despite the considerable amount of the previous studies on the subject, face detection is not completely solved and it remains a very challenging task. The existing methods need improvements in their accuracy, and a novel robust method that can work under various imaging conditions are required. In this thesis, we propose a new approach that brings us a step closer to this goal. The principal objective of this thesis is to investigate a novel approach toward robust automatic face detector in uncontrolled imaging conditions. We propose an efficient approach that efficiently combines generalized Hough transform by Random decision Forests. Random forests (RF) have become a popular technique for classification, prediction, studying variable importance, variable selection, and outlier detection. There are numerous successful applications examples of RF in a variety of fields, such as object detection, pedestrian detection, and object tracking and action recognition. Random Forests are probabilistically efficient technique that can operate quickly over large datasets.	#####	Ahmed Safwat Abdel Rady . Mahmoud Hassaballah .
4940	12220186	دكتوراه	CHEMICAL AND TECHNOLOGICAL STUDIES ON SWEET SORGHUM	Abazied-Sakina Ramadan	South Valley University	قنا:	2013 The present experiments were carried out at El-Mattana Agriculture Research (latitude of 25.17oN and 32.33o E) Station, Luxor Governorate, Egypt, during 2009 season to evaluate technological characters and chemical composition of juice and syrup of three sweet sorghum varieties (Brandes, Rex and Williams) and compared to G.T. 54-9 sugar cane variety. Also, evaluation the use of juice of the three sweet sorghum varieties as alcoholic fermentation substrate. The obtained results can be summarized as follow: Juice and syrup extraction percentage	#####	Hesham M. Rageh Moustafa F. Aly Maria G. Beshay

								Juice extraction percentage was higher (65.04 %) in G.T. 54-9 sugar cane variety than that in sweet sorghum (54.49, 50.86 and 48.67 %) for Rex, Brandes and Williams varieties, respectively. On the other hand, G.T. 54-9 sugar cane variety had the maximum value (23.20 %) of syrup extraction percentage whereas Rex sweet sorghum variety gave 20.35 % and Brandes gave 19.52 %. Williams variety gave the minimum value (19.17 %). Firstly juice: Total soluble solids It was noticed that juice of G.T. 54-9 sugar cane variety contained the highest value of total soluble solids (21.45 %), while juice of sweet sorghum varieties recorded 19.26, 19.18 and 16.61 % for Williams, Brandes and Rex, respectively.

4942	12225056	ماجستير	EFFECT OF CHEMICAL REACTIONS ON HEAT AND MASS TRANSFER FOR BOUNDARY LAYER FLOW THROUGH POROUS MEDIA ALY•ABDELRAHEEM MAHMOUD	South Valley University	قفا :	2008	Title of M. D: EFFECT OF CHEMICAL REACTIONS ON HEAT AND MASS TRANSFER FOR BOUNDARY LAYER FLOW THROUGH POROUS MEDIA The main aim of this dissertation, which consists of five chapters, is to study numerical solutions for some problems of heat and mass transfer over different shape surfaces in the boundary layer flow through a porous medium. In the following, a brief discussion of the chapters is given. In chapter one, we have introduced a general introduction to boundary layer flows, flows through porous medium, Darcy's law, Non-Darcian models, basic equations of porous medium, combined heat and mass transfer and effects of chemical reactions. In chapter two, we introduced numerical solutions for partial differential equations of heat and mass transfer for four boundary conditions over different shape surfaces embedded in porous media and the following three problems have been studied: In the first problem (2.1), an approximate numerical solution for the flow problem has been obtained by solving the governing equations using shooting technique with a fourth-order Runge-Kutta integration scheme. Four different cases of flows have been studied namely an isothermal surface, a uniform heat flux surface, a plane plume and flow generated from a horizontal line energy source a vertical adiabatic surface. Numerical results are presented for the perturbation analysis for the four conditions with various parameters with considering suction or injection flow. The results obtained show that the flow field is influenced appreciably by the presence of chemical reaction, viscous dissipation and suction or injection flow. (This work accepted for publication in International Journal of Applied Mathematics and Mechanics [43]). In the second problem (2.2), an approximate numerical solution for steady boundary-layer flow is presented to study the effects of chemical reactions on magneto-hydrodynamic natural convection flow. Four different cases of flows have been studied namely an isothermal surface, a uniform heat flux, a plane plume and flow generated from a horizontal line energy source a vertical adiabatic surface. Rosseland approximation is used to describe the radiative heat flux in the energy equation. Numerical results are presented for the perturbation analysis for the four boundary conditions with various parameters and analyzing the results. (This work accepted for publication in JP Journal of Heat and Mass Transfer [54]). In the third problem (2.3), the effect of chemical reaction with a regular two-parameter perturbation analysis has been studied for the effects in magnetohydrodynamic free convection flows of Newtonian fluid-saturated porous medium. The Rosseland approximation is used to describe the radiative heat flux in the energy equation. Four different cases of flows have been studied namely an isothermal surface, a uniform heat surface, a plane plume and flow generated from a horizontal line energy source a vertical adiabatic surface. Numerical results are presented for the perturbation analysis for the four boundary conditions are solved numerically by the fourth-order Runge-Kutta integration scheme. A representative set is displayed graphically to illustrate the influences of the parameters on the velocity, temperature and concentration	4	A. S. ABDEL-RADY M. A. MANSOUR N. F. EI-ANSSARY	

4943	12226550	ماجستير	Legendre Spectral Approximation for Optimal control problems.	Zeinab Abo ELhassan·Ahmed Morsy	South Valley University	أ.م.د.	2008	The main goal of this thesis, which consists of four chapters, is to introduce a developed procedure for solving some differential and optimal control problems. This procedure joins the spectral methods and the optimization techniques. In chapter one, we introduce surveys on the subjects required for the numerical solution of optimal control problems. We give the basic concepts of optimization, spectral approximation and optimal control theory. In chapter two, we discuss Legendre spectral Approximation. We present a Legendre approximation of any continuous function and an approximation of its finite integral. Error estimates for the Legendre approximations are derived. Some numerical results are given to illustrate the efficiency and accuracy of the proposed method. We use the idea of approximating the function at the zeros of the first term of the residual (the next term of the truncating series of approximation) depending on the goodness of approximation accuracy at the zero point. In chapter three, we apply the method discussed in Chapter 2 with three types of problems: non linear differential equation, system of differential equations and system of differential algebraic equations. Firstly we introduce an optimization approach based on minimizing the least squares errors of the problem. The resulting objective function contains a Legendre spectral approximation as stated in chapter two. An improved method is introduced for these problems. In this method an optimal control problem is constructed. The objective function is the least squares error of approximation solution. The constraints are the Legendre spectral approximation of the given differential problem. Preface V In chapter four, we discuss an optimization method for optimal control problems governed by ordinary, system and algebraic system of differential equations. We use Legendre spectral approach to approximate the state and control variables. The problem then is reduced to a constrained optimization problem. We modify Penalty leap frog method to be more efficient to solve the resulting constrained optimization. We choose for numerical experiments in this thesis some examples which are taken into consideration in the recently papers. Remarks: 1. some new results discussed in chapters four are included in a paper titled: Numerical Treatment for some Optimal Control Problems Which presented in Al-Azhar International Scientific Conference 2. some new results discussed in chapters three are included in a paper titled: Numerical Treatment for some Differential Problems Which is submitted for publication in the journal of Nonlinear Science and Numerical Simulation 3. some new results discussed in chapters four are included in a paper titled: Numerical Treatment for some Optimal Control Problems Which is submitted for publication in the journal of Applied Mathematics and Computation	#####	T. 4944	12226618	ماجستير	A NEW METHOD TO STUDY BOTTOMONIUM	Khalaf Allah Nahool· Tarek Abd-Elwahab Mohamedain	South Valley University	أ.م.د.	2014	The well-known Numerov's method for solving Schrödinger's equation is reintroduced by transforming it into a matrix form. Accurate eigenvalues and eigenvectors are calculated for variety of bottomonium spectra. The method gives high accuracy results which are in a good agreement with other methods and with experimental results. KEY WORDS: Numerov's method, Schrödinger equation, eigenvalues, eigenvectors, bottomonium spectra.	#####	Galal S. Hassan Yasser M. A. Mustafa
4945	12226727	دكتوراة	On the Solutions of Some Bio-Mathematical Models	Anas Ahmed Mohammed·Arafa	South Valley University	أ.م.د.	2010	Fractional differential equations (FDEs) appear more and more frequently in various research areas and engineering applications including fluid flow, electrical networks, control theory, electromagnetic theory, optics, potential theory, biology, chemistry, probability, statistics, diffusion theory, fractals theory, electrochemistry, viscoelasticity, and biological systems. In this work, we generalized some of bio-mathematical models by using partial differential equations of fractional order, and we found analytical solutions for these models by using generalized differential transform method (GDTM) and Adomian's decomposition method (ADM). This thesis contains sex chapters, which are briefly described as follow: Chapter I Contain the basics of differential and integral equations with fractional orders.	#####	A. M. A. El-Sayed S. Z. Rida

								Chapter II Solutions were found for a three generalized biological models: 1. Generalized Fisher equation 2. Generalized Fitzhugh–Nagumo equation 3. Generalized Biological Population Model Chapter III Solutions were found for generalized reaction-diffusion model for bacteria growth called (Bacillus subtilis) which describe the evolution of bacteria pattern formation: 1. Generalized reaction-diffusion model of fractional-order for bacterial growth (in one dimension) 2. Generalized reaction-diffusion model of fractional-order for bacterial growth (in two dimensions). Chapter IV Solutions were found for generalized reaction-diffusion model for bacteria growth with chemotaxis called (Escherichia coli (E. coli)): 1. Generalized reaction-diffusion-chemotaxis model of fractional-orders for bacterial growth (in one dimension). 2. Generalized reaction-diffusion-chemotaxis model of fractional-order for bacterial growth (in two dimensions). Chapter V Solutions were found for generalized reaction-diffusion model for bacteria growth with chemotaxis called (Escherichia coli (E. coli)) in a semi-solid medium and in a liquid medium: 1. Generalized reaction-diffusion bacterial chemotaxis model in a semi-solid medium. 2. Generalized reaction-diffusion bacterial chemotaxis model in a liquid medium Chapter VI Solutions were found for generalized reaction-diffusion model for bacteria growth with chemotaxis called (Escherichia coli (E. coli)) in a diffusion gradient chamber: 1. Generalized reaction-diffusion bacterial chemotaxis in a diffusion gradient chamber		
4946	12228449	ماجستير	THE BIODIVERSITY FOR THE WEED FLORA OF FAMILY GRAMINEAE IN EGYPT WITH SPECIAL REFERENCE TO FRUITS AND POLLEN GRAINS	HUSSEIN-NAGWA RABEI AHMED	South Valley Univ	قنا:	2010	The present work deals with 34 species belonging to 25 genera of 11 tribes from the total 19 tribes among Gramineae in Egypt; Andropogoneae, Aristideae, Arundineae, Aveneae, Brachypodieae, Bromeae, Eragrostideae, Paniceae, Poeae, Stipeae and Triticeae. The study depended on using herbarium specimens collected and kept in the Botany Department Herbarium of Faculty of Science, South Valley University in Qena, (QNA a proposed agronym) and with some plant samples received on loan from CAI herbarium (Cairo University). The plants are collected from 5 of the total 7 phytogeographical regions defined in Egypt; the Mediterranean region, Nile valley, Red Sea region, Sinai Peninsula and from Gebel Elba in south Egypt. Also the plants have been defined and named scientifically according to the available known sources. Taxa of eleven tribes studied by four means of modern taxonomic tools revealed in four chapters with an introduction; generally; of the identification of Gramineae, phytogeography, economic importance, historical notes in the systematic of Gramineae and a scope on the thesis and its general aims. Accomplished with a preamble of the nomenclature and the collection of the studied taxa (Chapter ONE).	#####	Mohamed A. Zaki Ahmed Kamal E. Osman Sohair Thabet Hamed

4991	12269094	ماجستير	فاعلية برنامج تدريبي قائم على الرسوم المتحركة في اكساب معلمى المرحلة الاعدادية بعض مهارات استخدام السبورة التفاعلية والاتجاه نحو استخدامها/	مصطفى،مصطفى حسن احمد.	كلية التربية النوعية بقنا،	قنا:	2015	مشكلة البحث : 15.	6/8/2015	نبيل جاد عزمى،نجلاء محمد فارس.	

									وفى ضوء ماسبق امكن التعبير عن مشكلة البحث مما تطلب الامر الى تصميم برمجية تعليمية فى اكساب معلمى المرحلة الاعدادية مهارات استخدام السيورة التفاعلية لمعلمى المرحلة الاعدادية وتنمية الاتجاه نحو استخدام السيورة التفاعلية. اسئلة البحث : السؤال الرئيسى : ما فاعلية برنامج تدريبي قائم على الرسوم المتحركة فى اكساب معلمى المرحلة الاعدادية بعض مهارات استخدام السيورة التفاعلية واتجاههم نحو استخدامها. ونقترح من هذا التساؤل مجموعة تساؤلات فرعية: ما مهارات استخدام السيورة التفاعلية. ماالتصميم التعليمى لبرنامج تدريبي قائم على الرسوم المتحركة فى اكساب المعلمين بعض مهارات استخدام السيورة- التفاعلية والاتجاه نحو استخدامها مافاعلية البرنامج المقترح فى اكساب مهارات استخدام السيورة التفاعلية لمعلمى المرحلة الاعدادية. مافاعلية البرنامج المقترح فى تنمية اتجاهات معلمى المرحلة الاعدادية نحو استخدام السيورة التفاعلية فى العملية التعليمية. فروض البحث: يوجد فرق دال احصائيا عند مستوى (0.01) بين متوسطى درجاتالمعلمين فى التطبيق القبلى والبعدى للاختبار التحصيلي-1 لقياس الجانب المعرفي من مهارات استخدام السيورة التفاعلية لصالح التطبيق البعدى يوجد فرق دال احصائيا عند مستوى (0.01) بين متوسطى درجات المعلمين فى التطبيق القبلى والبعدى لمطابقة -2 الملاحظة لصالح التطبيق البعدى يوجد فرق دال احصائيا عند مستوى(0.01) بين متوسطى درجات المعلمين فى التطبيق القبلى والبعدى لمقياس الاتجاه-3 لصالح التطبيق البعدى اهداف البحث: هدف البحث الحالى الى : . اكساب بعض معلمى المرحلة الاعدادية مهارات استخدام السيورة التفاعلية - التعرف على فاعلية برنامج قائم على الرسوم المتحركة فى اكساب مهارات استخدام السيورة التفاعلية لدى معلمى المرحلة الاعدادية التعرف على اتجاهات المعلمين نحو استخدام السيورة التفاعلية فى العملية التعليمية. اهمية البحث: تتمثل أهمية البحث الحالى فى - قد يفيد البحث الحالى المشرفين التربويين والمتخصصين فى مجال التدريب فى الاطلاع على اساليب تدريب مبتكرة - وحيثية تعتمد على الرسوم المتحركة بمختلف انواعها لما لها من قدرة على جذب الانتباه والتشويق والاثارة توجيه انتظار المسؤولين بالتربية والتعليم والتطوير التكنولوجي –على الاخص –الى ضرورة الاهتمام باستخدام السيورات - التفاعلية وتوظيف كل ما هو جديد فى مجال تقنيات التعليم فى العملية التعليمية تسليط الضوء على اتجاهات المعلمين نحو استخدام السيورة التفاعلية فى العملية التعليمية - حدود البحث : محددات بشرية: اقتصر البحث الحالى على بعض معلمى المرحلة الاعدادية بإدارة قنا التعليمية . محددات مكانية: مدرسة قنا الجديدة تعليم اساسى المرحلة الاعدادية حيث انها من المدارس المشرف عليها الباحث فى التوجيه الفنى. محددات موضوعاتية: وتمثلت فى برمجية الرسوم المتحركة ومهارات استخدام السيورة التفاعلية واتجاهات المعلمين نحوه استخدامها
زينة محمد امين،محمد حماد هندی،محمود احمد محمود نصر .	2005	مشكلة البحث: تحددت مشكلة البحث الحالى فى السؤال الرئيسى التالي: مافاعلية برمجية الكمبيوتر فى تنمية بعض كفايات تكنولوجيا التعليم لدى معلمى الفئات الخاصة. اهداف البحث : هدف البحث الحالى الى: تحديد قائمة بكفايات تكنولوجيا التعليم الواجب توافرها لدى معلمى الفئات الخاصة-1 وضع تصور لنظام تعليمى لتدريب معلمى الفئات الخاصة من خلال الكمبيوتر التعليمى فى ضوء النظرية البنائية-2 المعرفية 3.الافادة بالكمبيوتر التعليمى لتنمية بعض كفايات تكنولوجيا التعليم لدى معلمى الفئات الخاصة-3 الوقوف على فعالية الكمبيوتر التعليمى لتنمية بعض كفايات تكنولوجيا التعليم لدى معلمى الفئات الخاصة-4 اهمية البحث : تتمثل أهمية البحث فى العناصر التالية: تقديم قائمة بكفايات تكنولوجيا التعليم اللازمة لمعلمى الفئات الخاصة للاسترشاد عند تصميم برامج التدريب-1 تقديم برنامج قائم على توظيف الكمبيوتر التعليمى لتنمية بعض كفايات تكنولوجيا التعليم لدى معلمى الفئات الخاصة-2 تقديم بطاقة ملاحظة يمكن ان يفيد عند تقييم ومتابعة الجانب الادائى فى كفايات تكنولوجيا التعليم لدى معلمى الفئات-3 الخاصة توجيه نظر القائمين على برامج التدريب لمعلمى الفئات الخاصة فيما يتعلق بتكنولوجيا التعليم الى تطبيق استراتيجيات-4 التدريب والممارسة الكمبيوترية والقائمة على نظرية البناء المعرفى عند ممارسة تلك البرامج اكرم فتحى مصطفى على/ دكتوراه/ الرقم العام 37 يهدف البحث الى : .التصل الى المعايير البنائية (التربوية والتكنولوجية) لمواقع الانترنت التعليمية-1 .التوصل الى مهارات انتاج مواقع الانترنت التعليمية-2 تصميم برنامج لتنمية مهارات انتاج مواقع الانترنت التعليمية لدى طلاب كلية التربية-3 بيان فعالية البرنامج المقترح فى تنمية مهارات انتاج مواقع الانترنت التعمية لدى طلاب كلية التربية وتكونت مجموعة-4 (رياضيات –طبيعةوكيمياء-احياء)البحث منم 91 طالب وطالبة من طلاب المعلمين بالفرقة الثالثة بكلية التربية بقنا شعب . (التربية الموسيقية –التربية الفنية-الاقتصاد المنزلى)وطالب الفرقة الثالثة بكلية التربية بقنا شعبة وينبثق البحث مستوى التعليم بمساعدة شبكة الانترنت حيث تكون فيه الشبكة احد الوسائط التعليمية المساعدة للمعلم فيكون الغرض من الموقع التعليمى الذى سينتجه الطالب المعلم هو دعم التعلم الفصلى وقد تم تطبيق ادوات البحث (الاختبار التحصيلي –بطاقة الملاحظة-بطاقة تقييم الاداء) على مجموعة البحث قبلما تم تدريس البرنامج المقترح وتطبيق ادوات البحث بعديا.	بنى سوف:	2005	حقى،حاتم جاد الكريم محمد ابراهيم.	فعالية برمجية الكمبيوتر التعليمية فى تنمية بعض كفايات تكنولوجيا التعليم لمعلمى الفئات الخاصة بمحافظة قنا/	دكتوراه	4992	12269229

									تعرف فعالية البرمجية المقترحة باستخدام الوسائط الفاعلة على اداء طلاب تكنولوجيا التعليم بعض مهارات انتاج برامج-4 فروض البحث: اخضع البحث الحالي للفروض التالية للتحقيق من صحتها : يوجد فرق دال احصائيا عند مستوى(0.05) بين متوسطى درجات التطبيق البعدي للاختبار التحصيلي المرتبط بالجانب-1 المعرفي لمهارات انتاج برامج الفيديو التفاعلى للمجموعة الضابطة والمجموعه التجريبية لصالح المجموعه التربيه تعرضت لبرمجية الوسائط الفاعلة المقترحة يوجد فرق دال احصائيا عند مستوى (0.05). بين متوسطى درجات التطبيق البعدي لبطاقة ملاحظة الاداء العلمى-2 لمهارات انتاج برامج الفيديو اتفاعلى للمجموعه الضابطة والمجموعه التجريبية لصالح المجموعه التجريبية التى تعرضت لبرمجية الوسائط الفاعلة المقترحة يوجد فرق دال احصائيا عند مستوى (0.05) بين متوسطى درجات التطبيق القبلى والبعدي للاختبار التحصيلي المرتبط-3 بالجانب المعرفي لمهارات انتاج برامج الفيديو التفاعلى للمجموعه التجريبية التى تعرضت للبرمجية الوسائط الفاعلة المقترحة لصالح التطبيق البعدي يوجد فرق دال احصائيا عند مستوى(0.05) بين متوسطى درجات التطبيق القبلى والبعدي لبطاقة ملاحظة الاداء العلمى-4 لمهارات انتاج برامج الفيديو التفاعلى للمجموعه التجريبية التى تعرضت للبرمجية الوسائط الفائق المقترحة لصالح التطبيق البعدي اهمية البحث : صبغت اهمية البحث الحالي من عدة اعتبارات وهي: يعد البحث محاولة لمسيرة الاتجاهات الحديثة واستجابة للعديد من توصيات البحوث والدراسات والمؤتمرات من حيث-1 توظيف البرمجيات والوسائط الفاعلة في التعليم الجامعى يعد البحث محاولة لاثراء مجال برمجة المناهج الدراسية الجامعية لها من الفاعلية فى عملية التعليم والتعلم 3-يمكن ان يمدد البحث القائمين على العملية التعليمية والمهتمين ببرامج الفيديو التفاعلية بقائمة من المعايير التربوية والتكنولوجية التى تساعدهم على تصميم وانتاج هذه البرامج يعد البحث القائمين على برامج اعداد الطلاب المعلم بقائمة مهارات انتاج برامج الفيديو التفاعلية التى لا بد من توفرها لدى-4 الطلاب المعلم عند اعداده وتدريبه يعد البحث القائمين على اعداد طلاب تكنولوجيا التعليم بمهارات انتاج برامج الفيديو التفاعلية اللازمة لتقييمهم بدورهم-5 المهني بكفاءة	
عبدالرحيم احمد سلامة، عماد شوقي ملقى سيفين،احمد حلمى محمد ابو المجد.	1/10/2011.	كليه التربية بقنا،	قنا:	قسم المناهج وطرق التدريس،	احمد،محمد محمد حسين.	فعالية استخدام تقنيات التعلم الإلكتروني في تنمية بعض مهارات البرمجة باستخدام البرامج الجاهزة لدى طلاب شعبة تكنولوجيا التعليم/ ماجستير	12269822	4996		

								1- ما مدى تأثير التخصص او نوع الدراسة على اكتساب طلاب المرحلة الثانوية الاتجاهات البيئية نحو بعض قضايا البيئة -2- ما مدى تأثير الجنس على اكتساب طلاب المرحلة الثانوية الاتجاهات البيئية نحو بعض قضايا البيئة -3- ما مدى تأثير البيئة على اكتساب طلاب المرحلة الثانوية الاتجاهات البيئية نحو بعض قضايا البيئة - اهمية البحث : ما يسفر عنه البحث من نتائج يوضح اتجاهات لطلاب المرحلة الثانوية نحو بعض قضايا البيئة وتبين الجوانب الإيجابية -1- فيها والسلبية وتدعم اتجاهاتهم البيئية الإيجابية -2- مقياس الاتجاهات الذي تعدده الدراسة يمكن ان يعد على غراره مقياس اخرى مثل طلاب -3- المرحلة الاعادية وطلاب المدارس الثانوية الفنية وطلاب الجامعات . يوضح البحث دور المرحلة الثانوية في تنمية الاتجاهات البيئية المرغوبة لدى الطلاب -4- ما يقدم به البحث من توصيات ومقترحات يمكن ان يساهم في تحقيق اهداف التربية البيئية بالنسبة لطلاب المرحلة الثانوية . حدود البحث : يقتصر البحث على قياس الاتجاهات البيئية لدى طلاب المرحلة الثانوية السنة النهائية الثالثة لا نها تمثل حصيلة ما -1- درسوه فيها طوال سنواتهم الدراسية السابقة . يقتصر البحث على قياس الاتجاهات البيئية لطلاب المرحلة الثانوية في محافظة قنا بتخصصاتها المختلفة واختيار بعض -2- المدارس الثانوية بها .						
حسين حمدي الطويحي،نائلة حسن احمد خضر،اسامة عثمان الجندي.	1994	مشكلة البحث: تحدد مشكلة البحث في السؤال الاتي: ماهو التصور المقترح لبرنامج باسراتيجية تستخدم اكثر من طريقة لتدريس المفاهيم الرياضية والعمليات الحسابية في مرحلة رياض الاطفال. ويقررع من هذا السؤال الاسئلة الاتية: مامدى فعالية تدريس هذا البرنامج لمجموعات صغيرة متجانسة (ت1) من الاطفال بطبيى التعلم في تعليم بعض المفاهيم-1 الرياضية والعمليات الحسابية في مرحلة رياض الاطفال مامدى فعالية تدريس هذا البرنامج لمجموعة من الاطفال العاديين (ت2) في تعليم المفاهيم الرياضية والعمليات الحسابية-2 في مرحلة رياض الاطفال	فروض البحث: لا توجد فروق ذات احصائية بين درجات الاختبار القبلى والبعدى فى المفاهيم الرياضية باستخدام اسلوب القصة والمسرح-1 لدى اطفال العينة بطبى التعلم ت1 لا توجد فروق ذات دلالة احصائية بين درجات الاختبار القبلى والبعدى فى العمليات الحسابية باستخدام الالعب التعليمية-2 لدى اطفال العينة بطبى التعلم ت1 لا توجد فروق ذات دلالة احصائية بين درجات الاختبار القبلى والبعدى فى المفاهيم الرياضية باستخدام اسلوب القصة-3 والمسرحه لدى اطفال العينة العديين ت2 لا توجد فروق ذات دلالة احصائية بين درجات الاختبار القبلى والبعد فى العمليات الحسابية باستخدام الالعب التعليمية لدى-4 اطفال العينة العاديين ت2 لا توجد فروق ذات دلالة احصائية بين درجات الاختبار البعدى فى المفاهيم الرياضية باستخدام اسلوب القصة والمسرح-5 لدى اطفال العينة بطبى التعلم ت1 لا توجد فروق ذات دلالة احصائية بين درجات الاختبار البعدى فى العمليات الحسابية باستخدام الالعب التعليمية لدى اطفال-6 العينة بطبى التعلم ت1	حدود البحث: يقتصر البحث على :- بعض المفاهيم الاساسية من كتب الرياضيات لرياض الاطفال-1 (10)بعض العمليات الحسابية (الجمع والطرح)والتي لايزيد ناتجها عن عشرة-2 عينة من اطفال مرحلة رياض الاطفال-3	اهمية البحث: محاولة التغلب على بعض مشكلات الاطفال بطبى التعلم فى بداية العملية التعليمية قبل تزايد هذه المشكلات فى المراحل-1 الدراسية التالية . مساعدة مخططى المناهج فاعداد برامج وانشطة للطفل بطى التعلم-2 يعد هذا البحث استجابة للعديد من توصيات البحوث والمؤتمرات والتي اوصت باستخدام طرق تدريسية خاصة للاطفال-3 بطبى التعلم	مسلّمات البحث:. هناك فروق فردية بين اطفال الفصل الواحد فى جوانب متعددة-1 يحتاج الطفل بطى التعلم للطرق تدريسية متعددة لاثارئة للتعلم-2 يحتاج الطفل بطى التعلم الى مناخ تعليمى محبب غير المناخ التقنيدي داخل الفصل-3	1994	القاهرة :	معهد الدراسات والبحوث التربوية،	على،وائل عبدالله محم.	فاعلية برنامج مقترح لتدريس بعض المفاهيم الرياضية والعمليات الحسابية لبطيئى التعلم فى مرحلة رياض الاطفال/	ماجستير	12270082	4999

5009	12292709	ماجستير	Study on the effect of the grain size on the activity concentration of soil, phosphate and building materials samples.	Ibrahim Ali·Sahar Elnobi	South Valley University.	qena:	2015	Regarding to the great benefits from the studies of natural radioactivity and to continue the program of measuring natural radioactivity in different environmental media started in the Environmental Radioactivity Measurements Laboratory (ERML), Faculty of Science, South Valley University, Qena, Egypt since 1990, measurement of natural radioactivity and studying the effect of grain sizes on the natural radioactivity and radon exhalation rate of phosphate, soil, and building materials (sand, granite, marble and limestone) from Aswan and Qena governorates, Egypt were considered in this thesis. This work is mainly concerned with many issues. □ The first concern is to investigate the activity concentrations such as 40K, as well as radionuclides from the 226Ra and 232Th series in different samples using gamma spectroscopy. □ The second concern is to investigate the effect of grain size on the activity concentrations in different samples. □ The third concern is to estimate the radiation hazard health, by calculating the annual effective doses for human, and effect of grain size on the radiation hazard health, and comparing between the obtained results and the other published data. □ The fourth concern is to investigate the effect of grain size on the activity concentrations and exhalation rate of 222Rn in phosphate, soil and building materials, using the ionization chamber "Alpha GUARD". □ Finally, investigation the physical properties that affect on radon exhalation rate (thickness, area, temperature). The measurements described in this study were performed using Low-level gamma ray spectrometer. It consists of "3x3" NaI (TI). The system was calibrated for energy using standard point sources (60Co, 137Cs), and calibrated for efficiency using standard solution QCYB41. Every sample was placed in face to face geometry over the detector for 10 to 24 hour for (226Ra, 232Th and 40K) concentrations measurements. Prior to sampling counting, background were normally taken every week under the same condition of sample measurement, and using the ionization chamber Alpha GUARD PQ2000PRO along with the additional special equipment AquaKIT was used for determining 222Rn concentration in all samples. The average concentrations (Bq/kg) of 226Ra,232Th and 40K for all investigated samples are summarized in the following table: Type of sample Activity concentration (Bq/kg)	#####	Nour Khalifa Ahmed Shaban Ramadan Mohamed Harb.	

							226Ra 232Th 40K Phosphate 6427.39±276 801.4±49 5749.71±495 Soil 139.88±6 162.84±10 1578.38±136 Sand 55.36±2 30.41±2 725.71±62 Granite 268.61±12 566.96±39 6367.98±548 Marble 70.08±3 28.93±2 242.91±21 Limestone 44.43±2 7.71±0.48 311.16±27 from the obtained results, the higher values were 6427.39±276 and 801.4±49 (Bq/kg) for 226Ra and 232Th found in phosphate sample		
5010	12293002	ماجستير	Studies on acetyl pyrrole, synthesis and characterization of some new aza and Sulfur heterocyclic derivatives.	Abdellah·Amany Salah.	South Valley University.	qena:	2015 The present work includes the synthesis of some different compounds derived from pyrrole. Thus on reaction of acetyl pyrrole with CS ₂ it furnished the oxoketene gem-dithiol (2). N CH ₃ O SH SH Dithiol (2) reacts with P ₂ S ₅ in dry benzene and gives the 1,2-dithiol 3-thione (3). N CH ₃ S S S Reaction of (2) with salicylaldehyde in acetonitrile as a solvent and marble as a catalyst and gives 2-mercapto-3-(1-methyl-1Hpyrrole-2-carbonyl)chromen-4-one (4) while on reaction the (2) with cinnamaldehyde and ethylcyanoacetate in tetrahydrofuran and drops of glacial acetic acid it furnishes 2-Mercapto-3-(1-methyl-1Hpyrrole-2-carbonyl)-4-oxo-6-phenyl cyclohexa-2,5-dienecarbonitrile (5). N O Me O O SH N CH ₃ O HS O CN Ph 4 5 On boiling (2) in xylene with p-benzoquinone; 1,4-dichloronaphthoquinone; cyclopentadiene or maleic anhydride it gives 2-[2-(1-methyl-1H-pyrrol-1-2yl)-2-oxoethylidene]-3a,7a-dihydrobenzo[1,3]dithiol-4,7-dione (6); 2-[2-(1-methyl-1H-pyrrol-1-2yl)-2-oxoethylidene]-3a,9a-dihydronaphtho[2,3-d][1,3]dithiol-4,9-dione (7); 2-(2,4-dithiabicyclo[	#####	Salem E. Zayed Entesar A. Hassan

						3.2.1]octa-6-en-3-ylidene)-1-(1-methyl-1H-pyrrol-2-yl) ethanone (8) and 2-[2-(1-m-ethyl-1-H-pyrrol-2-yl)-2-oxo-ethylidene] dihydro[1,3]dithiolo[4,5-c]furan-4,6-dione (9) respectively. N CH3 O S S O O N CH3 O S S O O N Me O S S N O S S O O Me O 6 7 8 9 Treatment of (2) with malononitrile in THF/AcOH it gives thiopyrane derivative (10) while on reaction of dithiol (2) with thiosemicarbazide in refluxing ethanol, 3-mercapto-3-thiosemicarbazide-1-(2-pyrr-olyl)-2-propenone (11) was obtained. Reaction of dithiol (2) with indole in methylene chloride in the presence of monochloroacetic acid it gave 3-(1H-indol-3-yl)-3-mercapto-1-(1-methyl-1H-pyrrol-2-yl)propenone (12). N Me O S H N 2 NH2 S N Me O NH SH N H S H N 2 H N Me SH O NH 10 11 12 On treatment of (2) with guanidine sulphate in different conditions it gives pyrimidine derivatives, thus when (2) reacts with guanidine sulphate in ethanol in the presence of morpholine it gives 2-amino-6-(1-methyl-1H-pyrrol-2-yl)-4-morpholin-4-yl-4,5-dihydropyrimidineiii 4-thiol (13) while reaction of dithiol (2) with guanidine sulphate in ethanol in the presence of sodium methoxide it gives 4-ethoxy-6-(1-methyl-1H-pyrrol-2-yl)pyrimidin-2-ylamine sulphate (14). On the other hand reaction of dithiol (2) with hydroxyl amine hydrochloride in ethanol or ethanol/AcOH it gives 3,3-bishydroxyamino-1-(methyl-1H-pyrrol-2-yl)propenone hydrochloride (15) and N-[3-(methyl-1H-pyrrol-2-yl)isothiazol-5-yl]hydroxylamine hydrochloride (16) respectively.

							environment of the Red sea. It presents a brief history of the marine environment of the Red Sea, its characteristics, location of the study area (Hurghada city), supported by a map, (figure1). This chapter also includes a brief survey about previous works concerning the marine environment of the Red sea area (water and sediments). Chapter 2 (Material and Methods): This chapter includes sampling techniques and methodologies. It includes samples collection, Oceanographic parameter measurements such as hydrogen exponent (pH), water temperature (T), total dissolved salts (TDS), salinity (Sal) and dissolved oxygen (DO). This chapter also gives the coordinates of sampling sites, the names of the sites, distance and depth of sampling sites, some photographs of desalination plants.		
5012	12293495	ماجستير Effect of preparation conditions and La-ions on the crystal structure and ferroelectric properties of the system [(Pb0.7 Sr0.3)1-1.5x Lax]TiO3 ceramic	Fekry Saied-Shiemaa Ibrahim	South Valley University.	qena:	2016	Lead titanate (PT) ceramics are very promising piezoelectric materials for high temperature and high frequency applications because of their high Curie temperature and low dielectric constant. Pure lead titanate ceramics are difficult to sinter because of their large anisotropy. On cooling through the Curie temperature, the large anisotropy causes the ceramics to become fragile. By addition of small amount of suitable additives, cracking can be prevented. Our lab. groups have experience concerning ferroelectric properties of lead titante ceramic modified with strontium and lanthanum ions. They prepared specimens of general formula [(Pb1-x Srx)1-1.5z Laz □0.5z]TiO3, where $0 \leq x \leq 0.6$ and $0.03 \leq z \leq 0.09$. They found that when $z = 3 \text{ mol.}\%$ La, there are two anomalies peaks for dielectric constant at $x=20$ and $40 \text{ mol.}\%$ Sr. Similarly when $z = 6 \text{ mol.}\%$ La, there are also two anomalies peaks for dielectric constant at $x=25$ and $35 \text{ mol.}\%$ Sr. But when $z = 9 \text{ mol.}\%$ La, there are only one peak for dielectric constant at $x=30 \text{ mol.}\%$ Sr. So in the present work we took the system [(Pb0.7Sr0.3)0.865 La0.09 □0.045]TiO3 ceramic to study the effect of changes for sintering time (ts) on that system and the effects of La doping on the ferroelectric and structural properties of [(Pb0.7Sr0.3)1-1.5zLaz□0.5z]TiO3 ceramics, then the main objectives are : 1. Studying the crystal structure and ferroelectric properties of the system [(Pb0.7Sr0.3)0.865La0.09]TiO3 and [(Pb0.7Sr0.3)1-1.5xLax]TiO3 ceramics. 2. Access to the best sintering conditions to get optimum results for the ferroelectric properties and crystal structure of the system [(Pb0.7Sr0.3)0.865 La0.09]TiO3 ceramics. 3. To study the effect of La doping on the crystal structure and the ferroelectric properties of [(Pb0.7 Sr0.3)1-1.5xLax]TiO3 ceramics, so the Curie temperature (Tc) should not be less than room temperature . 4. Study the possibility for obtaining electronic capacitor with fixed value of capacitance from less (room temperature) to relative higher temperature with the help of experimental results and the theoretical calculation, which belonged to the binomial distribution function for the system: [(Pb0.7Sr0.3) 1-1.5xLax]TiO3. In the present work we managed the followings: 1. The detailed crystal structure study by analyzing XRD patterns by employing the Rietveld refinement method. 2. In the present research, we study the ferroelectric properties and other related properties as function of temperature and at fixed values of frequency for the electric field. The study includes dielectric constant, the phase transition temperature Tc, Debye's relaxation time τ and critical Debye's relaxation time τ_c, activation energy (Eaf, Eap), Weiss constants (C-, C+) and spontaneous polarization (Ps). 3. For the study of the ferroelectric properties and other related properties we used computerized system for the relationship between LCR meter and the temperature inside the cell of measurements. 4. For suggestion the fabrication of electronic capacitor with fixed value of capstans, in spite of the temperature variation, we need binomial distribution function and experimental results which belonged, in our research, the composition [(Pb0.7Sr0.3)1-1.5xLax]TiO3, where x (La-content) equals to 0.09, 0.10, 0.11, 0.12 and 0.13 mol ,respectively.	#####	G. 5013	12293700	دكتوراه Electrochemical studies on the corrosion behavior of electrodeposited Zn-Co-Fe alloy	Ali Hassan Ali•Fatma El Zhraa	South Valley University.	qena:	2015	The major over all conclusions of this thesis are presented as follows: Chapter (1) presents an introduction on the fundamental aspects of electrodeposition and corrosion. Chapter (2) presents a literature survey on the binary Zn-Co, Zn-Fe, Co-Fe alloys and ternary Zn-Co-Fe alloys. Chapter (3) investigates the experimental ways used in the thesis. Chapter (4) includes the results and discussion of this examination and consists of three parts: 4.1. The electrodeposition and corrosion of Zn, Co and Fe,	#####	Fawzy H. Assaf • Mortaga M. Abou-Krishna

							binary Zn-Co, Zn-Fe and ternary Zn-Co-Fe alloys at the ordinary conditions also, the comparison between them was studied and the results revealed that: The grain size for Zn-Fe, Zn-Co and Zn-Co-Fe deposits obtained on copper substrate is small and existence in the nano size range, 71.3, 42.7 and 29 nm, respectively, so Zn-Co-Fe presented the smallest grain size. The ternary Zn-Co-Fe deposits showed smooth, bright and fine grain sizes, in contrast to those of Zn-Co or Zn-Fe deposits. Zn-Co-Fe, Zn-Co and Zn-Fe coatings consisted mainly of pure zinc and FeCo phase for ternary Zn-Co-Fe alloy, Zn_{0.35}Co_{0.65} and Zn₂₁Fe₅ phases for binary Zn-Co and Zn-Fe, respectively. The ternary Zn-Co-Fe deposits exhibited better corrosion resistance, also the thickness of the deposit increases in comparison to Zn-Co and Zn-Fe deposits that electrodeposited at similar conditions. 4.2. The electrochemical tests studied for the dissolution of the electrodeposited Zn-Co-Fe alloy in sodium hydroxide solution which can be concluded that: Increasing scan rate increases the height of the anodic peak current density (ip) and shifts potentials to the more noble values. Increasing NaOH concentration and temperature enhance the height of the anodic peak current density (ip) and shift the potentials towards more negative values.		
5014	12308813	دكتوراه	تطوير بعض المتغيرات البدنية والوظيفية وفق منهج تدريبي مقترح الرياضي الموق الخاص وانعكاسها على انتاج ركض 100م					2001	مجلس كلية التربية الرياضية - جامعة بغداد
5015	12311933		A study of maximum power point tracking techniques for wind turbine including matrix converter /	Hassan, Alaa el-dien Mostafa Mohamed.			Nowadays, all countries are challenged with environmental disaster known as global warming that threaten our well-being and existence in addition to the Lack in reserve stocks of non-renewable energies such as oil, natural gas, coal ... etc. Therefore, great efforts are exerted to generate electrical power from renewable sources of energy. Among the available renewable energy sources, wind power is now the world's fastest growing energy source and it has become one of the most rapidly expanding industries. It has also advantageous over traditional methods of energy generation in the sense that it is getting cheaper and cheaper to produce energy. Wind Energy may soon be the economical way to produce energy on large and small scales. 2016 This thesis provides a comprehensive study of grid-tie wind energy conversion system using permanent magnet synchronous generator (PMSG). The proposed type of wind energy conversion system (WECS) is based on generating electrical power with minimum harmonics and minimum power loss. This can be achieved by using maximum power point control techniques for controlling the variable generated power of the WECS using direct AC/AC power converter instead of conventional indirect converters based AC-DC-AC converter. Also, this technique achieves the maximum injected power from the turbine for different variable wind speeds. Matrix converter is controlled by space vector pulse width modulation, which enables excellent transient response, while sinusoidal current waveforms are dominant. This is targeted to enhance the load voltage profile and to reduce the overall power loss in the electrical distribution networks. IV A direct matrix converter prototype is constructed for experimental verifications of the results. As a first step in experimental works, filter types are investigated and a three-phase input LC filter is constructed to eliminate the high frequency current components. Then, direct matrix converter power circuitry and gate driver circuitry are designed and constructed. To control the matrix switches, the control algorithm is implemented using a DSPACE hardware system. This digital control system controls the matrix converter switches to produce the required PWM pattern to synthesize the load input current and output voltage vectors, as well. Finally, the simulation results are tested and supported by laboratory experiments involving an R-L load.		
5016	12312143		Investigation of meta-material Application in coupling reduction between Microstrip antennas using numerical Techniques /	Mohamed, Mostafa Mohamed Bakry.			2014 The wireless communication systems had been grown with increasing applications in wide range of electronic commerce, especially the antennas which took a great interest in the field of wireless communications due to easy fabrications, low profile, low power consuming, reduced size, multi-functions and multi-band for wireless devices. This thesis concentrates on major parts affecting the microstrip patch antennas (MPAs) operation. In the first part, the mutual coupling effects between the elements of microstrip patch antenna arrays (MPAAs) have a great interest and can affect the		

							performance of the microstrip antennas. first We design array antenna of two elements with distance apart equals to $\lambda/2$ on dielectric substrate FR4 with dielectric constant 4.5 and height $h=1.5\text{mm}$ to operate at resonance frequency $f_0=6.3\text{ GHz}$. The mutual coupling between the elements of the array antenna can be measured by the insertion loss, IL (dB) between the elements. Some techniques for reduction of the mutual coupling between the elements of the MPAs were used before. Among these techniques as we propose are the periodic structures of complementary Split Ring Resonators (CSRRs) of Metamaterials (MTM) for reducing the mutual coupling between the elements of microstrip antenna arrays. CSRR is firstly designed on a dielectric substrate of FR4 with relative permittivity $\epsilon_r=4.5$ and dielectric height $h=1.5\text{ mm}$. They operate as Left Handed Materials (LHM) with negative permittivity and permeability at the frequency of operation of the MPA ($f_0= 6.3\text{ GHz}$). Three shapes of CSRR are proposed to reduce the mutual coupling effects between the elements of the array antennas. The first shape is a single CSRR which is easily etched in the ground plane of the array antenna and this can make isolation of 38 dB under the original value of the conventional array antenna. The second shape is a double CSRR and this can make isolation of 10 dB under the original value and the [IV] last shape is a triple CSRR which can give isolation of 14 dB under the original values of the antenna. The gain and directivity are improved by about 1.1 dB due to the suppression of the surface waves between the elements of MPAs. The feeding method of the MPA is a 50Ω coaxial probe feed. This method of feeding is preferred because of its advantage to give more guided waves under the patches and so the mutual coupling is increased. The dimensions of the CSRR structures are selected and modified to agree the MPA resonance frequency. For more verification, the proposed antenna loaded with the CSRRs is fabricated and measured. The measured data give good agreement with the simulation results. In the second part of this thesis, the gain improvement of the MPA takes a great interest. We propose a new MPA which designed on a dielectric substrate of Roger 4003C with relative permittivity 3.55 and thickness $h= 0.813\text{ mm}$ to operate at resonance frequency of 10 GHz and has total gain 7 dB. We suggest 2-D periodic structures of Complementary G-shape Split Ring Resonator (CGSRR) and Separated Complementary G-shape Split Ring Resonators by slots (SCGSRRs) of MTM for enhancing the gain and bandwidth of the MPA. CGSRRs are designed on the same dielectric substrate of the MPA and can give negative values of permittivity and permeability at the frequency of operation $f_0= 10\text{GHz}$. These periodic structures are loaded around the patch antenna to enhance the gain of the antenna by about 2.5 dB over the original value of the conventional MPA and the bandwidth increases from 350 MHz to 510 MHz. SCGSRRs are designed on a dielectric substrate RT/duroid 5880 with dielectric constant equals to 2.2 and thickness $h= 1.575\text{ mm}$ and can be used as flat lenses over the MPA loaded with CGSRRs. The total gain of the MPA will be improved by about 3.83 dB. The proposed MPA loaded with CGSRRs are fabricated and measured. Good agreement between the simulated results and measured data is achieved. [V] The finite difference time domain method is used in this thesis to analyze and study the operation of the microstrip patch antenna. 3D simulation for Maxwell's equations is carried here with LIAO's absorbing boundary conditions for the problem space. The FDTD method is used to calculate the scattering parameters of the patch antenna and visualize the EM waves through the patch. The calculated scattering parameters from the FDTD equations are compared with the simulated results. Good agreement between the calculated and simulated results is achieved.		
5017	12312461		Intelligent Control on Active Suspension System /	Mahmoud, Abd El-Nasser Sharkawy Ahmed.		2016	The objectives of this study are to obtain a mathematical model for the passive and active suspensions systems for quarter car model and construct an active suspension control for a quarter car model subject to excitation from a road profile using PID , FUZZY and H_∞ controllers. Current automobile suspension systems using passive components only by utilizing spring and damping coefficient with fixed rates. Vehicle suspensions systems typically rated by its ability to provide good road handling and improve ride comfort. Passive suspensions only offer compromise between these two conflicting criteria. Active suspension poses the ability to reduce the traditional design as a compromise between handling and comfort by directly controlling the suspensions force actuators.		

							In this study, the active suspension system is synthesized based on PID , Fuzzy Logic and H [∞] techniques for a quarter car model. Comparison between passive and active suspensions system are performed by using road profile. The performance of the active suspension system using PID, Fuzzy Logic and H [∞] controllers is compared with the passive suspension system. The performance of these controllers will be determined by performing computer simulations using the MATLAB and SIMULINK toolbox.		
5018	12321779	القتل الداخلي في مدينة العردقة :	المولى, احمد محمد جاد.			2015	تتناول موضوع الدراسة " القتل الداخلي في مدينة العردقة : دراسة في جغرافية النقل " باستخدام نظم المعلومات الجغرافية وذلك بهدف دراسة أثر العوامل الجغرافية على النقل بالمدينة ، ودراسة شبكة الشوارع بالمدينة وتطورها وتصنيفها ، بالإضافة إلى دراسة وسائل النقل العاملة بالمدينة والتي تربطها بالمدن الأخرى ودراسة حجم الحركة على شوارع ومداخل المدينة ومدى كفاءتها وتصنيف رحلات السكان داخل المدينة ، وكذلك إلغاء الضوء على أهم مشكلات النقل الداخلي بالمدينة وعمل خريطة التصور المستقبلي للنقل بالمدينة . وقسمت الدراسة إلى خمسة فصول تسبقها مقدمة وتليها خاتمة على النحو التالي : المقدمة : توضح منطقة الدراسة ، وأسباب اختيار الموضوع وأهداف الدراسة والمناهج والأساليب المستخدمة والتي أهمها المنهج الأصولي والإقليمي والتاريخي ، أما بالنسبة للأساليب فقد تم في إنتاج الخرائط وتحليلها ، (GIS) استخدام الأسلوب الكمي والوصفي ونظم المعلومات الجغرافية ونتيجة النقص في بعض البيانات اعتمد الطالب على الدراسة الميدانية عن طريق الاستبيان أو حصر حركة المركبات على شوارع المدينة ومداخلها ، بالإضافة إلى الصعوبات التي واجهت الطالب . الفصل الأول : يعرض العوامل الجغرافية المؤثرة في النقل من حيث الموقع والبنية والتركيب الجيولوجي ومظاهر السطح والعناصر المناخية والسكان والنمو العمراني واستخدام الأرض . الفصل الثاني : ويتناول شبكة الشوارع في المدينة من حيث تطور أطوال الشبكة والتوزيع الجغرافي لها ، وكذاقتها على أساس المساحة والسكان ، والخصائص العامة لشبكة الشوارع من حيث الاتساع وحالة الرصف والجزر الوسطى والأرصفة الجانبية والإشارات المرورية والميادين والتقاطعات الرئيسية . الفصل الثالث : يدرس وسائل النقل بالمدينة من حيث التطور العددي والنوعي ، وتطور نصيب الفرد من المركبات ، وأنواع وسائل النقل كالسيارات (الخاصة ، السرفيس ، التاكسي ، المصالح والشركات ، النقل ، الدراجات البخارية والعادية) ، بالإضافة إلى الوسائل التي تربط المدينة بخارجها وهي شركات الأتوبيسات وسيارات الأجرة بين المحافظات والمدينة . الفصل الرابع : يدرس الحركة داخل المدينة ، والتي تشمل حركة المركبات على شوارع المدينة وقسمت إلى شوارع حجم الحركة عليها مرتفع وشوارع حجم الحركة عليها متوسط وشوارع حجم الحركة عليها منخفض ، بالإضافة إلى رحلات النقل داخل المدينة من حيث الغرض من الرحلة ٢٢٥ والوسيلة المستخدمة فيها ، بالإضافة إلى مستوى كفاءة شوارع المدينة ، وأيضاً الحركة على مداخل المدينة والتي تشمل حركة نقل الركاب وحركة نقل البضائع ومستوي كفاءة هذه المداخل . الفصل الخامس : يتناول تقييم شبكة النقل الداخلي وسبل تميمتها ، ومن أهم المشكلات هي المتعلقة بتخطيط شبكة الشوارع ، ومشكلات متعلقة بوسائل النقل العاملة بالمدينة ، ومشكلات تتعلق بتنظيم الحركة المرورية ،ومشكلات بيئية ناتجة عن النقل ، كما تم رسم خريطة للتصور المستقبلي لتنمية النقل بالمدينة . الخاتمة : والتي تناولت نتائج الدراسة وأهم المقترحات والتوصيات وقائمة بالملاحق والمصادر والمراجع العربية والأجنبية .		
5019	12322989	شعر عزت الطيري :	محمد, إسماعيل محمود إبراهيم.			2015	I start my research with an introduction to the poet in which I briefly talked about him and the influence of the environment on his poetry, and the poetic school he belonged to. Then I divided my research into two main categories each one contains several chapters. The objective elements in the first category: Chapter one: Philandering in Al Taairy's poetry. Chapter two: Compliment, blame and longing. Chapter three: Description. Chapter four: Elegy. Chapter five: Humor and sarcasm. Chapter six: Social poetry. Chapter seven: National (epic) poetry. Chapter eight: meditation and philosophical poetry. The second category was about the technical analysis; I divided it into several chapters: Chapter one: Fiction and artistic image in which I talked about the image from legacy like similar and metaphorical images. I followed that by talking about the suitable images which represent the sprit of the age such as symbolic, sensual and radial images. Chapter two: I talked about the language of the poet through words and structures and the linguistic phenomena which are obvious in his poetry and some of linguistic mistakes which he committed. After that I talked about his own style in the construction of the poem which I thought enough to avoid useless repetition. Chapter three: in this chapter I talked about intertextuality in Al- Taairy's poetry from the holly Qura'n and the purified sunnah, and also from the soffy heritage, religious, popular and mythical legacy. Chapter four: this is about the dramatic construction in Al-Taairy's poetry by comparing		

							it to story and play. That was obvious in the internal and external dialogs in his poetry, the mask, the poems in story and the poems in prose. Chapter five: in this chapter I talked about music in Al-Tairy's poetry with its two kinds external as rhyme and rhythm and internal as repetition, homophone, comparison and contrast. Chapter six in which I talked about the poet in the measure of criticism by documenting all the opinions of the critics about his poetry. Finally I prepared a list of sources and references and conclusion contained the results which I got from my research in Al-Tairy's poetry and some recommendations which I intended to say, then I made an index of subjects. Allah is the guide in whom we put our trust		
5020	12322992		موجب النهي عند الأصوليين :	أمين, رامي محمد أحمد.		2014	عنوان الرسالة / موجب النهي عند الأصوليين ، دراسة تطبيقية على كتاب نيل الأوطار للإمام الشوكاني المتوفى سنة 1250 هـ . إعداد الباحث / رامي محمد أحمد أمين . الدرجة العلمية / رسالة مقدمة لنيل درجة الماجستير في الدراسات الإسلامية (أصول الفقه) . مضمون الرسالة / وتناولت هذه الرسالة بيان النهي عند الأصوليين ، وما يترتب على صدوره من الشارع الكريم من إفادة صريحته للتحريم أو لغیره من الصيغ ، مع بيان عمل القرائن الصارفة للنهي عن حقيقته ، وبيان نوع تأثيرها عليه من حيث مصدرها ، سواء كانت القرينة مقالبة أو حالية، ومن حيث قوتها سواء كانت قطعية أو ظنية ، مع الاعتماد على التطبيقات الفقهية التي توضح اختلاف العلماء في المعاني التي ترد إليها صيغة النهي من حيث الاعتماد على القرائن أو عدمه وذلك من خلال كتاب نيل الأوطار شرح مننقى الأخبار للإمام الشوكاني . محتوى الرسالة / اشتملت الرسالة إجمالاً على مقدمة وباين وخاتمة وفهارس ، أما المقدمة ففيها التعريف بموضوع البحث ، وأسباب اختيار الموضوع ، والدراسات السابقة ، ومنهج البحث ، وأما الباب الأول : فقد خصص للجانب النظري ويكون من تمهيد وثلاثة فصول ،أما التمهيد : فيحتوي على الآتي : أولاً : في التعريف بالإمام الشوكاني وكتابه نيل الأوطار ، ثانياً : في حسن المأمور به وقبح المنهي عنه ،ثالثاً : في أقسام الحكم التكليفي عند الأحناف والجمهور ،أما الفصل الأول : فيتناول تعريف النهي ، وصيغه ،وأما الفصل الثاني : فقد جاء لبيان دلالات النهي ، ومقتضياته ،وأما الفصل الثالث : لبيان القرائن وشروطها وأنواعها ، وأما الباب الثاني :فقد خصص للجانب التطبيقي ويتكون من خمسة عشر مبحث ، وأما الخاتمة : فتشتمل على :أهم النتائج التي تم التوصل إليها ، والتوصيات المقترحة من خلال البحث .		
5021	12323080		الكفاءة الذاتية الصحية والمساعدة الوجدانية وإدارة الحياة وعلاقتهم بالصلاة النفسية لدى مرضى الأورام السرطانية /	علي. محمد عبدالقادر عبدالموجود.		2013	هدفت الدراسة الراحنة نحو معرفة مدى تأثير التباين في كلا من الكفاءة الذاتية الصحية. المساعدة الوجدانية وإرادة الحياة في الصلاة النفسية لدى مرضى الأورام السرطانية. وقد تكونت العينة من (ن = 60) مريضاً بأورام القولون والمستقيم السرطانية. بمتوسط عمري قدره 55.73+ 7.09 , واستخدم الباحث استمارة جمع البيانات, ومقياس المساعدة الوجدانية , ومقياس الصلاة النفسية وهما من إعداد الباحث, ومقياس الكفاءة الذاتية (شويخ, 2007) , ومقياس إرادة الحياة (الخشاب, 2002) , وأسفرت النتائج عن وجود علاقة ارتباطية دالة إحصائياً بين كلا من الكفاءة الذاتية الصحية , والمساعدة الوجدانية والصلاة النفسية, وعدم وجود ارتباط بين هذه المتغيرات وإرادة الحياة. فضلاً عن وجود تأثير واضح لكل من الكفاءة الذاتية الصحية والمساعدة الوجدانية على الصلاة النفسية , وإختفاء التأثير لإرادة الحياة عليها. وقد أسفرت الدراسة الراحنة من عدة نتائج أهمها : 1- توجد علاقة ارتباطية دالة إحصائياً بين كلا من الكفاءة الذاتية الصحية. الصلاة النفسية والمساعدة الوجدانية. فحين لا -1- توجد علاقة بين إرادة الحياة وباقي متغيرات الدراسة لدى مرضى الأورام السرطانية 2- لا يوجد تأثير للمتغيرات الديموجرافية على كلا من الكفاءة الذاتية الصحية. الصلاة النفسية والمساعدة الوجدانية وإرادة -2- الحياة. 3- يوجد أثر واضح للكفاءة الذاتية الصحية على الصلاة النفسية لدى مرضى الأورام السرطانية -3- 4- يوجد أثر واضح للمساعدة الوجدانية على الصلاة النفسية لدى مرضى الأورام السرطانية -4- 5- لا يوجد تأثير لإرادة الحياة على الصلاة النفسية لدى مرضى الأورام السرطانية -5- ونوقشت النتائج في ضوء الدلالات النظرية والتطبيقية للنتائج الدراسة ومدى اتساقها مع دراسات اهتمت بهذه المتغيرات.

5040	12340967		الأحاديث المرفوعه الوارده في الجزء الأول من كتاب التاريخ الكبير لابن أبي خيثمه:	محمدين، مصطفى محمد محمود.		2015	تهدف الدراسه الى محاوله رسم خرائط لآخطار السيول والاضطار النحت النهري وتحديد درجه خطورتهم والمناطق المتألى لعمليات التتبع بمنطقة الدراسه ودراسه الخصائص المورفومترية لاحواض التصريف والحصول على العلاقات الارتباطيه بين ابعاد الاحواض من ناحية وبين الجريان السيلبي من ناحية اخرى وتطبيق التحليل العملي والكشف عن العوامل تهدف الدراسه الى معرفه اثر العوامل الجغرافيه في امتداد شبكه النقل وانعكاساتها على تنميه المدينه ودراسه علاقته بالنقل باستخدامات الارض بالمدينه خاصه السياحي ودراسه حجم حركه المركبات على الكرق الرئيسي بالمدينه وتحليلها وتحديد كفاءه شبكه الطرق بالمدينه مع بيان درجه خطورتها.
5041	12340998		الجيومورفولوجيا التطبيقية لوادى النيل بين قنا ونجع حمادى باستخدام الاستشعار من بعد ونظم المعلومات الجغرافيه/	أبو حديد، أحمد عبد الفتاح حسين.		2015	القرآن الكريم هو كتاب الله المبين الذي نزل به جبريل عليه السلام على خاتم الانبياء والمرسلين سيد الخلق اجمعين محمد بن عبدالله بن عبد المطلب المصطوف في المصاحف المنقول عنه بالتواتر المتعدد بتلاوته ويرى البعض ان القرآن اسم علم غير مشتق ولا مهموز كالنوراء والانجيل خاص بكلام الله .
5042	12341017		جغرافيه النقل في مدينه الأقصر باستخدام نظم المعلومات الجغرافيه/	عثمان، حمدان سعد نجار.		2015	تسعى الدراسه الى الكشف عن مدى الامام الباحثين بجامعة جنوب الوادى بمفهوم الوصول الحر واتجاهاتهم الإيجابية والسلبيه نحوه سواء كانوا متتجين للمعلومات او مستخدمين لها وذلك من خلال دراسه مدى الامام الباحثين بجامعة جنوب الوادى بقنا بمفهوم الوصول الحر للمعلومات ومبادراته ودراسه اتجاهات الباحثين بجامعة جنوب الوادى بقنا نحو نشر واتاحه ابحاثهم لاطلاع الحر عبر مصادر الوصول الحر لكل من يريد الوصول اليها دون قيود.
5043	12341097		ما نسب الى النبي -صلى الله عليه وسلم - وصحباؤه الكرام من القراءات الشاذة :	أحمد، قناوى محمد فاوى.		2014	يهدف البحث الى تحسين مهارات التواصل الاجتماعي اللفظي وغير اللفظي لدى أطفال الروضة في ضوء نظريه التعلم الاجتماعي المعرفي وذلك في ضوء البرنامج المعد في البحث الحالي ويسهم البحث في تقديم فهم أكثر لخصائص الطفل مما يساعده على وضع أنشطة متنوعة تناسب قدراته وإمكانياته تعمل على تحسين مهارات التواصل الاجتماعي لديه انطلاقاً من مبدأ مراعاة الفروق الفردية بين الأطفال لتسليط الضوء على هذه الفئه يساهم في الكشف المبكر عنهم وتقديم البرنامج اللازم لتحسين مهارات التواصل الاجتماعي لديهم.اهداف البحث :- يهدف البحث الحالي الى : تحسين مهارات التواصل الاجتماعي اللفظي وغير اللفظي لدى أطفال الروضة في ضوء نظرية التعلم الاجتماعي – المعرفي وذلك في ضوء البرنامج المعد في البحث الحالي . اهمية البحث :
5044	12341169		أنماط الأفاذه من مصادر الوصول الحر للمعلومات لدى الباحثين بجامعة جنوب الوادى:	على، زينب على بكرى.		2015	تظهر الأهمية النظرية للبحث الحالي في الآتى :- تتبع أهمية البحث الحالي من خلال تناوله لنظرية التعلم الاجتماعي- المعرفي التي -١ تعد من النظريات التي نالت الاهتمام من العلماء والباحثين لتقديمها وجهة نظر جديدة للتدريب من خلال استخدام أسلوب النمذجة والتي تختلف عن وجهة النظر التقليدية التي سادت سنوات طويلة في المجال التعليمي ولعرضها لإطار مرجعي يوضح كيفية بناء الخبرة التعليمية من خلال احتكاك الفرد بالبيئة المحيطة به وتفاعله معها مما يسمح باكتساب مهارات اللغة . يسهم البحث الحالي في تقديم فهم أكثر لخصائص الطفل مما يساعده على وضع أنشطة -٢ انطلاقاً من مبدأ مراعاة الفروق الفردية بين الأطفال.
5045	12341190		مهارات التواصل الاجتماعي اللفظي/ غير اللفظي لدى أطفال الروضة بمحافظة سوهاج وبرنامج مقترح لتحسين هذه المهارات/	محمد، رضى حمدي.		2015	يهدف البحث الى تحسين مهارات التواصل الاجتماعي اللفظي وغير اللفظي لدى أطفال الروضة في ضوء نظرية التعلم الاجتماعي – المعرفي وذلك في ضوء البرنامج المعد في البحث الحالي . اهمية البحث :

					تسليط الضوء على هذه الفئة يساهم في الكشف المبكر عنهم وتقديم البرنامج اللازم لتحسين -٢- مهارات التواصل الاجتماعي لأدبيهم . مهارات التواصل الاجتماعي لأدبيهم XXXXXXXXXXXXXX تظهر الأهمية التطبيقية للبحث الحالي في الآتي :- تمثل هذه الأهمية في إمكانية الاستفادة من نتائج البحث الحالي في مجال التطبيق العملي ،حيث يقدم برنامجاً تدريبياً يمكن أن يسهم في تحسين مهارات التواصل الاجتماعي اللفظي وغير اللفظي لدى أطفال الروضة من خلال اكتساب استجابات جديدة و تعديل استجابات غير مرغوب فيها وتغيير استجابات غير مناسبة.حدود البحث :- تتحدد نتائج البحث الحالي بالعينة المستخدمة والتي بلغ حجمها (٨٠) طفلاً لا من أطفال م / ٦ سنوات من مدارس محافظة سوهاج خلال العام الأكاديمي ٢٠١٢ : الروضة من ٢٠١٤ وقد روعي عند اختيار أفراد العينة أن يكون اختياراً عشوائياً ، كذلك خلوهم من أى إعاقات جسمية والتأكد من سلامة الحواس . أدوات البحث :- تتحدد الأدوات المستخدمة في البحث الحالي والمتمثلة في الآتي : بطاقتي ملاحظة مهارات التواصل الاجتماعي اللفظي وغير اللفظي (إعداد : الباحثة)-٢- برنامج لتحسين مهارات ١- التواصل الاجتماعي اللفظي وغير اللفظي لدى أطفال الروضة (إعداد : الباحثة) مفاهيم البحث الإجرائية :- تعريف التواصل • Communication: عملية اتصال بين طرفين أحدهما المعلم ، والآخر المتعلم ، وتتوافر فيه مقومات الإصال الشخصي وهو ما لا يتاح للمتعلم من خلال الدراسة الذاتية بأنشائها المختلفة وكلما كان المعلم قادراً على إثراء مواقف الاتصال عن طريق المناقشة ، كلما كانت مواقف التعليم مؤثرة كان التعليم باقي الأثر (أحمد حسين القفاني ، على أحمد الجمل ، ٢٠٠٣ : ٩) . أو عملية معقدة تتجج وتفشل ، وتصيب وتخطئ ، وتوصل صاحبها إلى أهدافه أو قد يحدث العكس (مثال عبد الخالق جاب الله ، ٢٠١٢ : ٤٥) . وتعرف الباحثة إجرائياً بأنه : قدرة الطفل على التواصل مع المعلمة من خلال استخدام الكلمات والمفردات والرموز جنباً إلى جنب مع الإشارات والإيماءات كما تقاس بالمقياس المعد في البحث الحالي. (إعداد الباحثة) .
5046	12341209	مصطفى، نسرين صلاح.	المتغيرات الاجتماعية المرتبطة بالعنف الأسري ضد الأطفال:		منذ بداية الثأرية شهدت البشرية أحداث كثيرة تميزت بالعنف الأسري بدأت بقتل قابيل لأخيه هابيل واستمرت حتى الآن أكثر تنوعاً وقسوة على الرغم من أن جميع الأديان السماوية دعت إلى الرحمة والمودة والتسامح والاسلام يوصي الإنسان بأخيه مهما كانت دينته أو جنسيته ومبادهه تأمر بالمعروف والنهي عن المنكر.
5047	12341230	عليان، عبيد ابراهيم عبيد أحمد.	الترابط النصي في سور (آل حم)/		تهدف الدراسة إلى الإفادة من معطيات علم اللغة النصي في تحليل سور آل حم وإبراز عناصر الترابط النصي ودورها في تماسك النص واتساجمه وصف علاقات الترابط النصي القائم بين الجمل والتعرف على دور علماء اللغة العرب في وضع نواه علم اللغة النصي قبل علماء الغرب.
5048	12341528	عبدالله، حمدي عبدالله عبدالعال.	الممارسة العامة في الخدمة الاجتماعية وتنمية بعض المهارات الاجتماعية للأطفال المتخلفين عقلياً القابلين للتعليم/		تسعى الدراسة الحالية إلى تحقيق هدف رئيسي موده اختبار العلاقة بين استخدام الممارسه العامه للخدمه الاجتماعيه وتنميه بعض المهارات الاجتماعيه للأطفال المتخلفين عقلياً القابلين للتعليم وينبثق من هذا الهدف مجموعه من الاهداف الفرعيه المتمثله في اختبار العلاقة بين استخدام الممارسه العامه للخدمه الاجتماعيه وتنميه المهارات الاجتماعيه للشخصيه للأطفال المتخلفين عقلياً القابلين للتعليم واختبار العلاقة بين استخدام الممارسه العامه للخدمه الاجتماعيه وتنميه المهارات الاجتماعيه المدرسيه للأطفال المتخلفين عقلياً القابلين للتعليم.
5049	12341547	حفني، علي ثابت ابراهيم.	الاضطرابات الانفعاليه والسلوكيه لدى تلاميذ المرحلة الابتدائيه ذوي صعوبات التعلم وعلاقتها بالاداء المهاري والتعلم الابتكاري		تهدف الدراسة الى التعرف على فعاليه برنامج ارشادي انتقائي تكاملي في خفض بعض الاضطرابات الانفعاليه والسلوكيه لدى تلاميذ المرحلة الابتدائيه ذوي صعوبات التعلم عينه الدراسه وبعض المتغيرات الاسريه الكامنه التي تسهم في ظهور بعض الاضطرابات الانفعاليه والسلوكيه لدى تلاميذ المرحلة الابتدائيه ذوي صعوبات التعلم عينه الدراسه.
5050	12341564	اسماعيل، أكرم محمد طلعت.	فأعليه برنامج ارشادي تكاملي لخفض بعض الاضطرابات الانفعاليه وأثرها على الأمن النفسي لدى تلاميذ التعليم الأساسي/		هدفت الدراسه الحاليه للتعرف على مدى فاعليه برنامج ارشادي تكاملي لخفض بعض الاضطرابات الانفعاليه وأثرها على الأمن النفسي لدى تلاميذ التعليم الاساسي وتكونت عينه الدراسه الاستطلاعيه من (200) تلميذا وتلميذه من تلاميذ مرحله الاعدياديه والعينه التجريبيه من 30 تلميذ من تلاميذ مرحله الاعدياديه طبقت عليهم ادوات الدراسه المتمثله في مقياس الاضطرابات الانفعاليه لدى تلاميذ التعليم الاساسي ومقياس الأمن النفسي .
5051	12341682	العجمي، فهد نايف محمد.	الأدراك الحسي- حركي وعلاقته بالأداء المهاري والتعلم الابتكاري لتلاميذ المرحلة المتوسطة بدولة الكويت/		يهدف البحث إلى التعرف على الإدراك الحسي-حركي وعلاقته بالأداء المهاري والتعلم الابتكاري لتلاميذ المرحلة المتوسطة بدولة الكويت وذلك من خلال التعرف على تأثير البرنامج المقترح للإدراك الحسي-حركي على مستوى الأداء المهاري في كره القدم لتلاميذ المرحلة المتوسطة بدولة الكويت وتأثير البرنامج المقترح للإدراك الحسي-حركي على مستوى التعلم الحركي لتلاميذ المرحلة المتوسطة بدولة الكويت.
5052	12341716	محمود، عواطف حفني.	أشغال الخشب في عصر الفاره الدينيه القطييه والإسلاميه الباقيه من القرن الثالث عشر الهجري / التاسع عشر الميلادي/		إن دراسه اشغال الخشب في عصر الفاره الدينيه القطييه من اهم الدراسات التي تكشف الستار عما كان عليه الاقباط من تقدم في مجال الفنون اما اشغال الخشب في عصر الفاره الدينيه الاسلاميه فقد شهدت نهضة حضاريه كبيره في القرن الثالث الهجري/ التاسع عشر الميلادي شملت جميع نواحي الحياه حيث نلاحظ ان اشغال الخشب في هذه الفتره استخدمت على نطاق واسع في العمارت التي شيدت خلال هذه الفتره مع تنوع اشكالها.
5053	12341766	علي، يسرى سالم محروس.	دراسه تأثير غازات التلوث الجوى فى صدأ الآثار النحاسيه وسباتكها فى البيئات الداخليه والخارجيه بالقاهره وطرق العلاج الوقايه/		لا يهدف ترميم وصيافه الآثار الى علاج وحفظ المواد الأثرية فحسب بل أيضا يحاول فهم اسباب تلفها ومكونات وتواتج هذا التلف والتي قد تصل الى حد يصعب التعرف عليه ولذلك تستخدم الفحوص والتحليل المختلفه التي تساعد في تفسير هذه الظواهر لذلك جاء المنهج العلمى لهذه الدراسه والتي بعنوان دراسه تأثير غازات التلوث الجوى فى صدأ الآثار النحاسيه وسباتكها فى البيئات الداخليه والخارجيه بالقاهره وطرق العلاج الوقايه مقسم الى سته فصول.
5054	12341800	محمود، أحمد محمود أحمد.	تقويم مقرر الجغرافيا في ضوء المعايير الجغرافية العالمية لتنمية المفاهم والمهارات الجغرافية لدى التلاميذ المعوقين سمعياً بالصف (الثالث الإعدادي/		يهدف البحث الى توافر المعايير الجغرافيه العالميه في اهداف مقرر الجغرافيا للتلاميذ المعوقين سمعياً بالصف الثالث الاعديادى ونسب توافر المعايير الجغرافيه العالميه في محتوى مقرر الجغرافيا للتلاميذ المعوقين سمعياً بالصف الثالث الاعديادى.
5055	12341825	عليان، هاني شحات أحمد.	فعالیه برنامج تكاملي للأطفال والاباء والمعلمين لخفض بعض اضطرابات التواصل لدى الأطفال التوحدين/		تهدف الدراسه الحاليه الى التعرف على فعالیه برنامج تكاملي للأطفال والاباء والمعلمين لخفض بعض اضطرابات التواصل لدى الأطفال التوحدين ومدى استمرار فعالیه البرنامج التكاملی المقترح بعد مرور شهرين من انتهاء تطبيق البرنامج.
5056	12341869	دنذراوى، محمد الراوى.	الجيومورفولوجيا التطبيقية لوادي النيل فيما بين الانصر وقنا باستخدام نظم المعلومات الجغرافية والاستشعار من بعد/		تهدف الدراسة إلى رسم خريطة جيومورفولوجية حديثة لمنطقة الدراسة وتحديد العوامل والعمليات التي اسهمت في تشكيلها والتعرف على الزمن الذي استغرقته في نشأتها والوقوف على اهم الاخطار الجيومورفولوجيه بالمنطقه وأثرها على الانشطة البشريه ووضع تصور مستقبلي لوادي النيل في منطقة الدراسة.
5057	12341895	المصري، منال غريب يسن.	استخدام أعضاء هيئة التدريس والهيئة المعاونه بجامعة جنوب الوادي لتكنولوجيا المعلومات في التدريس والبحث العلمي/		تتناول هذه الدراسة استخدام الانترنت في التعليم والبحث العلمى لدى اعضاء هيئة التدريس بلكليات التربية بجامعة الهنيهة واظهرت الدراسة تأثير استخدام اعضاء هيئة التدريس للانترنت في البحث العلمى بين الاعضاء بالتخصص والمصالح الاعضاء من ذوى التخصصات الانسانيه والتربويه .

						وقد قامت الباحثة بدراسة إستطلاعية حيث تم إعداد قائمة إستقصاء، والتي تحتوى على مجموعة من الأسئلة المفتوحة والمغلقة حيث تناقش العلاقة بين ثقافة المنظمة وتمكين المرأة في القيادات الأكاديمية وأثر بعض العوامل الفردية على تمكين المرأة وتم توزيعها على أعضاء هيئة التدريس من الإناث والتي تشمل اللغات التالية (مدرس، أستاذ مساعد، أستاذ) حيث أخذت عينة قدرها 30 مفردة منها (19عضو هيئة تدريس من الكليات العملية، 11 عضو هيئة تدريس من الكليات النظرية) وتبين من هذه الدراسة ما يلى :- بالنسبة للكليات العملية :- تشير الدراسة الإستطلاعية أن نسبة من يويدون أن هناك علاقة بين ثقافة وتمكين المرأة في القيادات الأكاديمية بلغت حوالي 78% منها 48% يرون أن ثقافة المنظمة إيجابية وبالتالي تمثل دور إيجابي في تمكين المرأة في القيادات الأكاديمية ونسبة 30% يرون أن ثقافة المنظمة سلبية وبالتالي تمثل دور سلبي في تمكين المرأة في القيادات الأكاديمية 96% لوحظ أن للعوامل الديموغرافية والتنظيمية دور في تمكين المرأة في القيادات الأكاديمية حيث وجد أن نسبة 30 % يرون أن لنوع الرئيس المباشر (ذكر / أنثى) دور في تمكين المرأة في القيادات الأكاديمية بالرغم من وجود كفاءة ذاتية لها وأثبتت الدراسة أيضا إن الرئيس المباشر الأثني له تأثير إيجابي على تمكين المرأة في القيادات الأكاديمية أكثر من الرئيس المباشر الذكر، كما اتضح أيضا طبيعة الكلية (نظرية / عملية) دور في تمكين المرأة في القيادات الأكاديمية وذلك بنسبة منهم 20% يرون أن للكليات النظرية تأثير إيجابي أكثر من الكليات العملية و 20% آخرون يرون العكس 40% بالنسبة للكليات النظرية :- تشير الدراسة الإستطلاعية أن نسبة من يويدون أن هناك علاقة بين ثقافة المنظمة وتمكين المرأة في القيادات الأكاديمية بلغت حوالي 91% منها 55% يرون أن ثقافة المنظمة إيجابية وبالتالي تمثل دور إيجابي في تمكين المرأة في القيادات الأكاديمية ونسبة 36% يرون أن ثقافة المنظمة سلبية وبالتالي تمثل دور سلبي في تمكين المرأة في القيادات الأكاديمية 96% لوحظ أن للعوامل الديموغرافية والتنظيمية دور في تمكين المرأة في القيادات الأكاديمية حيث وجد أن نسبة 82 % يرون أن لنوع الرئيس المباشر (ذكر/ أنثى) دور في تمكين المرأة في القيادات الأكاديمية بالرغم من وجود كفاءة ذاتية لها وأن الرئيس المباشر الأثني له تأثير إيجابي على تمكين المرأة في القيادات الأكاديمية أكثر من الرئيس المباشر الذكر، كما اتضح من خلال الدراسة الإستطلاعية أن طبيعة الكلية (نظرية / عملية) دور في تمكين المرأة في القيادات الأكاديمية وذلك بنسبة 40%منهم 20% يرون أن للكليات النظرية تأثير إيجابي أكثر من الكليات العملية و 20%آخرون يرون العكس وكذلك أوضحت الدراسة الإستطلاعية أن تمكين المرأة في القيادات الأكاديمية سوف يوفى لها مزايا سواء على المستوى الشخصي أو الوطني أو الاجتماعي
					2015	يهدف هذا البحث الى الحفاظ على ثرات مصر وحضارتها والذي سيظل وسيبقى خالداً وشامخاً للجيل القادمه والاستغناء نهائياً عن الآراء الترجيعيه في لجان معابنه الاحراز حتى لا نقتد آثارنا بسببها والبحث عن الطرق المؤكده لكشف تزييف وتزوير التماثيل الحجرية والتحقق من اصالتها وذلك بالتعرف على طرق التزييف المختلفه والتقدم الصناعى والطبيعى وغيرها من النقاط العلميه المختلفه والمربطه بهذا الموضوع.
					2015	جاءت الدراسة لأبراز جانب من الفنون العثمانية بالقاهرة والوقوف عليه تفصيلاً من حيث المسميات والوثائق وعلاقة الإثاث بالوحدات بالإضافة الى أشكاله وخاماته والأساليب المتبعة في صناعته وزخرفته ومواضعه واستخداماته داخل المنزل.
					2015	تكتسح اهمية هذا الموضوع لما له من جوانب حضارية تتضمن في ثناياها ما يربط بين تفاصيل كثيرة في حياة المصري القديم منها ما هو ديني وما هو زراعي وما هو فني وما هو معماري وما هو رمزي.
					2015	يهدف البحث الى محاربه التعرف على اكثر الانحرافات القواميه شيوعا لدى تلاميذ الصف السادس من المرحلة الابتدائية بمحافظه قنا ونسبه انتشار الانحرافات القواميه الشائعة بين تلاميذ الصف السادس من المرحلة الابتدائية بمحافظه قنا.
					2015	يعد هذا البحث إحدى المحاولات العلمية لارتفاع بمستوى الأداء البدني والمهاري للاعبين الوترب حيث يسعى هذا البحث لوضع مجموعة من التدريبات المشابهة من خلال التحليل العلمي لهذه المهارة للاعب مميز في طريقة الأداء بهدف تحسين الاداء المهاري.
					2015	يهدف البحث الى بناء برنامج حركية يهدف الى تنمية المهارات الاجتماعية لتلاميذ المرحلة الابتدائية بدولة الكويت والتعرف على درجات مقاييس المهارات الاجتماعية لتلاميذ المرحلة الابتدائية قيد البحث وفقاً لطبيعة النشاط الرياضي الممارس.
					2015	يشتمل اهمية البحث في استخدام خرائط المفاهيم في تعلم مهارات كره القدم لطلاب المرحلة الاعدايه وتأثير استخدام خرائط المفاهيم على تعلم بعض مهارات كره القدم لدى تلاميذ المرحلة الاعدايه.
					2015	التعرف على دور الاداره الالكترونيه في تفعيل الاتصال بين اللجنة الاولمبيه والاتحادات الرياضيه في دولة الكويت من خلال معرفه الواقع الفعلي للاتصال بين اللجنة الاولمبيه والاتحادات الرياضيه في دولة الكويت ومعرفة معوقات الاتصال الاداري بين اللجنة الاولمبيه والاتحادات الرياضيه في دولة الكويت واساليب تطوير وسائل الاتصال بين اللجنة الاولمبيه والاتحادات الرياضيه في دولة الكويت.
					2015	ترجع اهمية البحث الى تعديل وجهه النظر الخاصه بميدري المدارس المتوسطة نحو اقسام التريبيه البدنيه والنشاط الرياضي بالمدارس وزيادة تفعيل النشاط الرياضي المدرسي عن طريق التعاون بين مديري مدارس المتوسطة واقسام النشاط الرياضي المدرسي.
					2015	يكسب البحث اهميته من خلال قد تسهم الوسائط المتعدده في تعلم بعض مهارات كره اليد للتلاميذ للمكفوفين من ضروره استخدام الاساليب والوسائل التعليميه الحديثه التي تثير اهتمام المتعلمين وتهيئ لهم الفرص للقيام بدور ايجابي في عمليه التعلم والتفاعل الايجابي مع الموقف التعليمي والربط بين معلوماتهم السابقه.
					2015	قد تسهم استخدام الوسائط المتعدده في تعلم بعض مهارات كره اليد للتلاميذ الصم والبكم ويأتي البحث في اطار ما نادى به الباحثون في مجال تكنولوجيا التعليم من ضروره استخدام الاساليب والوسائل التعليميه الحديثه التي تثير اهتمام المتعلمين وتهيئ لهم فرصه القيام بدور ايجابي في عمليه التعلم والتفاعل الايجابي مع الموقف التعليمي والربط بين معلوماتهم السابقه.
					2015	يهدف البحث الى تصميم برنامج مقترح لتنميه الكفايات المهنيه لمعلمي التريبيه البدنيه بالمرحلة الثانويه بدولة الكويت.
					2014	edentulous patiens often experince problems with thier mandbular complete dentures lake of stability and retention together with adressed chewing are ability are the main complaints of these patian
					2015	تهدف الدراسة الى اللقاء الضوء على احد العماثر الذنيه التي شاعت وانتشرت في منطقة الاضاحول خلال القرن السابيه الهجرى م الثالث عشر الميلادى والتي كان لها اكبر الاثر في الاقاليم المحيطة بها ولاسيما العراق وايران واسيا الوسطى للعديد من الاعتبارات السياسيه والاجتماعيه والدينيه وهى منشآت التصوف والتي جاءت مخططاتها تتكون من عدة وحدات ابرزها هو التريه وقاعة التصوف كما تضم خلاى للمريدين وحجره الشيخ ومطبخ ومكتبه وحمام ودار للضيافه ودورات للمياه .
					2015	تهدف الدراسة الى التعرف على وظيفيه التحف الزجاجيه وذلك من خلال وصف وتحليل تلك التحف من الجانب الوظيفي مما يعطى صورة كامله للقرىء عن كيفية استخدام التحف الزجاجيه بتواعها المختلفه.
					2015	تم الأخذ بالتعبير كتابات تذكارية كعنوان لهذه الدراسة لان الكلمة الأكثر شيوعا بين الدارسين لهذه الكتابات في اللغة العربية وهى المخرفشات هى الترجمة الحرفية للكلمة الإيطالية graffaire التى تعنى فى الانجليزية little scratching .

							كما أن برنامج التربية الرياضية يشتمل على مجموعة من المكونات هي الأهداف العامة له ومحتواه من المادة العلمية والطرق والوسائل والأنشطة التي يمكن استخدامها لتنفيذ هذا البرنامج وأساليب تربيته وللثروة الرياضية الأساسية بتدريسها وهذه الأساليب تقوم على أساس علمي مستقاة من أصول التربية ونظرياتها وأساس علم النفس بغرضه المختلفة ومستندة على أساس العلوم الطبية والعلوم الإنسانية على أن المعلم عليه إلا يلتزم بأسلوب تدريس ثابت لأن نجاح الأسلوب يتوقف على عوامل عديدة منها المادة المراد تعلمها وإمكانات الفرد المتعلم ؛ إلى أنه من الضروري ان تكون لدى المعلم اختيارات متعددة لأساليب التدريس حتى لا يفت عند أسلوب معين ويمكن ان يختار من بين هذه الأساليب ما يكون مناسباً لسلوك المتعلم والمواقف العلمية . إلى جانب انه ليس هناك أسلوب تدريس واحد يمكن ان يكون ناجح مع كل التلاميذ او يمكن من خلاله تحقيق كل الأهداف ويجب أن لا يلزم المعلمون أنفسهم أسلوب واحد؛ كما يتعين أن يدركوا حقيقة أن الأساليب يمكن أن تتطور وتتكيف لتناسب مع أى موقف تعليمي. أن تحقيق التربية الشاملة والمتزنة للنشئ والوصول بهم إلى أعلى مستوى رياضي ممكن في أى نوع من أنواع الأنشطة الرياضية المختلفة هي اسما أهداف التربية الرياضية التي تخضع في هذا العصر للتغيير السريع في طرقها ووسائلها ونظرياتها ويظهر لنا جليا واضحا مدى تقدم الشعوب باستخدامها التكنولوجيا الحديثة والاستفادة بها في جميع المجالات لما لها من مميزات استطاعت عن طريقها تلافي بعض التقصير والعيوب في أساليب التعليم والتدريس . وكرة اليد من الألعاب المدرجة بمناهج التربية الرياضية حيث تدرس عن طريق مجموعة من المهارات الأساسية التي تم اختيارها بما يتناسب مع المرحلة السنية ومن خلال عمل الباحث كمدرس للتربية البدنية بدولة الكويت ، وجد أن طرق التدريس التقليدية غير كافية لإتقان المهارات الأساسية للصم والبكم للعبة ، ولابد من مواكبة التقدم في العملية التعليمية بصفة عامة والتربية الرياضية بصفة خاصة ، وكذلك لابد من الاستفادة بالإمكانات الموجودة داخل المدارس ، والتي وفرتها الدولة لخدمة العملية التعليمية ، فالمدارس مجهزة بمعامل الوسائط المتعددة التي يجب الاستفادة منها لتطوير العملية التعليمية لمواكبة التقدم العلمي والتكنولوجي ، وخاصة في عملية التعليم والتدريس كما أن زيادة أعداد التلاميذ في الفصل الواحد تجعل من الصعب أن يقوم المدرس بتعليم كل هذا العدد والإشراف المباشر والتوجيه لكل هؤلاء التلاميذ، ويرى الباحث أن لابد للمعلم أن يستخدم الطريقة المناسبة التي تتفق مع الموقف التعليمي والإمكانات الموجودة بالمدرسة ، مما يكون له الأثر في نمو التلاميذ في كافة الجوانب ،وفقا لحاجتهم وبما يتماشى مع الأهداف الموضوعه للتربية الرياضية المدرسية ، وحتى يمكن القيام بعملية التعليم بطريقة فعالة 0 يعتبر درس التربية الرياضية له دور كبير في إعداد النشء ؛ حيث يعمل على تنمية جوانب الشخص واكتساب المعارف وتنمية الصفات البدنية وتعلم المهارات الحركية الرياضية والمعادن الصحية السليمة وبالرغم من أهمية درس التربية الرياضية في إعداد وتربية التلاميذ تربية كاملة مژنة بدنيا وعظليا ونفسيا واجتماعيا ؛ إلا أن هناك الكثير من المعوقات التي تواجه القائمين على تدريس مناهج التربية الرياضية بالمرحل التعليمية المختلفة ؛ وتقف حائلا أمام تحقيق الأهداف والمطلوبات التعليمية والتربوية لدرس التربية فقلة عدد دروس التربية الرياضية الأسبوعية بالإضافة إلى محتوى المنهج الضخم الذي يضم ترميزات الإعداد البدني والرياضات الأساسية والألعاب الفردية والجماعية علاوة على زيادة الكثافة العددية للتلاميذ بالفضول. كل ذلك القى عبئا كبيرا على مدرس التربية الرياضية جعله لا يستطيع القيام بعملية التدريس والإشراف والتوجيه لكل تلميذ تطبيقا لمبدأ الفروق الفردية ومما يزيد المشاكل حرجا عدم توافر الملاعب والنقص الكبير في الأجهزة والأدوات الذي يعوق النجاح درس التربية الرياضية. من خلا عمل الباحث بالتدريس لمادة التربية البدنية بالمرحلة الثانوية لاحظ ان اغلب المعلمين لا يستخدمون سوى أسلوب واحد في التدريس وهو أسلوب الشرح والنموذج الذي يقتصر في بعض الأحيان إلى جعل المواقف التعليمية أقل فاعلية وهذا الأسلوب يتصف بأن المعلم هو الذي يأخذ جميع القرارات من تخطيط وتنفيذ وتقييم ويأخذ التلميذ فيه دورا سلبيا في عملية التعليم مما يجعل المعلم يئذل جهدا كبيرا لا يستطيع معه تدريس جميع الحصص المسندة إليه الموجودة بالجدول المدرسي. كما ان زيادة عدد التلاميذ في الفصل الواحد تجعل من الصعب ان يقوم المعلم بتعليم كل هذا العدد والإشراف المباشر والتوجيه لكل هؤلاء التلاميذ في الوقت المخصص لحصة التربية الرياضية . وبالإطلاع على العديد من المراجع والدراسات والبحوث التي اجريت في مجال اساليب التدريس للمهارات الحركية وجد ان هذا الأسلوب قد لا يؤدي غالبا إلى تعلم فعال ومثمر ولكي تتم العملية التعليمية بالفاعلية المطلوبة لابد للمعلم ان يستخدم أكثر من أسلوب للتدريس والتعليم لأنه لا يوجد أسلوب واحد جيد فالأسلوب الجيد عند تدريس . مهارات حركية معينة قد لا تناسب عند تدريس مهارات حركية أخرى وهذا ما اكدته عفاف عبد الكريم(5)حيث اضافت أن نسبة الاعتماد على أسلوب دون الآخر يتوقف على نوع المهارة والمواقف التعليمية والتلميذ الذي تسعى التربية الرياضية إلى ضمان نموه في كافة جوانب وفقا لحاجاته وميوله وقدراته واستعداداته ومشكلاته لتتيح الفرصة له ان يحقق أكثر قدر من النمو في جميع جوانب ويمكن من القيام بعملية التعليم بطريقة مثمرة وفعالة.إذا رأى الباحث أن من واجبه كمعلم للتربية الرياضية بالمرحلة الثانوية أن يستخدم أسلوب توجيه الأقران متعدد المستويات ومعرفة أثره على أداء بعض مهارات كرة اليد لتلاميذ المرحلة الثانوية والتعلم بتوجيه الأقران يساعد التلاميذ على تعلم المهارات بطريقة مبسطة وبعيدة عن الملل ويساعد في تنمية السلوك التعاوني والتفاعل الاجتماعي بينهم وحتى يسهم في تطور مهنة التدريس بالتربية الرياضية ووضعها في موضعها الصحيح بجانب المهن الأخرى هدف البحث : يهدف هذا البحث إلى التعرف على تأثير برنامج تعليمي باستخدام توجيه الأقران متعدد المستويات على أداء بعض مهارات كرة اليد لتلاميذ المرحلة الثانوية بدولة الكويت . فروض البحث : توجد فروق ذات دلالة إحصائية بين متوسطات درجات القياسين- القبلي والبعدي لطلاب المجموعة الضابطة في التعلم المهاري والتحصيل المعرفي في مهارات كرة اليد قيد البحث ولصالح القياس البعدي. توجد فروق ذات دلالة إحصائية بين متوسطات درجات القياسين- القبلي والبعدي لطلاب المجموعة التجريبية في التعلم المهاري والتحصيل المعرفي في مهارات كرة اليد قيد البحث ولصالح القياس البعدي. توجد فروق ذات دلالة إحصائية بين متوسطات درجات القياسين- البعدين للمجموعتين الضابطة والتجريبية في التعلم المهاري والتحصيل المعرفي في مهارات كرة اليد قيد البحث ولصالح المجموعة التجريبية. نسبة التحسن للمجموعة التجريبية أعلى من المجموعة الضابطة في- التعلم المهاري والتحصيل المعرفي في مهارات كرة اليد قيد البحث.

5103	12344481	خصائص الشخصية القيادية المرتبطة بالتوافق النفسي وفعالبيه برنامج ارشادي سلوكي لتنميتها لدى طلاب المرحلة الثانوية/ عبدالله ، الهام فتحى بغدادى.				2015	ان طالب المرحلة الثانوية يمر بمرحلة تنسم بالعديد من التغيرات بإعتبارها تتوسط مرحلة المراهقه ولذا قد نجده في حاله من التوافق مع بيئته او في حاله من سوء التوافق لدى طلاب المرحلة الثانوية .		

5104	12344502	تأثير برنامج تدريبي لتنمية العضلية المتوازنة في بعض المتغيرات البدنية على المستوى الرقعي لنادي الوثب الطويل/ محمد، أسامه ابو المجد أحمد.			2015	هدف البحث تطوير المستوى الرقعي لنادي الوثب الطويل وذلك من خلال: وضع برنامج تدريبي لتقليل نسبة اختلال التوازن العضلي للقوة لنادي الوثب الطويل والتعرف على تأثير البرنامج التدريبي لبعض المتغيرات البدنية والمستوى الرقعي لنادي الوثب الطويل.أشار "عبد العزيز النمر ،ناريان الخطيب "(1996م)أن العضلات تعمل في أزواج ،فعندما تنقبض عضلة أو مجموعة عضلية فإن العضلة أو المجموعات العضلية المضادة لها تسترخي كي لا تعوق الحركة وعند وصول الطرف المتحرك إلى الحد النهائي لمدي حركة المفصل فإن العضلة أو المجموعة العضلية المضادة تنقبض انقباضاً لحظياً يتناسب مع قوة انقباض العضلة أو العضلات العاملة (الحركة الأساسية) وسرعة الطرف المتحرك لإيقاف الحركة.(36 :28). أشار "عبد العزيز النمر" (1996م) إلى أن التوازن في تطوير القوة العضلية على المفصل الواحد له عدة فوائد هي : 1. نتائج أفضل . 2. مدي حركي أفضل . 3. نتائج سرعة أفضل . 4. (36 :65)الوقاية من الإصابة . تشير "ناريان الخطيب"(1997م) أن التدريب الرياضي الخاص بمسابقة الوثب الطويل يؤدي إلى تكيف مميز لتطويع المجموعات العضلية المقابلة ومن الرائج العلمية والدراسات المرجعية وفي حدود علم الباحث أن التدريب على العضلات الأمامية فقط وإهمال العضلات العضلات المقابلة يؤدي ذلك إلى نشأة ما يسمى باختلال التوازن العضلي (66 : 391) لذا يجب على المدرب أن ينتبه أن لكل أداء مهاري تأثيراً مباشراً على مجموعات عضلية دون الأخرى وأن الاستمرار في التدريب لفترات طويلة غالباً ما يؤدي إلى حدوث عدم توازن بين المجموعات العضلية الأمامية والخلفية . فعند تحسين القوة العضلية على مفصل ما ، يجب أن تطور كل من العضلات التي تعمل على التثني والمد ، وهذا ما لا نجده دائماً عند القياسات القلبية حيث نجد زيادة في قوة المجموعات العضلية التي يقع عليها عبء أكبر في الأداء . هدف البحث : تطوير المستوى الرقعي لنادي الوثب الطويل من خلال : وضع برنامج تدريبي لتقليل نسبة اختلال التوازن العضلي للقوة لنادي الوثب الطويل - . التعرف على تأثير البرنامج التدريبي لبعض المتغيرات البدنية والمستوى الرقعي لنادي الوثب الطويل - فروض الدراسة :- توجد فرق دالة إحصائية بين القياس القبلي والبعدي لنسبة تحسين القوة العضلية المتوازنة في بعض المتغيرات -1 البدنية لنادي الوثب الطويل لصالح القياس البعدي . توجد فروق دالة إحصائية بين القياس القبلي والبعدي لنسبة تحسين القوة العضلية المتوازنة والمستوى الرقعي -2 لنادي الوثب الطويل لصالح القياس البعدي . خطوات وإجراءات البحث أولاً: منهج البحث: استخدم الباحث المنهج التجريبي بنظام (المجموعة الواحدة) لمناسبتها لطبيعة هذه الدراسة وأسلوبها، مستخدماً في ذلك التصميم التجريبي الذي يعتمد على (القياس القبلي والقياس البيني والقياس البعدي). ثانياً: مجتمع وعينة البحث: : مجتمع البحث(أ) : يتكون مجتمع البحث من لاعبي نادي سواهج الرياضي والمسجلين بالاتحاد المصري لألعاب القوى في الوثب الطويل - تحت 18 سنة وعددهم (10) متسابق : عينة البحث(ب) : تم اختيار عينة البحث بالطريقة العمدية من لاعبي نادي سواهج الرياضي والمسجلين بالاتحاد المصري لألعاب القوى في - الوثب الطويل واشتملت العينة على(10) متسابقاً منهم (7) متسابقين كعينة أساسية، و(3) متسابقين للدراسة الاستطلاعية :إدوات جمع البيانات • استخدم الباحث عدداً من الأدوات التي ساعدته في جمع البيانات المتعلقة بالدراسة والتي أفادته في تحقيق هدفه ومنها ما يلي: : المراجع والبحوث العلمية المرتبطة بالبحث(أ) : قام الباحث بالإطلاع على العديد من المراجع العلمية والدراسات السابقة العربية والأجنبية المتخصصة في التدريب الرياضي بصفة عامة وفي تدريب متسابق الوثب الطويل بصفة خاصة. الأجهزة المستخدمة): 1.(GM). أجهزة أقال-1 2.(لقياس الطول)جهاز الرستمتر - 3.felxometr جهاز قياس المرونة- 4.ساعة إيقاف الكترونية-

5147	12346656	مظاهر الجمال فى القرآن الكريم والاستفاده منها فى تنميه التربيه الجماليه لدى تلاميذ مرحله التعليم الاساسى/	سعدالله، حنان يوسف محمد.		2015	استهدفت الدراسة التعرف على مظاهر الجمال فى القرآن الكريم والوقوف على اهم المبادئ والقيم الجماليه فى القرآن الكريم والتعرف على التربيه الجماليه واهدافها واهميتها والمؤسسات التربويه التى تدعمها لقرآن الكريم هو المصدر الأول للتعليم الإسلامى الذى يهدف إلى تشكيل شخصية الإنسان الكامل مع كل ما الجوانب، والجانب الجمالى هو واحد منهم. الكلام عن جمال لا يتم احتساب الجدة لكنها بدائية. تم إنشاؤه من قبل الله inspect الإنسان، لذلك فإنه ليس الوجود المادي فقط، ولكنه يسمو على العالم المعنوي والذهاب مع طعم لدرجة عالية.	
						والجمال هو واحد من خصائص الخالق الذي يعطي لأولئك الذين تمت اختياره من مخلوقاته.	
						خلق الله الطبيعة بالنسبة لنا، وجعله بطريقة مبتكرة.	
						والجمال هو شعور نعرفها في العلاقة التي تربط هذا الرقم مع الطبيعة، حيث تظهر الألوان والشكل وجمال التصميم، والطبيعة هي مصدر إلهام للإنسان، وأنه يتفاعل معها.	
						الإنسان يتطلع إلى الجمال للعيش معها في حياته، لذلك فهو يبحث عن الجمال في بيئته والمنزل، ويصبح منسجم مع نفسه ومع الآخرين، من خلال تصرفاته.	
						ويهدف التعليم في دليل الإنسان إلى بدائية له، والشئ الأكثر أهمية من ذلك هو الجانب الجمال الذي نحن بحاجة ماسة.	
						ولذلك فإن دور المؤسسات التعليمية في دعم التعليم الجمال واتخاذ التربية الإسلامية باعتبارها وسيلة لتعليم الجمال، وخاصة في المراحل الأولية، ومرحلة التعليم الأساسي.تحقيق التعليم الجمال، وارتفاع الحس جمال تلميذ. يمكننا أن نقدم الخبرات الجمال والسلوكيات الجميلة للتلميذ.	
						يؤكد هذه الدراسة أن غاية الإسلام على أهمية التعليم والجمال، واهتمامها بالجانب الجمال من خلال المظاهر الجمالية العالمية التي أظهرت القرآن الكريم، وأشارت الآيات القرآن الكريم إلى التأمل في مخلوقات الله التي من شأنها أن تعمق التعليم الجمال في أرواح الشباب.	
						مشكلة الدراسة:	
						التعليم الجمال هو إحدى الوسائل التي تطور كليات التفكير والتأمل والإبداع البشري.	
						والشعور مع جمال عالمي لذلك يقوي العلاقة بين الإنسان والله (سبحانه وتعالى)، الذي هو مصدر الجمال يحتاج هذا الجمال لتدريب وتنشيط الحواس أن تشعر به، ولكن الشباب يقتفرون إلى التعليم الجمال نتيجة لتجاهل من قبل الأسرة، والمؤسسات التعليمية التي تمثلها المدرسة، وأنها لا تجذب التلاميذ مشاهد ل جوانب الجمال التي وردت في القرآن الكريم، وأهميتها في تطوير الجانب الجمال عليهم وأنها تهتم فقط في دراسة الدروس والحصول على درجات عالية، وneglecing الجانب العاطفي للأطفال خصيصا "التعليم الأساسي المرحلة"، وتجاهل المتبقي ودراسة القرآن الكريم أدى إلى إهمال الجمال من القرآن الكريم، والبعد الفني والعاطفي للأطفال يدعم الجانب الذين أيضا. التعليم الجمال هو جزء مهم من التعليم الإسلامي الذي يؤثر في الإنسان، عقله، والروح، والجسد.	
						هذا هو التعليم الكامل والصحيح كما أراد الله لها أن تكون.	
						ويمكن تلخيص المشكلة في هذه الأسئلة:	
						ما هي الجوانب من الشعور الجمال كما ذكرت أنها في القرآن الكريم؟ -	
						ما هو مفهوم التعليم الجمال، أهدافها وأهميتها، وما هي المؤسسات التعليمية التي تدعم ذلك؟ -	
						ما هي استفسارات التعليم جمال العملية التعليمية للتلاميذ في التعليم الابتدائي من وجهة نظر القرآن الكريم؟ -	
						ما هو وضع المقترحة من الإرشادات للقرآن لتطوير التعليم الجمال في أطفال من التعليم الابتدائي التي يمكننا الحصول عليها من تعليمات القرآن؟ الجوانب الجمالية في القرآن الكريم لتطوير التربية الجمالية لمرحلة التعليم الأساسي؟	
						أهداف الدراسة:	
						للمعرفة جوانب الجمال في القرآن الكريم -	
						لاحظت أهم مبادئ الجمال في القرآن الكريم -	
						للمعرفة التعليم الجمال وأهدافه وأهميته وأبعاده في القرآن الكريم والمؤسسات التعليمية التي تدعم ذلك -	
						أهم من التعليم الجمال في العملية التعليمية للتلاميذ من مرحلة التعليم الأساسي inquiries لمعرفة -	
						تقديم التوصيات والمقترحات لأهمية دور التعليم الجمال من خلال التثاء من القرآن الكريم. أهمية هذه الدراسة -	
						نحن يمكن أن توجه مخططي العملية التعليمية إلى أهمية التنمية الجمالية (فى التربية الجمالية)، ووضع برامج تعليمية لذلك -	
						ويمكن أن تطوير قدرة الشباب من خلال تلقى كل الأشياء الرائعة من الطبيعة من خلال القرآن الكريم -	
						يمكننا تطوير الإحساس بالجمال والوعي البيئي عن طريق استدعاء البشرية للحفاظ على الطبيعة وعناصرها -	
						تنمية القدرة على التمييز بين الأشكال والألوان -	
						هذه الدراسة قد تساعد على وضع معايير للحكم على المبادئ الجمالية التي توفر للباحثين مع بعض المفاهيم والمعلومات -	
						طريقة الدراسة:	
						واستخدمت الدراسة المنهج الوصفي التحليلي، والمنهج الاستنباطي.	
						خطة الدراسة وإجراءاتها:	
						تم الإجابة عن السؤال الأول خلال الفصل الثاني وعنوانه هو "الجمال في القرآن الكريم" وأظهر هذا الفصل مفهوم الجمال -	
						لغويا واصطلاحا، ومفهوم الجمال في الفكر الغربي والإسلامي، وأظهرت أبعاد الجمال في القرآن الكريم وأنواع الجمال ونقطة الانطلاق من الوعي الجمال الإسلامي، والاعتراف مجالات الجمال	
						الجواب من السؤال الثاني خلال الفصل الثالث وعنوانه هو "التربية الجمالية في الإسلام" يظهر هذا الفصل مفهوم لتربية الجمالية، وأهميتها، ويهدف، والمؤسسات التعليمية التي تدعم ذلك	
						وكان الجواب من السؤال الثالث من خلال الفصل الرابع بعنوان مع: على استفسارات التربية الجمالية في العملية التعليمية -	
						إن أطفال المدارس الابتدائية" من خلال منظور إسلامي التعامل مع التلاميذ والمدرسة والمنهاج والمعلم	
						تم الرد على السؤال الرابع من خلال تقديم مجموعة من التوصيات والاقتراحات التي تساعد على أداء التربية الجمالية -	
						للتلميذ من خلال الفصل الخامس	

5148	12346664	الصلابة النفسية وعلاقتها ببعض اساليب التنشئة الوالديه لدى طلاب المرحلة الثانوية/	طه، سهام محمد على.		2015	هدفت الدراسة الحالية الى التعرف على العلاقة الارتباطية بين الصلابة النفسية واساليب التنشئة الوالديه والعلاقة الارتباطية بين الصلابة النفسية واساليب التنشئة الوالديه كما يدركها الابناء . المرحلة الثانوية هي واحدة من أهم مراحل الحياة، والذي يحدد ملامح شخصيته. ليس هناك شك في أن الشباب هم الحاضر ومستقبل الأمة، فهي الذخيرة ومد كذلك. مع لهم الحياة سوف تستمر، وأنها يجب أن تتحمل المسؤولية للحاضر والمستقبل. في هذه المرحلة ملامح شخصيات من الشباب، والتي سوف تستمر في حياتهم المستقبلية، وتعرف. الاجتماعات الحالية الرعية الكثير عن الطلاب الصغار كما هم رجال الغد والمستقبل وذلك لتحقيق قدر أكبر من الصحة النفسية والتكيف الاجتماعي.ولذلك، فإننا بحاجة إلى التركيز على المتغيرات مقاومة مثل النفسية المرونة / صلابه من أجل التغلب على الضغط وتحقيق الرعية الصحية النفسية من خلال الرعية الأبوية الجيدة، لذلك تسعى الدراسة الحالية إلى تحديد العلاقة بين الصلابة النفسية واساليب تحمل الوالدين مع المدرسة الثانوية (المرحلة الثانوية) طلاباً وطالبات. بيان من الدراسة: ويحاول دراسة المبينة في ما يلي: هل هناك ارتباط بين درجات الطلاب على مقياس من صلابه النفسية، ودرجاتهم على مقياس من أساليب تحمل الوالدين-1 من وجهة نظر الأطفال؟ هل هناك علاقة بين الصلابة النفسية واساليب تحمل الوالدين من (الأب والأم) من وجهة نظر الأطفال؟-2 هل هناك فروق ذات دلالة إحصائية بين متوسطات درجات الصلابة النفسية واساليب تحمل الوالدين من وجهة نظر -3 الأطفال حسب الجنس (ذكر - أنثى)؟ هل هناك فروق ذات دلالة إحصائية بين متوسطات درجات الصلابة النفسية واساليب تحمل الوالدين من وجهة نظر -4 الأطفال حسب المستوى التعليمي (الذكور والإناث)؟أهداف الدراسة تهدف الدراسة الحالية إلى معرفة العلاقة بين أنماط تأثير الوالدين وصلابة نفسية مع الطلاب (ذكور / إناث) من المرحلة الثانوية، لذلك تسعى هذه الدراسة إلى التعرف على ما يلي: 1. العلاقة بين الصلابة النفسية واساليب تحمل الوالدين 2. العلاقة بين الصلابة النفسية واساليب تحمل الوالدين. من الأب والأم من وجهة نظر الأطفال 3. (الذكور والإناث)الاختلافات بين الصلابة النفسية واساليب تحمل الوالدين من وجهة نظر الأطفال حسب الجنس 4. الاختلافات بين الصلابة النفسية واساليب تحمل الوالدين من وجهة نظر الأطفال حسب المستوى التعليمي في الأول و:الثاني والثالث الثانوي أهمية الدراسة : أهمية النظرية(أ) وتعتبر الدراسة الحالية محاكمة لتسليط الضوء على صلابه النفسية بسبب التغيرات الحديثة. في paticipate تستخدم الدراسة المتغيرات صلابه النفسية التي تعتبر من الموضوعات الجديدة في التراث النفسي الذي يبحر (الالتزام والتحكم والتحدى) مع المتعلمين تشارك هذه الدراسة الحالية في تقديم الصورة الكاملة حول متغيرات الدراسة للمساعدة في تقديم أفضل فهم أن المشاركة . في دفع عملية البحث العلمي : أهمية العملية(ب) 1. مقياس من صلابه النفسية Preparing 2. بناء مقياس من أساليب تحمل الوالدين

						توجد فروق دالة إحصائية بين القياس البعدي للمجموعة التجريبية والهدف المتوقع في أبعاد مقياس الصلابة العقلية -2 ومستوى الأداء المهاري لناشئي الكرة الطائرة بدولة الكويت لصالح القياس البعدي للمجموعة التجريبية توجد نسب تحسن بين القياسين القبلي والبعدي للمجموعة التجريبية في أبعاد مقياس الصلابة العقلية ومستوى الأداء -3 المهاري لناشئي الكرة الطائرة بدولة الكويت لصالح القياس البعدي مصطلحات البحث الصلابة العقلية - هي القدرة على الوصول إلى الأداء المثالي والثبات عليه عن طريق إدراك وتفسير ومواجهة الضغوط المختلفة (51:2)(28:41) المهارة - هي الوسيلة الفعالة التي يقوم الفريق بتوظيفها في خطط اللعب لتحقيق هدفه وهو الفوز بالمباراة.(14 : 53) : الإرسال- هو حركة وضع الكرة في الملعب بواسطة اللاعب الخلفي الأيمن المتواجد في منطقة الإرسال . الضرب الساحق- هي وسيلة هجومية موجهة للتغلب على دفاعات المنافس بقوة عظمى بسرعة عالية بمقارنتها بمختلف الوسائل الهجومية الأخرى.(44 : 25)		
5164	12346936	المهارات النفسية وعلاقتها بدافعيه الانجاز لدى لاعبي الكرة الطائرة بدولة الكويت/	الشمرى، على مجبل ثامر.		2015	يهدف البحث إلى التعرف على المهارات النفسية للاعبين الكرة الطائرة بدولة الكويت والاهمية النسبية لدوافع الانجاز لدى لاعبي الكرة الطائرة بدولة الكويت والعلاقة بين المهارات النفسية ودوافع الانجاز لدى لاعبي الكرة الطائرة بدولة الكويت. تعد لعبة كرة الطائرة من الفعاليات الرياضية التي يبدل فيها اللاعب مجهوداً بدنياً وذهنياً على مدى زمن المباراة الأمر، حيث يواجه اللاعب العديد من الضغوط النفسية التي قد تتوق العيب البدني الذي يقع على كاهله، فالعامل النفسي له دوراً كبيراً على نتائج المباريات، فضلاً على دوره في تقدم وتطور مستوى الناشئ والاستقرار على الأداء؛ لذا تعد المهارات النفسية من العوامل المؤثرة في مستوى الأداء الناشئين، كما لها دوراً كبيراً في تحسين وتطور أدائهم، فوجود نقص أو الخلل في الحالة النفسية له تأثيراً سلبياً على قدرة وأداء الناشئ والفريق ككل؛ ولذلك أصبح من الضروري الاهتمام بالجانب النفسي لدى ناشئي كرة الطائرة. ومن خلال عمل الباحث معلم تربية رياضية ومدرب ناشئين كرة الطائرة فقد لاحظ الباحث أن الكثير من المسؤولين والمدربين واللاعبين يعتقدون أن السبب الرئيسي في انخفاض مستوى الأداء البدني والمهاري والخططي لدى الناشئين قد يرجع إلى انخفاض مستوى برامج التدريب وجدية اللاعبين في تنفيذ هذه البرامج، بينما قد ترجع المشكلة في عدم التركيز بتدريب وتطوير المهارات النفسية من جانب المدرب والناشئ، بعيدن كل البعد عن الاهتمام بمهارات الاسترخاء العقلي، الاسترخاء العضلي، التصور العقلي، تركيز الانتباه، والثقة بالنفس، أو كيفية مواجهة حالة قلق المنافسة، فضلاً على الاهتمام بدافعية الانجاز. أكد كلا من "محمد شمعون، ماجدة إسماعيل" (2002م) على أهمية سمة دافعية الانجاز من أجل تحقيق أعلى المستويات الرياضية، حيث أن الرغبة في الأداء الجيد يحقق النجاح والتفوق الرياضي، فدافعية الانجاز هو هدف ذاتي ينشط ويوجه السلوك، ويعتبر من المكونات الهامة للنجاح. ومن ثم يرى الباحث أن تطوير الاداء المهاري والبدني والخططي بدون استخدام التدريب العقلي من خلال تطوير المهارات النفسية (الاسترخاء - التصور العقلي - تركيز الانتباه- الثقة بالنفس- مواجهة القلق- دافعية الانجاز) في برامج إعداد الناشئين على كافة المستويات فإن النتيجة تكون ليست بالدرجة المطلوبة. حيث أكد "مارتن (1994م)" على أن التدريب على بعض المهارات النفسية مثل الاسترخاء العضلي والعقلي، والتصور العقلي والانتباه وغيرها من المهارات العقلية والنفسية يجب أن تسير جنباً إلى جنب مع التدريب على عناصر اللياقة البدنية والمهارات الحركية من خلال الإعداد طويل المدى، وأن إغفال مثل هذا البعد يقلل من فرص الوصول إلى المستويات الرياضية العليا. وينفق ذلك مع "محمد حسن علاوي"(1998م) فيما أشار بأن لتحقيق المستويات الرياضية العالية يتطلب من الفرد الرياضي ضرورة استخدام قدراته البدنية، والمهارية، والخططية، والنفسية لأقصى درجة ممكنة؛ وذلك لمحاولة إحراز أفضل مستوى ممكن، مع مراعاة أن التكامل بين جوانب الشخصية يتمثل في المهارات النفسية، فالجانب العقلي بجانب السمات الدافعية يمثل بعداً هاماً في الإعداد النفسي للاعبين، حيث تلعب دوراً هاماً في تطوير الأداء، كما أصبح ينظر إليها كأحد المتغيرات النفسية التي يجب العناية بها جنباً إلى جنب مع المتطلبات البدنية والمهارية والخططية. ومن هنا تبرز أهمية البحث الحالي الذي يتناول معرفة مستوى كل من المهارات النفسية و دافعية الانجاز لدى ناشئين كرة الطائرة لدى ناشئي كرة الطائرة المشاركين بدوري كرة الطائرة بالمدارس الثانوية بوزارة التربية بدولة الكويت. أهداف البحث: يهدف البحث التعرف على : 1-المهارات النفسية المميزة للاعبين الكرة الطائرة بدولة الكويت 2-دوافع الانجاز لدى لاعبي الكرة الطائرة بدولة الكويت 3-العلاقة بين المهارات النفسية ودوافع الانجاز لدى لاعبي الكرة الطائرة بدولة الكويت تساؤلات البحث: 1- ما المهارات النفسية المميزة للاعبين الكرة الطائرة بدولة الكويت؟ 2- ما دوافع الانجاز لدى لاعبي الكرة الطائرة بدولة الكويت؟ 3- ما العلاقة بين المهارات النفسية وبدافعية الانجاز لدى لاعبي الكرة الطائرة بدولة الكويت؟ إجراءات البحث منهج البحث: استخدم الباحث المنهج الوصفي بأسلوب الدراسة المسحية لمناسبته مع طبيعة وأهداف البحث. مجتمع البحث أشتمل المجتمع الأصلي للبحث على لاعبي كرة الطائرة بالدرجة الممتازة في مختلف الأندية الرياضية بدولة الكويت، والمسجلين بالاتحاد الرياضى الكويتى لكرة الطائرة للموسم الرياضى 2014/2015م. عينة البحث: قام الباحث باختيار عينة عشوائية قوامها (54) لاعباً من لاعبي كرة الطائرة بالدرجة الممتازة من بعض الأندية الرياضية بدولة الكويت(العربي الكويتي، القادسية، الكويت، كاظمة، السالمية، الجبراء)، ومن المسجلين بالاتحاد الرياضى الكويتى لكرة الطائرة للموسم الرياضى 2014/2015م. أدوات البحث: لجمع البيانات المطلوبة للبحث قام الباحث باستخدام الأدوات التالية: مقياس المهارات النفسية في الرياضة- قائمة دوافع الانجاز في المجال الرياضي-

5210	12349502	دور الأنشطة في تنمية بعض الجوانب البديية لدى تلاميذ المرحلة (المتوسطة بدولة الكويت)	الشمري ، فيصل صباح مبارك.		2016	يتمثل الهدف الرئيسي للبحث الحالي في دور الأنشطة الطلابية في تنمية بعض الجوانب الحركية لدى تلاميذ المرحلة المتوسطة بدولة الكويت. تشير الكثير من الدراسات أيضا بان الأنشطة الرياضية تساعد على تفوق التلميذ لانها تستمر وقت فراغه بما يعود عليه بالنفع مما ينعش على أدائه الأكاديمي ، وهذا مرون بمهارة التلميذ في تنظيم وقته ليستطيع أن يوازن ما بين الأنشطة والدراسة الطلابية ، من خلال هذه الدراسة والتي تهدف إلى التعرف على الدور التربوي للأنشطة الطلابية في تنمية العديد من الجوانب الحركية لتلاميذنا ، خاصة في ظل هذا الاهتمام الملوس بالأنشطة الطلابية بالمدارس والجامعات ، وأيضا في ظل الزيادة الملحوظة والمستمرة في أعداد التلاميذ بمدارس السراج المنير بالكويت ، هذا مما استوفت الباحث أيضا للتعرف على الفروق في الجوانب الحركية قيد البحث بين التلاميذ والتلميذات ، وأيضا ولما تمثلته هذه المرحلة من أهمية خاصة في حياة الإنسان حيث يكون الطالب في قوته وحيويته ونشاطه ويمتلك من الطاقات التي تحتاج إلى التوجيه الأمثل لما يفيد الطالب والمجتمع ككل خاصة وأن مدارس السراج المنير من المؤسسات التي يعهد إليها المجتمع الكويتي بمهمة رعاية أبنائه من التلاميذ صامعي القرار في المستقبل ، ومما يزيد أيضا من أهمية هذا البحث إلقاء المزيد من الضوء على هذه المرحلة السنية الهامة ألا وهي مرحلة التعليم المتوسط 0 أهمية البحث قد يساعد البحث في التعرف على دور الأنشطة الطلابية(نشاط داخلي- نشاط خارجي) في تنمية بعض الجوانب الحركية لدى تلاميذ المرحلة المتوسطة بدولة الكويت. هدف البحث : يتمثل الهدف الرئيسي للبحث الحالي في : دور الأنشطة الطلابية(نشاط داخلي- نشاط خارجي) في تنمية بعض الجوانب الحركية لدى تلاميذ المرحلة المتوسطة بدولة الكويت. فروض البحث : توجد فروق دالة إحصائية بين متوسطات درجات القياسين القبلي والبعدي للمجموعة الضابطة لصالح القياسات البعدية في-1 بعض الجوانب الحركية قيد البحث توجد فروق دالة إحصائية بين متوسطات درجات القياسين القبلي والبعدي للمجموعة التجريبية لصالح القياسات البعدية في-2 بعض الجوانب الحركية قيد البحث توجد فروق دالة إحصائية بين متوسطات درجات القياسين البعديين للمجموعتين الضابطة والتجريبية لصالح القياس-3 البعدي للمجموعة التجريبية في بعض الجوانب الحركية منهج البحث: استخدم الباحث المنهج التجريبي لمناسيته لطبيعة هذا البحث وذلك باستخدام التصميم التجريبي للمجموعتين متكافئتين أحدهما تجريبية والأخرى ضابطة مع إجراء القياس القبلي والبعدي لمجموعتي البحث0 مجتمع البحث : يتمثل مجتمع البحث في تلاميذ الصف المرحلة المتوسطة بمدرسة السراج المنير والذي يبلغ عددهم حوالي (300) تلميذ وتلميذة. عينة البحث: اشتملت عينة البحث على (60) تلميذ من تلاميذ المرحلة المتوسطة بمدرسة السراج المنير وتم وقد تم تقسيمهم إلى مجموعتين أحدهما تجريبية والأخرى ضابطة قوام كل منهما (30) تلميذ0 وسائل وأدوات جمع البيانات:	
						الأجهزة -1 جهاز الرستاميتير لقياس الطول بالمستمر - ميزان طليي مقنن لقياس الوزن بالكيلوجرام -	

						ساعة إيقاف لتحديد الزمن في بعض الاختبارات - : استمارة الاستبيان -2 استمارة استطلاع رأى الخبراء لتحديد الصفات البدنية التي تتناسب مع المرحلة السنية قيد البحث وكذلك أهم الاختبارات - التي تقيسها ملحق (2)0 (2)استمارة استطلاع رأى الخبراء لتحديد الاختبارات البدنية التي الصفات البدنية ملحق - الاختبارات البدنية -3: تنفيذ التجربة الأساسية : القياس البعدي: قام الباحث بإجراء القياس القبلي للمجموعتين (التجريبية والضابطة) للاختبارات البدنية قيد البحث في 13/10/2015 التجربة الأساسية : قام الباحث بتطبيق التجربة الأساسية للبحث على المجموعتين التجريبية واستخدام والضابطة وقد استغرق تطبيق التجربة (6) أسابيع في الفترة 17/10/2015م حتى 28/11/2015م القياس البعدي: بعد الانتهاء من تطبيق التجربة الأساسية قام الباحث بإجراء القياس البعدي للمجموعتين (التجريبية والضابطة) للاختبارات البدنية والمهارية والاختبار المعرفي في كرة القدم قيد البحث وذلك في 30/11/2015م جمع البيانات وجداولتها : قام الباحث بتجميع النتائج بعد الانتهاء من تطبيق الاختبارات وتنظيمها وجداولتها ومعالجتها إحصائياً. المعالجات الإحصائية : تم معالجة البيانات باستخدام الأساليب الإحصائية التالية: . المتوسط الحسابي . - معاميل السهولة والصعوبة - . الوسيط . - معاميل الالتواء - . (ت)الانحراف المعياري . - إختبار - نسبة التحسن0 - النسبة المئوية0 – الاستنتاجات : من خلال ما استهدفه هذا البحث في التعرف على دور الأنشطة الطلابية(نشاط داخلي- نشاط خارجي) في تنمية بعض الجوانب الحركية لدى تلاميذ المرحلة المتوسطة بدولة الكويت. ،ومن خلال الإجراءات العلمية التي اتبعت لتحقيق هذا الهدف يعرض الباحث ما توصل إليه وجود فروق دالة إحصائية بين متوسطات درجات القياسين القبلي والبعدي للمجموعة الضابطة لصالح القياسات البعدي -1 . في بعض الجوانب الحركية قيد البحث نتيجة اشتراكهم بدرس التربية البدنية وجود فروق دالة إحصائية بين متوسطات درجات القياسين القبلي والبعدي للمجموعة التجريبية لصالح القياسات البعدي -2 (نشاط داخلي- نشاط خارجي)في بعض الجوانب الحركية قيد البحث نتيجة اشتراكهم في الأنشطة الطلابية وجود فروق دالة إحصائية بين متوسطات درجات القياسين البعديين للمجموعتين الضابطة والتجريبية لصالح القياس -3 (. نشاط داخلي- نشاط خارجي)البعدي للمجموعة التجريبية في بعض الجوانب الحركية نتيجة اشتراكهم في الأنشطة الطلابية التوصيات : -عقد دورات أثناء فترة التدريب لرفع كفاءة المعلم في التربية الرياضية في كيفية تنظيم الأنشطة الطلابية(نشاط داخلي-1 (نشاط خارجي 2(نشاط داخلي- نشاط خارجي)حث التلاميذ على الاشتراك في الأنشطة الطلابية-2 3(نشاط داخلي- نشاط خارجي)توفير ميزانية خاصة من قبل إدارة المدرسة للتأمين للأنشطة الطلابية-
			اداره التميز كمدخل لتطوير الاداء الوظيفي لدى الاخصائيين الرياضيين برعايه الشباب بجامعه جنوب الوادي/	حسن، محمود محارب.	2016	بعد هذا البحث احدى محاورات العلمية التي يمكن ان تساعد في تطوير الاداء الوظيفي لدى العاملين بإدارات رعايه الشباب بجامعه جنوب الوادي وتوجيه انظار القائمين في مجال الرياضى الى استخدام اسلوب التميز لما قد يكون له اثر واضح في تطوير الاداء الوظيفي لدى العاملين بالمنظمات الرياضيه المختلفه. ترجع اهميه البحث الى زياده الكفاءه المهنيه من خلال التعاون بين العاملين بهذا المجال معلمين وموجهين وتشجيع العمل الجماعي والتوحيه باهميته وتعليم العاملين بمختلف المستويات بكيفية تحديد وترتيب وتحليل وتجزئتها الى مشاكل اصغر حتى يمكن السيطرة عليها وحلها.تتسارع الأمم مع اقتراب انتصاف العقد الثاني من الألفية الثانية لتضع للعالم طرقات جديدة تتلاءم مع تحديات العصر الحاضر حيث لها قدرا في العالم الجديد عن طريق بناء بلاءم مع تحديات العصر الحاضر عصر العلم والمعلوماتية والتقنية الحديثة ولبناء الدول وتنميتها حضاريا تتبع أهمية الاهتمام بتطبيق نظام الجودة الشاملة كلبنة أساسية في هذا البناء ونظراً لتنامي عدد المؤسسات الحكومية والأهلية كان لابد من وجود عوامل وأسس يتم التعامل بها للوصول إلى أفضل النتائج ، ونظام الجودة الشاملة من المعايير العالمية في جميع المجالات ولتطوير هذه المؤسسات وتطوير أسلوب إدارتها والذي يعتبر من المعايير المهمة في تقييم المؤسسات حيث إن نظام الجودة الشاملة من المعايير العالمية والتي تسعى المؤسسات جاهدة للوصول إلى هذا المعيار . كما إن التحديات العالمية المعاصرة تحتم على المنظمات الاقتصادية إنتاج الأسلوب العلمي الواعي في مواجهة هذه التحديات واستثمار الطاقات الإنسانية الفاعلة في الأداء التشغيلي والبيعي بمرونة أكثر كفاءة وفاعلية ، ومن أكثر الجوانب الإدارية الهانفة إدارة الجودة الشاملة TQM والتي أصبحت الآن ويفضل الكم الهائل في المعلومات وتقنيات الاتصال سمة مميزة لمعطيات الفكر الإنساني الحديث لاسيما وأن الإدارة العلمية المعاصرة أسهمت بشكل كبير في تطوير بنية المنظمات الاقتصادية بشكل كبير (29 : 13) . إن الإدارة ظاهرة إيجابية تسعى إلى التأثير في المجتمع الذي تتعامل فيه وتحاول أن تشكله بأسلوب يساعد على تحقيق أهدافها وبالتالي فالحقبة الأساسية عن الإدارة إنها ظاهرة ديناميكية ومتغيرة بشكل متواصل ، ولذلك أصبحت المؤسسات والهيئات في حاجة ماسة إلى إدارة حكيمه تفهم أعمالها ومتطلباتها وتتفاعل معها من أجل إنجاز المهام بأقل جهد ووقت وبكفاءة عالية (3 : 49) . فالمؤسسات التي تعتمد على المراكز الفكرية القديمة والتي تعتقد أن وظيفة الإدارة هي تنظيم الموارد وتوظيفها في الداخل لتحقيق نتائج في الخارج لن تستطيع الصمود في عالم تسوده المنافسة والتغير المستمر والتقنيات الحديثة ، وبالتالي يجب عليها أن تستجيب لمطلوبات المنافسة الحديثة وبسرعة وهي التحول إلى تحديد للأهداف المطلوبة في الخارج أولاً ثم تنظيم الموارد الداخلية وتطويرها باستمرار لتحقيق الأهداف ومن هنا جاءت ضرورة الاهتمام الجاد بتحديث الأساليب الإدارية التي تدار بها تلك المؤسسات فلابد من تحقيق عناصر محددة تساعد على تحقيق ميزة تنافسية "Competitive Advantage" (2 : 4) . وقد مر الفكر الإداري المعاصر بتطورات عديدة في سبيل تحقيق أهداف المنظمات الإدارية وظهرت مبادئ إدارية متعاقبة بداية بالاتجاهات الكلاسيكية التي اهتمت بالإنتاجية واعتبرت العنصر البشري آلة يمكن شحنها عن طريق الحوافز المادية والمعنوية ، مما فتح الباب لظهور اتجاهات إدارية مثالية كالإدارة العلمية ، والإدارة بالإنتاج ، والإدارة بالأهداف وغيرها من المفاهيم الإدارية التي اعتمدت بصفة أساسية على مبادئ الإدارة التقليدية باستخدام أسلوب الترهيب والرقابة كوسيلة لتصديق الأخطاء وتوجيه اللوم والعقاب (14 : 124) .
			مقومات تطبيق الجودة الشاملة كمدخل لتطوير الاداء المهني للعاملين بأداره النشاط الرياضي بمديريه التربه والتعليم بسوهاج/	عبد القادر ، هشام أحمد محمد.	2016	

						ونتيجة لإخفاق بعض ممارسات الإدارة التقليدية في تحقيق ما تصبو إليه المنظمات من تقدم وتطور ، نشأت إدارة الجودة الشاملة كأسلوب إداري فعال يعتمد على حل المشكلات واكتشاف الأخطاء وعلاجها أولا بأول ، والتعرف على احتياجات ومتطلبات المستهلكين وما يفضلونه ، لتحقيق هدف مزدوج يتمثل في التسويق الفعال للمنتجات أو تقديم خدمات أفضل ، وفي الوقت نفسه إثبات رغبات المستهلكين مع الأخذ في الاعتبار عامل المنافسة والحرص على خفض التكلفة الإنتاجية باستبعاد الخطوات غير الضرورية وتلافي الأخطاء أولا بأول وإتاحة الفرصة للعاملين لإبراز مواهبهم الشخصية ومهاراتهم وقدراتهم الذاتية في تطوير طرق العمل والإنتاج (12 : 35) . لقد انتقل مفهوم الجودة الشاملة من مجال الحرص على جودة المنتجات إلى مجال الحرص على جودة الخدمات ، كذلك انتقل إلى تغيير مفاهيم الإدارة التقليدية لتشجيع استقلالية العاملين بتقليل الحواجز الرسمية وتكوين فرق العمل للإدارة ذاتها والمتكئين في اتخاذ القرارات حتى أقل مستوى وظيفي ، وتغيير أدوار القيادة وبناء وتدعيم الولاء المؤسسي لدى العاملين داخل المنظمة . كل ذلك لاستخراج أفضل ما في البشر من كفاءات بحيث يتم القيام بالعمل بطريقة سليمة منذ اللحظة الأولى مع التأكيد على أن الجودة اليوم لم تعد تحدد من خلال الموصفات الفنية ، ولكن من خلال العملاء والعاملين بالمنظمة (41 : 12) .
					2016	تتضح أهمية الدراسة من خلال أنها تتناول مديريات التربية والتعليم ببعض محافظات الصعيد من حيث الواقع الإداري الخاص بها وكيفية تطوير الأداء الإداري داخلها بما يعمل على تحقيق الأهداف المرجوه منها . تعتبر الإدارة هي المسؤولة عن نجاح أى نشاط ، وهي التي تؤدي إلى التقدم أو التخلف في كافة المجالات ، والتي يمكن عن طريقها تحقيق أهداف أى منظمة من المنظمات أو أى مجتمع من المجتمعات . ولهذا فإن الإدارة أصبحت ضرورة حتمية لإدارة العمل بشكله الجماعي وتلعب الإدارة دوراً حيوياً في توجيه المؤسسات والمنظمات على اختلاف مجالاتها وتخصصاتها . (16 : 28) ويعد المجال الرياضي من أهم مجالات الاستثمار الحقيقي للثروة البشرية حيث يحوى العديد من العمليات التربوية ذات الاتجاهات والجوانب المتشعبة والتي تهدف إلى تربية الأجيال لإثراء كل مجالات الحياة ويتميز النشاط الرياضي عن سائر الأنشطة الأخرى بأنه مجال الممارسة والتفاعل الذي يدور حول تعديل السلوك للكانن البشري وإعداد المواطن الصالح . ونظراً لأهمية التربية الرياضية في العصر الحديث وازدياد الحاجة إليها وتعدد مهامها وكثرة العاملين في ميادينها المختلفة فإن ذلك أدى إلى ازدياد الاهتمام بعلم الإدارة في المجال الرياضي . (5 : 4) كما أن الإدارة في الهيئات تسعى إلى تحقيق هدف مزدوج هو زيادة أداء العاملين وتحقيق رضاهم الوظيفي ، حيث يعتبر الأداء الجيد هو وسيلة للتقدم والارتقاء بمستوى هذه الهيئات . (28 : 165) فأرضنا الوظيفي يعتبر مؤشراً هاماً لمقدرة مديريات التربية والتعليم على مقابلة حاجات مدرس التربية الرياضية ، ومن ثم فإن قياس الرضا الوظيفي يعتبر أمراً بالغ الأهمية في مختلف الإدارات التعليمية حيث يزود القائمين بمديريات التربية والتعليم بمعلومات هامة كمدخل لتطوير الأداء التنظيمي ، وإزالة الضغوط والغموض الذي يحيط بينة العمل ، ونقل من حدة الصراعات التنظيمية سواء على مستوى الإدارة التعليمية أو على مستوى المدرسين وهذا بدون شك قد يساهم في رفع الروح المعنوية لمدرسي التربية الرياضية مما يجعلهم يشعرون بالرضا عن محتوى العمل الذي يقوم به . تتبع أهمية البحث من وجهة نظر الباحث من خلال عدة نقاط : يتناول البحث مديريات التربية والتعليم ببعض محافظات الصعيد من حيث الواقع الإداري الخاص بها وكيفية تطوير 1. أساليب الأداء الإداري داخلها بما يعمل على تحقيق الأهداف المرجوة منها تسعى هذه الدراسات للتعرف على أثر العدالة التنظيمية وأبعادها على فاعلية الرضا الوظيفي لدى العاملين بمديريات 2. التربية والتعليم بصعيد مصر ، مما قد يؤدي إلى تحسين وتطوير ورفع مستوى فاعلية الرضا الوظيفي أن المكتبة العربية تقتصر لإسهامات الباحثين في مجال العدالة التنظيمية حيث لاحظ الباحث من خلال الدراسات العربية 3. ندرة هذه الدراسات في هذا المجال وبالتالي فإن هذا البحث يأتي دعماً لغيره من الدراسات السابقة ويضيف إليها دراسة متخصصة في الإدارة الرياضية هدف البحث :- التعرف على العدالة التنظيمية وعلاقتها بالرضا الوظيفي لدى مدرسي التربية الرياضية بمديريات التربية والتعليم ببعض محافظات صعيد مصر وهم (أسوان – قنا – سوهاج – أسيوط) وذلك من خلال الإجابة على التساؤلات التالية : تساؤلات البحث :- 1- ما الواقع الفعلي للعدالة التنظيمية لدى العينة قيد البحث ؟ 2- ما مدى فاعلية الرضا الوظيفي لدى العينة قيد البحث ؟ 3- هل هناك علاقة دالة إحصائية بين العدالة التنظيمية وفاعلية الرضا الوظيفي لدى العينة قيد البحث ؟ المصطلحات الواردة بالبحث : The organized justices : العدالة التنظيمية - (" هي محصلة الاتفاق بين الجهود المبذولة والعوائد المتحققة عنها ، بشكل يساهم في تحقيق الأهداف المطلوبة للمنظمة " 34 : 235) Job Satisfaction : الرضا الوظيفي - حالة الشعور النفسي للفرد بالقناعة والارتياح والسعادة تجاه عمله والتي يمكن اعتبارها انعكاساً لمدى إشباع حاجاته ورغباته التي يتطلبها في ضوء المؤثرات الداخلية والخارجية والتي لها علاقة بالعمل". (59 : 306)
					2016	يرجع هدف البحث في تحسين المستوى الرقمي لنشائي 400 متر عو من خلال تصميم برنامج تدريبي باستخدام التدريب المركب وتمس بعض عناصر اللياقة البدنية الخاصة بنشائي 400متر عو تحت 18 سنة يعيش العالم الآن في عصر تتطور فيه الأشياء بصورة مذهلة مرتكزاً في ذلك على الأسلوب العلمي المنظم الدقيق ، ففي كل مجال حقق العلم طفرة كبيرة ولا تزال تتوالى الطفرات باستمرار لتحقيق مزيد من التقدم ، ويتسابق العلماء والباحثون في تطبيق أحدث الأساليب العلمية والبحثية وقد أمدت البحث العلمي إلى جميع المجالات والميادين المختلفة عامة وقطاع البطولة خاصة (20: 323) ويرى "محمد حسن علاوى و أبو العلا أحمد عبد الفتاح" (1988م) أن علم التدريب الرياضي قد خطى في السنوات الأخيرة خطوات واسعة للامام ، حيث تضاعفت جهود العلماء في مختلف العلوم المرتبطة بعلم التدريب الرياضي ولعل المتتبع لنتائج البطولات الأولمبية الأخيرة التي تتقدم بصورة كبيرة في مسابقات العدو يكشف أن هذا التقدم في المستوى الرقمي يرجع إلى ارتباط التدريب الرياضي بالكثير من العلوم المرتبطة بالعضانر يتضح فيها المجهود الشاق الذي يبذله اللاعب أثناء الممارسة والتدريب مما يؤدي إلى ظهور التعب نتيجة تراكم حامض اللاكتيك في العضلات. ويعتبر الوصول بالألعابين لأفضل المستويات الرياضية أحد أهم طرق التدريب الرياضي المخطط طبقاً للأسس والمبادئ العامة للتدريب الرياضي ، ولقد أصبحت البرامج التدريبية الحديثة ووحدها الفرعية سواء كانت الوحدات الشهورية أو الأسبوعية أو اليومية حافلة بما هو جديد من انطلاقات علمية وعملية لعلم التدريب والمساعدة بالعديد من العلوم الإنسانية والطبيعية الأخرى ، وهذا مرجعه مواكبة علم التدريب والذي اتسم بثورة تكنولوجية ومعلوماتية هائلة الأمر الذي أثار حديثاً هذا التطور السريع الذي يمكن ملاحظته في الرياضات المختلفة. (34: 51)
5214	12349527	أثر استخدام التدريب المركب على تحسين بعض عناصر اللياقة البدنية والمستوى الرياضي لنشائي 400 متر بدولة الكويت/	عائض، معالى صالح عائش.			
5213	12349522	العدالة التنظيمية وعلاقتها بالرضا الوظيفي لدى معلمى التربية الرياضية بمديريات التربية التعليم ببعض محافظات صعيد مصر/	عمار، اسامه شفيق محمد.			

						ويفتق كلا من "عادل عبد البصير" (1992م) "حسن علاوى" (1994م) (2005م) "سمر مصطفى" (2003م) على أن التدريبات التنافسية هي أداء الحركات طبقا للقوانين المحددة لممارسة نوع النشاط الرياضي الذي يتخصص فيه الفرد، وتتميز التدريبات التنافسية من حيث أنها تثير في النفس الدافعية نحو المثابرة وبذل الجهد وعامل التشويق وتعمل على تقوية العضلات العاملة في نوع النشاط التخصصي وتسهم في تنمية مختلف السمات الإرادية الخاصة اللازمة للنشأ، وأيضاً لها دوراً هاماً في كل مراحل الموسم التدريبي لمختلف الأنشطة وأن تأثيرها يكون فعالاً عندما ترتبط مع متطلبات المنافسة لأنها وسيلة هامة ذات متطلبات متعددة لمكونات الحالة التدريبية، كما ترفع من مستوى كفاءة الأداء المتكامل للاعب وتوصل به إلى الحالة العالية بحيث تؤدي تحت مختلف الظروف.(37: 6) (54: 105) (33: 34) ويضيف كلا من "معتي إبراهيم" (1994م)، "حنفي مختار" (1994م) أن امتلاك اللاعب لأشكال متنوعة من التدريبات التنافسية بما يشابه متطلبات المباراة يتيح له اختيار أفضلها في معظم مواقف اللعب الفعلية وتزيد من قدرته على المناورة وتنفيذ الخطط من أماكن واتجاهات مختلفة ولا يفاجئ بموقف ما لم يتدرب عليه من قبل ، ومن ثم تحقيق سرعة الأداء المتميز بالدقة والتوافق في تنفيذ الواجب المطلوب الخططي.(66: 131) (27: 138) ومن خلال إطلاع الباحث على العديد من المراجع العلمية والدراسات السابقة في هذا المجال وعلى حد علمه-وجد أن هناك بعض الدراسات التي اهتمت بتدريبات المواقف التنافسية وتأثيرها على بعض المتغيرات البدنية والوظيفية والمهارية مثل" محمد مختار" (1995م) (60) "بدير السيد" (2006م) (21) "خالد عبد النور" (2010م) (29) سمر مصطفى" (2003م) (33) "عمر عبد المطلب " (2006م) (47) كما أن هناك بعض الدراسات التي اهتمت بالجانب الخططي مثل "أحمد ممنوح و ممنوح إبراهيم" (2002م) (12) "إيهاب صلاح" (2001م) (20)، "خالد عبد النبي" (2002م) (30) وقد تبين أن هذه الدراسات قد اتخذت اتجاه مغايراً ولم تتجه أياً منها لما اتجهت إليه الدراسة الحالية من استخدام تدريبات المواقف التنافسية لتنمية بعض الاداءات الخططية الدفاعية الفردية(قيد البحث) لنادي كرة القدم. مما دفع الباحث لإجراء هذا البحث كمحاولة عملية لتطوير مستوى الأداء الخططي الدفاعي الفردي لنادي كرة القدم بدولة الكويت من خلال إعداد برنامج تدريبي مقترح باستخدام تدريبات المواقف التنافسية والتعرف على تأثيره على مستوى أداء بعض الاداءات الخططية الدفاعية الفردية(قيد البحث) لنادي كرة القدم بدولة الكويت الأمر الذي قد يؤدي إلى رفع مستوى الناشئين وتقدمهم في اللعبة خلال تلك المرحلة السنوية وزيادة قدرتهم على تنفيذ خطط اللعب الدفاعية الفردية مستقبلياً بالشكل الذي تتطلبه مواقف اللعب التنافسية. : أهداف البحث - يهدف البحث إلى " تصميم برنامج تدريبي باستخدام تدريبات المواقف التنافسية على مستوى أداء بعض الاداءات الخططية الدفاعية الفردية لنادي كرة القدم بدولة الكويت" وذلك من خلال: التعرف على تأثير البرنامج التدريبي باستخدام تدريبات المواقف التنافسية على تنمية بعض الاداءات الخططية الدفاعية -1 الفردية(اختيار المدافع للمواقع المناسبة- المراقبة-الضغط-التغطية) لنادي كرة القدم التعرف على الفروق بين ناشئي كرة القدم وفقاً لخطوط اللعب الثلاثة(الدفاع – الوسط – الهجوم) في تنمية بعض -2 (اختيار المدافع للمواقع المناسبة- المراقبة-الضغط-التغطية) الاداءات الخططية الدفاعية الفردية : فروض البحث - توجد فروق دالة إحصائية بين كل من القياسات القبالية والبنائية والبعدة في مستوى أداء بعض الاداءات الخططية الدفاعية -1 (العينة قيد البحث)الفردية(اختيار المدافع للمواقع المناسبة- المراقبة-الضغط-التغطية) لنادي كرة القدم بدولة الكويت ولصالح القياسات البعدة . – توجد فروق دالة إحصائية بين ناشئي كرة القدم بدولة الكويت(العينة قيد البحث) وفقاً لخطوط اللعب الثلاثة(الدفاع -2 -الوسط- الهجوم) في مستوى أداء بعض الاداءات الخططية الدفاعية الفردية (اختيار المدافع للمواقع المناسبة- المراقبة-الضغط-التغطية). طرق و إجراءات البحث : منهج البحث: استخدم الباحث المنهج الوصفي بالأسلوب المسحي في الدراسة الأساسية الأولى من خلال تحليل مباريات كأس العالم -1،لأندية بالمغرب لكرة القدم 2014م/2015 (استخدم الباحث المنهج التجريبي في الدراسة الأساسية الثانية من خلال التصميم التجريبي لمجموعة واحدة بطريقة القياس - (القبلي- البيني- البعدي :مجتمع البحث يمثل مجتمع البحث ناشئي كرة القدم تحت 17سنة بالأندية الواقعة بمحافظة الاحمدى والمسجلين بالاتحاد الكويتي لكرة القدم للموسم الرياضي 2015م/2016م وبلغ عددها(5)أندية داخل المحافظة. :مجالات البحث : المجال البشري:عينة البحث وتنقسم إلى-1 :عينة البحث الأساسية الأولى مباراة لعدد(7) فرق من مختلف مدارس كرة القدم العالمية الذين تأهلوا إلى نهائيات كأس العالم للأندية بالمغرب لكرة القدم 2014م/2015. :عينة البحث الأساسية الثانية اختيرت عينة البحث بالطريقة العمدية من مجتمع البحث ممثلة في (نادي الفحاحيل الرياضي) تحت 17سنة ، وبلغ حجم العينة(38) ناشئاً وقد تم استبعاد بعض الناشئين وعددهم (8) ناشئين، منهم (3) ناشئين من العصابين و(5) ناشئين لعدم انتظامهم في القياسات القبالية ، هذا وقد تم اختيار(10) ناشئين من (نادي الساحل) من نفس مجتمع البحث ومن خارج عينة البحث الأساسية كعينة غير مميزة، وكذلك(10) ناشئين من(نادي بركان) تحت 19 سنة كعينة مميزة لإجراء الدراسات الاستطلاعية ، لتصبح عينة البحث الفعلية (20) ناشئي، ويوضح جدول(2) توصيف عينة البحث الأساسية الثانية. :المجال المكاني تم إجراء جميع القياسات و تطبيق الاختبارات البدنية و المهارية و البرنامج التدريبي المقترح على عينة البحث الأساسية وملعب كرة القدم بنادي الجھراء الرياضي ، وكذلك إجراء الدراسات الاستطلاعية بملعب نادي الساحل وبرجان الرياضي وذلك طبقاً لمواعيد وبرنامج زمني محدد. ترجع أهمية الدراسة إلى محاولته تحديد أهم متطلبات تطبيق الجودة في التربية الرياضية بمدارس الحلقة الثانية التعليم الأساسي حيث يسهم ذلك في التشخيص العلمي لجوانب القصور ومحاولة وضع الحلول المناسبة وتحديد المعايير والممارسات الخاصة بالانشطة الرياضية وكذلك طرق قياسها.إدارة الجودة الشاملة هي واحدة من الاتجاهات الحديثة في فلسفة الإدارة القائمة على مجموعة من المبادئ التي يمكن اعتمادها من قبل الإدارة من أجل تحقيق أفضل أداء ممكن، مما يساعد على حل الكثير من المشاكل والصعوبات للجودة وتحسين الأداء والقدرة التنافسية لل منظمة (36: 9). الجودة هي واحدة من الوسائل والأساليب لتحسين هيكل النظام التعليمي للمكونات المادية والبشرية ورفع مستوى الأداء في العصر الحاضر، عصر ما يسمى المفكرين أن (عصر) انهم لم يعودوا يتحدثون أهم حول نوعية التعليم في نظرية أو ترقا المؤسسات التعليمية أو البديل أو تؤثر الأنشطة التعليمية، وإنما هو حقيقة أن أي مؤسسة يمكن أن تتخطى أو الوقوف على الحكن من ذلك، هناك ضرورة ملحة في الحياة المعاصرة، والجودة في المجال التربوي يشير إلى مجموعة من المعايير والإجراءات الرامية إلى تنفيذ التحسين المستمر في المنتج التعليمي أو الرجوع للمواصفات وخصائص المنتج المتوقع تعليمية من خلال الأدوات والأساليب لمكاملة مساعدة المؤسسات التعليمية على تحقيق نتائج مرضية وغير مرغوب فيه	2016	احمد، بهاء اسماعيل سيد.	تقويم متطلبات التربية الرياضية في ضوء معايير الجودة والاعتماد بمدارس المرحلة الاعاديه بمحافظة قنا/	5218	12349575		
--	--	--	--	--	--	---	-------------	--------------------------------	---	-------------	-----------------	--	--

						وردا على ذلك "، وزارة التربية والتعليم في مصر (2003)" وثيقة المعايير الوطنية للتعليم تحت نماذج عالمية من خلال لجنة مشتركة من جميع المعنيين بالتعليم وهذه الوثيقة الشاملة جوانب مختلفة من المداخلات العملية التعليمية ومحاولة لتحقيق الجودة الشاملة، وتتضمن هذه الوثيقة خمسة مجالات هي: فعال، المعلم، والإدارة المدرسية، والمشاركة المجتمعية، وكذلك وثيقة المنهج ومخرجات التعلم (101: 10). تمثل الرياضة المدرسية في مكان واضح في ثقافة كل مجتمع متحضر ولم تعد مجرد حركات ومهارات وإنما هو 2 أصبحت البوابة التعليمية للتدريب على ممارسة العادات والمفاهيم والقيم الصحية والأخلاق لا يتجزأ حتى في السلوك اليومي ووسائل التعليم العام من خلال المسابقات الرياضية والتي تشمل تنسيق رغبات وميول كجزء من الأهداف التربوية لتحفيز تعديل النمو وتسريع مراحل الاستيعلاء على الطلاب اللياقة البدنية والمهارة والاجتماعية، والقدرة المعتدلة والصحة والعنصرية والنفسية والمعلومات والمعارف والمواقف وتعديل السلوك (38:46). وهكذا برزت الحاجة الملحة لنقله نوعية في الرياضة المدرسية على أساس التميز والجودة والاحتجاج توفر معايير وطنية وروية واضحة لاندخالات والمخرجات وتكشف عن فعالية أداء المكونات الأخرى للعملية التعليمية، وتطوير وتحسين الأداء والإنتاجية التعليم الأفضل يستمر التحفيز، يتطلب النظر في جميع عناصر نظام التعليم بما في ذلك الرياضة المدرسية، وهي معايير واحدة (64:18). وبالتالي، من خلال عمل الباحث مدرسا للتربية البدنية وفريق المشاركة في التعليم والتقييم الذاتي للمدرسة وكذلك مسالة المتخصصين في مجال التربية البدنية ونوعية من الموجهين والإداريين والمعلمين للتربية البدنية وكذلك المراجعون الخارجيون للسلطة وطنية لضمان الجودة والاعتماد في بعض المدارس، ومن خلال إطلاع الباحث بعض الدراسات السابقة التي تناولت جودة في هذا المجال أيضا، لاحظت نوعية الباحث التربوي أن الأزمة الرياضية المدرسية جعلته الجانب أقل أهمية في النظام التعليمي، في ظل غياب الإبداع في العمليات الإدارية للرياضة المدرسية، وبعض التخطيط العلمي السليم، وفقا لبعض الكوادر الإدارية يست مؤهلة التعليمية وإعادة التأهيل المناسب الإدارية والإدارية والصراعات المدرسة ينتهي حتى تصل البداية وتحت العمليات الإدارية العقيمة، وفي حالة عدم وجود بيانات حقيقية ومعلومات عن واقع الإدارة المدرسية يجعل من الصعب تطوير إدارة ونقل روتين لخلق وقوة الابتكار التخطيط الفعال والتنسيق والإدارة والمتابعة upCalendar، حيث المعايير والممارسات والمؤشرات الواردة في وثيقة من السلطة الوطنية للم ضمان الجودة والاعتماد لا تأخذ على محمل الجد التنفيذ مما يؤدي إلى إهمال التربية الرياضية على الرغم من أن التربية البدنية مادة أصبح النجاح المادي والفشل بالقرار الوزاري رقم 313 لعام 2011 والتي ظهرت الحاجة التربية البدنية لشروط ومتطلبات خاصة للأداء من هنا أهمية دراسة لتقييم الاحتياجات في مجال التربية البدنية في ضوء معايير الجودة والاعتماد في المدارس الثانوية في محافظة قنا. وتعد هذه الدراسة الهامة: محاولة لتحديد أهم المتطلبات الأساسية لتطبيق التربية البدنية الجودة في مدارس التعليم الأساسي الحلقة الثانية حيث يساهم 1. هذا التشخيص عن القصور العلمي ومحاولة وضع الحلول المناسبة لها. 2. تحديد الممارسات والمعايير لممارسة الأنشطة الرياضية، فضلا عن أساليب القياس. 3. مساعدة إدارات المدارس لوضع خطط للتغلب على العقبات التي تمثل نقطة الانطلاق لتحقيق الجودة والاعتماد. 4. لتوضيح الطرق التي يمكننا تحسين نوعية التعليم والغرض من الدراسة. وتهدف الدراسة إلى تقييم الاحتياجات في مجال التربية البدنية في ضوء معايير الجودة والاعتماد في المدارس الثانوية، قنا من خلال تحديد: 1. متطلبات التربية البدنية في المدارس الثانوية في محافظة قنا. 2. الممارسات والمؤشرات التي تفعيل التربية البدنية في المدارس الثانوية في محافظة قنا. 3. معايير الجودة والاعتماد في مجال التربية البدنية في المدارس الثانوية في مدينة قنا.
						يهدف البحث إلى التعرف على الثقافة التنظيمية وعلاقتها بالإبداع الإداري لدى موجهي وموجهات التربية البدنية بدولة الكويت وذلك من خلال التعرف على واقع الثقافة التنظيمية لدى موجهي وموجهات التربية البدنية بنين بدولة الكويت واقع الإبداع الإداري لدى موجهي وموجهات التربية البدنية بنين بدولة الكويت.
						يهدف البحث إلى تقويم الاحتراف الرياضي في كره السله بدوله الكويت وذلك من خلال التعرف على معرفه الواقع الفعلي الحالي للرياضه كره السله بدوله الكويت ومعرفه الواقع الحالي للاحتراف الرياضي لكره السله بدوله الكويت ومعرفه جوانب القوه والضعف في الاحتراف الرياضي لكره السله بدوله الكويت.
						يهدف البحث إلى دراسة تأثير استخدام تدريبات البيئة الرملية على بعض المتغيرات البدنية والمستوى الرقمي لمتسابقى جرى 1500 متر وذلك من خلال تصميم برنامج تدريبي باستخدام تدريبات البيئة الرملية ومعرفه أثره على بعض المتغيرات البدنية. أهمية البحث والحاجة إليه:- من خلال مقدمة ومشكلة البحث يمكن بلورة أهمية هذا البحث والحاجة إليه في النقاط التالية: 1/2/1- مواكبة التطور العلمي الهائل في مجال التدريب الرياضي الحديث. 1/2/2- توضيح مدى أهمية استخدام تدريبات البيئة الرملية لتنمية القدرات البدنية الخاصة لمتسابقى جرى 1500متر - 1/2/3- أهمية الارتقاء بالمستوى الرقمي لمسابقات المسافات المتوسطة - 1/2/4- تشجيع المدربين في مجال تدريب ألعاب القوى على تغيير الأساليب التقليدية في التدريب وإتباع أساليب جديدة في تدريب المسافات المتوسطة - 1/3- هدف البحث يهدف البحث إلى دراسة تأثير استخدام تدريبات البيئة الرملية على بعض المتغيرات البدنية والمستوى الرقمي لمتسابقى جرى 1500متر وذلك من خلال : 1/3/1- تصميم برنامج تدريبي باستخدام تدريبات البيئة الرملية ومعرفه أثره على بعض المتغيرات البدنية (السرعة) - القصوى – تحمل السرعة- تحمل القوة- التحمل الدوري التنفسي) لمتسابقى جرى1500متر للمجموعة التجريبية 1/3/2- تصميم برنامج تدريبي باستخدام تدريبات البيئة الرملية ومعرفه أثره على المستوى الرقمي لمتسابقى جرى1500متر للمجموعة التجريبية 1/4- فروق ذات دلالة إحصائية بين متوسطي القياسين القبلي والبعدى فى المتغيرات البدنية والمستوى الرقمي لمتسابقى جرى 1500متر وذلك من خلال : 1/4/1- توجد فروق ذات دلالة إحصائية بين متوسطي القياسين القبلي والبعدى فى المستوى الرقمي لصالح القياس البعدى - 1/4/2- توجد فروق ذات دلالة إحصائية بين متوسطي القياسين القبلي والبعدى فى المستوى الرقمي لصالح القياس البعدى - 1/5- بعض المصطلحات الواردة بالبحث 1/5/1- التدريب في البيئة الرملية : training sandly environment هو أسلوب من أساليب المقارمات باستخدام مقاومة الجسم في البيئة الرملية بغرض تنمية القدرات البدنية وتحسين بعض* تعريف اجرائي
						أهمية البحث في التوصل الى اداء قياس موضوعيه ومتدرجه باستخدام نماذج الاستجابة للمفردة وتتمتع بخصائص سيكومترية مرتفعه ومعرفه اى من نماذج التحليل الثلاثة الافضل واللاق في تقدير بارامترات الصعوبه لمفردات الاختبار وبارامترات قدرات الطلاب على الاختبار.

							يهدف البحث الى تمميم برنامج خططي ومعرفة اثره على مستوى الاداء المهارى لناشئى رياضيه المبارزه بدوله الكويت وذلك من خلال معرفة تأثير البرنامج التدرىي الخططى المقر ح على تحسين مستوى اداء ناشئء رياضيه المبارزه فى المباريات.	2016			عبد الكريم، فارس محمد.	تأثير استخدام بعض التدريبات الخططيه الدفاعيه على مستوى الاداء المهارى للاعبى سلاح الشيش بدوله الكويت/	12349638	5223

							يهدف البحث الى التنصبي النفسى اللغوى عن ظاهره على طرف اللسان ومعرفة مستوى اداء الذاكره بالنسبه للطلاب الخاضعين لهذه الظاهره وتحديد بروفيلات ظاهره على طرف اللسان التى يمكن تمييزها بين التلاميذ عينة البحث.هدف البحث الحالي إلى إلقاء الضوء على دراسة إحدى ظواهر علم النفس اللغوي وهي ظاهرة على طرف اللسان والتي يُعاني منها بعض تلاميذ الصف الأول بمدرسة الصفوة الخاصة بقنا الدارسين للغة / الإعدادي للعام الد ا رسي ٢٠١٤ ٢٠١٥ الانجليزية كلغة ثانية، كما هدف إلى معرفة مستوى أداء الذاكرة العاملة بالنسبة لهؤلاء التلاميذ وأيضاً إلى مدى إمكانية تحديد بروفيلات هذه الظاهرة التي يُمكن تمييزها بين هؤلاء التلاميذ عينة البحث الحالي، ومن أجل تحقيق هذه الأهداف تم تحديد مشكلة البحث من خلال الأسئلة التالية:	2016			سليمان، الهام عطيت الله قحى.	بروفيلات ظاهره على طرف اللسان وعلاقتها بأداء الذاكره العامله لدى عينه من طلاب المرحله الاعداديه/	12350138	5230
							هل تختلف نسبة انتشار ظاهرة على طرف اللسان باختلاف النوع (ذكور – إناث)؟١- هل توجد فروق فى أداء الذاكرة العاملة بين التلاميذ الذين يظهرون/ لا يظهرون ظاهرة ٢- على طرف اللسان؟							
							ما بروفيلات ظاهرة على طرف اللسان التي يمكن تمييزها بين التلاميذ عينة البحث ٣- الحالي؟انقسم هذا البحث إلى جانبين أولهما الجانب النظري: وهو إطار نظري يوضح كل التعريفات الخاصة بظاهرة على طرف اللسان وأيضاً مفهوم الذاكرة العاملة وكل ما يتعلق بها، أما الجانب الآخر فهو الجانب التطبيقي: والذي يتضمن أدوات الد ا رسة المستخدمة في تحقيق أهداف البحث الحالي وقد استخدمت الباحثة عدداً من الأساليب والمعالجات الإحصائية وصولاً إلى نتائج البحث والتي منها:							
							على ال رغم من عدم وجود فروق ذات دلالة إحصائية بين الذكور والإناث عينة البحث ١- الحالي فى ظاهرة على طرف اللسان إلا أنه من الواضح زيادة عدد الذكور الخاضعين لهذه الظاهرة أكثر من الإناث فى البند الثالث من الاختبار الأول، وزيادة عدد الإناث الخاضعين لهذه الظاهرة أكثر من الذكور فى البند الأول من الاختبار الثالث، والبندين ال ا ربع والسابع من الاختبار ال ا ربع.٢- لا توجد علاقة ارتباطية دالة إحصائية بين عدد م ا رت الاسترجاع من الذاكرة العاملة							
							وعدد م ا رت الخضوع لظاهرة على طرف اللسان.							
							٢- بشأن الكشف عن الحالات المسجلة لهذه الظاهرة لوحظ حدوثها بكثرة مع الكلمات التي لها مدلول ضعيف أكثر من التي لها مدلول قوي.							
							كان لطول الكلمة أيضاً تأثير ا ر واضحاً لحدوث مثل هذهالظاهرة ٤- لا يمكن التمييز بين الاستجابات المختلفة لظاهرة على طرف اللسان والإداء على المجموعات الستة لمهمة الذاكرة العاملة -٥- لدى أف ا رد العينة							
							يهدف البحث الى الحفاظ على مصادر الاستلهام للاشكال المتوارثه من عناصر العماره الاسلاميه المملوكيه وتنميه الوعى الفنى والثقافى والتراثى من خلال الكشف عن خبايا القيم الجماليه الكامنه بموروثات عناصر العماره الاسلاميه واقتراح صياغات ابداعيه مستحدته مستلهمه من عناصر العماره الاسلاميه المملوكيه.	2016			أحمد، محمد أحمد فؤاد.	القيم الجماليه لعناصر العماره الاسلاميه المملوكيه كمدخل لاستحداث مشغولة خشبيه/	12350179	5231
							هذه المخاوف البحوث المتعلقة بتطوير عناصر العمل الخشبية التي هي مستوحاة من عناصر مملوك الهندسة المعمارية، والقيم الجمالية، ونمط متنوعة، مع مزايا التكنولوجيات والتقنيات المستخدمة في تلك الحقبة، الفصل الأول: فهو يشمل الإطار العام للدراسة .							
							الفصل الثاني: أنها تتعامل مع مملوك الهندسة المعمارية ومكوناته، والجوانب الاجتماعية، ومجموعة مختارة منهم، والقيم المعمارية والمزايا.							
							الفصل الثالث: فهو يتعامل مع عناصر العماره الإسلامية (موضوع البحث) من حيث مفهومها ونشأتها والفلسفة وChapter. evolution الرابع: أنه يتعامل مع مجموعة مختارة من الأعمال الخشبية خلال الفترة المملوكية من حيث الوصف و التقنيات المستخدمة.							
							الفصل الخامس: فهو يشمل البحوث التطبيقيات الذاتى، والتحليل الإحصائي ومناقشة النتائج، والتوصيات الصادرة عن أبحاث							
							يهدف البحث الى التعرف على فاعليه استخدام دليل فى التربيه الغذائيه للمعلمه والأسره فى تنمية الوعى الغذائى لأطفال الروضه .	2016			الهورى، رشا النسوقى ابراهيم النسوقى.	فاعليه استخدام دليل فى التربيه الغذائيه للمعلمه والأسره فى تنمية الوعى الغذائى لدى أطفال الروضه/	12350193	5232
							تعد مرحلة ما قبل المدرسة مرحلة مهمة للإنسان، فهي قنطرة يعبرها بين حياة الأسرة والمدرسة ليتكيف مع عالم جديد متغير له خصائصه ومطالبة، وهي بداية التنمية البشرية لكونها مجالاً خصباً لغرس وتنمية العادات والسلوكيات الإيجابية، ولهذا تصبح تلك المرحلة من مراحل إعداده المهمة، كما أن لها الأهمية الكبرى في تعديل نشأته وتشكيل شخصيته لأن الطفل خلالها يتقبل الأمور السلوكية دون مناقشة لها أو طلب دليل لإثباتها، إذا ما تم إرشاده لها بالطرق التربوية السليمة.							
							كما أن هذه المرحلة تعد البيئة الأساسية لبناء شخصية الطفل وتكوين سلوكه الإنسانى الذي يميزه عن غيره من الكائنات حيث يتميز الطفل بالمرونة وقابليته للتعليم والاختد به، فعّل الطفل خلال هذه المرحلة صفحة بضاء يمكن أن تسطر عليها ما تزد.(عبد الخالق أحمد عفيفي، 2005، 315).							

						وأطفال الروضة في مرحلة النمو الحسي والعقلي ، في حاجة إلى التوعية الغذائية التي توفر لهم الصحة الجسمية والعقلية فافعل السليم في الجسم السليم «ويري (عبد الفتاح إبراهيم تركي 19٠2005)، (إيلي عبد المنعم السباعي، 36٠2004) أن التربية الغذائية ليست مقتصرة على إمداد الفرد بالغذاء بل يجب أن يتعلم الفرد كيف يختار غذائه بشرط يوافق احتياجاته من حيث: 1) احتوائه على العناصر المهمة بكمية كافية للجسم 2) طهيهِ بطريقة نظيفة سليمة تحافظ على عناصره كاملة 3) كونه مشهي متنوع يفتح الشهية ويطرد الملل من التكرار 4).....كميَّة تلائم حاجة الجسم تبعاً للفرد سواء ذكر أو أنثى أو طفل أو مرأق 5) مناسبتة مع حالة الطفل من حيث المرض والصحة وما يلزم كل حالة من نوعيات غذاء لها ولهذا لابد من الاهتمام بتدريس التربية الغذائية لطفل الروضة حتى يشب الطفل متقهما لغذائه ويستطيع ممارسة السلوكيات الغذائية السليمة. وترى (سالي روبنسون، 2007، 55) أنه من الضروري تغير العادات والسلوكيات الغذائية الخاطئة لدي أطفال الروضة، فمن سن الرابعة تزداد معلومات الأطفال ويدركون مدى أهمية التعرف على نوعية وتعد الأم المعلم الأول في المنزل وعليها يقع عبء تعليم طفل ما قبل المدرسة العادات السليمة وتعوديه حسن اختيار الطعام ، وهي تعد قوائم الأسرة ونظام وجباتها اليومية ،تفكون هي الطابع الذي يسير عليه الطفل في حياته بعد ذلك. وتكثر قوائم الأسرة عادة بأحدى العوامل الآتية: مستوي الدخل الذي يدفع الأسرة إلى الاستغناء عن أنواع الطعام مرتفعة الثمن عن طباقها الشرائية وهذا يؤثر على 1) نصيب الفرد من البروتين الحيواني . 2) تعذر الحصول على بعض الأطعمة لفلة المحصول أو بعد الأسواق التي تبيعها 3) نقص الوعي الغذائي لدي بعض أولياء الأمور بالاِحتياجات الغذائية للطفل في هذه المرحلة والروضة ما هي إلا امتداد للأسرة ، والقاعدة العامة لرياض الأطفال هي تعاون معلمات الروضة مع أسرة الطفل، ومن مظاهر هذا التعاون حرص الروضة على إحاطة الأسرة علما بخصائصها في العمل مع مجموعة الأطفال، ويرى (طارق عبد الرؤوف عامر 2008 :8٠) ان العادات والاتجاهات تتشكل في تلك المرحلة فهي فترة استطلاع وتجريب يستمتع فيها الطفل بأي عمل جديد. لهذا أصبح على مرحلة الروضة أن تتولى مسؤولية رعاية الأطفال والعناية بهم غذائيا وصحيا ونفسيا بجانب تنمية مواهبهم وقدرتهم بدنيا وثقافيا وغذائيا حتى تكون تهيئة سليمة للمراحل التالية بما يتفق مع أهداف المجتمع المصري وقيمة (" وزارة التربية والتعليم"، 2006/2005، 6). علوة على ما سبق ومن أجل أن تصبح مؤسسة رياض الأطفال بيئة أكثر فاعلية لغرس وتنمية العادات السليمة لدي الطفل من سن(4: 6) سنوات لابد من وجود صلة وطيدة بينها وبين الأسرة وذلك لضمان عدم التعارض بين أهداف وأسلوب التربية في كل منهما. ومن هنا كانت الحاجة لأعداد دليل للأسرة والمعلمة في التربية الغذائية والتعرف على اثره في اكتساب الوعي الغذائي لدي أطفال الروضة. مشكلة البحث: رغم أهمية مرحلة رياض الأطفال وأهمية تنمية الوعي الغذائي لدي أطفال الروضة وضرورة استخدام أساليب تدريسية فعالة في ذلك إلا أنه لوحظ ما يلي: أولاً: أثناء العمل برياض الأطفال وإعداد مقابلات الشخصية مع المعلمات وأولياء الأمور: لوحظ وجود قصور في بعض المعلومات والسلوكيات الإيجابية لدي اطفال الرياض ، بسبب إتباع بعض السلوكيات الخاطئة والتي تنتشر بين أطفال الروضة من حيث تقليد بعضهم البعض مثل(تناول الطعام بأيدي متسخة، وعدم تناول قطع الخضروات الموجودة داخل سندوتشاتهم....) فمن خلال الزيارات الميدانية التي قامت بها الباحثة لبعضروضات بمحافظة قنا وعددها (3من الروضات) وهم روضة الحميدات الابتدائية وروضة عمر بن عبد العزيز الخاصة وروضه الابتدائية المشتركة للعام الدراسي2011\2012م ومن خلال مقابلتها لبعض المشرفات ومعلمات تلك الروضات وكذلك عدد من أولياء الأمور لبعض الأطفال ويسؤال عما يتم تدريسه للأطفال في مجال التربية الغذائية؟ وكيف تدرس؟ وهل هناك خطة تدريس لها؟ وما السلوكيات الغذائية الملحظة منهم عن الأطفال وكان ذلك في صورة استطلاع للرأي . أشارت المقابلات إلي وجود بعض السلوكيات والعادات الغذائية الخاطئة سواء كانت مكتسبة من المنزل أو دور رياض الأطفال وان كانت هناك بعض السلوكيات الغذائية تعمل المشرفات على إكسابها للأطفال ولكن بطريقة تقليدية تعتمد على التلقين والتوجيه الشفوي ، وقد اكتفت الأمهات على قلة النواحي التعليمية الغذائية التي تدرس للأطفال الروضة الأمر الذي يقلل من فرص كسب الأطفال لتلك السلوكيات وممارستها ،كما وجدت عدة شكاوي منها: 1)-معظم الأطعمة والمشروبات بيعا واستهلاكها هي الأغذية ذات الطاقة العالية والقيمة الغذائية المنخفضة مثل الشيبسي -المياه الغازية ،والشيكولاتة ، والحلويات ذات الألوان الصناعية والعناصر الصناعية والتي لها آثارها السلبية على صحة ابتعاد الأطفال عن تناول سندوتشات المحضرة في المنزل أو إلقائها في سلة المهملات أو أفسادها بالماء للتحجج بأنها 2)-وسلامة الأطفال 3)-الشكوى المستمرة للمعلمة من عدم إقبال الأطفال لتناول بعض الأصناف الموجودة في سندوتشاتهم مثل الجبنة المثلثات 4)-التي تلصق في سقف حلقهم أو المربى التي تلصق في أصابعهم 5)-زيادة الغيرة بين الأطفال مثل عدم تناول الطفل لطعامه وبيكاه على طعام صديقة في الروضة 6)-انتشار بعض الحالات المرضية مثل النحافة أو السمنة نتيجة سوء تناول واختيار الطعام 7)-عدم اهتمام الأم بإعطاء الطفل ثمرة فاكهة والاعتماد على الساندوتشات، وكذلك إعطائهم مصروف مالي يصرف على المياه الغازية والأغذية السريعة مثل الشيبسي والحلويات 8)-عدم تناول الإفطار قبل الخروج للمدرسة 9)-ممارسة الأطفال للسلوكيات الغذائية غير السليمة أثناء تناول الطعام مثل عدم غسل الأطفال لأيديهم وكذلك عدم مضغ 10)-الطفل للطعام جيدا مما ينتج عنه التلوث وصعوبة البلع وحدوث الأم في البطن 11)-توجه الأطفال إلى التقليد بدون وعي للإعلانات ومحاوله تقليدها وإتباعها وقد ردد بالفعل معظم الأطفال لبعض أغاني 12)-هذه الإعلانات، مما يبين خطورة وسائل الإعلام في بث أفكار تتعلق بسوء التغذية عند الأطفال لنقص منتجاتها للقيمة الغذائية 13)-يتضح مما سبق أن هناك بعض جوانب القصور لدي معلمات رياض الأطفال من حيث استخدام أساليب وطرق التعليم الفعالة في تحقيق العديد من الأهداف التربوية لدي أطفال الروضة ، ولعل ذلك القصور يدعو إلى إعداد دليل للمعلمات لتنمية الوعي الغذائي لديهم وتحقيق الأهداف المرجوة منه.

						يهدف البحث إلى تنمية مستوى المهارات الهجومية المركبة لنشائيء كرة القدم تحت 17 سنة بدوله الكويت من خلال تصميم برنامج تدريبي مقترح باستخدام تدريبات الرشاقة والتوازن لنشائيء كرة القدم والتعرف على تأثير البرنامج التدريبي الرشاقة والتوازن لنشائيء كرة القدم والتعرف على تأثير البرنامج التدريبي المقترح على متغيرات الرشاقة والتوازن ومستوى بعض المهارات الهجومية المركبة لنشائيء كرة القدم.هدف البحث: يهدف هذا البحث إلى " تنمية مستوى المهارات الهجومية المركبة لنشائيء كرة القدم تحت 17 سنة بدولة الكويت " من خلال: (العينة قيد البحث)تصميم برنامج تدريبي مقترح باستخدام تدريبات الرشاقة والتوازن لنشائيء كرة القدم -1 التعرف على تأثير البرنامج التدريبي المقترح على متغيرات الرشاقة والتوازن ومستوى بعض المهارات الهجومية -2 (العينة قيد البحث)(المركبة لنشائيء كرة القدم). (العينة قيد البحث)(العلاقة بين الرشاقة والتوازن ومستوى بعض المهارات الهجومية المركبة لنشائيء كرة القدم -3 فروض البحث: توجد فروق دالة إحصائية بين القياسين القبلي والبعدى للمجموعة التجريبية في متغيرات الرشاقة والتوازن ومستوى -1 بعض المهارات الهجومية المركبة لنشائيء كرة القدم(العينة قيد البحث) ولصالح القياس البعدى توجد فروق دالة إحصائية بين المجموعة الضابطة والمجموعة التجريبية في متغيرات الرشاقة والتوازن ومستوى بعض -2 المهارات الهجومية المركبة لنشائيء كرة القدم (العينة قيد البحث) ولصالح المجموعة التجريبية توجد فروق دالة إحصائية بين القياسين القبلي والبعدى للمجموعة الضابطة في متغيرات الرشاقة والتوازن ومستوى -3 بعض المهارات الهجومية المركبة لنشائيء كرة القدم (العينة قيد البحث)ولصالح القياس البعدى توجد علاقة إيجابية بين الرشاقة والتوازن ومستوى بعض المهارات الهجومية المركبة لنشائيء كرة القدم(العينة قيد -4 البحث). المصطلحات المستخدمة في البحث : - الرشاقة الخاصة: قدرة اللاعب على تغيير أوضاع اتجاهات جسمه بأكمله أو جزء منه على الأرض أو في الهواء بسرعة وتوقيت ودقة وتنسيق وتوافق واقتصاد في الجهد الحركي واتجاه صحيح وربط وتركيب وتنطبق الأداء المهارى بما يتناسب مع ظروف المنافسة وإعادة اتزانه فور ذلك مباشرة .(13:158) - متغيرات الرشاقة : هي الحركات الصعبة في الأداء والتي تحتوى على أكثر من هدف حيث تؤدي بمستوى عالي من الرشاقة كاستقبال الكرة بأوضاع وارتفاعات مختلفة وتسديدها على المرمى أو تمريرها في نفس اللحظة (17: 265) : القدرة على التكيف والتغيير- هي السرعة في أداء الحركات ورد الفعل الحركي كسرعة التنقل بين الهجوم والدفاع كما يتطلبه الموقف (17:266) التوازن:- هو المحافظة على وضع اتزان الجسم أثناء السكون والحركة من خلال العديد من الآليات الحسية والانعكاسية والحركية. (4:100) هو قدرة الفرد على البقاء في وضع ثابت عند اتخاذ أوضاع معينة دون اهتزاز أو سقوط بحيث يكون مركز ثقل الجسم فوق قاعدة الارتكاز (32: 5) هو القدرة على الاحتفاظ بتوازن الجسم أثناء تحركه هو أو احد أجزائه من نقطة إلى أخرى.(4: 212) : الأداء المهارى الهجومي المركب- هي المهارات التي تمثل نماذج لأشكال مختلفة لمجموعة من المهارات المنفردة تندمج مع بعضها البعض وتتداخل مراحلها النهائية لتشكل بداية للمهارة التالية ، والتي يودبها اللاعب في موقف لعبي هجومي معين لتحقيق هدف هجومي معين وفقا لمتطلباته . 						يهدف هذا البحث إلى التعرف على " تأثير برنامج تدريبي باستخدام تدريبات السرعة والرشاقة على مستوى أداء بعض المهارات الهجومية لناشئي كرة السلة بدولة الكويت " فروض البحث: توجد فروق ذات دلالة احصائية بين القياسين القبلي والبعدي ولصالح القياس البعدي للمجموعة التجريبية في متغير: 1. السرعة و الرشاقة لناشئي كرة السلة بدولة الكويت توجد فروق ذات دلالة احصائية بين القياسين القبلي والبعدي ولصالح القياس البعدي للمجموعة التجريبية في مستوى أداء. 2. بعض المهارات الهجومية قيد البحث لناشئي كرة السلة بدولة الكويت البرنامج التدريبي يؤثر ايجابيا في المتغيرات البدنية والمهارية قيد البحث. 3. : المصطلحات المستخدمة في البحث- Speed:السرعة. هي عبارة عن القدرة على تحريك الجسم أو جزء منه لمسافة معينة في اقل زمن ممكن. (43 :57) Performance Speed: سرعة الأداء- هي قدرة اللاعب على اداء واجب حركي سواء بسيط أو مركب في اقل زمن ممكن، ومن الأمثلة التطبيقية في كرة القدم سرعة التمرير والتصويب والسيطرة على الكرة والجري بالكرة والمحاورة للتخلص من مدافع بسرعة. (20 :61) سرعة الاستجابة Response Speed: ويقصد بها على الاستجابة الحركية في القصر زمن ممكن ومثال ذلك الاستجابة السريعة لحركة الكرة بعد أن تغير اتجاهها. (20 :96) الرشاقة: قدرة اللاعب على تغيير أوضاع اتجاهات جسمه بأكمله أو جزء منه على الأرض أو في الهواء بسرعة وتوقيت ودقة وتنسيق وتوافق واقتصاد في الجهد الحركي واتجاه صحيح وربط وتركيب وتتطابق الأداء المهارى بما يتناسب مع ظروف المنافسة وإعادة اتزانه فور ذلك مباشرة. (18:158) - متغيرات الرشاقة : : القدرة التوجيهية- هي الحركات الصعبة في الأداء والتي تحتوى على أكثر من هدف حيث تؤدي بمستوى عالي من الرشاقة كاستقبال الكرة بأوضاع وارتفاعات مختلفة وتسيدها على المرمى أو تمريرها في نفس اللحظة (18 :265) : القدرة على التكيف والتغيير- هي السرعة في أداء الحركات ورد الفعل الحركي كسرعة التنقل بين الهجوم والدفاع كما يتطلبه الموقف (18:266) التصويب: هو دفع الكرة تجاه الهدف بدقة وسرعة بطرق عديدة واشكال متنوعة من الاداء سواء باستخدام يد واحدة أو كلتا اليدين أو التصويب السلمي أو التصويب الخطافي أو التصويب من القذف وتحدد نتيجة مباراة كرة السلة بعدد التصويبات الناجحة التي يحرزها في سلة الفريق المنافس.(76 : 70)-(66 : 26) المحاورة : هي وسيلة لتقديم بالكرة وهي الطريقة الوحيدة للتحرك بالكرة.(37 :30)
			القاهرة في ألف عام1969-1969	مصر - القاهرة		يهدف البحث إلى تصميم برنامج تدريبي باستخدام تدريبات السلكيو لناشئي كرة القدم تحت 20سنة ومعرفة اثره على بعض القدرات البدنية ومستوى الاداء المهارى ومستوى الاداء الخططى الهجوميه الفردى.محاولات لتحسين مستوى الاداء الرياضى من عملية مستمرة للتنافس على كل دول العالم للرياضى فردى للوصول إلى أعلى والأفضل الإنجازات في مختلف الأنشطة الرياضية، وهنا تكمن أهمية البحث العلمى في قدرته على الوصول إلى تشكل النتائج الجديد علمية وأضاف يمكن استخدامها في المجال العملى لاطرفة الرياضية، ويتضح من خلال تطبيق نتائج الدراسات والبحوث العلمية في جميع مجالات التنمية كرة القدم، والتي أدت إلى ظهور وسائل وأساليب تدريبية جديدة جعلت من الألعاب تأخذ شكل صحيح تنافسية تمارس التي تساهم في تطوير وتحسين مستوى أداء التمارين S.A.Q الناشئين حيث يمكن للمبتدئين ممارسة والذين لديهم مستويات أعلى. فهو يشير إلى "ماريو جوفانوفيتش وآخرون ماريو يوفانوفيتش، وآخرون" (2011) S.A.Q أن مصطلح مشتق من الأحرف الأولى من كل من الانتقالية سرعة سرعة وخفة الحركة وسرعة المحرك رشاقة سرعة .. ويرى "عادل عبد بصير" (1999) ويتفق معظم الخبراء في التدريب الرياضى أن اجليتي المعنية مع قدرة الفرد على تغيير أوضاعه الجسم أو تغيير سرعة الاتجاه، سواء كان ذلك في الجسم كله أو أجزاء منه، سواء كان ذلك على الأرض "بارو بارو" قال أو في الهواء، على سبيل المثال، انظر "كلارك كلارك" خفة الحركة يتطلب القدرة على تغيير سرعة أوضاع الجسم أو تغيير اتجاهه، وترى وطلب من قدرة الجسم أو أجزاء منه لتغيير الاتجاهات أن تكون مصحوبة بدقة والسرعة، كما "Curtin كيرتن"، مبينا أنها تتطلب القدرة على الحركات الرد السريع موجهة شريطة أن تكون مصحوبة بدقة والقدرة على تغيير الاتجاه، كما Curtin أبرز هذا العمل لا يتطلب قوة كبيرة أو القدرة. ويرى "مفتي إبراهيم" (2010) أن سرعة أهم العناصر من عنصر الإعداد البدني الذي يؤثر على للغاية تحديد كفاءتها، كما يعرف بأنه القدرة على أداء بعض الحركات في وقت أقل ممكن، وكذلك سرعة أثرت على كفاءة الجهاز العصبي والعضلات ، ويؤكد "محمد زمزم" (2007) أن كرة القدم في العصر الحديث يتميز العديد من خطط اللعب، والذي يتطلب المدرسين دراسة اللعب الهجومى ووضع خطط والتعرف على خطط اللعب الدفاعية ومحاوله وضع حلول للتغلب عليها، من خلال شرح مواقف مختلف الأطراف الفاعلة اللعب وتطوير الإمكانات لحلول هذه المواقف. ومباريات كرة القدم، وهو ما يمثل انتباه الناس في جميع أنحاء العالم في مختلف المستويات العمرية للناشئين والشباب والمتقدمين وذلك لإثارة والمتعة التي تميز مباريات كرة القدم، وأصبح العالم تتنافس مع بعضها البعض لأقامة البطولات في مختلف القارية والعالمية.ويرى "عادل عبد الحميد" (2004) أن الأساليب العنوانية للفريق الذي يعتمد بشكل كبير على القدرات الفردية، والتي هي أساسا هاما للتعاون بين لاعبي الفريق، الأمر الذي يتطلب التكامل من التحركات الفردية في الأداء الجماعي لل يتم تشغيل الفريق وهذه الوسائل التي تنفذها الهجوم التكتيكات الفردية مع الكرة والمراوغة والتمرير والتصويب. من خلال اهتمام الباحث ومتابعة النادي تدريب الناشئين لكرة القدم أسوان الرياضى لاحظ مستوى تراجع القدرات البدنية ومستوى الأداء التكتيكي صغار الفردية الهجومية وحقيقة أن الدراسة الباحث من استطلاع لتحديد مستوى القدرات البدنية ومستوى الأداء الهجوم التكتيكي وتحليل فردية من قبل بعض من تدريب ومباريات الشباب تحت 20 عاما من الأبحاث تظهر أهمية تناول تمارين مختلفة تعمل على تطوير القدرات البدنية ومستوى الأداء الفردى التكتيكية الهجومية، وفي حدود علم الباحث في مجال البحوث والدراسات على شبكة المعلومات العالمية (الإنترنت)، والباحث لم تجد أي من الدراسات التي تناولت تأثير برنامج تدريبي باستخدام (ش.م.ق) تدريب لتطوير بعض عناصر اللياقة البدنية الخاصة ومعايير الهجوم التكتيكي فرد الأداء Nacia كرة القدم، وكان هذا واحدا من النواحي الحقيقية لإجراء هذه الدراسة بالإضافة إلى الدور الحاسم الذي تؤديه من التدريبات (ش.م.ق) تحسين الوضع بالنسبة للاعب في النشاط الممارس الرياضية.

5302	12364771		تأثير الخدمات التفاعلية فى المواقع الإلكترونية على كفاءة الاتصالات التسويقية فى المؤسسات الخدمية المصرية :	عبد الغنى، هانى فوزي.		2016	The emergence of the Internet is considered a revolution in the field of communication by all means. This is because of the internet's unique ability to transfer knowledge in different formats as it is able to combine text, audio, pictures and images. In the recent years, almost all services organizations and other organizations have employed this technology by creating websites, whether general websites providing information or a social network to communicate with users to learn about the services of the organization in order to increase the efficiency of its marketing communications. This will help to satisfy the users' needs through communicating with them in the light of interactive services, especially because of the severe competition between the organizations that provide similar services whether it is industrial organization, economic or recreational, educational or working in the cosmetics or communications or aviation and other field. The problem is how to search and identify the interactive services in the websites and know their impact on the efficiency of marketing communications in the services organizations.		
							And so by trying to answer the research questions such as analytical study questions,		

							the questions of the in depth interview with marketers and the field study questions and hypothesis.		
5303	12364896		تطور خريطة الدوائر الانتخابية في محافظة قنا :	رضوان, شيماء أحمد عبدالله.		2016	أرسالة مكونة من خمسة فصول تسيقهم مقدمة وتليهم خاتمة الصراع في الدوائر الانتخابية بين الأحزاب منذ ذلك التاريخ. للأنظمة الانتخابية المختلفة التي أخذت بها مصر منذ عام ١٩٧٦، وكذلك طبيعة - تناولت المقدمة تطور النظام الانتخابي المصري ، فمن خلال المقدمة تم العرض لحق بعملية توزيع الدوائر الانتخابية في محافظة قنا، وكذلك تحليل خريطة الدوائر - تناول الفصل الأول التوزيع الجغرافي للدوائر الانتخابية من خلال توضيح التطور الذي الانتخابية لمحافظة قنا في عامي ٢٠١٠ و ٢٠١١ مع دراسة تحليلية لخريطة الدوائر المكاني والتوزيع الجغرافي للمكونات الإدارية . الانتخابية لمجلس الشعب ٢٠١٥ من خلال مقارنة الحيز المساحي للدوائر والتجاور ٢٠١٠ و ٢٠١١، وكذلك أهم صفات الناخبين ذات التأثير على حقهم في المشاركة - درس الفصل الثاني التوزيع الجغرافي للناخبين على الدوائر الانتخابية في انتخابات على مدى عدالة هذا التوزيع . الانتخابية ، وتناول الفصل أيضا توزيع الناخبين على لجان الانتخاب الفرعية للتعرف والصفة الانتخابية والانتماء السياسي ، كما تناول الفصل بالدراسة تحليل التوزيع - تناول الفصل الثالث دراسة المرشحين من حيث خصائصهم المتعلقة بالنوع والدين مع دراسة تفصيلية لمرشحي القوائم ٢٠١١ / ٢٠١٢ من حيث الخصائص والتوزيع . الجغرافي للمرشحين على الدوائر الانتخابية في محافظة قنا وذلك عامي ٢٠١٠ و ٢٠١١ تناول الفصل الرابع دراسة التصويت والسلوك التصويتي في محافظة قنا وذلك من - خلال شرح العوامل المؤثرة في التصويت من عوامل جغرافية واقتصادية واجتماعية ، وتضمن الفصل أيضا تحليل لاستمارة الإستييان التي أعنتها الطالبة للتعرف على اتجاهات التصويت في محافظة قنا ، وكذلك دراسة التوزيع الجغرافي لنسب التصويت الانتخابي بين الدوائر الانتخابية . في دوائر محافظة قنا عامي ٢٠١٠ و ٢٠١١ و دراسة التوزيع الجغرافي لدرجة الوعي محافظة قنا عامي ٢٠١٠ و ٢٠١١ وكذلك تمثيل نتائج الانتخابات على خريطة - تناول الفصل الخامس بالدراسة التحليل الجغرافي لنتائج الانتخابات البرلمانية في المحافظة ومقارنة الدعم الانتخابي لحزبي الأغلبية عامي ٢٠١٠ و ٢٠١١، وركز لتوزيع مقاعد القوائم على الأحزاب المتنافسة . الفصل أيضا على دراسة المعادلة الانتخابية التي استخدمت عام ٢٠١١ / ٢		
5304	12364916		علوم القرآن عند الإمام أبي المظفر السمعاني (٤٨٩ هـ) /	محمود. عبدالناصر محمد مغربي.		2015	And it is taken by God's mercy in his interpretation ☐ is shown for some vulnerable conversations and localizations without alerting their weakness and put . ☐ is shown for News Alasrailaat without alerting them . ☐ Nursing mentioned correct format for conversations . ☐ Do not attributing words to Qailha. ☐ Referral to what has been explained in the meaning of the verse without mentioning the subject shops not authorized by the subject, but suffice by saying 'Pena or may have mentioned this before'. Finally, I can not help after such a long time you spent in the writing of this research, however, I ask God Almighty by His grace and presence and grace and kindness that lovgueni that which is good for me in this world and the hereafter, and that Azidny note and meet and fear and Salah and that makes all my words and my work purely for Allah's sake, lovgueni and where the right, and forgive me all that they occurred from mistakes and gaffes and goofs. And I ask God to acknowledge my eyes and the eyes of all the righteous goodness of the Muslims and the victory of the True religion, and empowerment to his family all the righteous reformers in the country. Praise be to God, who is righteous by his grace, and peace and blessings be upon His prophets and messengers and his family and companions and followed them in truth until the Day of Judgment. And more distractions which occurred commentators are in fact due to their ignorance of the origins of religion and modern science, and examples of this are many. ١- When I returned to the various books and references for use in writing topics of this research found that of the more specialized references Theses liberation of the issues and accuracy in its search and inclusive of all its branches. That is why I call to take advantage of these messages, scientific research and reference, and claimed to publish and distribute. Not refer to this research, letters, although the last of the triggers and negatives in writing research as some people think because it grows out research and writings editor, and it is not wise nor the interest to go to waste, and thrown out between private library shelves, and deprives readers The researchers refer to them and benefit from them. After this round Almatat in Rehab 'Quran Sciences at Sam'ani' I stand for the most prominent search results say : ☐ marched Asamaana according to a method of Sunni Islam in his interpretation and address to the people of fads and fancies indicating corruption interpretations. ☐ Sam'ani emulator was not in his interpretation, but was diligent depends on the evidence and consider .		

						□ Personal emerged Imam scientific Sam'ani through interpretation. □ The Sam'ani Bmenhjh and his way of explanation of the greatest scientists of applicants who have interpretation. □ literature shown with Mkhafafah, and equity with his opponents, following the right and detached from Hui. □ collection of Imam in his interpretation of the explanation and interpretation Mathur opinion. □ his care Koranic readings and the statement of the abnormal ones and use in interpreting verses . □ direction his interest in grammar great interest . □ commitment in his interpretation of the verses curriculum Salafi doctrine. □ inclusion interpreted as a series of jokes and interpretive subtleties related to the Quranic verses. In this approach the arbitrator delivers good science student from falling into abysmal Mhao tradition and swamps severe intolerance.And how much we have seen from the words, and we read of the views of the men do not have a document acceptable, nor true Moved guide, and these words that have passed us in our search This is the view of His revelation of the Qur'an is not a real down, but it is a revelation of metaphorical This saying is contrary to the explicit Koran which he said Rahman The source stressed act, how is said then that this descent is not real? It is these words also say who said that the Quran was revealed to the Prophet, peace be upon him mine from heaven, this is to say an many of evidence explicit proving the revelation of the Qur'an to Muhammad, peace be upon him from Allah Almighty by Jibril peace be upon him as already report that . Anyone who studies in these words find that the primary motivation is important in the view of some scientists with the fate of His Majesty and the abundance of knowledge is not to find the correct directory in which what counts in favor of these words and see her and it shows. ١- Various arts and science mean beneficial linked by strong ties, and can not be completed, including any art unless linked to other arts.We need to talk Hadith, Fiqh and talk to the neediest, and interpretation need to Arabic, the Qur'an and Science needs to jurisprudence and so on. What such different sciences but like many tree branches origin and one which the Quran and Sunnah, nor gracious completed but the completion of its branches. Based on this, it is worth every specialist in the art of the arts has become a specialization should not neglect the rest of the other arts and introduce them to college, but must have a knowledge of its origins so as not to play ignorance to fall into serious errors not accept nor forgiven. The most deviations in any knowledge of science is only due to ignorance assets Last aware of them. Thus, the aberrations which occurred a thousand Science in the Quran was because of ignorance of the knowledge and belief, for example, if you want to see an example of it to the arbitrator and the like-in the Qur'an in this search.		
5305	12365003	إبراهيم، عبدالله حلمي محمد.	الوصايا والرسائل النثرية في صدر الإسلام :		2015	The wills and article messages during the light of Islam age this matter includes;introduction,preface , four chapters and conclusion. the introduction: it shows the importance of the matter,the previous studies and the reasons for choosing this matter. the preface: It shows the concept of wills and article messages,their beginning and their position among different arts of articles. The first chapter It includes the kinds of wills which they are; A-Religious wills B- Political wills C- Military wills D- Social wills E- Economical wills The second chapter It explains the technical characteristic of the wills during the light of Islam age in three main sides: The first side is the technical structures. The second side is lingual structure. The third side is the image and fancy. The third chapter The article messages during the light of islam age,includes the		

						motivations of the article messages during that age and these messages are divided into two main kinds. ١- the first kind is the Apostle's messages which contain four types : the message of calling for Islam ,the legislative messages, the personal message. Finally the Apostle's writers ٢- the messages of (the rightly guided caliphs), may Allah be pleased with them, and they are five kinds, military message,political messages,administrative message,describing countries messages and the brotherhood message. The fourth chapter including the technical and artistic characteristics of article message during the light of Islam age in three elements. The first element is the technical structure The second element is the lingual structure. The third element is image and fancy The conclusion: it includes the following results ١ - there are roots for the art of wills in the pre –Islam age and its connection with the tribe. ٢- the religious wills depends mainly upon the holy Quran and the prophet's speech. ٣- the interests of the rightly guided caliphs of providing the princes and the leaders with wills. ٤- the style of writing was easy during the light of islam age and it didn't contain strangeness and ambiguities ٥- the prophet peace be upon him, had messages to the main characters of Arabian tribes and also for the non-arab kings inviting them to be muslims. ٦- the messages of the rightly guided caliphs to the leader of the army ٧- the message of the prophet peace be upon him include Islamic words which have religious meaning> ٨- there were chapters of the holy Qura'an and some of the prophet's speech in the messages of the rightly guided caliphs as they include poetry and wisdom. ٩- the messages in the light of Islam include fancy and imagination such as simile, metaphor and ambiguity.		
5306	12365064		المنهج السياقي في كتاب العربية بين يديك :	محمود محمد سيد عباس.		2016 This research is one of the science descriptive language studies in the context theory, and it studies the intensive reading texts in the book of the Arabic between your hands in two terms:- - Fellow and tracking the new vocabularies, and know how the ability of the students to understand these vocabularies through the new context method. - Tracking the situational context which, it must be presented through the various texts in the methods of teaching the Arabic language for non-native speakers and applied to the book of Arabic between your hands. - I presented this research to obtain the (Ph.D) Philosophy Doctoral degree, The reason for choosing this topic is the needed of students of Arabic language of non-native speakers to book contains the language in different fields such as culture, social and moral, and the new words which offered to students must be present in the contexts make the learner can be understood through it. I have extracted the material study from the intensive reading of the book the Arabic between your hands. And I collected the situational context from different books which contain the conditions of the Arab communities such as social, jurisprudence, biography, history, invasions, ethics and literature. I divided the study into nine chapters according to the semantic field, preconceived by an introduction, preface and appended by Conclusion includes the most important findings and recommendations. The introduction contained the reason for choosing the subject, its importance, the study material, the difficulties, the Action Plan, and the curriculum. The preface contained four study sectors: - book of the Arabic between your hands – the Context – science of applied Language - Semantic field. About the chapters, the first chapter is the daily life, the second chapter is life stages, the third chapter is the location and the nature, the fourth chapter is Islam and security, the fifth chapter is the work and the study,		

							the sixth chapter is health and how to preserve it, the seventh chapter is the Arabic language, the eighth chapter is creative and competition, the ninth chapter is the rights. As for the finale in included: The most important results of the study and the list of sources and references. Of research result the texts of the Arabic between your hands used words its meaning changed according to the context, the word of (Ahl) in the holy book (Quran) came with various meaning "followersinhabitation –Residence-Deserving-Husband- Patronage-Relatives" and there are two hundred thousand and sixty three words their meaning has been clear from the context against three hundred and forty words which is not clear meaning, There are texts speared in their uses a lack of clarity, and the book has been neglected many of Arabic situations language, and the most of its importance to show a perfect and ideal character for Muslim, don't talk about his reality and don't find solutions for his suspicions in order to make the westerners never heard about that, and there are texts should be replaced to be more ingest for many situations which didn't come in that book, and there are texts mentioned inaccurate information, and the book of the Arabic between your hands used in each field some specific words, And that the word of Medicine, which means in English "Medicine" if it translated phonetically it will mean Sina industry.

5309	12365541	Ph. D.	Immune response of some specific antigens of Schistosoma mansoni /	Hassan, Eman Sayed Mohammed,		2015	The current investigation revealed the 9 selected recombinant antigens including RP26, cathepsin B, hemoglobinase, serpin, filamin, tropomyosin, glutathione S transferase, leucine aminopeptidase 1 and leucine aminopeptidase 2 of S. mansoni could induce appearance of antibodies at the early stage of infection, therefore Schistosomiasis could be diagnosed in acute stage of infection before egg laying. Such situation lead to prevention of disease complications and so limit pathogonomic lesion. It has been found that among 9 selected recombinant antigens, five ones (RP 26, cathepsin B, hemoglobinase, glutathione S transferase and leucine aminopeptidase) 1 showed a decline in the level of IgG antibody response post treatment and this might be helpful for monitoring reinfection. Antigens RP26, cathepsin B, serpin, SWAP and SEA could induce IgG1 4 weeks post infection. Moreover, IgG1 binding to RP26, cathepsin B, serpin and SEA was declined post treatment. Immunological studies on Schistosoma spp have mainly been focused on anti-infection immunity. An immunoglobulin E (IgE) – mediated response is a marker in the process of Th2 polarizations during the course of infection. Previous literature were correlated to IgE production not only against egg but also against adult worms. The present work it has been found that cathepsin B, serpin and SWAP could induce IgE in prepatent stage before the onset of egg production and they were rapidly targeted by an antigen-specific IgE response. The induction of this response is independent of Schistosoma spp eggs, while PR26 and SEA could induce IgE after egg laying at 6 and 8 weeks respectively.		Ahmed Ibrahim Ahmed, Mahmoud A. El Sefiy, Shinjiro Hamano, Asmaa Mohamed Metwally.

5314	12365781		الأثر الدلالي لتعدد التوجيه الإعرابي في تفسير أبي السعود (ت 982 هـ) /	ناصر، أحمد ناصر أحمد.		2016	This study reveals the semantic effect of the diversity of analytic explanations for the Quranic word or sentence, and the flourishing shades this effect sheds on some Islamic dogmatic themes, jurisprudential questions and Quranic interpretative meanings. The study tries to reveal that implied inimitability expressed through conciseness, as the meaning differs along with the difference		

							of analytic explanation. Thus, the Quranic word becomes as if it were two or three words, and the sentence becomes as if it were two or three sentences according to the possible analytic explanations. In this way, the Quranic word or sentence looks like the bright diamond, the much you look at it, the more lights of eloquence it gives you. The study was based on "Irshad Alaki Assalim Ila Mazaya Alkitab Alkarim"(Guidance of Sound Mind to the Advantages of the Holy Book) , an approved interpretative (tafser) book written by /Abo AlSaud (who died in 982 AH). The book was the applied field of the study, through the exclusive tracking of all analytic aspects that were stated in the book and Abo AlSaud mentioned their meanings. They were found in ninety eight places. This study consists of: - A preface: containing the importance of the study, the reason for choosing it, its methodology and its structure. - An introductory study: containing three themes considered as a theoretical study before the subject of the study. - Seven chapters: Chapter one: the diversity of meanings resulting from having the same analytic mark (Alamat Irab). This chapter contains fourteen questions. Chapter Two: the diversity of meanings resulting from the analytic mark being implied. This chapter contains ten questions. Chapter Three: the diversity of meanings resulting from the different meanings of a particle. This chapter contains sixteen questions. Chapter Four: the diversity of meanings resulting from the difference concerning the name referred to using a demonstrative pronoun. This chapter contains fourteen questions. Chapter Five: the diversity of meanings resulting from the different possibilities of the place where a word or a sentence refers to and belongs to. This chapter contains ten questions. Chapter six: the diversity of meanings resulting from the different references of the pronoun. This chapter contains twenty three questions. Chapter Seven: the diversity of meanings resulting from the difference concerning what the word after the coordinating conjunction is joined to, and the difference concerning the word that an adverb refers to (the owner of the adverb or saheb Alhal). This chapter contains eleven questions and it has two themes: First Theme: the diversity of meanings resulting from the difference concerning what the word after the coordinating conjunction is joined to. This theme contains six questions. Second Theme: the diversity of meanings resulting from the difference concerning the word that an adverb refers to (the owner of the adverb or saheb Alhal). This theme contains five questions. -A conclusion: containing the results of the study, its recommendations, indexes and bibliography.		
5315	12365832	الجزء الرابع والعشرون من القرآن الكريم السور : الزمر, وغافر, وفصلت : أحمد, وفاء محارب مصطفى.				2016	The researcher / Wafaa Muhareb Mustafa Ahmed completed her dissertation to get the master's degree in Arabic Language and Literature, entitled [The Twenty-fourth Part of the Holy Quran: Sourat"Al zumr, and Ghafer, and Fosselat" "Phonological, Morphological, Grammatical and Lexical study "]. The nature of the dissertation required including: an introduction, acknowledgement And four chapters, followed by a conclusion. In the introduction [About the study and its objectives, and the methodology of research and steps then previous studies] .. In the acknowledgement [She addressed the definition of the many Soura of Part IV and their verses and the reason each Soura was named, and the relationship of the Soura with what came before and after it, the Madani ones and the Makki ones. Chapter I: [Phonetics] study, which has three sections: First topic: tilting (Emala). The second topic: assimilation (Edgham). The third topic: the prolongation (madd) Chapter II: [morphological study], which has three sections: First: derivatives ... "study, classification and statistics" The second: the sources and significance ... "study, classification and statistics " And the third: the Plurals ... "study, classification and statistics " and the fourth: Verbs' tenses "Study, classification and statistics " ... the fifth Verbs' description , "the study, classification and statistics," ... and the sixth: attribution "study, classification and statistics." Chapter III: Grammatical study which has two sections: First the SentenceThe second: disciples including" adjectives, adding, emphasis and apposition". Chapter IV: [lexical study] contains three sections: First: acknowledgement, which includes a view of the dictionaries The second: the strange vocabulary And third: vocabulary that need to be clarified in significance. The conclusion, which highlighted the findings and recommendations.		

							In the end, proven sources and references The dissertation came in accordance with the scientific method.		
5316	12366539		L'analyse du parler quotidien français du guide touristique privé en Haute Egypte :	Nabil, Fadila Abd Allah.			2016 The present study is based on a synchronic study, depending on the analytic-descriptive approach followed in the field of sociolinguistics. The method of analysis used is written documents by authorized recordings of tour guides. The guides have been divided into three groups: beginners; mid-career; and experienced 9professional) ones. The study is concerned with answering the question: How can intellectual and social variables affect language practices on the part of different guides speaking French. This has resulted in dividing the study into three chapters, where each chapter contains two parts. The first chapter deals with the theoretical approach of William Labov in sociolinguistics. In this chapter, the topic and the tools used in analysis have been identified. It also introduces Sociolinguistics and the French Language in Egypt through the legal and political limits. Chapter Two deals with, in the first part, the sources and the materials of the study that are made clear in the written data of the field study, the social and the economic status of the guides. The second part analyzes the external elements, which may affect the language of the guide, including the social variables. The third chapter analyzes, in the first part, the linguistic phenomena that came as a result of overlapping languages, marks of formation such as stopping, pausing, and extension. The second part compares the three groups. The comparison is based on the basis of language competence suggested by Alex Vanneste to reach the points of differences in the usage of French by guides in Upper Egypt. All in all, the study aims at pointing out the overlapping elements of French used by guides. It also tries to measure the degree that intellectual identity can affect the different groups of Upper Egyptian guides.

5318	12366813		شخصية السيوطى في ضوء تحليل مقاماته أسلوبيا :	علي، أحمد أبو السعود نظير.			2015 This study titled "The character of Al Suyuti in the light of analyzing his keys (maqamas) stylistically Psycho-structural approach" comprises the following elements: Presentation: Which comprised an overview abstract about the Suyuti, his creativity and character. Preface: Which is prepared to tackle the methodology (stylicity) as for its origin, either for the Arabs or the west and its most famous schools as well as its importance in the modern approaches used in this context. First character: 1- The first: Its limits and components. This topic sheds light on the most important definitions of the character definitions of the character, then its limits and the factors that affect its formation. 2- The Suyute character : Here, we can acknowledge the background of Suyuti; who he is; and the most important properties elements and components of his character as well as the Suyute concepts for creativity. 3- The Suyute maqamas (Kes): This topic presents a definition for the "Maqama" and mentions the numbers of the Suyute maqamas (Keys) in addition to the specific students that tackled the Suyute maqamas, then the issues that Suyute maqamas addressed in his maqamas and the distinguished classification of the maqamas (Keys) according to from and object. 4- The Psychological analysis and the psychological linguistics consist of two sections:		

							I- In the first section, the light was shed on the relationship between the psychological analysis and literature for the Old Arab Culture, then tackling the most important schools in the psychological analysis, including mention some of its defects especially for school of Sigmund Freud (1856 - 1939), school of Yong (1875 - 1961) and school of ALFred Adler (1870 - 1937). II- The second section tackles the psychological linguistics as for its definition and the relationship between linguistics and psychology in addition to the ways that the Old Arab authors tackled and addressed some distinguish issues of the psychological linguistics. The second chapter: It Tackled the distinguished chapter of Suyute in the light of the audi level of his style in his Kes (maqamas) which comprised the following: 1- Intonation and Stress. This topic included giving certain definitions of both terms, specifying the Suyuti Maqamas. 2- The Suyuti Keys (maqamas) between poetry and rhythm: This topic gave a definition of poetic rhythm, mentioning some famous models of the Suyuti Maqamas in an explicit picture. 3- Frequency: This topic gave an explicit definition for frequency, its types and functions as well as shedding light on some of its famous models in the Suyute Keys (maqamas) and explicating the purpose of this frequency. The third chapter: It tackles the Suyuti character in the light of the grammar level as for his style followed in the maqamas which consisted of two topics: 1- Correspondence: The study gave an explicit definition for this term as well as explicating its prominent types and models and the way that the Old Arabs tackled it in the context of giving some models showing the Suyuti correspondence with the Quranic methodology. 2- Frequency: This topic explicated the frequency of verbs, adjectives and proverbs in the Suyuti methods that he followed to achieve his objectives. The fourth chapter: It tackled the Suyuti character in the light of the denotational level for his prominent style of keys (maqamas) which consists of: 1- The generative, the syntactic, the extrinsic and the colloquial which were defined in this context as well as mentioning some of the terms given in the Suyuti maqamas. 2- The verbal paradoxes in the Suyuti maqamas. In this topic, the phenomenon of the verbal paradoxes was tackled as for the way they have been used to highlight his character through the collation between the various modes. 3- The verbal common factor and contradiction. This topic tackles their definition and the various opinions of the Old Arab, explicates their types models and reasons in addition to considering some words that pertain to the verbal common factor and contradiction that were mentioned in the Suyuti Keys (maqamas) followed by the final conclusion and a list of the most important resources and references.		
5319	12367702		مخطوط شرح الشبراخي على مختصر خليل :	محمد، أحمد عبدالعال زيدان.		2015	The message title (the explaining manuscript to Alshabrakhitti on the brief of Khalil from the first chapter: renting animals to the unit of gift to Burhanelddin Ibn Marie Ibn attiya Alshabrakhitti in 1106 Ah study and investigation.) The message included an introduction and two parts and a conclusion. The introduction included thanking and gratitude then I talked about the importance of jurisprudence science and the honour to work in it. And so what's the meaning of study and investigation and its importance. Then I'll talk about the reasons for choosing this matter and the method which I followed in investigation. And so, the description of the manuscript copy and the work plan of the research. The first section: it's the part of study and it includes two units: The first unit: it's introducing of Elsheikh khali Ibn Ishaq Elgendi and it includes two chapters: The first chapter: His life and death. It includes three sections: i. His name, his birth and his teachers. ii. His scientific position, his jobs and his disciples. iii. His writings, his death and the praise of scientists. The second chapter: his brief of jurisprudence. It includes three sections: i. The meaning of his brief and its relative to the author. ii. The method and the sources of the author and the copies of the brief. iii. The most important explaining books or writing on the brief. The second unit: it's introducing of the explainer Elsheikh Ibrahim Ibn Marie Alshabrakhitti. it includes two chapters: The first chapter: His life and death. It has four sections. i. His name, his birth. ii. His scientific position, his jobs and his companions. iii. His writings, his death and the scientists praise on him. iv. The age of Elsheikh Ibrahim Ibn Marie Alshabrakhitti.		

							The second chapter: his explaining on the brief. It includes two sections: i. The title of the book, the author of the book, its stages of writing and the importance of Elmalki jurisprudence. ii. The method of author, hi sources and the comments on it. The second section: of message is the real one: it contains the investigated next and it has a chapter and three units: i. Chapter is in the explain of judgements in renting animals, bathroom, the house and the land. And so the difference of renters. ii. Unit in terms of the royalty. (conditioned fees) iii. Unit in revitalizing of the dies used land. iv. Unit of the endowment. Finally, I got to the conclusion that included the most important results that I got them during the research .finally, I put nine suffixes that points out my references.		
5320	12367940	استخدام ممارسي العلاقات العامة في الشركات متعددة الجنسيات العاملة في مصر لمواقع التواصل الاجتماعي وانعكاساتهم على أدائهم المهني : صابر , شيماء عبدالعاطي سعيد.				2015	This study is entitled; "The public relations practioners' use of social media websites in the multinational companies working in Egypt and their effects on their professional performance: Survey study". As the social media websites are considered one of the most important means of modern communication used by the various organizations to reach the targeted clients and to acknowledge their trends to have a better communication with them, so these organizations are well acknowledgeable that the social media websites don't aim at delivering certain information or messages about their products as they used to do in the past, but to create certain mechanisms that are able to deal with the various organizations and publics that is because the public now has an efficient effect and direct voice that addresses the target institution and to express its opinions in its marketing, social and media activities more frankly and without a moderator in such away that strengthens its relationship with the company and to increase his acceptance and promotion for its products. In this context, we can highlight the importance of the current study as to acknowledge the reality of the public relations practitioners' use of the social media websites in the multi-national companies and to identify the motive beyond this usage of social media websites and the advantages that are returned to the companies from these social media website as well as to determine the obstacles of it's use and the effect of the social media websites on the professional performance for the public relations practitioners inside the companies. This study also seeks to present a detailed description for the most used social media websites in the companies under study either in form or content. So, this study relied on the theory of multimedia opulence and theory of conversational communication. So, this study used the survey approach in it's two divisions, the analytical approach and the description approach. This study also relied on the instrument of the content analysis through analyzing three famous - 371 - social media websites (Facebook, Twitter and Youtube) for a deliberate sample of five multi-national companies working in Egypt, and also a questionnaire instrument for a deliberate "purposive" sample that comprises (200) correspondents of the practitioners of public relations in the multinational companies working in Egypt. And this field study concluded that the most used social media websites by the public relations practitioners are; Facebook, Twitter then Youtube. And the reasons for their use of these websites are the easy modernization of data continuously and the promotion of the products and services of the company and also getting acknowledgeable to what people and multi-media say about the company. The conclusions also showed that the most important advantages that the company may acquire from the study sample use of the social media websites are creating a positive mental picture of the company and the quick organized responses towards the criticisms and creating some kind of relation between the customer and services and products of the company. And this analytical study concluded that there is a difference among the companies (the sample of the study) as for their use of the multimedia and interactive instruments existing in the social media websites and to classify these companies in their use of these website as good use and bad use. Also, there is a difference in the levels of interest towards these social media websites because some companies prefer Twitter or Youtube. This study also recommended that it is necessary for these companies		

							to put forth an efficient strategy for the social media websites so that they can establish a clear vision for the mechanisms used to employ these websites to achieve a broad interaction with the purposes to improve the whole performance and to work in accordance with the real needs of the public.

5325	12369998		التفكير الناقد وعلاقته بالكفاءة الاجتماعية والثكاء الوجداني لدى عينة من طلبة الثانوية العامة /	علي، خلف الله خلف عسران.	2015	Introduction Today the Critical thinking considered as an important issue in the field of Education. Especially that we are at the age of globalization and information and caring for the good thinking as an important element for the successful life, where these changeable conditions requires new results as critical thinking, and thus it was considered as the goal of Education at schools (Saber Abu Mohadi, 201: 4). The aim of education is to provide students by a varied thinking skills , especially the skills of extraction, and the conclusion, and testing hypotheses, and evaluate the case of education, forecasting and prediction for suitable solutions without bias for the concluded results, it is necessary that our process to seek to provide these skills to our students , especially at Secondary schools and at college. Which considered as the fundamental pillar for the advancement of any civilized community (Lina Ezzedine Ali, 2011: 5). And the fact that there is a growing tension that the students at all levels does not give what proves anything about the advanced thinking abilities, especially the ability and the skills of critical thinking. That does not only affect the students results,but also on their lives when graduation and the beginning of their career (irfaner 2002: 3) And the social competence considered as one of personal characteristics, as one of the manifestations of social force per one . The social force psychologically considered as an internal motivation for human which lies at the desire of self-preservation and to be confirmed by influence and controlling the others (Ibrahim Mohammed Al Maghazi, 2004 :470) . It is a very complex social and emotional building. . It must be developed in the early childhood or medium level to avoid the appearance of such behaviors as aggression, social withdrawal, which lead to adverse results at academic collecting besides to psychological problems, and the tendency to criminal behavior (burrows, 2005: 1) . Thus, social competence plays a vital role in the schools, by considering schools as a place from which to learn a lot of social behaviors at the future, through following a more systematic approach to some relevant skills of understanding for self-emotions and emotions for the others in social relations (mccluskey 2000 :on line) Emotional Intelligence is considered as one of the forms of intelligence and it is an effective factor in the various human relations, whether his relation to himself or his relationship with others no longer work, friendship and other. The training on Emotional intelligence skills gives us the ability to deal with others and sympathy with them (Daniel Golman into 2000, 57 :58) . The Emotion contribute to the thinking rationalization, and thus the Emotional Intelligence considered as the latest development in the understanding of the relationship between the mind and emotion, and it is a turning point in the long conflict between intelligence mental concepts, and these traditional entrances at the field of impressions (Suhad Milli, 2010: 138). Problem of the Study The problem of the current study lies in answering the following questions:			

1. Is there a statistically significant correlation between the total degree of critical thinking and both social competence and emotional intelligence?

2. Is there a statistically significant relationship between the dimensions of critical thinking (deduction, universals, inference, interpretation, argumentation) and both the social competence and emotional intelligence?

3. Is there a statistically significant relationship between the total degree of critical thinking and emotional intelligence dimensions (management of emotions, sympathy, regulate emotions, emotional knowledge, social communication)?

4. Are there statistically significant differences among people with high and low degree of critical thinking and social competence and emotional intelligence?

5. Are there statistically significant differences between males and females in each of the critical thinking, and social competence and emotional intelligence?

6. Are there differences between the four subsidiary study groups (males and females with high and low degree of critical thinking and) concerning social competence and emotional intelligence?

objectives of the study :

The current study aims to achieve the following objectives:

1. to investigate the relationship between critical thinking and social competence and emotional intelligence for secondary school students.
2. to investigate the relationship between the dimensions of critical thinking (deduction, universals, inference, interpretation, argumentation) and both the social competence and emotional intelligence.
3. to explore the relationship between the total degree of critical thinking and emotional intelligence dimensions (management of emotions, sympathy, regulate emotions, emotional knowledge, social communication).
4. to detect the differences regarding critical thinking, social competence and emotional intelligence according to the gender.
5. to investigate the differences among students with high and low degree of critical thinking and social competence and emotional intelligence?
6. reaching scientific recommendations that can be used in researches on the same variables in broader sense.

Importance of the study:

the importance of this study lies in the following:

Theoretical importance-1

1. identifying the importance of critical thinking and its relationship to both the social competence and emotional intelligence of their close relationship to individual success in scientific and practical life.
2. identifying the critical thinking, social competence, emotional intelligence, components, and the tools designed to measure them, and investigating deeply the concepts of the study especially because they are newly used.
3. giving the researchers and those interested in the educational field information about the nature of critical thinking, social competence and emotional intelligence comprehensively.

2- Practical importance:

1. paying more attention to those concepts and work on their development in the secondary stage.
2. knowing the shortcomings that may be present among students and trying to avoid them.
3. directing the teachers to deal with students with low levels in critical thinking, social competence and emotional intelligence.
4. giving recommendations for teachers to reach a high level in critical thinking, social competence and emotional intelligence.

Hypotheses of the study:

1. there is a statistically significant correlation between the total degree of critical thinking and both social competence and emotional intelligence.
2. there is a statistically significant relationship between the dimensions of critical thinking (deduction, universals, inference, interpretation, argumentation) and both the social competence and emotional intelligence.
3. there is a statistically significant relationship between the total degree of critical thinking and emotional intelligence dimensions (management of emotions, sympathy, regulate emotions, emotional knowledge, social communication).
4. there are statistically significant differences among people with high and low degree of critical thinking and social competence and emotional intelligence.
5. there are statistically significant differences between males and females in each of the critical thinking, and social competence and emotional intelligence.
6. there are differences between the four subsidiary study groups (males and females with high and low degree of critical thinking and) concerning social competence and emotional intelligence.

Methodology:

The current study has used the descriptive correlative methodology

limitations of the study:

- 1-sample: the sample of the study consisted of (110) students from the third grade students of secondary school in Samhood secondary school, Abu Tisht, Qena (58 males 52 females).
2. Tools of the study:

							-critical thinking scale designed by Watason Glasser (translated by Jabber Abdel Hamid; Yahia Hendam (1995) -social competence scale (Prepared by the researcher). - emotional intelligence scale (Osman & Rizk (1998). 3. statistical techniques: to analyze the data of the study, the researcher used the following methods: 1-Correlation coefficient ,Pearson correlation coefficient. 2- Analysis of variance (ANOVA). 3- T- test. 4-Scheffe Test. Results of the Study: The current study concludes the following results: 1. there is a statistically significant correlation between the total degree of critical thinking and both social competence on the level (.05) and emotional intelligence on the level (.01) for the sample of the study. 2. there is a statistically significant relationship between the dimensions of critical thinking (deduction, universals, inference, interpretation, argumentation) and both the social competence and emotional intelligence. 3. there is a statistically significant relationship between the total degree of critical thinking and emotional intelligence dimensions (management of emotions, sympathy, regulate emotions, emotional knowledge, social communication). 4. there are statistically significant differencesbetween the mean scores of students with high and low degree of critical thinking and social competence and emotional intelligence in favor of those with high critical thinking. 5. there are statistically significant differences between males and females in each of the critical thinking and emotional intelligence in favor of males but there are no differences regarding the social competence. 6. there are statistically significant differences between males with high criticial thinking and females with low critical thinking regarding the emotional intelligence in favor of males with high critical thinking, and there are statistically significant differences between males with low critical thinking and females with low critical thinking regarding the emotional intelligence in favor of males with low critical thinking but there are no statistically significant differences regarding the social competence.		
5326	12371356	الدكتوراه	تأثير برنامج تعليمي مقترح لجهاز عارضة التوازن على القدرات التوافقية ومستوى الأداء المهارى لطلابت كلية التربية الرياضية/			2005	هدف البحث إلى بناء برنامج تعليمي لجهاز عارضة التوازن وإثراء على القدرات التوافقية ومستوى الأداء المهارى لطلابت كلية التربية الرياضية - جامعة أسوط. استخدم المنهج التجريبي بنظام المجموعتين الضابطة والتجريبية بالقياس القلبي والبعدى، وكانت العينة من الفرقة الثانية بالكلية، قوامها 30 طالبة، تم تقسيمهم إلى مجموعتين متساويتين فى العدد (تجريبية كل منها 15 طالبة)، كما تم إجراء تجانس للعينة ككل وتكافؤ بين مجموعة البحث فى تغيرات السن والطول والوزن، القدرات التوافقية قيد البحث، الجملة الحركية على جهاز عارضة التوازن، كما استخدمت الأدوات والأجهزة المستخدمة فى القياس، استمارات استطلاع الراى للخبراء، الاختبارات. توصل البحث إلى أن البرنامج التعليمى المقترح له تأثير إيجابى على القدرات التوافقية قيد البحث (توازن - رشاقة - سرعة - إحساس حركى). البرنامج التعليمى المقترح له تأثير إيجابى وفعال على مستوى الأداء المهارى للجملة الحركية على عارضة التوازن من (مهارات - دورانات - وثبات - لغات - موازين - وحركات انتقالية).	1/1/2005م	أ.د/سهير لبيب فرح أ.د/محمود عبدالحليم عبدالكريم د/طارق محمد محمد عبدالعزيز

							الاستنتاجات والتوصيات br The Conclusions and the Recommendations br 5/1 Conclusions br في ضوء اهداف البحث والمنهج العلمي المستخدم وفي نطاق عينة البحث والتحليل الإحصائي والتفسير العلمي لنتائج البحث ، أمكن التوصل إلى الاستنتاجات التالية : المحور الأول : الاهداف (التربوية - التعليمية): 5/1/1/1 br بالنسبة للأندية الرياضية : 5/1/1/1/1 br رياضة ألعاب القوى تنافسية وتخدم جميع الألعاب الرياضية الأخرى . 5/1/1/2 br بالنسبة لمراكز الشباب الرياضية : 5/1/2/1 br ممارسة ألعاب القوى تنمي روح التعاون بين الممارسين 5/1/2 br المحور الثاني : الإمكانيات المادية والبشرية : 5/1/2/1 br بالنسبة للأندية الرياضية : 5/1/2/1/1 br مشاركة وسائل الدعاية والإعلام في تمويل البرنامج التعليمي التدريبي للعبة ألعاب القوى يعمل على زيادة عدد الممارسين 5/1/2/2 br بالنسبة لمراكز الشباب الرياضية : 5/1/2/2/1 br أن يوجد حكام ألعاب قوي بمنطقة الظويوية 5/1/3 br المحور الثالث : البرامج الزمنية : 5/1/3/1 br بالنسبة للأندية الرياضية : 5/1/3/1/1 br تساهم المهرجانات الرياضية في زيادة عدد ممارسي الألعاب ومنها ألعاب القوى. 5/1/3/1/2 br تعد من عوامل زيادة عدد الممارسين للعبة ألعاب القوى الاشتراك في المهرجانات الرياضية. 5/1/3/1/3 br تساهم الألعاب الشعبية في جذب عدد كبير من الأفراد مما يتيح الفرصة لزيادة قاعدة الممارسين خاصة اذا اندرجت ألعاب القوى ضمن هذه الألعاب 5/1/3/2 br بالنسبة لمراكز الشباب الرياضية : 5/1/3/2/1 br يقوم البرنامج التعليمي التدريبي باستثمار وقت الفراغ بصورة إيجابية لدي ممارسي لعبة ألعاب القوى 5/1/4 br المحور الرابع : الخطة المتبعة في المسابقات والمهرجانات : 5/1/4/1 br بالنسبة للأندية الرياضية : 5/1/4/1/1 br يتيح النادي والمركز الفرصة للأفراد لإشراك أكبر عدد من الممارسين في مختلف الألعاب ومنها لعبة ألعاب القوى. 5/1/4/1/2 br يوجد نظام محدد يضمن المساواة في ترقية المدربين الأسقاء في لعبة ألعاب القوى من خلال اتحاد ألعاب القوى 5/1/4/2 br بالنسبة لمراكز الشباب الرياضية : 5/1/4/2/1 br توفير مراكز تدريب من قبل الاتحادات والهيئات لزيادة عدد ممارسي ألعاب القوى 5/1/5 br المحور الخامس : أساليب التقييم والرقابة : 5/1/5/1 br بالنسبة للأندية الرياضية : 5/1/5/1/1 br يسعى المدرب الى تشجيع كل فرد يرتفع مستواه أثناء التدريب 5/1/5/2 br بالنسبة لمراكز الشباب الرياضية : 5/1/5/2/1 br اللاعب ذو المستوى المرتفع في ممارسة لعبة ألعاب القوى يكون موضع تقدير من المدرب 5/1/6 br المحور السادس : وسائل الدعاية والإعلان : 5/1/6/1 br بالنسبة للأندية ومراكز الشباب الرياضية : 5/1/6/1/1 br تصدر مجلات رياضية شهرية تتضمن ما تم إنجازه في مسابقات ألعاب القوى. 5/1/6/1/2 br الإعلان عن مهرجانات ألعاب القوى للأطفال داخل المحافظة تساعد على نشر اللعبة. 5/2 br التوصيات : The Recommendations br في ضوء الاستنتاجات التي اعتمدت على طبيعة الدراسة والعينة والمنهج المستخدم ونتائج البحث الإحصائي والنتائج التي أظهرتها الدراسة يوصي الباحث بالتالي : 5/2/1 br إنشاء ملاعب في القرى والمدن التي لا يوجد فيها أماكن لممارسة الرياضة . 5/2/2 br نشر أهمية ممارسة ألعاب القوى في المدن والقرى بمحافظات الظويوية عن طريق عمل ندوات ومحاضرات وورش عمل لتوضيح أهمية ممارسة ألعاب القوى . 5/2/3 br عمل إعلانات لأهمية ممارسة ألعاب القوى ومدى العائد لها . 5/2/4 br دعم وسائل الإعلام لأنشطة ألعاب القوى . 5/2/5 br عمل مجلات علمية عن مسابقات ألعاب القوى بشكل مفيد لأفراد وبطريقة سهلة وسلسة يستطيع القارئ فيها التعرف على أهمية ممارسة ألعاب القوى ومدى العائد من الممارسة . 5/2/6 br عمل ميزانيات لمراكز الشباب لدعم أنشطة ألعاب القوى وكذلك دعم المهرجانات والاحتفالات الرياضية لزيادة نشر اللعبة بين أفراد المجتمع . 5/2/7 br توفير أدوات واجهزة للتدريب على مسابقات ألعاب القوى مما يدفع اللاعبين للتقدم بالمستوى . 5/2/8 br دعم اللاعبين ذات المستويات العليا	عبد المجيد، حنان السيد عبد الفتاح، محمود، حمدي محمد علي،
							مسئله البحث : The Research Problem : br نفاش درجة التمدد العلمي والإنساني لدى دول العالم من خلال اتجاهاتها لاهتمام بالتطور ومواكبة العصر عن طريق التكنولوجيا الحديثة، وفي الآونة الأخيرة أصبح مجال الكمبيوتر التعليمي مجالاً خصباً تتسابق فيه دول العالم لتبني جيلاً جديداً مواكباً للتطور التكنولوجي في جميع المجالات بما فيهم المجال الرياضي، وذلك مما يعمل كمؤشر على حضارتهم وتقدمهم. br ويذكر "محمد علوي" (1994م) أن الفرد قد لا تتاح له الفرصة للاستيعاب واكتساب القدر الكافي من الرؤية نظراً لأن المهارة تمر من أمامه مروراً سريعاً دون أن يعطيها الاهتمام الكافي ولا تترك سوى بعض الانطباعات الباهتة مما يؤدي إلى اكتساب المتعلم أداء خاطئ للمهارات الحركية. br (19:71) br نتيجة لعمل الباحث في مجال تدريس التربية الرياضية وجد انه يوجد قصور في تعليم الطلاب بعض مهارات ألعاب القوى بالطريقة الصحيحة وذلك لعدم تمكن الطلاب من تخيل او ادراك المهارة بالشكل الصحيح او المطلوب وايضا وجد الباحث عرؤف الطلاب عن المسابقات الخاصة بألعاب القوى خاصة بالوثب الطويل وذلك لقلة الممارسة الفعلية وقلة خبرة الطلاب التي تؤهله لخوض منافسة فعلية لذا وجد الباحث انه في حالة وجود برمجة تعليمية معدة بتقنية اليبيرميديا فسوف تساعد في اجتذاب اعداد كبيرة من الطلاب للاطلاع على المهارة وممارستها ممارسة فعلية مما سيؤدي الى الارتقاء بمستوى التلاميذ في مرحلة متقدمة من السن مما يجعلهم من الدعام الأساسية لنائش المستقبل . br وهذا ما يسعى إليه الباحث من خلال اجراء هذه الدراسة والتي تتمثل في بناء منظومة من الوسائط المتعددة وتحديد تأثير استخدامها على بعض جوانب التعلم والتي تتمثل في الجانب المهارى المتمثل في مهارة الوثب الطويل ومهارة تعليم البدء المنخفض في ألعاب القوى، والجانب المعرفي المتمثل في مستوى التحصيل المعرفي للمعلومات الرياضية الخاصة بالمهارات السابقة، في التعرف على مدى فاعلية استخدام الوسائط المتعددة في تعلم بعض مسابقات ألعاب القوى. br أهمية البحث The Research Important : br - أهمية العلمية br - قد يضيف هذا البحث إضافة علمية جديدة في مجال اليبيرميديا لتطوير مستوى أداء المتدربين. br - قد يساهم في توجيه الباحثين إلى اجراء دراسات علمية تتناول الجوانب التي لم تتعرض لها الدراسة الحالية. br الأهمية التطبيقية br - يساهم البحث في رفع مستوى أداء بعض مسابقات ألعاب القوى لتلاميذ المرحلة الإعدادية. br هدف البحث : The Research Purposes br من خلال: br تصميم برنامج تعليمي باستخدام الوسائط الفاتقة التداخل (Hypermedia) ومعرفة تأثيره على: br - مستوى التحصيل المعرفي لبعض المسابقات في ألعاب القوى قيد البحث. br مستوى الأداء المهارى لبعض مسابقات ألعاب القوى قيد البحث. br فروض البحث The Research Hypothesis: br o توجد فروق دالة إحصائياً بين القياسين القبلي والبدي في مستوى التحصيل المعرفي لصالح القياس البدي للمجموعتين الضابطة والتجريبية. br o توجد فروق دالة إحصائياً بين القياسين القبلي والبدي في مستوى الأداء المهارى لصالح القياس البدي للمجموعتين الضابطة والتجريبية. br o توجد فروق دالة إحصائياً بين القياسات البديعية للمجموعتين التجريبية والضابطة في مستوى الأداء المهارى والتحصيل المعرفي لصالح المجموعة التجريبية. br اجراءات البحث: br منهج البحث: br استخدم الباحث المنهج التجريبي لمعرفة أثر المتغير المستقل على المتغير التابع، وذلك بالتصميم التجريبي لمجموعتين إحداها ضابطة والأخرى تجريبية باستخدام القياس القبلي والبدي لمناسيته لطبيعة البحث مصنفه كالتالي: br - المجموعة الضابطة (تستخدم أسلوب الأوامر) . br - المجموعة التجريبية (تستخدم البرنامج التعليمي باستخدام الوسائط فائقة التداخل). br مجتمع وعينة البحث: br مجتمع البحث: br يمثل مجتمع البحث في تلاميذ الصف الثاني الإعدادي بمدرسة الدكتور عبد الحميد سالم الإعدادية بإدارة فاقوس التعليمية بمديرية التربية والتعليم بالشرقية 2014/2015م وقد بلغ عددهم (110) تلميذاً. br - عينة البحث: br قام الباحث باختيار عينة البحث	هيئة الإشراف : أ.م.د/حمدي محمد علي محمود أ.م.د/أحمد شوقي محمد

							إن سكان العالم يتسجون بسرعة. فالقديرات تشير إلى أن نسبة كبار السن في العالم ستضاعف من حوالي 11% إلى 22% ما بين عامي 2000، 2050. br وهذا يعني - بالأرقام المطلقة - زيادة متوقعة من 605 ملايين إلى ملياري شخص فوق سن الـ 60 وإن كبار السن يواجهون تحديات صحية - بدنية ونفسية - خاصة، ينبغي الاعتراف بها. br أكثر من 20% من البالغين بأعمار 60 سنة فما فوق يعانون من اضطراب نفسي أو عصبي و 6.6% من جميع حالات العجز (سنوات العمر المصححة باختساب العجز) بين من تجاوزوا الـ 60 تعزى إلى اضطرابات عصبية ونفسية. وأكثر الاضطرابات العصبية النفسية شيوعاً في هذه الفئة العمرية هي الخرف والاكتئاب. واضطرابات القلق تصيب3.8%من السكان المسنين، ومشاكل تعاطي المخدرات تصيب ما يقرب من 1%، وحوالي ربع حالات الوفاة الناجمة عن إيذاء النفس تكون بين من هم بأعمار 60 سنة فما فوق. br تشير وزارة الصحة (2008) إلى ضرورة ربط مفهوم الصحة العامة باللياقة البدنية ذلك لوجود علاقة بين مختلف مكونات اللياقة البدنية والصحة وأن أداء التمارين البدنية بصورة منتظمة له علاقة وطيدة بتقليل أخطار الإصابة بأمراض الجهاز القلبي التنفسي، وكذلك التقليل من الاضطرابات الذهنية والتغلب على الضغوط اليومية، واللياقة البدنية تتحدد بمعايير وراثية ولها علاقة بدرجة النمو للفرد، وتعد التربية الرياضية وسيلة لتحسين مستويات اللياقة البدنية وبالتالي زيادة صحة الفرد وتقليل احتمالية إصابته بأمراض العصر المختلفة. br وقد تنوعت البحوث والدراسات العلمية الخاصة بكبار السن ما بين التعرف على أوضاعهم الصحية، أو النفسية، أو الاجتماعية، إلى جانب عناصر اللياقة البدنية، ودراسة التأثير المتبادل ما بين التقدم في العمر والنشاط البدني، والاستخدام المتناقص للمضلات الهيكلية والعظام والمفاصل، ومن خلال عمل الباحث كمدرّب من وزارة الشباب والرياضة لكبار السن ومشروع المركز الرياضي للرواد في محافظة القليوبية في وضع برنامج تدريبي خاص لهذه المرحلة العمرية ليشمل لكبار السن في الأنشطة الرياضية المختارة (كرة القدم والكرة الطائرة) ومعرفة أثره على بعض النواحي البدنية والقيسولوجية. br br هدف البحث: br يهدف هذا البحث إلى تصميم برنامج تدريبي لكبار السن مشروع المركز الرياضي للرواد محافظة القليوبية للتعرف على 1 br- تأثير البرنامج التدريبي لكبار السن على تنمية بعض النواحي البدنية ومشروع المركز الرياضي للرواد (محافظة القليوبية) 2 br- تأثير البرنامج التدريبي لكبار السن على تنمية بعض النواحي القسيولوجية ومشروع المركز الرياضي للرواد (محافظة القليوبية) 3 br فروض البحث: br تحقيقاً لأهداف البحث وضع الباحث الفروض التالية: 1 br- توجد فروق دالة إحصائية بين القياس القبلي والقياس البعدي لصالح القياس البعدي في تنمية بعض النواحي البدنية لدي عينة البحث . 2 br- توجد فروق دالة إحصائية بين القياس القبلي والقياس البعدي لصالح القياس البعدي في تنمية بعض النواحي القسيولوجية لدي عينة البحث . br إجراءات البحث br منهج البحث : br استخدم الباحث المنهج التجريبي باستخدام القياس القبلي – البعدي لمجموعه تجريبية واحدة باعتبارها أكثر أنواع المناهج اتفاقاً مع موضوعية البحث والمنهج المناسب لطبيعة الدراسة. br مجتمع البحث: br يمثل مجتمع البحث كبار السن والمشاركين بمشروع المركز الرياضي للرواد بمحافظة القليوبية والمشاركين في الأنشطة الرياضية الثلاثة (كرة القدم – الكرة الطائرة – تنس الطاولة) . br br عينة البحث : br تم اختيار عينة البحث بالطريقة العمدية لكبار السن والمشاركين بمشروع المركز الرياضي للرواد بمحافظة القليوبية والمشاركين في الأنشطة الرياضية الثلاثة (كرة القدم – الكرة الطائرة – تنس الطاولة) . حيث وقع اختيار الباحث على كبار السن المشاركين في الأنشطة الرياضية br (كرة القدم – الكرة الطائرة) . br وسائل وأدوات جمع البيانات: br الأجهزة والأدوات: 14 br- جهاز الرستمايزر لقياس طول الجسم (ستيمتير). 15 br- ميزان مطي لقياس الوزن (كيلو جرام). 16 br- شريط قياس (ستيمتر). 17 br- ساعة إيقاف لحساب الزمن (ثانية). 18 br- شريط لاصق. 19 br- كرات طبية (وزن3.5 20 br-	2016م		
							لقد نظم الله سبحانه وتعالى أعضاء جسم الإنسان بصورة نموذجية تمكنه من الحركة التي لا يستطيع الحياة بدونها، فهي وسيلة الأساسية للحياة ، وهي التي تمكنه من ممارسة أى نشاط في حياته اليومية ، ومن ثم أصبحت الحركة أحد وسائل تقدمه ورفاهيته . وإذا ما عقدنا مقارنة بين الحركة الدائمة والجهد الذهني والجهد البدني الذي كان يبدله أسلافنا بما يبدله إنسان هذا العصر ، فينتا سنستنتج أن هناك فارقاً كبيراً في كم الحركة والجهد البدني الذي كان يتميز به الأسلاف عن إنسان اليوم. br وتعد اللياقة البدنية إحدى مكونات اللياقة الشاملة حيث تعرفها الأكاديمية الامريكية للتربية البدنية بأنها : قدرة الفرد على أداء الواجبات اليومية بحيوية ويقظة دون تعب لا مبرر لها مع توافر جهد كاف للتمتع بهوايات وقت الفراغ ومقابلة الطوارئ غير المتوقعة . br ويضيف محمد صبحي حسنين (2000م) أن اللياقة البدنية هي الأساس في اللياقة الشاملة ، فإن لم تكن كذلك فلا أقل من أنها من أهم مكوناتها، فهي تتطلب سلامة الأجهزة العصبية والعقلية والجهاز الدورى التنفسي، والأعضاء الداخلية، كما أنها تتطلب قواماً جيداً ومفقيس جسمية متناسقة وخلو من الأمراض br كما أن العلاقة بين التربية والرياضة والتربية الصحية علاقة وثيقة لا تخفى على معظم أفراد المجتمع على اختلاف ثقافتهم، فالعامة ينظرون إلى التربية الرياضية على أنها وسيلة هامة من وسائل المحافظة على الصحة . br والصحة من أهم أهداف التربية الرياضية في العصر الحديث وتسعى التربية الرياضية من خلال برامجها المختلفة إلى اكتساب الفرد السلوك الصحى . br كما يرى "علي جلال الدين " (2005) أن مجال الصحة العامة تشتمل على حلقة واسعة من الموضوعات ذات الصلة بالبرنامج الومى المثالي، والعناية بالجسم وتوفير الغم والإمتناع عن العادات الضارة التي تؤدي إلى انحراف الصحة وهبوط الكفاءة البدنية . وصحة الحياة الجنسية والملابس والأحذية الرياضية وموضوعات التكيف لطروفي البيئة الخارجية المتتوعة والغذائية الصحية ومحاربة المنشطات المنوعة وتحاشن الإصابة بالأمراض ذات الصلة بممارسة التربية البدنية وغير ها من الموضوعات. br ونظراً لعمل الباحث كأخصائي رياضي بجامة أسوان، لاحظ الباحث أن هناك بعض مظاهر سلوكية غير مرغوب فيها تنتشر بين الطلاب أدت الى ظهور مشكلات عديدة تتعلق بالصحة العامة، هذا بالإضافة الى الحياة اليومية والإنتفاع للعالم الخارجي والتطور العلمي في هذا العصر الذي أدى إلى إعتدأ الأفراد على التكنولوجيا الحديثة إلى حد كبير سواء في الحركة أو الغذاء أو حتى ممارسة الأنشطة البدنية وقد ظهرت جوانب كثيرة من القصور والاضطراب نتيجة للتغيرات الاجتماعية وأصبح هناك خلل في إتباع السلوكيات الصحية السليمة سواء كانت سلوك غذائي أو سلوك قوامى أو سلوك رياضي أو إجتماعي وغيره من السلوكيات الصحية السليمة . br ومن هنا بدأ الباحث بعمق في التفكير في تصميم برنامج لياقة بدنية وصحية لمعرفة مدى تأثيره على إكتساب بعض السلوكيات الصحية لطلاب جامعة أسوان . br ثانياً: أهمية البحث والحاجة إليه : 1 br- على الرغم من أهمية ظاهرة الصحة والسلوك الصحى لطلاب الجامعة ، إلا أنه لم يزل حقه من الدراسة والبحث. 2 br- تعد هذه الدراسة بمثابة قاعدة بيانات من خلالها يمكن التعرف على السلوك الصحى لطلاب جامعة أسوان. 3 br- خطورة إنتشار السلوكيات الصحية الغير سليمة بين طلاب جامعة أسوان لما لها من آثار سلبية على الصحة واللياقة البدنية لهم. 4 br- قد تكون الدراسة الحالية على حد علم الباحث من الدراسات الأوائل التي تتناول برنامج لياقة بدنية وصحية على اكتساب السلوكيات الصحية لطلاب جامعة أسوان. br ثالثاً: هدف البحث : br يهدف البحث إلى تصميم برنامج لياقة بدنية وصحية ومعرفة تأثيره على إكتساب السلوكيات الصحية لطلاب جامعة أسوان.	2016م		
							تأثير برنامج لياقة بدنية وصحية على إكتساب بعض السلوكيات الصحية لطلاب جامعة أسوان/ ماجستير	5330	12371554	
							حسن، أحمد حسن أحمد.			
							Role of magnetic resonance imaging in diagnosis of shoulder pain /			
							Awad, Ahmed Mostafa Khalaf.			
							Structurally the shoulder joint is a weak joint due to disparity of articulating surface area between small and shallow glenoid cavity in comparison to head of humerus Shoulder pain is the third most common musculoskeletal complaint in the general population Subacromial impingement is the most frequent cause of shoulder pain, accounting for up to 60% of all shoulder complaints The term shoulder impingement was first introduced by Neer 1972 and referred to compression of rotator cuff, subacromial bursa and biceps tendon against the undersurface of the acromion & coracoacromial ligament , that exaggerates on elevation of the arm. it is often difficult to	2014	12371571	5331

diagnose because the clinical presentation may be confusing and clinical tests lack specificity .

There are many etiological factors of rotator cuff impingement , including anatomical , mechanical, vascular, degenerative & traumatic factors. Keeping in consideration that, in the majority of cases , the process of impingement is multifactorial, and the key factor in any case depends on the individual circumstances

In the past, several imaging modalities were used ranging from conventional radiography, arthrography to computerized axial arthrography. Recently, various imaging modalities are now available including ultrasonography, CT arthrography, conventional MRI and MR arthrography.

The most common radiological findings in such cases are abnormal acromion shape, acromio-calvicular osteoarthritis, subacromial bursitis, rotator cuff abnormalities (including tendinosis, partial-thickness tears & full-thickness tears), reduced subacromial tunnel & biceps tenosynovitis. MRI was considered to be the examination of choice for the evaluation of the cases with subacromial impingement , but it can only provide a static evaluation of the shoulder joint and indirectly suggesting the diagnosis of subacromial impingement, in addition to its high cost , long examination time and subjective limitations, as in patients having pace-makers or claustrophobics.

MR in cases of subacromial impingement can precisely detect:

Narrowing in the subacromial tunnel

Different types of rotator cuff tears.

Rotator cuff tendinosis

Fluid in the joint , in the subacromial and subdeltoid bursa,

Acromio-clavicular joint degenerative changes and its impact on the rotator cuff tendons.

Biceps teno-synovitis.

The shoulder joint is anatomically complex, where its stability depends on a combination of osseous structures and soft tissue structures surrounding the shoulder known as the labral ligamentous complex, joint capsule, muscles and tendons where they are acting as dynamic as well as static stabilizers preventing the joint from exceeding the optimized range of motion.

Glenohumeral instability remains a very complex and sometimes challenging diagnostic problem. There are potential lesions of the capsule and Labroligamentous structures that can occur in association with shoulder instability, and the clinical history and physical findings are not always sufficient to make accurate diagnosis. Antero-inferior dislocation is the most common frequent cause of shoulder instability.

The aim of this work is to evaluate the role of magnetic resonance imaging in diagnosing the different lesions that cause shoulder joint pain.

This study included 20 patients; clinically presented with shoulder pain whether traumatic or atraumatic associated with limitation of movement, dislocation and/or dislocation. Most of the patients were examined with conventional MRI and some of them were subjected to MR arthrography.

Conventional MR imaging, which allows direct visualization of major anatomic structures, had been traditionally used in the examination of patients with shoulder instability, though it has been pointed out that accurate interpretation of glenohumeral joint structures is beset with pitfalls. To improve the evaluation of smaller intra-articular structures such as the glenoid labrum and glenohumeral ligaments, MR arthrography is increasingly recognized as the examination of choice in glenohumeral instability providing demarcation of complex anatomic structures of the joint and demonstration of subtle abnormalities, along

Summary

with excellent delineation of associated intra-articular lesions. MR arthrography extends the capabilities of conventional MR imaging because contrast solution distends the joint capsule, outlines intraarticular structures, and leaks into abnormal areas.

In our study, MR arthrography has good role in diagnosis of labral tears in addition to imaging capsuloligamentous, cartilaginous injuries as well as small partial or complete tears of the rotator cuff tendons.

In conclusion, our results recommend that MRI should be

								increasingly used, especially when there is any uncertainty, or when the issue of labral or capsular tear is not obvious from the clinical investigation. Further MR arthrography is, however, needed in order to be able to evaluate the joint capsule itself, and the size of the ligamentlabral injury.		
								يعتمد انتشار رياضة الملاكمة على أمور عدة أهمها توفير الإمكانيات المادية والبشرية المناسبة وكذلك الدعم المقدم من الدولة ومن الاتحاد المسئول بتوفير المنشآت الرياضية والأجهزة والأدوات اللازمة لممارسة اللعبة واللاعبين والإداريين والمدربين ووسائل الإعلام حيث أن الإخلال في أي ناحية من هذه النواحي يمكن أن ينعكس على الصورة تدهور لمستواها أو قصور في انتشارها. br ومن هنا جاءت ضرورة الاهتمام الجاد بتحديث الأساليب الإدارية التي تدار بها تلك المؤسسات فالإيد من تحقيق عناصر محددة تساعدنا على تحقيق ميزة تنافسية ولذا أصبحت المؤسسات والهيئات في حاجة ماسة إلى إدارة حكيمه تنقهم أصعاليها ومتطلباتها وتتفاعل معها من أجل إنجاز المهام بأقل جهد ووقت وبأكبر كفاءة ممكنه. (43: 2) br والإدارة التنافسية هي ثورة حقيقية في عالم الإدارة في العصر الحالي حيث تشير الإدارة التنافسية إلى الخاصية التي تميز المؤسسة عن غيرها من المؤسسات من خلال هيكليتها br العامة والخاصة والأهلية ومنظمتها بجميع أنواعها، عن طريق الأخذ بالأساليب التكنولوجية المتقدمة لكي تستطيع المنافسة والصمود في السوق العالمي المفتوح الذي لا يقبل إلا التفوق والامتياز. (48: 86) br والعملية الإدارية في المؤسسات عملية معقدة ومتشعبة من المهام والوظائف، التي تسعى في النهاية إلى تجميع، تنسيق، وتوجيه ثم مراقبة مجهودات أفرادها، من أجل تحقيق هدف مشترك. وتحقيق هذا الهدف لا يتأتى إلا في ظل إدارة حديثة تعتمد التخطيط الاستراتيجي كوسيلة لرفع كفاءة المنظمة ككل. (22: 17) br وقد لاحظ الباحث أنه لأجل تحقيق الأهداف البطولية يتطلب الأمر وجود تخطيط استراتيجي من خلال خطة إستراتيجية متكاملة يتم فيها تسيير العمل، من خلال النهوض بأداء الاتحاد المصري للملاكمة حيث تشير دراسة ريسان خريبط (2010م) (16) إلى أن التخطيط الاستراتيجي يهدف إلى تحقيق قاعدة التنمية وبناء هيكل إنتاجي شامل ومتطور داخل الاتحاد المصري للملاكمة مما يرفع من قدراته ويوفر لدى المؤسسة الإدارة والقدرة على التنافس. br ويرى الباحث أن وجود إستراتيجية داخل المؤسسات يعمل على زيادة قدرة المنظمة على مواجهة المنافسة من خلال النهوض بأداء الاتحاد المصري للملاكمة وتنمية القدرة على التفكير الاستراتيجي لدى المديرين العاملين مما يجعلهم قادرين على اتخاذ القرار الذي يساعد على تحقيق الأهداف في ضوء الإدارة التنافسية. br وذلك تبعاً لما أشارت إليه دراسة كلا من كمال عبد الجابر (2012م) (35)، شريف محمد إسماعيل (2008م) (21) Hoffman(2007م) (58)، عبد الرحمن توفيق (2003م) (26) إلى أن هناك مشكلات تواجه المنظمات عامة واتحاد الملاكمة خاصة ناتج عن عدم قدرة العاملين بالاتحاد من العمل بكفاءة اعتماداً معتمد على الأسس الحديثة في الإدارة واستخدام التكنولوجيا المتطورة والبعد عن الأسلوب التقليدي. br مما سبق يرى الباحث أن وجود تخطيط استراتيجي يعد ضرورة ملحة وحيوية للمؤسسات الرياضية بصفة عامة ورياضة الملاكمة بصفة خاصة إذا أرادت زيادة قدراتها التنافسية وتطوير أدائها، فقد أصبح ذلك السبيل الوحيد لاستمرارها خاصة في ظل الحرص المتواصل من العاملين في مجال رياضة الملاكمة على تحسين وتطوير الأداء بما يسمح لرياضة الملاكمة في مصر بالمنافسة في المحافل الرياضية الإقليمية والدولية. br - هدف البحث: br يهدف هذا البحث إلى وضع إستراتيجية مقترحة للنهوض بالاتحاد المصري لرياضة الملاكمة في ضوء الإدارة التنافسية.	2016م	
			استراتيجية مقترحة للنهوض بالاتحاد المصري للملاكمة في ضوء الإدارة التنافسية/	محمد، امير احمد محمد.				إن التطورات السريعة التي يعرفها مجال كرة القدم في الوقت الحاضر قد أدخلت عالم التحكم دائرة التنافسية المفتوحة على جميع الأصعدة ، لضمان الاستمرارية ومواكبة التقدم العلمي الكبير المستمر في تكوين اللاعبين والمدربين ، وتعتبر اللياقة البدنية من الأساسيات لحكام كرة القدم ولهذا يصير الاتحاد الدولي والقاري والمحلي على إجراء اختبارات اللياقة البدنية قبل كل منافسة سواء كانت محلية أودولية أو قارية وذلك للتأكد من جاهزية الحكام لبذل المجهود الذي يواكب متطلبات المباراة . br يؤكد " حسن السيد أبو عiede "(2004) أن القدرات البدنية الخاصة في كرة القدم تشكل عاملا هاما وأساسيا لرفع مستوى الأداء ، حيث أن القدرات البدنية تهدف إلى تحديد عناصر بدنية معينة تلعب دورا بارزا في إتقان ومساعدة الحكم في اتخاذ القرار السليم . br وينكر " أبوالمعال عبد الفتاح "(1997) أن الإمكانيات الفسيولوجية تختلف من رياضي إلى آخر ومن تلك الإمكانيات الفسيولوجية الحالة الصحية العامة ، وامكانية الجهاز الدوري والتنفسي والاقتصاد الوظيفي للعمليات الوظيفية والارادية ، وخصائص استعادة الشفاء ومستوى الحد الأقصى لاستهلاك الأكسجين والإمكانيات اللاهوائية خلال الاستمرار في الأداء الذي يعتمد على بذل أقصى جهد على فترات متقطعة ومتكررة خلال المباراة . br ومن خلال عمل الباحث كحكم مرفق أسبوط لكرة القدم التابع للاتحاد المصري لكرة القدم ومتابعة تطبيق الإختبار (FIFA Test) على الحكام والإطلاع على نتائج الإختبار لموسم 2014 م / 2015 م تبين أن عدد (26 حكم مرفق(2) من حكام الدرجة الأولى والثانية والثالثة وتحت الإختبار يُخفقون(رسوا) في اجتياز إختبار اللياقة البدنية المعتمد من الفيفا الذي أقيم في بداية الموسم الرياضي (2014 م / 2015 م) ، وقد يرجع الباحث ذلك إلى ضعف في مستوى اللياقة البدنية والكفاءة الفسيولوجية للحكام مرفق(3) والتي نتج عنها رسوب ما يزيد عن 70% من الحكام بجميع درجاتهم على مستوى فرغ أسبوط ، وذلك في إختبار وارنر لإجتياز (40 متر X 6 مرات) وإختبار (150م X 30 ث X 20 مرة) لجميع الدرجات ومن خلال المقابلة الشخصية الغير مقتنه مع بعض الحكام الذين لم يجتازوا الإختبار تبين أن بعض الحكام خضعوا لبرامج إنقاص وزن وتدريبات عفيفة وأنهم قاموا بالتدريب الفردي والعشوائي دون وضع برنامج مقنن يسمح لهم برفع مستوى اللياقة البدنية لإجتياز إختبار (FIFA Test).	2016م	هيئة الإشراف: إبراهيم محمد رمضان ، إشراف : محمد إبراهيم محمود سلطان ، ياسر حسن حامد ، إيمان سيد حسن .
			برنامج تدريبي مقترح لتنمية القدرات البدنية الخاصة وبعض المتغيرات الفسيولوجية وتأثيره على اجتياز إختبار اللياقة البدنية المعتمد من الاتحاد الدولي لكرة القدم لحكام فرغ أسبوط /	رمضان، ابراهيم محمد.					5333	12372189

أصبحت الإدارة في هذا العصر من ركائز التقدم فما من اكتشاف أو تطوير أو نشاط أو تغيير أو أنجاز إلا وبالتحليل لاسبابه نجد أن الإدارة تتدفعه وتتغلف وجوده، حيث ان أي محاولة لإحداث التنمية والتطوير تحتاج إلى إدارة متطورة تستخدم الأساليب العلمية في التطوير والتخطيط والتوجيه والرقابة بما يحق الاستخدام الأمثل للموارد والامكانيات، لذا فإن الاداره هي الطريق الأمثل لتحقيق الاهداف المنشوده . br ويرى "جمال محمد علي" (2007م)، أنه أصبح نجاح أي عمل يقوم على استخدام الحاسب الآلي ونظم المعلومات الإدارية الحديثة. ولقد تغيرت الدنيا مع نهاية القرن العشرين وتغير معها علم الإدارة فبعد أن كان الهدف من الإدارة هو وضع الاهداف للعمالين لتنفيذها ووضع القواعد واللوائح لكي يسيروا عليها وتصميم هياكل إدارية للسيطرة ووضع ضوابط رقابية لضمان التنفيذ، أصبح الهدف من الإدارة في القرن الـ 21 استئثار حماس العاملين، إفساح المجال للقرارات الابتكارية، منح سلطات واسعة التفويض الفعال للمساهمة في وضع المستقبل، تحقيق ميزة تنافسية ومعدل نمو للإيرادات أو العضوية أو المستوى وأصبح التغيير هو الحقيقة الثابتة الوحيدة والمستقبل يتحدد بالناحضر. (17: 16) br كما تعتبر الإدارة هي المسئولة عن نجاح هذا النشاط وهي التي تؤدي إلى تقدم أو تخلف أي نشاط والتي يمكن عن طريقها تحقيق اهداف أي منظمه من المنظمات أو أي مجتمع من المجتمعات . br تعد الخطة المقترحة هي مجموعة من الاهداف الرياضية موضوعة بصورة شاملة، متكاملة تتضح فيها وسائل العمل ومتطلباته. واتجاهاته بهدف إحداث تغيرات لتحقيق الاهداف والنتائج الرياضية المحددة. br أن في مصر وبعد جهود مستفيضة من أبناء المهنة المخلصين وسعيهم الدؤوب لدي مجلس الشعب والشورى لإقناع المسؤولين بأهمية تأسيس نقابة المهن الرياضية وبدورها الكبير في مجال المهنة ، فقد صدر القانون رقم (3) لسنة 1989 الخاص بإنشاء وتنظيم نقابة المهن الرياضية التي جمعت شمل القادة المهنيين في الحقل الرياضي من معلمين ومدربين وإداريين، وقد ضمت في تكوينها العضوي كل من رابطه خريجي كليات ومعاهد التربية الرياضية العليا، ورابطه خريجي دور ومعاهد التربية الرياضية المتوسطة، وجميعه مدربي الألعاب الرياضية والتي أصبحت جميعها في حكم المنحلة بتشكيل مجلس إدارة نقابة المهن الرياضية كما الات جميع اموالها وممتلكاتها والفروع التابعة لها إلى النقابة بمقتضى القانون، وتتكون النقابة من ثلاث شعب هي شعبه التعليم ، وشعبه التدريب، وشعبه الاداره. br ومن خلال عمل الباحثوجه أول للتربيه الرياضيه بمديريه التربيه والتعليم باسيوط وامينا عاما لنقابه المهن الرياضيه باسيوط وتنفيذ لبرامج المديرية للانشطه المختلفه وتطبيقا لمواد القانون الخاص بنقابه المهن الرياضيه رقم 3 لسنة 1987 وتنفيذ لبرامج اكاديميه نقابه المهن الرياضيه لتدريب المدربين والاداريين الغير اكاديميين وطلاب وخريجي كليه التربيه الرياضيه ولتنفيذ رغبات هذه الفئه من الرياضيين ، يتم الاعلان عن جميع الدورات التي تم ادراجها بلاحقه الاكاديميه. br ومن خلال تنفيذ هذه الدورات حسب نص اللاتحه والتعامل مع الدارسين خلال فعاليات تلك الدورات ومناقشته بنود واجراءات التنفيذ ومناقشته القائمين على العمل بالنقابات الاخرى وجد ان لاتحه الاكاديميه قد وضعت باجتهاد من مجلس اداره النقابه العامه وكان المسمى القديم للاكاديميه (معهد التثقيف المهني لاعاد القاده الرياضيين) ثم تغير اسم المعهد الى المسمى الحالي (اكاديميه نقابه المهن الرياضيه لعلوم التربيه البدنيه والرياضه) وتم مع تعديل الاسم وتعديل محتوى اللاتحه الخاصه بالاكاديميه وتم التعديل عن طريق مجلس الاداره ايضا والقائمين على الاكاديميه ، بدون الرجوع الى الخبراء في مجال التربيه الرياضيه والعمل الثقافي وباقي الاطراف الاخرى مثل الدارسين انفسهم والقائمين على العمل بالنقابات الفرعيه لمناقشته بنود اللاتحه والتي تشمل (الاهداف، انواع الدورات،شروط الالتحاق ،عدد الساعات، قيمه الاشتراكات،البرامج الدراسيه ، البرنامج الزمني ، اسلوب التقييم والمتابعه ، ونسب توزيع الموارد الماليه).	2016	هيئة الإشراف : جمال محمد علي يوسف ، عادل محمد عبدالمنعم مكي.	
تسهم الساحة العامية تغيرات جذريه سوف تترك اثراها الإحصائية على العالم بصفه عامه، وعلى المنطقه العربيه بصفه خاصه. والتسويق التفاعلي أحد الأساليب التي ارتبطت بالنظم الإلكترونية ونظم المعلومات التي تعتمد على الإنترنت، والتعامل من خلال شبكة الإنترنت والذي يعتمد على وجود حوار متبادل وفعال بين المنظمة وعمالها من خلال موقعها الإلكتروني حيث تتم عملية التبادل كاملة من خلال هذا التفاعل.وتعتبر نظم المعلومات منظومة مكونة من معلومات وأفراد وأجراءت تتفاعل من خلال مجموعه عمليات تجرى على البيانات والمعلومات بواسطة أفراد متخصصين وأجهزة متطورة تمكن الإدارة من القيام بمهامها وإتخاذ القرارات الرشيدة لتحقيق الهدف.ومن خلال ما قام به الباحث بإجراء دراسة استطلاعية وذلك من خلال المقابلة الشخصية أثناء حضوره بطولة كأس مصر للسلاح (رجال-سيدات) خلال الفترة من 18-20/9/2014 والقيام بسؤال بعض العاملين بالاتحاد (الإداريين- المدربين- الحكام- اللاعبين رجال وسيدات) تبين للباحث الآتي. أنه لا يتم تحديث موقع الاتحاد بشكل دوري، وأن الاستفادة من الموقع غير مجزيه. ومن خلال إطلاع الباحث على الدراسات التي تتناول العمل التسويقي داخل الاتحاد المصري للسلاح والتي أوضحت وأنه لا توجد استراتيجيه واضحة تعتمد على استخدام النظم الإلكترونية ونظم المعلومات في نشر وترويج اللعبة بشكل مناسب. وبالنظر إلى خطة النشاط السنوي للاتحاد المصري للسلاح لعام(2014/2015) وجد أن الاتحاد ينظم العديد من البطولات المحلية والإقليمية والدولية وهذا يدل على كثرة البطولات التي يشترك فيها الاتحاد المصري للسلاح، ولم يتم الاستفادة منها من الناحية التسويقية. ومن هذا يرى الباحث ضرورة إستخدام التقنيات الرقمية الحديثة ونظم المعلومات في نشر وترويج أنشطة الاتحاد والتفاعل مع المستفيدين من هذه الأنشطة ، لذلك يقوم الباحث بإجراء الدراسة لوضع نموذج للتسويق التفاعلي لأنشطة الاتحاد المصري للسلاح في ضوء نظم المعلومات.	2016	هيئة الإشراف : جمال محمد علي يوسف ، عادل محمد عبدالمنعم مكي ، حاتم فتح الله محمد الحفني .

5336	12372310	تأثير برنامج تاهيلي باستخدام التمرينات مع بعض وسائل العلاج الطبيعي للعضلة الدالية المصابة بالتمزق الجزئي للرياضيين /	حسن، احمد عصمت عبدالحافظ.			إن معدل انتشار الإصابات في مجال الاسطلة الرياضية أصبح ظاهرة تستدعي إنباء كل العاملين في المجال الرياضي على الرغم من التقدم في مختلف العلوم الطبية وإتباع أساليب جديدة في العلاج واستخدام أحدث الأجهزة وتوفير المتخصصين من الأطباء وأخصائي الإصابات بالملاعب إلا أن الإصابات الرياضية مازالت منتشرة بشكل يهدد مستوى الأداء الرياضي . حيث تعتبر عملية إعادة التأهيلمسألة حيوية للعودة إلى الوضعالطبيعي من حيث مرونة المفاصل وتقوية العضلات التي أصابها الضعف، لذا يقوم أخصائي التاهيل بتصميم وتطبيق والإشراف على برنامج إعادة تأهيل المصاب، وفي العصر الحالي أصبحت التربية الرياضية من المجالات التي توسعت بشكل كبير على جميع الفئات والمستويات بازدياد الوعي بقيمتها الصحية والتربوية والترفيهية. وقد تميزت السنوات الأخيرة بزيادة حجم الإجازات الرياضية الأمر الذي أدى إلى أن تكتسب الدراسات والأبحاث الخاصة بالوقاية من الإصابات أهمية خاصة حيث تهدف هذه الدراسات إلى تقليل نسبة حدوث الإصابات بالإضافة بالاختصار الفترة الزمنية اللازمة لعودة الرياضي للفرمة الرياضية عقب تعرضه للإصابة ، حيثإن كثيراً من الرياضيين يُخفون في إستعادة الوظيفة الكاملة للجزء المصاب مما يؤدي إلى حرمان اللاعب من ممارسة النشاط الرياضي بصفة مؤقتة وقد يكون بصفة نهائية بسبب التاهيل المتعبد الإصابة و يجب الاهتمام بالإصابات الرياضية والوقاية منها لأن ذلك له أثر كبير في المحافظة على مستوى تقدم اللاعب وإستمرار مزاوله النشاط الرياضي ، ولهذا فإن تجنب الإصابات يجب أن يكون الشغل الشاغل والهدف الأساسي للمسؤولين في المجال الرياضي. br وتحتل إصابات مفصل الكتف المرتبة الثانية من حيث التكرار بعد إصابات مفصل الركبة في جميع المراحل السنية للرياضيين ، والنشئين هم الأكثر عرضة لتكرار إصابات مفصل الكتف من البالغين ، وتظهر ثلاث أنواع لإجهاد الكتف تشاهد بصورة متكررة في الرياضات التي يتطلب الأداء فيها حركة متكررة للزراع فوق الرأس وهي (التمزقات العضلية الدقيقة – التهاب أوتار العضلات مع عدم ثبات المفصل – إرتخاء العضلات مع عدم ثبات المفصل) لأن مفصل الكتف من أكثر المفاصل حركة عن غير ها من مفاصل الجسم جميعاً لكنه يستمد حرية حركته على حساب ثباته وقوته لذا فهو أكثر المفاصل سهولة في الإصابة . وقد زاد الاهتمام بالتمرينات التأهيلية العلاجية في ازدياداً كبيراً حتى أن بعض المدارس العلاجية تعتمد عليه كلياً في علاج إصابات اللاعب دون تدخل أي عوامل أخرى كالعلاج بالمقايير والحقن إلا في حالات إذا ما تطلب الأمر التدخل الجراحي. حيث تعتمد عملية المعالجة والتأهيل الحركي للمصابين بصفة عامة على التمرينات البدنية بمختلف أنواعها بالإضافة إلى استخدام بعض وسائل العلاج الطبيعي بغرض استكمال عمليات العلاج والتأهيل الحركي للشخص المصاب للعودة في أسرع وقت ممكن للحالة الطبيعية. ويعتبر العلاج بالموجات فوق الصوتية ناجحاً، نظراً لقدرة تلك الموجات على الاختراق لتصل إلى العظام وتستخدم أيضاً في علاج الالتصاقات والأنسجة المتليفة المصاحبة للكسور والجروح ولا يُفضل زيادة جرعاتها كما يُفضل أن يصاحبها التدرجات التأهيلية المناسبة وباستمرار يعطى العلاج النتائج المرجوة. ونظراً لأن العضلة الدالية تنشأ من الثلث الوحشي لعظم الترقوة والحافة الوحشية للثوء الأكرمي لعظم اللوح بالإضافة إلى الجزء السفلي الخلفي لشوكة اللوح ، فإن حدوث التمزق يكون بالفعل مشكلة تؤثر بشكل كبير على حركة مفصل الكتف حيث إن العضلة الدالية من أهم العضلات المشاركة بشكل أساسي في أكثر حركات الكتف (التبعد – التقريب – القبض – البسط – الدوران – التدوير للخارج – التدوير الداخل) . br وإيماناً من الباحث بضرورة أن يخدم البحث العلمي كافة الفئات والمجمعات ومن خلال دراسة البحث في مجال الإصابات والتأهيل والعمل كأخصائي إصابات وتأهيل فقد لاحظ الباحث أن هناك تكراراً لحدوث إصابة التمزق الجزئي لبعض المجموعات العضلية العاملة على مفصل الكتف. مما دفع الباحث إلى محاولة إجراء دراسة تطبيقية تعتمد على أسس ومبادئ علمية وتحت إشراف الطبيب المعالج تستهدف تصميم برنامج تاهيلي لاستعادة القدرات الوظيفية	2016م	هيئة الإشراف : مجدي محمود وكوك ، إيمان عباس محمود القاضي ، ياسر حسن حامد
5337	12372336	برنامج تعليمي مقترح لتحسين الذكاء الحركي واثرة على مستوى أداء المهارات المنهجية في الكرة الطائرة لتلاميذ المرحلة الابتدائية /	محمد، عزالدين حمدي.			يشهد العصر الحالي تطوراً هائلا في شتى مجالات الحياة، وهذا يعد انعكاسا حقيقيا لانفجار المعرفي في كل فروع العلم، حتى أصبح الحكم على مدى تقدم الأمم ورفقها من خلال ما تأخذ به من أساليب علمية حديثة في تربية أبناءها وتزويدهم بأبواب المعرفة والتفكير الذي يساعدهم على التكيف والتعايش مع هذا العصر.	2016م	هيئة الإشراف : أيمن عبده محمد ، إيمان سيد أحمد ، مصطفى هاشم أحمد .
5338	12372637	تأثير استخدام أسلوب التطبيق الذاتي المتعدد المستويات على تعلم بعض المهارات الأساسية لكرة القدم لدى تلميذات المرحلة الابتدائية /	الأخرس، منى محمود محمد السيد.			يهدف البحث إلى التعرف على تأثير استخدام أسلوب التطبيق الذاتي المتعدد المستويات على تعلم بعض المهارات الأساسية في كرة القدم لدى تلميذات المرحلة الابتدائية، استخدمت الباحثة المنهج التجريبي ذو المجموعتين، مجموعة تجريبية تطبق أسلوب التطبيق الذاتي المتعدد المستويات والأخرى يطبق عليها أسلوب الأوامر ، عينة البحث تم اختيارها بالطريقة العمدية من مدرسة شبر سندي الابتدائية، الصف السادس كل مجموعة تتكون من 25 تلميذة وقد أعطى أسلوب الأمر نتيجة إيجابية ولكن الطالبات من المجموعة التجريبية تفوقن بفضل استخدام أسلوب التطبيق الذاتي المتعدد المستويات، لذلك توصي الباحثة باستخدام أسلوب التطبيق الذاتي المتعدد المستويات لهذه المرحلة بسبب فعاليته على مستوى الأداء.	2016م	هيئة الإشراف : محمد إبراهيم سالم ، حمدي محمد الجوهري .
5339	12372727	التنبؤ بالحاجة إلى التدريب على المهارات العقلية بدلالة الضغوط النفسية لدى لاعبي كرة اليد /	الحريزي، أية إبراهيم السعيد إبراهيم.			الهدف:يهدف البحث إلى التنبؤ بالحاجة إلى التدريب على المهارات العقلية بدلالة الضغوط النفسية لدى لاعبي كرة اليد الاستنتاجات:-تم تقنين مقياس النزعة للشعور بالضغط والقدرة على مواجهته لدى اللاعب؛ حيث تكون المقياس في صورته النهائية من(20) عبارة، بواقع(10) عبارات في الصورة(أ) من المقياس و(10) عبارات في الصورة(ب).-وقد أثبت مقياس النزعة للشعور بالضغط والقدرة على مواجهته لدى اللاعب صلاحيته في التعرف على طبيعة الضغوط والقدرة على مواجهته من خلال استخدام المهارات العقلية.-وللمقياس درجة استجابة وفق ميزان تقدير خماسي(تنطبق على تماماً ، تنطبق على بدرجة كبيرة، تنطبق على بدرجة متوسطة، تنطبق على بدرجة قليلة، لا تنطبق على تماماً) .ويحتوى المقياس على(20) عبارة منهم(10) عبارة إيجابية، و(10) عبارة سلبية.التوصيات:-الاهتمام بخنصر الإمكانات لما له من أهمية بالرغم من عدم وجود فروق بين مجموعات المقارنة لعينة البحث الا انه هام وربما لأن طبيعة النطاق السلوكي لأداة القياس لم تبرز البعد النفسي للإمكانات.-الاهتمام بالانتقاء في السنوات المبكرة المناسبة لما لسنوات الخبرة من أهمية وارتباط في انخفاض مستوى الضغط النفسي والقدرة على مواجهته (الصورة أ، الصورة ب) لدى عينة البحث.-استخدام التدريب العقلي في خفض مستوى الاستثارة الانفعالية لاسيما مواجهة الضغط النفسي بين فئات اللاعبين عينة البحث حتى يمكن تحقيق أفضل المستويات الرياضية.بحوث مستقبلية مقترحة:-إجراء دراسات وصفية على متغيرات أكثر شمولية وتكاملاً بين الجانب النفسي والمعرفي والبدني.-بناء أدوات قياس مرتبطة برصد الظواهر النفسية لدى فئات من لاعبي كرة اليد في مصر.- إجراء دراسات تجريبية يستخدم فيها التدريب العقلي كمتغير رئيسي وتأثيره على بعض المتغيرات الانفعالية لدى فئات من لاعبي كرة اليد في مصر.-إجراء دراسات مقارنة عبر ثقافية لدى لاعبي كرة اليد في مصر واقطار مغايرة.	2016م	هيئة الإشراف : أحمد محمد الشافعي محمد ، تأمر محمود السعيد محمد ، محمد مصطفى محمد غالب .

5340	12372757		تأثير استخدام أسلوب التدريب المختلط علي مستوى أداء بعض المهارات الهجومية للاعبين كرة اليد /	شحاته، مريم السيد إبراهيم حسنين.		2016	تهدف الدراسة إلى التعرف على تأثير "استخدام أسلوب التدريب المختلط على مستوى أداء بعض المهارات الهجومية للاعبين كرة اليد" مما أثر لدى الباحث إقراض وجود فروق ذات دلالة إحصائية بين القياسين القبلي والبعدي لصالح القياس البعدي لبيئة البحث، وقد استخدمت الباحثة المنهج التجريبي بتصميم القياس القبلي والبعدي لمجموعه تجريبية واحده، وذلك لمناسبتها لطبيعة هذا البحث، وأجرت الباحثة الدراسة على لاعبي المشروع القومي للمعلقة والموهوبين لكرة اليد بالدفقيلية والمسجلين بسجلات الاتحاد المصري لكرة اليد والبالغ عددهم (12 لاعب)، وتم إجراء المعاملات العلمية على عدد (10 لاعبين) (كعينة إستطلاعية) لحساب الثبات من إستاد المنصورة من نفس المرحلة السنوية وأيضاً تم حساب الصدق على عينة إستطلاعية عددها (10 لاعبين) من نادي الحوار مواليد (98). وقد أظهرت نتائج الدراسة وجود فروق ذات دلالة إحصائية بين القياسين القبلي والبعدي في المتغيرات البدنية والمهارية (قيد البحث) لصالح القياس البعدي.	2016 . هيئة الاشراف : خالد محمد زيادة ، وائل عوض رمضان .
5341	12372765		تقويم البرامج الترويحية بالمدن الجامعية بجامعة المنصورة /	عبدالرحمن، هبه الشحات إبراهيم.		2016	يهدف البحث إلى تقويم البرامج الترويحية بالمدن الجامعية بجامعة المنصورة، وذلك من خلال الإجابة على التساؤلات الآتية: ما أهداف البرامج الترويحية بالمدن الجامعية بجامعة المنصورة؟ ما محتوى البرامج الترويحية المقدمة لطلاب المدن الجامعية بجامعة المنصورة؟ ما الإمكانيات (المادية والبشرية) المتاحة لممارسة لأنشطه الترويحية بالمدن الجامعية بجامعة المنصورة؟ ما معوقات ممارسة الأنشطة الترويحية بالمدن الجامعية بجامعة المنصورة؟ ما أساليب تقويم البرامج الترويحية بالمدن الجامعية بجامعة المنصورة؟ المنهج المستخدم : استخدمت الباحثة المنهج الوصفي- الدراسات المسحية – بخطواته وإجراءاته. مجتمع وعينة البحث : يتحدد مجتمع البحث الحالي في طلبة وطالبات المدن الجامعية داخل الحرم الجامعي بجامعة المنصورة، والمتثلة في مدن (الزهراء – جيهان – الأمل) والبالغ عددهم(6000) طالب وطالبه، وأيضاً العاملين بالمدن الجامعية (مدير إدارة – منبر رعاية – أخصائي نشاط رياضي – أخصائي نشاط اجتماعي). أدوات جمع البيانات : استعانت الباحثة في جمع بيانات هذه الدراسة بالأدوات التالية: 1- لمقابلة الشخصية وذلك مع عدد من المتخصصين في الترويج وإعداد البرامج الترويحية داخل الجامعة للاستفادة منهم في تصميم الاستبيان. 2- تحليل محتوى الوثائق وقد تمثلت هذه الوثائق في المستندات المتعلقة بإحصاء أعداد الطلاب، سجلات الممارسة للطلاب داخل المدن الجامعية وأعداد العاملين بها. 3- تصميم الاستبيان وقد تم تصميم الاستبيان بحيث يشمل على المحاور الخاصة بالدراسة موضوع البحث. الدراسة الميدانية بعد الاطمئنان لمعاملات الصدق والثبات قامت الباحثة بتطبيق الاستبيان على عينة البحث بواقع (500)طالب وطالبه (25) من العاملين بالمدن الجامعية بجامعة المنصورة وذلك في الفترة (1-4-2014م) إلى (1-6-2014م)، وبعد الانتهاء من تطبيق الاستبيان تم جمعه وتنظيمه وتقرير البيانات لإجراء المعالجات الإحصائية المناسبة. المعالجات الإحصائية تمت المعالجات الإحصائية لبيانات البحث باستخدام البرنامج الإحصائي Spss، وقد استخدمت الباحثة المعالجات الإحصائية التالية: 1- المتوسط الحسابي. 2- الانحراف المعياري. 3- النسبة المئوية. 4- معامل الارتباط. 5- معامل ارتباط ألفا كرونباخ. 6- تحليل التباين. استخلاصات البحث: انطلاقاً من نتائج هذا البحث وفي ضوء المنهج المستخدم وفي حدود العينة وأدوات جمع البيانات استخلصت الباحثة ما يلي: 1- يعد الاهتمام بالحالة الصحية والاحتفاظ بالقوام السليم أحد أهم الأهداف لممارسه الأنشطة الترويحية وذلك للحصول على الجسم المناسب الخالي من الأمراض وخاصة السمنة والتخلص من الضغط والتوتر الناتج عن الروتين اليومي ليوم الدراسي. 2- اكتساب الطلاب الممارسين لبرامج الأنشطة الترويحية بالمدن الجامعية خبرات تعليمية وتربوية جديدة تعمل على تنمية وتطوير الشخصية بصفه كامله وفهم وإدراك الواقع المحيط وفهم العديد من الجوانب الحيائية. 3- اقتصار الممارسة على الأنشطة التي لها أماكن ومشتات للممارسة داخل المدن الجامعية فقط وإهمال باقي الأنشطة التي لا تتوفر لها أدوات مادية أو بشرية. 4- يعد طلاب الكليات العملية هم الأكثر مشاركة من طلاب الكليات النظرية مما يدل على أن طلاب الكليات العملية هم أكثر المأمأ بأهداف وأهمية برامج الأنشطة الترويحية 5- اهتمام القائمين على وضع البرنامج بالالتزام بعبادات وتقاليد المجتمع ومراعاة القيم المرتبطة به. 6- اقتصار وضع البرنامج الترويحي على الأخصائيين والإدارة فقط وحرمان الطلاب من المشاركة في وضعه وعدم مراعاة ميول ورغبات الطلاب في وضع الأنشطة التي يميل إلى ممارستها. 7- قلة المشاركة في البرامج الترويحية لضعف مستوى ثقافته الترويحية بأهمية الترويج وممارسة الأنشطة الترويحية داخل المدن الجامعية. 8- إهمال الإدارة بالبرامج الترويحية المقدمة للطلاب وعدم الاهتمام بتجديدها وإضافة الجديد بها كما أنها لا تعمل على دعم وتحفيز الطلاب على الاشتراك في ممارسة برامج الأنشطة الترويحية. توصيات البحث: في ضوء المنهج المستخدم وهدف البحث وفي إطار العينة التي تم إجراء الدراسة عليها، تتقدم الباحثة بالتوصيات والتابعه من الاستخلاصات التي تم التوصل إليها من خلال عرض وتفسير ومناقشة النتائج : 1- ضرورة	2016 . هيئة الاشراف : محمد كمال السملودي ، محمد السيد مطر .
5342	12373207		الفكر الإسلامي المعاصر عند جارودي :	علي، صالح مخلوف إبراهيم.		2016	This message entitled: " Contemporary Islamic Thought at Garaudy Analytical and Critical Study " presented by researcher : Saleh Makhloof Ibrahim Ali, a master's degree in Islamic Philosophy. This message came in an introduction and five chapters and a conclusion, and the number of pages, 333 pages, while the introduction: he said the importance of the subject and the reasons for his choice, and the questions and problems of the research, and previous studies, and systematic in this research, and the first chapters of research opened the first chapter titled: " please Garaudy and formative years, "dealt with the birth and upbringing, and writings of scientific and scholarly about it, and the times and the environment in which he lived Garaudy, and transformations Streptococcus. The second chapter entitled: "The ideas and opinions please Garaudy philosophical and rhetorical" and mentioned Garaudy vision of divinity, and the theory of knowledge, and his vision for the world, as well as his vision of the human being. The third chapter came under the title: "ideas and opinions please Garaudy in ethics and mysticism," which dealt with Garaudy vision of morality and ethics related to technological development and technical, as well as his vision of mysticism. The fourth chapter entitled: "Please Garaudy's efforts in the Islamic civilization," has dealt with the stages of the Islamic civilization, and to see her Garaudy, as well as his vision of the phenomenon of extremism in Islam, and the rise of Islam, and the universality of Islam. The fifth chapter titled "Orientalism dialogue status in the thought please Garaudy," the principle of dialogue addressed when Garaudy, and the dialogue of civilizations and its scope, objectives and its obstacles, has been touched on the philosophy of Orientalism and its definition, and the position of Garaudy of Orientalism, also showed his vision of Tasbat Salafist, as well as his vision of the	

						Arab open Spain. The conclusion: they included the most important recommendations and findings through my thought please Garaudy.		
5343	12374101	Detection of E.coli in chicken By Polymerase Chain Reaction (PCR) /	Mohamed, Mohamed Salah Ahmed.			2016 Colibacillosis is an economically important disease, which is prevalent through the world. E.coli has been implicated in a variety of disease conditions in poultry, such as colisepticaemia, coligranuloma, air sacculitis, peritonitis, pericarditis, omphalitis and oophoritis, accounting for about 5-50% mortality in poultry flocks, Margie et al. (1999). This prospective practical laboratory study was carried out during the period between September 2013 and March 2014 in the Microbiology Department, Faculty of Medicine, Assiut University; and Molecular Biology Research Unit, Assiut University. It aimed to isolate E.coli from the liver, lung, and intestinal contents of chicken by conventional culture method using two different selective media, to identify E.coli by using API 20 E system, establishing a specific, sensitive and rapid Polymerase Chain Reaction (PCR) assay for the detection of E.coli and comparison among conventional culture method, API20E and PCR for identification of E.coli. For this reason a total number of 150 organs (60 liver, 45 lung and 45 intestinal contents) of recently dead chickens that died due to acute diarrhoea during several outbreaks in different farms at Assiut, Minea and Sohag governorates. Conventional methods demonstrated that out of 60 liver samples, the isolates were positive (typical E.coli) in 38/60 (63.3%), and were negative (atypical and non-typical E.coli) in 22/60 (36.67%). The isolates were positive (typical E.coli) in 22/45 (48.89%) samples, and negative in 23/45 (51.11%) of a total 45 lung specimens. On the other hand, out of 45 intestinal samples, positive cultures (typical E.coli) were detected in 19/45 (42.2%) samples, and negative in 26/45 (57.78%). It had been shown that the conventional methods for E.coli detection by culturing present serious difficulties for standard selection. There is no general agreement concerning determination of the gold standard for the detection of these pathogens. In the present study, the biochemical reactions were determined by using the API 20 E system for only 25 isolated strains. The results obtained by this system revealed that out of 10 typical E.coli colonies only 7 (28%) were positive for E.coli i.e. the API 20E system confirmed the positivity of only 7 (28%) typical E.coli colonies, while the other 3 (12%) were negative by API 20 E system, and out of 10 atypical colonies 6 (24%) the API 20 E system were positive for E.coli and 4 (16%) were negative, while out of the 5 non- typical colonies, API 20 E test revealed 3 (12%) were positive and 2 (8%) were negative. These results demonstrated the value of API 20 E test in identifying the atypical and non-typical E.coli isolates and rising the positivity of the negative E.coli isolates. The results of PCR assay on DNA obtained from the yielded cultures. The specific detection of the E. coli species was based on PCR amplification of the 16S rRNA gene using oligonucleotide primers, ECO-f GACCTCGGTTTAGTTCACAGA and ECO-r CACACGCTGACGCTGACCA, whose PCR product size was 585 bp, Photo (3), 10 colonies were taken for PCR assay, (3 typical colonies, 4 atypical colonies and 3 non-typical colonies), and the results were shown in Table (6). Comparing the results of PCR and those of culture examination, it was found that PCR could detect 3 positive culture of E.coli isolates , in addition to 4 samples with atypical colonies and 3 samples of non-typical colonies. These data indicated that the PCR has sensitivity of 100% greater than that of cultural methods that has 52.67%. Comparing the results of PCR and those of API 20E system, it was found that PCR could confirm the positivity of 5 samples(2 typical, 2 atypical and 1 non- typical) positive by API 20E, in addition to detecting the positivity of other 5 samples (1 typical, 2 atypical and 2 non-typical) negative by API 20E. These data indicated that PCR has sensitivity of 100% compared to 64% for API 20E. In conclusion, the present study showed that the PCR amplification assay was not only highly sensitive, but also could provide a result on the same day that a specimen was submitted for evaluation , a potential advantage during outbreak investigations, that provide specific, rapid, simple and convenient test.

5345	12374530		مصادر المعرفة للمرأة الغير عاملة في صعيد مصر :	شاكر , إيمان سيد عبدالحكيم.			2016	Women are half of society and the one who educates the other half, so it became necessary to identify the basic tributaries that contribute to the formation of cultural and cognitive awareness to it, and under what his world is now increasingly changes and developments successive in knowledge production and investment being made women every effort to t The study shows that the sources of the problem in the acquisition of knowledge of women's non-performing remain anonymous, so it shall identify the sources of acquisition of knowledge. The study on the adopted survey field approach, which handles the collection and analysis of data and information, organization and divided and compare them to be able to analyze the subject knowledge of women's sources of non-performing in Upper Egypt, has consisted study tool in the Search form (questionnaire) as the main tool in the field of research, it has been designed the questionnaire distributed to a sample of unemployed women in the province of Qena. This study has provided the methodology and four chapters included in addition to the findings and recommendations and a list of references and appendices. The first chapter of which theoretical framework for women and knowledge, The second chapter, such as the practical side of the study process and analyze the results of the survey, while the third chapter dealt with obstacles to the acquisition of non-working women of knowledge and proposals to solve, the fourth chapter dealt with a proposal to increase the balance of the construction of knowledge of women's non-performing. The study found a range of results, including: 1. ranked health topic first category of knowledge that occupy the attention of non-working women in Qena governorate with subjects (43%) of the total study sample. 2. media accounted for more sources to acquire knowledge to use by non-working women in Qena Governorate by (92%) of the total study sample. 3. The most important purpose achieved by the non-working women in the province of Qena sources of knowledge acquisition is the acquisition of the general culture. 4. The more obstacles that hinder the non-working women in Qena towards the acquisition of knowledge is a lack of time and concern by the study or family (96%) of the total study sample. 5. The results showed some of the proposals made by the study sample to overcome the obstacles to the acquisition of knowledge is the development of library services and the allocation of radio and television channels and the dissemination of literacy classes.		
5346	12375793		فكرة الاضمحلال بين شبنجار وبول كيندي :	عبد الباسط, سهام رسل.			2016	This study is a thesis presented to fulfill the requirements of getting the master's degree in Philosophy of history and it is entitled "The idea of decay between Spengler and Paul Kennedy". "Comparative study " has dealt with the history of the idea of decay , decay in old thinking and the modern and contemporary Thought Then followed by a study of the concept of cyclical theory when Spengler and characteristics of rotating theory and phases of civilization when Spengler and properties yard stage study also dealt with the idea of decay in the industrialized world and look to the future when Paul Kennedy , Paul Kennedy and predict the collapse of the Soviet Union , and finally dealt with the historical study and the inevitable decay of civilization s when Spengler and Paul Kennedy and manifestations of decay when Spengler and Paul Kennedy . The researcher uses the analytical comparative historical approach has been used in order to study the offer historical interest to the idea of decay, the analytical method has been used in the analysis of the issues that we provide each of Spengler and Paul Kennedy and access to the comparative method was used to compare the ideas of both Spengler and Paul Kennedy and other philosophers . Based on this debate, the current thesis includes five chapters in addition to introduction and conclusion that shows the results of the study, as follows: - Introduction: in this part, the researcher defines the topic in focus, its significance, methodology, and research questions. - Chapter (1) entitled "Introduction to life Spengler and Paul Kennedy". - Chapter (2) entitled "The history of the idea of decay". - Chapter (3) entitled "Interpretation of the idea of biological decay when Spengler". - Chapter (4) entitled "The idea of decay and look to the future when Paul Kennedy".		

							- Chapter (5) entitled "Historical determinism and the decay of civilization between each of Spengler and Paul Kennedy". - The conclusion then comes to present the important results of the study followed by bibliography for the Arabic and Foreign sources and references.		
5347	12376400		استخدام نموذج راس أحادي المعلم في بناء بنك أسئلة لقياس التحصيل في مقرر القياس النفسي لدى طلاب الفرقة الثالثة قسم علم نفس كلية الآداب جامعة جنوب الوادي بقنا / حسان, دعاء المدثر محمد.			2016	Tests are one of the important means upon which to measuring and evaluating the capabilities of students from different levels of study, depend they can detect the elements of success and diagnose the strengths and weaknesses of the students in order to improve and develop their skills. is why tests have occupied a large space in the psychological and educational research. Because psychological testing movement , the psychologists are interested in achieving the validity the tests and standard their persistence to achieve the highest degree of objectivity when they ues these tools in the measurement process. It play a fundamental role in the life of the learner and the more learner makes progress in the years of the study tests gained importance more often become the only principle means in the evaluation of the progress of the learner, in addition they are consider organized means determine the amount of knowledge gained by the learner (Ragaa Mahmoud, 1987: 111) . Therefore, the psychological and educational measurement are considered important fields in psychology because of their significant role in the possibility of measuring the behavioral phenomena such as the academic achievement the capabilities , the capacity and preparations and others because it offered the foundations and principles by which they can measure these phenomena. (Hagag Ghanem , 2007: 11) The Educational Measurement and Evaluation play a great role in developing the educational process by identifying the level of its performance and directing its paths in line with the objectives, therefore the development of the systems and methods of evaluation and examination receive great interest by the researchers, whether in the developed countries or developing countries, depending on what is confirmed by the contemporary educational and psychological researchs where they assert the critical importance of evaluations the methods of in the achievement of the desired objectives (Mimi Elsaid ,2007: 2). The significant developments in the theories of the psychological and educational measurement and its models and applications at the last three decades affect clearly the process of developing the strategies of education and improving the measurement method its tools , and the methodologies and techniques of education. (Salah El-dinn Allam , 1995 : 5) The Item banks are one of the modern styles to evaluate student performance , it one of applications used in the item response theory , which contribute in providing assistance to the institutions that are responsible for the educational process to enable them to make continuous assessment for the students they providing them with sets of minute objective questions that are already calibrated and accurated and make sure of their safety and ease of application to measure specific educational objectives (Mahmoud Ahmed Omar et al., 2010: 449). The Research Problem : This problem of the research can be summarized in the following questions: 1-What is item difficulty estimation of The Item Bank and its calibration by using Rasch model? 2-What is the persons ability estimation to every possible raw total score in Item Bank by using Rasch model? 3-To what extend a test is validity and reliability in its final form by using rasch model? The Aims of The Research : This research aims at the following points: 1-Recognising the psychometric properties of The Item Bank through a sample of a Third-Year students in the Department of Psychology , Faculty of Arts, South Valley university sample by using the classical test theory. 2-Estimating item difficulty of The mental ability test and its calibration by using Rasch model. 3-Estimating the capability of the persons to every possible raw total score in a mental ability test by using Rasch model. 4-Recognising the test validity and reliability in its new form after the calibration by using Rasch model. 5- Measuring the students educational achievement in an objective way by Applying the modern theory that treat the disadvantages of the traditional theory, therefor it		

is important to change the questions the traditional examination system to over come clouded shortcomings.

6- Change the attitude of the students towards the school courses and the question in the exam which are considered as some traditional question that lack objectivity and try to convert them into objective question based upon the independence of the items used in the sample .

7- Come up with recommendations which enable us to use of Rasch model in the construction of the some practical tests in other school courses.

The importance of the study:

1- Providing a Item bank in the course of psychological measurement because it characterized by objectivity and rationing . in addition to , it is important to change the system of the question in the exam from being just questions that lack objectivity to other ones that are characterized by objectivity on the process of measurement to be able to measure the academic achievement.

2- Use Rasch model in the construction of the item Bank provided by the current study to achieve objectivity in the measurement and Rasch model is one of models used in the item Response Theory , which overcomes many of the disadvantages faced by the classical theory therefore Rasch Model is an important factor model in the construction or preparation of tests to measure and evaluate the academic achievement of the students.

3- Using the result of the Students in the exam to apply in on other school courses to reconsider and evaluated this course this helps to identify the difficulties faced by the students in this course and try to overcome and treat by the specialist professors.

4- Using Rasch model in measurement achieves objectivity in estimating both the difficulty of the item and the ability of the individual and making sure that it is not affected by changing the vocabulary used. This means that measuring is stable and is not influenced by using a different measurement tool, in ther wards , it reflects the independence of the individual's capacity form the vocabulary used in the item bank.

5- using this study will help to identify the level of the academic achievement of the students to observe the progress of the educational process.

Hypotheses of the research :

1-Differentiate the item difficulty estimation of the mental ability and its calibration by using rasch model.

2-Differentiate the person ability estimation to every possible raw total score in the mental ability test by using rasch model.

3-Achieving validity and reliability to the test in its final form by using rasch model.

The limits of the study :

The sample :

The final sample included (192) third- year student in department psychology Faculty of Arts , South Vaally University , at the end of the academic year (2014-2015), their age range from 20-22 years old at the average of 21, 05 .

The tool :

The researcher used Item Bank which is consisted of three Test of the multiple choice test.(the first consists of 31 item , the second consists of 31 item , wherase the third consists of 30 item)

The Procedures :

1-The researcher uses the computer program " Exel " to check the modulus of discrimination and the difficulty , and the effectiveness of dispersants .

2- The researcher uses the computer program " SPSS " in correct answered .

3-the researcher uses the computer program " Winsteps " to calibrate the difficulty and estimate the capabilities of the individuals by using Rasch Model

The results :

Can be summarized as follows:

1- Discrimination coefficient with the total score in the test between (0,26 – 0,71) by using the classical test theory.

2- Difficult coefficient with the total score in the test between (50%-70%) by using the classical test theory.

3- The Item Bank contains a high score of validity and reliability by using the classical test theory.

4-There were not perfect or zero data.

5-All Persons were fit rasch model.

6-Item difficulty was between (36.26) to (59.95) by using rasch model.

7-Person ability to every possible raw score in the test are between (4.22) to (95.69) by using rasch model.

8-All test items were fit rasch model.

9-All the test items had the ability to discriminate persons.

								10-Item difficulty reliability rose to (0.87) and persons' ability reliability rose to (0.91) by using rasch model.		
5348	12376758		كتب العبادات في صحيح مسلم دراسة نحوية دلالية / عبدالرحيم, فادية أحمد سيد.				2013	The study came that include an introduction and preface, four chapters and an epilogue, and indexes. Conclusion and dealt with the most important findings of the study, including 1- Tombstone Find upheld the view of some grammarians of passport multiplicity of news for the tyro one, whether accompanied Batef or not, and whether it is a multi-Bar in pronunciation and meaning, or was in one sense, and both also whether the news from one .or mixed type, which strengthens this view some evidence from the Koran 2- Display search of contention bin visual and Alkoviin about what acts on behalf of the actor, and supports the researcher say Albesrien should be on behalf of the object serves as the actor and the inadmissibility of the establishment of others with his presence, has been reported in all the evidence search for Vice Alvaal- effect by deputies from the actor 3- epithet stated in evidence in all its forms a single, and a phrase, and the phrase, and it was the most flowers in evidence describing the singular, and this agrees what has been approved as scientists from the origin of the epithet to be single, and the epithet Wholesale has stated in evidence describing the actual sentence, and clause nominal, but the epithet actual wholesale more than nominal sentence.

5351	12377282		Clinico-radiographic studies on the distal limb affections in equine /	Metwally, Asmaa Abdel salam.			2016	imaging techniques (radiography, computed tomography...etc.) plays a major role in the modern biomedical researchs (Olsen et al., 2007 and Olsen and Winterdahl, 2009). Radiography remains the main stay of equine musculoskeletal imaging due to its low cost, ready accessibility and global evaluation of bony structures (Kinns and Nelson, 2010). Also, it is the most imaging tool used for diagnosis of the bony disorders of limbs in equine (Abd El-Glil, 2004, Vanderperren and Saunders, 2009 and Semieka and Ali, 2012). Diseases of the locomotors system are the most important cause of early retirement of horses (Rosssdale et al., 1985). Radiographic survey of the distal limbs is often taken as part of lameness or prepurchase examinations. The goal of these prepurchase examinations is to identify abnormalities or potential problems that would make the horse unsuitable for the intended use (Van Hoogmoed et al., 2003). The digits and metacarpophalangeal region are the most clinically important areas of the equine limb that are frequently more subjected to radiographic examination (Smallwood and Holladay, 1987). Fetlock joint is of a wide physiological peculiarity if compared with any other equine joints, ranging from 120° of flexion, particularly during athletic events such as racing or jumping, which makes the joint susceptible to injury along with signs of degenerative joint disease. Moreover, fetlock joint is frequently susceptible to injury due to its angular design. In addition, the high speed loading on the appendicular skeleton which causes tremendous, compressive, tensive, and torque forces on the supportive structures (Abd El-Glil, 2004 and Berton, 2004). The aims of the present study are: 1-Illustrate the normal radiographic findings of the distal equine limb (from the metacarpal/metatarsal downwards). 2- Determine the prevalence of some distal limb affections in equine during the period of study. 3-Describe the clinical appearance and the radiographic finding of the distal limb affections in equine with complete tentative diagnosis and to follow up the efficacy of treatment clinically and radiographically.		
5352	12378982	PH. D.	Studies on postpartum anoestrous dairy cows in Qena governorate /	Mohamed, Yahia Abbass Amin.			2016 .	The present study was carried out in a governmental dairy farm in Qena governorate – Egypt during the period from February 2013 to April 2014. This farm contains 600 pure Holstein Friesian dairy cows. This study aimed to investigate incidence of different types of postpartum anoestrous and to evaluate some biochemical blood parameters. As well as, evaluation of certain protocols adopted for treating such traits.	#####	Sayed Abdel-Naeim Atallah, Mohamed Sabry Aref, Ahmed Ezat Ahmed.

							The material of this study involved 300 cows picked up from the farm records which were anoestrous since 200 days after calving .These animals were subjected to two rectal examination & blood sampling at ten days interval. Based on the rectal findings and progesterone profiles, the studied animals were grouped into, those suffering from inactive ovaries, those having CL persistent on their ovaries and those revealing subestrous. Among these anoestrous cows, ninety animals representing the three investigated classes were subjected to different treatment protocols. The treatment design for inactive ovaries (n=50) comprised CIDR plus PGF2α (n=15), Ovsynch (n=15) and Iugol's iodine solution (n=15) .Meanwhile , persistent CL group(n=15) as well as silent heat (n=15) received one injection of PGF2α followed by receptal after 48 hours .In addition , biochemical analysis of some blood constituents as total protein, albumen, urea, cholesterol, calcium, phosphorus, copper, zinc as well as AST enzyme were evaluated. The obtained results revealed the following :- i. Incidence of different types of postpartum anoestrus in the studied Holstein Friesian cows:- Out of 300 postpartum anoestrous Holstein Friesian cows, 144 (48%) were true anoestrous, 96(32%) had persistent corpus luteum and 60 cows were subestrus. ii. Metabolic blood profiles of postpartum anoestrous Holstein Friesian cows before and after different treatment protocols: • Metabolic blood profiles of postpartum true anoestrous cows : Serum levels of total protein, albumin and urea showed significant differences between different treatment protocols and controls before treatment, during oestrus and 21 days post mating. Before treatment, total protein levels averaged 5.72±0.05 gm/dl compared to 7.25±0.1 gm/dl during oestrus and 7.81±0.13 gm/dl 21 days post mating. Between different treatment protocols, the corresponding figure showed 7.2±0.2 gm/dl as an average total protein levels in CIDR and Ovsynch treated groups compared to 6.9±0.13 gm/dl in Iugol's treated group and 5.55±0.07 gm/dl in controls. Albumen levels were 3.23±0.07 gm/dl before treatment, 3.83±0.06 gm/dl during oestrus and 5.12±0.14 gm/dl 21 days post mating. Between different treatment protocols, the corresponding figure showed 4.7±0.18 gm/dl as an average albumen levels in CIDR treated group, 3.9±0.16 gm/dl for ovsynch treated group, 3.8±0.1gm/dl for Iugol's treated group compared to 3.5±0.06 gm/dl in controls. For urea, the corresponding figure were 45.84 ± 0.12 gm/dl before treatment, 37.6 ± 0.5 gm/dl during oestrus and 34.36 ± 0.64 gm/dl 21 days post mating. Between different treatment protocols, the figure was 38.7 ± 0.89 gm/dl in CIDR treated group, 38.48 ± 0.84gm/dl in Ovsynch treated group, 38.34 ± 0.84 gm/dl in Iugol's treated group compared to 46.12 ± 0.16 gm/dl in the controls.

5369	12394319		الماضي، عبد الرحمن عمر.	القاهرة :					
5370	12403321	تشوهات العمود الفقري بين أطفال المدارس في مدينة الزقازيق . العلاقة بين بعض المبادئ الخططية الهجومية الفردية وفاعلية الأداء	جاذبية جاد النجدي			1979م	تفيد هذه الرسالة أن تشوهات العمود الفقري تحدث نتيجة عدة عوامل منها البيئة الاجتماعية والبيولوجية في الأسرة والبيئة المدرسية . ذلك أن العوامل البيئية التي يعيش فيها الطالب وهي درجة تعليم الابوين ومستوى دخل الأسرة ودرجة الازدحام وكذلك مدى ملائمة أثاث الفصل الدراسي تؤثر تأثيراً واضحاً على انتشار التشوهات .		
5371	12403361	المهاري للاعبى كرة القدم	طارق عبد المنعم على			1998م	يعد التدريب المهاري والخططي أحد الأركان الأساسية لتشكيل الحالة التدريبية وبلوغ الفورمة الرياضية، حيث تتكامل مكونات التدريب البدني مع كل من التدريب المهاري والخططي في إعداد لاعبي كرة القدم، وتتحدد فاعلية التدريب الخططي وتطوير قدرة اللاعب على تنفيذ الواجبات الخططية على مستوى الأداء البدني والمهاري بصفة أساسية (٤) (٩) (وإنجاز الأداء المهاري خلال المباريات ليس بمنعزلاً عن الأداء الخططي أو (٢٧) ، (٣١) البدني، وتنفيذ الخطط الهجومية والدفاعية الفردية منها أو الهجومية يتم إنجازها من خلال تحركات واعية ومستمرة بدون كرة ومهارات متقنة بالكرة لإتاحة فرص أكثر أمام اللاعب لتركيز انتباهه وتوجيه فكره نحو تنفيذ خطط اللعب والسيطرة على الموقف اللعبي، وتشير المعطيات الخاصة بدراسة وتحليل النشاط الحركي للاعبى المستويات العالية خلال المباراة في كرة القدم إلى أن ٩٨ ٪ من إجمالي المسافة المقطوعة خلال التسعين دقيقة (زمن المباراة) هي تحركات بدون كرة تتم في علاقات متبادلة مع الزملاء لتنفيذ الأداءات المهاريّة والخططيّة، فعل حركي بالكرة منها ٣٥٠ تمريره من لمسة : كما يتم إنجاز حوالي من (٩٠٠) ١٠٠٠ واحدة و ١٥٠ بعد الللمسة الأولى (لمستين) وباقى التمريرات بعد الجري بالكرة لفترات قد يتخللها أداءات مهاريّة أخرى، وأظهرت هذه الدراسات أيضاً أن إنجاز نوبات الهجوم تتراوح تصويبات تقريباً : ٣٠ ، هجمة والتصويب على المرمى يتراوح ما بين ٧ : ما بين ١٦ ١٠ لاعبين ب ١ : وتستغرق نوبة الهجوم الواحدة أقل من ٢٥ ثانية ويشترك فيها من ٢ ٦ : تمريرات (٢٨) ، ونؤكد هنا على أهمية تروابط تمرينات الإعداد المهاري والخططي عند تنفيذها، ولذا يفضل توفير البيئة المناسبة لتعليم وتدريب اللاعب من البداية على المهارات المختلفة بحيث نتيج له فرص الإدراك (الزمني والمكاني) والابتكار وحسن التصرف في المواقف من خلال علاقه بالزملاء والخصوم والكرة واستغلال المساحة المحددة للأداء، فالتمرير باعتباره أكثر المهارات تكراراً خلال المباراة على سبيل المثال يجب أن يتعلمه اللاعب من البداية من خلال ارتباطه بالحركة قبل الأداء لتحقيق عنصر السرعة والسيطرة والحركة بعد الأداء بالجري للمكان الحالي أو لمكان الزميل لتبديل المراكز لاستغلال المساحات الخالية، لتحقيق المبادئ الأساسية الخططية (المقدرة على التحرك. خلق المساحات- المساندة.. إلخ) مرتبطة بالأداء المهاري من البداية لتصبح عادة راسخة وسلوك يتميز به أداء اللاعب خلال المباراة. العمل على تحسين الأداء المهاري والخططي للاعب الارتكاز بكرة القدم من خلال التدريب المستمر المبني على الأسس العلمية. اعتماد مبدأ تحليل المباريات سواء المحلية منها أو غيرها ومناقشتها للفرق على مستوى أداء لاعبي الارتكاز للفريق. وبشكل مستمر يؤدي إلى تطوير المستوى المهاري والخططي وتصحيح الأخطاء، والاعتماد على التقييم الموضوعي من قبل المدربين لكل منافسة يشترك فيها الفريق المشارك في دوري النخبة والاستفادة من استمارات التقييم المعدة من قبل الباحث العمل على تطوير التهديد بالقدم أو الرأس بأساليب وطرق مختلفة ومن مناطق مختلفة ، إذ أنها الغاية الرئيسية. والأساسية لكل فريق		

						هدفت الدراسة إلى التعرف على العلاقة التنبؤية بين طول الطرف العلوي وطول الطرف السفلي للجسم ومدى تأثيرها على سرعة تعلم السباحة للأطفال (من 6، 7، 8) سنوات. استخدم المنهج الوصفي، وبلغت حجم العينة المختارة 257 طفلاً. توصلت الدراسة إلى أن للقياسات الجسمية أثر إيجابي في تعليم السباحة للأطفال في المرحلة السنية (6، 7، 8) سنوات. زيادة نسبياً طول الذراع (الطرف العلوي للجسم) تؤثر بصورة إيجابية على سرعة تعلم سباحة الزحف على البطن وليس لها تأثير ملحوظ في سرعة تعلم سباحة الصدر لتلك المرحلة. زيادة نسبياً طول الرجل (الطرف السفلي للجسم) تؤثر بصورة إيجابية على سرعة تعلم سباحة الصدر وليس لها ملحوظ في سرعة تعلم سباحة الزحف على البطن للمرحلة السنية (6، 7، 8) سنوات.	جمال، عادل فوزي د.محمد حسن علاوي
5372	12406305	العلاقة التنبؤية بين طول الطرف العلوي وطول الطرف السفلي للجسم ومدى تأثيرها على سرعة تعلم السباحة للأطفال/	عبدالعنى، باسم سعيد محمد.		2001م	تتلخص أهداف البحث فيلا : أولاً : التعرف على مدى فاعلية الضربة الساحقة كمهارة هجومية في مباريات الكرة الطائرة . ثانياً : التعرف على مدى فاعلية الضربة الساحقة كمهارة هجومية لإحراز النقاط في مباريات الكرة الطائرة . ثالثاً : التعرف على مدى فاعلية الضربة الساحقة كمهارة هجومية للفوز بالإرسال في مباريات الكرة الطائرة . منهج البحث : الملاحظة الموضوعية المباشرة لأحداث اللعب في المباريات التي تم اختيارها لإجراء البحث والدراسة عليها ، وقد استخدم الباحث أجهزة التسجيل لنقل أحداث اللعب مستخدماً الوصف التعبيري وفقاً للمصطلحات الفنية للعبة تمهيداً لتفريغها وحصرها وتصنيفها باستخدام بعض الرموز الفنية في الاستمرات التي صممت لذلك لاستخلاص النتائج . استخدم الباحث المعادلات والاختبارات الإحصائية لتحليل البيانات والنتائج لزيادة دعم النتائج باستخدام الأسلوب العلمي الإحصائي . وبعد معالجة النتائج إحصائياً وعند مستوى معنوية 0.05 أسفرت النتائج عن صحة الفروض بأن : 1- الضربة الساحقة تتفوق في أهميتها الهجومية على باقي المهارات الهجومية الأخرى في الكرة الطائرة . 2- الضربة الساحقة كمهارة هجومية لها أثر واضح في إحراز الفوز بالنقاط في مباريات الكرة الطائرة . 3- الضربة الساحقة كمهارة هجومية لها أثر واضح في الفوز بالإرسال في مباريات الكرة الطائرة .	
5373	12406740	أهمية استخدام مباراة الضربة الساحقة في مباريات الكرة الطائرة	محمد، محمد عبد الحميد		1972م	تتناول هذا البحث دراسة مسحية لوسائل العلاقات العامة في الدورات الأولمبية ، كما تناول أيضاً آراء الرياضيين ورجال العلاقات العامة نحو تقديمهم لوسائل دون أخرى ، وتعد هذه الدراسة من نوع الدراسات المسحية التي تهدف إلى الكشف العلمي عما هو كائن بالفعل ، وتحقيق ذلك قام الباحث بالخطوات التالية: أولاً: أهداف البحث : حدد الباحث أهداف البحث في أنها محاولة التعرف على أكثر وسائل العلاقات العامة تأثيراً وإفادة في الدورات الأولمبية . ثانياً: أهمية البحث : حدد الباحث أهمية البحث من ناحية أنه يعد من البحوث المستحدثة في هذا الميدان . ملخص النتائج: 1- (أي لا توجد فروق إحصائية) وسائل اتفق معها كل من المحكمين الرياضيين ومحكمو العلاقات العامة -1 وسائل اختلف معها كل من المحكمين الرياضيين ومحكمو العلاقات العامة إحصائياً-2	د.محمد محمد فضالي
5374	12406758	العلاقات العامة في الدورات الأولمبية	عبد الخالق، حسام رفقي محمود		1974م	تتحدد الدراسة في أن أسلوب انتقاء الطلاب للمعاهد العليا يتحدد في : 1- هل تسهم بعض سمات الشخصية في النجاح في المعاهد العليا للتربية الرياضية. 2- هل تقترب بعض سمات الشخصية لطلاب المعاهد العليا في بعض سمات الشخصية لمدرس التربية الرياضية الناجح في مهنة التدريس ومشكلة البحث 1- اختبارات طبية 2- اختبارات قوام 3- اختبار قدرات بدنية br و ترجع أهمية البحث: 1- تتعدد مجالات مهنة التربية الرياضية حيث تشمل التربية والتعليم و الاندية الرياضية و المنظمات الرياضية و منظمات الشباب و المؤسسات الصناعية 2- قيام مدرسي التربية الرياضية بادوار مادية في المجتمع 3- قصور الوسائل المستخدمة حالياً في مصر لانتقاء طلاب المعاهد و عدم شمولها للوسائل التي تكشف عن سمات الشخصية.	
5375	12406873	دراسة بعض سمات الشخصية والمويل المرتبطة بالتفوق في المعاهد العالية للتربية الرياضية/	حسن، محيي الدين عبد الجليل		1974م	يهدف البحث الى التعرف على علاقة مستوى الاداء البدني والمهاري بالسمات الانفعالية للاعبين كرة اليد وقد استخدم الباحث المنهج الوصفي وتم اختيار عينة البحث بالطريقة المعديّة من لاعبي كرة اليد على مستوى محافظة الدقهلية للمرحلة السنية تحت 20 سنة للموسم الرياضي 2013/2014 وقد بلغ مجتمع البحث 156 لاعب وأشارت اهم النتائج الى ان مستوى الاداء البدني والمهاري للاعبين كرة اليد له تأثير ذو دلالة احصائية على مستوى السمات الانفعالية للاعبين ومن اهم التوصيات br - الاهتمام بتنمية مستوى الاداء البدني والمهاري للاعبين كرة اليد حيث ان ذلك له تأثير ايجابي على مستوى تنمية السمات الانفعالية للعمل على تنمية المستوى البدني والمهاري جنباً الى جنب دون الاهتمام باحداهما مما يؤدي الى افضل نتيجة تنمية السمات الانفعالية للاعبين br - ضرورة قيام الاحصائي النفسي الرياضي بتنمية وتطوير السمات الانفعالية للاعبين كرة اليد مع الاهتمام بالتعرف على نواحي القوة والضعف وملاحظة تطورها ومواصلة تقييمها مع تسجيل معدلات كل لاعب br - التأكيد على كل ممكن الاحصائي النفسي الرياضي واللاعب بان السمات الانفعالية تحتاج الى تدريب متواصل حتى تصل الى المستوى الذي يمكن به توظيفها في المواقف التنافسية.	د.أسامة عبدالرحمن علي - د.عمرو عبدالفتاح حسين - د.أحمد اليومي علي اليومي
5376	12407411	علاقة مستوى الاداء البدني والمهاري بالسمات الانفعالية للاعبين كرة اليد /	النجولي، منى السيد عبد الحميد		2014م	يرى الباحث ان اسلوب الامور في درس التربية الرياضية قد لايفي بكل متطلبات تحقيق الاهداف التعليمية والتربوية للدرس حيث انه يقلل الى حد كبير من القدرات الخاصة والادابية لدى التلاميذ ويلقى بكل المسؤولية على المعلم الذي قد لايستطيع التوفيق بين مسئولية التنظيمية والاشرافيه وبين تنفيذ مايتضمنه من محتوى تعليمي وتربوي br الامر الذي دعالي ضرورة البحث عن استخدام اسلوب اخر تعليمي لتنفيذ بعض اجزاء محتوى الدرس بالشكل الذي يظهر فاعلية التلميذ وقدرة الخاصة والمبدعة ويوفر في نفس الوقت جهد وطاقة المعلم وعدم تشتيته بين ماهو تنظيمي واشرافي وماهو تعليمي وتربوي br وقد وقع اختيار الباحث على اسلوب من اساليب التدريس(التطبيق الذاتي متعدد المستويات) نظرا لسهولة تنفيذه وتطبيقه من واقع وظروف وامكانات الرياضة المدرسية بشكل خاص وكذلك ظروف وواقع المدرسة الكويتية بشكل عام.	
5377	12407428	فاعلية استخدام أسلوب التطبيق الذاتي متعدد المستويات على أداء بعض مهارات الكرة الطائرة لدى تلميذات الحلقة الثانية من التعليم الأساسي/	موسى، هاجر عبد الله المغربي أحمد		2015م	من نتائج البحث نستنتج الآتي: br - هناك فروق دالة احصائية في التحصيل المعرفي على تعلم بعض مهارات ألعاب القوى بين المجموعة التجريبية والمجموعة الضابطة في القياس البعدي لصالح المجموعة التجريبية والتي تعلمت باستخدام أسلوب الاكتشاف الموجه. br - هناك فروق احصائية في المستوى الرقمي في تعلم بعض مهارات ألعاب القوى بين المجموعة التجريبية والمجموعة الضابطة في القياس البعدي لصالح المجموعة التجريبية والتي تعلمت باستخدام أسلوب الاكتشاف الموجه. br - حقق أسلوب الاكتشاف الموجه تقدماً أكثر من الأسلوب المعتاد في معدل التحسن لكل من التحصيل المعرفي والمستوى الرقمي لتعلم بعض مهارات ألعاب القوى للأطفال بدولة الكويت .	د.عماد أبو القاسم محمد علي - د.مصطفى النوري محمد عمر
5378	12407447	تأثير استخدام أسلوب الاكتشاف الموجه على تعلم بعض مهارات ألعاب القوى للأطفال في دولة الكويت/	الحسيني، ناصر عبدالله جاز الله		2013م	الاستنتاجات : في حدود عينة البحث وخصائصها والمنهج المستخدم ، ووفقاً إلى نتائج التحليل الإحصائي أمكن الباحث التوصل إلى الاستنتاجات التالية : توجد فروق دالة إحصائية بين القياس القبلي والبعدي للمجموعة التجريبية باللقاء الحديث في المستوى البدني - المهاري لصالح القياس البعدي . التوصيات: في ضوء نتائج البحث واستنتاجاته يوصي الباحث بالتالي : 1- (بدني - مهاري) يجب عند التخطيط للبرامج التدريبية تحديد وتقنين الأحمال التدريبية بما يتناسب مع أهداف كل مرحلة -1 استخدام طريقة الدمج بين عناصر اللياقة البدنية (قوة - سرعة - تحمل) تبعاً لأهداف كل مرحلة من مراحل التدريب -2	د.محمد محمد أحمد الضهوراي د.هشام صابر علي سالم د.نعم محمد فوزي - د.وليد أحمد سيد .

د.فتحى عبدالقادر صالح - د.أحمد محمد الربوي .		استهدفت الدراسة الحالية تقصي أثر تفعيل استراتيجيات الاحتفاظ بالمعلومات باستخدام التعلم الإلكتروني على التحصيل الدراسي والاحتفاظ بالمعلومات في مقرر ألعاب المضرب (1) بكلية التربية الأساسية في دولة الكويت ، وبناء عليه حاولت الدراسة الإجابة على السؤال الرئيسي التالي : ما إمكانية الاستفادة من التعلم الإلكتروني في تفعيل استراتيجيات الاحتفاظ بالمعلومات في مقرر ألعاب المضرب (1) فصل كرة الطاولة بكلية التربية الأساسية في دولة الكويت مقارنة بالطريقة التقليدية؟	2010م		حيات، حسين صالح جوه	تفعيل استراتيجيات الاحتفاظ بالمعلومات باستخدام التعلم الإلكتروني في مقرر ألعاب المضرب (1) بكلية التربية الأساسية في دولة الكويت /	ماجستير	12407472	5380
د.موسى محمد النبهان - د.جمال الدين الشامي .		وقد أظهرت النتائج لهذه الدراسة تحقق صحة الفرض الأول الخاص بتفعيل استراتيجيات الاحتفاظ بالمعلومات والتذكر على تحصيلهم ، حيث زادت الاستراتيجيات من مستوى تحصيل الطلاب الأكاديمي مقارنة بالطريقة التقليدية ، وكان متوسط المجموعة التجريبية يزيد عن متوسط المجموعة الضابطة مع وجود فروق دالة إحصائية لصالح المجموعة التجريبية . كما أظهرت النتائج صحة الفرض الثاني الخاص بتفعيل استراتيجيات الاحتفاظ بالمعلومة والتذكر على زيادة الاحتفاظ بالمعلومات مقارنة بالطريقة التقليدية ، حيث زادت الاستراتيجيات من مستوى الاحتفاظ بالمعلومة، وكان متوسط المجموعة التجريبية يزيد عن متوسط المجموعة الضابطة مع وجود فروق دالة إحصائية لصالح المجموعة التجريبية .	2010م		دشتي، حسين علي أحمد	المهارات القيادية والقدرات الإبداعية لدى طلاب المرحلة الثانوية المنتسبين وغير المنتسبين للنشاط الكشفي في دولة الكويت/	ماجستير	12407519	5381
		خاتمة الدراسة : يتناول هذا الفصل عرضاً موجزاً لمخلص الدراسة الحالية ، من خلال تعرف القاريء على أهم الجوانب الأساسية التي تمت مناقشتها في الدراسة بما في ذلك النتائج التي تم التوصل إليها بالإضافة إلى عرض لأبرز التطبيقات التربوية والبحوث المقترحة . أهم النتائج التي توصلت إليها الدراسة الحالية : توجد فروق دالة إحصائية عند مستوى (0.01) بين متوسط أداء الطلاب المنتسبين للنشاط الكشفي ومتوسط أداء -1 أقرانهم الطلاب غير المنتسبين للنشاط الكشفي نحو أبعاد المهارات القيادية (المكانة الاجتماعية ، روح المشاركة ، المقدرة (تحمل المسؤولية توجد فروق دالة إحصائية عند مستوى (0.01) بين متوسط أداء الطلاب المنتسبين للنشاط الكشفي ومتوسط أداء أقرانهم -2 الطلاب غير المنتسبين للنشاط الكشفي نحو أبعاد القدرات الإبداعية (المرونة ، الأصالة ، التفاصيل) ، بالإضافة للمجموع الكلي . توجد فروق دالة إحصائية عند مستوى (0.01) بين متوسط أداء الطلاب المنتسبين للنشاط الكشفي نحو مهارة المقدرة -3 فقط والمقدرة من مقياس المهارات القيادية باختلاف فترة الانتساب ، وذلك لصالح أداء الطلاب الذين لديهم خبرة طويلة في الانتساب للنشاط الكشفي . توجد فروق دالة إحصائية عند مستوى (0.01) بين متوسط أداء الطلاب المنتسبين للنشاط الكشفي نحو كل من فترة -4 الطلاقة والأصالة والمجموع الكلي . يمكن التنبؤ بأداء الطلاب المنتسبين للنشاط الكشفي نحو مهارة "المقدرة" المقترعة من مقياس المهارات القيادية ، من -5 خلال أدائهم نحو فترة "الأصالة" المقترعة من مقياس القدرات الإبداعية . لا يمكن التنبؤ بأداء الطلاب غير المنتسبين للنشاط الكشفي نحو أي مهارة من المهارات القيادية من خلال أدائهم نحو -6 مقياس القدرات الإبداعية .							
د.رشيد عامر محمد عامر - د.علاء الدين إبراهيم صالح .		إن السياسة العامة للدولة ترى أن المنتج النهائي للتعليم في الوطن مازال في حاجة إلى قدر كبير من التطوير والتحديث وصولاً إلى الأفاق المرجوة من الجودة والكفاءة حتى يحقق التعليم أهدافه الرئيسية التي تتفق مع روح العصر. br ولكي يحقق التعليم أهدافه المرجوة للحد والمجتمع فلابد من تنفيذ توجيهات رئيسية br لسياسة التعليم من بينها تطوير المناهج التعليمية وأساليب التدريس للمراحل التعليمية المختلفة. مشكلة البحث وأهميته: br إن الإهتمام المتزايد بالمناهج يأتي نتيجة الاعتقاد الراسخ بأهميتها ودورها في عملية br التغيير الثقافي والإجتماعي ، ونتيجة تغير المفهوم حول دور المدرسة والمنهاج المدرسي، فلم يعد الدور مقتصراً على نقل المعارف والمعلومات بل يلعبان دوراً هام في عملية التغيير والتطوير الإجتماعي. br وتركز التربية الرياضية في المدرسة الثانوية على التربية عن طريق اللعب التي br تؤكد على المهارات التنافسية ومهارات الرياضة طوال الحياة ، والمدخل الأكثر حداثة في تطوير المنهاج هو الموجه نحو هذه العملية ، والذي يؤكد على تعلم المفاهيم المرتبطة بالحركة وكذلك تعلم مهارات الحركة الممنوعة ، ويؤكد المدخل الإنساني في التربية الرياضية على استخدام الحركة لتحقيق الأهداف الوجدانية، هذا فضلاً عن الإهتمام بتنمية القيم والأخلاق. br ونظراً لعمل الباحث مدرساً للتربية الرياضية بالمرحلة المتوسطة - بدولة الكويت ، وإطلاعاً على المقررات الدراسية الحالية لمنهاج التربية الرياضية للمرحلة المتوسطة ، وجد الباحث قصوراً في المنهاج وعدم تطويره منذ أن تم وضعه في ، وذلك إسترشاداً بمنهاج التربية الرياضية لوزارة التربية والتعليم . ولأن هذه المرحلة تعقب المرحلة الابتدائية والتي يكتمل فيها نضج التلاميذ br بندياً وعقلياً ونفسياً، ويتطلع التلاميذ في هذه المرحلة إلى رسم خطط مستقبلية فكرية وحسية. ونظراً للتطور الذي طرأ على مجتمعنا الإسلامي المصري من تطورات تكنولوجية وإنتتاح على العالم بطريقة بها تأثيرات سلبية،لذلك يجب الإهتمام بالتلاميذ وتعديل سلوكياتهم وتوجيهها إلى الإتجاه الصحيح بعيداً عن الانحراف السلوكي والأخلاقي ، وتنمية الإتجاهات الإيجابية والمفاهيم br المعرفية المرتبطة بممارسة الأنشطة البدنية في ضوء تعليم الدين الإسلامي الحنيف.ومجال التربية الرياضية مجال خصص لتحقيق القوة الحسنة في القول والفعل والتربية على القيم والمثل الطيبة المنبثقة من تعاليم الدين الإسلامي،وترجمة ما يتلقاه التلاميذ إلى سلوك عملي في حياتهم، والقدرة على تنمية التفكير و الابتكار والإبداع ، ويجب الإهتمام بالثقافة الرياضية وإضافة ما هو جديد من قواعد وممارسات مسحية وتغذية سليمة وتدريب منتظم وفوائين ممارسة الأنشطة الرياضية وتنمية المعارف والمعلومات الرياضية حيث يلم التلميذ بجميع احتياجاته بدنية ومعرفية وصحية ونفسية.	2008م		المطيري، جاسم محمد جازع عبدالهادي	مناهج التربية الرياضية للمرحلة المتوسطة في دولة الكويت وجمهورية مصر العربية (دراسة مقارنة)/	ماجستير	12407544	5382
د.محسن محمد درويش حمص - د.محمد حسين محمد عبد المنعم		ملخص البحث :	2011م		أحمد، نورهان السيد أحمد	تأثير برنامج تأهيلي على تطوير الكفايات المعرفية و الادائية لمعلمي التربية الرياضية /	ماجستير	12407568	5383
		تعد الكفايات التعليمية والتدريبية احدى الجوانب الرئيسة لتقويم الأداء المهني وان امتلاكها لها تظهر لنا مؤشرات إمكانية تقويم غير مباشر لبرامج إعداد المعلمين ومن ثم تطوير الملية التعليمية بشكل عام، هدفت الدراسة الحالية إلى تحديد الكفايات التعليمية لدى مدرسي ومدرسات التربية الرياضية للمرحلة المتوسطة وتحديد الأهمية النسبية لكل منها، استخدم الباحثون المنهج الوصفي بالأسلوب المسحي لامتلائمه طبيعة المشكلة وقد ضم مجتمع الدراسة مدرسي ومدرسات التربية الرياضية لمرحلة الدراسة المتوسطة في محافظات الفرات الأوسط ، وتم اختيار عينة عشوائية من المجتمع الأصلي للدراسة قوامها (120) مدرس ومدرسة للتربية الرياضية في المحافظات المذكورة . قام الباحثون ببناء أداة الدراسة المتمثلة بالاستبيان الذي احتوى (50) فقرة موزعة على (5) مجالات هي (كفايات الأهداف لدرس التربية الرياضية ، كفايات التنظيم ، كفايات التنفيذ، كفايات طرائق التدريس، كفايات التقويم) تم تطبيقها على أفراد عينة الدراسة . وقد استخدم الباحثون الوسائل الإحصائية المناسبة لتفسير النتائج . وقد خرجت الدراسة باستنتاجات عدة تم في ضوئها إعلان عدد من التوصيات منها: 1- تكثيف الدورات التدريبية من قبل الاختصاصيين التربويين كمنادج تطبيقية لتطوير كفايات المدرسين والمدرسات - 2- حت الاختصاصيين التربويين على التنمية الأكاديمية والمهنية ذاتياً لأهميتها وارتباطها بالنمو المهني للمدرس - 3- تفعيل نظام التدريب أثناء الخدمة للمدرسين والمدرسات لتطوير كفاياتهم التدريسية - : العريف بالبحث -							

المقدمة وأهمية البحث 1-1 :

لقد تضاعف النمو المعرفي والعلمي مرات عدة في العقود القليلة الأخيرة من القرن ، ولم تقتزن الثورة العلمية بالنواتج النظرية فقط ، بل تعدتها إلى المجالات التطبيقية والعلمية . ولم تكن التربية بمعزل عن هذه التغيرات التي حدثت ، بل أسهمت بها وسعت إلى الاستفادة منها والتفاعل معها من أجل إحداث التغيير المرغوب في سلوك الفرد ، والعمل على إيجاد مفاهيم حديثة تتفق ومع التقدم العلمي ، والانفجار المعرفي الهائل في إثراء خبرات ومهارات القائمين على التعليم حتى يتمكنوا من التأثير ايجابيا في سلوكيات المتعلمين . ولما استحالت حدوث مثل هذا التغيير إلا بتعليم جيد ونوعي ، فقد سعت التربية الحديثة إلى الاهتمام بالهيكل التعليمي ليصبح أكثر مرونة واستجابة للتغيرات السريعة وتدريب المدرسين على قبول هذا التغيير ، وهذا يتطلب التجدد المستمر لمعلومات المدرسين والطلبة على حد سواء في مختلف مستويات التعليم ومراحله .ومواكبة للتقدم والتطور التكنولوجي للعالم من أجل الاستغلال الأمثل لموارد البشرية والطبيعية المتاحة ، اتجهت الانظار إلى الاستعانة بالعلم وتسخير مفرداته بكافة القوات ، وذلك لمواكبة خطوط التنمية المتصاعدة ، وتوفير الكوادر المتخصصة التي يحتاج إليها البناء والتقدم الحضاري ، وكون المدرسة تعد النواة الأساسية في بناء المجتمع فإن الاهتمام بالمدارس وتزويجها وبكافة مراحلا بمدرسين مدرين وموهلين تربويا وعلميا وفق أفضل الأساليب الحديثة وانجحها . وبدأ بذلك الاهتمام بإعداد المدرس وتدريبه على فهم تغيرات العصر والتكيف مع الدور الجديد الموكل إليه ، فقد عد المعلم رسولا للثقافة وداعيا من دعاة الإصلاح والتجديد والإبتكار ، والتطوير فعلى عاتقه تقع مسؤولية إعداد الأجيال القادمة ورعايتها وتربيتها وتوجيهها ، فالمعلمية التعليمية ليست بذات قيمة إذا خلا ميدانها من المدرس الكفء القادر على تحمل مسؤولياته ، فتخصصية المدرس وكفاياته التعليمية ودافعيته وتمكنه من مادة تخصصه ، وأسلوبه في تنظيم البيئة التعليمية الملائمة تتوقف على البرامج التدريبية التي يتلقاها لاكتساب المهارات الخاصة بطرق التدريس . يتوقف دور المعلم في أي نظام تربوي على مجموعة من العوامل المتداخلة التي تشكل الإطار المرجعي لمفهوم العملية التربوية ومهما اختلفت المفاهيم لدور المعلم ، فإنه يبقى عاملا حاسما في إنجاح العملية التربوية أو إفشالها ، ذلك لأن وظيفة المعلم لم تعد عملية ميكانيكية تقتصر على نقل المعرفة إلى المتعلمين ، بل انه يمثل الأداة الفاعلة في إنماء قدرات المتعلمين العقلية ، والاجتماعية ، والجسمية ، وتطوير شخصياتهم بصورة عامة .

إن تعزيز كفاية المعلم وظيفية موضوعية ، وأداة ومنهج علمي يهدف إلى إصدار أحكام على مدى تحقيق العملية التربوية لأهدافها وأغراضها . وتظهر أهمية تعزيز المعلم في الكشف عن تأثير المعلم في العملية التربوية . وكشف نواحي القصور إن وجدت ، واقتراح الوسائل المناسبة والعمل على تحقيق الأهداف التربوية والتعليمية .

تعد الكفايات التعليمية والتدريبية أحد الجوانب الرئيسية لتقويم الأداء المهني للمعلم وتوافر الكفايات التدريبية ، وتمكن المعلم منها تظهر لنا مؤشرات إمكانية تقويم غير مباشر لبرامج إعداد المعلمين . ويعد المشرفون والاختصاصيون التربويون والمدرسون الأوائل أصحاب الخبرة الميدانية في إبراز الكفايات التدريبية لدى مدرسي ومدرسات التربية الرياضية لمرحلة الدراسة المتوسطة .

مشكلة البحث 1-2 :

إن المدرس هو المنظم والمسير لعملية تعليم الطلبة ، إذ يتأثر الطلبة بأي برنامج تعليمي وإبداعي من خلال المدرس ، لذا يمكن القول إن فاعلية المؤسسات التعليمية تعتمد اعتمادا مباشرا على كفاية العاملين بها ، لذا فإن رفع كفاية المدرس هدف من أهداف المؤسسة التربوية وتعد الكفايات التعليمية من المتطلبات الأساسية للمدرسين ، وذلك من أجل نجاح العملية التعليمية ، لذا اهتمت كثير من الدراسات في المجال التربوي والرياضي بدراسة الكفايات التعليمية لدى المدرسين . ويرى الكثير من خبراء التربية الرياضية إن القائمين على تدريس التربية الرياضية في مرحلة الدراسة المتوسطة يجب أن يمتلكوا الكفايات التعليمية اللازمة لتدريس المهارات الرياضية المختلفة ، لذا لا بد ن توافر كفايات تعليمية أساسية لدى مدرس التربية الرياضية في مرحلة الدراسة المتوسطة تؤهله لأن يقوم بدوره بكفاية وفاعلية ، إضافة إلى الكفايات الشخصية ، لا شك إن أملك المدرسين للكفايات التعليمية سيمضي قدراتهم ويثري خبراتهم ويساعدهم على تحقيق الأهداف التربوية ، ضمن الإطار الذي يسهل تلبية حاجاتهم ، لذلك فإن الكشف عن مدى توافرها لديهم أمر بالغ الأهمية ، لأنه سيساعد على تحديد نقاط الضعف والقوة لديهم ، ومن ثم معالجتها .

من خلال احتكاك الباحثين بالوسط التربوي فقد لاحظوا وجود ضعف في أداء مدرسي التربية الرياضية ، الأمر الذي حثهم على هذه الدراسة لتحديد الكفايات التعليمية التي يجب أن تتوفر لدى مدرسي التربية الرياضية في هذه المرحلة الدراسية خاصة وللمراحل الدراسية بصورة عامة ، لمساعدة المدرس في إتقان تدريس التربية الرياضية ، لما لهذه المرحلة الدراسية من أثر بالغ في تنمية شخصية الطالب تنمية شاملة مترنة ن جميع نواحي الحياة المختلفة ، على ذلك يساعد في رفع مستوى كفاياته في أدائه ، والذي يتضح أثره في العملية التربوية ككل .

أهداف البحث 1-3 :

يهدف الدراسة الحالية إلى :

تحديد الكفايات التعليمية لدى مدرسي ومدرسات التربية الرياضية للمرحلة المتوسطة -1

. تحديد الأهمية النسبية لكل كفاية من هذه الكفايات -2

: الإطار النظري والدراسات المشابهة -

: الإطار النظري 1-1 -

: الكفايات التدريبية 1-1-1 :

مجموعه من القدرات وما يرتبط بتا من مهارات ، والتي يفترض إن المعلم يمتلكها بما يمكنه من أداء مهامه ودواره ومسؤولياته خير أداء مما ينعكس على العملية التعليمية ككل ، وخصوصا من ناحية نجاح المعلم ، وقدرته على نقل المعلومات إلى تلاميذه وقد يقوم المعلم بذلك عن طريق التخطيط والأعداد للدروس وغيره من الأنشطة اليومية والتطبيقية ، مما يتضح في السلوك والأعداد الفعلي للمعلم داخل الصف وخارجه ، (1 : 31) .

يحتاج النظام التعليمي إلى مراجعة بين الحين والآخر من أجل تطويره عن طريق تحسين كفاياته الداخلية باختيار مختلات أفضل وتنظيم أفضل بخبرات أكثر ملائمة مع الواقع لكي يأتي مخرجات هذا النظام على مستوى الملموحات التي يتوقعها المجتمع مع النظام التربوي (7 : 73) .

وقد سلك المسؤولون لغرض تحقيق تلك الطرائق المختلفة فقاموا بأعداد المعلمين في أول الأمر على افتراض أكاديمي مفاده ، إن إعداد المعلمين يقوم على تقديم نموذج معرفي يتفق مع المواد الدراسية ، ولكن هذا النموذج ظل قاصرا أمام المسؤولية الحقيقية ، للمعلم ، فاضافوا إلى الافتراض الأول مجموعة من المساقات النظرية في موضوعات تربوية ونفسية ولكن هذه البرامج ظلت غير فعالة في أعداد معلمين أكفاء ، فتطور الافتراض إلى تقديم نموذج معرفي ومساقات نظرية وعملية ، ولكن هذه البرامج بقيت ليست هي الأفضل في إعداد المعلمين وتأهيلهم ، فادركوا أهمية تعرف المتغيرات الرئيسية المؤثرة في تربية المعلمين ، وأخيرا تنبّه المسؤولون التربويون إلى أهمية اتباع أسلوب التدريب وتحليل المهارات الأساسية المكونة للمهنة وهكذا وجب الاهتمام إلى وجود برامج جديدة لتدريب المعلمين يقوم على الكفايات الأساسية اللازمة لمهنة التعليم ، ويذكر (سعادة إبراهيم 2001) إن الأدبيات والأبحاث التي تمت في إطار الكفايات أخذت أربع جوانب لغرض تحديد الكفايات اللازمة لأداء تدريس فعال وهي :

. منحى أسلوب تحليل النظم واستخدام تقنياته في تحليل نظام العملية التعليمية لاستخلاص الكفايات اللازمة -1

منحى ملاحظة سلوك مجموعة من المعلمين الناجحين في عملية التدريس الفعال لاشتقاق الكفايات التعليمية لأعداد -2

منحى البحوث التربوية التي من شأنها أن تكشف عن المتغيرات أو العوامل التي تؤثر في عملية التعليم بصورة إيجابية -3

. لاشتقاق الكفايات التعليمية المطلوبة لإعداد المعلم الناجح .

						منحى التعرف على آراء وجهات نظر التربويين المشغلين بأعداد وتأهيل المعلمين لتحديد الكفايات التعليمية (3 : 78 - 4) . تمثل الكفايات التعليمية مجموعة من القدرات والمهارات التي يمتلكها المدرس ويمارسها في الموقف التعليمي لتمكنه من القيام بمهامه التعليمية بفاعلية وإتقان القدرة على تنفيذ النشاط التعليمي ، الذي يستند إلى مجموعة من الحقائق والمفاهيم والتعاليم والمبادئ التي تتضمن من خلال السلوك التعليمي الذي يصل إلى درجة المهارة . ويشير التربويون إلى ضرورة متابعة وتقويم جميع العاملين في المجال التربوي وبصورة مستمرة وذلك من أجل تأكيد القابليات والمهارات المعرفي لديهم وتدعيم نقاط القوة ومعالجة وتحقق عملية تقويم المعلم أهدافا متعددة منها : (6 : 23) . . رفع الكفايات التدريسية لدى المعلم وإحساسه بالثقة بالنفس والتأكد من نموه العلمي في مجال تخصصه -1 تقويم أعمال المعلمين : وتوجيههم بالمقارنة مع المعلمين الآخرين في المدارس الأخرى ، والعاملين في الأجهزة -2 . والدورات التدريبية المختلفة . وضع معايير تساعد المدرس على الارتقاء بمستوى تدريبه بالمقارنة بالتغيرات التي تحدث في المجتمع ، وضرورة -3 . مواكبة المدرسة لاحتياجات الطلبة ، والمجتمع والعصر الذي يعيشون فيه ، القدرة على الحكم لتأهيل المعلم لمراكز تربوية أعلى للترقية في الميدان التربوي ، وتعددت معايير تقويم كفاية المعلم -4 ويتمثل تقويم كفاية المعلم بناءاً على سلوك المعلم في ملاحظة السلوك الظاهري للمعلم ، بمعنى ملاحظة المهارات التدريسية للمعلم داخل الصف أن التقويم يجري كعملية تشخيصية فإذا كان تقويم المعلم منخفضاً فإن النتائج تشير إلى ما يعرفه أداء المعلم ، أو إخفاقه -5 . في عمله إن أنشطة التقويم منظمة بأسلوب زمني دقيق ، وملامت لتقويم أداء المعلم ، ويختلف التربويون في تحديد الكفايات ثم -6 الطريقة التي يتم من خلالها تحليل العملية التدريسية ، إلا أن هذا يعني عدم فاعليتها ، لإظهار مستوى أداء المعلم و قدراته التدريسية ومن ثم نقاط القوة والضعف في أساليب المعلم الذي يطبق الكفايات . وتمكن مجالات الكفايات المحاور الرئيسة . للعملية التربوية على الرغم من الاختلاف في تسمية هذه المجالات		
5384	12407844	ماجستير	فقه الدعوة الإسلامية والإعلام :	الصاوي، فاروق عبد الغني.	فاروق عبد الغني الصاوي ،	1981 . القاهرة : تتكون هذه الرسالة من المقدمة والتمهيد ، والتمهيد عبارة عن تعريف الاعلام ، ونشأة الاعلام ، واهمية الاعلام في العصر الحديث ، والاركان والمبادئ الاساسية في الاعلام والمعنى المقصود من الاعلام الاسلامي واخيراً أهمية الاعلام الاسلامي . وثلاثة ابواب . الباب الاول وهو (المودودي وجهاده الفكري والعلمي)وهو عبارة عن ثلاثة فصول ، الفصل الاول (عصر المودودي ونشأته) 1.تمهيد موجز عن تاريخ الاسلام بالهند-2. نسب المودودي ومولده ونشأته-2. الفصل الثاني (جهاد المودودي الفكري والعلمي) 1.مرحلة العاطفة الاسلامية-2 مرحلة الفهم الشامل والدعوة-3 مرحلة العمل التنظيمي للإسلام- الفصل الثالث (اصول الدعوة والفهم عند المودودي) 1.ارتباط المودودي بالكتاب والسنة-2 الاسلام نظام شامل للحياة-3 التخلص من سيطرة الثقافة الغربية- أما الباب الثاني فيتكون من فصلين الفصل الاول (حقل الاعلام ووسائله عند المودودي) الفصل الثاني (وسائل الاعلام والدعوة عند المودودي) والباب الثالث (تقويم الاعلام عند المودودي)ينقسم الى فصلين الفصل الاول (خصائص ومميزات الاعلام عند المودودي) الفصل الثاني (اثار اعلام المودودي)		
5385	12408272	ماجستير	تأثير استخدام برنامج للتدريب الخاصة على مستوى الاداء الفني لمسابقة المصدر للبراعم	شمس الدين، شمس الدين محمد محمود		2002م . تهدف هذه الدراسة إلى معرفة تأثير البرنامج التدريبي المقترح على تحسين زمن رد الفعل ودقة تسديد الكلمات لملاكمي الدرجة الثانية . br br أجريت الدراسة الإستطلاعية في الفترة من 1/ 7 /1987 إلى 5/ 7 /1987 وذلك للتأكد من صلاحية الأجهزة والأدوات المستخدمة في القياسات ، تحديد صلاحية صالة الملاكمة بنادي جمعية شبان المسلمين بالشاطبي لتطبيق البرنامج . br br تم إجراء الدراسة الأساسية على عينة من ملاكمي الدرجة الثانية من نادي الاتحاد السكندري ونادي جمعية الشبان المسلمين بالشاطبي قوامها (44) ملاكماً في الفترة من 15/ 7 /1987 إلى 15/ 10 /1987 وكانت اعصارهم تتراوح من (17 -20 سنة) . br br خضعت المجموعة التجريبية (22) لاعباً للبرنامج التدريبي المقترح لتحسين زمن رد الفعل ودقة تسديد الكلمات ، واخضاع المجموعة الضابطة (22لاعباً) للبرنامج التدريبي المطبق على ملاكمي الدرجة الثانية بالنادية . br br وتوصل الباحث إلى أن البرنامج المقترح يحسن كلاً من زمن رد الفعل ودقة تسديد الكلمات ، لذا يوصي الباحث بضرورة الإستمرار بالبرنامج التدريبي المقترح لتحسين زمن رد الفعل ودقة تسديد الكلمات . يعد قطاع الشباب بصفة عامة الثروة الحقيقية لأي مجتمع من المجتمعات إذا ما احسن استغلاله . وشباب الجامعة بصفة خاصة يمثلون شريحة خاصة وهامة داخل قطاع الشباب حيث إنهم يساهمون في تكامل عملية البناء الاجتماعي، وتقع مسئولية التربية والإعداد هنا على عاتق الجامعة باعتبارها أهم وسيط من وسائل التربية . إلى جانب أنها تزود طلابها بالمعلومات والمعارف لإعدادهم للمهن المختلفة فهي أيضاً تساهم في تنمية وعيهم في مختلف المجالات وبخاصة الوعي السياسي الذي تشير بحوث ودراسات عديدة في مجال التربية السياسية إلى وجود ضعف وانخفاض فيه وفي الممارسة السياسية والمشاركة السياسية لدى الشباب الجامعي ، وهو ما يتمثل في عدم إقبالهم على المشاركة في الحياة السياسية وعدم معرفتهم بالقضايا والأحزاب السياسية، وانخفاض الثقافة السياسية لديهم، وزيادة الإحساس بالاعترا ب والسلبية وانخفاض الإحساس بالانتماء والولاء للمجتمع .		
5386	12408410	ماجستير	تأثير برنامج تدريبي مقترح على تحسين زمن رد الفعل ودقة تسديد (الكلمات)	السيد ، عصمت إبراهيم غنفي		1989م . يعد قطاع الشباب بصفة عامة الثروة الحقيقية لأي مجتمع من المجتمعات إذا ما احسن استغلاله . وشباب الجامعة بصفة خاصة يمثلون شريحة خاصة وهامة داخل قطاع الشباب حيث إنهم يساهمون في تكامل عملية البناء الاجتماعي، وتقع مسئولية التربية والإعداد هنا على عاتق الجامعة باعتبارها أهم وسيط من وسائل التربية . إلى جانب أنها تزود طلابها بالمعلومات والمعارف لإعدادهم للمهن المختلفة فهي أيضاً تساهم في تنمية وعيهم في مختلف المجالات وبخاصة الوعي السياسي الذي تشير بحوث ودراسات عديدة في مجال التربية السياسية إلى وجود ضعف وانخفاض فيه وفي الممارسة السياسية والمشاركة السياسية لدى الشباب الجامعي ، وهو ما يتمثل في عدم إقبالهم على المشاركة في الحياة السياسية وعدم معرفتهم بالقضايا والأحزاب السياسية، وانخفاض الثقافة السياسية لديهم، وزيادة الإحساس بالاعترا ب والسلبية وانخفاض الإحساس بالانتماء والولاء للمجتمع .

5388	12408757	دكتوراه	/ Influence of protected and unprotected fat supplementation on postpartum productive and reproductive performance of high producing dairy cows	Abd-Allah,Atef Mohamed Saleem.	Atef Mohamed Saleem	ElMini a univer sity 2013 Two experiments were carried out in this study to evaluate the effect of fat supplementation (protected and unprotected)during the prepartum and postpartum periods or during the summer heat stress on milk production , milk composition , some blood metabolites and hormones of high producing Holstein dairy cows Experiment one: Effect of fat supplementation (protected and unprotected) during prepartum and postpartum periods on milk production ,milk components, some plasma metabolites and hormones , as well as reproductive performance of high producing dairy cows.	#####	Dr.M.A.Ayoub

							The results can be summarized as the following . 1- Dry matter intake (DMI) 2- Milk production ,milk composition , and feed efficiency: 3- Blood plasma composition : 4- Reproductive performance: Experiment 2 Effect of fat supplementation (protected and unprotected) during the summer heat stress on milk production , milk components ,and some plasma metabolites and hormone of high producing dairy cows. The results can be summarized as the following . 5- Dry matter intake (DMI) 6- Rectal temperature(RT) and respiration rate(RR): 7- Blood plasma composition : 8- Milk production ,milk composition , and feed efficiency:		
5389	12408886	الحصول على الدبلوم الأول في التربية الرياضية 1972م .	برنامج مقترح لالعاب القوى للمرحلة الابتدائية /	بدر ، سامية محمد حامد .		1972م	يتحرك البحث العلمي الآن في جميع الدول الأخذة بأسباب التقدم ليعطي أكبر قدر من المشاكل التي تتعرض تقدم دول العالم في مسيرتها نحو حياة أفضل ومستقبل أكثر إشراقاً بعد أن أصبح واضحاً أن العلم هو إحدى الوسائل الرئيسية التي تستطيع هذا العالم من التقدم والرفي . ومن الطبيعي أن يتركز اهتمام الباحث على ألعاب القوى فهي مادة التي يقوم بتدريسها بالمعهد العالي للتربية الرياضية للمعلمات بالجزيرة منذ سبعة أعوام . وهو بذلك يعيش مشاكلها ويهتم بها ويتتبع أرقامها علاوة على أن ألعاب القوى تساعد كل شخص يمارسها على اكتساب الصحة العضوية الجوية والثبات الانفعالي والوعي الاجتماعي .		د.عبدالمعظم محمود فياز
5390	12408897	الحصول على الدبلوم الأول في التربية الرياضية 1972م .	تقييم طرق تعليم المهارات الحركية في كرة اليد/	محمود، ليلى لييب		1972م	تعتبر كرة اليد أحد الأنشطة الرياضية التي تساعد على تحقيق أهداف التربية الرياضية ، فهي تعمل على تقوية جميع أجزاء الجسم عامة وعضلات الرجلين والكفين والذراعين واليدين خاصة - حتى الأصابع وذلك عن طريق الرمي والتلف . وتنتمي كرة اليد قوة التحمل والسرعة بصورة مباشرة عن طريق الجري والحركات السريعة الأخرى مثل التقف والتقف والرمي . كما تنتمي التوافق الحسلي العصبي وذلك عن طريق التمرير والتصويب والتنطيط . وفي مجال تنمية الشخصية تنمي كرة اليد سمة الاعتماد على النفس وتساعد على تنمية سرعة التفكير إذ أن مواقف اللعبة السريعة والمثيرة تحتاج إلى التصرف السريع واتخاذ القرارات السريعة الحاسمة .		د.إبراهيم حامد قنديل
5391	12408954	ماجستير	تأثير استخدام التدريب المتقاطع علي بعض القدرات البدنية الخاصة لمتسابقى الوثب الثلاثي /	أبو المعاطي، حمدي محب.		2016	إن عالم اليوم يمر بثورة جديدة هي مزيج بين التقدم التكنولوجي المذهل والثورة المعلوماتية الفاتكة حيث تتسارع المعلومات وتنمو تطبيقاتها لتساهم في تطور المجتمع وتقدمه من خلال استخدام مختلف فروع العلم والمعرفة وامتدت هذه الثورة في المجال التدريب الرياضي بصفة خاصة فمع زيادة حجم التطبيقات واتساع دائرة المعلومات والبحوث والعلوم المرتبطة بالتدريب وتعتبر طرق واساليب التدريب هي وسائل تنفيذ الوحدة التدريبية لتنمية وتطوير الحالة التدريبية للفرد بسلوك يؤدي الي تحقيق الغرض المطلوب عن طريق عمليات التدريب الرياضي المنظمة و هناك العديد من طرق التدريب التي تحقق كل منها اغراض واجبات معينة ولذلك يجب اختيار الطريقة المناسبة للغرض وعلى أساس تنوع طرق و أساليب التدريب لرفع مستوى الإنجاز الرياضي ويعد التدريب المتقاطع أداة للقوة الكامنة للتدريب والذي يساعد المتسابقين على الوصول إلى قمة المنافسة في رياضتهم التخصصية ولذلك أستخدمة العديد من المتسابقين ذوي المستوى العالي و الأولمبي و لاحظ الباحث أنه عند استخدام أكثر من أسلوب تدريبي على مسابقة الوثب الثلاثي بطريقة التدريب الجزئية للمراحل الفنية كلا على حدة قد يؤثر بصورة إيجابية أفضل من التدريب على المسابقة بصورة كلية فكل مرحلة من مراحل الوثب الثلاثي (الخطوة –الحلجة –الوثبة) خصائص وميزات تتناسب مع الأساليب التدريبية تبين للباحث عدم دمج أو استخدام أساليب التدريب المتقاطع في برنامج واحد لذا رأي الباحث استخدام أساليب (الأتقال و البليومتري – الأتقال و الباليستي) لما لهم من أهمية كبيرة وملحوظة في التقدم بمستوي القدرات البدنية حيث أنه أسس هام جدا للقدرات المهارية و الارتقاء بمستوي متسابقى الوثب الثلاثي وإعطاء المدرسين فكرة كيفية استخدام التدريب المتقاطع بأساليب مختلفة ووضعها في برامج التدريب .		
5392	12409387	ماجستير	الأنشطة اللاصفية وعلاقتها بالسلوك العدواني لدى طلاب المرحلة الثانوية الأزهرية/	عبد السيد، عصمت العبد علي.		2016	هدفت الدراسة الحالية إلى التعرف على العلاقة بين الأنشطة اللاصفية، والسلوك العدواني لدي عينة الدراسة، والكشف عن وجود أو عدم وجود تأثير عند أفراد العينة في الأنشطة اللاصفية، والسلوك العدواني .يُعزى إلى التخصص الدراسي (عملي – أدبي) ومحل الإقامة (ريف – حضر)، وكذلك الكشف عن إمكانية تنبؤ الأنشطة اللاصفية بالسلوك العدواني لدي عينة الدراسة، وتكونت عينة الدراسة الأساسية من (طالب من طُلب المرحلة الثانوية الأزهرية بمحافظة قنا والبحر الأحمر، من سن (05 إلى (061 سنة، وتم تطبيق مقياس الأنشطة اللاصفية، ومقياس السلوك العدواني، كما تم استخدام (المنج (06 الوصفي في الدراسة، وقد أسفرت النتائج : عن وجود علاقة ارتباطية دالة إحصائياً بين متوسطات درجات الطلاب في مجالات الأنشطة اللاصفية)ماعداد المجال الرياضي والمجال الكشفي) والدرجة الكمية ليا، والسلوك العدواني عند مستوى (1.10)، عدم حدوث تأثير لتفاعل محل الإقامة (ريف/حضر) ونوع التخصص (عملي/ أدبي) على المشاركة في الأنشطة اللاصفية، وعلى السلوك العدواني لدي عينة الدراسة، كما أمكن التوصل إلى إمكانية التنبؤ بالسلوك العدواني من خلال الأنشطة اللاصفية، ويُعد المجال العلمي أكثر المجالات التي يمكن استخدامها في التنبؤ بالسلوك العدواني، يليه المجال الثقافي.		
5393	12427024		Solar adsorption ice maker utilizing activated carbon and methanol pairs /	Ali, Shazly Sadek Hamed.		2017	أصبحت أنظمة الإمتزاز المدارة بالطاقة الشمسية واحدة من الطرق الواعدة في التطبيقات المختلفة لعمليات الإمتزاز حيث أنها قادرة على استخدام الطاقة منخفضة درجة الحرارة وصديقة للبيئة. يعتبر تصنيع الثلج بالطاقة الشمسية بالإمتزاز باستخدام زوج الإمتزاز واحد من تطبيقات عمليات الإمتزاز المدارة بالطاقة الشمسية. الرسالة الحالية تقدم عمل تجريبي لنظام تصنيع الثلج بالطاقة الشمسية بالإمتزاز باستخدام زوج الإمتزاز من الكربون النشط(Aquasorb 2000) والميثانول. ولذا فإن الهدف من الرسالة دراسة أداء النظام واستخراج الخصائص الإمتزازية لزوج الإمتزاز. وأيضاً إنشاء واختبار النظام تحت الظروف المناخية الحقيقية.		

							في هذه الدراسة تم تثبيت الأجهزة المعملية لاختبار وتقييم خصائص الكربون النشط (Aquasorb 2000) كمادة مازة والميثانول كمادة ممتزة في المختبر عند درجات حرارة مختلفة لكل من المواد والمبخر. وتم عمل نموذج للمولد باستخدام أنابيب نحاسية تحتوي على الكربون النشط مع عمل مسار داخلي محوري لتحسين عملية إنتقال الحرارة والكتلة خلال العمليات المختلفة. تم بناء وحدة تلج شمسي تعمل بالإمتزاز مكونة من ثلاثة عناصر رئيسية، المولد والمكثف والمبخر مع عدم وجود صمامات باستثناء صمام الشحن والتفريغ لسياسة التصميم. وتم عمل تصميم جديد للمولد باستخدام ألواح الأكرليك لتحسين إنتقال الحرارة والكتلة داخل المولد. يحتوي المولد على عشرة أنابيب نحاسية تحتوي بداخلها على الكربون النشط وهذه الأنابيب متصلة مع بعضها البعض ومغلقة بألواح الأكرليك بدلا من الزجاج لتعمل على حبس الحرارة ورفع درجة حرارة المادة المازة إلى درجات حرارة عالية. ويمتاز الأكرليك أيضا بالمتانة أكثر من الزجاج بجانب العزل الحراري العالي له.	
							بالرغم من التقدم في صناعة المشغلات الدقيقة والوحدات الإلكترونية لتقوم بمجموعة من الوظائف والأوامر في وقت محدود وبسرعة عالية فإنها تكون مصحوبة بارتفاع في درجات حرارتها. إرتفاع درجة الحرارة تعد من أكبر المشكلات التي تعيق التطور في صناعة الوحدات الإلكترونية نظرا لتأثيرها السلبي على أداء الوحدة وعمرها الافتراضي. طرق تبريد الوحدات الإلكترونية عديدة منها التبريد باستخدام تبريد الهواء، التبريد باستخدام التبريز، التبريد باستخدام مواد متغيرة الطور، أو التبريد باستخدام تكنولوجيا الانبوية الحرارية. من أهم وأوسع طرق التبريد هو استخدام الهواء كمتبريد وذلك لسهولة الحصول عليه فهو متاح، سهولة تجهيزه فهو لا يحتاج مساحة أكبر لسياسة المعدات المستخدمة في تجهيزه، وكذلك أقل ضرر بالوحدات الإلكترونية نظرا لصغر كثافته. في هذه الدراسة تم تبريد مصفوفة من 7 صفوف و 5 أعمدة من المصادر الحرارية التي تحاكي الوحدات الإلكترونية نظريا باستخدام الطرق الحسابية. تم إجراء الدراسة باستخدام أحد نماذج السريان المضطرب ببرنامج أنيسز فلزونت 14. تم تثبيت المصادر الحرارية الساخنة داخل قناة وتميرير تيار هواء متقاطع داخل القناة وتعرض صف من أصفاف المصفوفة لصف من نفاثات هواء تصادمية متعامدة.	
5394	12427272	Cooling an array of electronic heat sources by a row of impinging air jets in cross flow cofiguration /	Khalil, Mohamed Khalil Ramadan.		2016		تعد عملية التجفيف العملية الرئيسية لكثير من القطاعات الصناعية، وتعتبر واحدة من العمليات الأساسية في الصناعات المعالجة مثل تجفيف اللب والورق، وتجفيف الخشب وتجفيف المواد الغذائية، وتجفيف الحبوب والفواكه والخضروات وتجفيف الأدوية العشبية والشاي، وتجفيف المنتجات الصيدلانية، وتجفيف السيراميك وتجفيف المواد البتية، والتجفيف للمنتجات النسيجية، وتجفيف الفحم، والعديد من المنتجات الأخرى. مصامص قصب السكر يؤثر سلبا على البيئة عندما يتم التعامل معه باعتباره نفايات لكن من جانب آخر فإنه يمكن اعتباره من الموارد إذا تم تطبيق التكنولوجيا الملائمة لمعالجته وإنتاج منتجات استهلاكية تتناسب مع طلبات السوق. هذه المنتجات مثل الورق واللبن والأواح الخشب متوسطة وعالية الكثافة. وتعتبر مرحلة التجفيف في هذه الصناعات مستهلكة جدا للطاقة مما يؤثر على السعر النهائي للمنتج ومن ناحية أخرى فإن جودة المنتج تعتمد على كيفية أداء المجفف حيث أنها ترتبط ارتباطا مباشرا بكيفية الحصول على نسبة الرطوبة المطلوبة للمنتج النهائي. تهدف الرسالة إلى مقارنة الموجات فوق الصوتية المستمرة والمقطعة مع الموجات فوق الصوتية الوهمية لمرضى الألم اللبغى العضلى في العضلة شبه المنحرفة.	
5395	12427325	Simulation and control performance analysis of MDF bagasse fiber drying /	Abdelsalam, Gafary Mahmoud.		2016		أجريت الدراسة على ستون مريضاً من الجنسين ؛ 37 رجل و 23 سيدة يعانون من نقاط الزناد الشنيطة في الألياف العليا للعضلة شبه المنحرفة تراوحت أعمارهم بين 18 إلى 30 سنة وتم تقسيمهم عشوائيا إلى اربعة مجموعات متساوية. تم إجراء الدراسة في مستشفى جامعة عين شمس قسم العلاج الطبيعي في الفترة من أكتوبر 2015 إلى فبراير 2016. تم تقييمهم عن طريق مقياس الألم بالضغط لقياس درجة الألم مع الضغط، المقياس التمثيلي البصري لتقييم شدة الألم ومقياس نوتنغهام للصحة الشخصية لتقييم نوعية الحياة. تمت جميع التقييمات قبل وبعد 10 جلسات من العلاج. أظهرت النتائج أن هناك فروق ذات دلالة إحصائية بين المجموعة الأولى والمجموعات الأخرى من حيث مقياس الألم بالضغط وفروق بين المجموعة الأولى والمجموعات الثلاثة والرابعة من حيث المقياس التمثيلي البصري ومقياس نوتنغهام للصحة الشخصية. هناك فروق ذات دلالة إحصائية بين المجموعة الثانية والمجموعات الأخرى من حيث مقياس الألم بالضغط ولم يكن هناك فروق بينهم من حيث المقياس التمثيلي البصري ومقياس نوتنغهام للصحة الشخصية لم يكن هناك فروق بين المجموعة الثالثة والرابعة من حيث مقياس الألم بالضغط، المقياس التمثيلي البصري ومقياس نوتنغهام للصحة الشخصية.	
5396	12428561	Effect of continuous versus pulsed ultrasound on myofascial pain syndrome /	Ahmed, Heba-Allah Samy Said.		2016		قد أجريت هذه الدراسة في العيادة الخارجية كلية العلاج الطبيعي جامعة القاهرة وكان الغرض الرئيسي من هذه الدراسة هو مقارنة تقييم فعالية شرائط الكينيسو اللاصقة بالإضافة إلى العلاج الطبيعي التقليدي مقابل فعالية الارتجاع البيولوجي التدريبي بالإضافة إلى العلاج الطبيعي التقليدي في علاج عضلة الجبهة وعضلة الفم الدويرية في حالات شلل بيلز باستخدام نطاق قياس هاوس بريك مان وقياس بالث. والهدف الثاني اختبار تأثير شرائط الكينيسو اللاصقة والارتجاع البيولوجي التدريبي في علاج عضلة الجبهة وعضلة الفم المستديرة في حالات شلل بيلز باستخدام نطاق قياس هاوس بريك مان وقياس بالث حيث شارك ثلاثين مريض من (الإناث والذكور) وتراوحت اعمارهم من سن (15-42 سنة) وقد تم تقسيم المرضى إلى المجموعة (أ) حيث أن (ن=9) الذين حصلوا على شرائط الكينيسو اللاصقة بالإضافة إلى العلاج الطبيعي التقليدي (العلاج بالليزر، فارادي التحفيز وإعادة تعليم حركات الوجه) والمجموعة الثانية (ن=8) الذين حصلوا على التدريب الارتجاعي البيولوجي بالإضافة إلى العلاج الطبيعي التقليدي (العلاج بالليزر، التحفيز فارادي وإعادة تعليم حركات الوجه) وتم تقييم جميع المرضى في بداية الدراسة وبعد نهاية المدة (أربعة أسابيع).	
5397	12428563	Kinesiotaping versus biofeedbach training in treatment of bell's palsy /	Shaheen, Ghada Al Sayed M.		2016		يعد حمل الحقايق على كتف واحد من أكثر طرق حمل الحقايق شيوعا بين مختلف السكان هذا العمل الغير متساوي بسبب كثرةا من المشاكل الجسدية الوظيفية وفي النشاط الحيوي ومع ذلك هناك قلة نسيية في الأبحاث المتعلقة بحمل الحقايق ذات الكتف الواحد والتي تسبب أحمال غير متساوية الهدف : بحث تأثير حمل الحقايق على كتف واحد على النشاط الكهربى للعضلة الظهريه العريضة في النساء الأصحاء العينة : قد أجري البحث على ثلاثين قاعة من كلية العلاج الطبيعي جامعة القاهرة والتي تراوحت اعمارهم بين 18 إلى 22 عاما الطريقة : أجري لكل طالية ثلاث قياسات للعضلة الظهريه العريضة الغير مهيمنة والمهيمنة أولا أثناء أقصى انقباض إرادي عضلي لمدة 5 ثواني ثانيا أثناء حمل حقيية على كتف واحد (الغير مهيمن) تحتوي على 10% من وزن الجسم لمدة 5 دقائق ثالثا أثناء حمل حقيية على كتف واحد (الغير مهيمن) تحتوي على 15% من وزن الجسم لمدة 5 دقائق بفترة راحة 10 دقائق بين كل قياس النتائج: خلال حمل حقيية تحتوي على 10% من وزن الجسم تبين أن النشاط الكهربى للعضلة الظهريه العريضة للجانب الغير مهيمن أقل من النشاط الكهربى للجانب المهيمن بمتوسط (6.20±10.14ملي. فولت) على التوالي بدلالة إحصائية =0.001 عند حمل 15% من وزن الجسم كان النشاط الكهربى للعضلة الظهريه العريضة للجانب الغير مهيمن أقل من النشاط الكهربى للجانب المهيمن بمتوسط (9.08±6.95ملي. فولت) على التوالي.	
5398	12428574	Influence of carrying unilateral shoulder bag on myoelectrical activity of latissimus dorsi muscle in normal females /	Albasiony, Israa Salim.		2016		يعد حمل الجهاز العصبي اللاارادي دورا رئيسيا في الظواهر المرضية لمرضى الفشل القلبي الاحتقاني ويعتبر تحليل تذبذب معدل (متغيرية) نبضات القلب أسلوب سهل دقيق للدراسة الكمية للضغط اللاارادي للقلب. وبعد التذبذب الكبير في معدل نبضات القلب مؤشر للتكيف الجيد مما يعني أن الياات التحكم اللاارادي للتلب تؤدي وظيفتها جيدا عل العكس التذبذب الأقل دائما ما يؤثر إلى تكيف غير طبيعي وغير كافي للجهاز العصبي اللاارادي، مما يعكس وجود إغلال وظيفي. وقد كان الهدف من هذه الدراسة بيان إذا ما كان بإمكان تمرينات الحجاب الحاجز باستخدام جهاز تدريب عضلات التنفس إحداث تغيير في تذبذب معدل نبضات القلب في مرضى فشل القلب الاحتقاني.	
5399	12428591	Efficacy of diaphragmatic training on heart rate variability in congestive heart failure patients /	Mossa, Tarek Ibrahim Badr El-Din.		2016		يلعب اعتلال الجهاز العصبي اللاارادي دورا رئيسيا في الظواهر المرضية لمرضى الفشل القلبي الاحتقاني ويعتبر تحليل تذبذب معدل (متغيرية) نبضات القلب أسلوب سهل دقيق للدراسة الكمية للضغط اللاارادي للقلب. وبعد التذبذب الكبير في معدل نبضات القلب مؤشر للتكيف الجيد مما يعني أن الياات التحكم اللاارادي للتلب تؤدي وظيفتها جيدا عل العكس التذبذب الأقل دائما ما يؤثر إلى تكيف غير طبيعي وغير كافي للجهاز العصبي اللاارادي، مما يعكس وجود إغلال وظيفي. وقد كان الهدف من هذه الدراسة بيان إذا ما كان بإمكان تمرينات الحجاب الحاجز باستخدام جهاز تدريب عضلات التنفس إحداث تغيير في تذبذب معدل نبضات القلب في مرضى فشل القلب الاحتقاني.	

							قد وجدنا أن التمرينات العلاجية للحجاب الحاجز باستخدام جهاز تدريب عضلات التنفس تزيد التحكم اللاإرادي في تثنييد معدن بويضات القلب لمرضى فشل القلب الاحتقاني وهذا التحسن في التحكم اللاإرادي للقلب يلعب دورا هاما ويمكن أن يكون ذا قيمة في تقليل مخاطر المرض لهم.	
						2016	معلمي المدارس الإعدادية تمثل المجموعة المهنية بين الذين لديهم عرضة لإضطراب الجهاز العضلي الهيكلي ولكن مدى انتشاره بينهم في مصر لم يحدد بعد . الغرض: أجريت هذه الدراسة لفحص مدى العلاقة بين العمل واضطرابات الجهاز العضلي الهيكلي بين معلمي المدارس الحكومية الإعدادية في القاهرة ، مصر في الـ 12 شهرا الماضية . الإجراء : تم اختيار عينة من 200 معلم مرحلة إعدادية من المدارس الحكومية في القاهرة ، مصر مع متوسط عمر (35.9+3.34) سنة ، وطلب من هؤلاء المدرسين اختيار الإجابة من الاستبيان الذي يساعد في معرفة اضطراب العضلات والعظام بسبب عملهم في الـ 12 شهرا الماضيين. النتائج : أبلغت الدراسة إلى أن انتشار إضطرابات الجهاز العضلي الهيكلي الناتجة من العمل لمدة 12 شهرا السابقة بين معلمي المدارس الإعدادية المصرية 96% وكان انتشاره أعلى بكثير لدى الإناث أكثر من الذكور في إصابات الرقبة والظهر وإصابة الطرف العلوي.	
5400	12428613	Work related musculoskeletal disorders among preparatory school teachers in Egypt /	Korish, Mennatallah Maher Abd El Dayem.					
5401	12428628	Physical therapist performance in intensive care unit versus outpatient clinic /	Metawee, Shaimaa Mohamed Abd-Elhameed.			2016	أجريت هذه الدراسة على عينة من أخصائيي العلاج الطبيعي العاملين بالبنية العامة للمستشفيات والمعاهد التعليمية في مصر خلال الفترة من أكتوبر 2015 إلى يناير 2016 . وكان الغرض من هذه الدراسة هو مقارنة أداء أخصائيي العلاج الطبيعي في أقسام العناية المركزة مقابل أدائهم في العيادات الخارجية . تم إجراء الدراسة على مائة أخصائيي علاج طبيعي من وحدة العناية المركزة والعيادات الخارجية من كلا الجنسين (الذكور والإناث) وقد تراوحت سنوات التخرج للعينة من عام 1998 وحتى 2009. تم تقسيمهم إلى مجموعتين متساويتين كل مجموعة تتكون من خمسين أخصائي علاج طبيعي تم تقييم أداء المجموعة الأولى (أ) العاملة في وحدة العناية المركزة . تم تقييم أداء المجموعة الثانية (ب) العاملة في العيادة الخارجية. الطريقة القياس : باستخدام استبيان اشرف شكل (ج) من المجلس الأسترالي للعلاج الطبيعي لتقييم ممارسة أخصائيي العلاج الطبيعي لكلا المجموعتين ثم تم مقارنة النتائج بين المجموعتين (أ) و(ب).	
5402	12428734	أثر كفاءة وفاعلية نظم المعلومات الحاسوبية الالكترونية على إدارة الإزمات المالية في الوحدات الاقتصادية /	جاده محمود عمر أحمد.	جامعة جنوب الوادي- كلية التجارة /	قنا :	2016	تعد كفاءة نظم المعلومات الحاسوبية الالكترونية مقياسا لتكلفتها اما فعاليته تعتبر مؤشرا لجودته - تتوافر الكفاءة (التشغيلية - الوظيفية- الفنية والتكنولوجية) في نظم المعلومات الحاسوبية الالكترونية المطبقة بقاطعي البنوك العامة والخاصة وشركات التأمين العامة والخاصة العاملة في مصر - تتوافر الفاعلية في نظم المعلومات الحاسوبية الالكترونية وذلك في تحقيقها لاهدافها واختيار تطبيقاتها ودعمها لوظائف الادارة وتحقيق جودة المعلومات الحاسوبية التي تقدمها بقاطعي البنوك العامة والخاصة وشركات التأمين العامة والخاصة العاملة في مصر.

5440	12449172		فاعلية برنامج تدريبي لتنمية بعض المكونات الإدراك الحس حركي وعلاقتها بمستوي الاداء لسباحي الصدر /	المالح، محمد محمد حسين	كلية التربية الرياضية للبنين	جامعة بنها	2015م	مقدمة ومشكلة البحث : يزداد الاهتمام بدراسة الأداء الحركي للإنسان لمختلف الأنشطة الرياضية لتنمية وتطوير هذا الأداء. يعتمد الأداء في السباحة اعتماداً كبيراً على الإحساس الحركي حيث أن السباحة نشاط من الأنشطة الحركية تتطلب قدراً من الإدراك الحس حركي كما أنها تحتاج إلى درجة عالية من التوافق والانسجام بين الحركات وبعضها حتى يتم الأداء بصورة جيدة . وقد استرعى انتباه الباحث خلال عمله في مجال تعليم السباحة افتقار اللاعبين للإحساس بالمكان والمسافة والزمن المناسبين للأداء الصحيح . لذا رأى أن من خلال وضع برنامج لتنمية الإدراك الحس حركي للاعبين يمكن المساعدة في رفع مستوى الأداء المهاري للاعبى السباحة . أهداف البحث : تصميم برنامج تدريبي والتعرف على فاعليته في : 1- الإدراك الحس – حركي لسباحي الصدر 2- مستوى الأداء المهاري لسباحي الصدر 3- المستوى الرقمي لسباحي الصدر . فروض البحث : ولتحقيق أهداف البحث إقترض الباحث التالي : توجد فروق دالة إحصائياً بين القياس القبلي والبعدى للجنة قيد البحث في مستوى الأداء لسباحي الصدر لصالح القياس البعدى . توجد فروق دالة إحصائياً بين القياس القبلي والبعدى للجنة قيد البحث في اختبارات الإدراك الحس – حركي لسباحي 2- الصدر لصالح القياس البعدى توجد فروق دالة إحصائياً بين القياس القبلي والبعدى للجنة قيد البحث في المستوى الرقمي لسباحي الصدر لصالح القياس 3- البعدى . إجراءات البحث : أولاً : منهج البحث تم استخدام المنهج التجريبي لملاءمته لطبيعة هذه الدراسة .		

ثانياً: مجتمع وعينة البحث
يتمثل مجتمع البحث من لاعبي السباحة بإستاد العريضي والمقيدين بمنطقة شمال سيناء للسباحة والبالغ عددهم 10 لاعبين تتراوح أعمارهم من (12-14) سنة . من مجتمع البحث الأصلي . والجدول رقم (4) يوضح توزيع العينة .

تجانب عينة البحث
قام الباحث بحساب بعض المتغيرات المتمثلة في (ارتفاع القام، الوزن، السن،)
والجدول رقم (5) يوضح تجانب العينة في ضوء متغيرات قيد البحث.

ثالثاً: مجالات البحث :
أولاً : المجال المكاني
تم تطبيق اختبارات الإدراك الحس حركي ومستوي الأداء المهاري والمستوي الرقمي للعينة (الأساسية - الاستطلاعية) في حمام السباحة الأولمبي بإستاد العرش الرياضي، مرقف (17)

ثانياً : المجال الزمني :
جدول رقم (6)
التوزيع الزمني للدراسة

م
القياسات الفترة الزمنية

من إلى

1	1/12/2014	القياس القبلي للجنة الأساسية
2	2014/ 12/ 16 : 8/12/2014	الدراسة الاستطلاعية
3	19/2/2015 22/12/2014	تنفيذ التجربة الأساسية
4	21/2/2015	القياس البعدي للجنة الأساسية

ثالثاً: الدراسة الاستطلاعية :
قام الباحث بإجراء الدراسة الاستطلاعية في الفترة من 8 / 12 / 2014م إلى 16 / 12 / 2014م هذه الدراسة علي العينة الاستطلاعية المسحوبة من مجتمع البحث وعددهم (10) لاعبين .

رابعاً: الدراسة الأساسية:

بلغ عدد العينة الأساسية للبحث (10) لاعبين كمجموعة تجريبية واحدة .

قام الباحث بإجراء القياس القبلي لعينة البحث الأساسية في حمام السباحة الأولمبي بإستاد العريش الرياضي وذلك يوم الإثنين الموافق 1 / 12 / 2014م حيث تم القياسات كالآتي:

(100 متر صدر) قياس المستوى الرقعي .

- (12) اختبار تقييم مستوى الأداء المهارى لمباحة الصدر . (إعداد : جنان سليمان) مرفق - مرفق
- (6) اختبار الإزاحة داخل الماء . مرفق - مرفق
- (7) اختبار الإحساس بالمساحة " داخل الماء " (صدر) 15متر - مرفق - مرفق
- (8) اختبار القدرة على الإحساس بـ 50 ٪ من القوة بالتوافق الكامل لباحة الصدر . مرفق - مرفق
- (9) اختبار إدراك الاتجاه (درجة الانحراف في الماء) مسباحة صدر . مرفق - مرفق
- (10) اختبار الإدراك الحس - حركى لأزمن 10متر لباحة صدر . مرفق - مرفق
- (11) اختبار القدرة على الإحساس بالزمن خارج الماء. مرفق - مرفق

تنفيذ البرنامج
استغرق البرنامج (8) أسابيع علي شهرين ، بواقع 3 وحدات في الأسبوع ، وكان من يوم الاثنين 22/12/2014م وحتى يوم الأحد 19/2/2015م .

١-١: القياس البعيدة
بعد الانتهاء من تنفيذ البرنامج التدريبي تم إجراء القياس البعيد في يوم الأربعاء الموافق 21/2/2015 م للمجموعة
التجريبية ، في جميع القياسات (قيد البحث) ، وقد روعي إنشاء القياس نفس الشروط والظروف التي اتبعت في القياسات
القياسية .

رابعاً : وسائل جمع البيانات :
 أولاً : الأجهزة المستخدمة في البحث :

(سم)جهاز الرستاميزر لقياس الطول -
(كجم)ميزان طبي -

ثانياً : الأدوات المستخدمة في البحث :

- لوحة الضربات .
- الأطواق .
- ساعة إيقاف .
- سدادات الأذن .
- رافعات الرجلين .
- خيال مطاطية .
- حمام سباحة .
- (متر) أنشُرطة قياس .
- مسطرة مدرجة .
- مقاعد سويدية .
- صفارة .
- كاميرا .

الاختبارات المستخدمة في البحث (ب):

تم استخدام الاختبارات التالية :

اختبار تقييم مستوى الأداء المهاري لسباحة الصدر. مرفق (12) إعداد: جنان سليمان -1

(6) اختبار الاتزان داخل الماء بمرفق 2-

(7) اختبار الإحساس بالمسافة " داخل الماء " (صدر) 15متر. مرفق 3-

(8) اختبار القدرة على الإحساس بـ 50% من القوة بالتوافق الكامل سباحة صدر. مرفق 4-

(9) اختبار ادراك الاتجاه (درجة الانحراف في الماء) سباحة صدر . مرفق 5-

(10) اختبار الإدراك الحس - حركي، لزم من 10 ث سباحة صدر. مرفق 6-

(11) اختبار القدرة على الاحساس بالزمن خارج الماء. مرفق 7-

							. اختبار المستوى الرقمي لسباحة (100م). صدر -8 : الاستمارات والمقابلات الشخصية - قام الباحث بتصميم استمارات لاستطلاع رأي الخبراء على النحو التالي : استمارة استطلاع رأي الخبراء لتحديد جوانب الإدراك الحس حركي المرتبطة بالمهارات الأساسية في سباحة الصدر - (2)والبرنامج التدريبي ومكوناته . مرفق استمارة استطلاع رأي الخبراء لتحديد تمرينات الإدراك الحس حركي المناسبة لهذه الجوانب. مرفق (3) (5)استمارة استطلاع رأي الخبراء اختبارات الإدراك الحس حركي المستخدمة في البرنامج التدريبي المقترح . مرفق - المقابلات الشخصية : قام الباحث بعدة مقابلات مع (14) من الخبراء في مجال التربية الرياضية من الحاصلين علي درجة الدكتوراه , وذلك لتحديد أهم جوانب الإدراك الحس حركي . البرنامج المقترح : قام الباحث بتصميم وحدات البرنامج التدريبي المقترح لتنمية الإدراك الحس حركي للسباحين الناشئين بواقع ثمانية أسابيع في كل اسبوع ثلاث وحدات تدريبية في زمن قدره (90) دقيقة . : الخطوات التمهيدية للبحث - قام الباحث بعمل مسح شامل للمراجع وإجراء مقابلات شخصية لتحديد أهم جوانب الإدراك الحس حركي , كما قام بتحديد الاختبارات المناسبة لقياس هذه لجوانب . ولقد أجري الباحث دراسة استطلاعية أولي بهدف التعرف علي مدي صدق وثبات الاختبارات كما أنه أجري دراسة استطلاعية ثانية بهدف التعرف علي مدي ملائمة البرنامج التدريبي المقترح . البرنامج التدريبي -4 : هدف البرنامج - يهدف البرنامج التدريبي إلى تنمية الإدراك الحس— حركي لسباحي الصدر وتحسين مستوى وزمن الأداء لسباحي الصدر. 12سنة:14سنة (عينة البحث قيد الدراسة) . وأيضاً الحفاظ علي مستوى عناصر اللياقة البدنية الهامة للسباحين. وقد راعي الباحث أثناء تأدية البرنامج الآتي : . أن يتناسب البرنامج التدريبي المقترح مع خصائص المرحلة السنوية التي تميز أفراد العينة حيث أنهم سباحين ناشئين -10 أن يحقق البرنامج التدريبي المقترح أهدافه التي وضع من أجلها وهي تنمية الإدراك الحس حركي وتحسين المستوى -11 الرقمي في 100متر صدر . أن يتسم البرنامج بالمرونة بحيث يمكن تعديله إذا لزم الأمر -12 — مراعاة الأسس العلمية المتعلقة بحمل التدريب من حيث (الشدة الحمل — زمن الأداء — فترات الراحة البدنية -13 . المجموعات التكرارات) لكل اسبوع علي حدة وكل مجموعة تدريبية مراعاة ثبات الحمل العالي لمدة تسمح لإحداث التكيف مع الأحمال التدريبية المرتفعة -14 أن يكون التغير في شدة الحمل فريداً لكل سباح علي حد بما يتناسب الحد الأقصى له -15 . مراعاة التوقيت الصحيح بتكرار الحمل -16 . الارتفاع التدريجي بدرجة الحمل -17 . الاستمرارية في التدريب -18 مراعاة توقيت إجراء القياسات لكل من المستوى (المهاري — الرقمي) في بداية كل شهر -10 وقد أعد الباحث استمارة استطلاع رأي الخبراء لتحديد مدة تطبيق البرنامج وعدد الوحدات الأسبوعية خلال الأسبوع الواحد وكذلك زمن الوحدة التدريبية وتم عرض الاستمارة علي السادة الخبراء مرفق (2) . : مدة تنفيذ البرنامج - أ- استغرق البرنامج (8) أسابيع علي شهرين ، بواقع 3 وحدات في الأسبوع ، وكان من يوم الاثنين 22/12/2014 وحتى يوم الأحد 19/2/2015م . جدول رقم (12) التوزيع الزمني للبرنامج المحتويات التوزيع الزمني للبرنامج مدة تطبيق البرنامج شهرين عدد الأسابيع 8 أسابيع عدد الوحدات في الأسبوع 3 مرات اسبوعيا عدد الوحدات في البرنامج 24 وحدة زمن الوحدة في البرنامج التدريبي 90 دقيقة زمن الوحدات الإسبوعية 270 دقيقة الزمن الكلي للبرنامج 2160 دقيقة تقسيم الوحدة في البرنامج : تمرينات الإحماء : وتشمل هذه التمرينات (جري — وثب — إطالة ومرونة وغيرها) بهدف تهيئة الجسم للعمل وذلك من خلال رفع درجة حرارة الجسم وتنبيه وإثارة المستقبيلات الحسية . تمرينات الإعداد البدني العام : وتهدف الي المحافظة على القدرات البدنية الأساسية (القوة ، والسرعة ، التحمل ، الرشاقة ، المرونة وغيرها) . تمرينات الإعداد المهاري(الجزء الرئيسي):	#####	أ.د محمد عبد الحليم نور الدين،أ.د احمد محمود عيسى،أ.د محمد احمد السيد حسن،prof.dr.ingrid.gamer-wallert.
5441	12449198	دكتوراه	محمد محمود الجبلاوى،محمد: الدولة الحديثة بطيبة:	المقاصير والقاعات المرتبطة برحلة وطقوس رب الشمس في معابد الدولة الحديثة بطيبة:	كلية الآثار،قسم الآثار المصرية	جامعة القاهرة:	#####	تعمل الرسالة عنوان : المقاصير والاقاعات المرتبطة برحلة وطقوس رب الشمس في معابد الدولة الحديثة بطيبة- دراسة أثرية. وقام الباحث بتقسيمها الي جزأين: الجزء الأول : يحتوى على مقدمة وتمهيد وفصلين وخاتمة على النحو التالي : 1-المقدمة توضح سبب اختيار الموضوع -1 التمهيد: يتناول نبذة عن الاشكال المختلفة لرب الشمس -2 الفصل الاول:يتناول ترجمة وتحليل العديد من النصوص المسجلة على جدران هذه المقاصير والقاعات -3 الفصل الثاني: يتناول دراسة اهم النقوش المسجلة على جدران هذه المقاصير والقاعات -4 الخاتمة: تتضمن اهم النتائج التي توصل اليها الباحث -5 الجزء الثاني: يحتوى على اللوحات التي رتب طبقا لترتيب الفصول في الجزء الاول.	

5442	12451044		leakage evaluation of single cone versus cold lateral condensation in straight and curved canals (in vitro study)	mustafa mohmoud mohamed sultan			2014	the ultimate objective of the root canal therapy is the three dimensional obturation of the endodontic space after it has been completely cleaned shaped and disinfected the purpose of obturation is to seal all portals of exit to impede any sort of communication or exchange between the root canal and periodontium most techniques employ a core material and sealer cutta percha is the most widely used obturating material		
5443	12451157		immuno histopathological changes of nikel&nikel free orthodontic brackets experimentally induced in rats	mostafa mohamed ahmed			2012	a large variety of metallic alloys are routinely used in dentistry the percentage of nickel in the alloy varies from as in stainless steel to more than 50%as in the nickel - titanium alloys the discharge of nickel ions which is a strong immunologic sensitizer may result in contact hypersensitivity nickel materials are used in dentistry largely in prosthesis production and orthodontic appliances however few studies have been conducted to determine the real action of this agent in the mouth and the tissue response when in contact with this substance

5448	12458432	ماجستير	العلاقة بين الصلابة النفسية والقدرة على اتخاذ القرار لدى لاعبي ألعاب النزال بدولة الكويت	اشكناني، جابر علي عبدالله مختار			2017م	يهدف البحث إلى التعرف على الفروق بين لاعبي المبارزة والكاراتيه والجودو في الصلابة النفسية ، والتعرف على الفروق في القدرة على اتخاذ القرار ، والتعرف على العلاقة الارتباطية بين الصلابة النفسية وبين القدرة على اتخاذ القرار ، والتعرف على العلاقة الارتباطية بين الصلابة النفسية وبين القدرة على اتخاذ القرار للاعبي المبارزة والكاراتيه والجودو ، استخدم الباحث المنهج الوصفي ، واشتملت عينة البحث على 139 لاعب من لاعبي المبارزة والكاراتيه والجودو تم اختيارهم من بعض نوادي دولة الكويت استخدم الباحث مقياس الصلابة النفسية ، مقياس القدرة على اتخاذ القرار وتوصلت النتائج إلى وجود فروق معنوية بين عينة البحث في محاور الالتزام والتحكم والتحدى والمجموع الكلي لمقياس الصلابة النفسية ، وجود فروق معنوية بين عينة البحث في محاور الالتزام والتحكم والتحدى والمجموع الكلي لمقياس الصلابة النفسية على اتخاذ القرار وجود ارتباط معنوي بين محاور ومجموع مقياس الصلابة النفسية وبين مقياس القدرة على اتخاذ القرار للاعبي المبارزة ويوصي الباحث بضرورة الأخذ في الاعتبار مدى تأثير مستوى الصلابة العقلية على اتخاذ القرارات خلال مواقف التدريب والمنافسة للاعبي المبارزة والجودو والكاراتيه ، تدريب اللاعبين على اتخاذ القرار السليم خلال مواقف التدريب والمنافسة ، وضع برامج لتدعيم الصلابة النفسية للاعبي المبارزة والجودو والكاراتيه لما لها من تأثير إيجابي في خفض حدة التوتر والقلق وتحسين المهارات النفسية للاعبين ، إجراء المزيد من الدراسات والبحوث للتعرف على علاقة الصلابة النفسية واتخاذ القرار ببعض المتغيرات الأخرى للاعبي المبارزة والجودو والكاراتيه وألعاب النزال كدراسات مقارنة .		
5449	12458449	ماجستير	تقويم السياسات الإدارية بالاتحاد المصري للغوص والإنقاذ بجمهورية مصر العربية في ضوء مبادئ الحوكمة	سالم، إسلام أحمد حسن			2016م	يضع الباحث أهمية البحث إلى أهمية نظرية وأهمية تطبيقية : الأهمية النظرية: 1- محاولة علمية إلقاء الضوء على السياسات الإدارية بالاتحاد- التوصل إلى السياسات الإدارية المثلى داخل الاتحاد المصري للغوص والإنقاذ في ضوء مبادئ الحوكمة والتي تمثل- 2- مرجع رئيس يمكن الاستفادة منه في رسم السياسات الإدارية للاتحادات الأهمية التطبيقية: وتوفير قاعدة بيانات(PADI) على جمعية رابطة المحترفين لمعلمي الغوص(CMAS) إشراف الاتحاد الدولي للغوص- 1- (الحوكمة)ومعلومات علمية للباحثين وتطبيق مبدأ العدل والمساواة 2- معالجة أوجه القصور الموجودة داخل الاتحاد والمتعلقة بالسياسات الإدارية والتي سوف يكون لها تأثيراً في حل- 3- العديد من المشكلات المتعلقة بزيادة فاعلية أنشطة الاتحاد 4- نشر ألعاب الاتحاد في جميع المحافظات المصرية- 5- وضع مادة علمية بين أيدي المسؤولين عن رسم السياسات الإدارية بالاتحاد ومعرفة متطلبات كل مرحلة في حوكمة هذه- السياسات 6- العمل على افتتاح أكثر من فرع داخل محافظات الجمهورية- هدف البحث: يهدف البحث إلى تقويم: السياسات الإدارية بالاتحاد المصري للغوص والإنقاذ بجمهورية مصر العربية في ضوء مبادئ الحوكمة .		
5450	12458478	ماجستير	الضغوط المهنية وعلاقتها بالكفاءة الشخصية لمدربي الألعاب الجامعية بدولة الكويت	دشتي، عبدالمحسن رضا غلام محمد			2017م	الضغوط المهنية وعلاقتها بالكفاءة الشخصية لمدربي الألعاب الجامعية بدولة الكويت يهدف البحث إلى التعرف على الضغوط المهنية وعلاقتها بسمات الكفاءة الشخصية لمدربي الألعاب الجامعية من خلال التعرف على مستوى الضغوط المهنية لدى مدربي الألعاب الجامعية ، والتعرف على سمات الكفاءة الشخصية لدى مدربي الألعاب الجامعية ، التحقق من وجود علاقة ارتباطية ذات دالة إحصائية بين مستوى الضغوط المهنية وسمات الكفاءة الشخصية لدى مدربي الألعاب الجامعية بدولة الكويت . وقد استخدم الباحث المنهج الوصفي ، وتم اختيار عينة البحث الأساسية بالطريقة العمدية ، وقد بلغ قوامها 90 مدرّباً من مدرّبي الألعاب الجامعية ، كما يمثل المجتمع البحث أيضاً مدرّبي الألعاب الجامعية والمقيدين بسجلات الاتحادات الرياضية الكويتية موسم 2015/2016م من مختلف الاندية الرياضية (120) مدرب ، واستخدم الباحث مقياس الضغوط المهنية ، مقياس الكفاءة الشخصية .		

								وكانت أهم نتائج البحث الخاصة بالمحور الأول إدارة الطموح المهنية مثل أن المدرب يمثل للقرارات الصادرة من مجلس الإدارة ، النتائج الخاصة بالمحور الثاني إدارة الذات المعنية مثل اطلع على كل ما هو جديد في التدريب الرياضي والعلوم المرتبطة ، النتائج الخاصة بالمحور الثالث إدارة العلاقات مع اللاعبين مثل استطيع حل مشكلات اللاعبين ، تواصل اجتماعيًا مع اللاعبين ، النتائج الخاصة بالمحور الرابع إدارة الأعباء والضغوط الخارجية مثل تقبل النقد البناء من وسائل الإعلام ، النتائج الخاصة بالمحور الخامس الموارد المادية والبشرية مثل تقاضي راتب يكفل لي حياة كريمة ، تحظى أرائي بتقدير مجلس إدارة النادي .		
			هدف البحث: يهدف البحث إلى : التعرف على تأثير تدريبات السرعة والرشاقة المقترحة على الأداءات الخططية الدفاعية قيد البحث (اختيار المدافع للمواقع المناسبة ، المراقبة ، الضغط ، التغطية) لنادي كرة القدم .	2017م		مصطفى، عبدالكريم محمود	تأثير تدريبات السرعة والرشاقة على مستوى بعض الاداءات الخططية الدفاعية لنادي كرة القدم	ماجستير	12458521	5451
			يهدف البحث إلى تصميم برنامج تدريبي مقترح باستخدام التدرجات الأرضية التوافقية على المستوى الرقمي لنادي سباحة الصدر ، وذلك من خلال الأهداف الفرعية التالية : التعرف على تأثير التدرجات الأرضية والتوافقية على بعض عناصر اللياقة البدنية (السرعة-قوة-الرشاقة) ومرونة1) المفاصل . التعرف على تأثير التدرجات الأرضية التوافقية على المستوى الرقمي لسباحة 25م ، 50م ، 100م ، 150م مع الدوران2) لنادي الصدر	2016م		الجميل، مصطفى سعد خليل	تأثير برنامج تدريبي مقترح باستخدام التدرجات الأرضية التوافقية على المستوى الرقمي لنادي سباحة الصدر	ماجستير	12458565	5452
			يهدف البحث إلى تصميم برنامج تعليمي باستخدام القصة الحركية ومعرفة مدى تأثيره على تنمية بعض القدرات الحركية لدى الطلاب المعاقين ذهنيًا القابلين للتعلم . واستخدم الباحث المنهج التجريبي وذلك باستخدام المجموعة الواحدة ذات القياسين (القبلي والبعدي). واشتمل مجتمع البحث على التلاميذ المعاقين ذهنيًا القابلين للتعلم بمدرسة (علاء عبدالرحيم) للتربية الفكرية بمدينة ادفو محافظة أسوان الذين تتراوح أعمارهم ما بين (6:12) سنة خلال العام الدراسي 2014/2015م ، والبالغ عددهم (25) خمسة وعشرون تلميذاً وقد اختار الباحث عينة صمدية عشوائية قوامها (15) خمسة عشر تلميذاً . كما قام الباحث بتطبيق البرنامج المقترح باستخدام القصة الحركية والذي استغرق (8) أسابيع في الفترة من الاثنين 23/3/2015م إلى يوم الخميس 23/4/2015م ، بواقع (2) وحدتين أسبوعياً وزمن الوحدة الواحدة (45) خمسة وأربعون دقيقة . وكانت أهم النتائج التي توصل إليها الباحث هي أن البرنامج التعليمي باستخدام القصة الحركية أدى إلى تحسن في القدرات الحركية للمعاقين ذهنيًا القابلين للتعلم .	2016م		حمدان، حسن محمود حسن	تأثير برنامج تعليمي باستخدام القصة الحركية على تنمية بعض القدرات الحركية للمعاقين ذهنيًا القابلين للتعلم	ماجستير	12458613	5453
			يهدف هذا البحث إلى التعرف على تأثير برنامج تدريبي باستخدام تدريبات السرعة والرشاقة على مستوى أداء بعض المهارات الهجومية لنادي كرة السلة بدولة الكويت في ضوء المنهج التجريبي . ويوصي الباحث بـ : توجيه اهتمام المدربين بضرورة توظيف القدرات البدنية الخاصة بما يخدم الأداء المهاري وذلك وفقاً لمتطلبات رياضة-1 كرة السلة حتى يمكن تحقيق أكبر استفادة ممكنة أثناء المنافسات أهمية التقييم الدوري والتتبعي عقب كل مرحلة في فترات الموسم الرياضي وذلك عن طريق الاختبارات الدورية للتعرف-2 على نقاط القوة والضعف في البرنامج التدريبي المقترح يجب عند تخطيط البرامج التدريبية تحديد وتقييم الأحمال التدريبية ومراعاة الأسس والمبادئ العلمية بما يتناسب مع قدرات اللاعبين ومراعاة الفروق الفردية بينهم. 4-تطبيق هذه الدراسة على مراحل عمرية مختلفة من نادي كرة السلة-4 إجراء دراسات مقارنة في متغيرات السرعة والرشاقة بين مستويات مختلفة خاصة بكرة السلة-5 إجراء دراسات مماثلة مع إضافة بعض المتغيرات الخططية-6	2016م		الخريف، عبدالرحمن عبدالوهاب إبراهيم	تأثير برنامج تدريبي باستخدام تدريبات السرعة والرشاقة على مستوى أداء بعض المهارات الهجومية لنادي كرة السلة بدولة الكويت	ماجستير	12458736	5454
			يهدف البحث إلى تنمية بعض القدرات البدنية الخاصة (تحمل السرعة - السرعة الانتقالية - القوة المميزة بالسرعة - السرعة الحركية - تحمل القوة) لمتسابقين 400متر عدو عن طريق تصميم برنامج تدريبي باستخدام التمرينات النوعية والبالستية مما يمكن إيجابياً على تحسين المستوى الرقمي لمتسابقين . واستخدم الباحث في هذا البحث المنهج التجريبي لملائته لطبيعة البحث . وتمثل مجتمع البحث لمتسابقين 400متر عدو بمنطقة قنا لألعاب القوى واختار الباحث عينة البحث من متسابقين ألعاب القوى بأندية ومراكز الشباب بمنطقة قنا لألعاب القوى وعددهم 15 متسابق كعينة أساسية و 10متسابقين كعينة استطلاعية وقد اختار الباحث عينة البحث بالطريقة العمدية . وتم اجراء الدراسات الاستطلاعية والقياسات القلبية والقياسات البيئية والقياسات البدنية على ملعب مركز شباب مدينة قنا . وبلغت المدة الزمنية للبرنامج التدريبي شهرين (8أسبوع) ، وبلغت عدد مرات التدريب الأسبوعية ثلاث مرات ، وبلغت المدة الزمنية للوحدة (90) دقيقة . كانت التمرينات النوعية والبالستية داخل الوحدة (55دقيقة) وبذلك يكون إجمالي عدد الوحدات التدريبية (24وحدة) داخل البرنامج . وكانت أهم النتائج التي توصل إليها الباحث أن التمرينات النوعية والبالستية تؤثر إيجابياً على مستوى القدرات البدنية والمستوى الرقمي لمتسابقين 400متر عدو .	2016م		بربري، عبدالمؤمن عويس بدري	تأثير برنامج تدريبي باستخدام التمرينات النوعية والبالستية على تحسين المستوى الرقمي لمتسابقين 400 متر عدو	ماجستير	12458822	5455
			هدف البحث إلى : التعرف على الثقافة التنظيمية وعلاقتها بالإبداع الإداري لدى موجبي وموجهات التربية البدنية بنين بدولة الكويت . وكان من أهم الاستنتاجات : يعمق الموجه الفني السلوك الديموقراطي بين المعلمين والطلبة ويحافظ الموجه الفني على كرامة المعلمين في العمل . وكان من أهم التوصيات : القدرة على تغيير الحالة الذهنية للعاملين بالمدرسة طبقاً لطبيعة الموقف ومنح الفرص للعاملين للالتحاق بالدورات التدريبية .	2016م		الشمرى، خالد خلف ساكت	الثقافة التنظيمية وعلاقتها بالإبداع الإداري لدى موجبي وموجهات التربية البدنية بدولة الكويت	ماجستير	12458834	5456
			ويهدف هذا البحث إلى التعرف على اثر استخدام مواقع التواصل الاجتماعي على ممارسة الأنشطة الترويحية الرياضية لدى طلاب المرحلة الثانوية العامة بمحافظة قنا وذلك من خلال: الاثار الإيجابية الناتجة عن استخدام مواقع التواصل الاجتماعي لدى طلاب المرحلة الثانوية العامة بمحافظة قنا- الاثار السلبية الناتجة عن استخدام مواقع التواصل الاجتماعي لدى طلاب المرحلة الثانوية العامة بمحافظة قنا - مفهوم ممارسة الأنشطة الترويحية الرياضية لدى طلاب المرحلة الثانوية العامة بمحافظة قنا - أهداف ممارسة الأنشطة الترويحية الرياضية لدى طلاب المرحلة الثانوية العامة بمحافظة قنا - أنواع الأنشطة الترويحية الرياضية المفضلة لدى طلاب المرحلة الثانوية العامة بمحافظة قنا - معوقات ممارسة الأنشطة الترويحية الرياضية لدى طلاب المرحلة الثانوية العامة بمحافظة قنا - الامكانيات الادبية والبشرية المتاحة عند ممارسة الأنشطة الترويحية الرياضية لدى طلاب المرحلة الثانوية العامة بمحافظة قنا دور المجتمع نحو تدعيم الترويج الرياضي لطلاب المرحلة الثانوية العامة بمحافظة قنا -	2016م		عبداللطيف، فؤاد أحمد فؤاد	أثر استخدام مواقع التواصل الاجتماعي على ممارسة الأنشطة الترويحية الرياضية لدى طلاب المرحلة الثانوية العامة بمحافظة قنا	ماجستير	12458886	5457

						استخدم الباحث المنهج الوصفي بالاسلوب المسحي لماسبته لطبيعة البحث، واشتملت العينة على 3008 طالب ،وتم تطبيق استمارات الاستبيان بعد عرضها على السادة الخبراء واسفرت النتائج عن وجود أثار ايجابية وسلبية لمواقع التواصل الاجتماعي وقد أثرت سلبا على ممارسة الطلاب للأنشطة الترويحية الرياضية وعدم إدراك مفهوم الترويج الرياضي لدى الطلاب وكانت اهم التوصيات لقاء العضو على خطورة مواقع التواصل الاجتماعي وتقديم برامج إعلامية عن أهمية الأنشطة الترويحية الرياضية ودورها في استثمار وقت الفراغ.	
					2016م	يهدف البحث إلى تطوير القدرات البدنية الخاصة والمستوى الرقمي عن طريق تصميم برنامج تدريبي باستخدام التدريب المتقاطع وتأثيره على : - القدرات البدنية الخاصة لمتسابقى الوثب الثلاثي - - المستوى الرقمي لمتسابقى الوثب الثلاثي - استخدم الباحث المنهج التجريبي نظرا لملائمته لطبيعة البحث حيث يعتبر انصب المناهج لتحقيق أهداف البحث وذلك باستخدام التصميم التجريبي ذو المجموعتين التجريبيتين واستخدام القياسات القليلة والبدعية. استنادا إلى ما أسفرت عنه نتائج البحث وفي ضوء الاستنتاجات التي تم التوصل إليها، يوصى الباحث بما يلي: 1-الاسترشاد بالبرنامج التدريبي المقترح لتحسين مستوى المتغيرات البدنية الخاصة ومرآحل الأداء (الحجلة-الخطوة -1 الوثبة)والمستوى الرقمي أثناء تدريب مسابقة الوثب الثلاثي استخدام التدريب بالانقزال لتنمية القوة العضليتهاغبارها أساسا للقدرات البدنية الأخرى قبل وأثناء التدريب بالاسلوب-2-اليوميومري والاسلوب الباليستي في البرنامج التدريبي 3- استخدام التدريب بالاسلوب اليوميومري لتحسين مرحلتى الحجلة والوثبة-3 4- استخدام التدريب بالاسلوب الباليستي لتحسين مرحلة الخطوة -4 وضع نتائج هذه الدراسة أمام أعين المسؤولين لوضع حلول عملية لمعالجة القصور في المستوى الرقمي لمتسابقى -5 الوثبةالثلاثي والوصول إلى تحقيق مراكز أكثر تقدما محاولة مزج الأولمبيين للتدريبيين (اليوميومري-الباليستي)في برنامج واحد وتطبيقه في مسابقات ألعاب القوى وبصفه-6 (الوثب الثلاثي)خاصة	أبوالمعاطي، حمدي محب
5458	12458967	ماجستير	تأثير استخدام التدريب المتقاطع على بعض القدرات البدنية الخاصة لمتسابقى الوثب الثلاثي				
						يهدف البحث إلى تصميم برنامج تعليمي باستخدام التمرينات النوعية ومعرفة تأثيره على مستوى اداء مهارات (الوقوف على الكتفين-الدرجة الأمامية المتكورة) على جهاز عارضة التوازن لمطالبات الفرقة الثانية بأكلية التربية الرياضية بأسوان ، وقد استخدمت الباحثة المنهج التجريبي مستعينة بالتصميم التجريبي (القياسات القليلة - والبدعية) على مجموعتين إحداهما تجريبية والأخرى ضابطة حيث أنه المنهج الملائم لطبيعة البحث ، وتم اختيار عينة البحث بالطريقة العشوائية من بين مطالبات الفرقة الثانية بأكلية التربية الرياضية - جامعة أسوان ، وقد بلغ قوام العينة (50) طالبة ، توزع على النحو التالي: (40)طالبة للعينة الأساسية ، (10)مطالبات للدراسة الاستطلاعية ، وقد أسفرت النتائج إلى أن البرنامج التعليمي باستخدام التمرينات النوعية قد أثر إيجابيًا على تنمية المتغيرات مهارية التالية (مستوى الأداء الفني لمهارة الوقوف على الكتفين على عارضة التوازن بنسبة تحسن (36.49%) - مستوى الأداء الفني لمهارة الدرجة الأمامية المتكورة على عارضة التوازن بنسبة تحسن (250%)) .	حسن، خزان محمد سامي
5459	12458990	ماجستير	تأثير برنامج تعليمي باستخدام التمرينات النوعية على مستوى أداء بعض مهارات جهاز عارضة التوازن لمطالبات كلية التربية الرياضية بأسوان		2017م	يهدف البحث إلى التعرف على تأثير التمرينات الهوائية والحجامة على تركيز حمض اليوريك اسيد في الدم وبعض المتغير الفسيولوجية من خلال : 1- قياس نمية تركيز حمض اليوريك في الدم . (السعة الحيوية ،ضغط الدم،النض)قياس بعض المتغيرات الفسيولوجية 2- استخدم الباحث المنهج التجريبي بأسلوب القياس القبلي والتتبعي والبعدي لثلاث مجموعات. استنادا إلى ما أسفرت عنه نتائج البحث وفي ضوء الاستنتاجات التي تم التوصل إليها، يوصى الباحث بما يلي: تطبيق برنامج التمرينات الهوائية والحجامة على المصابين بزيادة حمض اليوريك اسيد في الجسم مع الإرشاد والنصائح-1 الغذائية للمساهمة في 2- عمل ندوات لتوعية الافراد بمدى أهمية ممارسة الرياضة لما لها من دور فعال في مقاومة الامراض وقاية الجسم-2 على الدولة لتنشيط ممارسة الحجامة وعمل تراخيص مزاوله لها لانها تنتهك من قبل العديد من الافراد الغير مؤهلين لعمل -3 الحجامة . 3- زيادة عدد الدراسات العلمية التي تتناول الحجامة واهميتها وكيفية استخدامها-4 5- ضرورة مساهمة وسائل الاعلام المختلفة بنشر الوعي الرياضي تجاه جميع الافراد كعامل وقائي وعلاجي للأمراض -5	الغزالي، محمود جمال محمد
5460	12459015	ماجستير	تأثير التمرينات الهوائية والحجامة على تركيز حمض اليوريك اسيد في الدم		2016م	يهدف البحث إلى تحديد نسب مساهمة الأداء المهاري من داخل حدود الملعب "منطقة الملعب" وخارجه "المطقة الحرة" عقب أداء ضربة الإرسال وأثناء تبادل تداول الكرة "تداول اللعب" في نتائج مباريات الكرة الطائرة ، ويتطلب ذلك تحقيق الأهداف الفرعية التالية: التعرف على الفروق القائمة في الأداء المهاري من داخل وخارج حدود الملعب عقب أداء ضربة الإرسال وأثناء تبادل-1 الاعرف "تداول الكرة "تداول اللعب قياس مدى ارتباط الأداء المهاري من داخل وخارج حدود الملعب عقب أداء ضربة الإرسال وأثناء تبادل تداول الكرة-2 3- تداول اللعب" ينتجج المباريات"	عبدالرحيم، ولاء عادل
5461	12459063	ماجستير	نسب مساهمة الأداء المهاري من داخل وخارج حدود الملعب في نتائج مباريات الكرة الطائرة للناشئات بالبطولة الإفريقية بالقاهرة 2013م		2017م	يسعى القائمون على تدريب الفرق الرياضية إلى الاهتمام بتنمية المهارات المختلفة لدى اعضاء الأجهزة الفنية والإدارية للفرق الرياضية استثماراً منهم بأهمية تنمية وصقل المهارات الإدارية لدى الأجهزة الفنية والإدارية للفرق الرياضية بحيث يصبح كل منهم مؤهلاً لتأدية المهام المنطة به ولاسيما في ظل التحديات والضغوط والتنوع في عالم الإدارة الرياضية والتغيرات الاجتماعية والاقتصادية والميسية التي تشهدها العالم اليوم ، فإن المطلوب من الأجهزة الفنية والإدارية للفرق الرياضية أصبح مضاعفاً عما كان عليه في السابق ويجب أن يكون متسلحاً بالعلم والمعرفة وأن يكون لديه المهارات الإدارية الكافية التي تعينه على مواجهة تلك الصعوبات. تنضج أهمية البحث من من خلال بناء مقياس المهارات الإدارية للأجهزة الفنية بالأنشطة الرياضية بدولة الكويت ، حيث لاحظ الباحث ندرة الدراسات التي اهتمت بدراسة المهارات الإدارية للأجهزة الفنية للفرق الرياضية بشكل عام ، وعند المدربين بشكل خاص . كما لم تتناول البحوث السابقة في المجال التعرف على المهارات الإدارية للمدربين بشكل خاص.كما لم تتناول البحوث السابقة في المجال التعرف على المهارات الإدارية للمدربين والمديرين الفنيين في الفرق الرياضية فقد جاء هذا البحث بهدف التعرف على المهارات الإدارية للمدربين والمديرين الفنيين في الفرق الرياضية ، فقد جاء هذا البحث بهدف التعرف على المهارات الإدارية للأجهزة الفنية للفرق الرياضية والتعرف على كيفية قياس هذه المهارات ، وبالتحديد فتتضح أهمية البحث من خلال : 1- التعرف على المهارات الإدارية اللازمة للأجهزة الفنية للفرق الرياضية بدولة الكويت * 2- الفروق في المهارات الإدارية للأجهزة الفنية بدولة الكويت وفقاً لنوع النشاط الرياضي الممارس * 3- وهدف البحث إلى بناء مقياس للمهارات الإدارية للأجهزة الفنية ببعض الأنشطة الرياضية بدولة الكويت .	عبدالرحيم، ولاء عادل
5462	12459064	ماجستير	بناء مقياس المهارات الإدارية للأجهزة الفنية بالأنشطة الرياضية بدولة الكويت		2016م	وكان من أهم الاستخلاصات: توجد فروق ذات دلالة إحصائية في المهارات الإدارية اللازمة للأجهزة الفنية ببعض الأنشطة الرياضية طبقاً لنوع النشاط الرياضي الممارس والإمكانات المتوفرة لكل نشاط وخبرة الجهاز الفني الإدارية في هذا النحو . وكان من اهم التوصيات: ضرورة تنمية وتطوير المهارات لإدارية اللازمة للأجهزة الفنية ببعض الأنشطة الرياضية طبقاً لنوع النشاط الرياضي الممارس.	مظفر، مصطفى عيسى خليل
						يهدف البحث الحالي إلى:	
5463	12459083	ماجستير	تأثير برنامج تربية حركية على أداء بعض المهارات الحركية لأدوي الاحتياجات الخاصة بدولة الكويت	الشمرى، زهرة تركي جبر محمد	2017م		

							: تصميم برنامج للتربية الحركية لتحسين لذوي الاحتياجات الخاصة قيد البحث ، وذلك من خلال-1 التعرف على أداء المهارات الحركية لذوي الاحتياجات الخاصة قيد البحث- التعرف على مدى الاختلاف في تأثير برنامج التربية الحركية المقترح والبرنامج التقليدي على أداء المهارات الحركية لذوي- الاحتياجات الخاصة قيد البحث .		
5464	12459154	ماجستير	الاحترق النفسي وعلاقته ببعض خصائص الشخصية والكفاءة المهنية لدى معلمي التربية البدنية بدولة الكويت	الشيخ مساعد، فاطمة عثمان عبدالكريم		2017م	يهدف هذا البحث إلى التعرف على مستوى فاعلية مهارات الاتصال بين مدربي ولاعبى الألعاب الجماعية والفردية بدولة الكويت ، العلاقة بين مستوى فاعلية مهارات الاتصال ببعض المهارات العقلية لدى مدربي الألعاب الجماعية والفردية بدولة الكويت ، وقد استخدمت الباحثة المنهج الوصفي ، يمثل مجتمع البحث معلمي التربية البدنية بدولة الكويت البالغ عددهم نحو (625) معلم التربية البدنية في المرحلة المتوسطة بدولة الكويت ، وعدد (750) من معلمات التربية البدنية في المرحلة المتوسطة بدولة الكويت ، واستخدمت الباحثة مقياس الاحترق النفسي للمعلمين ، مقياس (قائمة) العوامل الخمسة الكبرى للشخصية ، اختبار الكفاءة المهنية للمعلمين كأدوات للبحث ، وكانت أهم نتائج البحث وجود علاقة ارتباطية عكسية سالبة بين البعد الأول "المقبولة" والدرجة الكلية لمقياس الاحترق النفسي للمعلمين بمعامل ارتباط (**450-) ، وجود علاقة ارتباطية موجبة بين البعد الأول "المقبولة" والدرجة الكلية لمقياس الكفاءة المهنية لدى المعلمين بمعامل ارتباط (**494-) ، وجود علاقة ارتباطية عكسية سالبة بين البعد الأول "عدم الرضا الوظيفي" والدرجة الكلية لمقياس الكفاءة المهنية لدى المعلمين بمعامل ارتباط (**667-).		
5465	12459200	ماجستير	تأثير برنامج تدريبي باستخدام التدريب المركب على بعض القدرات البدنية الخاصة والمستوى الرقعي لسباحة 100متر زحف على البطن	حسن، حسن صبحي مندي		2016م	يهدف البحث إلى تصميم برنامج تدريبي باستخدام التدريب المركب (البليومتري-أثقال) ومعرفة تأثيره على ما يلي: بعض القدرات البدنية الخاصة (القوة-السرعة-المرونة-التحمل-التوافق) لدى سباحي الزحف على البطن-1 المستوى الرقعي لسباح 100متر حرة لسباحي الزحف على البطن-2.		
5466	12459327	ماجستير	نموذج مقترح لهندسة العمليات الإدارية لبعض اتحادات الألعاب الجماعية بدولة الكويت	عبدالله، عبدالرحمن علي عبدالرحيم		2016م	يما أن إتحادات الألعاب الجماعية تعتمد بشكل رئيسي على النظم الإدارية والأساليب الإدارية في عملها الداخلي والخارجي وتعمل إتحادات الألعاب الجماعية في إطار من المعلومات القانونية والرامية التي تنجم عنها صلاحيات وسلطات أقل لمديري الإتحادات، وهذا بدوره يزيد من صعوبة تنفيذ الإجراءات المطلوبة لإعادة تصميم العمليات ، كما أن كثرة اللوائح والضوابط التشكيلية تجعل التصديق عليها يأخذ وقتاً أطول مما يجب إضافة إلى عدم تحمس الرؤساء لفكرة تفويض صلاحياتهم أو بعضها لمروسيهم، ليتمكن المرؤوسون من دعم مشروع الهندرة، يضاف إلى ذلك إشغال الإدارة العليا بالجوانب السياسية مما لا يساعدها على تركيز جهودها في مشاريع الهندرة كما أن إتحادات الألعاب الجماعية تنقسم بنظام غير من لحوافز الموظفين. وهذا يزيد من صعوبة إعادة تصميم عنصر الإدارة البشرية لتواكب إعادة تصميم العمليات وهذا قد يؤدي إلى عدم الأخذ بأسلوب الهندرة في إتحادات الألعاب الجماعية والاكتفاء بأساليب التحسن والتطوير التدريجي إذا ما أرادت تطوير نفسها، بالإضافة إلى المركزية الشديدة في بعض إدارات الإتحادات الألعاب الجماعية، ومقاومة التغيير خاصة من قبل المديرين الذين سوف يقودون دورهم مع مشروع الهندرة، ويتنازلون عن سلطاتهم وصلاحياتهم لمروسيهم، وتحول دورهم إلى موجهين وبالتالي لا يؤيدون هذا التوجه أو الأخذ به. وهدف البحث إلى: وضع نموذج مقترح لهندرة العمليات الإدارية لبعض اتحادات الألعاب الجماعية بدولة الكويت. وكان من أهم الاستنتاجات: بناء الهيكل التنظيمي الجديد يدعم الأهداف الاستراتيجية للاتحاد الرياضي وتنقسم عملية اتخاذ القرارات بالاتحاد الرياضي بالمركزية وعدم تفويض السلطة. وكان من أهم التوصيات: من أسباب فشل الهندرة إهمال الجانب الإنساني المرتبط بعملية الإعداد تجاهل القيم والمفاهيم في بيئة الإتحاد الرياضي تؤدي إلى فشل الهندرة.		
5467	12459342	ماجستير	تأثير برنامج تدريبي لتطوير التفكير والتصرف الخططي وفقاً لخطوط اللعب لنادي كرة القدم .	محمود، أيمن صديق		2017م	يهدف البحث إلى : وضع أساس علمي للارتقاء بالسلوك الخططي لنادي كرة القدم ويتحقق ذلك من خلال الأهداف التالية: 1- بناء مقياس للسلوك الخططي لدي نادي كرة القدم بمحافظة سوهاج- 2- وضع برنامج تدريبي لتطوير السلوك الخططي لنادي كرة القدم- التعرف على الفروق بين مراكز اللعب (الدفاع-الوسط-الهجوم) في السلوك الخططي . التعرف على تأثير البرنامج التدريبي المقترح على تطوير السلوك الخططي للاعبين الناشئين في كرة القدم بمحافظة-4 سوهاج . 5- (الدفاع-الوسط-الهجوم) التعرف على نسب تحسن الأداء الخططي لنادي كرة القدم وفقاً لمراكز اللعب		
5468	12459361	ماجستير	تقويم الكفايات الإدارية لموجهي التربية البدنية للمرحلة المتوسطة بدولة الكويت	المجرب، عبدالله خليفة مساعد		2016م	يهدف البحث إلى تقويم الكفايات الإدارية لموجهي التربية البدنية للمرحلة المتوسطة بدولة الكويت ما يلي: واقع الكفايات الإدارية لموجهي التربية البدنية للمرحلة المتوسطة في دولة الكويت- وضع نموذج للكفايات الإدارية لموجهي التربية البدنية للمرحلة المتوسطة في دولة الكويت- استخدم الباحث المنهج الوصفي بالأسلوب المسمي نظراً لمناسبته لطبيعة إجراءات البحث. ومن أهم الاستنتاجات التي توصل إليها الباحث: الإطلاع الدائم على الإجراءات الإدارية والحوار والفتاح مع المعلمين واتخاذ القرارات المناسبة نقل وتبادل الخبرات استخدام أسلوب الثواب كوسيلة لتحفيز واكتشاف نواحي القوة والضعف في أداء المعلمين التوصل إلى نموذج للكفايات الإدارية لموجهي التربية البدنية بدولة الكويت . ومن أهم التوصيات: ضرورة الاهتمام بتطبيق مبدأ الثواب والعقاب لتحفيز المعلمين وإعداد المعلمين إدارياً الاهتمام بعملية نقل الخبرات استخدام الأسلوب الديمقراطي العمل على تقويم أداء المعلم واكتشاف نواحي القوة في الأداء تقيم نموذج الكفايات المقترح بين فترة وأخرى.

5470	12459382	ماجستير	تقويم الأنشطة الترويحية للهيئة العامة للتعليم التطبيقي بدولة الكويت	الصفار، محمود عبدالخضر عبدالصمد		2016م	أن المناشط الترويحية المختلفة تساعد على تنمية الفرد تنمية متكاملة، ولذا فإن توفير المناشط الترويحية لأبناء الوطن وبخاصة للشباب خلال المرحلة الجامعية تساعد على إشباع حاجات الإنسان، وتسهم بشكل فعال في تنمية وتمتيع المجتمع معاً. وهدف البحث إلى: تقويم الأنشطة الترويحية للهيئة العامة للتعليم التطبيقي بدولة الكويت. وكان من أهم الاستنتاجات: توجد ميزانية للشااط البدني الترويحي ضمن ميزانية الهيئة العامة للتعليم التطبيقي وللشاطر البدني الترويحي مدرج ضمن خطة برامج الهيئة العامة للتعليم التطبيقي . وكان من أهم التوصيات: ضرورة الاهتمام بممارسة الترويح الرياضي بالهيئة العامة للتعليم التطبيقي حتى يقوم بالدور التربوي والإجلبى له ممن يحسن من استثمار وقت الفراغ لدى الطلاب والطالبات ويعود عليهم بالنفع نفسياً من خلال التخلص من الضغوط المختلفة والتحرر من الروتين واكتساب الطلاب الاتجاهات الإيجابية نحو الأنشطة الترويحية.		

5471	12459711	ماجستير	برنامج تعليمي مقترح باستخدام الموديولات في ضوء التحليل الكيفي وتأثيره في بعض جوانب تعلم مهارة الوثب الثلاثي	الوزير، سالي سامي احمد			2010م	يهدف البحث الى بناء برنامج تعليمي مقترح باستخدام اسلوب الموديولات في ضوء التحليل الكيفي ومعرفة تأثيره في بعض جوانب تعلم مهارة الوثب الثلاثي . اشتمل مجتمع البحث على طالبات الفرقة الثانية بكلية التربية الرياضية جامعة طنطا للعام الدراسي 2008/2009 وقد قامت الباحثة باختيار عينة عشوائية عددها 40 طالبة من اجمالي مجتمع البحث عدده 219 طالبة وذلك بنسبة مئوية قدرها 18.26% , ولقد تم تقسيمهم ايلي مجموعتين متساويتين احدهما تجريبية وتشتمل على 20 طالبة . ولقد اتبع معهن البرنامج المقترح باستخدام الموديولات في ضوء التحليل الكيفي وتأثيره في بعض جوانب تعلم مهارة الوثب الثلاثي , والاخرى ضابطة وتشتمل على 20 طالبة ولقد اتبع معهن الطريقة التقليدية (المتبعة) - الشرح واداء النموذج - لتدريس نفس المهارة قيد البحث . وكئن من اهم النتائج : يؤثر اسلوب الموديولات التعليمية تأثيرا ايجابيا في تعلم مهارة الوثب الثلاثي لدى طالبات كلية التربية الرياضية - جامعة طنطا في كل من (التحصيل المعرفي - ومستوى الاداء المهارى " الفنى") يؤثر اسلوب شرح الاداء(شرح و اداء النموذج) تأثيرا ايجابيا في تعلم مهارة الوثب الثلاثي لدى طالبات كلية التربية الرياضية - جامعة طنطا في كل من (التحصيل المعرفي ومستوى الاداء المهارى "الفنى") يؤثر اسلوب الموديولات التعليمية تأثيرا ايجابيا افضل من اسلوب الاداء(شرح و اداء النموذج) في تعلم مهارة الوثب الثلاثي لدى طالبات كلية التربية الرياضية - جامعة طنطا في كل من (التحصيل المعرفي - الاداء المهارى " الفنى")		
5472	12459771		Modeling and compensations for nonlinearities in aharmonic drive mechanism for high presision motion.	Mohamed, samah abd el raheem.			2017	In motion control, with the rapid developments in the applicable new technologies, designing of high precision servo systems becomes a pressing necessity. Moreover, servo actuators provided with harmonic drive have been widely used in many industrial applications such as industrial and/or humanoid robots, and precision positioning mechanisms. Harmonic drives can exhibit dynamic behavior surprisingly more turbulent than that of conventional gear transmissions. According to practical issues, those mechanisms generally controlled as semi-closed loop feedback control systems. Semi-closed control is a current practice in industry in which the load position is controlled based on feedback of motor shaft position. In order to adapt to the increasing demand for high-precision motion, disturbances of the servo actuators provided with harmonic drive, such as nonlinear friction forces and angular transmission error, should be compensated. It is known from literature that simple linear feedback control techniques such as PID are insufficient to compensate for neither the nonlinear friction behavior nor the angular transmission error. In this thesis, intelligent compensating techniques are proposed to improve the positioning precision of the mechanism. First of all, the modeling of the system is discussed. Second, in order to preserve the load position according to the reference with high precision response, intelligent control algorithms are applied. The proposed control system has been designed as a cascade control system in which the primary variable (position) is controlled by adjusting the set point of the related secondary variable control loop (velocity set point), and therefore, the secondary variable (velocity) affects the primary variable through the process. A proportional controller (P) is designed as position controller where a proportional plus integral controller (PI) is designed as velocity controller. Designing of a proportional controller cascaded with a tuned proportional plus integral fuzzy logic controller (P-PIFLC) is proposed as the first control algorithm. Where, nonlinear scaling of the PIFLC normalizing input scaling factors is proposed as the second control algorithm. The effectiveness of the proposed controllers is verified using MATLAB/SIMULINK simulator and the results were compared with those obtained using conventional P-Pi controller. The results show the superiority of the proposed control techniques over the conventional P-Pi.

5474	12459778		Reuse of cement kiln dust in chemical stabilization of problematic sediments at upper egypt/	Mohsmed, Samar yousef sayed.			2017	The present study evaluates the geotechnical and mechanical properties of expansive shale of Dakhla and Esna Formations. The samples are collected from El-Balas area, west of the Nile, Qena, and from El-Quraya area, east of the Nile, Qena, Egypt. Using Hydrometer test it is found that Dakhla Formation from the two localities has about 73% silt, while Esna samples from El Ballas area (EB) have 83% silt, and Esna samples from El-Quraya area (EQ) has about 91% silt. All studied samples contain about 2% fine sand and the other particles are clay size. The studied shale samples have high plasticity index ranging between 15 to 27. The shale samples tested, are classified according to unified soil classification system USCS as MH (inorganic clayey silt with high plasticity index). However, according to highway research board classification system H.R.B/(AASHTO), they are classified as A-7-5 (fair to poor sub-grade).from the results it can be concluded that; the tested samples are expansive shale (> 90% free swelling) due to their high content of clay minerals and need to be stabilized to reduce the swelling. Three different additives are used in the stabilization program of the studied samples as lime (L), cement kiln dust (CKD), and mixture of L/CKD. Based on pH-test it was founded that; the optimum contents of additives used for stabilization of Dakhla Formation were as follow; 4% in case of using lime, 10% in case of using CKD, and 2% lime with 8% CKD in case of using a mixture of them. In case of Esna Formation; the optimum contents of additives are 4% in case of lime, 10% CKD, and 2% lime with 8% CKD in case of using a mixture of		

						them. Proctor test according to (AASHTO, T99) is used to detect the optimum water content (OWC) for natural and treated samples. Unconfined compressive strength values (qu) revealed that using CKD alone can increase the strength of the treated samples more than using lime, however a mixture of lime and CKD can also increase the strength but using CKD without lime is more cost effective. Also the strength increased with increasing curing time 7 to 28 days. The strength of stabilized DB samples increased to its maximum (1450.09 Kpa) when treated with 8% CKD and cured for 28 days. In case of DQ qu-values increased to its maximum (1301.89 Kpa) when stabilized with 3% lime plus 8% CKD mixture 28 days curing time, also it reaches a high strength value (1290.56 Kpa) when stabilized with 12% CKD and cured for 28 days. However, qu-value of EB samples reaches its maximum (1927.05 Kpa) when stabilized with 2% lime plus 6% CKD and cured for 90 days. Also its strength increased to (1847.47 Kpa) when stabilized with 10% CKD and cured for 90 days. While EQ samples reach their maximum strength (1696.97 Kpa) when stabilized with 10% CKD and cured for 90 days. Free swelling percent of the studied shale samples decreased significantly when the samples treated with lime, CKD, and lime/CKD mixtures. The free swelling of DB samples decreased from 80% to 2.67, 3.33, and 0% when treated with 3% lime, 8% CKD, and 2% lime plus 6% CKD, respectively, at 90 days curing time. Free swelling of DQ samples are reduced to minimum value when treated with 10% CKD and cured for 90 days (from 104 to 4%). Free swelling percent of EB samples are decreased from 98.33 to 7% when treated with 2% lime plus 6% CKD and cured for 90 days. However, the free swelling of EQ samples were reduced when treated with lime, CKD, and lime/CKD, where free swelling percent of all samples are reduced to $\leq 10\%$. Some of the studied treated samples have high swelling percent, that proved the formation of ettringite mineral which considered as expansive mineral. Ettringite is resulted from the hydration of calcium sulfate, which present in the shale, lime, and CKD. Ultrasonic P-wave velocity test proved its effectiveness in measuring the geotechnical properties of the studied samples. The results are very resembles to the unconfined compressive strength values. Increasing Vp values with increasing curing time proved the reducing of pore size of the treated samples. In case of DB sample the Vp reached its higher values (1373 m/sec) when treated with 8% CKD and cured for 28 days. In case of DQ samples Vp increased to its maximum value (1629 m/sec) when stabilized with 12% CKD and cured for 28 days. However, Vp of EB samples reached its maximum value (1730 m/sec) when stabilized with 10% CKD and cured for 90 days. While EQ reached its maximum Vp-velocities (1598 m/sec) when stabilized with 2% lime with 6% CKD mixture and cured for 28 days, also it reached up high velocities (1519 m/sec) when stabilized with 10% CKD and cured for 90 days		
5475	12459783		Evaluation and beneficiation of white sands north eastern desert egypt/	Ahmed, Ali ismail ali.		2017 This study conducted on the white silica sands samples from Wadi Qena and Somr El-Qaa Formations in North Eastern Desert, between Wadi Dakhl and the central part of Wadi Qena. The study aimed to evaluate the quality of these sands and find out its possible industrial applications; Examine the best suited and cost-effective processing methods; Develop a beneficiation plant for the total utilization of all size fractions and design special flotation-attribution scrubbing machine for silica sands processing and verify the possible paleodepositional environment, source and geotectonic setting of these sands. The study has been designed and carried out in two main stages. The first stage is integrated evaluation and characterization of the physical, the mineralogical and the geochemical properties. The second stage is the beneficiation of the studied sands using screening, attrition scrubbing and reverse flotation techniques. Grain size analyses of representative samples showed that the average grain size parameters are as following; mean grain size for the kaolinitic sandstones of Wadi Qena Formation is 2.33ϕ (Fine Sand), sorting is 1.15ϕ (Poorly Sorted), skewness is 0.44 (Very Fine Skewed), and kurtosis is 4.23 (Extremely Leptokurtic). The average mean grain size for the silica sands of Somr El Qaa Formation is 1.791ϕ (Medium Sand), sorting is 0.507ϕ (Moderately Well Sorted), skewness is -0.058 (Symmetrical) and kurtosis is 1.274 (Leptokurtic). The Bivariate plot of standard deviation against mean size showed that the sandstones of Somr El-Qaa Formation was mainly deposited in a shallow agitated marine environment (beach) while the sandstones of		

							Wadi Qena Formation was mainly deposited in a fluvial environment. The morphological study results showed that the average circularity and angularity of Wadi Qena Formation sand grains ranged from 0.72 to about 0.81 (High Circularity) and from about 0.24 to 0.43 (Angular to Sub-angular), Somr El-Qaa Formation sand grains ranged from about 0.70 to about 0.80 (High Circularity) and from about 0.38 to 0.54 (subrounded), respectively. Generally the grain shape parameters are suitable for the specifications of many industries, with limitation in roundness parameter for hydraulic fracturing sands and filter media sands. XRD study of the Wadi Qena Formation sandstone samples indicated that the quartz and kaolin clay mineral were found as major constituents. While the mineralogical investigation of the Somr El-Qaa Formation sandstone samples indicated that the one and only major mineral constituent was quartz. The heavy minerals analysis results showed that the weight percentage of the heavy minerals in the studied size fractions (500 or 600-90 µm) was found to be 0.036 % for the Somr El Qaa Formation samples and 0.05 to 0.06 % for the Wadi Qena Formation samples. Nonopaque minerals constitute the main bulk of the heavy mineral suite as they reach in abundance more than 51 % in most samples, th

5509	12460348	Numerical simulation of improving the air distribution systems for commercial aircraft cabins/	Iraqi, Mohamed sabry ibrahim.			2017	Air distribution system is a basic component of the Environmental Control System (ECS) of passenger aircraft and it should correctly distribute the air appropriately, cleaning up contaminated air and minimizing cross-airborne infection to provide a healthy and comfortable environment for passengers and crew. As aircraft operators have required to substantially reducing the fuel consumption by flying at higher altitudes, the energy cost for providing adequate outside air for ventilation has increased, which has led to a significant decrease in the amount of outside air provided to the passenger cabin. Consequently efficient fresh air delivery has become an important research issue in the field of aircraft ventilation To improve the air distribution system used in the existing aircraft cabins, two different case studies are investigated numerically by means of Computational Fluid Dynamics (CFD) approach with ANSYS-FLUENT solver. To ensure the simulation results are representative of the physical condition, the CFD model is first validated and the numerical results are compared with the experimental data. A typical Boeing 767-300 commercial aircraft cabin is selected since a quantitative data is available from an experimental study for the same domain. Then the validated CFD model is used to predict the distributions of the air velocity, air temperature, and CO2 concentration in the aircraft cabin for the two proposed case studies The first case proposed that the fresh air is supplied into the aircraft cabin at six different air inlet directions of A, B, C, D, E & F that correspond to the inlet angles of (0°, 180°), (355°, 185°), (350°, 190°), (340°, 200°), (330°, 210°), (315°, 225°) respectively. The simulation results showed that the flow pattern, temperature and CO2 levels are improved significantly inside the aircraft cabin in case of changing the air inlet supply angle. The performance of mixing-air distribution system for the whole aircraft cabin is enhanced remarkably with directions A, B and C. Furthermore, directions B and C provided the best ventilation performance among the six proposed directions within both cabin and local passengers' breathing zones in terms of thermal and health comfort. The numerical results of direction B showed high constancy and stability in flow field, temperature and CO2 level in the whole cabin and at the local breathing zones compared to direction C. In the second proposed case study, transient simulations were conducted on the three dimensional model. Three rates of inlet flow were investigated in this design of 100% steady, 110% periodic and 120% periodic. The inlet velocity with periodic air inlet supply conditions is set to

5513	12460368	Forensic insect succession and its effects on the decomposition of some corpses encountered indoor and outdoor during different seasons/	Ali, Gihan hassan Mohammed.			2017	The study sites were located on the south valley university land in Qena city, Egypt. Study was conducted for one year at two different habitats. For each season, two sites were selected, one outdoor habitat and the other indoor habitat. Sites for carcass placement were chosen on the roof of faculty of science (outdoor environment) and at room on the basement of the faculty (indoor environment). The rabbits, <i>Oryctolagus cuniculus</i> , are chosen to simulate the soft skin of a new baby and they were characterized by a relatively uniform size. The mentioned rabbits were purchased locally with different colors but comparable in size. On the delivery day of each season, rabbits were weighed, and then euthanized with air injection to mimic the normal death case without any chemicals or drugs. After death, the animals were immediately delivered post-mortem to the research sites in an appropriate man-made plastic traps which were designed specifically to allow insect access, but prevent them escaping. For this purpose, each trap was composed from two parts, the lower part was designed for placement of dead rabbits, while the upper part act as collection chamber of insects. Five holes were made on the sides of lower part to allow access for the insects to oviposit on the carcasses, but without attempts to escape because they were made their way to the upper part of trap to be collected. Then, animals were immediately placed into plastic traps and left exposed to natural conditions. Each rabbit was placed on its side. All rabbits were placed within one hour of the time of death. A tray containing sawdust was placed under each cage to facilitate the collection of larvae leaving carcasses for pupation Three experiments were conducted in each season. Four rabbit carcasses were placed in each experiment, two at the indoor habitat and two at the outdoor habitat. All efforts were made to keep cadaver disturbance to a minimum during taking samples. All rabbits were placed on their side. Observations, photographs, temperature, humidity readings and sample collections were made daily at varying times of the day according to each experiment. The temperatures and humidity readings were taken with digital thermometer.

							from the shore to distant shore. Fishes represent one of the major controversial components due to their importance both from economic and human health according to the variety and difference in their role on several levels: Fishes are the most numerous and diverse of the major vertebrate groups. They dominate the waters of the world through a marvelous variety of morphological, physiological, behavioral patterns. Their diversity is reflected in the large number of living species. Moyle et al. (2000) pointed that about 200 new fish species are being described each year and the total may reach 30,000 or more. Fishes represent more than 58% from living marine ecosystem (Moyle et al., 2000; Rubio-Godoy, 2007). Fishes are valuable sources of high grade protein and organic products. Also, fish in terms of good value rank and mostly superior having less amount of fats, represents the excellent sources of polyunsaturated fatty acids and more or equal protein as compared to other fleshs consumed as food by human beings (Haruna, 2006; Staniskiene et al., 2006; Salawu et al., 2013; Singh, et al., 2013). Fishes occupy a significant position in the socio-economic status at great sectors of countries by providing the population not only the nutritious food but also income and employment opportunities, contribution to economic growth and human welfare, stimulation growth of a number of subsidiary industries and contribution to the livelihood of a large section of economically underprivileged population (Ayyapan & Krishanan, 2004). Fish is a renewable source of wealth. Unlike minerals and other fixed resources which do not have self-generating capacity to replenish the loss due to natural causes and human exploitation. Fish has a therapeutic value; from the positive side, modest doses of sea foods a week, significantly prevent the coronary heart diseases, also reduces the tendency of blood to clot and helps lower cholesterol levels in the blood (Shaukat, 2008). Moreover, from the negative side, several fishes represent a pathogenic agent for human due to transmission of several helminths parasites represented by "the anisakid nematodes (particularly Anisakis simplex and Pseudoterranova decipiens), cestodes of the genus Diphyllbothrium and digenetic trematodes of the families Heterophyidae, Opisthorchiidae and Nanophyetidae. Seafood-associated infections by acanthocephalans are rarely reported in humans" (Adams et al., 1997). Most fish species have at least some direct monetary value, are part of food webs that support economically important species, or live in environments whose good health is essential for the support of fisheries (Shaukat, 2008) The cultural values of fishes include two wide values; 1) The first one is the scientific values of fish which are obvious to Ichthyologists who find the study of fish essentially interesting. 2) The second one is the educational values of fish which are also obvious where fishes are the one group of vertebrates in which it is really possible to maintain large populations in the laboratory for observation and experimentation. Many varieties are readily available for dissection, giving an easy overview of the several types of adaptations possible in vertebrates. Most important is that they can typically be found in large numbers and diversity in waters fairly close to most educational institutions, so that many types of ecological demonstrations can be made. Fish have the right combination of availability, size and ease of handling to make them the most desirable group of vertebrates for comparative classroom studies of ecology, behavior, evolution and anatomy, and to be very valuable in other areas such as genetic and physiology as well.		
5518	12460391	PARASITOLOGICAL STUDIES ON SOME FISHES OF THE RIVER NILE AT QENA AND ASWAN GOVERNORATES IN EGYPT	fadlallah, Ali mansour.			2017	Fishes are at the present superior to other vertebrates in number of individuals, and probably also in number of species. There are more than 25000 different species of fish that are known and many new forms are discovered every year (Greenwood, 1963). Most fish are ectothermic ("cold-blooded"), allowing their body temperatures to vary as ambient temperatures change. Fish are abundant in most bodies of water. They can be found in nearly all aquatic environments.		

							Fish is one of our most valuable sources of protein food. worldwide, people obtain about 25% of their animal protein from fish by the increasing intensification of fish production. The successful breeding of commercially important animals depends upon the quality and quantity of their dietary protein. The recognition that fish contain proteins of superior nutritional properties places them in an especially important category of foods (Brogstrom, 1962). Like humans and other animals, fish suffer from diseases and parasites. Fish defences against disease are specific and non-specific. Non-specific defences include skin and scales, as well as the mucus layer secreted by the epidermis that traps microorganisms and inhibits their growth. If pathogens breach these defences, fish can develop inflammatory responses that increase the flow of blood to infected areas and deliver white blood cells that attempt to destroy the pathogens. Specific defences are specialised responses to particular pathogens recognised by the fish's body that is adaptative immune responses. In recent years, vaccines have become widely used in aquaculture and ornamental fish, for example vaccines for furunculosis in farmed salmon and koi herpes virus in koi. Some commercially important fish diseases are VHS, ich and whirling disease. About 80% of fish diseases are parasitic especially in warm water fish (Eissa, 2002). No doubt that fishes harbor a wide range of ecto- and endoparasites infecting the alimentary canal, liver, kidney, reproductive organs, muscles as well as gills and skin (El-Naggar & Khidr, 1988 and Yang et al., 2005) Ecto-parasites are the most dangerous group that causes severe mortalities (Shalaby and Ibrahim, 1988). In Egypt there are long periods of optimum warm weather that enable external parasites for more production and cause bad effects on fish. The majority of the monogenetic trematodes of fishes are ectoparasites. Monogeneans (flatworms) are among the most host-specific of parasites in general and may be the most host-specific of all fish parasites. Monogenetic trematodes of freshwater fishes could be considered as one of the most prevalent diseases affecting skin and gills, which included irritation, severe destruction of the gills, impaired breathing as well as severe losses too (Sineszko and Axelrod, 1980). They are the most abundant ectoparasitic flukes of fish, with greater diversity of species occurring in tropics than in the temperate regions of the world (Rohde, 1982). They spend their entire life cycle as parasites on gills and skin of fish, hold to the fish by the use of hooks and attachment organs at the posterior end. These parasites attack fish causing massive destruction of skin and gill epithelium. Even moderate infection of these organisms on small fish may prove a fatal disease since the infection may cause the fish to stop feeding (Meyer, 1966). Fishes act not only as final host but also as intermediate host for larval stages of many parasites like encysted metacercariae of different species of Trematodes (Clinostomum complantum, Clinostomum phalacrocoracis and Euclinostomum heterostomum), which affect fish causing retardation of growth especially for young fish and increasing the possibility of the secondary infections by decreasing the fish immunity (Elamei, 2001). Infection of fish by encysted metacercariae of digentic trematode is due to the contamination of water resources as rivers, lakes and sea water with human, animals and bird settlements which harboring eggs voided in their feces,

5520	12460399	Interpretation of aeromagnetic data of wadi Gurud area of central eastern desert Egypt/	Mohammed, Basma mohammed hebashi.			2017	The area under study is a part of the central eastern desert of Egypt and located north of Qena city the study area is bounded by latitude 26° 38' and 27° 10' N and longitude 32° 30' and 33° 16' E the study area covers about 3144 Km² of the central eastern desert of Egypt. The area is mountainous with moderate to high relief and the majority is covered by crystalline basement (Igneous and Metamorphic) rocks in its eastern parts. Sedimentary rocks and wadi sediment cover the remaining western part. Quaternary sand and gravels extensively cover plains and wadies. The present study deals essentially with the analysis and interpretation of aeromagnetic data. In brief, the proposed study has the following main objectives: - Mapping the surface and subsurface structures that can shed more light on the structural setting of this zone in the Eastern Desert and its relation to the tectonic setting of North Africa and the Red Sea. - Analysis of the aeromagnetic data to present a reasonable interpretation that would refine our geological knowledge and help for further understanding of the different processes that affect the rock units in the study area. - Determination of the depth to the basement in sedimentary covered areas, and also determining the depth to the features of interest that might have structural or mineral significance. The aeromagnetic and data of the study area were compiled from surveys that have been conducted in 1983 by the Western Geophysical Company of America (Aero Service Division) for the Egyptian General Petroleum Corporation (EGPC) in conjunction with the Egyptian Geological Survey and Mining Authority (EGSMA). The survey was conducted along nearly parallel flight lines that were oriented in a NE-SW direction at a 1.5 km spacing intervals, while the tie lines were flown nearly perpendicularly in a NW-SE direction at 10 km spacing intervals. The present study was achieved using the following geophysical and		

							geological data: □ The aeromagnetic contour map with a scale of 1:50,000. A digitizing process was applied to the original map to obtain digital forms of the data. □ The geological map of the study area derived from the geological map of Assiut (scale 1: 250,000) published by (EGSMA, 2005). □ The published geophysical and geological studies of the area. Several enhancement techniques were applied to the aeromagnetic data after their transformation to the frequency domain using Fourier technique. As a result, several outputs mainly in the form of maps that emphasized the magnetic rock properties in the uppermost surface to shallow and deep subsurface depths were produced with the final goal of obtaining a more interpretable form of the data that would assist in achieving the objectives of the study.

5525	12460438		Ameliorative efforts of propolis extract on some biochemical and hematological/	Abd el megeed, sayed abd elhafeez abeet.		2017	The aims of the present study was to: 1. Evaluate the effect of thermal burn wounds on guinea pigs by measuring some hematological and biochemical Parameters with /or without treatment. 2. Investigate the effect of topically treatment with Propolis on thermal burn wounds. 3. Investigate the effect of orally and topically treatment with Propolis on thermal burn wounds. 4. Comparing the effect of propolis treatment with those of silver sulfadiazine (SSD), the most widely used burn treatment The skin works as a barrier to the environment, which is responsible for protecting the organism from water loss and penetration of harmful substances. If this barrier is disturbed by mechanical or thermal action, the skin starts a complex repair mechanism known as wound healing. The seriousness of a burn depends on how deeply the burn has affected the skin tissue and the surface area of the body affected. Burns are commonly grouped based on how deep the tissue is burned. They may be grouped into superficial (first-degree), partial (second-degree), and full (third-degree) thickness burns. The superficial thickness burn only affects the epidermal layer of the skin while partial thickness burn involves the epidermal layer as well as a varying thickness of the dermis. Thus, partial thickness burn can be further divided into superficial partial and deep partial thickness burns. In a deep partial thickness burn, there is damage in the deeper structures of the dermis involving sweat glands and hair follicles. Superficial thickness and superficial partial thickness burn wounds can heal spontaneously if they do not become infected. If the burn destroys the more superficial part of the dermis as well, epithelial cells from the deep parts of hair follicles will grow long the interface between the living dermis and dead dermis and will form new epidermis at this level (Hinman and Maibach, 1963). However, if the inflicted damage extends below the bases of the hair follicles, regrowth of the epidermis can occurs so slowly that a skin graft would be necessary (Cormack, 1987). Healing requires the collaborative efforts of various tissues and cell lineages. It involves aggregation of platelets, clotting of blood, fibrin formation, an inflammatory response to injury, alteration in the ground substances, angiogenesis and re-epithelialization.

5558	12460571		role of oxidative stress in preterms with respiratory distress syndrome/	Abdelaziz, Ayat mohammed.	2017	Respiratory distress syndrome of the neonate (neonatal RDS) is still an important problem in treatment of preterm infants. It is accompanied by inflammatory processes with free radical generation and oxidative stress (Negi et al., 2015). Information about oxidative stress in preterms with respiratory distress syndrome is lacking (Hosny et al., 2013). Infant respiratory distress syndrome (IRDS), also called neonatal respiratory distress syndrome or respiratory distress syndrome of newborn, previously called hyaline membrane disease (HMD), is a syndrome in premature infants caused by developmental insufficiency of surfactant production and structural immaturity in the lungs. Infant respiratory distress syndrome affects about 1% of newborn infants and is the leading cause of death in preterm infants (Rodriguez et al., 2002). In neonates born with respiratory distress syndrome, respiratory failure due to deficient alveolar development and surfactant production could be complicated by diminished antioxidant stores and enzymatic antioxidant inducibility. The premature newborn's lung is particularly susceptible to oxidant stress because there are many sources of reactive oxygen species (ROS) production and a relative lack of antioxidant defenses (Negi et al., 2015). Oxidative stress, an imbalance toward the pro-oxidant side of the pro-oxidant/antioxidant homeostasis, occurs in several human diseases. Among these diseases are those, in which high levels of protein carbonyl (CO) groups have been observed, including respiratory distress syndrome. Reactive oxygen species may damage all types of biological molecules. Oxidative damages to proteins, lipids, or DNA may all be seriously deleterious and may be concomitant. However, proteins are possibly the most immediate vehicle for inflicting oxidative damage on cells (Dalle-Donne et al., 2003). Carbonyl (CO) groups (aldehydes and ketones) are produced on protein side chains (especially of Proline, Arginine, Lysine, and Threonine) when they are oxidised. These moieties are chemically stable, which is useful for both their detection and storage (Berlett & Stadtman, 1997).The usage of protein CO groups as a marker for oxidative stress may have some advantages in comparison with lipid peroxidation products such as malondialdehyde "MDA", because the formation of protein bound CO groups seems to be a common phenomenon of protein oxidation and because of the relatively early formation and relative stability of oxidised proteins. It is known that cells degrade oxidised proteins within hours and days whereas lipid peroxidation products are detoxified within minutes (Dalle-Donne et al., 2003).Superoxide dismutase (SOD) and glutathione peroxidase (GPx) function as enzymatic antioxidants by neutralizing pro-oxidants and thus prevent damage to the cellular structure (Hosny et al., 2013). Superoxide dismutase is the vanguard cytoprotective enzyme in that it disproportionates superoxide anion to O2 and H2O2, the latter being a substrate for GPx and catalase "CAT". Glutathione peroxidase and CAT are both predominantly intracellular cytoprotective enzymes, but in addition to scavenging H2O2, GPx and not CAT, also scavenges lipid hydroperoxides (Clifford & Lovina, 2012).

5578	12460615	updates in prevention of preclompsia /	Hassan, Doaa ahmed.			2016	Preeclampsia remains a frequent and potentially dangerous complication of pregnancy. It affects between 0.4% and 2.8% of all pregnancies in developed countries and many more in developing countries, leading to as many as 8 370 000 cases worldwide per year. □ This common disorder, which is more prevalent in first pregnancies is associated with the highest maternal and fetal morbidity and mortality of all pregnancy complications , with > 90% of the most serious outcomes a curing in developing countries. □ The preferred definition is a diagnosis of pregnancy-induced hypertension (diastolic blood pressure > 90 mmHg) occurring after week 20 of gestation with proteinuria (either > 300 mg protein per day or an urinary protein /creatinine ratio > 30 mg/mmol).Eclampsia is defined as the occurrence of seizures in a woman with preeclampsia that cannot be attributed to other causes. Edema occurs in too many women with normal pregnancy to be a discriminate and has been abandoned as a marker in this and other classification schemes. □ Preeclampsia is considered severe if one or more of the following criteria is present; blood pressure of 160mmHg systolic or higher or 110 mmHg diastolic or higher on two occasions 6 hours apart while the patient is on bed rest, proteinuria of 5gm or higher in a 24-hour urine specimen or 3+ or greater on two random urine samples collected at least 4 hours apart. Oliguria of less than 500 ml in 24-hours, cerebral or visual disturbances, pulmonary edema or cyanosis, epigastric or right upper-quadrant, impaired liver function, thrombocytopenia or fetal growth restrictionThe risk of preeclampsia markedly increases in women with previous preeclampsia and in those with either preexisting vascular disease or conditions associated with increased cardiovascular risk, including renal disease, hypertension, diabetes, thrombophilia, and obesity (body mass index >29). □ The pathogenesis of preeclampsia involves inadequate trophoblast invasion, often leading to poor placental perfusion, generalized endothelial function, and immune maladaptation and inflammation.		

							Various biochemical tests, hematological tests and Doppler ultrasonography, suggested to be of value in prediction of preeclampsia, have been evaluated. Some of these tests are currently available for clinical use, where as others exist only in the laboratory. However, none has been found to fulfill all desired criteria for the prediction of the development of preeclampsia There currently are no well-established measures for preventing preeclampsia. Numerous clinical reports and randomized trails described the use of various methods to prevent or to reduce the incidence and severity of preeclampsia. Both low-dose aspirin therapy and daily calcium supplementation have been studied as preventive measures but have not shown to be beneficial in the general pregnant population and are not recommended for primary prevention of preeclampsia. There are at least 15 randomized trials evaluating the use of various antihypertensive drugs including diuretics for the prevention of preeclampsia. Results of these trials reveal no such benefit. There are randomized trials evaluating magnesium, zinc, or fish oil supplementation to prevent preeclampsia. The majority of these trails had limited sample size; however, these results reveal minimal-to-no-benefit.

5582	12460623		Performance of grounding grids at normal and abnormal conditions/	Ahmed, Sara yassin omar.	2017		The function of the protection system is to protect the equipment in the power substation against large fault currents. One of the important protection systems is the grounding system. This thesis presents a comparison between two designs of the grounding grid in homogenous soil resistivity and non-homogenous soil resistivity. The first one is a square type grounding grid and the second one is a circular type grounding grid. Firstly, the two types are assumed to be having the same total area enclosed by the ground grid, and secondary, the two types are assumed to be having the same length of the total grounding grid conductor. The parameters under study are the grounding resistance, step voltage, touch voltage and earth surface potential. The charge simulation method (CSM) and the image method are used within this study, and the effects of the parameters such as soil resistivity, depth of grounding grid, the number of meshes and presence of the vertical rods, on the performance of grounding grids are taken into account. Finally, the validation of the simulation method is done by comparing the simulation results with the experimental results obtained in this study. When lightning strikes the overhead shield wire of a transmission line or tower, the lightning current flows into the ground from the grounding system through the tower. The lightning current waveform has pioneer influence on dynamic performance of grounding system. Also, the dynamic performance of grounding system affects by configuration of grounding system, electrical permeates of soil, and frequency content. In past, the researchers were considered the electrical parameters (conductivity and permittivity) of soil as constant values. In this thesis, the frequency dependence of soil electrical parameters during lightning discharge is taken into account. Five models based on experimental and measurements data by Scott (S), Smith - Longmire (SL), Messier (M), Visacor-Portela (VP) and Visacor-Alipio (VA) are presented. These simple empirical formulas are used to estimate the harmonic impedance, ground potential rise (GPR), transient impedance, impulse impedance, impulse coefficient, and decrement factor (DF) when frequency dependence of electrical parameters of the soil is taken into account. There are several numerical methods used to study the performance of grounding systems under lightning current stroke, in this thesis the transmission line method is used.

5593	12460898		Estimation of some heavy metals residues in some meat products in Qena city /	Dandarawy, Mohamed korashe abbas.		2016	Recently the problem of pollution has become a major threat to human health, animal health and plant. Among these pollutants and the most dangerous to the public health heavy metals that are packed with a lot of different parts of the globe. Meat consumption had been identified as the major pathway of human exposure to heavy metals. In this study, some undesirable metals as lead and cadmium and two trace essential metals as copper and zinc were detected in many daily eaten meat products as beef shawarma, canned beef meat, frozen beef burger, cooked beef burger and beef luncheon in Qena city as well as measuring the effect of cooking on detection of their residues. In this study, 100 samples (20 from each meat products) were collected from different markets and restaurants in Qena city. Samples were analyzed by iCAP device after its digestion. In beef shawarma the concentrations of lead, cadmium, copper and zinc mean residual levels were 1.59±0.65, 0.07±0.0038, 2.29 ±0.37 and 61.70±1.20 p.p.m, respectively. The data revealed that 18(90%) samples showed lead concentration exceeded the Egyptian standards permissible limits for lead. While, 14(70%) samples showed cadmium concentration exceeded the Egyptian standards permissible limits for cadmium. Furthermore, 20(100%) samples showed copper concentration within the Egyptian standards permissible limits for copper. Finally, 1(95%) samples showed zinc concentration exceeded the Egyptian standards permissible limits for zinc. In canned beef meat the concentration of mentioned metals were 2.04±0.711, 0.034±0.004, 5.01±1.17 and 12.49±0.62 p.p.m, respectively. The data showed that 20		

							(100%) samples showed lead concentration exceeded the Egyptian standards permissible limits for lead. While, 18 (90%) samples showed cadmium concentration within the Egyptian standards permissible limits for cadmium. Furthermore, 19 (95%) samples showed copper concentration within the Egyptian standards permissible limits for copper. Finally, 20 (100%) samples showed zinc concentration within the Egyptian standards permissible limits for zinc.

5651	12461635	دكتوراه	تأثير برنامج تعليمي باستخدام أسلوب التعلم التعاوني والذاتي على مخرجات التعلم في رمي رمح لطلاب المرحلة الثانوية بدولة الكويت	الحسيني،ناصر عبدالله جارالله		2017م	يهدف البحث الحالي التعرف على فاعلية استخدام أسلوبي التعلم التعاوني والذاتي على مخرجات التعلم في رمي الرمح لطلاب المرحلة الثانوية بدولة الكويت استخدام الباحث المنهج التجريبي باستخدام التصميم التجريبي لمجموعتين تجريبيتين بتطبيق القياسات القبالية والبعدية لكلا المجموعتين وذلك لملائمته لطبيعة هذا البحث. يتمثل مجتمع البحث في تلاميذ المرحلة الثانوية بمنطقة الجبراء بدولة الكويت للعام الدراسي 2015/2016م والبالغ عددهم (300)تلميذ. في ضوء الاستنتاجات أن استخدام أسلوب التعلم التعاوني والتعلم الذاتي له تأثير ايجابي على تعلم مسابقة لرمي رمح لتلاميذ المرحلة الثانوية بدولة الكويت وتوقفت المجموعة التجريبية الأولى التي استخدمت أسلوب التعلم التعاوني على المجموعة التجريبية الثانية التي استخدمت أسلوب التعلم الذاتي في تعلم مسابقة لرمي رمح لتلاميذ المرحلة الثانوية بدولة الكويت في ضوء التوصيات: 1-استخدام اسلوب التعلم التعاوني في تدريس مسابقة رمي الرمح لتلاميذ المرحلة الثانوية بدولة الكويت له تأثير 2-استخدام أوراق العمل وما تتضمنها من محتوى تعليمي مقنن في تعليم رمي الرمح في مسابقات الميدان والمضمار لتلاميذ المرحلة الثانوية بدولة الكويت3-إجراء المزيد من البحوث والدراسات التي تستخدم اسلوب التعلم التعاوني بغرض التعرف على تأثيره على المسنى الرقي ومستوى الأداء المهاري والمتغيرات المعرفية والنفسية كالتلق والدافعية وتقدير الذات للطلاب في مسابقات أخرى من مسابقات الميدان والمضمار . إجراء المزيد من الدراسات حول التعلم التعاوني لمعرفة تأثير هذا الأسلوب في مراحل التعليم المختلفة وفي الرياضات-4 الأخرى.				د/عماد أبو القاسم محمد أ.م.د/مصطفى النوبي محمد
5652	12462579		Evaluation and beneficiation of white sands north eastern desert egypt/	Ahmed, Ali ismail ali.		2017	This study conducted on the white silica sands samples from Wadi Qena and Somr El-Qaa Formations in North Eastern Desert, between Wadi Dakhl and the central part of Wadi Qena. The study aimed to evaluate the quality of these sands and finds out its possible industrial applications; Examine the best suited and cost-effective processing methods; Develop a beneficiation plant for the total utilization of all size fractions and design special flotation-atritrion scrubbing machine for silica sands processing and verify the possible paleodepositional environment, source and geotectonic setting of these sands. The study has been designed and carried out in two main stages. The first stage is integrated evaluation and characterization of the physical, the mineralogical and the geochemical properties. The second stage is the beneficiation of the studied sands using screening, attrition				

							scrubbing and reverse flotation techniques. Grain size analyses of representative samples showed that the average grain size parameters are as following; mean grain size for the kaolinitic sandstones of Wadi Qena Formation is 2.33ϕ (Fine Sand), sorting is 1.15ϕ (Poorly Sorted), skewness is 0.44 (Very Fine Skewed), and kurtosis is 4.23 (Extremely Leptokurtic). The average mean grain size for the silica sands of Somr El Qaa Formation is 1.791ϕ (Medium Sand), sorting is 0.507ϕ (Moderately Well Sorted), skewness is -0.058 (Symmetrical) and kurtosis is 1.274 (Leptokurtic). The Bivariate plot of standard deviation against mean size showed that the sandstones of Somr El-Qaa Formation was mainly deposited in a shallow agitated marine environment (beach) while the sandstones of Wadi Qena Formation was mainly deposited in a fluvial environment. The morphological study results showed that the average circularity and angularity of Wadi Qena Formation sand grains ranged from 0.72 to about 0.81 (High Circularity) and from about 0.24 to 0.43 (Angular to Sub-angular), Somr El-Qaa Formation sand grains ranged from about 0.70 to about 0.80 (High Circularity) and from about 0.38 to 0.54 (subrounded), respectively. Generally the grain shape parameters are suitable for the specifications of many industries, with limitation in roundness parameter for hydraulic fracturing sands and filter media sands. XRD study of the Wadi Qena Formation sandstone samples indicated that the quartz and kaolin clay mineral were found as major constituents. While the mineralogical investigation of the Somr El-Qaa Formation sandstone samples indicated that the one and only major mineral constituent was quartz. The heavy minerals analysis results showed that the weight percentage of the heavy minerals in the studied size fractions (500 or 600-90 μm) was found to be 0.036 % for the Somr El Qaa Formation samples and 0.05 to 0.06 % for the Wadi Qena Formation samples. Nonopaque minerals constitute the main bulk of the heavy mineral suite as they reach in abundance more than 51 % in most samples, they dominated by three major minerals (Tourmaline, Zircon and Rutile). The petrographical study results showed that the sandstones of Wadi Qena dominated by quartz wackes, while the sandstones of Somr El-Qaa Formation dominated by quartz arenites. The detrital mode of both deposits is characterized mainly by the removal of all mineral except quartz and refractory accessory grains		
5653	12462584		Gravity and remute data interpretation in Asyut basin western desert of egypt/	El saghier, Mona mostafa.					
5654	12462586		Impact of geological and hydrological setting on natural radio activity groundwater from luxor/	Hussein, Mahmoud Ahmed.					
5655	12462589		laboratory evaluation of using crumb rubber as asphalt concrete mixtures modifiers /	Wazeri, Alaa Mohamed hassan.		2014	Asphalt concrete pavements experience damage due to the increase of traffic volume and more importantly the repeated traffic loads. Environmental conditions such as temperature, aging, and water can have a significant effect on the performance of asphalt concrete pavements as well. Bitumen is a visco-elastic material where temperature and rate of load application have a great influence on its behavior. Conventional bitumen is exposed to a wide range of loading and weather conditions; it is soft in a hot environment and brittle in cold weather. Rutting (permanent deformation), fatigue cracking, and moisture damage are the most common distresses that can be found in Egyptian roads. Those distresses can have negative impacts on roadway safety, reduce the service life of the pavement and increase the maintenance cost. On the other side, disposal of waste tires has been acknowledged to be a serious environmental problem. Also burying tires in landfills is not an easy solution either. So improvement of asphalt concrete mixtures by adding Crumb Rubber (CR) can be a possible solution to reduce these problems and preserves the environment from pollution. In this research an investigation was made on the fundamental studies of modified asphalt binder and mixtures in order to understand the influence of modifiers on the Mechanical properties and fatigue resistance to prevent fatigue cracking in asphalt pavement. Crumb rubber modifier as a waste material is used in modifying the performance of the asphalt concrete mixtures using wet process in which the CRM is added to the base asphalt binder before introducing it in the asphalt concrete mixture. The conventional bitumen (60/70) penetration grade was used in this research, modified with crumb rubber modifier (CRM) at three different contents namely 7%, 10% and 13% (by weight of the bitumen). Mechanistic and simulative tests namely Standard Penetration test, Softening Point test, Indirect Tensile Strength, Critical Energy Release Rate, Marshall Stiffness,		

							Static Creep test and Compression test were conducted in this research. The results of the study indicated that, the addition of Crumb Rubber generally improved the mechanical properties of the mixture regardless of the percentage of the Crumb Rubber. The addition of crumb rubber modifier by 10% (by weight of the asphalt cement in the mix) was the optimum content of CRM to achieve the best improvement for the modified mixtures properties. Also, the addition of the CRM causes a significant improvement in fatigue resistance and the permanent deformation resistance.

5660	12462731	توظيف ثمار الوم تشكليا لاستحداث مشغولات فيه مستلهمه من الفن الشعبي/ محمد، محمد السيد الأمير.				2017	تم تنظيم هذه الدراسة في خمسة فصول. الفصل الأول: يتضمن هذا الفصل تعريف البحث للسؤال التالي: إلى أي مدى يمكن استخدام ثمار "دوم" في إنتاج أجسام فنية مستوحاة من الفن الشعبي؟ -1 بدأ الفصل بعرض تقديمي لخلفية البحث ، وتحديد المشكلة وأهدافها وأهمية البحث ، وهو الإطار بين (النظرية والتطبيق) وعرض بعض مصطلحات الدراسة وأخيراً عرض بعض الدراسات المتعلقة بالبحث. الفصل الثاني: يعنوان: الفن الشعبي. يتضمن هذا الفصل تعريف الفن والفنان الشعبي ، وملفا تاريخيا للفن الشعبي من عصر ما قبل مصر ، والعصر المصري ، والعصر القبطي والعصر الإسلامي ، وخصائص الفن الشعبي ، والرمز في الفن الشعبي و تعريفها وأصلها وتطورها وأهمية الرمز في الفن الشعبي وأشكاله الرمزية ومعانيها من رموز العضوية والأنواع والرموز الهندسية والرموز الملونة والحرف والمجالات الشعبية والإلهام في الفن الشعبي. الفصل الثالث: يعنوان: دوم يحتوي هذا الفصل على حساب تاريخي لخليل التمر من العصر الحجري ، والحقب المصرية القديمة (الدول القديمة ، والوسطى ، والحديثة) ، والنخيل في اليونانية ، والرومانية ، والبطنية ، والإسلامية ، والنخيل في الفن الشعبي ، وثمار دوم الأهمية الاقتصادية لثوائكه الوم وإمكانات القبة. الفصل الرابع: العنوان: تحليل مجموعة مختارة من الأعمال الفنية من المواد الطبيعية للفنانين المصريين على أساس الفن الشعبي. تضمن هذا الفصل تقديم الباحث وصفا وتحليل عينات من الأعمال الفنية لفنانين مصريين استخدموا المواد الخام الطبيعية في أعمالهم الفنية على أساس الفن الشعبي الفصل الخامس: يعنوان: تطبيقات ذاتية للباحث. تضمن هذا الفصل تقديم الباحث عن وصف وتحليل عمل الباحث عن الأعمال الفنية للثمار الخام في الوم المستوحى من الفن الشعبي والتحليل الإحصائي ومناقشة نتائج التحكيم التحكيم لتطبيقات الباحث الخاصة.		
5661	12462745	برنامج تدريب عظمي باستخدام التقنية الراجعه الحيويه واثره على تقدير الذات لدى ناشيء كره القدم بدوله الكويت/ بربوع، أحمد علي راشد سالم.							
5662	12462747	تأثير برنامج تدريبي باستخدام تدريبات الهيوكسيل على بعض المتغيرات الفسيولوجيه والأداءات الهاريه المريكبه لدى ناشيء كره القدم تحت 18 سنه/ محمد، ضياء الدين على ابراهيم.				2017	أصبح التدريب الرياضي عملية تهدف إلى تحسين مستوى اللاعب من خلال المؤشرات المخطط لها ، لغرض تطوير كفاءته في أداء جميع المخططات الجديدة للعب كرة القدم ، وكأساس لبناء الكفاءة البدنية والحركة. هذه الكفاءة تلعب دورا حيويا دور في اللياقة البدنية المهارية ، مما يؤهله للقيام بمهامه لفعالية أكبر وأداء الحركة الإيجابية التي تتطلب خلال المباراة. بالإضافة إلى ذلك ، يسعى التدريب الرياضي لتطوير وتحسين المادية «الجوانب الفنية والنفسية للاعب ، ومحاولة استخدامها وتوجيههم نحو تحقيق أفضل مستوى ممكن من نوع المتخصصة النشاط الرياضي. ونتيجة لذلك ، "مفتي إبراهيم" (1997) ، "محمد صبحي حسنين" ، و "أحمد قصري" يتفقان على أن التخطيط للتدريب هو الطريقة الرئيسية لتطوير أداء اللاعبين والفريق. ومنذ التدريب ؛ وهو الطريقة الأساسية لهذا التطور في أدائها ضروري ، التخطيط للتدريب يضمن أعلى مستوى ممكن والتقدم.وعلاوة على ذلك ، يذكر "حسن أبو عيدو" في (2009) أن كرة القدم هي تعتبر واحدة من الأنشطة الرياضية ، التي تلتقت مؤخرا الاهتمام ،ومختلف الدراسات والبحوث في مجال تطبيق التحديث العلمي نظريات التدريب الرياضي من أجل تحقيق تقنية أعلى مستوى هذه اللعبة العالمية والشعبية. لذا ، من أجل تحقيق أعلى مستوى من الأداء في المباريات ، يجب على لاعب كرة القدم الاستعداد من الناحية الفنية ضوء متطلبات ممارسة كرة القدم الأخيرة ، الأمر الذي يتطلب مستوى عال من الكفاءة البدنية والمهارة لتكون قادرة على تلبية المخطط المهام المضمنة له بشكل فعال طوال المباراة. أما بالنسبة لـ "عفي فهمي البيك" ، في (1997) ، فهو يشير إلى أن الأكسجين ظهرت الموضوع في البداية عندما عتدت دورة الأولمبية في عام 1968 في المكسيك ،وهي عبارة عن (3200 متر) فوق مستوى سطح البحر ، حيث كان هناك اتجاه إيجابي للوصول إلى معرفة دقيقة بمدى الرياضة والرياضة قد تكون الأرقام مؤثرة عندما يتعرض الرياضي للمنافسة في المرتفعات ، وبعد ذلك ، كانت هناك تساؤلات حول تأثيره في تحقيقه الإنجازات وما هي الفترة اللازمة من أجل التكيف يمكن أن تحدث. :على البيك" أوضح أيضا في (1997) ، أن تدريب نقص الأكسجين يعني "التدريب جنبا إلى جنب مع نقص الأكسجين من خلال التدريبات البدنية (المادية جهد) ، والتي من خلالها يتم التحكم في عملية التنفس عمدا ،حيث تكون أوقات التنفس قابلة للقياس منخفضة أثناء الأداء بطريقة تتطلب ردود فعل ديناميكية ، مثل (زيادة التنفس معدلات ، وزيادة مستوى مصل حمض اللاكتيك ، وزيادة الأوكسجين دين). ونتيجة لذلك ، سوف تؤدي هذه التمارين إلى أن تكون قابلة للتكيف وأن تكون ممكن لتلبية ظروف العمل بشكل أكثر فعالية على الأوكسجين نقص.		

								أما بالنسبة لـ "محمد زكريا" ، فهو يعتقد في (2005) ، نقلاً عن هذا التعرض النظامي وقصيرة الأجل لنقص الأوكسجين ، "Caasas et la" يؤدي إلى الاستجابات الفسيولوجية ، التي تطور القدرة البدنية أداء. كما أنها تؤدي إلى زيادة حجم الخلية وخليّة الدم الحمراء ، والارتفاع في نسبة الهيموغلوبين. وعلاوة على ذلك ، فإنها تساعد على تحسين الطاقة والممتلكات الهوائية واللاهوائية. وبناءً عليه ، حاول الباحث الوصول إلى أفضل ما تم تطبيقه حديثًا بأساليب التدريب التي تهدف إلى تحسين المتغيرات الوظيفية وبعضها أداء مهارة معقدة من الأحداث كرة القدم ، ومن ثم جاء مع فكرة هذه الدراسة (أثر برنامج التدريب ، من خلال تطبيق Hypoxic التدريب على بعض المتغيرات الفسيولوجية وأداء المهارة المعقدة أحداث كرة القدم ، دون سن (18)). هذه الدراسة يمكن أيضًا أن تكون علمي بالإضافة إلى المدربين والمتخصصين ، والمسؤولين عن تدريب كرة القدم بشكل عام ، وتدريب الأحداث على وجه الخصوص للاستفادة منها في هذا المجال من التدريب الرياضي ، تهدف إلى رفع مستوى مسئوليات لاعبي كرة القدم (الأحداث) ، وتحسين مسئوليات وظيفتها والمهارات. أهمية وحاجة هذا البحث تكمن أساساً في: 1).استخدام علم وظائف الأعضاء الرياضي في المجال العلمي الذي يخدم التدريب عملية تعتمد على القواعد العلمية 2).التعامل مع التطور العلمي الدرامي في مجال الحديث التدريب الرياضي. شرح مدى أهمية تمارين نقص الأكسجين وتأثيرها على بعض المتغيرات الفسيولوجية وأداء مهارة معقدة من الأحداث (3). (18).القدم تحت سن تأثير تمارين نقص الأكسجين في محاولة حماية الأحداث من كرة القدم (4) الإجهاد قطع. أهداف البحث: يهدف البحث إلى تصميم برنامج تدريبي عن طريق تطبيق Hypoxic تمارين على بعض المتغيرات الفسيولوجية وأداء مهارة معقدة الأحداث الصغار الذين تقل أعمارهم عن (18) ومعرفة تأثيرهم على: بعض المتغيرات الفسيولوجية لأحداث كرة القدم - بعض الأداء المهاري المعقد لأحداث كرة القدم -		
5663	12462759		استخدام مقرر الكتروني مقترح قائم على مداخل التعلم القائم على المشروعات لتنمية استخدام طلاب المرحلة الأعداديه لقواعد اللغة الانجليزية/	عبد الظاهر ، ايمان حسين عبد الحفيظ.						
5664	12462763		فعاليه التعليم العلاجي المتماير في تنميه الوعي الفونيمى واثره على الحد من اضطرابات النطق لدى تلاميذ الصف الأول الابتدائي/	محمد، هند عبدالله السيد.	2017			هدفت هذه الدراسة إلى التعرف على فاعلية العلاج كلاً تعمي المتمايز في تنمية الكمي الفكتيمي كآثره على اضطرابات النطق لدى تلاميذ الصف الأول الابتدائي، وكذلك فاعلية الدراسة مع (02) متميز، مقسمة إلى مجموعتين (12 لمجموعة التجريبية،) 12 لمجموعة الضابطة، استخدمت الدراسة الأدوات الآتية: مقياس سمكتك لذكاء الأطفال (كلارك بار)ترجمة عبدالرحيم الجبريم، كمصطفى أبك المجذ)، مقياس تقني النطق(إعداد الباحثة)، مقياس تقني الكمي الفكتيمي (إعداد الباحثة)، برنامج لتنمية الكمي الفكتيمي قائم على التعمي العلاجي كالتعمي المتمايز لدى تلاميذ الصف الأول الابتدائي، نتائج الدراسة ذات دلالة إحصائية بـ ٥ في درجات المجموعة التجريبية في المقاييس القمي كالبعدم مما يدل تنمية الكمي الفكتيمي كالحده من بعض الاضطرابات النطقية المكجدة عند الأطفال.

5746	12465286		إدارة الجودة الشاملة كمدخل لتطوير الرياضه المدرسيه للمرحله المتوسطه بدوله الكويت/	الجمعي، سالم ناصر طفلان.		2017	التطور الملحوظ في مجال مختلف ؛ سياسية واجتماعية الاقتصادية والرياضية ، والتي شهدت المجتمعات الحديثة ، هو الانعكاس الطبيعي للتطور التكنولوجي لهذه المجتمعات. إلى التعامل مع هذا التطور والتقدم ، كان من الضروري أن تدفع الانتباه إلى كفاءة الإدارة والبشرية العاملة الموارد لأنها أساسية للتنمية والتقدم للجميع المؤسسات والهيئات المختلفة. لذلك ، أصبحت الإدارة الحديثة جانباً أساسياً من النظام الإنتاجي والخدمي في أي مجتمع ؛ تهدف الإدارة ل تنظيم العمل في شكله الجماعي وتحقيق روح الفريق والتعاون والتنسيق بين الوظائف المختلفة للعمل وكذلك تلعب دوراً حيويًا دور في توجيه المؤسسات والمنظمات في مختلف المجالات والتخصصات. البلدان المتقدمة والمجتمعات المعاصرة أعطى أهمية كبيرة للإدارة الحديثة في النظر في التأثير على دفع النمو الاقتصادي والاجتماعي والتعليمي معدلات. (7 :60) أصبحت الجودة واحدة من العناصر الأساسية لتلبية هذا العمل التنمية المطلوبة لنجاح واستدامة هؤلاء المنظمات في العصر الحديث. عمليات الجودة في مجالات التعليم ،اكتسبت المؤسسات والهيئات اهتماما كبيرا في معظم دول العالم، مما جعل المفكرين يسميرون هذا العصر (عصر الجودة) أحد أركان النموذج الجديد للإدارة ، والذي كان ولد للتعامل مع التغيرات الدولية والمحلية ، بحيث تكون الجودة الشاملة التحدي الحقيقي الذي ستواجهه الدول في العقود المقبلة. الابتغرات التكنولوجية والعلمية تفرض علينا العمل مع منطق الجودة الشاملة. نجاح تطبيق الجودة الشاملة يعتمد أيضا على التحضير الكلي لجميع جوانب ثقافة المؤسسة ليكون كاملا متوافق مع متطلبات النجاح. (4 :9 ، 10) إدارة الجودة واحدة من الاتجاهات الحديثة في الإدارة حيث تستند الفلسفة ذات الصلة على مجموعة من المبادئ التي يمكن أن تعتمد الإدارة لتحقيق أفضل أداء ممكن ، والتي المساعدة في حل العديد من المشاكل والصعوبات المتعلقة بالجودة بتحسين الأداء وزيادة القدرة التنافسية ل منظمة. (21:20) فلسفة إدارة الجودة الشاملة هي واحدة من الفلسفات الإدارية الحديثة ، في نهاية 1980s ، والأدوات وبدأت مفاهيم فلسفة إدارة الجودة تصبح واضحة تحت اسم "إدارة الجودة الشاملة". بدأ استخدام مصطلح إدارة الجودة الشاملة في الأدب العربي في بداية التسعينيات بسبب ظهور الكثير المتغيرات التولية التي جعلت من استخدام هذا المصطلح حتمية والضرورة التي جعلت جميع المنظمات تولي اهتماما لأهمية إجراء فلسفة إدارة الجودة الشاملة. (58 :11)يهدف TQM لتحقيق النجاح على المدى الطويل من خلال الحصول على الارتياح كل من العملاء والموظفين ، وأيضاً تغيير أفكار المدراء و عادات ، بدءا من المدير العام وصولا إلى الحارس. (1: 185) رشدي أحمد طعيمة" وآخرون (2006) يشير إلى أن تطبيق" أصبحت إدارة الجودة الشاملة في التعليم مطلبًا ملحا للتفاعل والتعامل بكفاءة مع متغيرات عصر يتميز بالسرعة المعرفة والتكنولوجيا. مع الأخذ بعين الاعتبار الجودة الشاملة في التعليم يمكن المجتمعات من تحقيق جودة التعليم ؛ اداة التنمية والتقدم ، وجعل التعليم متكامل إدراكا ، ببراعة وعواطف ، ثم تلبية احتياجات المجتمع ل كوادر متخصصة قادرة على المنافسة. (32 :14) مثمرة للاهتمام في الجودة داخل المؤسسات التعليمية النظر إلى التعليم كسلعة مثل السلع الأخرى كما ينبغي أن يكون منافساً والسعي لإرضاء عملاء هذا الخير ؛ الطلاب والمجتمع وحالة. الطلاب يريدون أفضل مستوى تعليمي يؤهلهم التميز والإبداع ، والآباء يبحثون عن أفضل موهل أطفالهم والدولة يريدون نتائج تعليمية ممتازة تتمكنها من تحقيق أهداف خططها التنموية. (27:13)		
5747	12465292		تأثير استخدام التدريبات البليومتريه على تطوير القدره العضليه وبعض الوشرات الكيمائيكيه لناديئه الرمح/	سليم، محمود حمدان محمد.		2016	لطالما كانت الرياضة هي الفصل طريقة للتعبير عن تطور الحضارة والنهوض بالدول ومن ثم الاهتمام في رياضة المستويات العاليه من أجل تحقيق آمال الناس وتطلعاتهم في إعداد أجيال من الشباب يقومون ببطولات والفوز الجوائز ليست فقط لهم ، ولكن وسيلة تثبت تفوقهم وتقدمهم وتميزهم بين جميع الشعوب. يهدف التدريب الرياضي إلى الوصول إلى اللاعب بأعلى مستويات الرياضة من خلال البرامج التي تعمل على الكفاءة البدنية والوظيفية والنمو العقلي لتطوير القدرات والمهارات والصفات ذات القيمة العاليه وهي مهمه جدا وضرورية إلى حد كبير في النشاط البدني وتدريب البليومتري هو أحد أساليب التدريب من خلال استخدام القصورية لخصائص الجسم والمقاومه ويرى العديد من علماء التدريب فهو رابط بين قوة العضلات من ناحية أخرى ، وكان المدخل الرئيسي لتحسين الأداء في هاتين العنفتين العضليتين القوة كصفة أساسية صفة كصفة قوة صفة وسرعة وتدريب البليومتري يوجه هذه القوة في المسارات المناسبة لرفع مستوى سرعة الأداء لديه العديد من التوليفات من تمارين البولوميتريه مؤكدة بالإضافة إلى تدريب القوة التقليدية سيودي إلى مستوى عال القدرة بشكل كبير.تعد مسابقات المضمار والميدان واحدة من الأنشطة التي تغطي باهتمام قوي من جميع الدول المتقدمة للتمييز بين التقييم الموضوعي كما أنه يترجم إلى الأثرمنة والمسافات والارتفاعات تعطي الصدق حول إمكانات وقدرات اللاعبين بشكل عام وقد ثبت بعد أي شك معقول أن المستويات الرقمية في مختلف مسابقاتها أصبحت المعجزة الإنسانية القياسية ففرت للأمام في جدل ورائع عن الأسباب الحقيقية وراء هذا التطور المذهل وماهي أفضل الطرق المستخدمة في عملية التدريب حتى تتمكن من تحطيم هذه الأرقام هي مسابقة الرمح واحدة من مسابقات الرماية في سباقات المضمار والميدان وقد اجتازت الأداء الحركي لجافلين العديد من التطورات في أهمها التطور في التقنية والأداء .تطور في أداء Technik الحدث أكبر تأثير على تطورات المستوى الرقسي في السنوات الأخيرة

Reading can lead to activating the practical and mindful life and reading can stick them to their practical specializations. Beside paper reading in the last few years, electronic reading has started with all its positive and negative sides and by it two teams were formed one team defended paper reading and the other side indulged electronic reading. Reading is still a container of traditional and non traditional ways as a good means of acquiring knowledge and culture. The problem of study: Throughout cultural and knowledge needs for the staff and their assistants this can only be done by continuous reading. Although there are practical reading that dealt attitudes declines of reading or determined only electronic reading. There are no studies that dealt side life in reading in the age of technology specially the staff and their assistants in university. This study tries to find the interest of the staff and their assistants their motives towards electronic reading and its requirements and their favourite kind of reading and the effect of the electronic reading on the paper reading. The researcher depended on the curriculum of true study at the age of technology using questionnaire as a tool for researches.		

							This study included the introductory and three chapters, the first chapter dealt with the age of technology its meaning and its bases, the second chapter dealt with true reading and its practice at the age of technology. In the third chapter the researcher discussed the relation of reading at the age of technology and the changes of study. The study leads to some of conclusions, including: □ The interest of the staff and their assistants in reading and their motives towards reading. □ The majority used asample of reading in electronic reading and its requirement. □ In the point of the study there's an effect of electronic reading on the paper reading. □ There are effects of study changes on reading at the age of technology, there is no relation in study changes with the staff and their assistant at university of true reading.

In addition, it aims to identify the usefulness of digital information resources for the faculty members and their assistants in South Valley University in order to identify the extent of their need for this category of information resources and their availability in the libraries of the faculties in the university. The researcher adopts the survey-field method for collecting data and information and then describes and analyzes them. The study finds many important results which include: There is no written policy agreed between the libraries of the faculties that are participating in the study to build and develop their collections of digital and traditional resources of information. This leads to the lack of balance between the digital and traditional resources of information, where the ratio of digital information resources reaches 3.7%. The results also show that 97.1% of respondents participating in the study benefit from digital information resources in general, while 76.9% benefit from digital information resources in the libraries of the faculties in the university.

Al-Alaq, s poetic blog reflects his own vision for his personal, national and Arabic reality . This study includes the heritage in Al-Alaq,s poetry as a critical study containing three chapters preceded by preliminary . The researcher divided the preliminary into two sections .In the first one , he focuses on the concept of heritage in the language then in terminology . In the second section , he indicates the relationship between the contemporary poet and the heritage .He concluded that The poet is closely connected to his heritage . In the first chapter, the researcher deals with the patterns of heritage. He divides it into five patterns: legendary,Religious, poetic , popular and historical. Then he clarifies each pattern separately . He concluded that Al-Alaqs, experience is the Iraqi current tragedy, but the tragedy of man in general. In the second chapter , he deals with the implied side known as (The technical recruitment of heritage)which includes three pieces of research : intersection the mask and the symbol. Though this study, the poets talent appears when makes use of these techniques where he		

						makes the present as a witness of the past. He also makes the past assist the present looking forward to abettor future. In the third chapter ,he shows the effect of heritage on the technical construction of Al-Alaql or the aesthetic side .It is divided into three parts : Language, image and rhythm. He become sure that the poet has the dynamics of language, large imagination and the sound appropriate for the meaning. The conclusion is as brief hints to indicate the most important results of this research. The study uses the integrative approach which benefits from all the modern curricula. According to the study, Al- Alaql is one of the poets who it is not possible to confine his reading in a curriculum as one curriculum cannot fulfill his great creativity. In the end, here is a list of the most important resources and references on which my study depends and also an index of the themes of the study.

							The coronation of King Abbas The Great was associated with economic development as the economic potentials of the state were immensely growing. This era had witnessed a historical and economic phenomenon that has to be investigated; the appearance of a rich class, known today as businessmen. Variation of terrains and climate in Iran played a great part in the economic abundance but this abundance was disturbed by harsh taxes or confiscation of funds. The bloody and harsh policy of the kings towards their families was responsible for not preparing crown princes able to take the responsibility of the state.

6000	12470470		فاعليه الارشاد الانتقائي في تعديل بعض سلوكيات الأطفال الناتجه عن العنف الاسرى برنامج للأطفال والوالدين/	أحمد، زينب أحمد طه.		2017	هذه الرسالة تهدف إلى دراسة مدى فعالية التوجيه الانتقائي في تعديل بعض سلوكيات الأطفال (وضع ، العدوان ، الخدي) من العنف المنزلي. بالإضافة إلى ذلك ، فإنه يهدف أيضا إلى دراسة فعالية التوجيه الإسلامي لتقليل العنف المنزلي للوالدين والتعرف على التأثير المستمر للبرنامجين بعد الانتهاء من جلسات التوجيه وفترة المتابعة. لتحقيق أهداف الدراسة استخدم الباحث الطريقة التجريبية، أعدت مقياس العنف المنزلي وحجم المشكلات السلوكية للأطفال وقد صممت برنامجا انتقائيا للإرشاد للحد من المشاكل السلوكية (العناد - الكذب - العدوانية) في الأطفال ناتجة عن عائلة تمارس العنف من قبل الوالدين. تقدمت بطلب على عينة من الأطفال في رياض الأطفال من 4-6 سنوات بمتوسط (5.6) سنة. آخر تم تطبيق برنامج إسلامي على الآباء للحد من العنف الأسري دراسة تؤكد فعالية كل من البرنامجين في الحد من السلوكية كما أنها تقلل من حدة العنف المنزلي منذ الوالدين أيضا أكدت على التأثير المستمر لفعالية البرنامجين بعد التطبيق وخلال فترة المتابعة ، مما يشير إلى كفاءة الطفولة هي مرحلة مهمة جدا في حياة كل فرد. خلال هذه المرحلة ، تنمو الشخصية جسديا وعظليا وعاطفيا ومعنويا. خلال هذه الفترة ، تظهر الاضطرابات والمتاعب. إذا نشأ الطفل في عائلة متوازنة التي تقدم الحب والوفاء العاطفي ، ورعاية باستخدام أساليب التنشئة الإيجابية ، سوف يتمتع أطفالهم بالمساعدة خالية من التوتر والمشاكل النفسية أو الاضطرابات النفسية بسبب سيئسرون بالهدوء الأمني والعاطفي. هذا الطفل قد أيضا يشعر مستقر وتحقيق متطلبات مرحلة التطوير هو خيرة. على العكس ، إذا نشأ الطفل في عائلة مكسورة ، خالبا منه الحب والتبادل العاطفي باستخدام أساليب خاطئة في تنشئة الأطفال مثل الإكراه والقسوة والتمييز وانعدام الأطفال احترام وتبديل الرعاية الزائدة ، فإن الطفل يكون عرضة للاضطرابات والمشاكل النفسية نتيجة لتأثير السجن الذي عاش فيه. الطفل ، بعد ذلك ، أن يكون قويا بما يكفي لمواجهة مشاعر الإحباط بسبب ضعف النفس. أن يتمكن من تحقيق مطالب كل منهما المرحلة التي يمر بها على الرغم من أهمية الأسرة وخطورة تأثيرها ،عندما تقتل العائلة في القيام بهذا الدور ، فإنها تعرض على المجتمع المضطرب أعضاء على حد سواء نفسيا وسلوكيا. هذا بسبب الملوك أنماط وأنواع التفاعلات التي يستخدمونها مثل السلوك العنيف. يسمى العنف داخل الأسرة بالعنف الأسري ، الذي هو أبعد من ذلك استخدام القسوة والمنفى في تربية الأطفال ، والعنف المنزلي هو العنف الذي يظهر في نفس العائلة ، وهو الأكثر شيوعا وأنواع مدمرة من العنف. هذا النوع يظهر في المنزل وغالبا ما يكون لا يلاحظ من قبل المجتمع لأنه يحدث داخل المنزل ويمكن أن يكون نفي بالإضافة إلى ذلك ، يخفي الآباء ذلك من السلطات.		
6001	12470471		درجه ممارسه المديرين لأداره التغيير وعلاقتها ببعض المتغيرات الوظيفيه و التنظيميه لدى معلمي مدارس التعليم العام بدوله الكويت/	السبيعي، نهالي حسن بدر.					
6002	12471370	ماجستير	اثر استخدام الخرائط الذهنية على تعلم بعض مهارات كرة اليد والتحصيل المعرفي لدى تلاميذ المرحلة الإعدادية	أحمد، هاشم أحمد عبدالله		2017	يهدف هذا البحث إلى تصميم برنامج باستخدام الخرائط الذهنية والتعرف على بعض مهارات كرة اليد لتلاميذ المرحلة الإعدادية ، واستخدم الباحث المنهج التجريبي واختار أحد تصميمات المنهج والذي يعتمد على اتباع القياس القبلي والبعدى لكل من المجموعتين التجريبية والضابطة نظرا لملائمته لطبيعة البحث واهدافه ، تم اختيار العينة بالطريقة العشوائية بواقع (60) تلميذ من بين تلاميذ الصف الأول الإعدادي المقيدين بمدرسة الدكتور/عبدالعزیز القوصي بمركز قوص بمحافظة قنا ، وقد تم تقسيم عينة البحث إلى مجموعتين متساويتين إحداهما ضابطة والأخرى تجريبية قوام كل مجموعة منها (30)تلميذ . ومن أهم النتائج أن تطبيق البرنامج كان له تأثير على اكساب بعض مهارات كرة اليد لدى المجموعة التجريبية ، تفوق المجموعة التجريبية على المجموعة الضابطة في القياس البعدي.		
6003	12471783	ماجستير	اثر ممارسة النشاط الرياضي المدرسي على فاعلية الذات وبعض المهارات الاجتماعية لدى تلاميذ المرحلة الإعدادية	حسين ، حسن محمود محمد		2017م	يهدف البحث الحالي إلى التعرف على: اثر ممارسة النشاط الرياضي على فاعلية الذات لدى تلاميذ المرحلة الإعدادية الممارسين وغير الممارسين للنشاط-1 الرياضي اثر ممارسة النشاط الرياضي على بعض المهارات الاجتماعية (العلاقات الاجتماعية -القيادة المجتمعية - المشاركة -2 المجتمعية) لدى تلاميذ المرحلة الإعدادية الممارسين وغير الممارسين للنشاط الرياضي توجد هناك علاقة ارتباطية بين فاعلية الذات والمهارات الاجتماعية (العلاقات الاجتماعية-القيادة المجتمعية -المشاركة-3 المجتمعية) لدى تلاميذ المرحلة الإعدادية الممارسين وغير الممارسين للنشاط الرياضي		
6004	12472778	ماجستير	المناخ التنظيمي وعلاقته بالأداء الوظيفي لمعلمي التربية البدنية بدولة الكويت	الفودري، أحمد عبدالرزاق عبدالحسين		2017م	يهدف البحث إلى التعرف على المناخ التنظيمي وعلاقته بالأداء الوظيفي لدى معلمي التربية البدنية بمدارس دولة الكويت من خلال تحديد: المناخ التنظيمي السائد في المدارس قيد البحث في ضوء (الهيكل التنظيمي ، القيادة ،المشاركة الجماعية، الاتصال،طبيعة-العمل) مستوى الأداء الوظيفي بالمدارس قيد البحث في ضوء (الجهد المبذول ،قدرات ومهارات معلم التربية البدنية،إدراك معلم-العمل) (. التربية البدنية لدورة الوظيفي .العلاقة بين المناخ التنظيمي والأداء الوظيفي للعينة قيد البحث -		

					يهدف البحث إلى العلاقة بين الشغب المدرسي والذكاء الانفعالي لدى طلاب المرحلة المتوسطة بدولة الكويت، العلاقة بين الشغب المدرسي والاتجاه نحو ممارسة الأنشطة الرياضية لدى طلاب المرحلة المتوسطة بدولة الكويت ، العلاقة بين الذكاء الانفعالي والاتجاه نحو ممارسة الأنشطة الرياضية لدى طلاب المرحلة المتوسطة بدولة الكويت . لقد استخدم الباحث المنهج الوصفي ، قام الباحث باختيار عينة عشوائية قوامها (520) طالب تمثل نسبة (6.43) من مجتمع كما اختار الباحث عينة استطلاعية قوامها 130 طالب تمثل نسبة (1.61) من مجتمع البحث، واستخدم الباحث مقياس سلوك المشاغبة ، مقياس الذكاء الانفعالي ، مقياس كينون للاتجاهات نحو النشاط البدني وكانت أهم نتائج البحث وجود علاقته دالة بين الشغب المدرسي والذكاء الانفعالي لدى طلاب المرحلة المتوسطة بدولة الكويت ، وجود علاقة دالة بين الشغب المدرسي والاتجاه نحو ممارسة الأنشطة الرياضية لدى طلاب المرحلة المتوسطة بدولة الكويت ، وجود علاقة دالة بين الذكاء الانفعالي والاتجاه نحو ممارسة الأنشطة الرياضية لدى طلاب المرحلة المتوسطة بدولة الكويت ، وكانت أهم التوصيات اجراء بحوث ودراسات مستقبلية تبحث مظاهر واسباب الشغب المدرسي لدى فئات عمرية أخرى ، الاهتمام ببرامج تنمية الذكاء الانفعالي لدى الفرد ، وذلك ليصبح الفرد أكثر قدرة على مقاومة الضغوط وأقل قلقاً واكتئاباً ، وبالتالي يكون على مستوى عال من الصحة النفسية ، الاهتمام بوضع ودمج برامج التنمية الوجدانية داخل المقررات الدراسية ، وذلك لما له من أهمية كبيرة لدى الفرد ، اجراء دراسات مستقبلية تتعلق بمظاهر وأسباب السلوك العدوانى من وجهات نظر الآباء والمعلمين ، الاهتمام بتنمية اتجاهات الطلاب نحو الأنشطة الرياضية والحث على الممارسة الرياضية من خلال زيارة الثقافة الرياضية لدى الطلاب والوعي بأهميةالرياضة في حياتهم.	2018م
					يهدف البحث إلى التعرف على العلاقات العامة في بعض الاندية الرياضية في دولة الكويت وكان من أهم الاستنتاجات تسمى إدارة العلاقات العامة في النادي الرياضي إلى تغيير الانطباعات السلبية التي قد يحملها الجمهور عن المؤسسة الرياضية من خلال البحوث والدراسات التي تجريها وتحرص إدارة العلاقات العامة في المؤسسة الرياضية على تزويد المجتمع المحلي بأخبار المؤسسة الرياضية وتقوم إدارة العلاقات العامة في المؤسسة الرياضية بالإعلام عن أهداف المؤسسة الرياضية ونشاطاته ولدى العاملين بالمؤسسة الرياضية انطباع إيجابي عن إدارة العلاقات العامة .	2018م
					وكان من أهم التوصيات : العمل على تغيير طبيعة ومهام واختصاصات العلاقات العامة بحيث تستهدف بناء الجسور وإيصال الروابط بين الاتحادات وجمهورها بمختلف شرائحها والعمل على ممارسة أكثر نشاطات العلاقات العامة كفاءة في مواجهة الأزمات التي تتعرض لها الاتحادات الرياضية مثل اللقاءات الرسمية مع الإعلاميين ، الحملات الإعلامية التلفزيونية والصحفية ووجود استراتيجية إعلامية ثابتة خاصة بالعلاقات العامة لمواجهة أي أزمة يتعرض لها الاتحاد .	
6007	12478177	Molecular characterization of staphylococcus aureus isolated from dairy animals farms and contact workers /	Ali, Sahar Gamal Abdel Aziz.		The results obtained in this study concerning the bacteriological characterization of the examined raw milk samples and hand swabs of contact dairy workers collected from different dairy farm in Qena Government showed that, most of the investigated samples proved their contamination with staphylococci. The recorded incidence of Staph.aureus isolated out of raw milk samples and human hand swab samples 72.3% (199 out of 275). The incidences of Staph.aureus were 73.2% (182 out of 250) raw milk samples collected form dairy farms and 64% (16 out of 25) of hand swabs obtained from contact dairy workers. It can be considered as an index of very low hygiene level of obtained, manufacturing and distribution of these food materials, it form a health hazards to consumers. Milk is the main sources of animal protein, however it is considered as a major vehicle of the most reported outbreaks of food-borne poisoning. Steph. aureus is a good indicator of the degree of contact with human-beings or raw animal products within the food factory. Based on antibiotic sensitivity test, about 72% Steph. Aureus isolates were found as multidrug resistant. The isolates were found 100% resistant to Penicillin and Ampicillin, 24 % resistant to Amoxicillin / Clavulinic acid, 62% resistant to Oxacillin, 14% resistant to Erythromycin and 18% resistant to clindamycin. On the other hand, all the isolates found 100% sensitive to Vancomycin, Gentamycin, Amikacin, Ciprofloxacin, Tetracyclin, Trimethoprim / sulfamethoxazole and Chloramphenicol. 96% sensitive to Amoxicillin.	2016 .

6015	12479893	الكفايه الخارجيه للحلقه الثانيه من التعليم الاساسى بمحافظه سوهاج :	محمود، أسماء السيد عثمان.		2017 تدور الدراسة الحالية حول الكفاءة الخارجية للتعليم التحضيرى فى "دراسة ميدانية" فى سوهاج. هدفت الدراسة إلى التعرف على الأساس النظري لـ "سوهاج" المرحلة الثانية من التعليم الأساسي فى مصر. التعرف على الأساس النظري ل الكفاءة الخارجية للمرحلة الثانية من التعليم الأساسي فى مصر. أيضا ، و تهدف الدراسة إلى الوقوف على واقع الكفاءة الخارجية للمرحلة الثانية من الأساسيات التعليم فى سوهاج فى ضوء الأهداف المقصودة. اعتمدت الدراسة على المنهج الوصفى كنهج ملائم لـ طبيعة الدراسة. أيضا ، أعد الباحث استبيان لتحليل واقع الكفاءة الخارجية للمرحلة الثانية من التعليم الأساسي بسوهاج. ال استبيان مطبق على عينة مكونة من (1325). نتائجه الدراسة النظرية النتائج الأولى المتعلقة بالتعليم الثانوي: يهدف التعليم الثانوي المنخفض إلى دعم تنمية قدرات التلاميذ توجد ثلاثة أنواع من التعليم الإعدادي فى مصر : الثانوية العامة التعليم ، التعليم الثانوي ، التعليم الثانوى المهني	

						حلفي مختار (1994) يشير إلى أن المهارات الأساسية هي الوسيلة لتنفيذ خطط اللعب. تتطلب جميع الخطط تنفيذ واحد أو أكثر من المهارات الأساسية. لذلك ، مهارات إتقان ضروري للنجاح. على سبيل المثال ، لا يمكن للاعب الذي يرغب في التهرب من لاعب أن يفعل ذلك إذا لم يكن جيدًا في الجري كمهارة ، مثال آخر: لا يمكن تنفيذ أحد الأساليب الهجومية الهجومية بنجاح ، الثقة المطلوبة كما فعل اللاعب لا تتحقق من ركل الكرة بطرق مختلفة واللعب الذي لا يتقن المهارات الأساسية يجب أن تركز على الكرة ، واللعب أكثر من التركيز على نقطة الخط ، ومع اللاعب يركز على لعب الكرة (32: 163) لا يمكن أن نلاحظ بدقة تحركات زميل أو منافسه في حايوة ، أشرف جابر (2012) أن السيطرة على رجل لرجل هو أحد وسائل تنفيذ خطط الدفاع الدفاعية الجماعية وهذه الطريقة تتطلب لاعب المدافع لمتابعة المهاجم المعين على رقبته وصحة مفهوم العلاقة بين المهاجم وموقع الكرة وهو نوع من السيطرة المباشرة على المهاجم المنافس ، وفي حالة الدفاع ، يتم تعيين اللاعبين O السيطرة على أي مهاجم في المنطقة المسنولة عن اللاعب عند التبديل إلى اللعب الدفاعي وهنا يتم التحكم بشكل غير مباشر ويعتمد هذا الأسلوب على خبرة اللاعبين ومدى تمتعهم بالمهارات والمهارات الفنية العالية والعالية المستوى. الشعور بالحركة والسلامة ودقة الترفب وسرعة رد الفعل تجاه لاعبي الفريق المنافس عندما يكونون في حالة الهجوم ويعطون الدفاع عن المنطقة من وسائل تنفيذ خطط اللعب الدفاعية وهو نشر جيد للاعبين المدافع في ثلث مجال الدفاع في حالة العد وفي هذا الموقف من عدد المهاجمين الفريق المهاجم بحيث يتمكن لاعبو المدافع بسرعة من العودة إلى أماكنهم لتنفيذ واجبه الدفاعي من قبلهم. (88:14) ولاحظ الباحث من خلال عمله كمدرب ، وكذلك من خلال متابعة العديد من الألعاب ، انخفاض مستوى وسائل تنفيذ خطط اللعب الدفاعية للشباب ، والنظر من خلال المراجع العلمية والسابقة. الدراسات إلى حد علمه - ووجدت أن هناك بعض الدراسات التي تناولت اللياقة ، بالإضافة إلى بعض الدراسات التي تتعلق بالتوازن مثل بورك وآخرون (2001) ، 83 إيهاب شحاتة (2008) (25) ، هيثم فتح الله (2008) (75) خلال العرض السابق ، وجد الباحث نقص وندرة الدراسات العلمية في مجال كرة القدم ، وبعض الدراسات اتخذت اتجاهًا مختلفًا - إلى معرفة الباحث - ولم تذهب إلى أي واحد منهم ذهب إلى الدراسة الحالية ، التي لفتت اهتمام الباحث بإجراء هذا البحث في محاولة لتحديد أثر برنامج تدريبي باستخدام اللياقة البدنية والتوازن على وسائل تنفيذ اللعب الدفاعي خطط لاعبي كرة القدم الذين تقل أعمارهم عن 18 سنة في دولة الكويت. أهداف البحث: الهدف من البحث هو تحديد أثر برنامج تدريبي عن طريق استخدام اللياقة والتوازن في وسائل تنفيذ خطط اللعب الدفاعية لكرة القدم في دولة الكويت "من خلال الواجبات: تصميم برنامج تدريبي باستخدام اللياقة البدنية وتدريب الرصيد لاعبي كرة القدم الذين تقل أعمارهم عن 18 سنة في - 1 (العينة قيد الدراسة)الكويت التعرف على أثر البرنامج التدريبي المقترح على اللياقة البدنية والتوازن ووسائل تنفيذ خطط اللعب الدفاعية للاعبين كرة -2 (العينة المذكورة)القدم الذين تقل أعمارهم عن 18 سنة في الكويت تحديد حجم تأثير البرنامج التدريبي باستخدام تمرينات اللياقة البدنية والتوازن على وسائل تنفيذ خطط اللعب الدفاعية -3 . (العينة قيد الدرس)للاعبي كرة القدم دون سن 18 في الكويت		
			سمري، سعد عامر ميجل.	تأثير برنامج تدريبي باستخدام تدريبات السرعة والرشاقة على وسائل تنفيذ خطط اللعب الهجوميه الفرديه لانشيء كره القدم بدوله الكويت/	12479904	6021	يعنى لاعب كرة القدم البدني في ايسط صورة لتلك التمارين التي تعطى للاعبين من أجل تزويدهم بأعلى مستوى ممكن من عناصر اللياقة البدنية الأساسية المختلفة ، ومهارات الأداء السابقة والتكتيكية تعتمد إلى حد كبير على كفاءة لاعب جسدياً لأنه بعض النظر عن مهارة لاعب وخطط الكفاءة للعب مثل هذا التنفيذ لن تكون قادرة على المباراة فقط من خلال اللياقة البدنية عالية. كما يمكن مشاهدته ، "إبراهيم شعلان ، محمد عفيفي" (2001 م) إلى مستوى اللاعبين للوصول إلى الدرجة التي تمكنهم من اللعب بمطلوبات حديثة من مكوناته المختلفة تتطلب من اللاعب أن ينشئ منذ الطفولة حسب البرامج المقتنة التي تحتوي على تمارين تناسب قدرات وإمكانيات الشباب على رفع مهاراتهم والفنيين لإكمال متطلبات اللعبة في ظل جميع ظروف الأداء المختلفة. وتلعب خفة الحركة دورًا بارزًا وهامًا في أداء مجموعة واسعة من المهارات والاتجاهات المختلفة ، وتسلط الضوء على أهميتها في الأوقات الحرجة والصعبة في اللعبة ، حيث قد يكون الموقف العدواني مطلوبًا للدخول في فجوة ضيقة تحت الضغط من الدفاع المكثف. كلاهما يوافقان ، "عصام عبد الخالق" (2003) ، "محمد صبحي" (2004) على ضرورة تعديل شروط الفرد لجسمه للحركة إلى أخرى في مختلف الأنشطة الرياضية ، تبعاً لمستوى لياقته لديها. وتلعب خفة الحركة دورًا بارزًا وهامًا في أداء مجموعة واسعة من المهارات والاتجاهات المختلفة ، وتسلط الضوء على أهميتها في الأوقات الحرجة والصعبة في اللعبة ، حيث قد يكون الموقف العدواني مطلوبًا للدخول في فجوة ضيقة تحت الضغط من الدفاع المكثف. كلاهما يوافقان ، "عصام عبد الخالق" (2003) ، "محمد صبحي" (2004) على ضرورة تعديل شروط الفرد لجسمه للحركة إلى أخرى في مختلف الأنشطة الرياضية ، تبعاً لمستوى لياقته لديها. ولإطلاع الباحث على المراجع العلمية والدراسات السابقة وعلى - على علمه - وهناك بعض الدراسات التي ركزت على خفة الحركة ، مثل دراسة حمدي القاسم (2004) (9) ، السيد الحداد (2006) (10) ، محسن زمره (2000) (16) توجد بعض الدراسات التي ركزت على التوازن ، مثل دراسة Brocchi وغيرها من بورك وغيرها (2001 م) (22) ، إيهاب شحاتة (2008 م) (4) وقد أظهر هيثم فتح الله (2008) (20) ومن خلال العرض السابق عدم وجود الباحث وندرة الدراسات العلمية في مجال كرة القدم ، وقد اتخذت بعض الدراسات تحولًا مختلفًا - إلى معرفة Albages - لم يحول أي من لأهميه ذهبوا للدراسة الحالية ، والتي لفتت انتباه الباحث إلى إجراء هذا البحث في محاولة لتحديد تأثير برنامج تدريبي باستخدام التدريب وخفة الحركة والتوازن على مستوى بعض المهارات الهجومية لكرة القدم النسبية تحت 17 سنة بالكويت . أهداف البحث: يهدف هذا البحث إلى "تطوير مركبة المهارات الهجومية في كرة القدم في دولة الكويت الناصرية تحت 17 سنة" من خلال: (العينة المعنية)تصميم برنامج تدريبي مقترح باستخدام خفة الحركة التدريبي والتوازن في كرة القدم في الناصرية .1 التعرف على أثر البرنامج التدريبي المقترح على خفة الحركة ومتغيرات التوازن ومستوى بعض المهارات الهجومية .2 (العينة المعنية)على مركبة ناصية لكرة القدم -3. العلاقة بين الرشاقة والتوازن ومستوى بعض المهارات الهجومية للسيارة ناصية لكرة القدم -3.

						المطالب في التعليم وعبر عمل الباحث التربوية البدينية مهارة الأداء ، وليس تأخذ فيها حساب الفروق الفردية بين الطلاب ويشجع الباحث على استخدام طريقة واحدة للتعلم مظهارة وعدم مطابقة التجارب العلمية في تطوير طرق وأساليب التدريس ، والتي تجعل المتعلم مشاركاً إيجابياً وطريقة تختلف مراكز التدريس مستويات واحدة من الأساليب العلمية التي العديد من الدراسات أشارت إلى فعاليتها في تعلم المهارات أداء الأنشطة الرياضية المختلفة مثل الباحث رأي استخدام طريقة مستويات مختلفة من المحطات تعلم بعض مهارات كرة اليد قد تكون أكثر فعالية ولديها بقي تأثيراً على العملية التعليمية وضمن حدود ما تعلمته الباحثة من البحث والدراسات المرجعية ، التي تناولت هذا المجال من البحث لملغثور على أي بحث ودراسات علمية تأثير استخدام محطلات متعددة المستويات على تعلم بعض مهارات كرة اليد			
	2018	يهدف البحث إلى التعرف على العلاقة بين الذكاء العاطفي وكفاءة التدريس لمعلمي التربية البدنية. استخدم الباحث المنهج الوصفي التحليلي في إجراء هذه الدراسة لأنه مناسب لمغيرات البحث (الذكاء العاطفي وكفاءة التدريس) (100) معلماً ، مشيراً إلى أن التنفيذ الفعلي لـ (118) معلماً ومدرساً ، واستبعاد (18) المعلمون الذين لم يكملوا ببياناتهم الأساسية ، أو لم يجيبوا على جميع العناصر بالنسبة للموازن المستخدمة.							
		أظهرت نتائج الدراسة ارتفاع مستوى الذكاء العاطفي ومستوى كفاءة التدريس لدى معلمي التربية البدنية. وتشير النتائج أيضاً إلى وجود علاقة إيجابية بين الذكاء العاطفي وكفاءة التدريس لمعلمي التربية البدنية. كما يتبين أن الذكاء العاطفي يساهم في التنبؤ بمستوى كفاءة التدريس ، فالفعالية على كفاءة التدريس هي: (المعرفة العاطفية - الإدارة العاطفية - التواصل - تنظيم العواطف - التحفيز الذاتي - الانسجام العاطفي والعاطفي) ويخلص الباحث إلى أن العاطفة الذكاء يؤثر على سلوك M ، وروزيته للحياة والسيطرة على المهام.يتضمن علم النفس العام العديد من الفروع ، بما في ذلك علم النفس الرياضي ، الذي اكتسب مؤخرًا مكانة بارزة بين العلوم الرياضية الأخرى ، والتي أصبحت محور اهتمام العديد من العلماء الذين ساهموا بجديفة في تسخير كل هذه العلوم ، والتي ساهمت في التنمية المتكاملة لل الرياضي وفقاً لما تسمح به قدراتهم البدنية والمهارية والنفسية.							
		فاز مفهوم الذكاء العاطفي في العقدين الأخيرين من القرن الماضي باهتمام كبير من الباحثين في علم النفس حتى أصبح واحدا من أكثر المواضيع درساً ونوقشاً ، ونظراً لأهميته ودوره الفعال في حياة الفرد وعلاقته الوثيقة مع تفكيره وذكائه ، ومساهمته الواضحة في نجاحه وقدرته على التكيف في مواقف الحياة التي يتفاعل فيها الأفراد مع بعضهم البعض. بالإضافة إلى ذلك فقد أشارت الدراسات إلى أن الذكاء العام وحده لا يضمن النجاح والتميز للفرد ، لكن الذكاء العام يحتاج إلى الذكاء العاطفي ، وهو مفتاح النجاح في المجالات العلمية والعملية.							
		أشار غولمان (1995) إلى أن الذكاء العاطفي هو المهارات الأساسية التي تساعد الناس العاديين على تحقيق التوافق والانسجام ، لذلك يجب أن يكون هناك وجود متزايد بشكل متزايد يسبب قيمته في مختلف المجالات حتى يصبح أكثر استخداماً على نطاق واسع في السنوات القادمة.							
		تشير "سحر فاروق" (2001) إلى أن الذكاء الانفعالي هو أحد أهم مكونات المعرفة الحديثة في الذكاء ، حيث يقرن الذكاء على المشاعر والعواطف ، التي تلعب دوراً مهماً في حياة الأفراد في جميع المجالات وفي جميع مواقف الحياة ، التي يمكن أن تواجهها ، وتعطي للفرد الكثير من المعلومات حول ما يفكر فيه وماذا يشعر الآخر ويفكر. إذا كنا نأمل في دور مشاعر الذات والخبرة العاطفية ، نجد أنه لا يمكننا تجاهل أو عزل هذه المشاعر بينما نواجه أي وضع في الحياة لأن هذه المشاعر والتجارب تجعلنا قادرين على مواجهة ضغوط الحياة بكفاءة ومرونة.							
		تتلعب الكفاءة التعليمية لمعلم التربية البدنية دوراً كبيراً في تحقيق نتائج إيجابية لعملية التدريس ، ويتجلى ذلك من خلال إتقان ونجاح أساليب التدريس من قبل المعلم ، والتي تتطلب معايير خاصة للنجاح ، وتتطلب العديد من الميزات والمهارات و القدرات التي تساعد معلم التربية البدنية على إدارة أدائه وتحقيق أهدافه.							

6038	12479932	تأثير استخدام تدريبات الباليستية على تنمية القدرة العضلية ومستوى الأداء المهارى المركب لثلاثيـء كره القدم بدوله الكويت/	الشختلي، فهد سعد علي مجبل.

6054	12480061	تقييم دور الهيئة العامة للرقابة المالية فى تحسين الإفصاح المحاسبى =	أحمد، أحمد بخيت محمد.	2018							يمثل الهدف الرئيسى للدراسة فى " إجراء تقييم وتطوير لدور الهيئة العامة للرقابة المالية فى تحسين كفاءة وفعالية الإفصاح المحاسبى فى البيئة المصرية، وذلك من خلال تقييم وتطوير دور القواعد المنظمة بسوق المال ككاتب عن دور الهيئة فى هذا الشأن"، وتحقيق ذلك تنازلت الدراسة عدة جوانب منها :- جودة الإفصاح المحاسبى: تحليل نظرى • :- تقييم دور الهيئة العامة للرقابة المالية فى تحسين مستوى الإفصاح المحاسبى من خلال تقييم دور قواعد القيد □ تقييم دور قواعد الحوكمة □ :- تطوير دور الهيئة العامة للرقابة المالية فى تحسين مستوى الإفصاح المحاسبى من خلال تطوير دور قواعد القيد □ تقييم دور قواعد الحوكمة □ اختبار تحقق نتائج التقييم والتطوير المقترحة لتحسين مستوى الإفصاح المحاسبى ميدانيا • وقد توصلت الدراسة إلى عدة نتائج، أهمها:- عدم كفاية الإفصاح المحاسبى لإحتياجات أصحاب المصالح وعلى رأسهم الوحدة الاقتصادية ذاتها، حيث أن الإفصاح 1. الحالي لا يتمتع بالكفاءة والفعالية المطلوبة ليلاتم نماذج القرارات المختلفة، ويعمل على زيادة القيم المحققة وعوامل النجاح لكل فئة من فئات أصحاب المصالح، مما يتطلب قيام الهيئات الرقابية العامة بوضع وتطبيق وتطوير مجموعة من القواعد التي تكفل حماية حقوق أصحاب المصالح وتضمن لهم حد أدنى من الإفصاح، وتحقيق كفاءة سوق رأس المال وزيادة قدرته على جذب رؤوس الأموال المحلية والأجنبية . أتفق الجانبان النظرى والتطبيقي للدراسة على قصور دور القواعد بسوق المال فى تحسين كفاءة وفعالية الإفصاح عن 2. القيم المحققة لأصحاب المصالح من جهة، وقيمة الوحدة الاقتصادية من جهة أخرى، حيث تركزت آراء عينة الدراسة ككل وفقتها حول قصور دور قواعد القيد وقواعد الحوكمة فى تحسين كفاءة وفعالية الإفصاح المحاسبى فى البيئة المصرية

						اتفق المستقصى منهم على تأثير محاور التطوير المقترحة في القواعد المنظمة بسوق المال في تحسين كفاءة وفعالية 3. الإصاحاح عن القيم المحققة لأصحاب المصالح من جهة، وقيمة الوحدة الاقتصادية من جهة أخرى، حيث تركزت آراء عينة الدراسة ككل وفئاتها حول وجود تأثير كبير لمحاور التطوير المقترحة في قواعد القيد وقواعد الحوكمة في تحسين كفاءة وفعالية الإصاحاح المحاسبي في البيئة المصرية.		
					2018	صرح حسن أبو عجدو (2003) أن التحضير البدني هو أحد أهم عناصر إعداد الجزء الرئيسي أو جزء من الإعداد العام الموجه نحو تطوير عناصر اللياقة وتحسين كفاءة الأعضاء والأجهزة الوظيفية للجسم ، ويقصر بشكل عام على اكتساب الأسس المادية والوظيفية لكرة القدم العامة والخاصة ، على الرغم من أهمية دور إعداد مهارات كرة القدم ، إلا أن التحضير البدني يلعب أيضًا دورًا مهمًا في مساعدة اللاعب على أداء مهاراته المختلفة في الطريقة التقنية المطلوبة طوال فترة اللعبة ، حيث أنه بدون ارتباط وثيق بالحالة البدنية والمهارة أقل من إنتاجية اللاعب ، أثناء المباراة. (27: 22-21) بالإضافة إلى ذلك ، ذكر يحيى السيد (2002) أن البرامج التدريبية قد اتخذت شكلها وهيكلها وتنظيمها بما يتماشى مع التطور الجديد في الأجهزة والوسائل المستخدمة خلال عملية التدريب ، والتي أصبحت ضرورية للمهارات الجديدة والنفسية. (إعادة تأهيل اللاعبين. (73: 43) لذلك ، يجب على المدرب استخدام أساليب التدريب الحديثة متوافقة جدًا مع متطلبات النشاط الرياضي والتخصص في التخطيط للتدريب ، والتدريبات التي أصبحت في الآونة الأخيرة شعبية لدى الرياضيين تدريبات ساكيو التي يمارسها المبتدئون والمستوى العالي. ماريو يوفانوفيتش وآخرون. (2011) تنص على أن مصطلح S.A.Q مشتق من الأحرف الأولية لكل من السرعة والخفة والسرعة. (88: 1285) يضيف Velmurugan & Palanisamy (2013) أن تدريب sakio هو نظام تدريب حديث ينتج عنه تأثيرات متكاملة للعديد من القدرات البدنية ضمن برنامج تدريبي واحد وأن دراسات تأثيراتها الفيزيولوجية والفيزيولوجية على اللاعبين الصغار والقدامى اختلفت في نتائجها تعامل مع مجال الرياضة. (94: 432) هو نظام تدريب متكامل يهدف إلى تحسين التسارع sakio تنص على أن تدريب Remko Polman et al. (2009) (494: 89) وتوافق العين واليد ، والقدرة على التعبير وسرعة الاستجابة. من الواضح أن التدريب على السرعة ، والتدريب على اللياقة البدنية ، والتدريب على السرعة الحركية هي تمارين لياقة بدنية تتعلق مباشرة بالأداء الماهر للاعب كرة القدم. يتم قياس مستوى الشباب من خلال قدرتهم على أداء مهارات معقدة في كرة القدم بطريقة سلسة وثلاثية ، سواء على الأرض أو في الهواء. يوافق كل من حنفي مختار (1994) وإبراهيم شعلان وعمر أبو المجد (1996) ومحمد كشك وعبد الله الباسمي (2000) على أن خطط لعب كرة القدم تنقسم إلى قسمين رئيسيين: الخطط والخطط الهجومية (32: 17). (19: 3) (60: 248) ، ويعبارة أخرى ، في هذا السند ، يؤكد "إبراهيم" (2009) على أهمية الجانب الدفاعي لكرة القدم الحديثة بسبب تأثيره الكبير على نتيجة اللعبة والفريق الذي لديه دفاع قوي قادر على قطع الخصم و امتلاك الكرة لبدء هجوم منتظم بين لاعبين أو هجوم (20: 5) ، ولذلك فمن الضروري الانتباه إلى قدرة الشباب على تطوير مهارات دفاعية من سن مبكرة. لم يجد الباحث أي دراسة في البيئة الكويتية. كما وجد أن هناك دراسة واحدة فقط في البيئة المصرية كانت معنية بتمارين ساكيو. (2011. [23] كما تم العثور على بعض الدراسات في البيئة الخارجية التي كانت تهتم بتمارين sacko مثل فيكرام سينغ (2008) ، 95 ماريو يوفانوفيتش وآخرون. (2011) ، 88 زوران ميلانوفيتش وآخرون (زوران ميلانوفيتش وآخرون (2012) 97 وهناك أيضا بعض الدراسات التي تناولت جانب التخطيط مثل دراسة السيد على (2009) (20) في السابق ووجد الباحث أن الافتقار وندرة الدراسات العلمية في البيئة الكويتية في مجال كرة القدم ، ولم تود أي من هذه الدراسات إلى الدراسة الحالية. وهذا ما دفع الباحث إلى إجراء هذا البحث ، وهو محاولة لتحديد أثر برنامج تدريبي باستخدام تدريب ساكيو على بعض القدرات البدنية الخاصة والإجراءات الدفاعية الفردية لمُبدِع كرة القدم في الكويت.		
					2018	يهدف البحث إلى دراسة تأثير استخدام تدريبات الوسط المائي و البيئة الرملية على بعض المتغيرات البدنية والمستوى الرقعي لمتسابقى جرى 1500متر وذلك من خلال : تصميم برنامج تدريبي باستخدام تدريبات الوسط المائي ومعرفة تأثيره على بعض المتغيرات البدنية(السرعة -1/3/1 القصى – تحمل السرعة- تحمل القوة- التحمل الدوري التنفسي) والمستوى الرقعي لمتسابقى جرى 1500متر للمجموعة التجريبية الأولى . تصميم برنامج تدريبي باستخدام تدريبات البيئة الرملية ومعرفة تأثيره على بعض المتغيرات البدنية (السرعة -1/3/2 القصى – تحمل السرعة- تحمل القوة- التحمل الدوري التنفسي) والمستوى الرقعي لمتسابقى جرى1500متر للمجموعة التجريبية الثانية التعرف على الفروق في المتغيرات البدنية(السرعة القصى – تحمل السرعة- تحمل القوة- التحمل الدوري -1/3/3 التنفسي) والمستوى الرقعي لمتسابقى جرى1500متر بين المجموعتين التجريبيتين لقد ازداد الوعي وانتشر الاعتقاد بفوائد تدريبات الماء فهي الآن واحدة من أحدث الطرق على مستوى العالم ،حيث تعمل تمرينات الماء كطبقي وقائي وعلاج طبيعي في مواجهة العديد من علاج حالات الإصابات أو التأهيل بعد الإصابة أو الجراحة أو اللياقة العامة للصحة وإنقاص الوزن والرشاقة والإرتقاء بمستوى اللياقة البدنية ،وتدريبات الماء هي من أحدث طرق التدريب الحديثة والشائعة في الوقت الحاضر ،حيث تعتبر تدريبات اللياقة البدنية المائية هي إحدى أشكال التدريب المفضلة وهي لا تحتاج إلى مهارة السباحة وأن أى شخص لديه الرغبة في ممارسة التدريب المائي يمكنه أن يجد المكان المناسب لأداء تدريبات اللياقة البدنية المائية. ويمكن أداء تدريبات الماء يومياً بدون قلق على العضلات أو المفاصل بعد الإصابة، فهذا يجعل النشاط أكثر متعة عن التدريب اليومي خارج الوسط المائي إذا لم تستطع اليوم مواصلة التدريب على الجري بسبب إصابة الركبة مثلاً فيمكنك التدريب في الماء.		
					2018	هذفت البحث الحالي إلى تطوير بيئة تعلم نقال قائمة على تطبيقات الحوسبة السحابية، والكشف عن أثر استخدام هذه البيئة في تنمية التحصيل المعرفي والأداء المهارى المرتبط بمهارات تصميم وإنتاج تطبيقات الأندرويد التربوية وفي تنمية بعض مهارا (رت ما و ا رة المعرفة لدى طلاب تكنولوجيا التعليم بكلية التربية النوعية بقنا، وتكونت عينة البحث من (68) طالب با وطالبة من طلاب قسم تكنولوجيا التعليم بكلية التربية النوعية بجامعة جنوب الوادي، واعتمد البحث الحالي على المنهج الوصفي التحليلي والمنهج شبه التجريبي، وخلص البحث إلى وجود أثر إيجابي لبيئة التعلم النقّال القائمة على تطبيقات الحوسبة السحابية في تنمية الجانب المعرفي والأداء المهارى المرتبط بمهارا رت تصميم وإنتاج تطبيقات الأندرويد التربوية وفي تنمية بعض مهارا رت ما وراء المعرفة لدى طلاب تكنولوجيا التعليم بكلية التربية النوعية بقنا.		
					2018	تطوير بيئته تعلم نقال قائمه على تطبيقات الحوسبه السحابيه واثرها في تنميه مهارات تصميم وإنتاج تطبيقات الأندرويد التربويه وبعض مهارات ما وراء المعرفة لدى طلاب تكنولوجيا التعليم/

					2018	على، على حسن عبادي حسن.		

						تم إجراء التحاليل على عينات من بذور اليقطين ، الحلو ، البطيخ الخام والبذور المحمصمة. لتحري عن التركيب الكيميائي ومحتوى المعادن وتركيب الأحماض الأمينية لبعض جبات بذور القرع ؛ تميز الخصائص الفيزيائية والكيميائية للدهون وتركيب الأحماض الدهنية للزيوت المستخرجة. وبالمثل ، شملت الدراسة تأثير استهلاك دقيق من هذه البذور على المظهر الجانبي للدهون في المصل من الفئران ، وأخيرا ، صياغة منتج غذائي يعتمد على مزيج دقيق القمح والطحين. تابنت التركيبة الكيميائية الإجمالية بين جميع الأنواع ، مع أعلى محتويات البروتين. سجلت الألياف الخام والكربوهيدرات في دقيق البطيخ ، في حين سجلت sweetmelon أعلى قيمة من الدهون الخام. كان لعملية التخميص تأثير كبير على التركيب الكيميائي وكسور الدهون. احتوت جميع العينات على كميات متفاوتة من البوتاسيوم والفوسفور والمغنيسيوم والكالسيوم والصوديوم والمنغنيز والزنك والحديد والنحاس. وأظهرت نتائج تحليل الأحماض الأمينية أنه من بين الأحماض الأمينية الأساسية ، سجل اللوسين أعلى المستويات ، وسجل الميثيونين أقل القيم. كان حمض الجلوتاميك الأكثر انتشارًا بين جميع الأحماض الأمينية ، يليه حمض الأسبارتيك. الجاليسين والأرجينين. أظهرت الخصائص الفيزيائية الكيميائية لعينات الزيت أنها غير مشبعة بشكل كبير. أظهرت نتائج الأحماض الدهنية أن أحماض الأوليك ، البالمتيك ، الإستريرك و اللينوليك كانت أهم الأحماض الدهنية في جميع العينات ، مع حمض الأوليك كان هو الغالب الأحماض الدهنية غير المشبعة ، ويتراوح من 60.02 إلى 70.60 ٪ من إجمالي الأحماض الدهنية. أشارت النتائج إلى أن الفئران التي غذيت على حمية تحتوي على 20٪ من بذرة بذور اليقطين كانت أعلى زيادة في وزن الجسم. كذلك أشارت النتائج إلى أن الفئران التي تغذت على نظام غذائي يحتوي على 20٪ من بذور اليقطين كانت عندها أدنى مستويات من الكولسترول الكلي في الدم ، في حين أن مجموعات الفئران التي غذيت على النظام الغذائي مع البطيخ 10٪ كانت تحتوي على مستويات عالية من HDL-C ، وتغذت مجموعات الفئران على النظام الغذائي مع 10٪ من دقيق بذور sweetmelon كان عنده أدنى مستويات triglycerides الكلي و VLDL-C ، لكن الفئران التي غُذت غذاءً مع 10٪ دقيق بذور sweetmelon سجلت أدنى مستويات LDL-C مقارنة مع مجموعات الفئران الأخرى التي غُذت على الحمية المعالجة بدقيق بذور القرع المدروسة. أظهرت النتائج أن عينات الكيك المدعمة كانت غنية بمحتويات البروتين. الألياف خام؛ الطاقة (كال / 100g) والبوتاسيوم بالمقارنة مع عينات التحكم. أظهرت نتائج التقييم الحسي أن كعك القمح التكميلي مع دقيق القرع 10٪ و 10٪ من دقيق سويتميلون يتميز بخصائص حسية جيدة ومقبولة أفضل مقارنة مع التحكم. وأظهرت النتائج أن خصائص عينات الزيت مماثلة لتلك الخاصة بالزيوت التقليدية ، مما يشير إلى إمكانية استخدامها كزيت صالح للأكل ، مع إمكانية استخدام البذور في إثراء الغذاء لتعويض النقص في بعض الأحماض الأمينية. يمكن الإشارة إلى أن هذه البذور غير مستغلة بالكامل ويمكن استخدامها لصياغة عدد لا يحصى من المغذيات. ومن ثم ينبغي تشجيع زيادة الإنتاج والتجهيز والاستخدام.

						إدارة الرياضة الحديثة تتطلع إلى تطوير وتحديث أساليبها من أجل مواكبة التغيير الذي حدث في المؤسسات الرياضية الدولية. الوافد حدث تغيير في جميع أبعاد وعناصر العمل في هذه المؤسسات. تحولت الإدارة إلى اعتماد التكنولوجيا المتقدمة أساليب وممارسة أساليب الإدارة المبتكرة بحيث يمكن تلبية متطلبات تلك المنظمات لتحقيق أهدافها ، ولكي تكون قادرة على المنافسة وتحمل السوق العالمية المفتوحة ، الذي يقل فقط التميز والتميز. وظيفة التسويق هي واحدة من أهمها الوظائف الإدارية في المنظمة وهي محددة لنجاحها. قدرة أي منظمة لإنتاج السلع وتقديم الخدمات هي محدودة إلا برفقة جيد تسويقي فعال يساعد على تحديد احتياجات المستهلك وزيادة المبيعات والربحية تسعى المنظمة لتحقيقه. قد قسم الإنتاج إنتاج سلعة معينة بكميات كبيرة وتكلفة مناسبة. ال قد يقوم قسم الأبحاث بتصميم تصميم جذاب وتوفير التمويل لكن كل هذه الجهود سوف تؤتي ثمارها فقط من خلال تسويقها بفعالية المنتجات والخدمات التي تقدمها المنظمة للسوق المستهدف. الاستخدام الفعال لنظام اللوجستيات سيعزز مكانة المنظمة في السوق من خلال تلبية احتياجات المستفيدين وخفض تكلفة عمليات التسويق. وبالتالي ، فإن مكونات المزيج التسويقي ، مثل تطوير المنتج ، اختيار وإدارة منافذ التوزيع ، سوف تتأثر. أول المستفيدين ، والحد من تكلفة التوزيع ، وزيادة المبيعات وخلق الفوائد الزمنية والمكانية للمنتج ومساعدة المنظمة على التنافس مع المؤسسات الأخرى. الرابط بين الخدمات اللوجستية والأنشطة التسويقية و أصبح التكامل والتعاون بينهما ضرورة خلق قيمة للعميل ، والبحث عن فرص جدية لتحقيق التميز ، والتحدى الذي يواجه العديد من الشركات هو كيف هذا التكامل والتعاون لتحقيق أقصى قدر من أداء المؤسسة وتحقيق ميزة تنافسية مستدامة ، من خلال رفع كفاءة خدمة العملاء والسعي لإدارة العلاقات المتبادلة بينهما. ليس هناك شك في أن اعتماد المرافق الرياضية على الرياضة التسويق مع مصلحة في تنشيط الأنشطة اللوجستية وتوفير الدعم اللوجستي من خلال توفير الخدمات والمرافق والفوائد للمستفيدين مهوم وضروريون ، يمكنهم من خلاله المساهمة لزيادة التمويل الذاتي ورفع معدلات الإنتاج ورفع الكفاءة والقدرة من المرافق الرياضية على الصمود والبقاء مواصلة أداء عملها وتحقيق أهدافها.

						وقائمة أخرى غير متوفرة. وضعت الدراسة أيضا استراتيجية مقترحة لتطوير إدارة المدارس الثانوية في ضوء المعلومات وتكنولوجيا الاتصالات هذا العصر هو عصر المعلومات والمعرفة. بل هو أيضا عصر تقدم تكنولوجي هائل ، التطور السريع والتغيرات المتتالية ؛ أهمها ثورة المعلومات والاتصالات وإستخدام التكنولوجيا في مختلف مجالات الحياة التي جعلت العالم أ قرية صغيرة. يشهد عالم اليوم تطوراً هائلاً في استخدام تكنولوجيا المعلومات والاتصالات ، مما أدى إلى تغيير في حياة الفرد في القطاع الخاص والتجاري المستويات. الحاجة الملحة لاستخدام تكنولوجيا المعلومات والاتصالات في جميع مناحي الحياة ، بما في ذلك التعليم ، وقد ظهرت. تحتاج إدارة المدرسة الثانوية لاستخدام المعلومات و أصبحت تكنولوجيا الاتصالات (ICT) ضرورية في هذا العصر تتميز المعرفة تتدلع. استخدام تكنولوجيا المعلومات والاتصالات لإتجاز عمل إدارة المدرسة ينشر ثقافة استخدام هذه التقنيات على مستوى المدرسة و في جميع أنشطتها بين الإداريين والمعلمين والطلاب. هذا ل خير من المتعلم ، الذي أعد على أسس علمية من خلالها يمكنه مواكبة التطور العلمي والمعرفي. أصبحت تكنولوجيا المعلومات والاتصالات جزء لا يتجزأ من العملية التعليمية ، مما يجعل المؤسسات التعليمية أكثر.		
6069	12480158	فاعليه برنامج قائم على الخرائط الذهنية الرقمية لتنمية بعض مهارات القراءة والكتابة الإبداعية لدى طلاب شعبه اللغة العربيه بكلية التربية/	محمد، شفاء محمد حسين.		2018	مشكلة الدراسة تم ذكر مشكلة الدراسة في: افترض طلاب كلية التربية إلى بعض مهارات القراءة والكتابة الإبداعية. لذلك حاولت الدراسة قياس فاعلية الخرائط الذهنية الرقمية في تنمية بعض مهارات القراءة والكتابة الإبداعية لدى طلاب كلية التربية في تخصص اللغة العربية. أسئلة الدراسة حاولت الدراسة الإجابة على الأسئلة التالية ☐ ما هي مهارات القراءة الإبداعية المطلوبة لطلبة قسم اللغة العربية بكلية التربية؟ ☐ ما هي مهارات الكتابة الإبداعية المطلوبة لطلبة قسم اللغة العربية في كلية التربية؟ ما مدى فعالية الخرائط الذهنية الرقمية في تطوير بعض مهارات القراءة الإبداعية المطلوبة لطلاب قسم اللغة العربية في كلية التربية؟ ما مدى فعالية الخرائط الذهنية الرقمية في تطوير بعض مهارات الكتابة الإبداعية المطلوبة لطلاب قسم اللغة العربية في كلية التربية؟ ما العلاقة بين فاعلية الخرائط الذهنية الرقمية في تنمية بعض مهارات القراءة الإبداعية وفعالية تطوير بعض مهارات الكتابة الإبداعية لطلاب قسم اللغة العربية في كلية التربية؟ الهدف من الدراسة: هدفت الدراسة إلى قياس فاعلية الخرائط الذهنية الرقمية في تطوير بعض مهارات القراءة والكتابة الإبداعية لطلاب كلية التربية في قسم اللغة العربية. القيود المفروضة على دراسة أقتصرت الدراسة على ما يلي: مجموعة من طلاب السنة الثالثة تخصصون في قسم اللغة العربية بكلية التربية بقنا حيث أنهم قادرون على القراءة والكتابة بطريقة إبداعية. لذلك ، يمكن تطوير مهارات القراءة والكتابة الإبداعية بسهولة. علاوة على ذلك ، هذه المهارات هي وسيلة للدراسة والإنجازات الأكاديمية وفي مجالات الحياة والتعليم كذلك (I Mind Map) البرنامج المقترح: تم إعداده وفقاً لخرائط العقل الرقمية باستخدام بعض مهارات القراءة الإبداعية المطلوبة لطلاب كلية التربية في تخصص اللغة العربية بعض مهارات الكتابة الإبداعية المطلوبة لطلاب كلية التربية في تخصص اللغة العربية. الذي Digital Mind Maps معمل الكمبيوتر في كلية التربية والذي يتم تزويده بالإنترنت لتسجيل الدخول في موقع صمم لبرنامج الدراسة ☐ أجري البرنامج الدراسي في العام الدراسي 2016/2017 أدوات الدراسة صمم الباحث الأدوات التالية: ☐ اختبار مهارات القراءة الإبداعية لطلبة كلية التربية تخصص اللغة العربية اختبار مهارات الكتابة الإبداعية لطلاب كلية التربية تخصص في اللغة العربية Skills تصميم الدراسة اعتمدت الدراسة الطريقة شبه التجريبية التي هي "تصميم Pretest-Posttest Nonequivalent- المجموعات". تم تنفيذ الاختبار المسبق لأدوات الدراسة. بعد تطبيق برنامج الدراسة ، تم تطبيق الاختبار البعدي لأدوات الدراسة أيضاً لتحديد أهمية الاختلافات بينهما.		
6070	12480163	تصاویر وفنون الشعائر الدينية في العصر العثماني من خلال المخطوطات الإسلامية ومجموعات المتحف:	عطا الله، ماهر عبد السميع السيد.		2018	وفي ختام هذه الدراسة يتضح لنا أن الشعائر الدينية، هي كل عبادة لها عاداتها وتقاليدها المرتبطة التي صارت سمة لها عن غيرها من سائر العبادات البسيطة، بل واشتهر بها المسلمون عن غيرهم من أصحاب الديانات الأخرى. وفي ضوء ما وصلنا من العصر العثماني من تصاویر تزين المخطوطات الإسلامية أو تحف فنية مرتبطة بشعائر دينية خاصة بالمسلمين، وجدنا من الشعائر الدينية ما كان لها النصيب الأكبر من اهتمام الحكام والسلاطين، الذين حرصوا على تشييد المنشآت الدينية لها، وبخاصة دور العبادة وتوفير سبل الراحة لمقيمي مثل هذه الشعائر الدينية الإسلامية المختلفة وتنافسوا في ذلك تنافسا شديدا ، وكذا نالت حرص الفنانين والمُصورين، وقاموا بتناول عاداتها ومأرميها بشكل يمكننا من خلاله تحديد ما يميز تلك الشعائر من ملامح وممي أرتت انفردت بها عن غيرها من سائر العبادات. وقد كان حرص الفنان المسلم على تصوير كافة هذه الشعائر الدينية ربما محاولة منه لإبراز الملامح الرئيسية للدين الإسلامي، وتعددت وتنوعت الرسوم التوضيحية التي تمثل مثل هذه الشعائر، وقد أبدع كل فنان ور في رسم تلك		

						التصاوير، واختلقت الأساليب الفنية من ثم صر لآخر ومن فترة زمنية لأخرى، حيث رسم كل فنان الشعائر الدينية حسب تقاليد وموروثات عصره الفكرية. وكذا كان الحال فيما يتعلق بالتنوع والاهتمام من قبل السلاطين والحكام والقائمين بالنسبة للشعائر الفنية المرتبطة بتأدية مثل هذه الشعائر الدينية، وتأتي في صدارة هذه الشعائر الدينية الإسلامية التي تمتلئ بالمخطوطات الإسلامية برسوم مرسومها وطقوسها، وكذا تزخر المتاحف العالمية بحفظ التحف والمقتنيات التي كانت تربط بأدائها) الصلاة الجائز الحج (.. - - وأهم ما حاولت الدارسة أن تساهم فيه بشكل جلي، هو تصويب ما وقع فيه بعض الباحثين ممن سبقونا في الدارسة بعض التصاوير أو التحف التطبيقية من قبل، والذي تمثل أحياناً في نمية تصويرية إلى مخطوط آخر لا تنتمي التصويرية إليه، أو تأويل لبعض عناصر التصويرية، كأن يقوم بعض هؤلاء الباحثين بوصف أحد أشخاص التصويرية على أنه السلطان مثلاً في حين أنه أحد الجنود، أو أن يقدم البعض وصفاً لمنظر تصويري لم يكن هو الوصف الذي كان يقصده المصور أو الفنان عند رسمه لهذا المنظر، واعتمدت الدارسة في سبيل تصحيح هذه الأخطاء على باريهين قوية. قدمت لنا رسوم المخطوطات العثمانية صورة واضحة عن طرز العماائر الدينية كالمساجد والزوايا والمدارس وغيرها من الأماكن التي تقام فيها الصلاة في العصر العثماني، أيضاً الأمر بالنسبة للعناصر المعمارية المستخدمة في إقامة شعائر الصلاة كالمئذنة والمحاريب والمنبر... الخ الترجم المصنوع إلى حد كبير عند رسمه للموضوعات الدينية الهامة، بتعاليم الدين الإسلامي؛ فمثلاً حين يرسم شخصاً في شمره الدارعية حتى نهاية الكوخ، وكذلك الأمر بالنسبة لملايس.		
6071	12480170	تأثير برنامج تدريبي باستخدام تدريبات السالكو S.A.Q على بعض القدرات التوافقية ومستوى الأداءات المهارية الهجومية المركبة للاعبين كرة اليد /	سيد، محمد أحمد همام.		2018	أهداف البحث :- يهدف البحث إلى تصميم برنامج تدريبي باستخدام تدريبات السالكو S.A.Q. ومعرفة تأثيره على تحسين كلا من :- - بعض القدرات التوافقية للاعبين كرة اليد - مستوى الأداءات المهارية الهجومية المركبة للاعبين كرة اليد فروض البحث :- توجد فروق دالة إحصائية بين متوسطات القياسين القبلي والبعدى للمجموعة التجريبية في بعض القدرات التوافقية (قيد البحث) لصالح القياس البعدى توجد فروق دالة إحصائية بين متوسطات القياسين القبلي والبعدى للمجموعة التجريبية في مستوى الأداءات المهارية الهجومية المركبة (قيد البحث) لصالح القياس البعدى توجد نسب تحسن في مستوى القدرات التوافقية ومستوى الأداءات المهارية الهجومية المركبة لثلاثين لاعب كرة اليد عينة البحث منهج البحث :- استخدام الباحث المنهج التجريبي للمجموعة الواحدة عن طريق القياس القبلي والقياس البعدى وذلك لمناسبة هذا المنهج وطبيعة البحث. مجتمع البحث :- يمثل مجتمع البحث ناشئ كرة اليد بمنطقة قبا مواليد 2000/2002 والبالغ عددهم 72 ناشئاً والمسجلين بالإتحاد المصري لكرة اليد. عينة البحث :- تمثل عينة البحث ناشئ كرة اليد مواليد 2000/2002 بمرکز شباب مدينة العمال بمحافظة قبا والمسجلين بالإتحاد المصري لكرة اليد وعددهم 18 ناشئاً وتم إختيارهم بالطريقة العمدية. أدوات جمع البيانات :- - تحليل المحتوى للمراجع والدراسات السابقة - استمارات إستطلاع رأي الخبراء حول القدرات التوافقية الخاصة لثلاثين لاعب كرة اليد - استمارات إستطلاع رأي الخبراء حول إختبارات القدرات التوافقية الخاصة لثلاثين لاعب كرة اليد - استمارات إستطلاع رأي الخبراء حول أهم الأداءات المهارية الهجومية المركبة لثلاثين لاعب كرة اليد - استمارات إستطلاع رأي الخبراء حول إختبارات الأداءات المهارية الهجومية المركبة لثلاثين لاعب كرة اليد - استمارات تسجيل نتائج القياسات للإختبارات الخاصة بالقدرات التوافقية والأداءات المهارية الهجومية المركبة لثلاثين لاعب كرة اليد		
6072	12480194	فاعلية التعلم التعاوني في تدريس مادة الكهرباء لتنمية المفاهيم العلمية والمهارات الوظيفية لدى تلاميذ الصف السادس المتوسط بنوالة الكويت/	الشمرى، سهام جابر ضويحي.					
6073	12480198	تطوير مهام مديري المدارس الثانوية في الكويت في ضوء مدخل القيادة الموزعة/	معرفى، محمد ابراهيم عبد الرضا كرم محمد.		2018	هدفت الدراسة إلى تطوير مهام مديري المدارس الثانوية في الكويت في ضوء مدخل القيادة الموزعة من خلال التعرف على واقع تطبيق مديري المدارس الثانوية للمهام الإدارية والفنية في ضوء مدخل الإدارة الموزعة. استخدمت الدراسة المنهج الوصفي التحليلي. السلطة الإدارية والتعليمية في المدارس الثانوية في جميع مناطق دولة الكويت التعليمية وأظهرت النتائج التالية واقع تطبيق مدراء المدارس الثانوية للكويت على المهام الإدارية في ضوء مدخل الدائرة الموزعة على مجالات التخطيط: 1. (الاتصال، العلاقات الإنسانية، التفاوض، اتخاذ القرار، إدارة الاجتماعات)، واقع تطبيق مدراء المدارس الثانوية بالكويت على المهام الفنية في ضوء مقدمة الإدارة الموزعة للحقول (التوجيه، التطوير المهني للمعلمين، تكوين الفريق، دعم التقنية التعليمية، دعم مجتمع التعلم، التقييم) والذي تطلب سيناريو مقترح لتفعيل تطبيق مدخل الإدارة الموزعة في المدارس الثانوية بالكويت المفردات الرئيسية: التنمية - المهمة - مديري المدارس الثانوية في الكويت بوابة الإدارة الموزعة		
6074	12480201	طرز منشآت الرعاية الاجتماعية الباقية بمدينة بورصة خلال العصر العثماني/	زباديه، أحمد حلمي صادق إبراهيم.		2018	تكمين أهمية الدارسة منشآت الرعاية الاجتماعية بمدينة بورصة خلال العصر العثماني في عدة أسباب منها: أنو لم تفرد الدارسة عممية مستقلة لهذا النوع من العماائر، وأن معظم الدارسات تمثل كتب وبحوث تنتهول نوع واحد من العماائر وليس عمل عممي متكامل ينطرق إلى طرز وأنماط وأنواع تلك المنشآت، وطبيعة عمميا. ومن الأسباب التي دفعتني لدارسة هذا الموضوع بو إلقاء الضوء عمى أحد أهم أنواع العماائر العثمانية بعيداً عن المدينة العثمانية الأشير استانبول، وإختيار مدينة ذات بعد حضاري بيزنطي ثم إسلامي وكانت إحدى عواصم الفترة المبكرة لمدولة العثمانية، ونى مدينة بورصة) 1 (، اولوقوف عمى مدي تحضر وتدين الدولة العثمانية وإزداربا سياسياً واجتماعياً واقتصادياً بما تعكسو منشآت الرعاية الاجتماعية المختلفة، كذلك الوقوف عمى ما تضمو هذه الانماط المعمارية من مخططات، وما تحتويو مكوناتاً من وحدات وعناصر معمارية وزخرفية مهمة كان ليا دواز ميمما في تطور نظم العمارة الإسلامية بشكل عام. تهدف هذه الدارسة الى إلقاء الضوء عمى مجموعة من منشآت الرعاية والتكافل الاجتماعي بمدينة بورصة خلال العصر العثماني، وتحديد طرزها المعمارية المختلفة في كل نوع من أنواع منشآت الرعاية الاجتماعية		

							سواء دور الشفاء، الحمامات، المدارس، مكاتب الصبيان، منشآت التصوف، دور المرق، والأسمدة، والوقوف على المتطلبات الوظيفية لكل منشأة، وعلى الوحدات المعمارية التي تضمها كل منشأة من أجل تحقيق متطلباتها الوظيفية، كما تيف إلى: تحديد استراتيجيات توزيع منشآت الرعاية الاجتماعية في مدينة بورصة خلال العصر العثماني 1- واسبب ذلك. التعرف على العوامل المؤثرة على عمارة منشآت الرعاية الاجتماعية بمدينة بورصة في العصر 2- العثماني سواء العوامل البيئية أو الدينية أو الاجتماعية أو السياسية أو التكتيكية الأوربية الوافدة. التعرف على طرق تشغيل منشآت الرعاية الاجتماعية بمدينة بورصة خلال فترة الدراسة 3- الوقوف على مدى نجاح المعماري في التوفيق بين الوظيفة والتخطيط في الانماط المعمارية موضوع الدراسة 4- الإجابة على تساؤل حول: بل تأثرت عمارة وزخرفة منشآت الرعاية الاجتماعية بعد نقل العاصمة 5- من بورصة إلى أدرنو ثم استانبول؟ التعرف على مدى تأثير عمارة منشآت الرعاية الاجتماعية بمدينة بورصة العثمانية بمثلثات بالولايات الخاضعة لمدولة 6- العثمانية والدول المحيطة بها. التعرف على أسباب تسميات منشآت الرعاية الاجتماعية بمدينة بورصة فترة الدراسة 7- الوقوف على الفئات الاجتماعية المساهمة في عمارة منشآت الرعاية الاجتماعية بمدينة بورصة 8- العثمانية.			
6075	12480212		Vibration and tribological behavior of adding nano oxides materials to lithium grease /	taye, Eman ahmed abdelbaset.						
6076	12480221		Design and analysis of fluxswitching machines/	Saeed, Mahmoud saeed rayan.						
6077	12480228		Study of the anti-lock brake systems for passenger cars /	el-deen, El-shimaa hassan kamal.			2017 Nowadays the Anti-lock Brake System (ABS) is a standard safety feature in modern vehicles. Therefore, this study is focused on investigating the vehicle performance during different braking maneuvers using the ABS. On the other hand, the proper selection of anti-roll bar (ARB) is also investigated to reduce the vehicle lateral shift during braking due to the roll motion of the vehicle. A one axle 6-DOF Vertical-Lateral vehicle mathematical model considering the roll motion of the vehicle body and the rotational motion of the wheels is developed. The suspension system is modeled as independent suspension with Anti-roll bar. The tire-road interface is modeled using Magic formula together with a single point of contact road excitation considering the road roughness. On the other hand, the ABS control algorithm is developed based on the PID control theory employing wheel slip control strategy. The vehicle simulations are focused on three case studies present the effect of using the ABS controller on the vehicle braking performance and the anti-roll bar selection on the vehicle vertical and roll motions and the lateral shift of the vehicle during straight ahead braking. The braking performance is evaluated in terms of stopping distance and time, while the ride comfortable is evaluated in terms of vertical and roll accelerations. In addition to that, the vehicle lateral displacement is considered as an indicator to the vehicle lateral shift during braking. The obtained simulation results showed that, using the ABS improved the braking performance in terms of the stopping distance and time in comparison with the conventional brake system for all the investigated case studies. Furthermore, the vehicle roll and lateral dynamics in the split μ braking maneuvers is improved by the proper selection of the Anti-roll bar.

6147	12486204		التنصص الأسلوبى فى مسرح شوقى الشعرى :	فرج, عزّة محمد أحمد.		2017	The study consists of introduction addressed the importance of the subject and its uniqueness and monetary approach followed and then mulch came entitled syllabus terminology (identify and clarify) then the message consisted of five chapters came that way:- The first Chapter: wombs bookmark hairy in Shawki's poetic theatre. The Second Chapter: Intertextuality lexical hair in Shawki's poetic theatre. The third Chapter: Intertextuality rhythmic and harmony in Shawki's theater poetry The fourth Chapter: Intertextuality of the metaphorical hair in Shawki's theater poetry The five chapter: Compositional intertextuality hair in Shawki's theater poetry Then the finale provided letter and summarized findings and foreseeing the researchers aspire to such quality of those modernist studies and list of sources , references , theses and journals that reported her study.	2	
6148	12488219		الفكر المسيحى المبكر وتطوراتّه :	قناوى, محمد أبوالمجد محمد.		2014	This thesis for procuration master's degree in medieval Christian philosophy ,moreover,entitled "Early christian thought and its developments- selected examples." That the study has been examine the important ideas that have contributed to the formation of early christian thought and doctrines and moreover I choice Gnosticism and a Saint Irenaeus as example of the defenders of christianity in the face of that band, then the most important figures patristic them, for example, "Ignatius of Antioch and Clement and Origin Alexandrians, "then the most important figures that influenced in the Council of Nicea. The researcher used comparative analytical method, This study was consists of an introduction and five chapters and a conclusion. • The introduction discussed the definition, clarification of its importance thesis and referred to the methodology which used in the preparation of it and exposes questions which around it. • The first chapter is entitled " Intellectual trends leading up to the coming of christianity." • The second chapter is entitled " Firstfruits christian thought." • The third chapter is entitled "The position of early christian thought from Gnosticism." • The fourth chapter is entitled " parents ancients `s christian thought." • The fifth chapter is entitled "Christian thought in the third century and its reflection on the fourth century." The conclusion have been enrolled the most important results. 1 – There are elements of the influence and impact between the Greek and Jewish thought in christian thought. 2 – There are ascertain basic doctrines to faith in the age of the apostles as well as the idea of the Incarnation and the Trinity and the redemption and salvation, and theological reasoning to the person of christ and the Apostles posts in the writings of the Fathers fill the void in the historical information. This was followed by the list included the most important Arabic and foreign sources and references.		
6149	12489031		أحمد, مروة محمد شحاتة. / (ت899 هـ)الآراء الكلامية والصوفية لدى الشيخ أحمد زروق " "			2018	This thesis is submitted to get the master's Degree in Islamic Philosophy and Sophism. It is entitled "Verbal and Sophism Points of View of Sheikh/ Ahmed Zarouk". He is one of the most prominent figures of Moroccan Sophism thoughts. His uniqueness and fame are due to handling rhetoric, jurisprudence and sophism. This thesis has discussed God's divine elements of Sheikh/ Ahmed Zarouk, types of monotheism, monotheism of deeds, and monotheism of features. This monotheism is based on proving divine perfection of names and features without any kind of adaptation or exemplification.		

							This thesis has also discussed Sheikh/ Ahmed Zarouk's life and the environment where he has grown, as he was born in a house of science and religion being brought by his grandmother. As a result, he has been fond learning, writing, science and religion. from a scientific perspective, this has led to a brilliant belief movement in most places of Arabic Moroccan countries. Furthermore, according to political, social and religious conditions, there have been conflicts and tensions due to conflict of reaching regime. from the external perspective, there has also been conflict with christians which caused commercial and social decline. Then, the thesis discusses the problem of soul and the world according to Sheikh/ Ahmed Zarouk. It has also clarified their concepts, his opinions about them. It has discussed the Holy Quran and Prophet's opinions about this issue as well as illustrating philosophers' and argumentative verbal philosophers' opinions about this issue. Moreover, this thesis has discussed sophism opinions of Sheikh/ Ahmed Zarouk through illustrating concept of sophism and its features. This thesis has also discussed Sheikh/ Zarouk's concept of sophism, and the relationship between sophism and jurisprudence. This thesis has also discussed sheikh/ Zarouk's approach in correction of.		
6150	12489140		بعض سمات الشخصية وعلاقتها بأساليب مواجهة الضغوط لدى مرضى الفشل الكلوي :	أحمد, أحمد جمعة محمود.		2018	The current study aims to identify the relationship between some personality traits (depression - anxiety) and styles of coping with stresses in patients with renal failure and healthy, as well as to verify the differences between patients and healthy personality traits (depression - anxiety) and styles of coping with stresses, Males and females in the samples of patients and healthy personality traits (depression - anxiety) and styles of coping with stresses. The study was conducted in two groups: the first group, the group of patients with renal failure, consisting of 60 patients (N = 60), and the second group is the healthy group consists of 60 individuals (N = 60). The study tools consists of a battery of psychological tests, which included the Demographic Data Questionnaire, the Depression Measure (1961), the Arabization and Standardization of Ahmed Abdel Khaliq (1996), and the Measure of Concerns Prepared by the Researcher and the Measure of styles of coping with stresses prepared by Hanaa Shuwaikh (2004). To verify the validity of the current study hypotheses, namely: 1- There is a correlation relationship of statistical significance between depression and styles of coping with stresses in the eyes of patients with kidney failure and healthy. 2 - There is a correlation relationship of statistical significance between anxiety and styles of coping with stresses in the eyes of patients with kidney failure and healthy. 3-There are statistically significant differences between the mean scores of patients with renal failure and the averages of healthy levels on both the measure of depression and anxiety and styles of coping with stresses. 4- There are statistically significant differences between the mean scores of males and the average scores of females on the scale of depression and anxiety and styles of coping with stresses in the samples of patients with kidney failure and healthy. The current study yielded multiple results, the most important of which are: 1- There is a statistically significant correlation between depression on the one hand and the majority of styles of coping with stresses on the other hand in patients and healthy people. 2- There is a statistically significant correlation between anxiety on the one hand and the majority of styles of coping with stresses on the other in patients and healthy people.		
6151	12489456		ديوان ابن الخيمي :	عبد الرحيم, عبد الحميد عبد الرحيم عبد اللاه.		2017	After studying (Ibn El-Kheiamy) I can say that Ibn El-Kheiamy divan as a model of the poetry of that period (the seventh hijry century) which attended both of the Ayyubid and Mamluk states, it's regarded as one of the literary heritage treasures, in addition to it produce a reflection of an Arabian poetry in Egypt in that period. Hence; the study proved that the poetry in the period of (Ayyubid and Mamluk) although the problems that encountered, it still strong. In my opinion, Ibn El-Kheiamy did well even if he has some mistakes - as previously- but he is interceded because of his true and creative which is the most. The most prominent and recommendation results that I reached through this study were: * Ibn El-Kheiamy is regarded a pioneer of El-Ekhwaneyyat art, and he is the major general of the poetry in his period which was proved by many historians and translators, to the extent that, Alzahaby, El-kotoby and Al-safady preferred him on the poets of his period. * Ibn El-Kheiamy had lived in (the seventh hijry century) which as the other centuries has its own features differentiate it, may be the most important of these features is the religion spirit that was prevailing in the society, the reason of that may be the crusades which took a place in that period. * Ibn El-Kheiamy wrote in different poetry purposes so almost he wrote in all the poetry purposes.		

						203 * The poet was interested in El-Ekhwaneyyat art, so it came in the first status in his divan. He has more than five hundred poetic verses and sections, that is almost one third of his divan. Included Ekhwanic subjects and purposes, such as Longing, affection, nostalgia, congratulations and elation etc. * Ibn El-Keiamy Courting was chaste, didn't shame modesty or stimulate the instincts. The seventh hijry century (13th century) attended Sufi displacement too much into Egypt, so Sufism is regarded as an important poetic purpose for Ibn El-Kheiamy, so that he wrote tow hundred and sixty eight verses. * Ibn El-Kheiamy's language refers to his much knowledge and his memorization of the holly Qur'an and the holly Hadeeth, in addition to, he learnt from the preceding poets; that refers to his wide literary vista and amount of his knowledge about the previous poets his effectiveness by them. * Ibn El-Keiamy was featured by leaving the diversion and insanity; the reason for that may be the disturbance of the politic and social life then. * The divan of Ibn El-Kheiamy include all poetic arts, such as music, rhyme, eloquence, significance and ability of creating meanings by a linguistic dictionary and a method specialized in it without the others. * One of Ibn El-Kheiamy demerits was that the nature wasn't mentioned in hi divan. The Nile which mentioned in all poets' writings in all periods and was impressed by many Egyptian poets, we don't find any 204 mention about it in this divan, the nature generally didn't mention in Ibn El-Keiamy divan. * In the end; I recommend all the researchers to come back to our literary heritage which suffered from the treachery and neglect. Our literary heritage has true expression about the life of our formers with its social, politic and economic differences and tell us their feelings, ideas, wisdom and experiences which we extremely need now. * I also recommend the researchers to research in impartial and subjective, without Drifting by the opinions of some critics. Perhaps, a critic may vilify the poet of a whole period because of incomplete look without scrupulousness.		
6152	12489602		أثر حروف الزيادة في بيان المعاني الحديثة في كتاب سنن ابن ماجه :	طه. فايزة حلمي مصطفى.		2017 Year important source after Quran citation for most levels of language and meaning and significance level at the level as at the level of the exchange rate. ❑ 1-Observe the method and manner of arranging Ibn maajah in his Sunanrank on the doors. ❑ 2-He started with an introduction in faith and science stating (22) Daddy, and (222) recently, and the doors of worship then doors of Nikah and divorce and other doors. ❑ 3-talking inventory report, and rarely mention the effects of the sahaabah and taabi'een. ❑ 2do not repeat conversations in writing, not only attaches a little rare. ❑ 5-in section offers powerful conversations, makes in vulnerable finale section. ❑ Choreography and provided a great service for Arabic science, anhgwa, they put toward her Arabic science foundations and disbursed, establish their doctrine and triumphed over others, and learned linguistic generations since the fourth century Hijri to say optometrists say no, it's louder and raises him, damaged that belief in science, he snarled, and maybe it's rebellion, what a beautiful saying dad alive in the ocean sea "are not religious saying overthrown Basra and others who oppose them, how rule proved transfer dictational mistakes of Arab words never moves, choreography. ❑ Gilded optometrists to increase ten letters collected by saying (saltmoniha) and it does have a character in the word is those 11, they made fun of some dictational mistakes when they say increase the character not of these ten, the kufic expand in letters and they say are not being, and do not distinguish between increased disclosure and others. ❑ Which shows me in letters increase differs from Ray optometrists and view dictational mistakes, Vari should differentiate between the increase in morphological characters start steady, steady increase non-fossil language characters, I believe that the increase of two types: ❑ 1increase the disclosure standard, and alphabet of eight (a t o m n f a j) is not ten, have excluded the LAAM and distraction. ❑ 2.increase acoustic language lexicography, fossil and alphabet		

							letters all. This second type of lexical search serves increase characters and opens wide to signify, designated to track the evolution of the roots and disclose their relationships with each other. □ Eight characters growths (steady disclosure standard) and other linguistic means drastic growths characters in non-steady foot on language usage.		
6153	12489814		دراسة تأثير عوامل التلف على الآثار الجصية بالمنشآت الأثرية وطرق ترميمها، تطبيقاً على أحد النماذج المختارة / على، أيمن محمود سيد.			2014	where eating plaster in ancient Egypt has said Alfred Lucas that the first case was used gypsum as an adhesive , was to repair a vase of pottery from the predynastic period , and has popularized the use of mortar, plaster stone buildings in sucking the old note that the use of plaster Commune was not primarily to connect the blocks but only used to fill in the blanks and gaps minute surfaces top of the blocks of stone bearing the large distribution falls from Loads knew gypsum burning in the era of households ancient Egyptian beginning in 5000 to 3000 BC, has been used as a link between the stone blocks in the pyramid of Cheops , about 2900 BC. It also touched on plaster in ancient Greek Romanian characterized by masks frescoes that have sprung up in Egypt and confirmed by the large number who discovered the masks frescoes in many from Egypt where there is a museum Greco-Roman Alexandria, a set of masks stucco colored numbering (32) mask in addition to the masks in the Egyptian Museum . Also addressed the research also plaster in the Coptic era where characterized by the Coptic period lack of studies that addressed in this research was to identify the origin of the word Copt , and the definition in the Coptic language , the most important characteristic of plaster in Coptic art , Egyptian since ancient times tends to religiosity , by its nature and upbringing , it has been extended to religiosity christian and Islamic eras and yet speak Arabic Copts today , but they are using the Coptic language in their churches , Coptic is the last stage in the civilization of the ancient Egyptians, and is in the initial stages forms hieroglyphics and hieratic and demotic . He grew expression (Coptic) from the Arabic word " uptake " and the word Copt initial traces its roots back to the Greek word "Aigyptioi / Aigyptos". Finally, Section plaster in the Islamic era, where there were many methods of decoration plaster in different periods of the era of Islamic until it became his recipes basics known distinguish a decoration plant engineering and clerical, decorations organisms, and have been acquainted with the first uses of plaster in -BEgypt in the era of Caliphs after the Islamic conquest to Egypt at the hands of the commander and companion Amr ibn al-Aas (may Allah be pleased with him)

من خلال العرض السابق تم تحديد الأسئمة في التالي:

ما صورة برنامج مقترح قائم على استخدام استراتيجيتي الشكل (7) و فكر – زوج – شارك (لاكتساب بعض – 1 المفاہيم الموسيقية لتحسين بعض بنود التربة الموسيقية لدى طفل الروضة ؟

ما فاعية استخدام استراتيجي الشكل (7) في تدريس البرنامج المقترح لاكتساب بعض المفاهيم الموسيقية لدى طفل الروضة ؟

ما فاعية استخدام استراتيجي (فكر – زوج – شارك) في تدريس البرنامج المقترح لاكتساب بعض المفاهيم الموسيقية – 3 لدي طفل الروضة ؟

– أم استراتيجي (فكر ، V) أي الاستراتيجيتين تحقق نتائج أفضل في اكتساب المفاهيم الموسيقية استراتيجي الشكل – 4 زوج – شارك (؟)

ما فاعية استخدام استراتيجي الشكل (7) في تدريس البرنامج المقترح لتحسين بعض بنود التربة الموسيقية لدى طفل الروضة ؟

ما فاعية استخدام استراتيجي (فكر – زوج – شارك) في تدريس البرنامج المقترح لتحسين بعض بنود التربة الموسيقية لدى طفل الروضة ؟

– أم استراتيجي (فكر ، V) أي الاستراتيجيتين تحقق نتائج أفضل في أداء بنود التربة الموسيقية استراتيجي الشكل – 5 زوج – شارك (؟) أهداف البحث :

يهدف هذا البحث إلى :

(و فكر – زوج – شارك) لاكتساب المفاهيم الموسيقية لتحسين بعض (V) تقديم برنامج قائم على استراتيجيتي الشكل – 1 بنود التربة الموسيقية لدى طفل الروضة

لاكتساب بعض المفاهيم الموسيقية لدى طفل الروضة (V) قياس فاعية البرنامج القائم على استراتيجي الشكل – 2

قياس فاعية البرنامج القائم على استراتيجي (فكر – زوج – شارك) لاكتساب بعض المفاهيم الموسيقية لدى طفل الروضة – 3

(و فكر – زوج – شارك) تحقق نتائج أفضل في اكتساب المفاهيم (V) الكشف عن مدي فاعية أي استراتيجيتي الشكل – 4 الموسيقية لدى طفل الروضة

لتحسين أداء بعض بنود التربة الموسيقية لدى طفل الروضة (V) قياس فاعية البرنامج القائم على استراتيجي الشكل – 5

قياس فاعية البرنامج القائم على استراتيجي (فكر – زوج – شارك) لتحسين أداء بعض بنود التربة الموسيقية لدى – 6 طفل الروضة

(و فكر – زوج – شارك) تحقق نتائج أفضل لتحسين أداء بعض (V) الكشف عن مدي فاعية أي استراتيجيتي الشكل – 7 بنود التربة الموسيقية لدى طفل الروضة

أهمية البحث :

تظير أهمية البحث الحالي في الاتي :

الأهمية النظرية :

تحديد بعض بنود التربة الموسيقية الأساسية والمناسبة لطفل مرحلة الروضة - مساعدة القائمين على العممية التعميمية من معلمات وباحثات على التعرف لوسائل وأساليب جديدة لتعليم الموسيقى - لطفل الروضة

يهدف هذا البحث مجاًلاً كبير لأبحاث لاكتساب مفاهيم أخرى لطفل الروضة أو الأطفال في مراحل عربية لاخرة - الأهمية التطبيقية :

تقديم برنامج يحتوي على استراتيجيات حديثة ذات معنى يمكن استخدامها مع أطفال مرحلة الروضة بهدف اكتساب المفاهيم الموسيقية لديهم

معاونة الأطفال على اكتساب المفاهيم الموسيقية لديهم ما يساعدن على فهم وتذوق أشكال موسيقية عديدة - أسلوب يعتمد على المرح والبيجة من خلال الحركة مع الأطفال وذا ما تتميز بنو ذه المرحلة -

فروض البحث:

1- يوجد فروق ذات دلالة إحصائية بين متوسط درجات المجموعة التجريبية الأولى باستخدام استراتيجي الشكل (7 - والمجموعة الضابطة) الطريقة التتميدية على الاختيار التحصيلي لمفاهيم الموسيقية في القياس البدي لصالح المجموعة التجريبية الأولى

فوجد فروق ذات دلالة إحصائية بين متوسط درجات المجموعة التجريبية الثانية باستخدام استراتيجي (فكر – زوج – شارك) والمجموعة الضابطة) الطريقة التتميدية على الاختيار التحصيلي لمفاهيم الموسيقية في القياس البدي لصالح المجموعة التجريبية الثانية

توجد فروق ذات دلالة إحصائية بين متوسطات درجات أطفال المجموعة التجريبية الأولى والمجموعة التجريبية الثانية - للاختيار التحصيلي لمفاهيم الموسيقية في القياس البدي

(يوجد فروق ذات دلالة إحصائية بين متوسط درجات المجموعة التجريبية الأولى باستخدام استراتيجي الشكل (7 - والمجموعة الضابطة) الطريقة التتميدية على بطاقة الملاحظة لبنود التربة الموسيقية في القياس البدي لصالح المجموعة التجريبية الأولى

يوجد فروق ذات دلالة إحصائية بين متوسط درجات المجموعة التجريبية الثانية باستخدام استراتيجي (فكر – زوج – شارك) والمجموعة الضابطة) الطريقة التتميدية على بطاقة الملاحظة لبنود التربة الموسيقية في القياس البدي لصالح المجموعة التجريبية الثانية

توجد فروق ذات دلالة إحصائية بين متوسطات درجات أطفال المجموعة التجريبية الأولى والمجموعة التجريبية الثانية - على بطاقة الملاحظة في القياس البدي

محددات البحث :

الخصائص البحث الحالي على بعض المحددات التالية :

يقتصر البحث الحالي على بعض المحددات التالية :

								(بمع عدد 99 kg) (محدد مكاني: تم تطبيق البرنامج المقترح على مجموعة من أطفال الروضة المستوي الثاني -1 طفلًا وطُفلة بمدرسة العميرية بمحافظة الفروانية بدولة الكويت وقد تم إختيار المستوي الثاني لارتفاع المستوي العقلي والحسنية المغوية المناسبة التي من خلالها يستطيع الطفل فهم وربط المعلومات مع بعضيا البعض محدد زماني: طبق البرنامج المقترح في الفصل الدراسي الثاني لمعام) 2917/ 2918 (في الفترة من -2 إلى 1 / 6 / 2917 بواقع جمسو أسبوعيا كل جمسو تحتوي على فترتين لمدة شيرين ونصف تقريبا 2917 / 3 / 7 (و فكر – أزوج – شارك (لطفل (V) محدد موضوعي : طبق نذا البحث اعتمادا على استخدام استراتيجيتي الشكل -3 الروضة تم إختيار عدد من بنود التربية الموسيقية وذلك بما يتناسب مع المرحلة العمرية لمجموعة البحث (الاستماع والتثوق، الغناء ، العزف على آلات البائد الإيقاعية ، الإيقاع الحركي ، الألعاب الموسيقية) منهج البحث : يعتمد نذا البحث على المنهج الشبو تجريبي لما ينظمو من تناول متغي رات مستقمة ومتغيرات تابعة ، حيث تجري تعديلات محددة ومنظمة في التغيرات المستقمة لمتجربة يفترض أنها تؤدي إلى تغيير في المتغيرات وقد اختير التصميم التجريبي من المجموعات المتكافئة (الضابطة والتجريبية (عن طريق القياس القيمي والبديوي وذلك لملائمة طبيعة البحث الحالي ، حيث لوحظ أداء المجموعة التجريبية قبل وبعد تطبيق المتغير التجريبي ثم تم قياس مقدار التغير الذي حدث ، أي إنو منيج يعتمد على إجراء الاختيـارات أو الاستـيـناتات القيمة لمجموعة المارد تطبيق البرنامج المقترح عيبيا ثم إعادة إجراء نفس الاختيـارات أو الاستـيـناتات بعد الانتهاء من التجربة . أدوات البحث : (اختبار تحصيلي مقروء) بمساعدة الباحثة (لمفاهيم الموسيقية) القيمي – البديوي -1 (تم إعداده) ولإعداد نذا الاختبار تم القيام بما يلي: تـحـديـد الـبـيـف من الاختبار - تـحـديـد مـصـادر بـنـاء الـاـخـتـبـار من خـلال - أـ. الاطلاع على الد ارسات السابقة في مجال التخصص. بـ. تصميم جدول المواصفات بحيث نحدد الوزن النسبي لكل جزئية وبالتالي الاسمنة في كل جزء تـحـديـد نـوع مـفـردات الـاـخـتـبـار - . صيغة مفردات الاختبار وتعميمتو - تـصـحـيـح الـاـخـتـبـار - . عرض الاختبار على مجموعة من المحكمين المتخصصين في تدريس التربية الموسيقية - التجربة الاستطلاعية وحساب صدق وثبات الاختبار - 243 بطاقة ملاحظة لأداء بعض بنود التربية الموسيقية : (تم إعداده) ولإعداد نذا البطاقة تم القيام بما يلي -2 تـحـديـد الـبـيـف من البطاقة - . تحديد مصادر بناء البطاقة - . صياغة مفردات البطاقة وتعميمتو - تـحـكـيـم الـبـطـاقـة - . التجربة الاستطلاعية وحساب صدق وثبات البطاقة - نتائج البحث : ومن خلال المعالجات الاحصائية لمقاييس الخاصة بالبحث الحالي ، بوعد تطبيق البرنامج المقترح والاجابة على اسمنة البحث ، تم التوصل إلى أن استراتيجيتي الشكل (V) و (فكر – أزوج – شارك (لاكتساب المفاهيم الموسيقية قد أثر بصورة ملحوظة على تحسين أدائهم لبنود التربية الموسيقية لدى طفل الروضة . ثم اختتم البحث بمجموعة من التوصيات إلى جانب قائمة المراجع باللغة العربية والمغة الإنجليزية.

							خامة الدوم هي إحدى الخدمات البيئية المتوفرة والتي يمكن ان تساهم في إثراء المشغولة الفنية وهذا ما تحت عليه اهداف التربية الفنية في استغلال خامات البيئة في التربية الفنية تساولات البحث:-. يمكن تحديد مشكلة البحث في التساؤل التالي:- ما مدى امكانية توظيف ثمار الدوم تشكيليًا لاستحداث مشغولات مستلهمة من الفن الشعبي-		
6198	12502018		Energy and exergy analysis of The cogeneration power plant for Quena paper Industry Company /	Omar, Ramadan Hefny Ali.			2018 Today, increasing the energy demand is a major challenge facing the researchers all over the world. The rapid increase of thermal power plants installation for the generation of electrical energy using different kinds of fuel is the main reason of the environmental pollution, such as acid precipitation, stratospheric ozone depletion and global climate change. Producing electrical energy in traditional thermal power plants utilizing fossil fuels release large amounts of carbon dioxide into the atmosphere causing greenhouse effect and contributing to the global warming potential. In addition, the oil crisis in the early seventies of the previous century and subsequent increasing the prices of the conventional fuels leads to study comprehensively new strategies of energy conversion such as cogeneration system to save the available energy resources. The cogeneration thermal power plant is an efficient, clean and reliable approach to generate electrical energy as well as to supply thermal energy. In the present study, energy and exergy analyses are studied to examine and understand the performance of the cogeneration power plant for Quena Paper Industry Company (QPIC) with a capacity of 45 MW utilizing natural gas. As well as, this investigation is devoted to identify and evaluate the different components of the cogeneration system to manage and improve the overall performance of the system. The current study is carried out to identify and quantify the components maintaining the largest energy and exergy losses. Moreover, the exergy efficiency is determined yearly for each component at different ambient temperatures, i.e., 18 0C, 23 0C, 29 0C, 36 0C and 45 0C at 100%, 75%, 50% and 25% loads. Furthermore, the current study presents essential improvements for boiler to reduce the exergy destruction at different values of flue gases temperatures, main steam temperature and mass flow rate of fuel. In addition, the study gives recommendations to improve the existing cogeneration power plants for QPIC.

						وقد لاحظ الباحث من خلال خبراته الميدانية في مجال تدريب الشباب في نادي العاصمة ومن خلال متابعته للعديد من البرامج التدريبية للمجموعة العمرية الأقل من 19 سنة في الكويت ورويته للعديد من الألعاب ... ولاحظ الباحث انخفاض مستوى بعض القدرات البدنية الخاصة ومستوى بعض المبادئ قد يرجع ذلك إلى عدم وجود برامج تدريب مخططة وأهمية اتخاذ مختلف الدورات التدريبية لتطوير القدرات البدنية الخاصة التي قد تؤثر على مستوى أداء بعض العمليات الهجومية. ومبادئ مميّنة وبالتالي نتيجة اللعبة. الباحث الحالي الذي يحاول التعرف على "استخدام سرعة التدريب وخفة الحركة في رد الفعل تجاه بعض الهجوم العنبي التكتيكي لنفوذ كرة القدم الناشئ لدولة الكويت".

The sample consisted of 66 students (males and females) enrolled at Qena Faculty of Education. The control group (N=33) received regular grammar instruction, whereas the experimental group (N=33) received treatment (Peripheral Learning) including posters, pictures and PowerPoint slides as ways of learning grammar peripherally. Data were collected through the English Grammar Test (EGT) and the Grammar Peripheral Learning Model (GPLM). Findings of the post-administration revealed a remarkable improvement in English grammar competence and performance of the peripheral learning group as compared with the non-peripheral learning group. Besides, the results showed a positive correlation between the students' (experimental group) scores in grammar competence and their scores in performance. Based on the above mentioned findings, the study concluded that peripheral learning was found to be effective for teaching English grammar. It was recommended for EFL instructors to take advantage of peripheral learning in English grammar classes with an emphasis on grammatical competence as well as performance.

6291	12503375	مكتوراء	A VIRTUAL LEARNING Platform for developing skills of designing and producing online virtual laboratories/	محمد،محمد السيد احمد.	School of INFORMATION SCIENCE	japan:	2017	RESEARCH ABSTRACT : THE EXPANSION OF using new virtual learning applications in educational institutions requires enhancing educators skills of design and production in such applications those skills must be acquired by educational technology students for the future of education because they often lack the above skills in their curriculum the main purpose of this research is to investigate the effectiveness of virtual learning platform (vlp) in order to cultivate the students skills in designing and producing online virtual laboratory (ovl) with a standard way In the context of this research the ovl is an online practical environment for a specific topic which makes learners active such as learning by experience and by trial –and- error on the other hand the vlp means a web – based learning system including several functions/tools for presenting and managing the ovl. 6294	12503405		Infections bronchitis virus infection in chickens of luxor governorate/	Mahmoud, Mohamed selim mohamed.			2018	Avian infectious bronchitis virus (IBV), a major pathogen of commercial poultry flocks, circulates in the form of multiple ever emerging variants threatening the poultry industry. This study was conducted to survey the presence of IBV in Luxor Governorate during 2015 -2016. Examination of 43 pooled samples including trachea and kidney homogenates by real-time RT- PCR for N gene, revealed 35 (81.4%) out of 43 commercial broiler flocks were positive to IBV. The clinical examination of the investigated flocks revealed general signs of illness, respiratory signs and renal problems in some flocks. The respiratory signs ranged from mild to severe, gasping, sneezing, rales and coughing. Mortality rates ranging from 4-12 %. At necropsy, the main lesions found were tracheitis, lung congestion, air-sacculitis. Some flocks frequently showed mucous or caseated material in trachea and bronchi. Pale or congested and enlarged kidneys with slight to moderate distention of the ureters with urates were also seen. The results of virus isolation of IBV in 9-11-day old ECE showed that the virus causes subcutaneous haemorrhage, curling and dwarfing. The 400-bp or 116K3 or the S1 gene of ten selected samples were amplified by RT-PCR, sequenced, and aligned for phylogenetic and amino-acid similarity analyses. Analysis of the partial S1 sequences derived from the obtained samples identified that all the sequences were related (71.8%–90.1%) to the Israel variant-2 IS/1494/06 (GI-23) and (74.8%–94.7%) to Egi12120S/2012 previously identified and reported in Egypt. The IBV identified in this study also showed similarity to IS/885/00 (71%–92.4%) The ten IBV viruses shared from 71% to 90.8% homologies between each other but are very different from the vaccinal strains used in Egypt with 62.6 to 84.7 % similarities. They shared (65.6-84.7 %) to 4/91 vaccinal strains of IBV and (62.6-79.4%) to H120 and Ma5. IBV/EG/LUXOR-38-2016 had the highest derived amino acid similarity (79.4%) to the H120 and Ma5 vaccine strains, while IBV/EG/LUXOR-24-2016 had the lowest similarity (62.6%) to these two vaccinal strains. They also shared 66.4-84% and 62.6-80.2% amino acid identities with CR88 and D274, respectively Phylogenetic analysis revealed that all the Luxor detected viruses grouped within the D1456 like Egyptian IBV viruses within the Variant 2 IBV cluster but in a different subcluster and none of them is a vaccinal strain suggesting that IBV circulating in this region can be regarded as a new genotype of IBV. In conclusion, IBVs similar to those circulating in Egypt including various governorates were identified in chickens from Luxor broiler flocks. Clinical signs and pathologic changes were mainly confined to the respiratory and urinary tracts of infected chickens. The results indicate that IBV circulating in Luxor is very different from the used vaccinal strains. Monitoring the emerging IBV variants is extremely important for establishing an effective control strategy for the disease in Luxor and surrounding area. Vaccination programs currently applied in Luxor should be assessed in future studies

6314	12503710	Spirulin aplatensis modulatory effect against herbicide atrazine indeeced hepatotoxicity in common carp/	Soliman, hosam mohamed toughan.		2018	Atrazine (ATZ) is one type of chloro-s-triazine herbicides and it is by far most widely used in agriculture especially for the production of corn, sorghum, and sugarcane. It is considered moderately toxic to aquatic animals where as the induced deleterious effects of it has been studied in different fish species. Therefore, many European and African countries have restricted its use. Spirulina is free-floating filamentous microalgae growing in alkaline water bodies. With its high nutritional value, Spirulina is now widely used as nutraceutical food supplement worldwide. Recently, great attentions for its antioxidant free radical scavenging effects and anti-inflammatory properties. Therefore, the present study was undertaken to examine if SP supplementation exerts a modulatory potency against the ATZ-induced hepatic impairments via investigation of its effect on hepatic injury indices, hepatic antioxidants and oxidative stress markers and correlate them with histopathological changes in liver tissue. Moreover, DNA damage and the mRNA expression pattern of inflammatory cytokines were evaluated in Common Carp (Cyprinus carpio L.). Seventy two apparently healthy common carp (Cyprinus carpio) (118 ±4.2 g) were used in this study. They were randomly assigned into four equal groups, each group having two replicates (9 fish/replicate; n=18 fish/group). On the termination of the experiment, blood samples were collected from the caudal vein of individual fish without anticoagulant, centrifuged at 3.000 rpm for 10 min to obtain serum which aspirated and stored at -20°C until the biochemical analysis. Following sacrificing of experimental and control fish by cervical decapitation, liver specimens were immediately dissected and assigned into three specimens; first specimens (n=3/replicate or 6/group) washed with ice cold phosphate buffered saline (PBS), then homogenized for biochemical analysis. The second specimens (n=3/replicate or 6/group) stored at - 80°C until real time RT-PCR analysis, while the third specimens (n=3/replicate or 6/group) were fixed in 10% buffered neutral formalin solution for istopathological examination

6324	12510767	دكتوراه	/ Heterosis and combining ability for economic traits in Okra (Abelmoschus esculentus (L) Moench)	Mohamed , Ahmed Yousef .	Ahmed Yousef Mohamed .	Al- Azhar univer sity.	2018	Okra (Abelmoschus esculentus (L) Moench .) belonging to the family Malvaceae is the one of the most economically important vegetable crops in Egypt . It is cultivated for its fruits and seeds . the fruit cn be cooked in variety ways . Its roots and stems are used for cleaning the cane juice . Crude fibre in mature fruits and stems are used in paper industry . Okra is considered as an important source of vitamins , calcium, potassium and other mineral matters which are often lacking the diet of developing countries . Its seeds contained between 15% and 26% protein and over 14% edible oil content Kumar and Sreeparvathy (2010) and Obiadalla –Ali et al. (2013). This study was carried out at the Expermental Research Farm of faculty of agriculture ,Sohag university and biotechnological laboratory , department of genrtics , faculty of agriculture , Sohag university, Egypt . the genetic materials usrd in this study included ten different genotypes of Okra (Abelmoschus esculentus (L) Moench .) representing a wide range of diversity were chosen as parents in this invertigation . these genotypes were: Blondy (p1) , red okra (p2) , white velevet (p3), Clemson spineless (p4) , lee (p5) , emerald (p6) , escandrany (p7), annie Oakley (p8) , dwarf long pod green (p9) and balady (p10) . the parental genotypes and their 45 f1 half diallel crosses were evaluated under normal and late sowing date conditions . data were recorded on number of days to 50% floweing (FD): plant height (ph cm .): number of branches per plant (no B/P) ,number of pods per plant (no P/P) , pods diameter (PD cm) , pods length (PLcm) , pods weight (PW gm), early yield per plant (EY/P gm) , estimated as the yield of the first five picking for each genotypes and total yield per plant (TY/P gm) . Analysis of variance of randomized complete blok design (RCBD)with three replicates was analzed . The combined analysis over the two environments was calculated to partition the mean squares of genotypes and the interaction of genotypes with environments into sources of variations due to GCA, SCA, GCA x E , SCAx E. The genetic components could be obtained from the estimates variance of GCA . for detection of genetic diversity among studied parents , ISSR and SRAP primers were used for this purpose .	#####	Dr : Galal A. El- Sherbeny ؛ Dr : Abdel_ Sabour G.A.Khaled ؛ Dr : Hazem A.Obiadalla- Ali.

6330	12515002	دكتوراه	الاله حورس نشأته وعلاقته بالملكية منذ فجر التاريخ وحتى نهاية الدولة القديمة.	جمال الدين، زكية زكى.	زكية زكى جمال الدين	القاهرة؛	1987	حورس هو بمثابة الحديث عن الحضارة المصرية نشأتها وتطورها،ولذا ادركت الدراسة صعوبة الكتابة عن هذا الاله فى جوانبه العديدة ورات ضرورتا للتركيز على احد الجوانب المتعددة لهذا الاله للالمام بكل عناصره بغية الوصول الى نتائج مرضية . تم تقسيم البحث الى مقدمة وستة ابواب وخاتمة: المقدمة:نشأة الدين واهميته الباب الاول : المدخل للدينه الحورية. البيا الثاني:نشأة الاله حورس. الباب الثالث:الاله حورس فى مرحلة ما قبل التاريخ. الباب الرابع:الاله حورس وعلاقتهبالملك من خلال الاقناب. الباب الخامس:علاقة حورس بالملك من واقع الآثار الملكية. الباب السادس علاقة حورس بالملك خلال نصوص الدولة القديمة. الخاتمة.		الاستاذ الدكتور /سيد توفيق احمد

6331	12515332	ماجستير	sacred animals hypogea in middle and lower egypt.	nagati, aseel noaman.	aseel nagati noaman	cairo	2007	animals were extremely important in the anient egyptiant society.they were greatly appreciated either secularly where animals were very much depended on for covering the egyptian essential needs as source of food ,clothing,feathers,beasts,of burden and other practical uses, or religiously where great number of animals enjoyed significant bond with deities due to their especial qualities that used to illustrate certain characteristic of the god , as a result the animal was divinized.		prof.dr./aly omar abdullah dr./shaza gamal mohammad
6332	12516317		Experimental study of heat transfer and flow characteristics of nanofluid in helical coiled heat exchanger /	Al-abdali, Naser Shabab Marzouq Sharry.			2018	The experimental investigation is studying the effect of variables section of coil heat exchanger on heat transfer and friction factor. The Reynolds number inside the shell is considered a constant value of 3500, while the Reynolds through the coil tube is varied from 1500 to 4500. The AL2O3 nanoparticles are added distilled water with different volume concentrations (0.1 %, 0.2 %, and 0.3 %) and used as a working through a coil tube side. In addition, five types of coils cross-section are used through this study, straight, low to high, high to low, high to low to high, and low to high to low and the coil tube 7 mm diameter. The experimental study showed that the Nusselt number increases with the increase of Reynolds number. While the friction factor is decreasing with the increase of Reynolds number. In addition, the average Nusselt number through the coil of nanofluid is enhancement by 7.3 %, 17.7 %, and 25.4 % compared with based water for a nanofluid concentration of 0.1 %, 0.2% and 0.3 % for straight coil respectively. Also, the average Nusselt number showed is a maximum value for low to high coil compared by other coils. Where, the value of the average Nusselt number of low to the high coil is increased by 10.3 %, 2.5 %, 5.12 %, and 6.12 % for straight, high to low, high to low high, and low to high to low coils respectively. In another hand, the average friction factor is a minimum value for straight compared with other coils. where the value of average friction factor is 0.097, 0.104, 0.0135, 0.1086, and 0.1084 for straight, low to high, high to low, high to low to high, and low to high to low coils for all nanofluid concentrations respectively. Finally, the heat transfer factor is enhancement by an increase of nanofluid concentrations. where the heat transfer factor improved by 8 %, 13 %, and 26 % compared by the based water fluid for 0.1 %, a0.2 %, and 0.3 % III respectively. Also, the heat transfer factor is the best value for both two coils high to low to high and low to high to low coils. where the heat transfer factor is increased by 26 % and 27 % over the unity for two coils high to low to high, low to high to low.		
6333	12516617	ماجستير	مفهوم القوة والضعف في اللغة والديانة المصرية القديمة حتى نهاية الدولة الحديثة.	بر عي,نبيلى محمد صابر .	نبيلى محمد صابر بر عي	القاهرة	#####	عنوان هذه الرسالة "مفهوم القوة والضعف في اللغة والديانة المصرية القديمة حتى نهاية الدولة الحديثة" ينقسم الموضوع الى سبعة فصول وخاتمة. الفصل الأول: مفهوم القوة في اللغة المصرية القديمة. يتم الحديث فيها عن الكلمات الدالة على القوة والعلامات التصويرية والمخصصات الدالة على القوة ونماذج التعبير عن القوة في اسماء والقاب الملوك والافراد. الفصل الثاني:مفهوم الضعف في اللغة المصرية القديمة. يتم الحديث فيها عن الكلمات والمخصصات والعلامات تصويرية وبعض اسماء الافراد الدالة على معنى الضعف. الفصل الثالث: القوة والضعف في النصوص الادبية القديمة. يتم الحديث فيها عن القوة والضعف في التعاليم والقصص والاساطير الفصل الرابع:القوة والضعف لدى الالهة المصرية القديمةطبقا للمصادر الدينية وتتناول الدراسة الحديثة عن الهيئة التي تمثل فيها الاله ونقاط الضعف لدى الالهة من حيث الدور الوظيفي. الفصل الخامس: مظاهر القوة والضعف في كتب العالم السفلى وتتناول الدراسة الحديث عن نقاط القوة والضعف في كتب العالم السفلى طبقا للاقدم الفصل السادس: مظاهر القوة والضعف في الاعياد والطقوس. تتناول الدراسة الحديث عن اهم الاعياد الرسميةواللهية والطقوس الدينيةالتي تخص البحث الفصل السابع: القوة والضعف في الفكر المصرى القديم يتم الحديث فيها عن المقومات الاساسية للكتنات والرموز الدالة على القوة والضعف.	#####	أ.د/عبد الحليم نور الدين د/محمد حسون
6334	12516678		Experimental study of the performance of split air- conditioning system with clay evaporative cooler in hot climate of kuwait /	Al-Mutairi, Meshal Ayed Hamoud Awaid.			2018	Kuwait has a harsh climate circumstances in term of high temperature in summer months from April to October where the average ambient temperature during these months exceeds 45 0C which then needs the utilization of air-conditioning systems. Constructions in Kuwait are exposed to very high air temperatures in addition to high solar radiation that may exceeds 940 W/m2 on a horizontal surface in summer months. The thermal performance management of the split air-conditioning system and reducing the its negative effect of the global environment can be achieved by evaluating the heat dissipation from the condenser that is mainly control the performance of the split air-conditioning system.		

							In the present experimental study, the operating parameters of air dry-bulb temperature is changed from 30 oC to 70 oC and its velocity is varied from 2 m/s to 4 m/s. and the air relative humidity is changed from 20% to 80%. The effects of varying these parameters were mainly considered to evaluate the performance of the air conditioning unit for four cases i.e., without evaporative cooler (WOIEC) and with evaporative cooler models I, II and III (WOIEC M-I, M-II and M-III) with different outer diameters 4 cm., 5 cm. and 6 cm. and the same inner diameter of 1 cm. In the current investigation, experiments were carried out to study the effect of the ambient air temperature and its velocity and relative humidity on the air temperature difference across the condenser (ΔT_c), condenser temperature (T_c), the power consumption (P) consequently the coefficient of performance (C.O.P) of the split air- conditioning system. The results show that increasing the ambient air temperature from 30 to 70 oC at 2 m/s and 40% relative humidity reduces the ΔT_c for WOIEC and WEIC M-1, M-II and M-III by 85 %, 67%, 61% and 56%, respectively. In addition, increasing the ambient air temperature from 30 to 70 oC at 2 m/s and 40% relative humidity increases the condenser temperature (T_c) for WOIEC and WEIC M-1, M-II and M-III by 84%, 77%, 67% and 56%. The power consumption of split air-conditioning system using WEIC M-1, M-II and M-III at 2 m/s, 40% relative humidity and 50 oC is decreased by 18 %, 24 % and 29.5% less than that of WOIE. Furthermore, increasing the ambient air temperature from 30 oC to 70 oC at 40% relative humidity increases the coefficient of performance (C.O.P) of the system WOIE as well as WIE by nearly 36%. Moreover, the values of average C.O.P increases insignificantly for WIE M-I, M-II and M-III by 41%, 55% and 68 %, respectively rather than that of WOIE at 30 oC with increasing the air velocity from 2 m/s to 4 m/s. Finally, the effect of relative humidity on C.O.P is more considerable in the range of 20% to 50% while its effect is slight in the remaining range i.e., from 60% to 80%.		
6335	12517846	Experimental Study of Flow and Forced Convection Heat Transfer characteristics of Nanofluids in Circular Pipe /	Al-abdali, Jarrah Shabab Marzouq Sharry.			2018	The experimental study were performed to investigate the heat transfer and friction factor characteristics of a AL2O3/Water Nano-fluid mixture containing alumina nanoparticles flowing in a circular pipes with differences inner diameter (2 mm, 4 mm, 6 mm, and 8 mm) under constant heat flux. The Reynolds number are varied from 2500 to 12500, also the Nano-fluid concentration are changed 0.1 %, 0.2 %, 0.3 %. The effect of inner diameter, Nano-fluid concentration is presented on heat transfer rate, Nusselt number, and friction factor. The experimental results showed that the heat transfer as well as Nusselt number influence by Nano-fluid concentration. where the Nusselt number for Nano-fluid of 0.3 % is improving by 15.67 % compared with based water for high Reynolds number for all value of inner diameter. At high Nanofluid concentration (0.3 %) the improvement of heat transfer is found to 77.1 % and 75.98 % for inner diameter of 2 mm and 4 mm respectively. On the other hand the friction factor is increase with increase of Nanofluid concentration through the pipe for all inner diameters. where the friction factor of 0.3 % Nano-fluid is increases by 24.2 % compared with based water at low Reynolds number ($Re = 2500$). For high Reynolds number ($Re = 12500$), the increases of friction factor reduce to 21.3 % compared with based water for inner diameter of 6 mm. The enhancement factor is calculated through this study. where the value of enhancement factor of 0.3 % Nano-fluid is improved by 30 % compared with based water at Low Reynolds number ($Re = 2500$). For high Reynolds number ($Re = 12500$) the improvement of enhancement factor reduce to 17.4 % for inner diameter of 4 mm. Finally enhancement factor is maximum value at inner diameter of 4 mm for all value Nano-fluid concentration. where this value is 1.28 for inner diameter of 4 mm. While this value is reduce to 1.21 and 1.2 for inner diameter of 2 mm, and 8 mm respectively for Nano-fluid of 0.3%.		
6336	12519106	Experimental investigation of heat transfer and pressure DROP of Nano –fluid in perforated finned heat exchangers /	Al-Abdali, Ghanem Msaifer Marzouq.			2018	The experimental study carried out to investigate the effect finned tube holing angle on heat transfer and friction inside the shell and tube heat exchanger. The Reynolds number inside the finned tube is considered a constant value of 3500, while the Reynolds through the shell is varied from 3000 to 10500. The AL2O3 nanoparticles are added distilled water with difference volume concentrations (0.1 %, 0.2 %, and 0.3 %) and used as a working through a shell side. In addition two types of nanoparticles size is used (20 nm and 50 nm). The finned tube is holing of 4 mm diameter with difference holing angle (without holing, 0°, 15°, 30°, 60°, and 90°) is used through this study. Where, the Nusselt number of Nano-fluid is improved by 3.5 %, 6.7 %, and 9.78 % compared with based water for Nano-fluid concentration of 0.1 %, 0.2% and 0.3% for nanoparticles size of 20 nm respectively. Also, the results showed that		

							the nanoparticles size has less influence on Nusselt number. where the value of Nusselt number for Nano-fluid is improving by 3.4 % , 6.3 % , and 9.3 % compared with based water for Nano-fluid concentration of 0.1 % , 0.2% and 0.3% for nanoparticles size of 50 nm respectively. The holing angle of finned have influence of Nusselt number. Wherever the Nusselt number showed is maximum value at holing angle of 30° for all value of Nano-fluid concentration (0.1%, 0.2%, and 0.3%). The value of Nusselt number of angle 30° is improved by 22.4 % compared with angle of 0° for Re of 6000 and 0.3 % Nano-fluid. While for low Nano-fluid concentration (0.1 %) is enhancement of Nusselt number reduction to 18.75 % at the same conditions. The frication factor decrease with increase of Reynolds number as well as increase with increase of Nano-fluid concentration. where the value of frication factor of Nano-fluid of 0.3 % is increase by 12.8 % compared with based water for low Reynolds number (Re = 3000) and finned without holing. While for high Reynolds number Re = 10500, this percentage increase to 17.9 % . For case of finned tube with holing (θ = 30°), the frication factor for 0.3 % Nano-fluid is 18.4 % compared with based water at low Reynolds number (Re = 3000) and 20 nm. While for high Reynolds number (Re = 10500) this percentage is 29.7 % .		
6337	12519239	دكتوراه	سلامه، حامد أحمد محمد.	قرارات الضبط الإداري بين القانون الوضعي والفقه الإسلامي :	اسيو ط +	2018 .	تعرض هذه الدراسة إلى قرارات الضبط الإداري في الفنون الرضعى المصرى وأجريت موازنة بينها وبين مثيلتها فى الفقه الإسلامى وركزت الرسالة على مجموعة من الحقائق والنتائج التى على قدر من الاهمية . فقد بدأت هذه الرسالة بفصل تمهيدى بعنوان التعريف بالضبط الإدارى وتحديد طبيعته وأنواعه فى القانون الرضعى والفقه الإسلامى ثم عقدت موازنة بينهما فوجد أن الضبط الإدارى الإسلامى اعم واشمل فهو شامل لكل جوانب الحياة العامة والخاصة ولم يقتصر على المحافظة على النظام العام فقط ولكن اشتمل على المحافظة على الكليات الخمس للإنسان الدين والنفس والعقل والنسل والمال .		
6338	12519287	دكتوراه	عبر سلامة محمد.	التفرقة العنصرية كجريمة دولية /	اسيو ط +	2018 .	إن المجتمع الدولى يواجه اليوم تحدياً جديداً من العنصرية والتمييز العنصرى الذين تغلغلا فى أجزاء كثيرة من المجتمع البشرى ويشككان فى اسسه الروحية والأخلاقية ، فالعنصرية لا تسبب فقط توترات داخلية بل تؤدى أيضاً إلى نشوب نزاعات بين الدول قد تتصاعد وتعرض السلم والأمن الدوليين للخطر ولكى نأمل فى بناء مجتمع دولى خالى من العنصرية وقائم على تساوى البشر فى الكرامة والقدّر فإن هذا الأمر يتطلب منا القيام باستجابة فوراًها الإهتمام والتضامن والعمل . تتناول هذا الموضوع تبين فيه تعريف القانون الدولى للتنمية ،ثم اعرض مفهوم التنمية الاقتصادية الدولية والقيم الجوهرية لتحديد التنمية وأهدافها والسياسات المطلوبة لتحقيقها والخصائص الأساسية تتمثل فى اقتصاديات الدول النامية وبعد ذلك يتناول العولمة الاقتصادية وأثرها فى التنمية الاقتصادية وأسباب ظهورها وأهدافها وكيفية مواجهة الدول النامية لتحديات العولمة ومخاطر العولمة على الدول العربية وعوائق التنمية وحق الدول فى تحقيق مصيرها الاقتصادى وأيضاً مخاطر العولمة فى المجالات الاقتصادية العالمية .		
6339	12519536	دكتوراه	نسوقي، إيمان عبدالنبي ذكى .	التنمية الاقتصادية الدولية فى ظل العولمة /		2018 .	تتناول الرسالة : إزاء عجز القضاء وعدم قدرته على فض المنازعات التى تعرض عليه بالوقت المناسب وتحقيق العدالة الناجزة إضافة إلى التقيد فى معاملات عقود الاستثمار وامتدادها عبر حدود الدول وماتيرره من تنازع فى القوانين واحتياجها إلى مختصين فى نظر المنازعات التى تنشأ عنا وهذا ما لاليتوفر فى القضاء المختص فى معظم الأحيان بنظر كافة أنواع المنازعات على اختلاف طبيعتها .ويقع هذا البحث فى ثلاثة أبواب يسبقها تمهيدى تحدثنا فيه عن نشأة الوسائل الدينية وتطورها ومفهومها ومميزاتها .

Histopathological and biochemical studies on the effects of diazinon with ameliorating effect of vitamin E, C, selenium and garlic extract in rats /	Mohammed, Manar Farghaly Abd-Elhafez.			2017 .	This study was designed to investigate the harmful effects of diazinon on visceral organs and brain indicates by hematological and biochemical analysis, with the protective effects of Vit E, C, selenium and garlic as antioxidants effect to prevent the diazinon effects. Pathological results:-	#####	Mouchira M. Mohi-Eldin, Mohie Abdallah M. Haridy, Atef M. Hussein Khalil.

								Cinical signs : No mortality but morbidity rate reached to 100% in all groups. There are manifestation of tremors, hyper excitation, staggering gait and emaciation, and occasional trembling, diarrhea, alopecia and eye problems such as redness, lacrimation, discharge and bloody encrustation. Macroscopically, all organs in all groups appeared adhesion, enlargement and paleness of the intestine. The liver appeared enlarged in size, very congested, darkish red in color. The kidneys, spleen, heart were swollen and congested. Brain was congested and friable. Lungs appeared paleness, firm in consistency, small white patches of peripheral emphysema, enlargement, greatly distended with edema and occupied the entire thoracic cavity congested specially liver, kidney, heart, lung, spleen and brain.

6360	12522632	PHD	clinicopathological studies on the protective role of vitamins C, E and onion against Sodium Nitrite toxicity in albino rats /	Fouad, Samer Saad.			2017 .	Sodium Nitrite when used as food preservative may possess harmful effect and may contribute to liver and kidney diseases. The present study was designed to demonstrate the protective effect of some antioxidants as vitamin E, vitamin C, and onion against the adverse effect of NANO2 through studying hematological and serum biochemical parameters as well as pathological changes in rats. Clinical signs sodium nitrite group showed decreased food and water intake, decreased body weight and Sluggish Movement with cyanosis of mouth and tongue which appeared during the 5th and 6th months of treatment. Treated groups with vitamins C and E and onion extract showed normal behavior and increased body weight. Hematological findings recorded non-significant changes after 3 months of all exposed groups in comparison with control. While, after 6 months, there was decrease in RBCs count, Hb concentration and PCV % of group 2 when compared with control. On the contrast, significant increase was detected in MCV, WBCs and blood platelets; count of group 2 when compared with control. Groups 3, 4 and 6 showed non-significant changes in hematological parameters when compared with control. group 5 exhibited some changes as decrease in hemoglobin with increase of WBCs. Biochemical analysis showed non-significant changes after 3 months in biochemical parameters in all exposed groups. After 6 months, elevation AST, ALT, ALP activities, urea, creatinine, uric acid and triglyceride levels of groups 2&5 was recorded. Total T3 and T4 of group 2 recorded a higher level than control at the 3rd and 6th months. Treated groups with vitamins C and E decreased the changes recorded in blood and serum biochemical parameters which returned to nearly normal values.	#####	Mouchira Mohamed Mohi-Eldin, Mohie Abdallah Mahmoud Haridy, Atef Mohammed Hussein.

6364	12522921	PH. D	Epidemiological study on campylobacteriosis in poultry and human /	Gahlan, Asmaa Gahlan Youseef.			2017 .	Campylobacteriosis is a zoonotic disease caused by the infection with campylobacter. The genus campylobacter is of great importance to public health because it includes several species that may cause diarrhea. The most important species are C.jejuni and C.coli. poultry and poultry products are known as important sources of human campylobacteriosis. Conventional and molecular techniques were used for examination of 125 poultry samples and 50 human samples examined by cultural and biochemical reactions and the positive samples were confirmed by multiplex PCR.		Ahmed Ibrahim Ahmed, Amal Sayed Mohamed Sayed, Mona Mohamed Sobhy.

							Conventional methods were carried out on 125 poultry samples (75 chickens, 25 turkeys and 25 pigeons). Three samples were obtained from each bird (intestinal content, liver and skin) for detection of campylobacter jejuni and campylobacter coli. Moreover 50 stool samples were collected from non-diarrheic persons (25) and patients suffering from gastrointestinal disturbances (25) with diarrhea from clinical labs at analytical laboratories in Giza governorate. Molecular technique was carried out on the positive samples detected by Conventional methods.		
6365	12523047	PH. D	Class II HMG-COA reductase Inhibitors targeting gram positive bacterial pathogens /	Younis, Waleed Khedr Mohammed.			2017 . Bacterial resistance to conventional anitbiotics is a burgeoning global health epidemic that necessitates urgent action. There is a critical need for new antibiotics that target novel pathways within resistant pathogens. A possible novel target in Gram-positive cocci is class II HMG-COA reductase (HMGR), part of mevalonate pathway, which is essential for survival of such bacteria. In this study, we have synthesized and tested novel HMG-COA inhibitors that showed potent activity towards the bacterial HMGR. A library of 300.000 compounds were screened against class II-HMGR of E. faecalis to identify class II-HMGR inhibitors. Among the compounds screened, 5-(N-(4-butylphenyl) sulfa moyl) -2-hydroxybenzoic acid 1 (N-bsha) was found to be the best inhibitor of II-HMGR, with a 50% inhibitory concentration (IC50) of 5 uM and Considered it the lead compound. Our collaborator in department of biological science did kinetic test for the 15 derivatives of lead chemical compounds which were synthesized by Dr Mark Lipton and his research group in the department of chemistry at Purdue University against class II-HMGR coenzyme of s. aureus and E. fecalis, they found 4 among 15 compounds had low IC50 7.2±0.6, 1.9±0.15, 5.9±0.5 and 16.2±1.0 against class II-HMGR of staphylococcus aureus and 12+/-2.0, 2.4+/-0.07, 2.0+/-0.15 and 5.75+/-0.5 against Class II-HMGR of Enterococcus fecalis. D	Clinicopathological Studies on the effect of composite Nitrogen fertilizer (Urea, Ammonium Nitrate and Nitrogen – Phosphorus – Potassium) on Tilapia (Oreochromis niloticus) /	Said, Zeinab Al-mgad Sayed.			2016 . Clinical signs involved changes in behavior and feed intake, respiratory signs and nervous manifestations ending by fish mortality. Hematological findings recorded significant decreases (P<0.05%) in RBCs count, Hb conc., PCV, MCH and MCHC of groups 2,3 & 4 in comparison with control. On the contrast, there was significant increase in WBCs count and MCV Value. Significant increase in lymphocytes percentage was detected in groups 2, 3, & 4 when compared with control. Monocytes percentage recorded significant decrease in groups 2 & 3. Moreover, neutrophil percentage displayed significant decrease in groups 3 & 4. Biochemical analysis showed increase (P<0.05%) in enzymatic activities of AST, ALT and ALP of groups 2, 3 & 4. The level of the total bilirubin in the plasma of the fish exposed to ammonium nitrate exhibited significant increase in comparison with the control, while the other exposed groups 2 & 4 showed insignificant increase in the total bilirubin levels when compared with the control one. A significant decrease in the total protein level of groups 3 & 4 in comparison with control was found. Moreover, exposure to nitrogen fertilizers included significant increase in plasma urea and creatinine associated with significant decrease in uric acid levels in groups 2, 3, & 4. Calcium level revealed decrease in nitrogen exposed groups in comparison with control. Plasma antioxidant displayed significant decrease in superoxide dismutase and catalase in groups 2, 3 & 4 in comparison with the control. There was a significant cumulative increase (P<0.05 %) of nitrite level in plasma and tissues including muscles and gills of all groups exposed to nitrogen fertilizers when compared with control.	#####	Mouchira M. Mohi-Eldin, Mohie Abdallah Mahmoud Haridy, Atef M. Hussein Khalil.
6371	12524419	PH. D	Some molecular studies on pathogenicity islands of salmonella species isolated from chicken /	El Sayed, Asmaa El Sayed Mohammed.			2016 . Salmonella are among the major bacterial pathogens causing huge economic losses to poultry industry, as well as posing a significant threat to public health.	#####	Mohammed Wael Abdel Azim, Serageldeem Abdelaziz Ahmed Sultan, Amany Abbas Yousif.

							The present study was undertaken to detect Salmonella in broiler chickens. Assessing the presence of Salmonella pathogenicity islands genes in Salmonella serovars which would be useful to understand its virulence. To achieve the goals of the present study the following points were investigated :- 1. Prevalence of Salmonella spp. Recovered from broiler chickens by :- • Cultural isolation and biochemical identification of Salmonella. • Serological identification of the isolated Salmonella using specific antisera. 2. Molecular detection pathogenicity islands of Salmonella species isolated from chickens. 3. Determining the distribution of pathogenicity islands among each Salmonella spp. Result revealed that :- 1. Salmonella Enteritidis and Salmonella Typhimurium were the most prevalent serotypes in broiler chicken samples. 2. These isolates possess a zoonotic impact on public health. 3. Salmonella chromogenic gar is highly sensitive, specific and useful in Salmonella detection from chicken. 4. API 20E is accurate, quick, simple and after a reasonable alternative to conventional systems for identifying Salmonella. 5. PCR technique is sensitive, specific and useful in detection of pathogenicity islands genes (virulotyping) which determine the virulence of Salmonella serovars. 6. Multiplex PCR save the time and is considered a sensitive and rapid technique for detection of multiple virulence genes of Salmonella pathogenicity in one reaction. 7. Salmonella (Enteritidis, Typhimurium, Kentucky, Anatum, Newport, Virchow and chesher) carried all the virulence genes of the five pathogenicity islands. So these serovars can be considered as a fully virulent serovars.

6384	12525148	PH. D	Novel genetic and epigenetic markers for cancer detection management /	Ahmed, Reda Saber Ibrahim.			2016 .	The present work was designed to determine the effect of EGCG and Pro EGCG analogs on human uterin leiomyoma, also to prove our hypothesis that EGCG analogs are more potent than using EGCG under the same condition. This work was carried out on two cell type of uterin leiomyoma (utlm-ht and utlm) using EGCG and its analogs under the same condition and same concentration (15 25 35 µM), using different technique and assay that help in confirm our hypothesis. The obtained result was :- Morphological change:- After seeding of cell in 6 well plates leave to reach up to to 80% confluent growth, the cell treated with EGCG, pro EGCG or its analogs 2a and 4a using concentration (25 µM) or (15 25 35 µM). the morphological changes were observed at different time interval under nikon microscope. The cell which treated with EGCG or pro EGCG show normal morphology (fibroblast like) while cells treated with EGCG analogs show complete morphology changes and the cell become under apoptic condition in both cell lines when compare to non treated or control cell. Cell proliferation or MTT assay :- After seeding of cell in 96 well plates at dilution 3*103 leave for over night growth, the cell treated with EGCG, pro EGCG or its analogs 2a and 4a using concentration (15 25 35 µM), then adding MTT dye for reduction to measure a vailable cell, then examined under nikon microscope to measure wave length, the result showed significant gradual decrease in cell proliferation which is concentration dependent. Wound healing assay :- Seeding of cell in 6 well plates leave to to reach up to 80%confluent growth, the cell treated with EGCG, pro EGCG or its analogs 2a and 4a using concentration (25 µM) or (15 25 35 µM) and producing about 3 scratch line in each well, taking the changes and measuring the ability of cell to heal was observed by taking picture microscope at different time interval, the result showed EGCG has no significant action on cell when compare to its analogs which prevent cell healing with change in cell arrangement and lead to complete cell death. 6401	12525422	PH. D.	Major exotic diseases of imported camels /	Ahmed, Fatma Ahmed Khalifa.			2016	The study is carried in 292 imported camels divided into 250 enclosing group (30 less than 3 years, 220 more than 3 years, 240 male and 10 female) and 42 one which contact with other ruminants (18 less than 3 years, 24 more than 3 years, 37 male and 5 female) from three village on Wadi El-Sayed, Edfu, Aswan, Egypt. • Clinical examination of 292 imported camels belongs to the Wadi El-Sayed, Edfu, Aswan which is the south Gate to the Egyptain Arabic Republic, resulted in the absence of clinical signs of disease under study. • Serological diagnosis for the detection of antibodies to the disease under study. Brucellosis :- Firstly, Buffered Acidified Plate Test (BAPA) was used in our study to detect the infection of camels with brucellosis and we obtained 12 (4.8%) out of 250camels. While the analysis of sera collected from camels that comes in contact with other ruminants are 4 (9.5%) out of 42 camels. The infection recorded in old, male camels. Secondly, Positive sera were subjected to Rivanol Test (Riv. T) as confirmatory test to reach the actual result of camel's infection and the seropositive reactors were decreased to 9 (3.6%) but for contact group the percentage decrease to 3 (7.1%) from 4 positive camels that obtained by BAPA test. Paratuberculosis :- Hypersensitivity test (Comparative Intradermal Tuberclin test) was applied in the beginning to know the infection of imported camels with Paratuberculosis, the results revealed to presence of 10 animals suspected to carried the Mycobacterium Avium subspecies Paratuberculosis in enclosing group. So, we used ELISA Technique for detection of antibodies in sera of imported camel and the results were proved that absence of infection in both groups under study.	#####	M. 6462	12526882	PH. D	The role of hypothalamic arcuate nucleus KNDy neurons in control of reproduction in cows /	Hassaneen, Ahmed Saad Ahmed.			2016 .	The present dissertation aims to reveal the role of the hypothalamic ACR KNDy neurons and the POA kisspeptin neurons in control of reproduction in cows. This knowledge would leads to better understanding of reproductive performance in cows. In chapter 3, to characterize hypothalamic ACR KNDy neurons and the POA kisspeptin neurons, dual-immunohistochemistry for kisspeptin and NKB or kisspeptin and dyn was performed. The expressions of these neuropeptides in both the follicular and luteal phases in cows were examined. Despite ARC KNDy neurons are considered to play a role in stimulation of GnRH/LH release in rodents and small ruminants, the reports on the role of ARC KNDy neurons in cows are very limited in number. Therefore, In chapter 4, to reveal the involvement of the ARC KNDy neurons in control of of GnRH release and their activation via stimulation of NKB/NK3R signaling pathway, the effect of continuous intravenous (iv) infusion of senktide, an NK3R agonist, on the release of GnRH/gonadotropin, follicular development, and ovulation was examined in both the follicular and luteal phases in cows.	#####	Japan - Nagoya University - The Graduate School of Bioagricultural sciences.

6466	12526958	PH. D	Studies on probiotics effects on innate immune functions in the gastrointestinal tract of broiler chicks /	Mohammed, Elsayed Seddek Ibrahim.			2016 .	This study has identified the innate immunodefense functions carried out by tight junction, AvBDs, CATHs and proinflammatory cytokines in the gastrointestinal tract of broiler chicks and the effects of probiotics-feeding these functions. The expression of CLDI was upregulated by probiotics-feeding in the colon of 7-days-old broiler chicks. Probiotics-feeding alone may not affect the expression of AvBDs in the proventriculus and cecum, but it may affect the secretion of AvBD 12 from the surface epithelium of the proventriculus. Moreover, the effects of probiotics on enhancing the expression of AvBDs and CATHs in response to stimulation by Salmonella Minnesota LPS are also suggested. However, this effect of probiotics in enhancing the innate immune molecules expression was not found in the chicks challenged with Campylobacter LPS. The results of the current study suggest that probiotics-feeding has a beneficial effects to enhance the expression of the tight junction protein in the colon which provides an intact and healthy epithelial barrier. Moreover, probiotics-feeding has may protect the newly hatched chicks against Salmonella infection through the enhanced the expression of AvBDs and CATHs in the proventriculus and cecum.	Japan - Hiroshima university – Graduate school of Biosphere Science - department of bioresource science.

6487	12527442	PH. H.	Histopathological studies on the co-infection with chicken anemia virus and Marek's disease virus in chickens /	Ali, Mohamed Sabry Ahmed Mohamed.			2016 .	The poultry diseases, particularly the immunosuppressive viral diseases are incriminated in the greatest percentage of the economic losses in the poultry production. Although the advancement in the vaccination production, the poultry diseases still causing great problems within the poultry farms and this resulted from the emerging or the eruption of new viruses or mutations of the old viruses which increase its resistance to vaccination or medication. All these facts attracted the researcher to study the pathogenesis and the epidemiology of these diseases to find a way to decrease its danger on bird, subsequent economic losses and to establish the best strategies that will be effective in the prevention and control of these diseases. MDV and CAV are the most important immunosuppressive diseases because of their great impact on the avian immune system either by the solely, the co-infection or the existence with other pathogens. In the present dissertation, three types of research that related to CAV and MDV were conducted, within the following few papers I will spot the light on the main result that we got as follows :- In the first chapter, the persistence of the CAV inclusion and antigen in a spontaneous MD lymphoma was examined, the gross examination revealed different degrees of nodular lesions which extend from small mild lesions to big coalescent nodular lesions. Due to the long duration formalin preserving time so it was difficult to extract the DNA or the mRNA so we depend on the cellular morphology and the infiltrative nature of the neoplastic lymphocyte in the diagnosis. MD was confirmed in 76 % (37/49) of the spleens and 92% (12/13) of the livers. Within the MD lymphoma, CAV intranuclear inclusion bodies were detected within the small and the large bizarre lymphocytes in 2 livers and 9 spleens, and the immunostaining test for CAV confirmed the persistence of CAV antigens in the neoplastic cells with CAV inclusions. We concluded that there is a strong relationship between CAV and MDV, especially in the transformation phase after the information of the transformed T cells.		supervisor Masanobu Goryo, Naotaka Ishiguro.

6519	12527793	ماجستير	/Studies on date palm root rot diseases under aswan governorate conditions	Kasem, Aya Hussein Hamed	Aya Hussein Hamed Kasem	Qena :	2018 .	Date palm (Phoenix dactylifera) is considered one of the most important fruit trees in Egypt and worldwide . Date palm trees in Egypt are subjected to many diseases caused by fungi which lead to severe losses in yield and number of profitable date palm trees . Among these diseases are root rot those were taken into consideration in this study. The obtained data could be summarized as follows: - Different fungal isolates were isolated from date palm root rot collected from different locations of Aswan Governorate . Fusarium oxysporum, F . solani and R. solani were the most dominant fungi in all locations as their frequencies were 27,25 and 24 % . - - five fungal isolates were tested to study their pathogenic capabilities on date palm seedlings (Sakkoti cv.) under greenhouse conditions during 2016 growing season . All tested isolates significantly increased root rot diseases compared with the control . the most aggressive fungi were R. solani , F. oxysporum and F . solani , respectively after 45 and 90 days from inoculation .	1/9/2018	أ.د/محمد مصطفى الشيخ
6520	12527848	ماجستير	/ Effect of fenugreek seeds , probiotics and their combination on productive performance of rabbits	Mohamed, Fatma Sayed Omar	Fatma Sayed Omar	Egypt :	2018 .	Three experiments were contributed to investigate the effect of dietary fenugreek seeds, probiotic and their mixture levels on growth performance , nutrient digestibility, carcass criteria, blood biochemistry and meat quality of growing rabbits . in each trial a total of sixty four growing male and female new zealand white rabbits (45 days old) , were assigned to four treatment diets including fenugreek seed powder at 0,5,10 and 15g/kg in the first experiment , probiotics at 0, 150,300, and 450mg/kg in the second experiment , and combination of fenugreek seeds at 0 ,5 ,10 and 15g/kg and probiotic at 0,150,300, and 450 mg / kg , respectively in the third experiment for six weeks . each treatment had 16 replicates (50% males and 50% females) . Supplementations of fenugreek seeds , probiotics and their combination to rabbit diets showed significant increase in body weight gain (BWG) and improved feed conversion ratio (FCR).	#####	أ.د/ عبدالله علي
6521	12527874	ماجستير	: Effect of Dietary supplementation of prebiotic and betaine hydrochloride on growth performance , nutrient digestibility , carcass and intestinal microbial population of ducks under upper egypt conditions	Ahmed , Mervat Mohammed Nasser	Mervat Mohammed Nasser	Egypt :	2018 .	The aim of the present study implied an evaluation of the potential effects of prebiotic , betaine and their combination in duck diets on growth performance , nutrient digestibility , carcass criteria and cecum microbial population of ducks under hot environmental conditions . A total of 80 moulting ducks (average weight = 620.91g , 20 days of age) were randomly distributed into four treatment groups of 20 birds each . treatment groups were fed a control diet , a control diet supplemented with 1g mannanoligosaccharide (MOS) /kg , control diet supplemented with 1.5g betaine /kg diet or control diet supplemented of at 1g MOS /kg and 1.5g betaine /kg diet . Supplementation of MOS, betaine and their combination have significant effects on body weight, body weight gain (BWG), feed intake (FI) and feed conversion ratio (FCR). Prebiotic and the combination treatment addition exhibited significant increase in lactobacillus spp. Count and decrease in E.coli count in the cecum.	#####	

6522	12527879	PH.D.	The use of plant alkaloids and grain processing as modulators of rumen microbiota, fermentation and health in cattle /	Mickdam, Elsayed Mohammed Elsayed,			2017 .	The increase in milk production per cow of the last decades has urged the need to feed a dairy cow high-grain diets. This is necessary to meet the high requirements of dairy cows in energy and nutrients for milk production. However, high-grain feeding has negative effects on rumen health, impairing rumen fermentation and increasing the risk of subacute ruminal acidosis (SARA). Moreover, grain-rich feeding may also increase the environmental impact in cattle taking into account that grains besides energy are rich in minerals especially of phosphorous (P). Thus, lowered utilization of grains P might increase environmental impact of grain feeding in cattle. The central goal of this thesis evaluated two different strategies either based on plant-derived alkaloids (PDA) supplementation or treatment of concentrates with lactic acid (LA) whether they may alleviate the animal health and environmental issues accompanying high-grain feeding. In the first experiment, an in vitro model for SARA was successfully developed using RUSITEC, considering the pattern of changes in fermentation characteristics and microbial abundances. The SARA condition was characterized by an intensively prolonged pH depression (5.5 – 5.8), the results indicate the potential application of supplemental of two PDA mixtures, both contained quaternary benzophenanthridine alkaloids and protopine alkaloids, as a protective tool against SARA because PDA1 decreased the lipopolysaccharides concentration and under the SARA condition PDA2 lowered the starch degradation. Under normal fermentation condition, both PDA increased ruminal fermentation products, propionate in particular, suggesting that the PDA May enhance animal productivity by promoting energy supply from propionate for glucogenesis in vivo. The PDA supplementation appeared to modulated the microbial activity rather than their abundances.		Austria – University of Veterinary Medicine Vienna – Farm Animals and Veterinary Health.

6548	12528526		Studies on glycoproteins of equine herpesviruses /	Mahmoud, Hassan Youssef Abdelhamid.			2013 .	The aim of our study :- In spite of many trials to develop the effective vaccine, there is no complete vaccine and EHV-1 and EHV-4 infection still threaten horses all over the world and lead to highly economic losses in horse industries. In this study, we try to understand the glycoproteins of these viruses because these glycoproteins play important role in the virus structure and infection cells. At first, we produced MABs to EHV-1 and EHV-4 these MABs were used as a tool to characterize the glycoproteins of EHV-1 and EHV-4. Total fourteen MABs were produce for EHV-1; four MABs had virus-neutralizing activity without complement. Seven MABs were EHV-1-specific, while the other two recognized EHV-4. Four MABs recognized gB, four did gC and one did gP2 by immunoblot analysis and indirect immunofluorescent assay. Eight MABs to EHV-4 were produced. Both MABs were EHV-4-specific one MAB was specific to gB and one was to gC by indirect immunofluorescent assay. Furthermore, total of 23 glycoproteins of EHV-1 and EHV-4 were expressed in mammalian cells characterized their immunogenicity. Conclusion :- In these PHD studies, there are some novel findings :- 1. EHV-1 gl plays an important role in expression of EHV-1 gE. 2. Immunogenicity of EHV-4 glycoproteins seems to be different from that of EHV-1 glycoproteins. These novel findings, expression plasmids and MABs must be available for understanding the pathogenicity of EHV-1 and EHV-4 and for development of effective vaccine and diagnostic method.

6566	12529127	PH. D.	Molecular investigation of tick-borne diseases in Hokkaido wildlife /	Moustafa, Mohamed Abdallah Mohamed.			2016 .	The emerging infectious diseases are mainly originated in wildlife and many of them are caused by vector-borne pathogens. Ticks are considered one of the most important vectors for zoonotic diseases in the world. They can transmit many zoonotic pathogens to both domestic and wild animal species. Humans are accidentally infected by TBDs such as HGA, human ehrlichiosis, neoehrlichiosis and babesiosis. In Japan, many studies have been conducted on TBP and they focused mainly on their molecular characterization and reservoir host identification. In this study, my main goal was to understand the ecology of potentially zoonotic TBPs in Hokkaido wildlife. I used the PCR-RFLP molecular technique to specifically detect the genetic materials of these pathogens in many wild animal species. By using the species specific oligonucleotide probes, this technique can help to survey several TBPs with high specificity and throughput.	Japan – Hokkaido University - The Graduate School of veterinary Medicine. #####

								In the first chapter, we determined the taxonomic position of Anaplasma sp. AP- sd and provided a molecular tool for its specific detection along with A. phagocytophilum and A. bovis among the most prominent wild ruminant, apex predator, and the most common rodent species in Hokkaido ecosystem. In the second chapter, I surveyed the prevalence of 13 zoonotic TBPs in 6 different small mammals collected from two different regions in Hokkaido, Japan. In addition to, I used the statistical modeling to examine the relationship between the infection rates and the explanatory variable. Finally, I provided a phylogenetic analysis for the detected TBPs based on the 16S rRNA and 18S rRNA gene sequences.

6575	12529690	PH. D.	Glycomics approach of livestock management toward the discovery of novel biomarkers indicating an environmental stress /	Rehan, Ibrahim Farag Mohammed.			2016 .	In this thesis, the author has discussed about the a glycoblotting-based systematic strategy that concurrently allowed for a large-scale serum N-glycome analysis and the quantitation of nonreducing terminal sialic acids was established in the present study. By applying the present protocol, the author discovered highly sensitive serum N-glycan biomarkers indicating an environmental/heat stress affecting the general health condition, especially homeostatic immune balance, of Holstein dairy cows. The results obtained clearly showed the seasonal alterations in serum N-glycan expression levels and their structural characteristics. The N-glycans of major serum glycoproteins in summer and autumn mainly terminated with Neu5Gc residues, whereas glycoproteins in winter used Neu5Ac as the main sialic acid instead Neu5Gc residues. A multivariate analysis revealed a correlation between productivity and the expression levels of season-specific glycoforms. Dynamic alterations in modifications to the nonreducing terminals of di/triantennary N-glycans provide highly sensitive serum biomarkers indicating an environmental stress/thermal comfort in dairy cows that affects their immune responses, performance and milk productivity. Consequently, serum Neu5Gc levels are a promising alternative biomarker to the individual N-glycans. The merit of this biomarkers is evident because the serum ratio Neu5Gc/Neu5Ac correlated well with the performance and milk productivity of Holstein dairy cows, whereas the THI value was not capable of predicting such long-term damage by a heat/environmental stress in October (THI = 56), which ultimately resulted in the lowest milk yield (21.6kg). by applying DMB-HPLC analysis, the author can quantify the nonreducing terminal sialic acids, in which the significance of the interconversion between Neu5Ac of serum glycoproteins in the regulatory mechanism of immune responses may be determined in terms of interactions between glycoform-engineered LgG and Fc γ /Fc γ Rn receptors or key animal lectins/PRRs on dendritic cells/macrophages.	#####	Japan – Hokkaido University – The Graduate School of veterinary Medicine.

6592	12530321		Identification of clostridium species from chickens with reference to antimicrobial resistance /	Ali, Magda Abdelatif Ahmed,			2016 .	In this study about 400 intestinal samples from chickens in different ages, 200 samples of them was for slaughtered apparently healthy farm chickens from (2-7) weeks of age in Sohage province, 100 samples of them from slaughtered apparently balady chickens and 100 samples from infected chickens with coccidiosis or NE. were tested for presence of clostridium species. In this study 50 samples from egg shells, 40 samples chickens fluffs and 50 samples chicks of one day old tested for presence of Clostridium spp. In this study 148 isolates from different Clostridium species from 400 samples at percent 37 % and the results morphological and biochemical tests and by PCR on C. perfringens isolated and it was C. perfringens type A. and other clostridial species have been isolated as C. bifermentans, C. sporogenes and C. sordellii. The percentages of Clostridium species in intestine of balady chickens higher than that in farm chickens. from intestinal samples different Clostridium species were isolated from infected chickens with coccidiosis or NE at percent of 45 % that because coccidiosis increase incidence of proliferation and toxigenesity of microorganism which may cause NE. and appearance of signs of increase mortality so the eradication of coccidiosis well decrease infection with NE. In this study Clostridium specie isolated from egg shell chickens fluff and chicks at one day old C. perfringens type A. was the most common isolate. In this study in vitro antimicrobial sensitivity of C. perfringens on 11 different antibiotics the most effective was Amoxicillin tetracycline and Oxyteteracycline against C. perfringens isolates.

6629	12531060	دكتوراه	The relation between depraved appetite, some hematological and biochemical changes in cattle /	Mansour, Mohamed Saied Mohamed.			2016 .	Cattle are very important for farmers in Egypt because it consider very important source of income for the farmers. The depraved appetite was acomplain that facing the farmers and the veterinarian which lead to economic losses for their effect on the productivity of animals, cost of treatments, deaths. This study to evaluate inter relation ship between the depraved appetite, clinical, hematological and some biochemical parameter of the blood serum of cattle.	Adel Elsayed Ahmed Mohamed, Mohamed Nour Eldin Ismail.

							A total number of 149 Egyptian native cattle aged from 6 month to over 5 years old. Animals (35 females and 7 males) were clinically healthy animals with average body condition, they were clinically and laboratory examined proved as healthy cattle and they are free from internal and external parasites were kept as controls. Animals were suffering from depraved appetites (8 males aged from 6 months and above and 107 female cattle aged from 1 years and above were suffering from depraved appetite. Clinical examination of cattle reaveled poor body condition especially in infested animals parasites and pregnancy. Reduced appetite, incoordination weakness, Slow growth, loss of hair, pale mucus membranes, Decreased weight gains, engulfing a foreigen materials such as ropes, plastic, wire, bones, clothes, metals. The investigation was carried out for one year from February to January 2013-2014. Fecal sample were collected directly from the rectum of animals in plastics bag and transported to laboratory for examination. Fecal examination carried out by concentration-flotation technique using saturated salt solution sodium chloride. Blood sample were collected from each animal under strict hygienic condition. By veinpuncture of jugular vein. Blood samples collection for determination of :- hematological analysis, total RBCs 106, total WBCs 103, Hemoglobin concentration gm/dl. Serum macro element: calcium and phosphourous mg/dl. Serum micro elments: copper, iron, zinc. Serum electrolytes : sodium, potassium, chloride mol/l total protein/dl.

6631	12531769	دكتوراه	Detection of toxigenic Staphylococcus aureus in locally slaughtered chicken and beef in Luxor city by using of multiplex PCR /	Ahmed, Zeinab Ahmed Mohammed,			2016 .	In the present study a total of 200 samples (75 raw meat, 75 chicken meat in table (9) and 50 Stool Swab in table (11) from children Luxor hospital) were investigated bacteriologically to detect the occurrence of S. aureus in examined food samples. Additionally, the isolated S. aureus were inspected for their enterotoxins profile that was considered as a potential risk for public health. Routine culture-based diagnostic detection and identification procedure for potentially pathogenic S. strains includes subsequent recovery and isolation of colonies on selective culture medium such as mannitol salt agar and Baired-Parker agar for 24-48 h at 37 °C, followed by coagulase assays for suspicious colonies and further confirmation by biochemical tests. Out of 200 examined food samples, 41 S. aureus isolates were identified from the examined samples with an incidence of (20.5%). The highest isolation rate was observed in chicken samples (22.7%) followed by fresh meat samples (18.7%), children's stool Swab (20%). Multiplex PCR technique used for detection of S. aureus enterotoxin (A-E) genes. Out of 41 S. aureus isolated from the examined food samples 15 could produce enterotoxins and 10 mecA. The result showed that 8 out of 15 (53.3%) tested S. aureus in table (10) isolated from fresh meat were positive for SE occurrence. The prevalence of sec was higher SE (7 SE. sec + 1 seb) and present of mecA 5 out of 10 (50%). The showed that 3 out of 15 (20%) tested S. aureus in table (10) isolated from chicken were positive for SE occurrence. The prevalence of sec was higher SE (2 SE. sec + 1 sed) and presence of mecA 3 out of 10 (30%). The result showed that 4 out of 15 (26.6%) tested S. aureus in table (13) isolated from chicken's Stool Swab were positive for SE occurrence. The prevalence of sec was higher SE (3 SE. sec + 1 seb) and presence of mecA 2 out of 10 (20%).	#####	Jehan Ragab Mohammed Daoud, Hussein Youssef Ahmed, Soad Abd El- Aziz Abd El-wanes.

6638	12532552	PH. D.	Sensitive detection methods for Panaeid Shrimp disease viruses :	Metwally, Walaa Gomaa.		2015 .	The Panaeid Shrimp world aquaculture developed from their experimental beginnings of major industries providing hundreds of thousands of jobs, billions of U. S. dollars in revenue, and supplementation of the world's food markets with a high value protein. Concomitant of the growth of the Shrimp culture industry has been the recognition of the ever-increasing importance of disease, especially those caused by infectious agents. The most important diseases of cultured Panaeid Shrimp have had viral or bacterial etiologies. Molecular diagnostic methods are widely used for routine diagnosis of IMNV. These include methods such as in situ hybridization, one-step reverse transcription polymerase chain reaction (RT-PCR), semi-nested RT-PCR, nested RT-PCR and real-time RT-PCR using TaqMan probe. Total RNA was extracted from the RNA samples preserved in 95% ethanol using RNA isoplus (Takara, Japan). cDNA was synthesized according to protocol (TOYOBO, Japan). Four methods were tested by comparing their sensitivity for IMNV detection including nested RT-PCR using two PCR primer sets, real-time RT-PCR using TaqMan probe and SYBR GREEN chemistry, RT-LAMP technique and real-time LAMP. The result of nested RT-PCR methods using IMNV-F and IMNV-R or F13, R13 primers were able for detecting until 1/100 dilution of cDNA sample. TaqMan real-time PCR method was able to detect until 1/200 dilution. Also, real-time RT-PCR using SYBR Green chemistry was able to detect cDNA sample until 1:200 dilutions, but after analyzing the dissociation curve of each amplicon we found that only a single peak obtained for 1:10 dilutions. RT-LAMP method was able to detect IMN Virus until 1:100 dilution only. Real-time LAMP method was able to detect until 1:10 dilution only. In conclusion, real-time PCR using TaqMan probe is recommended to being the best method of IMNV detection as it is the most sensitive and specific one.		Japan – University of Miyazaki – Graduate Shool of Agriculture master's Course.
6639	12532697	PH. D.	Identification of target proteins for carbonyl compounds in the gas phase of cigarette smoke and analysis of carbonylation-induced functional changes in the proteins /	Elmeligy, Enas Refaat Mohamed Hassan Aly.		2015 .	The present study aims to develop a method for detoxification of CSE. Antioxidants and several amino acids with a nucleophilic center are screened for protective effects against CSE-induced cytotoxicity in cultured cells. For this purpose, several types of assays have been used for detection of CSE-induced cytotoxicity mainly PI uptake into damaged cells using flow cytometry or fluorescent microscopy, DNA fragmentation assay, examination of PKCa-GFP translocation, MTS reduction activity assay and lactate dehydrogenase (LDH) leakage assay. The present findings suggest that those cytoprotective agents { Glutathione (GSH), N-acetyl cysteine (NAC), L-cysteine, ascorbic acid and 2-mercaptoethane sulfonate (MESNA)) suppress the CSE-induced cytotoxicity, by detoxifying the major cytotoxic factors such as ACR and MVK in the CSE. However, the detailed mechanism(s) underlying the actions of those cytoprotective compounds is at present unknown. Further studies are needed to elucidate the molecular mechanisms for cytoprotective effects of those compounds on CSE-induced cell damage.	#####	Abdel-Latif Shaker Seddek, Soichi Miwa, Ashraf Ahmed Elghoneimy.
6640	12533058	Ph. D.	Epidemiology and control of infectious diseases of ruminant livestock and veterinary public health /	Abdellatef, Hassan Mahmoud Mohamed.		2015 .	Our results demonstrated that, in spite of the significant diversity of MTB spoligotypes patterns obtained, the MTB population structure exclusively belonged to the modern evolutionary phylogenetic / PGG2-3. Lineage 4 was predominated and T family was the most endemic genotype among MTB strains isolated from Egypt in 2012-2014. This study represented the first insight in attempting to optimize suitable MIRU-VNTRs typing scheme for genotyping of MTB strains in Egypt. Combining spoligotyping, 12 MIRU-VNTRs loci, MLst Typing methods used in the present study will help to achieve the efficient characterizations, discriminations. Clarifies the evolutionary mechanism, phylogenetic clusters analysis and more accurate assignments of the spoligotype-defined clade based on the local setting and characteristics of the MTB strain circulating in Egypt. The preliminary idea about the clustering and transmission rate provided upon the results obtained will help the TB control decision makers to apply effective control measures to prevent the further spread of the TB infection. Although our MTB isolates originated from 16 (60%) /27Egyptian governorates which represented approximately 65% of the whole Egyptian population, it would be of interest to explore the distribution of these dominant genotypes through conducting more research on a nationwide scale, to clarify their role in TB morbidity in Egypt and help to find an evidence about the reason of the prevailing of those genotypes either has recently evolved due to increased transmissibility or because of their long establishment through stable association with respective Egyptian population. The present study highlighted the genotypic profile and molecular mechanism of drug resistance MTB strain circulating in Egypt. Molecular detection of mutations conferring drug resistance is a promising technology for rapidly screening and detection of MDR/XDRTB in Egypt. The high rate of FQ-monoresistance, pre-XDR-MTB isolates among our results implied the in appropriate usage of FQs, which in fact is the most commonly prescribed antibiotic for respiratory and urinary tract infection in Egypt and this might lead to the emergence of XDR-TB.	#####	Abdel-Moez A. Ismail, Yasuhiko Suzuki, Jehan Ragab Mohammed, Saber A. Kotb.

6645	12533753	Ph. D.	Morphological studies on the stomach of the post batching ducks /	Madkour, Fatma Abbass Mohammed.			2015 .	The current study was carried out on fifty five apparently healthy post hatching Muscovy ducks of both sexes ranging from 1-60 days old. They were divided according to their age into 5 groups. The length of the stomach formed nearly 1.5 fold at 15 days old and 3.5 folds at 60 days old, while the weight formed nearly 4.5 folds at 15 days old and 29 folds at 60 days old when compared with that at one day old. In all studies ages, the proventriculus length formed 42.7 – 47.7 % and the gizzard length 52.2 – 57.2 % of the total length of stomach. While proventriculus weight formed 8.5 – 12.9 % and gizzard weight 86.6 91.4 % of the total weight of the stomach. The proventriculus began cranially opposite to the level of the cranial end of the liver at 1 – 15 days old, but infront to this level at 30 and 60 days old, it terminated caudally infront of the caudal end of the left lobe of the liver by a variable distances dependent on the age of the bird. The interior structure of the proventriculus had 4 thin longitudinal folds at one day old which became thicker and separated by grooves with the advancement of the age. Moreover, at 15 days old, fine openings of the proventricular glands could be observed. At 30-60 days, these openings became numerous, oval or round in shape and uniformly distributed. The esophago- proventricular junction was characterized internally by few faint longitudinal folds at one day old. With advancement of the age, 8-9 longitudinal folds could be distinguished. The proventricular- gizzard junction distinguished externally dependent on its diameter at 1-7 days old, but up to 15 days old depending on its color in addition to its diameter.	#####	Salma Ahmed Mohamed, Kamal Eldin Hashem Abdalla, Yasser Abdel Galil Ahmed.
6646	12536240	ماجستير	اقتصاديات انتاج وتسويق محصول الطماطم في محافظة قنا :	محمد ؛ هيام مبارك ابراهيم	هيام مبارك ابراهيم محمد ،	سوهاج :	2018 .	يعتبر محصول الطماطم من محاصيل الخضار الهامة التي توجد زراعتها في الاراضي الجيرية والرملية والطينية ، والتي يرجع اصلها الى امريكا الجنوبية ، وقد تم نقل نوع واحد من امريكا الجنوبية اثلى المكسيك ثم الى امريكا الوسطى حيث كان يزرع هناك وانتقلت زراعتها في القرن التاسع عشر الى اوروبا ثم الى بلاد العرب ولقد نجحت زراعة الطماطم في المزارع المكثوفة والمغطاه كما زرع بدون تربة واجريت عليها الدراسات للتحكم بشكل الثمرة ووقت نضوجها ليسهل من عملية تصديرها وتستهلك الطماطم في العديد من صورها المختلفة حيث تؤكل طازجة في السلاطات او في صورة عصير طماطم او لصناعة الصلصة وترجع اهمية الطماطم كغذاء الى احتوائها على العديد من المركبات العضوية والمعدنية المفيدة للانسان مثل فيتامين C والاملاح المعدنية وتزرع الطماطم في مصر في اربع عروات رئيسية هي العروة الصيفية المبكرة (تزرع في المشتل خلال اواخر شه ديسمبر واولئ يناير والزراعة في الارض المستديمة من منتصف فبراير حتى اوائل مارس) والعروة الصيفية العادية او المتأخرة (تزرعه في المشتل خلال منتصف فبراير واولئ مارس ويتم نقل الشتلات للارض المستديمة في ابريل) والعروة الخريفية (تزرع خلال يونيو واولئ يوليو والزراعة بالارض المستديمة خلال يوليو واغسطس) والعروة الشتوية (تزرع خلال سبتمبر واولئ اكتوبر) ولقد اشتملت الدراسة على ثلاث ابواب رئيسية الباب الاول : تناول الاستعراض المرجعي والاطار النظري الباب الثاني تناول اهم المؤشرات الاقتصادية لمحصول الطماطم في مصر ومحافظة قنا		الاستاذ الدكتور / منتصر حمون الدالى

6651	12539901	Ph. D.	Role of Rb, p53 and PTEN tumor suppressor genes in prostate carcinogenesis /	Mohammed, mmed Salah Abdallah.		2015 .	Prostate cancer is one of the most common cancers worldwide and considers the second leading cause of death from cancer in men. Mutations in tumor suppressor genes including RB and PTEN have been linked to castration resistance and poor outcome of prostate cancers. Determining targets of these genes in the context that recapitulates prostate cancer progression might to beneficial for discovering novel therapeutic tools. In vivo prostate cancer models provided tumors with various pathological stages, however were not serviceable in terms of detecting dynamic change of gene transcription without picking up noise derived from various cellular components of tumor mass. Additionally, it is difficult to achieve an impact specific to tumor progression by way of gain of functions of these tumor suppressors in culture-competent prostate cancer cells. To achieve determination of RB and PTEN-loss signatures in the context of malignant progression of prostate cancers, we have invented an in vitro model. Cells derived from p53-/-, Rb1/f, p53-/-, Pten/f/f or p53-/-, Rb1/f, Pten/f/f mouse prostate gland and survived under primary culture condition with prostaCult™ media were analyzed. Cre recombinase-mediated deletion of Rb or Pten or both stimulated prostasphere formation in 3D culture as well as proliferation rate in 2D culture. Moreover, p53-/- prostate cells couldn't induce tumor outgrowth in immunodeficient mice whereas extra deletion of Rb synergized p53 action forming tumors in 20% of mice and this synergizing effect was enhanced after Pten deletion inducing tumors in 40% of total mice number. Strikingly, prostate cells deficient in p53, Rb and Pten completely transformed prostate cells wit 100% tumor production efficiency in vitro.	#####	Ahmed Ibrahim Ahmed, Chiaki Takahashi, Ahmed Yassein Nassar, Hazem Mohamed Ibrahim.

6654	12539980		Histochemical analysis of the vomeronasal organ of the one-humped camel (camelus dromedarius) /	Mohamdien, Daila Ibrahim Tawfik.		2014 .	The camel and sheep VNOs were examined to show the histological and histochemical features of their different cell types. In camel VNO, the sensory epithelium was composed of supporting cells, receptor cells and basal cells and their nuclei were arranged in the apical middle, and basal regions, respectively. Some superficially-situated cells were detected; which were different from the basal, receptor or supporting cells in their morphology, distribution or frequency. In sheep VNO, three basic cell types were detected: supporting, receptor and basal cells. Some PAS-positive supranuclear cytoplasmic granules were detected in the receptor cells of sheep VNO, but not in those of camel VNO. The number of goblet cells decreased caudally till the disappearance at the middle of the anterior-posterior axis of the camel VNO, although it was nearly same in all regions of the sheep VNO.		

							Moreover, the VNO of the one-humped camel was examined by traditional histochemistry to find some morphological devices that may be involved in the camel adaptation to the desert environment. Several lymphatic capillaries and vessels were detected surrounding the whole vomeronasal epithelium suggesting the involvement of these vessels in keeping the water balance and avoid dehydration of the vomeronasal epithelium and thus maintaining the suitable environment for the pheromone perception in the camel VNO. In addition, to clarify the glycohistochemical characteristics of the sensory and non-sensory epithelia, the VNO of camel was examined by lectin histochemistry. The obtained results indicate that the glycohistochemical characteristics of the free borders of both sensory and non-sensory epithelia are similar to each other, suggesting that the staining in the free border may originate from the mucous secretions of the vomeronasal glands and goblet cells and that these glycoconjugates may play an important role on protecting the free border of both the sensory and non-sensory epithelia against foreign organisms. DBA labeled the cytoplasm and tip of the cell processes of the free border of some columnar-shaped cells scattered in the non-sensory epithelium of the camel VNO. In the sheep VNO, DBA stained particular cells in the vomeronasal sensory epithelium, located at the same level as the vomeronasal receptor cells, although the distribution, shape and number of the stained cells did not correspond to those of the vomeronasal receptor cells.

6663	12542571		Studies on analysis of a novel secreted protein of Ly-6 domain 1expression and an expecting function in bovine uteroplacental tissues during gestation /	Awad, Mahmoud Mohamed Abdelhamid Ahmed.			2014 . The present study exposes a new insight on the physiological function a recently discovered molecule; SOLDI was secreted from both fetal and maternal tissues throughout pregnancy. The SOLDI mRNA localization was in TMCs at early and mid pregnancy in addition to both TMCs and BNCs at late pregnancy. SOLDI protein was localized in the mesenchymal tissues of the villous tree and endometrium with wide distribution by pregnancy progression. These results suggest a key role of SOLDI in fetal growth and expansion of fetal membranes at the early pregnancy as well as, the possible function in tissue remodeling at late pregnancy. BT cell lines expressed SOLDI with variable levels; BT-K and BT-C represented the highest and the lowest cell line expressed SOLDI, respectively. SOLDI appeared to be regulated by scaffold condition after Matrigel stimulation effect on its expression with long-term culture system. BT cell lines exhibited a convenient in vitro tool to study SOLDI possible function in trophoblast cell. SOLDI proved to be acting as a powerful stimulator for trophoblast migration and invasion, which considered one of the basic and critical processes during embryo implantation into the uterine tissue. However, further experiments are needed to elucidate the mechanism by which SOLDI stimulate the migration and invasion behaviors trophoblast cells at the fetomaternal interface.

6665	12564197	دكتوراه	Studies on biochemistry, genetics and fermentation of bacteriocins for novel meat Hygiene /	Maky, Mohamed Abdelfattah Madany.			2015 . The methodology applied in this study led to the isolation of 835 LAB strains from 146 sources collected from Egypt. These sources included meat samples (9 bovine meat and 3 chicken meat), some meat products (26 sausages and 3 minced meat), 29 salted fish, some chicken by-products (24chicken intestinal contents and 31 chicken neck skin), milk products samples (6 yogurts and 2 fermented milk), a starter for fermentation, and also some colonies isolated from contaminated cultures. Isolates that showed antagonistic activity against at least one of the indicator strains were considered as potential bacteriocin producers. 237 bacteriocin-like substance (BLS) producers were found from all 835 isolates by the spot-on-lawn method. According to their antimicrobial spectra, the were divided into three groups ; board spectrum group (2.1 % of isolates), middle spectrum group (15.2% isolates), and narrow spectrum group (82.7% of isolates). Isolates showing strong and characteristic antimicrobial activity were proceeded for further analysis. For species identification, partial sequencing of the 16S rDNA of 37 selected isolates was carried out. The isolates were identified as follows: Lactobacillus plantarum, Lactobacillus curvatus, Lactobacillus brevis, Lactobacillus reuteri, Lactobacillus sakei, Lactobacillus casei, Lactobacillus farcininis, Lactobacillus crustorum, Lactobacillus lactis, Enterococcus faecalis, Enterococcus avium, Enterococcus casseliflavus, carnobacterium divergens, weissella viridescens and leuconostoc garlicum. The species of Weissella viridescens, Lactobacillus crustorum and Leuconostoc garlicum have not been reported as bacteriocin-producers, which suggests a considerable possibility of a novel bacteriocin production.	#####	Jehan Ragab Mohamed Daoud, Kenji Sonomoto, Mohamed Karmi.

							اشتملت هذه الدراسة على سبعة مجموعات من الماشية والاغنام الصغار والبالغين ومن كلا الجنسين وهي كالاتى مجموعة (1)العجول البالغة (2)العجلات البالغة (3)العجول الصغيرة (4)العجلات الصغيرة (5)الخراف البالغة (6)النعاج البالغة (7)الحملان الصغيرة.وفصيلة الماشية من سلالة الفريزيان والاغنام من السلالة البدوي وتم الفحص الظاهري على جميع حيوانات التجربة وكانت جميعها في الظاهر سليمة وبمصححة جيدة وتم تجريع الحيوانات الكبيرة والبالغة ضد الطفيليات الداخلية وتم تقييم الحالة الصحية للحيوانات قبل اخذ العينة من حيث درجة الحرارة ومعدل ضربات القلب والتنفس وفحص الكبد الليمفاوية السطحية وفحص البول والبراز وصورة دم كاملة.	2016				Soliman, Asmaa Mostafa Mahmoud. و اختلفت طرق تقديم عرض المحتوى ببيئات التعلم الإلكترونية التي تنوعت من النصوص الفائقة، والرسومات التعليمية، والفيديوهات، وغيرها من الطرق الأخرى وذلك للوصول إلى تحقيق الأهداف التعليمية ورفع كفاءة المتعلم، وسهولة عملية التعلم، ومساعدة المعلم في اختصار الوقت وتوصيل المعلومة، والاستفادة أيضاً من تنوع المصادر التعليمية المختلفة. ويسمى البحث الحالي كأحد بحوث ودراسات تفاعل الإستعداد والمعالجة إلى إستقصاء بعض مواصفات وتصميم وبناء بيئات محتوى إلكتروني حسب طريقة عرضها سواء بالنص المرن أو ترتيب أجزاء النصوص وذلك من خلال تفاعلها مع أسلوب التعلم (التتبعي/الكلي).

مشكلة البحث:

يحول البحث الحالي الأجابة عن السؤال الآتي:

كيف يمكن تصميم بيئة تعلم إلكترونياً طبقاً لطريقة عرض المحتوى (النص المرن/ ترتيب الأجزاء) وتفاعلها مع أسلوب التعلم (التتبعي/الكلي) في تنمية التحصيل والتفكير التحليلي لدى طلاب تكنولوجيا التعليم؟
ويقتزع من هذ السؤال التساولات الآتية:

- 1- ما مهارات التفكير التحليلي المراد تنميتها لدى طلاب تكنولوجيا التعليم؟
 - 2- ما معايير تصميم طرق عرض المحتوى الإلكتروني (النص المرن/ترتيب الأجزاء) وفقاً لأسلوب التعلم (التتبعي/الكلي)؟
 - 3- ما التصميم التعليمي لطرق عرض المحتوى الإلكتروني (النص المرن) لبيئة التعلم وفقاً لأسلوب (التتبعي/الكلي)؟
 - 4- ما التصميم التعليمي لطرق عرض المحتوى الإلكتروني (ترتيب الأجزاء) لبيئة التعلم وفقاً لأسلوب (التتبعي/الكلي)؟
 - 5- ما أثر طرق عرض المحتوى الإلكتروني (النص المرن/ترتيب الأجزاء) في تنمية التحصيل؟
 - 6- ما أثر طرق عرض المحتوى الإلكتروني (النص المرن/ترتيب الأجزاء) في تنمية بعض مهارات التفكير التحليلي؟
 - 7- ما أثر أسلوب التعلم (التتبعي/الكلي) في تنمية التحصيل؟
 - 8- ما أثر أسلوب التعلم (التتبعي/الكلي) في تنمية بعض مهارات التفكير التحليلي؟
 - 9- ما أثر التفاعل بين طرق عرض المحتوى الإلكتروني (النص المرن/ ترتيب الأجزاء) وأسلوب التعلم (التتبعي/الكلي) في تنمية التحصيل؟
 - 10- ما أثر التفاعل بين طرق عرض المحتوى الإلكتروني (النص المرن/ ترتيب الأجزاء) وأسلوب التعلم (التتبعي/الكلي) في تنمية بعض مهارات التفكير التحليلي؟
- أهداف البحث: هدف البحث الحالي إلى:
- – تعرف أثر التفاعل بين طرق عرض المحتوى الإلكتروني (النص المرن/ترتيب الأجزاء) وأسلوب التعلم (التتبعي/الكلي) في تنمية التحصيل والتفكير التحليلي لدى طلاب التربية النوعية.
 - - تقصي أثر التفاعل بين طرق عرض المحتوى الإلكتروني (النص المرن) وأسلوب التعلم (التتبعي) في تنمية التحصيل لدى طلاب التربية النوعية.
 - - الكشف عن أثر التفاعل بين طرق عرض المحتوى الإلكتروني (النص المرن) وأسلوب التعلم (التتبعي) في تنمية التفكير التحليلي لدى طلاب التربية النوعية
 - - تعرف أثر التفاعل بين طرق عرض المحتوى الإلكتروني (النص المرن) وأسلوب التعلم (الكلي) في تنمية التحصيل لدى طلاب التربية النوعية.
 - - التعرف على أثر التفاعل بين طرق عرض المحتوى الإلكتروني (النص المرن) وأسلوب التعلم (الكلي) في تنمية التفكير التحليلي لدى طلاب التربية النوعية.
 - - تقصي أثر التفاعل بين طرق عرض المحتوى الإلكتروني (ترتيب الأجزاء) وأسلوب التعلم (التتبعي) في تنمية التحصيل لدى طلاب التربية النوعية.
 - - الكشف عن أثر التفاعل بين طرق عرض المحتوى الإلكتروني (ترتيب الأجزاء) وأسلوب التعلم (التتبعي) في تنمية التفكير التحليلي لدى طلاب التربية النوعية.
 - - تعرف أثر التفاعل بين طرق عرض المحتوى الإلكتروني (ترتيب الأجزاء) وأسلوب التعلم (الكلي) في تنمية التحصيل لدى طلاب التربية النوعية.
 - - التعرف على أثر التفاعل بين طرق عرض المحتوى الإلكتروني (ترتيب الأجزاء) وأسلوب التعلم (الكلي) في تنمية التفكير التحليلي لدى طلاب التربية النوعية.
- أهمية البحث: تتضح أهمية في:
- 1- تحسين طرائق والمخرجات التعليمية للطلاب من خلال بيئات التعلم الإلكترونية.
 - 2- يعد البحث الحالي من الأبحاث التجريبية الجديدة التي تهتم بدراسة التفاعل بين المعالجة والإستعداد في بحوث تكنولوجيا التعليم.
 - 3- التوجه نحو الاهتمام بزيادة الاتجاه نحو تكيف بيئات التعلم الإلكترونية بدلاً من البيئات الإلكترونية العادية من خلال مراكز التعليم الإلكتروني في الجامعات المصرية وفقاً لاساليب تعلم الطلاب.
 - 4- لفت إنتباه مسئولى التعليم بالجامعات، للاهتمام بأساليب التعلم المختلفة للطلاب وخاصة أسلوب التعلم (التتبعي/الكلي).
- منهج البحث: استخدم الباحث المناهج البحثية الآتية:
- 1- المنهج الوصفي التحليلي: لإعداد قائمة المعايير المتعلقة بتصميم بيئتي التعلم وتفاعلها مع أسلوب التعلم (التتبعي/الكلي) وذلك من خلال الإطلاع على الأدبيات والدراسات والأبحاث العربية والإنجية لمعايير تصميم بيئات التعلم الإلكترونية والتكيفية، وكذلك الإطلاع على الأدبيات والدراسات والأبحاث العربية لإعداد اختبار التفكير التحليلي.
 - 2- المنهج شبه التجريبي: التطبيق على عينة البحث، حيث يهدف البحث إلى تقصي أثر متغير مستقل على متغير تابع عن طريق التفاعل بين طرق عرض المحتوى الإلكتروني (النص المرن/ترتيب الأجزاء) وأسلوب التعلم (التتبعي/الكلي) في تنمية التحصيل والتفكير التحليلي لدى طلاب تكنولوجيا التعليم.
- التصميم التجريبي للبحث: استخدم التصميم العاملي (2×2) لدراسة العلاقة السببية بين المتغيرات المستقلة والمتغيرات التابعة كالتالى:
- المجموعة التجريبية الأولى: طلاب ذو أسلوب التعلم التتبعي يدرسون بيئة عرض المحتوى الإلكتروني (النص المرن).
- المجموعة التجريبية الثانية: طلاب ذو أسلوب التعلم الكلي يدرسون بيئة عرض المحتوى الإلكتروني (النص المرن).
- المجموعة التجريبية الثالثة: طلاب ذو أسلوب التعلم التتبعي يدرسون بيئة عرض المحتوى الإلكتروني (ترتيب الاجزاء).
- المجموعة التجريبية الرابعة: طلاب ذو أسلوب التعلم الكلي يدرسون بيئة عرض المحتوى الإلكتروني (ترتيب الاجزاء).
- عينة البحث: تتكون عينة البحث من أربعة مجموعات تجريبية كل مجموعة (10) طلاب/طالبات من الفرقة الاولى
- تكنولوجيا التعليم بكلية التربية النوعية 2018/2019.
 - متغيرات البحث:
- أ- المتغيرات المستقلة:
- طرق عرض المحتوى الإلكتروني (النص المرن/ترتيب الأجزاء).
 - أسلوب التعلم (التتبعي/الكلي).

						الحد الجغرافي (حدود مكانية) يتم تطبيق الدراسة الميدانية على بعض إدارات المدارس المتوسطة في المناطق التعليمية الستة التابعة لدولة الكويت وهي (العاصمة، حولي، الفروانية، الأحمدى، الجهراء، مبارك الكبير) 0 حدود زمنية: تم تطبيق الدراسة الميدانية خلال العام الدراسي 2018م أدوات الدراسة: استخدمت الدراسة الاستبثانية كأداة رئيسة لجمع البيانات والمعلومات من المجتمع البحثي مصطلحات الدراسة : اعتمدت الدراسة على المصطلحات التالية : 1. التطوير 2. مجتمع المعرفة 3. الممارسات الإدارية 4. مدارس المرحلة المتوسطة بالكويت: نتائج الدراسة الميدانية: 1. حصل البعد الثالث المرتبط بواقع الممارسات الإدارية لمديري المدارس المرتبطة بنقل وتبادل المعرفة على الترتيب الأول وجاء بمستوى دلالة متوسط 2. حصل البعد الأول المرتبط بواقع واقع الممارسات الإدارية لمديري المدارس المرتبطة بتخطيط ونشر المعرفة جاء بمستوى دلالة متوسط 3. حصل البعد الرابع المرتبط واقع الممارسات الإدارية لمديري المدارس المرتبطة بتخزين المعرفة على الترتيب الثاني بمستوى دلالة متوسط 4. حصل البعد الخامس المرتبط بواقع الممارسات الإدارية لمديري المدارس المرتبطة بتخزين المعرفة على الترتيب الرابع وبمستوى دلالة منخفض ولم يتحقق وفقاً لاستجابات عينة الدراسة 5. حصل البعد الثاني المرتبط بواقع واقع الممارسات الإدارية لمديري المدارس المرتبطة بتوليد واكتساب المعرفة وبمستوى دلالة منخفض ولم يتحقق وفقاً لاستجابات عينة الدراسة . وفي ضوء معطيات النتائج قدمت الدراسة تصوراً مقترحاً لتطوير الممارسات الإدارية لمديري مدارس المرحلة المتوسطة بدولة الكويت في ضوء متطلبات مجتمع المعرفة .

2019	تهدف الرسالة الى :	2019			عطية، أسماء فتحى.	أثر استخدام سكامبر (SCAMPER) إستراتيجية في تدريس العلوم على تنمية النمط المتكامل في التعلم والتفكير وبعض مهارات توليد المعلومات وتقييمها لدى تلاميذ المرحلة الإعدادية =		

							مقدمة هدفت الدراسة إلى التعرف على أثر استخدام إستراتيجية سكامبر في تدريس العلوم على تنمية النمط المتكامل و الإعدادية بعض مهارت توليد المعلومات وتقييمها لدى تلاميذ المرحلة . وقد ظهرت الحاجة إلى ذلك نتيجة للتطور الهائل الذي يشهده المعلومات العالم في وهذا التطور ، السريع يحتاج إلى تلميذ يفكر بطريقة متكاملة، وقادر على أن ينتج معلومات جديدة من البناء المعرفي لديه ثم يقيم المعلومات ، هذه مما دفع المتخصصين في مجال التعليم إلى الاهتمام بتنمية التفكير بأنواعه المختلفة وكذلك تنمية مهارات الة تفكير ، فقد أجريت عدة دراسات سابقة لمحاولة تنمية ذلك في جميع المراحل التعليمية المختلفة، وخاصة المرحلة الإعدادية حيث أنها تعد من المراحل المهمة التي تهتم بـ للتلميذ، تكوين الشخصية المتوازنة وكذلك تنمية من خلال مادة العلوم حيث أنها من المواد التي تتكون من أنشطة ومهارته تنمي التفكير إستراتيجية تلك باستخدام ، تدريبية مختلفة مثل إستراتيجية سكامبر، والتي من ضمن أهدافها تنمية التفكير ومهارته. واستنادا لما سبق فقد تبلورت الدراسة مشكلة في " وجود قصور في النمط المتكامل في التعلم و التفكير و بعض مهارت توليد الإعدادية المعلومات وتقييمها لدى تلاميذ المرحلة ". وقد حاولت الدراسة الإجابة عن الآتية الأسئلة : - ما أثر استخدام إستراتيجية سكامبر في تدريس العلوم على تنمية النمط المتكامل في التعلم و التفكير لدى تلاميذ المرحلة الإعدادية؟ - ما أثر استخدام إستراتيجية سكامبر في تدريس العلوم على تنمية بعض مهارت توليد المعلومات لدى تلاميذ المرحلة الإعدادية ؟ - تقييم ما أثر استخدام إستراتيجية سكامبر في تدريس العلوم على تنمية بعض مهارت المعلومات لدى تلاميذ المرحلة الإعدادية ؟ وقد تمت الإجابة عنأسئلة الدراسة من خلال اختيار صحة الفروض التالية: - يوجد فرق ذو دلالة إحصائية بين متوسطي درجات تلاميذ المجموعتين التجريبية والضابطة في الاختبار البعدي للنمط المتكامل في التعلم و التفكير التجريبية لصالح المجموعة . - يوجد فرق ذو دلالة إحصائية بين متوسطي درجات تلاميذ المجموعتين التجريبية والضابطة في التطبيق البعدي لاختبار توليد المعلومات التجريبية لصالح المجموعة	
2019		تتناول الرسالة: تتناول الرسالة: هدفت الدراسة إلى التعرف على دور الأنشطة الطلابية في تدعيم الانتماء الوطني لدى طلاب المدارس الإعدادية في ضوء بعض التحديات المعاصرة، بمحافظة قنا بجمهورية مصر العربية استخدام الباحث المنهج الوصفي التحليلي ويمثل مجتمع الدراسة الميدانية بالمدارس الإعدادية في محافظة قنا بقضاعتها السكانية(الحضرية-الريفية) حيث بلغ عدد المدارس الابتدائية بها (387) مدرسة موزعة على (9) إدارات تعليمية تكونت عينة الدراسة الحالية من (600) مفردة موزعة على(500) طلبة وطالبات (100) مشرف نشاط ومدير ومدرسة وقد مثلت هذه العينة خمس إدارات تعليمية وهي(قنا – دشنا- نجع حمادى- قوص- نقادة) نسبة 5% من مجموع المجتمع الدارسي الكلي وفي نهاية الدراسة وبناء على نتائجها توصلت للدراسة إلى : *النشاط الطلابي وسيلة من الوسائل الفعالة لتحقيق أهداف التربية والتعليم *تتضمن الأنشطة معلومات عن التحديات التي تواجه الوطن *مشاركة الطلاب في الأنشطة يزيد مستواهم الدارسي *ضعف عوامل الجذب في الأنشطة الطلابية *قلة تنوع الأنشطة الطلابية بما يلبي إشباع ميول وهوايات الطلاب .	تتناول الرسالة: تتناول الرسالة: هدفت الدراسة إلى التعرف على دور الأنشطة الطلابية في تدعيم الانتماء الوطني لدى طلاب المدارس الإعدادية في ضوء بعض التحديات المعاصرة، بمحافظة قنا بجمهورية مصر العربية استخدام الباحث المنهج الوصفي التحليلي ويمثل مجتمع الدراسة الميدانية بالمدارس الإعدادية في محافظة قنا بقضاعتها السكانية(الحضرية-الريفية) حيث بلغ عدد المدارس الابتدائية بها (387) مدرسة موزعة على (9) إدارات تعليمية تكونت عينة الدراسة الحالية من (600) مفردة موزعة على(500) طلبة وطالبات (100) مشرف نشاط ومدير ومدرسة وقد مثلت هذه العينة خمس إدارات تعليمية وهي(قنا – دشنا- نجع حمادى- قوص- نقادة) نسبة 5% من مجموع المجتمع الدارسي الكلي وفي نهاية الدراسة وبناء على نتائجها توصلت للدراسة إلى : *النشاط الطلابي وسيلة من الوسائل الفعالة لتحقيق أهداف التربية والتعليم *تتضمن الأنشطة معلومات عن التحديات التي تواجه الوطن *مشاركة الطلاب في الأنشطة يزيد مستواهم الدارسي *ضعف عوامل الجذب في الأنشطة الطلابية *قلة تنوع الأنشطة الطلابية بما يلبي إشباع ميول وهوايات الطلاب .	شاهين، أحمد حمدي شرفاوى . شاهين، أحمد حمدي شرفاوى .	دور الأنشطة الطلابية في تدعيم الانتماء الوطني لدى طلاب المرحلة الإعدادية في ضوء التحديات المعاصرة /	ماجستير	12586755	6699

6710	12590527	ماجستير	برنامج قائم على التعلم الذكي لتنمية بعض مهارات التواصل الالكتروني لدى الطلاب الموهوبين بالمرحلة الاعدائية /	عبدالقادر، هيام عبدالحكيم على.			2018	تتناول الرسالة:	2019					

						يتناول البحث مساعدة الطلاب الموهوبين بالمرحلة الاعدادية : وذلك باستخدام التعلم الذكي كتنقيية التعلم الذكي كتنقيية حديثة في التعلم وامتلاكهم لبعض مهارات التواصل الإلكتروني قد تساعدهم في حل الكثير من مشكلات التعليم التقليدي التي قد يعانون منها . 2-توجيه نظر المعلمين إلى الاستفادة من الأساليب الحديثة في التدريس باستخدام وسائل التواصل الإلكتروني . 3-مساعدة المهتمين بالعملية بتقديم نموذج باستخدام التعلم الذكي في التدريس وتنمية بعض مهارات التواصل الكتروني للمعلمين في مختلف التخصصات من خلال برامج لاعادهم واستخدام مقياس مهارات الانترنت كأداة تقييم لمستوى الطلاب لهذه المهارات . 4-فتح المجال أمام الباحثين التربويين لاجراء بحوث ودراسات مستقبلية تتناول استخدام كل من التعلم الذكي ومهارات التواصل الالكتروني في مختلف المناهج الدراسية		
6711	12590550	ماجستير	الضوى، ولاء محمد صلاح.	نموذج مقترح لتسويق المنشآت بمحافظة الأقصر /	2018	تتناول الرسالة: الإدارة عملية إنسانية مستمرة تعمل على تحقيق أهداف جيدة وعلى استخدام الجهد البشري في الاستعانة بالإنكبات البشرية والمادية وذلك في شكل نشاط إنساني متكرر ومستمر وهذا النشاط يوجد في كل المؤسسات وعلى كافة المستويات سواء كانت هذه المؤسسات حكومية أو أهلية (1:56) ولكي تستطيع الهيئة الإدارية مواجهة احتياجات المجتمع وتحقق أهدافها بنجاح يتطلب على القائمين بها وقادتها أن تكون لديهم رؤية واحدة مشتركة في العمل (71:29) وأي بدات الإدارات في المؤسسات المعاصرة تلجأ إلى تطوير الأفكار والمفاهيم واتباع أساليب إدارية تنسجم بالجرأة والتحرر تتطلع جميعها من منطلق الرغبة في تعظيم فرص النجاح لتحقيق رغبت السوق(32:41) تمتلك محافظة الأقصر مجموعة نادرة من الأماكن الأثرية التي لايزال الكثير منها محفوظا بحالته ومن أشهرها معبد الأقصر ومعبد الكرنك ومعقل وادي الملوك وادي الملكات والمعابد الجنائزية ومعبد إسنا وغيرها بجانب القطع الأثرية الفريدة ومتحف الأقصر وظلت عاصمة المحافظة (طيبة) عاصمة مصر حتى بداية الأسرة السادسة الفرعونية حين انتقلت العاصمة إلى منف في الشمال . استلهم اسم المحافظة من أسم عاصمتها الأقصر التي تعددت أسماؤها على مر العصور فكان أشهرها مدينة المائة باب ومدينة الشمس ومدينة النور مدينة الصولجان و"واسن" وأطلق عليها العرب الأقصر لكثرة قصورها ومعابدها تجذب شريحة كبيرة من السياحة الوافدة إلى مصر .		
6712	12590570	ماجستير	محمد، محمود كمال الدين أبو القاسم.	تأثير برنامج تعليمي باستخدام الرسوم ثلاثية الأبعاد على تعلم بعض مهارات كرة القدم لدى تلاميذ الحلقة الأولى من التعلم الأساسي	2019	تتناول الرسالة: يستهدف البحث إلى تصميم برنامج باستخدام الرسوم ثلاثية الأبعاد ومعرفة تأثيرها على تعلم بعض مهارات كرة القدم لدى تلاميذ الحلقة الأولى من التعلم الأساسي استخدام الباحث المنهج التجريبي باستخدام التصميم التجريبي لمجموعتين إحداهما تجريبية والأخرى ضابطة باتباع القياسات القبلية والبعدية وتمثل مجتمع البحث في تلاميذ الصف السادس الابتدائي بمدرسة الأزهر النموذجي الابتدائي وبلغ حجم العينة (40) تلميذا وتم اختيارهم بالطريقة العشوائية العمدية وقسمت العينة إلى مجموعتين متساويتين ومتكافئتين فوام كل منها (20) تلميذا المجموعة التجريبية تستخدم برمجية ثلاثي الأبعاد في تعلم المهارات قيد البحث والمجموعة الضابطة تستخدم الطريقة التقليدية في تعلم المهارات قيد البحث والمتعلمة في امتصاص الكرة بباطن القدم ، الجرى بالكرة ، المحاورة بالكرة ، وقد أسفرت النتائج أن الرسوم ثلاثية الأبعاد ساهمت بطريقة إيجابية في تعلم مهارات القدم للمجموعة التجريبية وتوق أفراد المجموعة التجريبية والتي تستخدم البرمجية على المجموعة الضابطة في تعلم بعض مهارات كرة القدم قيد البحث .		
6713	12590581	ماجستير	عبدالله، أمل جابر حسن.	الاحتياجات التدريبية اللازمة لتنمية مهارات رسم الموضحة لدى طلاب التخصص /	2019	تتناول الرسالة : يهدف البحث الحالي إلى التعرف على المهارات اللازمة لرسم الموضحة كخطوة أولية وأساسية لتصميم الأزياء . ثم تحليل هذه المهارات إلى تدريبات وقد تم إعداد قائمة بتلك المهارات والتدريبات وعرضها على المتخصصين في مجال تصميم الأزياء . وتم تطبيق تلك التدريبات على عينة من طليات الفرقة الثانية بقسم الاقتصاد المنزلي بكلية التربية النوعية – جامعة جنوب الوادي وقد بلغ عددهم (30) للعام الدراسي (2017-2018) وقد كشفت نتائج التحليل الإحصائي عن وجود فروق دالة وأحصائيا بين متوسطي درجات الطالبات في التطبيق القبلي والبعدى للاختبار التحليلي والاختبار المهارى لرسم المانيكان وتطبيق المانيكان لصالح التطبيق البعدى .		
6714	12590591	ماجستير	حامد، اسراء فتحى رمضان،	القياب والمآذن في العصر الفاطمي كمدخل لاستلهم أشكال خزفية لها قيمة وظيفية /	2019	تتناول الرسالة: تتأول البحث نبذة عن العصر الفاطمي في مصر وبعض آثارهم الفاطمية فيها وعرضت الباحثة بعضا من صور القباب والمآذن الفاطمية في مصر من خلال زيارتها الميدانية للآثار الفاطمية في مصر ، كما قامت بالتحليل المورفولوجي لبعض القباب والأذن الفاطمية من خلال الوصف والأشكال والهجوم الهندسية التي من خلالها استطاعت استلهم أشكال خزفية تحمل قيمة وظيفية ، لتحقق من فرض البحث الذي ينص على : تفترض الباحثة أنه يكون استلهم أشكال خزفية لها قيمة وظيفية من المآذن والقباب الفاطمية في مصر . وقد اتجهت الباحثة إلى استخدام المنهج الوصفي التحليلي والتجريبي وذلك من خلال الدراسة التي اشتملت على خمس فصول بالنقاط التالية : الفصل الأول: يتضمن عرض لمشكلة البحث وأهدافه وفروضه ومنهج دراسة موضوع البحث وعرض لاهم المصطلحات التي وردت في البحث والدراسات المرتبطة بموضوع البحث الحالي . الفصل الثاني: يتضمن عرض لنبذة مختصرة عن الفاطميون والعمارة الفاطمية وبعض آثارهم الفاطمية في مصر ومن خلال ما قامت به الباحثة زيارة ميدانية لمواقع الآثار الفاطمية عرضت صور قباب والمآذن الفاطمية ..		
6715	12590597	ماجستير	عبدالهادي، منى عبيد.	تطوير المهارات المهنية لمعلمي المرحلة الثانوية في ضوء الجودة الشاملة في دولة الكويت /	2019	تتناول الرسالة: تتناول هذه الدراسة أحد أهم مداخل الإدارية الحديثة في مجال التعليم ألا وهو مدخل إدارة الجودة الشاملة ومقوماته بشكل يسهم في الاستفادة من ما قد يتم التوصل إليه من نتائج في عملية تطوير التعليم الثانوى ومساعدة المعلمين وتشجيعهم على الولاء للوطن وغرس هذا النفوس طلبةهم وتوصير المعلمين بالفاهيم والممارسات التربوية الخاطئة وتوجيههم إلى عدم الأخذ بها وتجنبها وتنويرهم للأفضل والانتفع وهكذا فإن الهدف الرئيسي لإدارة الجودة الشاملة في العملية التعليمية وخصوصا في التوجيه الفني هو تطوير العملية التعليمية حتى تؤتي الغرض المنشود منها . إلا أن التوجيه الفني الحديث في ضوء مبادئ إدارة الجودة الشاملة يعمل على تحقيق أهداف فرعية أخرى تتعلق بجميع عناصر العملية التعليمية داخل المدرسة وخارجها باعتبار هذه العناصر منخلات لهذه العملية وتؤثر وتتأثر بها .		
6716	12590602	ماجستير	الصالح، أيمن أحمد سعد.	الثقافة الترويجية لضباط وعساكر خفر السواحل بدولة الكويت :	2019	تتناول الرسالة: يهدف البحث إلى التعرف على الثقافة الترويجية لضباط وعساكر خفر السواحل بدولة الكويت استخدام الباحث المنهج الوصفي وقد بلغ حجم العينة (500) ضابط وعسكري من إدارة السواحل بدولة الكويت ، وتم اختيارهم بالطريقة العشوائية وكان من أهم أدوات البحث مجموعة استمارات الاستبيان المقابلة الشخصية وكان من أهم النتائج أن :- 1-إدراك ضباط وعساكر خفر السواحل بدولة الكويت لمفهوم الترويج . 2-إدراك ضباط وعساكر خفر السواحل بدولة الكويت لأهداف ومميزات الترويج . 3- إدراك ضباط وعساكر خفر السواحل بدولة الكويت للانشطة الترويجية .		

							4- إدراك ضباط وعساكر خفر السواحل بدولة الكويت لأهمية الاستفادة من الامكانيات في ممارسة الأنشطة الترويحية .		
							5- من أكثر المصادر الثقافية التي يستفيد منها ضباط وعسكر خفر السواحل بدولة الكويت هي (التلفزيون – الانترنت) .		
2018	2018	ماجستير	12590608	6717	محمد، نجوى ابراهيم عبيد.	أثر الدمج بين مهام الويب والمحتونات الإلكترونية على تنمية بعض مهارات انتاج الصورة الرقمية والدافعية للتعلم لدى طلاب تكنولوجيا التعليم /	2018	تتناول الرسالة: تتناول البحث الحالي الكشف عن أثر الدمج بين مهام الويب والمحتونات الإلكترونية على تنمية مهارات الرقمية والدافعية للتعلم لدى طلاب تكنولوجيا التعليم ، واتبع البحث المنهج الوصفي في مرحلة دراسة واعاد قائمة معايير لكل بيئة من بيئات التعلم وهي بيئات: (مهام الويب ، المحتوى الإلكتروني ، وإعداد قائمة بمهارات انتاج الصورة الرقمية ، كما تم اتباع المنهج شبه التجريبي لدراسة أثر المتغير على التابعين ، وبلغت عينة البحث (30) طالباً من طلاب شعبة تكنولوجيا التعليم بالفرقة الثانية من كلية النوعية بقنا جامعة جنوب الوادي في العام الجامعي 2017/2018 ، طبق عليها أدوات البحث التي بها التحصيل وبطاقة ملاحظة وبطاقة تقييم منتج ومقياس الدافعية للتعلم . ونتناول البحث الحالي عن وجود فرق دال احصائياً عند مستوى (0.01) بين متوسطات درجات المستوى التجريبي الثلاث في التطبيق البعدي للاختبار التحصيلي المرتبط بمهارات انتاج الصورة الرقمية والعينة التجريبية الثالثة ووجود فرق دال احصائياً عند مستوى(0.05) بين متوسطات درجات طلاب العينات الثلاث في التطبيق البعدي في بطاقة الملاحظة المرتبطة بمهارات الصورة الرقمية لصالح تقييم منتج الصورة الرقمية التعليمية لصالح المجموعة وجود فرق دال احصائياً عند مستوى (0.01) بين متوسطات درجات طلاب المجموعات والتعلق البعدي في مقياس الدافعية للتعلم لصالح المجموعة التجريبية الثالثة .	
2018	2018	ماجستير	12590628	6718	بخدادي، محمود أحمد.	الرسوم الجدارية لمنازل الأقصر كمصدر لإثراء اللوحة الزخرفية /	2018	تتناول الرسالة: الفصل الاول : يشمل الاطار العام للدراسة . الفصل الثاني: تناول دراسة تاريخية للرسوم الجدارية عبر العصور وعرض مختارات لبعض الجداريات لتلك العصور . الفصل الثالث: تناول هذا الفصل بتوضيح مفهوم وخصائصالفن الشعبي واللوحة الجدارية وتعرض للسمات التشكيلية للرسوم الشعبية وتفسير للبعض الرموز وعناصر الشعبية المرسومة على جدران المنازل ، وعرض مختارات من رسوم الجداريات الشعبية بالأقصر . الفصل الرابع : قام الدارس بتحليل بعض أعمال الفنانين الذين استلهموا أعمالهم من عناصر الفن الشعبي من خلال القيم الجمالية وأسس التصميم وعمليات تصميمية . الفصل الخامس: ويشمل التطبيقات الذاتية للدارس وتحليلها ونتائج وتوصيات الخاصة بالبحث .	
2019	2019	ماجستير	12590635	6719	الشمري، عمر حسن جزاع.	الدور التربوي لبعض مواقع التواصل الاجتماعي لطلاب المرحلة المتوسطة بدولة الكويت في ضوء بعض المتغيرات الثقافية /	2019	تتناول الرسالة: (1477) تهدف الرسالة إلى التعرف على واقع الدور التربوي لبعض مواقع التواصل الاجتماعي لطلاب المرحلة المتوسطة بالكويت في ضوء بعض المتغيرات الثقافية التي تعوق تحقيق هذا الدور. استندت الدراسة على المنح الوصفي. اركزت الدراسة على عينة عشوائية من طلاب وطالبات المدارس المتوسطة التي تتبع المناطق التعليمية الاربعة وهي (العاصمة ، الفروانية ، الجھراء) وبلغ حجم العينة (1200) طالب وطالبة . وكانت نتائج الدراسة أن هناك دور تربوي لبعض مواقع التواصل الاجتماعي والتركيز على الدور الاجتماعي والتعليمي والدور الثقافي والدور السياسي والدور الصحي والبيئي وهناك بعض المعوقات التي تعوق تحقيق هذا الدور وأهمها بعض المواقع بالإعلان عن عملها وتعليماتها التربوية للطلاب بالإضافة إلى اعتماد الطلاب على الكتاب كمصدر وحيد للتعلم . وأوصت الدراسة بتفعيل الاستخدام التربوي لمواقع التواصل الاجتماعي وعقد دورات تدريبية للطلاب لتطوير مهاراتهم في توظيف الخدمات التعليمية التي تقدمها هذه المواقع والاستفادة منها في تحسين أدائهم ونشر الوعي لدى هؤلاء الطلاب بالاستخدام الأمثل لهذه المواقع .	
2019	2019	ماجستير	12590680	6720	حيدر، فاطمة محمد علوم.	دور المؤسسات التربوية في توعية طلاب المرحلة الثانوية بدولة الكويت بأضرار المخدرات :	2019	تتناول الرسالة: هدفت الرسالة إلى التعرف عى دور المؤسسات التربوية في توعية طلاب المرحلة الثانوية بدولة الكويت بأضرار المخدرات ولقد تكون مجتمع الدراسة من طلاب والمعلمين بمدارس المرحلة الثانوية بدولة الكويت ، ومنطقة الاحمدى دراسة ميدانية حيث بلغ اجمالي عدد المدارس بمنطقة الاحمدى 29 مدرسة موزعة مابين بنين وبنات ، وحيث بلغت عدد الطالبات 9502 طالبة بينما عدد الطلاب 8092 طال وبلغ اجمالي عدد المعلمين 3289 معلم ومعلمة وقد تم اختيار 12 مدرسة كعقد عشوائي لاختيار عينة الدراسة منها 6 مدارس للبنين و6 مدارس للبنات وهم من المرحلة الثانوية بمنطقة الاحمدى التعليمية وتم اختيار العينة عة طريق توزيع استمارات استبيان . أظهرت النتائج الميدانية للدراسة أن الأسرة لها دور في توعية الطلاب بأضرار المخدرات وبينت النتائج الميدانية للدراسة أن المدرسة لها دور في توعية الطلاب بأضرار المخدرات كما بينت النتائج أن وسائل الاعلام لها دور في توعية الطلاب بأضرار المخدرات كما أظهرت النتائج الميدانية للدراسة أن المؤسسات الأمنية والبنية لها دور في توعية الطلاب بأضرار المخدرات وهذا يؤكد أن استبيان الوعي دور المؤسسات التربوية في توعية طلاب المرحلة الثانوية بدولة الكويت بأضرار المخدرات من وجهة نظر الطلاب يتمتع بدرجة مرتفعة من الصدق والاتساق الداخلي .	
2019	2019	ماجستير	12591554	6721	توفيق، نهلة حسب النبي فؤاد.	بعض المتغيرات النفسية المرتبطة بقلق المستقبل لدى المراهقات الصم وفعالية برنامج إرشادي لتخفيفه /	2019	تتناول الرسالة:	
2019	2019	ماجستير	12591560	6722	توفيق، نهلة حسب النبي فؤاد.	بعض المتغيرات النفسية المرتبطة بقلق المستقبل لدى المراهقات الصم وفعالية برنامج إرشادي لتخفيفه /	2019	تتناول الرسالة: بعد الفلق من الانفصالات الإنسانية الاساسية وجزء طبيعي في كل أليات السلوك الانساني وهو يمثل أحد أهم الاضطرابات المؤثرة على صحة الفرد ومستقبله ، وإضافة إلى تأثيره على مجالات الحياة المختلفة . وقد أشارت رابابورت إلى أن أكثر مايثير الفلق لدى المراهقين والشباب هو المستقبل ، بل أن الشباب عندما يشعر بعدم وضوح أو عدم تحديد المستقبل فإنه يستشعر إحباطاً على ذاته وعلى مستقبله ووجوده ، كما يرى أن المستقبل هو مصدر الفلق بصورة كاملة . أن فقدان الأمل والتوقعات السلبية نحو المستقبل تكاد تكون حجر الزاوية أو العرض الجوهري لكثير من الاضطرابات النفسية . وإذا كانت دراسة قلق المستقبل لدى العاديين مسألة مهمة فإن أهمية دراستها تزداد لدى ذوي الاحتياجات الخاصة عموما والمعايقن سمعيا(الصم) على وجه الخصوص .	

							وقد أشار توفار إلى أن صدمة المستقبل مرض وإنه إذا لم تتخذ إجراءات واعية لمواجهة فيسجد ملايين الناس أنفسهم تحت وطأة العجز المتزايد عن التوافق مع بيئتهم . يمكن أن يكتسب قلق المستقبل معنا إيجابيا عندما يكون مستقبل الفرد مجالا خصبا للتخطيط ووضع الاهداف والسعي لادركها وذلك يصبح المستقبل ذو معنى إيجابي ودافعي ولكن الإنسان لا يكون واقفا دائما من تحقيق أهدافه بصورة مقاربة لتصوراته الحالية لمستقبله ولتقديره لما يمكن أن يأتي به الغد من أحداث مما يستدعى ضرورة العمل الإرشادي لمساعدة الشباب والمراهقين على خفض حدة قلق المستقبل لديهم وإكسابهم المهارات والمعارف التي تساعدهم على الثقة في ذواتهم وتنمي قدراتهم على مواجهة ما يمكن أن يأتي به المستقبل من أحداث . مشكلة الدارسة: يعد القلق بجميع صوره وأشكاله أحد المكونات الأساسية لكثير من آليات الفكر والسلوك الانساني ، وخاصة في مواقف التحدي والحلطات المعصرية المرتبطة بتحديد المستقبل أو اتخاذ القرارات الخاصة بالاختيارات المستقبلية المهمة في حياة الفرد .		
2019	6723	12591597	ماجستير	مصطفى، إيمان سيد ساعى	فاعلية برنامج مقترح قائم على استخدام نموذج التعلم البنائي فى تنمية بعض المفاهيم الموسيقية والتفكير	2019	تتناول الرسالة: الحديث فى السنوات الأخيرة عن استراتيجيات حديثة فى أدبيات التربية ومنها النظرية البنائية ، والنماذج القائمة عليها والتي تهتم بالمشاركة الفعالة من جانب المتعلم ، وينمط بناء المعرفة وطريقة اكتسابها ويعد نموذج التعلم البنائي أحد النماذج القائمة على الفلسفة البنائية والذي يؤكد على الدور النشط للمتعلم ، كما يؤكد المشاركة الفكرية الفعلية فى النشاط بحيث يحدث تعلم ذو معنى وقائم على الفهم . مشكلة البحث: اهتمت الباحثة بالمتعلم واستجابة لما نادى به الأبحاث والدراسات السابقة وكثير من الادبيات بضرورة البعد عن الطرق التقليدية واستبدالها فى التعليم والتعلم وجاءت فكرة هذا البحث بدراسة تأثير نموذج التعلم البنائي فى تدريس التربية الموسيقية على تنمية المفاهيم الموسيقية وأثرها على التفكير الابتكارى لدى تلاميذ الصف الأول الاعدادى. مما سبق نتحد مشكلة البحث فى ضعف بعض تلاميذ الصف الأول الاعدادى فى التحصيل الموسيقى والذي ترتب عليه قدرة التلاميذ على التفكير الابتكارى المناسب . اسئلة البحث: 1-كيف يتم بناء برنامج قائم على استخدام نموذج التعلم البنائي فى تنمية بعض المفاهيم الموسيقية والتفكير الابتكارى لدى تلاميذ الصف الأول الاعدادى . 2-ما فاعلية برنامج قائم على استخدام نموذج التعلم البنائي فى تنمية التفكير الابتكارى لدى تلاميذ الصف الأول الاعدادى . أهداف البحث: 1-معرفة استخدام نموذج التعلم البنائي فى تنمية بعض المفاهيم الموسيقية لدى تلاميذ الصف الأول الاعدادى . 2-معرفة استخدام نموذج التعلم البنائي فى تنمية التفكير الابتكارى لدى تلاميذ الصف الأول الاعدادى . 1-التأكيد بطريقة تجريبية قائمة على اصول البحث العلمى لكيفية استخدام نموذج التعلم البنائي فى مجال تدريس التربية الموسيقية . 2-يسهم البحث العلمى فى تنمية المفاهيم والتفكير الابتكارى لدى تلاميذ الصف الأول الاعدادى ، حيث أنهما من الاهداف الأساسية التى تسعى التربية الموسيقية الى تحقيقها وتنميتها . 3-يفيد البحث الحالى معلمى التربية الموسيقية فى تبني استراتجية مناسبة للتدريس ، يمكن أن تسهم فى تحقيق أهداف التربية الموسيقية فى هذه المرحلة . 4-محاولة للتغلب على أوجه القصور فى أساليب واستراتيجيات تدريس التربية الموسيقية المعتادة والشائعة فى المدارس . 5-خطويع نموذج التعلم البنائي فى تدريس التربية الموسيقية . 6-مواكبة تطلعات وأهداف وزارة التربية والتعليم فى تطبيق استراتيجيات التعليم الحديثة . كما تم اختيار تلاميذ الصف الأول الاعدادى لتأسيسهم فى بداية المرحلة يكون التلاميذ قادرون على اكتسابهم المفاهيم فى المراحل القادمة والحصول على تلميذ متميز فى المادة . كما أن المفاهيم الموسيقية مفاهيم مجردة يستطيع تلميذ هذه المرحلة اسيعاها أما فى المرحلة الاولى يجب أن تكون المفاهيم محسوسة حتى يمكن استيعابها . محددات البحث 1- المحدد البشرى 2- المحدد الموضوعي.		
2019	6724	12591613	ماجستير	ابراهيم ،امانى عبدالشهيدي سعيد.	اسلوب سيد مكاوى فى التعبير عن كلمات فؤاد حداد من خلال البرنامج الاذاعى :	2019	تتناول الرسالة :- تتكون من أربعة فصول مقسمة كالآتي:- *-المبحث الأول: اشتمل على مقدمة البحث ومشكلة البحث وأسئلة البحث وأهداف البحث ،ومنهج البحث وعينة البحث *-المبحث الثانى: اشتمل على الدراسات السابقة المرتبطة بموضوع البحث. الفصل الثانى: يتكون من ثلاث مباحث : المبحث الأول: الاداعة المصرية ونشأتها وإرتباطها بالموسيقى. المبحث الثانى: القوالب الغنائية وصياغتها . المبحث الثالث: السيرة الذاتية لسيد مكاوى ، والسيرة الذاتية لفؤاد حداد . الفصل الثالث: الإطار التطبيقي: واشتمل هذا الفصل على العينة المختارة للبحث وهى تدوين وتحليل وتعبير سيد مكاوى لكلمات فؤاد حداد . الفصل الرابع:- اشتمل عذا البحث : على الاجابة على تساؤلات البحث ونتائجه ، والتوصيات والمقترحات ، مراجع البحث،وملخصات البحث بالعربى والانجليزى .		
2019	6725	12591628	ماجستير	محمد، صلاح عبدالفضيل محمد.	فعالية برنامج إرشادى انتقائى فى خفض التعصب القبلى لدى تلاميذ المرحلة الاعادية /	2019	تتناول الرسالة:-الدراسة الى اعداد برنامج ارشادى انتقائى فى خفض التعصب القبلى لدى تلاميذ المرحلة الاعادية واستخدمت الدراسة عينة قوامها(30) تلميذا من تلاميذ المرحلة الاعادية الاكثر تعصبا الذين تتراوح اعمارهم ما بين (13-16) سنة طبق عليهم الباحث مقياس التعصب القبلى (اعداد الباحث) وبرنامج ارشادى انتقائى لخفض التعصب القبلى (اعداد الباحث) وأسفرت النتائج عن تواجد فروق ذات دلالة احصائية بين متوسطات درجات العينة التجريبية على القياسين القبلى والبعدى، وأيضا عدم فروق دالة احصائية بين متوسطات درجات أفراد المجموعة التجريبية فى القياسين البعدى والتتبعي بعد شهرين من تطبيق البرنامج . الكلمات المفتاحية:- أ-الارشاد الانتقائى ب-التعصب ج-التعصب القبلى		
2019	6726	12591636	ماجستير	أيوندا، مها صبحى هاشم حسن.	فاعلية برنامج مقترح على ضوء بعض المستحدثات التكنولوجية لتنمية الكفايات التدريسية لدى معلمى الرياضيات بالمرحلة الابتدائية /	2019	تتناول الرسالة:- مشكلة الدراسة: وجود قصور فى الكفايات التدريسية لدى معلمى الرياضيات بالمرحلة الابتدائية.		

						الهدف من الدراسة : معرفة فاعلية برنامج مقترح على ضوء بعض المستحدثات التكنولوجية لتنمية الفايات التدريبية لدى معلمى رياضيات المرحلة الابتدائية . إجراءات الدراسة : تحددت إجراءات الدراسة فى جانبين أحدهما نظرى والأخر تجربى وتتوالى الجانب النظرى الاطلاع على بعض المصادر المعرفية التى تناولت كلا من الكفايات التدريبية والمستحدثات التكنولوجية ، أما الجانب التجريبى فقد تضمن إعداد المواد التعليمية وتشمل على (البرنامج القائم على ضوء المستحدثات التكنولوجية دليل المعلم) وإعداد أدوات القياس الضابطة والتجريبية ثم تم تطبيق تجربة الدراسة على كل من المجموعة الضابطة والتجريبية ثم تم تطبيق تجربة الدراسة على المجموعة الضابطة فقط ، ثم التطبيق البعدي لأدوات القياس على كل من المجموعة الضابطة والتجريبية . نتائج البحث: أشارت نتائج الدراسة إلى التحقق من صحة الفروض وإلى فاعلية برنامج على ضوء بعض المستحدثات التكنولوجية فى تنمية بعض الكفايات التدريبية لدى معلمى المجموعة التجريبية من معلمى الرياضيات بالمرحلة الابتدائية حيث وجدت فروق ذات دلالة إحصائية بين متوسطات درجات المعلمين فى الاختبار التحصيلي فى التطبيقين القبلي والبعدي لصالح التطبيق البعدي وكذلك بطاقة الملاحظة .		
2019	2019	أحمد، عادل نجار عبداللطيف.	استخدام نموذج دورة التعلم المعدلة لتنمية التحصيل ومهارات التفكير الإبداعى فى الهندسة لدى طلاب الصف الأول الثانوي /	12591658	6727	تتناول الرسالة:هدفت الدراسة إلى تنمية التحصيل ومهارات التفكير الإبداعى فى الهندسة لدى طلاب الصف الأول الثانوي من خلال استخدام نموذج دورة التعلم المعدلة ، وقد استخدم التصميم التجريبى ذى المجموعتين المتكافئتين ذات التطبيقين القبلي والبعدي حيث تكونت مجموعة الدراسة من (74) طالة من طالبات الصف الأول الثانوي ، وتم تقسيمهن إلى مجموعتين التجريبية والتجريبية واشتملت على (36) طالبة والضابطة واشتملت على (38) طالبة وتم تطبيق أدوات الدراسة قليلا وبعديا . حاولت الدراسة التحقق من صحة الفروض التالية : 1-يوجد فرق ذو دلالة إحصائية بين متوسطى درجات المجموعتين التجريبية والضابطة فى التطبيق البعدي لاختبار مهارات التفكير الإبداعى فى الهندسة لصالح طلاب المجموعة التجريبية . 2-يوجد فرق ذو دلالة إحصائية بين متوسطى درجات المجموعتين التجريبية والضابطة فى التطبيق البعدي لاختبار التفكير الإبداعى فى الهندسة لصالح طلاب المجموعة التجريبية . 3-لا توجد علاقة ارتباطية بين التحصيل فى الهندسة ، واختبار القياس نمو مهارات التفكير الإبداعى فى الهندسة . توصلت الدراسة الدراسة إلى النتائج التالية : *- يوجد فرق دال إحصائيا (عند مستوى 0.01) بين متوسطى درجات طلاب المجموعة التجريبية والمجموعة الضابطة فى التطبيق البعدي لاختبار التحصيل فى الهندسة لصالح طلاب المجموعة التجريبية . *- يوجد فرق دال إحصائيا (0.01) بين متوسطى درجات طلاب المجموعة التجريبية والمجموعة الضابطة فى التطبيق البعدي لاختبار مهارات التفكير الإبداعى فى الهندسة لصالح طلاب المجموعة التجريبية . *- توجد علاقة ارتباطية موجبة دالة إحصائيا (عند مستوى 0.01) بين درجات طلاب المجموعة التجريبية فى التطبيق البعدي الاختبار التحصيل فى الهندسة وبين درجاتهم فى التطبيق البعدي لاختبار مهارات التفكير الإبداعى فى الهندسة .		
2019	2019	ناروز، نولاجى تلوضروس راسم.	دراسة مقارنة للنظريات الموسيقية بين مخطوطي الادوار والرسالة الشرفية لصفي الدين الارموى ودی الاستفادة منهما في تدريس الموسيقى العربية /	12591669	6728	تتناول الرسالة:- تعد المخطوطات الموسيقية نتاج فكر وعلم الفلاسفة والعلماء بالحضارة الاسلامية قبل ظهور الطباعة حيث تمثل هذه المخطوطات حلقة بين تراث الماضي الذى يبنى عليه تراث الحاضر لكي يتشكل المستقبل كما يعد المخطوط كتاب أو جزء من كتاب يمثل جانباً هاماً من تراث البشرية ويكون مكتوباً بخط اليد على الجلد "الرق أو الاديم" أى الجلد المدبوغ أو "الخاق" أى الحجر الرقيق أو أوراق البردى والذى انتقلت صناعته أخيراً الى العرب وذلك قبل نشأة الطباعة بالحروف العربية منذ مئتي عام تقريباً . المخطوط من حيث الشكل مجموعة أوراق تكون مضمونة أو منفصلة أو على شكل لفائف اسطوانية طولها 53سم وعرضها 20سم وأغلب الاحيان لاتكون الصفحات مرقمة ويختلف نوع المداد من مخطوط لآخر (نبيل شورة) وهذا كثير من العلماء الذين اهتمو بتتوين المخطوطات وتسجيلها في أكثر من علم (الفلك-الطب-العلوم-الهندسة-الموسيقى) وغيرها من العلوم المختلفة ومن هؤلاء العلماء(الكندى-الفارابي-ابن سينا-إخوان الصفا-الارموى) ويعد صفى الدين عبدالمؤمن بن يوسف بن فاخر الارموى البغدادي الموسيقار الشاعر الاديب الخطاط من أشهر والمع الموسيقيين في أواخر الدولة العباسية وأوائل العهد الممولى وولد تقريبا في(613-1216م) في أرميه إحدى مدن أذربيجان وأقدم إلى بغداد أيام المستعصم بالله وكان للارموى معرفة كبيرة بساتر العلوم ولكن نبوغه وإبداعه كان في الموسيقى وعلومها حيث استحدث سلماً موسيقياً عربياً مكونة من 18 نفمة و17 وبعد قسم البعد الطليني إلى ثلاثة أبعاد محصورة بين 4 نعمات ويعمل مخطوط الرسالة الشرفية في النسب التأليفية وكتاب الادوار في الموسيقى الذى الفه صفى الدين الارموى من أهم مصنفاته في الموسيقى حيث ألف مخطوط الرسالة الشرفية لشرف الدين.		
2019	2019	زكى، أميرة عبدالناصر محمود .	برنامج مقترح لتنمية وعى تلاميذ المرحلة الاعداية ببعض أساليب موسيقى الجاز من خلال الانشطة الموسيقية /	12591690	6729	تتناول الرسالة:- الموسيقى فن من الفنون التى يعتمد عليها المجتمع فى تهيئة النفوس، ومع نهاية القرن التاسع عشر وبداية القرن العشرين ظهر اسلوب جديد من الموسيقى نبع في أمريكا الشمالية وانتشر بسرعة في جميع أنحاء العالم تقريبا وهو ما يصطلح عليه بالجاز . وموسيقى الجاز عبارة عن تراكيب مصاغة في عناصر لحنية وإيقاعية مأخوذة من موسيقى الزنوج الشعبية هذا بالإضافة إلى خصائص الموسيقى الأوروبية في الهارمونية والبولي فونية بأسلوبهما المتميز في البناء والتركيب اللحنى كما يعد الجاز فن يعتمد على من يقنمه ، وقد تطور بسرعة مذهلة عن طريق التبادل الحلاق للاعقاب بين عازفي(عواطف عبدالكريم وآخرون) وحيث أن الموسيقى أساس التربية الجمالية والثقافية التى لا يمكن اهمالها أو تجاهلها في بناء الشخصية فانه يمكن القول أن ما يسمى بالتثنية الموسيقية يمتد الى مختلف جوانب السلوك الانساني ونظرا لان مرحلة المراهقة هي مرحلة اقتراب الفرد من النضوج الجسماني والعقلي والاجتماعي والنفسى كما أنها من المراحل العمرية التى تواجه بعض التحديات مثل الحصبة وحدة التعامل والتمرد وفردية الراى والصراع الداخلى ، لذا يجب استثمار الأبناء والطلاب فيما هو نافع لهم. كما تعد الانشطة الموسيقية من أكثر الاساليب التى تلعب دورا اساسيا في بناء شخصية التلميذ منذ مرحلة الطفولة المبكرة ولانها تعد من أهم وسائل التربية الحديثة وجدت الحاجة انه يمكن الاستفادة من الانشطة فى تحقيق أهداف البحث .		
2019	2019	أبوالمجد، هاجر عبدالجواد عوض الله.	أثر استخدام إستراتيجية التعليم المدمج على تنمية بعض مهارات العزف على الآلات الموسيقية التربوية لدى تلاميذ المرحلة الابتدائية /	12591700	6730	تتناول الرسالة: هدف البحث الحالي إلى التعرف على أثر استخدام إستراتيجية التعليم المدمج في تنمية بعض مهارات العزف على الآلات الموسيقية لدى تلاميذ الابتدائية . وقد ظهرت الحاجة إلى تطبيق هذا البحث إلى وجود ضعف في مهارات العزف على الآلات الموسيقية التربوية لدى تلاميذ المرحلة الابتدائية لذلك استخدمت الباحثة إستراتيجية التعليم المدمج لمواكبة العصر الحالي من تطورات تكنولوجية تغيد في معالجة القصور في الجانب المهارى لديهم . واستنادا لما سبق فن مشكلة البحث تبلورت في : وجود قصور لدى تلاميذ المرحلة الابتدائية في تنمية بعض مهارات العزف على الآلات الموسيقية التربوية . وقد حاول البحث الحالي الاجابة عن أسئلة البحث :

2018		تتناول الرسالة:- هدفت الدراسة الحالية إلى محاولة خفض حدة التئمر المدرسى لدى المراهقين المعاقين سمعيا من خلال اعداد وتطبيق برنامج ارشادى سلوكى واختيار فاعلية هذا البرنامج في تحقيق أهدافه والتعرف على مدى استمرار اثره خلال فترة المتابعة وذلك على عينة الطلاب المراهقين المعاقين سمعيا حيث بلغ عدد العينة (7) طلاب بنين بنات من مدرسة الامل للصف في محافظة البحر الاحمر مدينة الغردقة ، طبق عليهم مجموعة أدوات هي مقياس التئمر المدرسى للمعاقين سمعيا والبرنامج الإرشادى السلوكى المعد في الدراسة الحالية وكانت من أهم نتائج الدراسة أن هناك فروقا ذات دلالة احصائية عند مستوى(0.01) بين متوسطات رتب درجات أفراد المجموعة التجريبية في القياسين القبلى والبعدى على مقياس التئمر المدرسى للمعاقين سمعيا لصالح القياس البعدى ، كما أنه لا توجد فروق احصائية بين متوسطات رتب درجات أفراد المجموعة التجريبية في القياسين البعدى والتئمرى على مقياس التئمر المدرسى للمعاقين سمعيا وذلك دلالة على ثبات فاعلية البرنامج في خفض التئمر لدى عينة الدراسة .	2018				محمد، سلمى محمد السيد.	فعالية برنامج إرشادى سلوكى في خفض حدة التئمر المدرسى لدى المراهقين المعاقين سمعيا /	ماجستير	12595043	6744				
2019		تتناول الرسالة :- هدف البحث:- التعرف على فاعلية استخدام تقنية الانفوجرافيك في تنمية عادات العقل واكتساب المفاهيم العلمية لدى تلاميذ الصف الخامس بالمرحلة الابتدائية بدولة الكويت وتتحصر مشكلة البحث في ضعف مستوى عادات العقل وضعف مستوى اكتساب المفاهيم مما يتطلب طرق تدريس حديثة لتنميتها ويستلزم ذلك الاجابة على التساؤلات التالية : 1-ما فاعلية استخدام تقنية الانفوجرافيك في تنمية عادات العقل لدى تلاميذ الصف الخامس بالمرحلة الابتدائية بدولة الكويت ؟ 2-ما العلاقة الارتباطية بين درجات أفراد المجموعة التجريبية على اختبار عادات العقل ودرجاتهم على اختبار المفاهيم العلمية بعد التطبيق ؟ واسخدم البحث الحالي أدوات تمثلت في مقياس عادات العقل واختبار المفاهيم العلمية وقد اتبع الباحث المنهج التجريبي من خلال تطبيق تدريس وحدة (اجهزة الجسم الانسان) باستخدام تقنية الانفوجرافيك وتكونت مجموعة البحث من (90) تلميذة من تلاميذ الصف الخامس الابتدائى بدولة الكويت موزعة بالتساوى على مجموعتين تجريبية وضابطة وتوصلت النتائج الى : 1-توجد فروق ذات دلالة احصائية بين متوسطات درجات طلاب المجموعة التجريبية ومتوسطات درجات افراد المجموعة الضابطه في القياس البعدى لمقياس عادات العقل (الابعاد-الدرجة-الكالفة) بعد التطبيق لصالح أفراد المجموعة التجريبية . 2-توجد فروق ذات دلالة احصائية بين متوسطات درجات المجموعة التجريبية ومتوسطات درجات افراد المجموعة	2019				المجمي، مها فهد محمد.	فاعلية استخدام تقنية الانفوجرافيك في تنمية العقل واكتساب المفاهيم العلمية لدى تلاميذ المرحلة الابتدائية بدولة الكويت /	ماجستير	12595056	6745				
2018		تتناول الرسالة: يهدف هذا البحث إلى تطوير أداء مديري مدارس المرحلة الابتدائية بدولة الكويت في ضوء مدخل الحوكمة الالكترونية ، من خلال التعرف على الانوار الادارية المطلوبة من مديري مدارس المرحلة الابتدائية ومعرفة مدى ممارسة مديري مدارس المرحلة الابتدائية لادوار المطلوبة منه من وجهة نظر المعلمين والمندراء ومعرفة دور تطبيق الحوكمة الالكترونية في تطوير أداء مديري مدارس المرحلة الابتدائية بدولة الكويت ووضع مقترحات وتوصيات لتطوير أداء مديري مدارس المرحلة الابتدائية	2018				العزى، نوال مطلق .	تطوير أداء مديري مدارس المرحلة الابتدائية بدولة الكويت في ضوء مدخل الحوكمة الالكترونية /	ماجستير	12595354	6746				

							ولقد استخدمت الباحثة المنهج الوصفي التحليلي وفي ضوء هذا المنهج قامت استبانة بالادوار الادارية المطلوبة من الادارة المدرسية في ضوء مدخل الحوكمة الالكترونية وتم تطبيق الاستبانة بعد التأكد من صدقها وثباتها على عينة من المعلمين والمدرسين بلغت(361) معلما ومديرا واستخدمت الباحثة الاساليب الاحصائية المناسبة لتحليل النتائج وتفسيرها ولقد توصلت الدراسة الى أن الادارة المدرسية تمارس جميع مجالات دوره الاداري بدرجة متوسطة وانه لا توجد فروق ذات دلالة احصائية .			
2019	2019	تتناول الرسالة :- وضع تصور مقترح لتلبية الاحتياجات التدريبية اللازمة لمديري المدارس المتوسطة بدولة الكويت في ضوء اقتصاد المعرفة ، ولتحقيق ذلك اعتمدت الدراسة على المنهج الوصفي وتكونت أدوات الدراسة من دراسة استطلاعية واستبيان عن واقع امتلاك مديري مدارس المرحلة المتوسطة للكفايات اللازمة في ضوء اقتصاد المعرفة من وجهة نظرهم وبلغت العينة (120) مديرا ومديرة مع مقابلة شخصية مغلقة ومفتوحة مع (16) مديرا ومديرة للتعرف على أساليب ومعوقات تحديد هذه الاحتياجات . وتوصلت الدراسة إلى النتائج التالية : 1-إن متوسط الكلي لاستبيان اقتصاد المعرفة كان متوسطا وقد بلغ (2.78) وقد جاء في الترتيب الاول محور توليد المعرفة بمستوى متوسط (2.98) وتلاه محور نشر المعرفة بمستوى متوسط(2.96) ثم محور توظيف المعرفة بمستوى منخفض (2.41) . 2-عدم وجود فروق ذات دلالة احصائية تبعا للنوع الاجتماعي بين المديرين والمديرات في كل من الدرجة الكلية لاستبيان ومحاورة الفرعية. وكانت أبرز التوصيات متمثلة في : 1- عقد ندوات توعوية لاطلاع المديرين علي كل ما هو جديد في مجال اقتصاد المعرفة. 2-عمل دورات تدريبية لتطوير مختلف الكفايات اللازمة لانتاج ونشر توظيف المعرفة . 3-استحداث لجان مسئولة عن اعداد البرامج التدريبية ومختصين بعملية تنمية المهارات اللازمة لمديري المدارس في هذا المجال . 4-منح صلاحيات أكثر للمدراء في اختيار التي يرون أنهم في حاجة اليها من وجهة نظرهم والنظر لهذا الامر بعين الاعتبار.	الطيطري، مريم محسن إبراهيم. الاحتياجات التدريبية لمديري مدارس المرحلة المتوسطة بدولة الكويت في ضوء اقتصاد المعرفة /	ماجستير	12595355	6747

6766	12608696	دكتوراه	Efficiency Of Some New Insecticides Against Certain Insect Pests Of Family Acrididae /	Rabie , Osama Mahmoud Moustafa		Egypt : 2019 .		Locust and grasshoppers are members of family Acrididae (order Orthoptera) to which hundrers of insect pests belonging.	Dr. Mahmoud Mohammed Mahmoud Soliman , Dr. Kareem Mohammed Mohannny , Dr. Tharawat Abdel-Monaim Abdel-Fattah .	#####

							Locusts are destructive pests to crops and pasture throughout the world. These insects were mentioned in the Bible to current media reports and the locust plagues attract public attention in a way that no other insects do (Lomer et al. 2001). Locusts were also mentioned in Qran. They are the most vicious due to their ability to consume the farm crops and grasslands. A swarm of locusts can contain 50 million adult insect per square kilometer which can consume 100 tons of vegetation per day (COPR, 1982). Locust swarms are capable of migrating over long distances transferring the risk from a country or a continent to the other. They are different from grasshoppers with their ability to change their phase from solitary to gregarious insects with associated changes in morphology, physiology and behaviour (Uvarov, 1977). The Desert Locust <i>Schistocerca gregaria</i> (Forsk.) invades Egypt during the winter breeding season and can breed if the conditions are favorable, and the resulted breeding can migrate inside and attack the farmed crops in the Nile valley. The African migratory locust, <i>L. migratoria migratorioides</i> (Reiche & Fairmaire) has become a major pest to the farmed crops in the western desert of Egypt, mainly in the large land reclamation projects of Sharq El-Oeinat and Toshka. It caused destructive outbreaks both in frequency and scale in Egypt during the recent years, possibly due to the expansion of the land reclamation projects which offered preferred conditions for breeding. Currently, chemical control using the organophosphate carbamate and synthetic pyrethroid pesticides is still the main instrument to control locusts successfully, while organochlorines were banned due to their persistence and severe effects on the environment (Lecoq et al. 2001). The widespread use of the synthetic pesticides has considerable negatives such as handling hazards, development of insect resistance to insecticides, increased costs, concerns about insecticide residues, and great threats to both human and environmental health (Garriga and Caballero, 2011), which occurs due to pollution by chemical pesticides such as toxicity to non-target organisms (Tingle, 1996) and humans (Pretty, 1996). Unlike other agricultural pest control, locust control operations differ in their nature and scale, which makes the operators under great risk of pesticide exposure, as they work from sunset to the early morning. Therefore, there is a necessity to find safe and environmental friendly alternative insecticides with reduced risk. Many trials were conducted around the world to find safe alternatives for the conventional insecticides. Assess the toxicity of various concentrations of chlorantraniliprole, spinosad and fipronil on the 5th nymphal instars and adults of <i>S. gregaria</i> and <i>L. m. migratorioides</i>. - Compare the sensitivity of <i>S. gregaria</i> and <i>Locusta m. migratorioides</i> to the tested insecticides.		
6767	12608955	دكتوراه	Studies On The Infestation Of Honey Bee Colonies With Wax Moths In Qena Region /	Abd-Elnam, Mostafa Seddik Ahmed		Egypt : 2019 .	The Present work was Carried Out For Three Successive Years (2015 to 2017) For Surveying and Controlling Of Greater Wax Moth, <i>Galleria mellonella</i> L Under Quna Governorate. Results Indicate That The Populations Of Larvae And Pupae Of Wax moth during 2016 and 2017 were Concentrated in the Period from June to December. Following a near normal distribution, The Population increased gradually till reaching its peak at September (13.2 and 17.40 in 2016 and 14.20 in 2017) for larvae and pupae, respectively, then decreased gradually till the end of the year. For adult moth, the average number of moths attracted to the different types of traps increased gradually from June till reaching the peak at October, then it decreased gradually till the end of the year. The attracted wax moth to the light traps increased by decreasing the distance of the traps from the colonies, where for the 1st row of light traps (at 5 meter distance from the apiary), the average numbers of wax moth gathered by the different types of traps were as follows: 9071, 6.09, 5.33, 3.57 and 2.28 moth /trap for red, blue, green, white and yellow color traps, respectively. There were significant differences among different types of traps. For the 2nd row of light traps (at 10 meter distance from the apiary), the efficiency of the different types of traps were similar to that of the 1st row, but with moderate numbers. The average numbers of wax moth were: 6.57, 4.80, 3.71, 2.67 and 1.38 moths/trap, respectively. For the 3rd row of light traps (at 15 meter distance from the apiary), the efficiency of the different types of traps were similar to that of the 1st and 2nd rows but with lower numbers. The average numbers of wax moth were: 2.28, 1.71, 1.29, 0.95 and 0.52 moths/trap, respectively. The average number of moth attracted to the different types of traps peaked (11.06 moths / trap for the 1st row, 7.87 moths / trap for the 2nd row and 2.73 moths / trap for the 3rd row) in October. The diet of old bees-wax + pollen, among the different types of bees-wax, represented the most important, where it enhanced the characteristics of wax moth (larval length, larval and pupal weights, larval and pupal periods, adult longevity) as well as food consumption. For biological control agents, the larval mortality % of greater wax moth fed bees-wax treated with different concentrations of, <i>Bacillus thuringiensis</i>, <i>Beauveria bassiana</i>, <i>Meteorus anisopliae</i> and <i>paecilomyces</i>. <i>carneus</i>, increased with increasing each of exposure time and the concentrations, <i>p. carneus</i> and <i>B. thuringiensis</i> were the most important. The highest slope value was 2.93 for <i>p. carneus</i> followed with 2.56, for <i>B.thuringiensis</i>. For pupation and adult	#####	Prof. Dr. Mahmoud Mohammed Mahmoud Soliman , Prof. Dr. Karem Mohammed Mohannay , Prof. Dr. Hamdy Metwally Mansour .

6772	12609924	ماجستير	لوحات الأفراد الجنائزية في عصر الأسرة التاسعة عشر دراسة لغوية حضارية.	تأليف: سعد: أبو بكر عبدالسلام مصطفى. (د.ن).	قنا.	2005	المخلص العربي: حملت هذه الدراسة عنوان" اللوحات الجنائزية في عصر الأسرة التاسعة عشر" وذلك لأهمية دراسة تلك اللوحات لما تحتويه من معتقدات المصري القديم وتطورها دينيا وقيما، وتتناول مقدمو وثلاث فصول وخاتمة وقائمة لمراجع عربية واجنبية وملخص لوحات ، فالمقدمة تحتوي علي تعريف للوحات ونشأتها وتطورها منذ العصور الأولى حتي عصر الدولة الحديثةأنوارواعها ومحتوياتها من زخارف. واحتوي الفصل الأول علي مصادر اللوحات التي جمعن وعددها 54 لوحة، مع ذكر تعرف كل لوحة وإسم صاحبها وإبعادها ومادة صنعها وموقعها الأصلي والمكان الذي توجد فيه حاليا ومآلها من مناظر. واحتوي الفصل الثانية علي: دراسة تحليلية للوات من حيث أشكالها المختلفة والرموز التي سجلت علي قممها، وتحليل المناظر التي صورت علي أسطح هذه اللوحات من طرز شعر وملابس والمقاعد وموائد القرايين. واحتوي الفصل الثالث علي: دراسة اللغوية للصيغ التي وردت بالمناظر علي اللوحات من صيغ تعبد وتقديم قرايين وإستفادة المتوفي من تلك القرايين وإقامة بعض الطقوس أقب المتوفي المختلفة ووردت علي اللوحات مع ذكر طرق كتابة الصيغ وأجزائها وآلية الصيغ. ثم الخاتمة التي وردت بها أهم النتائج التي توصلت اليها الدراسة في مؤتمتها وفصولها الثلاثة. ABSTRACT: this study entitled " Private funerary stelae of the Nineteenth Dynasty, denote to the artitic and historical values of such stelae, that help understanding the ancient egyptian beliefs and the development of religious and artistic rituals. Chapter one: The original sources of stelae, this chapter includes a collection of 54 stelae,definition of each stelae, indentification of its owner,dimension, matrial, original location and the site where it is now located. Chapter two: this chapter deals wih a comprehensive analysis of the stelae according to their shapes, symbols attached to their tops, signets and figures, tackling the different hair, clth, styles, and seat and offering tables. Chapter three: This chapter studies the different formulae used in writing the stelae texts, which are: Adore ship and offering, it also deals the gods of the formula, their attributes and names, kinds of offering which the the dead wishes, and finally studying other idioms and expressions of adore ship and the offerings; and the different titles of the dead ones.	إشراف: د/ منصور النوبي منصور، د/ احمد علي محمد الأنصاري.

اهداف البحث :	2019	قنا:	جامعة جنوب الوادي،	عمر!هدى عبدالوهاب خضرى.	تصميم بيئة تعلم الكترونية تفاعلية قائمة على تطبيقات الويب (2,0) واثرها فى تنمية مهارات انتاج تطبيقات تقنية اسكرين كاست لدى طلاب تكنولوجيا التعليم والانخراط فى التعلم/	ماجستير	12611605	6787
هدف البحث هدف البحث الى علاج ضعف التحصيل ودافعية الانجاز لدى التلاميذ منخفضى المثابرة الاكاديمية وذلك من خلال تنفيذ مهام الويب الفردى /التعاونى القائم على تطبيقات الويب 2.0 اهمية البحث قد تمهين نتائج البحث فى تعزيز الافادة من امكانيات معام الويب فى تذليل الصعوبات التى تواجه طلاب المرحلة الاعادية- قد تفيد نتائج هذا البحث فى تزويد المعلمين باستراتيجيات وانماط وادوات لتنفيذ مهام الويب ذات تاثير فعال فى تحسين- يغيد هذا البحث فى توفير المعالجة الملائمة لاستعدادات المتعلمين بهدف تحقيق الاهداف التعليمية الى اقصى حد ممكن - يمكن لهذا البحث ان يعمل على تحسين تعلم مادة الحاسب الالى وذلك بالتعرف على بعض الاستراتيجيات المناسبة- كاستراتيجية مهام الويب اثره الفوائد الادبى المتعلق بالمثابرة الاكاديمية-5	2019	قنا:	جامعة جنوب الوادي،	على!يمان يوسف سلامه.	اثر اختلاف نمطى مهام الويب (الفردى/ التعاونى)القائم على تطبيقات الويب 2,0 على الدافعية للانجاز والتحصيل لدى تلاميذ المرحلة الاعادية منخفضى المثابرة الاكاديمية/	ماجستير	12611611	6788

د/ بركات سعيد محمد عثمان د/ رشا فوزى احمد عبدالرحيم	مشكلة البحث: التقليد مظهر الثبات وعدم الحركة بينما الابتكار مظهر الحيوية والنشاط ونحن لا نتصور كيف تكون الحياة لو سارت على وتيرة واحدة وان ما بها يرى على صورة مماثلة انها بلا شك تصبح حياة رتيبة مقفّرة او على الاقل تصبح حياة تفتت بريقتها وحيويتها. واستخدام عنصر اومفرادات جديدة فى التكوين الزخرفى رغم كونها من التراث الشعبي يمكن ان تثرى هذا الجانب من التصميمات الزخرفية. ولكن لماذا اختارت الباحثة الشكل الخارجى لفخاريات قنا القلعة-البلاص-الزير.لنكون العنصر او الوحدة التى يمكن اخضاعها لنظم التكرار لاستحداث تكوينات زخرفية لذا نتمنى الدراسة الحالية الى استخدام اشكال فخاريات قنا وهى القلعة-البلاص-الزير.كمفردات تشكيلية يمكن ان تثرى التكوينات الزخرفية من خلال نظم التكرار واستحداث محاور وحلول تشكيلية جديدة للتكوين الزخرفى وذلك باستخدام الحاسب الالى وهذ يثرى الفكر الابتكارى والذى بدوره يثرى التكوين الزخرفى. وهذا ما نتمنى اليه الباحثة فى تجربة البحث وذلك باستغلال ما تتمتع به الخطوط الخارجية لفخاريات قنا من ثقافة فنية اصلية يمكنها من ابتكار تكوينات زخرفية مستحدثة بعيدة كل البعد عن انماط التقليد. وعليه يمكن صياغة مشكلة البحث فى السؤال التالى: كيف يمكن الاستفادة من الشكل الخارجى لفخاريات قنا كمفردات ذخرفية فى بناء تكوينات زخرفية مستحدثة وباستخدام-1 فروض البحث: هناك علاقة ايجابية بين استخدام الشكل الخارجى لفخاريات قنا كعنصر فى نظم التكرار وبين استحداث تكوينات زخرفية باستخدام الحاسب الالى. اهداف البحث: يهدف البحث الى: اثراء التكوين الزخرفى من خلال الاستفادة من الشكل الخارجى لفخاريات قنا كمفردات زخرفية فى بناء تكوينات زخرفية مستحدثة وباستخدام الحاسب الالى.	2019	قنا:	جامعة جنوب الوادى،	احمد اسماء احمد فؤاد.	شكل فخاريات قنا كمدخل لاثراء التكوينات الزخرفية باستخدام الحاسب الالى/	ماجستير	12611624	6789
د/ زينب محمد احمد امين د.م.د/ نجلاء محمد فارس د/ سحر محمد السيد د/ طلعت عبدالمتعالم حسن شحاته	مقدمة البحث فى ظل عصر التثقفات العلمية والتكنولوجيا فالتقة السرعة اصبح من الضروري تزويد الفرد بالمبادئ والمعارف التى تعينه على فهم مفردات حياته التى يعيشها وترسيخ هذه المبادئ فى بنية الفرد المعرفية كي لا يكون عرضه للزوال السريع نتيجة لذلك اصبح تعليم واكتساب المعلومات عملية اساسية ومهمة وظهرت فى الآونة الاخيرة الكثير من الكتب الالكترونية التعليمية سواء المقدمة للطلاب والاكاديمين فى محاولة منهم لمواكبة التقدم الحادث فى الجامعات الالكترونية او لناشرين يحاولون تلبية الطلب المتزايد على المصادر التعليمية التى يكن الوصول اليها فى اى وقت وفى اى مكان وتتضمن معلومات ووسائط متعددة وروابط النص الفائق واليات البحث فى العصر الحديث الكتاب الالكترونى عبارة عن مجموعة من الصفحات التفاعلية النشطة قائمة التشعيب والمتاحة عبر اى وسيط الكترونى تحتوي على عناصر الوسائط المتعددة المثيرة للانتباه وبدلا من تقديم صفحات يقرأها المتعلم فى بيئة تفاعلية فانه من الممكن تزويد الطلاب بكتب الكترونى يحتوى على سلسلة من الروابط قائمة التشعب لينتج خلالها دعم البناء المعرفى بدلا من نقل المعرفة.	2019	قنا:	جامعة جنوب الوادى،	سليمان اهدى محمد احمد.	اثر استخدام الروابط الفائقة والتلميحات البصرية فى الكتاب الالكترونى على تنمية بعض مهارات البحث العلمى لدى طلاب المرحلة الثانوية/	ماجستير	12611632	6790
د.م.د/ فاطمة الزهراء كمال احمد رشوان د/ اكرام فاروق احمد الشايطر.	خلفية البحث تعد النوبة كنز دفين رغم ماتحتضى به المكتبة العربية من ابحاث الفتح اضواها على مختلف نواحي الحياة بهذا الاقليم قديما وحديثا ورغم السبق والدور المهم للعلماء والباحثين والاثريين الأجانب فالنوبة ارض مصرية وتاريخ مصري واكتشافنا للنوبة هو تعميق وكشف للروح المصرية فى تجلياتها المتنوعة والثرية ثراء ارض وتاريخ مصر وفى ظل انفصال العمارة اليوم عن تراثها واختفاء الكثير من المعانى والقيم الاجتماعية وغيرها من الموروثات وفى ظل ما يتعرض له المحتوى التراثى اليوم بوجه عام والتراث المعمارى النوبى بوجه خاص من عوامل عدة أدت الى تناقصه واندثاره تدريجيا كان هذا حافزا لدى الباحث للدراسة البحثية كمحاولة للحفاظ على التراث النوبى من الاندثار والضعف حدود البحث اقتصر البحث الحالي على : الدراسة التحليلية لعناصر العمارة النوبية فى منطقة النوبة المصرية فى الفترة السابقة للتجهيز وحتى وقت اجراء الدراسة -1 لمنطقى الكنوز (المتوكية) والفاديجا عينة عسوانية ممثلة من طلاب الصف الثانى الاعداى عددهم (20)طالب مجموعة واحدة مدرسة قسطل الإعدادية-2 المشتركة العام الدراسى 2019/2018م -الخامات والادوات المستخدمة فى البحث (أوراق فيريانو 20*30-الوان خشب وفورماستر والوان باستيل -أقلام رصاص -3 ممحاة	2019	قنا:	جامعة جنوب الوادى،	باشا مومن جمال الدين عبدالرحيم.	جماليات العمارة النوبية كمدخل لتنمية مهارات التعبير الفنى لدى طلاب المرحلة الإعدادية/	ماجستير	12611646	6791
وجدى رفعت فريد - محمد سعيد عبدالله	خلفية البحث لقد نشأ الفن عندما بدا الانسان خطواته العملية فى السيطرة على بيئته والظواهر التى تحيط به وتؤثر فى حياته اما للتغلب عليها واما للاستفادة منها وقد اتبع الانسان البدائى طريقة خاصة تزيل عنه جزء من غداء ومشقة التصارع مع تلك الظواهر الغامضة فاذا ما قتل فى محاولاته صيد الحيوان فانه كان يقوم بتخطيط صورة مشابهة وضع السيطرة عليه وكان ذلك العمل يشعره بإمكانية تحقق ذلك الواقع وهكذا برزت اول اعمال الفن عندما استقرت الحياة على ضفاف نهر النيل وانشئت القرى والمدن فى مناطق مختلفة على طول مجرى النهر من الجندل الأول حتى احرش النلتا بدأت ارماسات جديدة للفن قدر لبدرة ت ان تنبت وتزدهر رسوخا وثباتا وتظل قائمة ومستمرة وقادرة على الازدهار والامرار لا ف تالية من السفين وعندما ننظر الى تاريخ الفن سنرى ان المشاركة بين الأساليب والطراز امر لا ليس فيه وان تبادل الخبرات وانتقالها من عصر الى عصر هو الأساس المشترك بين الاعمال الفنية المختلفة والى انتجت عبر العصور التاريخية فأتى عمل فى هو حلقة وصل بين الاعمال السابقة والاعمال التى ستتبعه ولفن الماضى فضل على فن الحاضر لذا نجد الفن فى كل زمن يحمل بعض سمات باقية من الماضى بقدر مايجلب من تجديد وتطور معاصر فكانت البدايات الفنية الأولى آنذاك بسيطة بطبيعة الحال وظهرت فى شكل خطوط حفرت حفرا هينا على سطح القصور والأواني الفخارية بعد أن أصبحت صناعة الفخار ضرورية من ضرورات الحياة	2018	قنا:	جامعة جنوب الوادى،	محارب فاطمة عبدالرحمن مصطفى.	الوحدات الزخرفية فى الفن المصرى القديم والاستفادة منها فى استحداث صياغات تشكيلية لمكملات الملبس لاثراء الاشغال الفنية/	ماجستير	12611694	6792
د/ بركات سعيد محمد د.م.د/ فاطمة الزهراء كمال احمد	اهداف البحث : ارفع مستوى الاداء الفنى للطلاب من خلال دراستنا لجماليات الدلالات الرمزية للوحدات الاسلامية واستثمار ذلك -1 كمدخل لتدريس التصميمات الزخرفية لطلاب الثانوية الازهرية اهمية البحث :	2019	قنا:	جامعة جنوب الوادى،	رضوان محمود ماهر على	الدلالات الرمزية للوحدات الاسلامية كمدخل لتدريس التصميمات الزخرفية المعاصرة لطلاب الثانوية الازهرية/	دكتوراه	12612653	6793

									توجيه انظار القائمين على العملية التعليمية بالأزهر الشريف الى الاهتمام بتدريس الفن عامة والتصميمات الزخرفية -1 خاصة لطلاب الأزهر بما ينمى لديهم الحس والنوق الفني تجاه الفن الإسلامي واساليبه التشكيلية . 2- اراء المكتبة العربية بمرجع خاص بتدريس التصميمات الزخرفية لطلاب الأزهر - فروض البحث : 1- توجد فروق ذات دلالة احصائية بين متوسطي درجات (عينة البحث) في التصميم الزخرفي في التطبيقين (القبلي – البعدي) كما تقيسها بطاقة تقييم التصميمات الزخرفية المعاصرة لصالح التطبيق البعدي . حدود البحث : 1- دراسة وتحليل الدلالات الرمزية للوحدات الإسلامية في مختارات من تصميمات الفن الإسلامي . 2- اجراء التجربة على عينة عشوائية (16) طالب من طلاب الصف الأول الثانوي ، بمعهد الشيخ محمود غير الإعدادي -2 . الثانوي بطهطا		
ا.د/ زينب محمد امين ا.م.د/ نجلاء محمد فارس د/ احمد محمد احمد	2018	اهداف البحث : يهدف البحث الحالي الى استخدام مقرر الكترونى مفتوح فائق الاتحاق لتنمية مهارات استخدام تقنيات الجيل الثانى للويب 2.0 web فى التعليم لدى طلاب تكنولوجيا التعليم من خلال : 1- تحديد التصميم التعليمي المناسب للمقررات الالكترونية المفتوحة فائقة الاتحاق 2- تعرف فاعلية الكترونى مفتوح فائق الاتحاق فى تنمية الجانب المعرفي المرتبط بمهارات استخدام بعض تطبيقات الويب 3- تعرف فاعلية الكترونى مفتوح فائق الاتحاق فى تنمية الجانب الأداينى لمهارات استخدام وتوظيف بعض تطبيقات الويب 2,0 اهمية البحث : 1- قد يسهم البحث فى تلويح المقررات الالكترونية المفتوحة فائقة الاتحاق لخدمة الاغراض التربوية 2- قد يسهم البحث فى محاولة تطوير اساليب التعليم والتعلم المتعلقة بتدريب طلاب مرحلة التعليم الجامعي على احدث تقنيات التعليم والتعلم والارتقاء بالمهارات العامة للطلاب فى تكنولوجيا التعليم والتعلم الإلكتروني 3- قد يفيد البحث فى حفز اعضاء هيئة التدريس فى الجامعة للاتجاه الى التعلم الإلكتروني المفتوح للتواصل مع اكبر عدد من الطلاب لتنمية مهارات عامه فى مختلف المجالات 4- قد يفيد البحث فى لفت انتباه القائمين على مؤسسات التعليم الجامعي لأهمية انتاج ونشر المقررات الالكترونية المفتوحة فائقة الاتحاق فائقة الاتحاق . فروض البحث : 1- يوجد فروق ذو دلالة احصائية عند مستوى (0,05) بين متوسطي درجات طلاب المجموعة التجريبية فى التطبيقين القبلي والبعدي للاختبار التحصيلي للجانب المعرفي لصالح التطبيق البعدي يوجد فروق ذو دلالة احصائية عند مستوى (0,05) بين متوسطي درجات طلاب المجموعة التجريبية ومستوى 2- %85 فى القياس البعدي لبطاقة تقييم المنتج	جامعة جنوب الوادى،	سعيد:نحوى احمد ابو زيد.	فاعلية مقرر الكترونى مفتوح فائق الاتحاق (mooc) فى تنمية مهارات استخدام تقنيات الجيل الثانى للويب(web2.0) لدى طلاب تكنولوجيا التعليم/	12612661	6794				
ا.د/ وفاء محمد خليل د-/فاطمة عبدالرزاق عمر.	2020	أسئلة البحث: يعد ترشيد الاستهلاك ركيزة من الركائز الاجتماعية المهمة التي تبني عليها المجتمعات السليمة، حيث أكد عليها الله تعالى بقوله: (وَالَّذِينَ إِذَا أَنفَقُوا لَمْ يُسْرِفُوا وَلَمْ يَقْتُرُوا وَكَانَ بَيْنَ ذَلِكَ قَوَامًا) (سورة الفرقان، آية: 67) حيث يضمن الترشيذ للمجتمع السلامة من الأزمات التي تقف عقبة في طريقه (سمير سليمان، 2017) لا يهدف الترشيذ للتغيير أبدأ، إنما يعرف بأنه الاستعمال الراشد للأموار ، أي استعمالها بشكل عقلاني، فلو امتلك الفرد مخزوناً وفيراً من المياه المعفنة ومخزوناً كذلك من المياه العادية، فهذا لا يبرر له إطلاقاً أن يغتسل بالمياه المعفنة، لأن العقل لا يقبل إلا استعمال كل شيء لما وجد له وفي مكانه المحدد. (أميمة أحمد،2017) ويعتبر التدوير وإعادة الاستخدام للمواد وسيلة للحفاظ على مصادر الثروات وتعود بفوائد عديدة على الاقتصاد، حيث أكد (عدي أبو طاحون، 2000) أن إعادة التدوير أهمية ليس فقط للبيئة فحسب بل كمدخل لترشيذ الاستهلاك وحسن إدارة موارد الأسرة، كما أكدت دراسة كل من (ربيع نوفل وآخرون، 2015) و(باسط الراوى وطه الطيار، 2012) أهمية الاستفادة من خامات البيئة المستهلكة وإعادة تدويرها حتى لا يصبح عبئاً على المواطن والدولة وذات تأثير بيئي سيء. وقد تبين من دراسة (عزة سرحان، 2000) أهمية دور المرأة في عملية إعادة التدوير وتسويق منتجاتها ارفع مستوى معيشة الأسرة، كما أكدت دراسة (أمنية عادل، 2012) أهمية دور المرأة وقدرتها الإبداعية على العمل والإنتاج داخل منزلها. وتؤكد دراسة كل من (مرودة ابراهيم،2006)، (clare & Pammi ، 2009)، على أهمية إعادة تدوير الملابس والإستفادة منها لترشيذ الاستهلاك، كما تبين من دراسة (وسام محمد،2011)أهمية دراسة أنماط الإنفاق لدى طالبات الجامعة بهدف ترشيذ الاستهلاك، والتي إستهدفت إمكانية توظيف بعض خدمات البيئة في مجال تصميم الأزياء ومكملاتها، والتعرف على أنواع وخصائص وسمات خدمات البيئة وكيفية الاستفادة منها في تصميم مكملات الملابس، ودراسة (أسماء الذبوسي، 2015) والتي هدفت إلى تطوير ثقافة التخلص من الملابس عن طريق إعادة تدويرها حيث قامت هذه الدراسة بجمع النفايات وقصاصات التي خلفتها صناعة الملابس وأيضا النفايات ما بعد الاستهلاك للملابس المستهلكة والمنزلية. وفي دراسة (ثناء السرحان، 2011) والتي إستهدفت دراسة عينة محددة من طالبات الجامعة، للوقوف على أنماط إنفاقها الخاص، ومعرفة الجوانب التي يمكن التركيز عليها بهدف ترشيذ المستهلكين عند الإنفاق. وحيث أكدت دراسات كل من (ربيع نوفل وآخرون، 2015)و (الهام شاكر، 2014) و(محمد هلال، 2006) و (رشا منصور 2006) و (رشا علوان، 2001) أن البرامج الإرشادية دور هام وواضح في تدريب وتنمية المهارات والسلوك والاتجاهات لكافة المستويات التعليمية والعمرية. ولفلة الدراسات التي حصلت عليها الباحثة حسب حدود بحثها في موضوع ترشيذ الاستهلاك وإعادة تدوير المستهلكات المنزلية، فقد ركزت هذه الدراسة الحالية على تنمية وعي ربات الأسر في مدينة سفاجا محافظة البحر الأحمر بترشيذ الاستهلاك في ضوء ثقافة إعادة التدوير وابداع حلول عملية لرفع المستوى المعيشي للأسر في مدينة سفاجا مما يبرز الحاجة لهذه الدراسة. وفي ضوء ذلك تتحدد مشكلة البحث الحالي في الإجابة على التساؤلات الآتية: ماهو مستوى وعي ربات الأسر عينة البحث الأساسية بترشيذ الاستهلاك في ضوء ثقافة إعادة التدوير؟ ما هي الأوزان النسبية لأكثر العوامل المؤثرة في ثقافة إعادة التدوير لدى ربات الأسر عينة البحث (عوامل اقتصادية عوامل اجتماعية، عوامل ثقافية)؟ ما هي نسب إسهام متغيرات الدراسة(محل الإقامة، الحالة الاجتماعية، عمل ربة الأسرة، العمر، مستوى تعليم ربة الأسرة، عدد أفراد الأسرة، الدخل الشهري للأسرة) التي تؤثر على وعي ربات الأسر عينة البحث الأساسية؟ ما مدى الفروق بين ربات الأسر عينة البحث الأساسية في الاستجابات لمقياس ترشيذ الاستهلاك القائم على ثقافة إعادة التدوير في مجالات (التغذية، مجال الملابس، المستهلكات المنزلية) تبعاً لاختلاف المتغيرات الديموجرافية (محل الإقامة الحالة الاجتماعية، عمل ربة الأسرة، العمر، مستوى تعليم ربة الأسرة، عدد أفراد الأسرة، الدخل الشهري للأسرة)؟	جامعة جنوب الوادى،	نجار:فتحية نجار	فاعلية برنامج ارشادى قائم على ترشيذ الاستهلاك واثره فى تنمية ثقافة اعادة التدوير/	12613641	6795				

						ما هي العلاقة بين محاور مقياس ترشيد الاستهلاك في ضوء ثقافة إعادة التدوير ومتغيرات الدراسة(محل الإقامة، الحالة الاجتماعية، عمل ربة الأسرة، العمر، مستوى تعليم ربة الأسرة، عدد أفراد الأسرة، الدخل الشهري للأسرة)؟ ما مدى فعالية تطبيق البرنامج الإرشادي القائم على ترشيد الاستهلاك وأثره في تنمية ثقافة إعادة التدوير ؟ أهداف البحث: يهدف البحث الحالي إلى التعرف على فاعلية برنامج إرشادي القائم على ترشيد الاستهلاك وأثره في تنمية ثقافة إعادة التدوير وذلك من خلال الأهداف الفرعية الآتية: 1. التعرف على مستوى وعي ربات الأسر عينة البحث الأساسية بترشيد الاستهلاك في ضوء ثقافة إعادة التدوير 2. التعرف على الأوزان النسبية لأكثر العوامل المؤثرة في ثقافة إعادة التدوير لدى ربات الأسر عينة البحث (عوامل (اقتصادية، عوامل اجتماعية، عوامل ثقافية 3. التعرف على نسب إسهام متغيرات الدراسة (محل الإقامة، الحالة الاجتماعية، عمل ربة الأسرة، العمر، مستوى تعليم ربة الأسرة، الدخل الشهري للأسرة، عدد أفراد الأسرة، الدخل الشهري للأسرة) التي تؤثر على وعي ربات الأسر عينة البحث الأساسية 4. التحقق من دلالة الفروق بين ربات الأسر عينة الدراسة الأساسية في الوعي بترشيد الاستهلاك القائم على ثقافة إعادة التدوير في مجالات (التغذية، مجال الملابس، المستهلكات المنزلية) تبعاً لاختلاف المتغيرات الديموجرافية (محل الإقامة (الحالة الاجتماعية، عمل ربة الأسرة، العمر، مستوى تعليم ربة الأسرة، عدد أفراد الأسرة، الدخل الشهري للأسرة 5. توضيح طبيعة العلاقة الارتباطية بين محاور مقياس ترشيد الاستهلاك في ضوء ثقافة إعادة التدوير ومتغيرات الدراسة(محل الإقامة، الحالة الاجتماعية، عمل ربة الأسرة، العمر، مستوى تعليم ربة الأسرة، عدد أفراد الأسرة، الدخل الشهري للأسرة)؟ دراسة أثر تطبيق البرنامج الإرشادي القائم على ترشيد الاستهلاك وأثره في تنمية ثقافة إعادة التدوير أهمية البحث: تمثلت أهمية البحث من خلال ما تقدمه من فائدة في مجال خدمة المجتمع المحلي وخدمة التخصص العلمي فيما يلي: 1. الاستفادة من نتائج البحث في رفع مستوى معيشة الأسرة وتحسين طرق استغلال وقت الفراغ لدى ربات الأسر المعاملات 2. توفير حياة أفضل 3. محاولة الإسهام في إضافة برنامج إرشادي جديد في مجال ترشيد الاستهلاك و إعادة التدوير 4. تنمية وعي ربات الأسر بمحافظة البحر الأحمر بترشيد الاستهلاك ورفع مستوى وعيهم بثقافة إعادة التدوير وغرس قيم العمل اليدوي والعمل في فريق لديمين فروض البحث: 1. توجد فروق ذات دلالة إحصائية بين ربات الأسر عينة الدراسة الأساسية في الاستجابات لمقياس الوعي بترشيد الاستهلاك القائم على ثقافة إعادة التدوير في مجالات (التغذية، مجال الملابس، المستهلكات المنزلية) تبعاً لاختلاف المتغيرات الديموجرافية (محل الإقامة، الحالة الاجتماعية، عمل ربة الأسرة، مستوى تعليم ربة الأسرة، العمر، عدد أفراد الأسرة، الدخل الشهري للأسرة 2. توضيح طبيعة العلاقة الارتباطية بين محاور مقياس ترشيد الاستهلاك في ضوء ثقافة إعادة التدوير ومتغيرات الدراسة 3. اختلاف نسب إسهام متغيرات الدراسة (محل الإقامة، الحالة الاجتماعية، عمل ربة الأسرة، مستوى تعليم ربة الأسرة 4. العمر، عدد أفراد الأسرة، الدخل الشهري للأسرة) التي تؤثر على وعي ربات الأسر عينة البحث الأساسية دراسة أثر تطبيق البرنامج الإرشادي القائم على ترشيد الاستهلاك وأثره في تنمية ثقافة إعادة التدوير منهج البحث : يتبع هذا البحث المنهج الوصفي التحليلي والمنهج التجريبي : ويعني المنهج الوصفي بأنه الطريقة المنظمة لدراسة حقائق واهنة متعلقة بظاهرة أو موقف أو أفراد أو أحداث أو أوضاع معينة بهدف اكتشاف حقائق جديدة أو التحقق من صحة حقائق قديمة و آثارها والعلاقات التي تتصل بها وتفسيرها وكشف الجوانب التي تحكمها (محمد شفيق، 2006) أما المنهج التجريبي فيعني تغير متعمد ومضبوط للشروط المحددة لظاهرة معينة وملاحظة التغيرات الناتجة في هذه الظاهرة ذاتها وتفسيرها ويتم فيه إحداث تغيراً مقصوداً في أحد المتغيرات المؤثرة على هذه الظاهرة (محمود عبد الحليم منسي، 2003). حدود البحث : يحدد هذا البحث على النحو التالي : أولاً:النطاق الجغرافي: عينة من ربات الأسر من سكان محافظة البحر الأحمر (حضر وقرى نائية) مدينة سفاجا بمستويات اجتماعية واقتصاديته مختلفة لديهم طفل واحد على الأقل تتراوح أعمارهن ما بين 25 عام إلى 50 عام.	
2020	قنا:	جامعة جنوب الوادي،	تهامي؛عبير ربيع احمد.	الاستفادة من بعض حلقات البرنامج الإذاعي (الحن زمان) في تاريخ وتذوق وتحليل الموسيقى العربية/	دكتوراه	12613969	6796

2020	اهداف البحث : 1- تنفيذ تراكيب نسيجية مبتكرة من نسيج الفركة .						
2- زخرفة نسيج الفركة بأسلوب الطباعة -							
3- تنفيذ بعض مكملات الملابس باستخدام نسيج الفركة كتنكاريات سياحية -							
اهمية البحث : 1- ابتكار تراكيب نسيجية جديدة من نسيج الفركة يمكن توظيفها في مجال الملابس والنسيج كمكملات ملابس متنوعة .							
المساهمة في احياء حرفة الفركة بإنتاج منتجات متميزة مثل مكملات الملابس كتنكاريات سياحية -							
اثراء المكملات الملابسية باستخدام خامات جديدة مثل نسيج الفركة وتوظيفها كتنكار سياحي -							
قد تسهم نتائج البحث في زيادة النشاط التسويقي لحرفة الفركة من خلال التسويق في السوق المحلية والدولية -							
الربط بين مجالات متنوعة داخل تخصص الملابس والنسيج والطباعة ومكملات الملابس -							
تدريب الفتيات على تنفيذ انواع مختلفة من التراكيب النسيجية لنسيج الفركة -							
يعد التعليم الركيزة الأساسية والمحور الرئيسي لرقى المجتمع والوصول الى التقدم في كافة المجالات الاقتصادية والاجتماعية والسياسية وغير ها من المجالات غ أن هذا التقدم لا يكون الا ثمرة ل نظام تعليمي ناجح منبثق من منظومة تعليمية متقدمة متوفر لديها جميع مقومات النجاح وعناصره .							
ولعل مشاركة أطراف المجتمع في ادارة ودعم العملية التعليمية متمثلة في مجلس الأمناء تعد من أهم عناصر نجاح المنظومة التعليمية والمؤسسة التربوية متمثلة في المدرسة كما أن مشاركة الاسرة للمدرسة في تحمل مسؤولية تربية الابناء توفر المزيد من الدافعية للطلاب وتقع مستويات الانجاز التحصيلي لديهم وتساهم في تقويم سلوكهم وتعزيز النمو الاكاديمي والاجتماعي لهم وتحقق سمعتهن الفردية والاجتماعية.
