2nd Announcement

Energy and water shortage represent serious environmental challenges that humanity will face for the long term. Oil and gas as main sources of energy will soon diminish, in addition nuclear energy is usually unsafe for our environment. Hence, we are encouraged as researchers to find not only an alternative source of energy but also a high power density one in order to secure our future of energy. Also, the topics related to the optimal uses of water and its various sources will be discussed to ensure its sustainability.

In this context, Tanta University (Egypt) directs the interest of its 5th international conference of scientific research towards renewable energy and water uses in terms of development and conservations. This conference will be a great chance for scientists, academics, and industrial people from all over the world to meet each other and to discuss their research achievements, in addition help in achieving the maximum benefits from the natural and human resources of Egypt to make it an area of excellence in the field of energy and water management.

Tanta university takes this opportunity and cordially invites researchers from all over the world to submit their original research papers as per conference theme for presentations (oral and poster) in the following topics:

Topics

- Technologies of renewable energy and energy storage.
- New materials for energy applications.
- Water management and crop composition.
- Water treatment and desalination.
- Media; energy and water issues.
- Environmental hazards and therapeutic uses.
- Legal challenges and economic concepts.
- Future trends in energy, water sustainability and climate.
- Remote sensing techniques and GIS applications.

Key Dates

- Deadline of abstract submission: November 30th, 2018
- Deadline of full paper submission: January 31st, 2019
- Final conference program: March 1st, 2019

Theme

Achieving solutions for renewable energy and water uses and sustainability
