Pediatric Nursing Final Exam.

For 3rd Year Students. (frist semester)

Date: ۹/۱/۲۰۱۷

Time: ۳ hours

Total marks: ۸۰

Answer the following questions:

I- Define the following:-

(۵ marks)

۱. Bronchial asthma:
۲. Rheumatic fever:
۳. Post Streptococcal Acute glomerulonephritis (PSAGN):
۴. Leukemia:
۵. Congenital hypothyroidism:

II- Choose (T) if the statement is true and (F) if it is false: (۱۶marks)

۱. From ۶-۸ years of age the child can ride a bicycle, run and jump.	T	F
۲. Marasmus is a deficiency disease of growing children due to lack of fat soluble vitamin D.	T	F
۳. Nervous system is mature by ۱۰ years of age.	T	F
۴. During the adolescent stage both boys and girls are long legged.	T	F
۵. Stomatitis is inflammation of the stomach.	T	F
۶. In selecting toys for an infant should consider the most expensive that fits his age.	T	F
۷. By the end of the second year head circumference will be equal to chest circumference.	T	F
۸. During infancy period growth slows considerably.	T	F
۹. Dramatic play is common during adolescence period.	T	F
۱۰. Apnea and bradycardia is one of the initial signs symptoms of hypothermia.	T	F
۱۱. The daily raise of serum bilirubin in physiological jaundice exceeds ۵ mg/dl.	T	F
۱۲. Physical growth includes temperature, pulse, respiration and blood pressure.	T	F
۱۳. Freezing does not damage B.C.G vaccine.	T	F
۱۴. Pathological jaundice appears on ۲nd or ۳rd and does not need treatment.	T	F
۱۵. Moderate dehydration is characterized by rapid deep breathing cold blue extremities, loss of body weight. (۱۰-۱۵%)	T	F
۱۶. Koplik;s spots are pathogenic appear in measles	T	F

III-MCQ Question

(24 marks)

1. A child should be able to bladder control in day time at
- 24-30 months
  - 2-3 years
  - 10-18 months
  - 4-5 years
2. While assessing a child with pyloric stenosis, the nurse is likely to note which of the following?
- Regurgitation.
  - Steatorrhea.
  - Projectile vomiting.
  - "Currant jelly" stools
3. A newborn's failure to pass meconium within the first 24 hours after birth may indicate which of the following?
- Hirschsprung disease.
  - Celiac disease.
  - Intussusception.
  - Abdominal wall defect.
4. When assessing a child for possible intussusception, which of the following would be least likely to provide valuable information?
- Stool inspection.
  - Pain pattern.
  - Family history.
  - Abdominal palpation.
5. When teaching the parents having a child with iron deficiency anemia about using supplemental iron which instruction should provide?
- Give the iron preparation with milk
  - Give the iron preparation with water or juice monitor the child for episodes of diarrhea
  - Give the iron preparation before meals

7. Signs and symptoms of a child with meningitis are
- Convulsion, headaches, irritability and neck pain
  - vomiting, diarrhea and anorexia
  - Cough, cyanosis and sneezing
  - Fever, edema and drowsiness

8. When assessing a child with a cleft palate, the nurse is aware that the child is at risk for more frequent episodes of otitis media due to which of the following?

- Lowered resistance from malnutrition.
- Ineffective functioning of the Eustachian tubes.
- Plugging of the Eustachian tubes with food particles.
- Associated congenital defects of the middle ear.

9. Which of the following information, when voiced by the mother, would indicate to the nurse that she understands home care instructions following the administration of a diphtheria, tetanus, and pertussis injection?

- Measures to reduce fever.
- Need for dietary restrictions.
- Reasons for subsequent rash.
- Measures to control subsequent diarrhea.

→ 10. Which of the following abilities would a nurse expect a 4 month old infant to perform? ←

- Sitting up with adequate support.
- Responding to pleasure with smiles.
- Grasping a rattle when it is offered.
- Turning from either side to the back.

11. The nurse plans to administer the Denver Developmental Screening Test (DDST) to a five month old infant. The nurse should explain to the mother that the test measures the infant's...

- Intelligence quotient.
- Emotional development.
- Social and physical activities.
- Pre-disposition to genetic and allergic illnesses.

**III-MCQ Question**

**( 28 marks)**

**1. When assessing an 18-month-old, the nurse notes a characteristic protruding abdomen. Which of the following would explain the rationale for this finding?**

- a. Increased food intake owing to age.
- b. Underdeveloped abdominal muscles.
- c. Bowlegged posture.
- d. Linear growth curve.

**2. A child age 7 was unable to receive the measles, mumps, and rubella (MMR) vaccine at the recommended scheduled time. When would the nurse expect to administer MMR vaccine?**

- a. In a month from now.
- b. In a year from now.
- c. At age 12.
- d. At age 24.

**3. The adolescent's inability to develop a sense of who he is and what he can become results in a sense of which of the following?**

- a. Shame.
- b. Guilt.
- c. Inferiority.
- d. Role diffusion.

**4- A newborn's failure to pass meconium within the first 24 hours after birth may indicate which of the following?**

- a. Hirschsprung disease.
- b. Celiac disease.
- c. Intussusception.
- d. Abdominal wall defect.

**5. By the end of which of the following would the nurse most commonly expect a child's birth weight to triple?**

- a. 4 months.
- b. 7 months.
- c. 9 months.
- d. 12 months.

**6. Which of the following best describes parallel play between two toddlers?**

- a. Sharing crayons to color separate pictures.
- b. Playing a board game with a nurse.
- c. Sitting near each other while playing with separate dolls.
- d. Sharing their dolls with two different nurses.

**7. Which of the following information, when voiced by the mother, would indicate to the nurse that she understands home care instructions following the administration of a diphtheria, tetanus, and pertussis injection?**

- a. Measures to reduce fever.
- b. Need for dietary restrictions.
- c. Reasons for subsequent rash.
- d. Measures to control subsequent diarrhea.

**8. While assessing a newborn with cleft lip, the nurse would be alert that which of the following will most likely be compromised?**

- a. Sucking ability.
- b. Respiratory status.
- c. Locomotion.
- d. GI function.

**9. While assessing a child with pyloric stenosis, the nurse is likely to note which of the following?**

- a. Regurgitation.
- b. Steatorrhea.
- c. Projectile vomiting.
- d. "Currant jelly" stools.

**10. When assessing a child for possible intussusception, which of the following would be least likely to provide valuable information?**

- a. Stool inspection.
- b. Pain pattern.
- c. Family history.
- d. Abdominal palpation.

**11. After teaching the mother about the neonate's positive Babinski reflex, the nurse determines that the mother understands the instructions when she says that a positive Babinski reflex indicates...**

- a) Immature muscle coordination.
- b) Immature central nervous system.
- c) Possible lower spinal cord defect.
- d) Possible injury to nerves that innervate the feet.

**12. The nurse notes a swelling on the neonate's scalp that crosses the suture line. The nurse documents this condition as ...**

- a) Cephalic hematoma.
- b) Caput succedaneum.
- c) Hemorrhage edema.
- d) Perinatal caput.

**13-When teaching the parents having a child with iron deficiency anemia about using supplemental iron which instruction should provide?**

- a) Give the iron preparation with milk
- b) Give the iron preparation with water or juice monitor the child for episodes of diarrhea
- c) Give the iron preparation before meals

**14-Signs and symptoms of a child with meningitis are**

- a)Convulsion, headaches, irritability and neck pain
- b)vomiting ,diarrhea and anorexia
- c) Cough, cyanosis and sneezing
- d)Fever,odema and drowsiness

**IV- Complete the following questions**

**(20 marks)**

**1- Nursing care for a child with Rheumatic fever include :-**

- a- d-
- b- e-
- c-

**2- Criteria for adequate breast feeding are**

- a- d-
- b- e-

Final Term Exam

Third year-First semester

2016-2017

Time allowed: 1 hours      Date:18/1/2017

Total degrees: 40 Marks

---

Please all questions should be answered:

Part I: Choose the correct answer      (20 marks two for each)

---

1. The most important step in postoperative nursing care of abdominal wall defects is
  - A. Prevent infection
  - B. Gastrointestinal decompression
  - C. Respiratory support
  - D. Fluid therapy
  
2. The following conditions are pediatric surgical emergencies except
  - A. imperforate anus
  - B. intestinal obstruction
  - C. esophageal atresia
  - D. Thyroglossal cyst
  
3. The following are types of anorectal malformation in female except
  - A. imperforate anus with recto prostatic fistula
  - B. imperforate anus with rectovestibular fistula
  - C. imperforate anus with rectoperineal fistula
  - D. cloacal malformation

4. **All of the following is part of VACTERI syndrome except**
- A. cardiac anomalies
  - B. Spleen anomalies
  - C. Tracheal
  - D. Esophageal atresia
  - E. Renal abnormalities
5. **Chronic constipation since birth one of clinical presentation of**
- A. Hirshsprung's disease
  - B. inguinal hernia
  - C. intussusception
  - D. All of the above
6. **The most common type of stoma is**
- A. Divided
  - B. End
  - C. Mucous fistula
  - D. Loop
7. **Time of application of stomal bag is**
- A. After 24 hours of surgery
  - B. Immediately after surgery
  - C. After 6 hours of surgery
  - D. After 48 hours of surgery
8. **Duodenal obstruction may be due to**
- A. atresia
  - B. malrotation of the midgut
  - C. annular pancreas
  - D. all of the above
9. **The following are manifestation of intestinal obstruction**
- A. Vomiting
  - B. abdominal distension
  - C. absolute constipation
  - D. all of the above

**10. Complication of stoma include**

- A. Stomal migration
- B. Stomal infection
- C. Stomal prolapse
- D. Malignant transformation

**Part II: Listing:**

**(10 Marksfor each)**

---

1. Pre-operative nursing care of abdominal wall defects
2. Causes of neonatal intestinal obstruction

Third Year Final Examination

Pediatrics Ex.

Date 31/12/2017

Number of pages: 3

Time allowed: 1.5 hours

(Short questions and MCQ questions)

Total marks: 80 marks

A-Discuss shortly the following questions:-

(60 marks)

- 1- Early and advanced clinical signs of rickets (10 marks)
- 2- Clinical manifestations of acute post-streptococcal glomerulonephritis (10 marks)
- 3- Clinical picture and complications of pneumonia (10 marks)
- 4- Clinical manifestations and laboratory diagnosis of juvenile onset diabetes. (10 marks)
- 5- Modified Jones criteria for diagnosis of initial attack of rheumatic fever. (10 marks)
- 6- Laboratory diagnosis of Thalassemia Major. (10 marks)

- 1- يحتفظ الطالب بالورقة الأولى فقط من الأسئلة (Discuss shortly).
- 2- يتم الإجابة على أسئلة ال MCQs في الجدول المخصص له أعلى الصفحة رقم (2) و تكون الإجابة بالقلم الجاف (ممنوع الإجابة بالقلم الرصاص).
- 3- لا يكتب اسم الطالب على ورقة ال MCQs و يوضع الرقم السري للطالب بواسطة أعضاء الكنترول في خانة ال code number الموجودة في جدول الأجابات أعلى الصفحة رقم (2).
- 4- يتم تدبير الإجابة على أسئلة ال MCQs (الصفحة رقم 2 و 3) في كراسة الإجابة الخاصة بالطالب.

(Short questions and MCQ questions)

Total marks: 40 marks

Secrete No.:- ( )

A-Discuss shortly the following questions:- (5 marks each)

- 1- Complications of rickets.
- 2- Complications of pneumonia.
- 3- Differences between marasmus and Kwashiorkor
- 4- Etiology of iron deficiency anemia.
- 5- clinical picture of heart failure.

B- Put the letter of the correct answer in front of the corresponding question in the following answer table.

3	2	1
6	5	4
9	8	7
12	11	10
15	14	13
		الدرجة

Choose the correct answer (MCQs):- (1mark each)

- 1-Regarding rheumatic arthritis all of the following are true except:-
- a) Polyarthritis.
  - b) Affecting small joints.
  - c) Migratory in nature.
  - d) Dramatic response to salicylates.

**2-All of the following are causes of heart failure in infants except:-**

- a) Congenital heart diseases.
- b) Viral myocarditis.
- c) Cardiomyopathy
- d) Rheumatic myocarditis.

**3-All of the following are complications of diabetes mellitus except:-**

- a) Retinopathy.
- b) Nephropathy.
- c) Neuropathy.
- d) Obesity.

**4-Minor criteria diagnosis of initial attack of rheumatic fever include the following except:-**

- a) Fever.
- b) Arthralgia.
- c) Elevated acute phase reactants (ESR, CRP).
- d) Chorea.

**5-All of the following are true regarding congenital hypothyroidism except.**

- a) Newborn may present by persistent neonatal jaundice.
- b) Infants usual have normal mental and physical development.
- c) Serum T4 is low.
- d) High TSH if the defect is primarily in the thyroid.

**6-The following are complications of nephrotic syndrome with the exception of:**

- a) acute renal failure
- b) accelerated hypertension
- c) pneumococcal infection
- d) venous thrombosis

**7-The cardinal signs in acute post streptococcal glomerulonephritis include the followings except:**

- a) Oliguria
- b) Hyperlipedemia
- c) Haematuria
- d) Hypertension

**8- Regarding acute epiglottitis, the followings are true except :**

- a) The main causative organism is Hemophilus influenza type b and streptococcus.
- b) Age onset at 2-7 years
- c) Direct inspection of the oral cavity should be done in every case
- d) Sever dysphagia and excessive drooling are common findings.

**9-All of the followings are constant signs in kwashiorkor except:**

- a) Growth failure
- b) Muscle wasting
- c) Edema
- d) Crackly paint dermatosis

**10-All of the followings are causes for non infectious diarrhea except:**

- a) Lactose intolerance.
- b) Cow's milk protein allergy.
- c) Heavy metals and insecticides poisoning.
- d) proteus and yersenia enterocolitis.

**11- Clinical manifestations associated with a diagnosis of type 1 DM include all of the following except:**

- a) Polyphagia
- b) Hyponatremia
- c) Ketonuria
- d) Hypoglycemia

**12- Craniotabes is a clinical sign of:**

- a) Kwashiorkor
- b) Marasmus
- c) Rickets
- d) Scurvy

**13- Which of the following describes constipation more accurately?**

- a) Irregular motions
- b) Less than one stool per day
- c) difficult and painful defecation with incomplete evacuation
- d) Blood in stool

**14- The following are causes of generalized edema except:**

- a) Malnutrition
- b) Congestive heart failure
- d) diabetes mellitus
- d) Nephrotic syndrome

**15- What is marasmus?**

- a) A common skin infection in malnourished children
- b) A type of malnutrition where the child is very thin and lacks fat
- c) A type of malnutrition where the child has a puffy moon face and thin hair
- d) A non preventable infectious disease

First Term

English Language Exam

\*\*\*\*\*

I. Write a well organized essay on ONE the following topics:

1. Characteristics of a good nurse
2. Bad effects of smoking

II. (A). Read the following passage, and then answer the questions below:

Exploring really deep caves is not a task for the Sunday afternoon rambler. Such undertakings require the precise planning and foresight of military operations. It can take as long as eight days to rig up rope ladders and to establish supply bases before a descent can be made into a very deep cave. Precautions of this sort are necessary, for it is impossible to foretell the exact nature of the difficulties which will confront the potholer. The deepest known cave in the world is the Gouffre Berger near Grenoble. It extends to depth of 3723 feet. This immense chasm has been formed by an underground stream which has tunneled a course through a flaw in the rocks. The entrance to the cave is on a plateau in the Dauphine Alps. As it is only six feet across, it is barely noticeable.

Questions:

1. Who is the potholer?
2. Why does the exploration of a deep cave require careful planning?
3. How has the Gouffre Berger been formed?
4. Give the meanings of the underlined words.
5. Translate the passage into Arabic.

(B). Rewrite these sentences using the words in brackets giving the same meaning:

1. In case of illness, he will stay at home. (If)
2. I am going to cash a cheque so that I can buy the car. (in order to)
3. I did not go out because it rained. (rain)
4. He doesn't like coffee. He doesn't like tea. (neither)
5. You can't travel abroad in case of not having a passport. (If)
6. I don't wake up if the alarm clock doesn't ring. (unless)

(C). Translate the following proverbs into Arabic.

1. Charity begins at home
2. Diamond cut diamond
3. A tree is known by its fruit
4. A cock crows on his own dunghill

### English Language Exam

#### I. Write a well organized essay on ONE of the following topics:

1. How to avoid illness
2. Happiness

#### II. Read the following passage, and then answer the questions:

Last summer, I spent days in the garden watching thousands of ants crawling up the trunk of my prize peach tree. The tree has grown against a warm wall on a sheltered side of the house. I am especially proud of it, not only because it has survived several winters, but because it occasionally produces luscious peaches. During the summer, I noticed that the leaves of the tree were beginning to wither. Clusters of tiny insects called aphides were to be found on the underside of the leaves. They were visited by a large colony of ants which obtained a sort of honey from them. I immediately embarked on an experiment which, even though it failed to get rid of the ants, kept me fascinated for twenty-four hours. I bound the base of the tree with sticky tape, making it impossible for the ants to reach the aphides. The tape was so sticky that they did not dare to cross it. For a long time, I watched them scurrying around the base of the tree in bewilderment. I even went out at midnight with a torch and noted with satisfaction that the ants were still swarming around the sticky tape without being able to do anything about it. I got up early next morning hoping to find that the ants had given up in despair. Instead, I saw that they had discovered a new route. They were climbing up the wall of the house and then on to the leaves of the tree. I realized sadly that I had been completely defeated by their ingenuity.

#### Questions:

1. What is the writer proud of? Why?
2. Why were the leaves of the tree beginning to wither?
3. What did the writer do to get rid of the ants?
4. Did he succeed in getting rid of the ants? Why?
5. Translate the passage into Arabic.

#### III. Choose the appropriate answers in brackets.

1. Please, tell me what ( you want / do you want / want ) me to do.
2. The refrigerator is empty now. All the food ( is / has been / have been ) eaten.
3. Economics ( aren't / isn't / haven't ) nearly as interesting to me as literature.
4. I watched a ( documented / documentary / document ) film entitled "Workers".
5. The elevators are located ( near / into / across ) the toy section.
6. JAL 203 ( on / by / to ) New York was cancelled due to the typhoon.
7. Our meetings are ( once / every week / monthly ) held in the conference room.
8. Our boss is quite ( knowledgeable / knowing / knows ) about this new machine.
9. By nine o'clock, everyone ( eaten / has been eating / had eaten ) his/her breakfast.
10. He coughs a lot. I advised him ( to give up / give up / giving ) smoking.

With best wishes
