Final Written Exam

Second year students, 2nd Semester

Time allowed : 3 hours

Date: 23 / 1 / 2010

Mark distribution		
Part I:	20	Mark
Part II:	20	Mark
Part III:	20	Mark
Part IV:	20	Mark
Total:	80	Mark

Many Thanks

Dr. Zienab Abd El-latef

Dr. Hala Mohamed

Part I: Orthopedic : (20 Mark)

Define the following: (3 Mark one for each)

1. Skin traction :

2. External fixation :

3. Musculoskeletal injuries :

Fill in the blanks with the correct term related to orthopedic nursing:

(2½ Marks ½ for each)

- 1- In acute osteomyelitis, the causative organism affecting debilitated elderly patient are -----and -----.
- 2- Traction force is applied directly to a bone through -----and -----
- 3- Before cast application ,the skin should be checked for -----and -----
- 4- The affected extremity is pale and cold below the fracture lead to -----.
- 5- ----- Is a rigid external immobilizing device.

Match the term with the correct definition: (2½ Marks ½ for each)

1- Sprain	() It is a complete disruption of a joint in which the articular surfaces are no longer in contact with each other .
2- Acute osteomyelitis	() It is a structural losses in the continuity of a bone .
3- Primary survey	() It is a traumatic injury in which ligament fibers are term that caused by twisting motion .
4- Joint dislocation	() Is a rigid external immobilizing device .
5- Fracture	() The ABCs of trauma care identifies life threatening conditions.
	() Refer to fracture protrudes through the skin .
	() Is a pyogenic infection of the bone, bone marrow and surrounding tissue. .

Listing: (12 Mark one for each)

1. Three stages of fracture repair :

-
-
-

2. Neurovascular observations for extremities :

-
-
-

3. Three nursing diagnosis for patient with cast (before) application :

-
-
-

4. Three nursing management for acute osteomyelitis :

-
-
-

Part II : Neurology : (20 Mark)

Define the following: (3 Marks one for each)

1. Lumbar puncture:

2. Seizure :

3. Intracranial pressure

Fill in the blanks with the correct term related to neurology nursing:

(2½ Marks ½ for each)

- 1- A temporary opening of part of the cranium is refer to ----- .
- 2- Normal intracranial pressure is ranges from -----mmHg .
- 3- -----is a warning sensation in the form of dizziness, spots before the eyes and numbness .
- 4- ----- occurs when blood supply to part of the brain is disrupted .
- 5- Spinal cord has ----- pairs of spinal nerves.

Listing : (12 Mark one for each)

1. Four complications after craniotomy:

-
-
-
-

2. Four signs and symptoms of increased intracranial pressure:

-
-
-
-

3. Four nursing intervention during seizure:

-
-
-
-

Circle the best one answer for each of the following:

(2½ Marks ½ for each):-

- 1. Patient problems with increase ICP include the following (except one):**
 - a. Increase respiratory rate.
 - b. Vomiting.
 - c. Headache.
- 2. Causes of seizures include the following (except one):**
 - a. Epilepsy.
 - b. Head injury.
 - c. Infection
- 3. Causes of unconsciousness are one of the following:**
 - a. Neurological, metabolic and hypertension
 - b. Neurological, toxicological and brain tumor
 - c. Neurological, metabolic and toxicological
- 4. The nervous system consists of the following :**
 - a. Brain, spinal cord and peripheral nerves
 - b. Brain and spinal cord
 - c. Brain, cerebrum and cerebellum
- 5. Cerebral circulation receives about one of the following :**
 - a. 20 % of cardiac out put.
 - b. 40 % of cardiac out put.
 - c. 50 % of cardiac out put.

Part III : Urology : (20 Mark)

Define the following: (3 Marks, one for each)

1. Nephrolithiasis :

2. Urgency :

3. Pyelolithotomy :

Circle (T) if the statement is true and (F) if false: (2½ Marks ½ for each)

1-Patient undergoing hemodialysis should increase protein intake	(T)	(F)
2-Males are common to have urinary tract infection than female	(T)	(F)
3-Hypovolemic shock may result from hemodialysis	(T)	(F)
4-Urinary catheterization is a clean procedure	(T)	(F)
5-Nephrostomy means surgical removal of kidney	(T)	(F)

Circle the best one answer for each of the following: (2½ Marks ½ for each)

1. Position for insertion for female catheter is:

- a. Supine position
- b. Supine with knee flexed position
- c. Knee chest position

2. Intra- renal causes of acute renal failure are :

- a. Nephrotoxic agent and prolonged renal ischemia
- b. Bladder cancer and calculi formation
- c. Hemorrhage and impaired cardiac efficiency

3. Cardiovascular manifestations of chronic renal failure are :

- a. Thrombocytopenia, anemia and leukytosis
- b. Pitting edema, hypertension and pre orbital edema
- c. Coma, behavioral disturbance and stupor

4. Indications of peritoneal dialysis are :

- a. Sever acidosis and acute bleeding
- b. Peritonitis and ileostomy
- c. Uncontrolled hyperkalemia

5. Causes of cystitis are :

- a. Trauma of urinary tract
- b. Excessive oxalate absorption
- c. Medical instrumentation

Listing : **(12 Marks one for each)**

1- Three function of the kidney :

-
-
-

2- Three clinical manifestations of acute pyelonephritis :

-
-
-

3- Three preventions of urinary tract infection :

-
-
-

4- Three clinical manifestations of cystitis are :

-
-
-

Part IV : Burn :

(20 Mark)

A) Define the following :

(5 Marks one for each)

1. Skin graft:

2. Hydrotherapy :

3. Eschar :

4. Natural debridment:

5. Burn:

Situation:

(15 Marks)

- Nursing care for burned patient during rehabilitation phase (using nursing process)

Obstetrics and Gynecological Nursing Department

Final Exam Obstetrics and Gynecological Nursing
Second Years Students

Date : 12\6\2010

Time: 3hrs

Please answer the following questions

1- Define the Following

(10 marks) 1 for each

1- LAM methods

2-Infertility

3- Menarche

4- Moulding

5- Abortion

6- Quickening:

7- Vesicular mole:

8- Involution:

9-Labour

10- Menstruation:

2- Put (T) in front of the correct answer and (F) in front of the false one :
 (10 marks)1 for each

1-Duration of uterine contractions measure the beginning of one contraction to the end of the contraction	T	F
2-The function of the ovary are ovulation and endocrine	T	F
3- Hearing fetal heart sound is one of the presumptive symptoms of pregnancy	T	F
4- Ectopic pregnancy is due to placental implantation in the lower uterine Segment .	T	F
5-Sex of the fetus is determined at the time of ovulation	T	F
6-Ideal Weight gain during pregnancy is ranged between 6-9 kg	T	F
7- Normal position of the uterus is ante version ante flexion .	T	F
8- Crowning is one of the signs of first stage of labor.	T	F
9- Position is the relation ship between long axis of the fetus to the long axis of the mother	T	F
10- Bleeding in early pregnancy is usually due to accidental hemorrhage.	T	F

3-List The Following (50 mark 1 for each).

1-Type of lochia.

- a-.....
- b-.....
- c-.....

2-Minor discomfort during pregnancy.

- a-.....
- b-.....
- c-.....

3- External genitalia organ contains:

- a-.....
- b-.....
- c-.....
- d-.....

4- Types of decidua.

- a-.....
- b-.....
- c-.....

5- warning signs during pregnancy:

- a-.....
- b-.....
- c-.....
- d-.....

6- signs of fetal distress.

- a-.....
- b-.....
- c-.....
- d-.....

7- Enumerate physiological changes of skin during pregnancy.

- a-.....
- b-.....
- c-.....

8- Sure signs of pregnancy are

- a-.....
- b-.....
- c-.....
- d-.....

9- Phases of menstruation (Ovarian).

- a-.....
- b-.....

10- types of Placenta previa.

- a-.....
- b-.....
- c-.....

11- Causes of early bleeding

- a-
- b-
- c-
- d-

12- Signs of placenta separation

- a-
- b-
- c-

13- Signs of pre-eclampsia

- a-
- b-
- c-

14- Four advices for pregnant mother complains from heart burn.

- a-
- b-
- c-

15- Types of Episiotomy

- a-
- b-

16- Surgical methods of family planning

- a-
- b-

4 - Circle on the best answer

(10 marks 1 for each)

- 1- Mrs. Ahmed last menstrual period began on December 15. Her expected date would be
- a- September 15
 - b- September 22
 - c- October 12
 - d- October 22
- 2- The following are characteristics of normal uterine contraction except
- a- Duration
 - b- Dilatation
 - c- Interval
 - d- intensity
- 3- The female pelvic consists of 4 bones
- a- hip bones –sacrum coccyx
 - b-hip bones- symphysis pubic ischial spine
 - c-hip bone femoral Tibia
- 4- Signs and symptoms of Complete abortion except:
- a- All contents of the uterus are expelled spontaneously without assistance.
 - b- There is minimal bleeding
 - c- Pain stops.
 - d- Uterus is hard and much smaller corresponding to the period of gestation.
- 5- Absence of menstruation called
- a-Menorrhagia
 - b- Amenorrhea
 - c-Hypomenorrhoe
- 6- Extraction of the ovum from mature follicle is
- a- conception
 - b- fertilization
 - c- ovulation
 - d- implantation

7- Causes of Male infertility Pre-testicular causes.

- a-Endocrine problems, i.e. diabetes mellitus, thyroid disorders.
- b-Hypothalamic disorders, i.e. Kallmann syndrome.
- c-Hyper-prolactinemia.
- d-Hypo-pituitarism.
- e-Hypo-gonadism due to various causes.
- f- All of the above.

8- Premonitory signs of labor is which of the following

- a- Effective uterine contraction
- b- Formation of bag of water
- c- Lightening, frequent micturation and effacement
- d- Premature rupture of membranes

9- All the following are types of infertility except .

- a- primary
- b- Secondary
- c- ectopic pregnancy
- d- Combined.

10-Complications of post partum hemorrhage are the following (Except)

- a- shock
- b-infection
- c-Maternal mortality
- d- Diabetes
