

South Valley University

Faculty of Veterinary Medicine

14-Department of: Animal Surgery

Course Specifications

Program (s) on which the course is given: **Diploma**

Major or Minor element of programs: major

Department offering the program: **Faculty of Veterinary Medicine**

Department offering the course: **Animal Surgery**

Academic year / Level: **Postgraduate Diploma**

A- Basic Information

Title: **Surgery of wild animals**

Code:Di1805

Lecture: two hours

Practical: two hours

Total: hours

B- Professional Information

1- Overall Aims of Course

- 1 Knowledge on **Surgery of wild animals** for the purpose of Veterinary knowledge.
- 2 Defining of the field problems and suggestion of solutions.
- 3 Professional skills and using of technological means in the field of **Surgery of wild animals**.
- 4 Continuing and leading teamwork in the profession.
- 5 Decision making in the available means.
- 6 Perfect use of the available means. How to protect the environment and the society through the study of **Surgery of wild animals**.
- 7 Transparency and Ethically professional behavior and acceptance the other opinions.

2 – Intended Learning Outcomes of Course (ILOs)

- 1) Knowledge and Understanding:
 - (a) Theoretical and principals, knowledge and other specialty related to **Surgery of wild animals**.

- (b) Ethics and laws ruling the profession within the specialty.
- (c) Following the principals of quality control assurance in the profession within the specialty.
- (d) Effects of the specialty on the society and the environment and how to protect them.

2) Intellectual Skills

- (a) Solutions of problems in the profession within the field of specialty.
- (b) Analytical reading of researches and subjects related to the field of specialty.
- (c) Defining and analyzing of the problems in the field of specialty and arranging it according to the priority.
- (d) Evaluation of the hazards of application on the environment.
- (e) Professional decision making within the available information

3) Professional and Practical Skills

- (a) Applying the professional skills in the field of **Surgery of wild animals.**
- (b) Writing of the professional reports in the field of Meat Hygiene and control.

4) General and Transferable Skills

- (a) Different effective communications.
