International Collaboration

Publications co-authored with Institutions in other countries/regions

SVU has excellence output in this goal nationally and globally in the period of 2017 to 2021.

## Links to other SDGs

**S**DG 13 relates to all other SDGs since, if no action taken, climate change can exacerbate storms and disasters, and threats such as food and water scarcity (SDG2 and SDG6). These impacts will be felt more severely by poorer people (SDG1). It will affect life on land (SDG15) and in the sea (SDG14). However, innovation (SDG9) and work towards clean energy (SDG7) can help to mitigate its impact.

## Collaboration with NGOs

SVU with NGOs perform a variety of service and humanitarian functions, bring citizen concerns to governments, advocate and monitor policies and encourage political participation through provision of information.

- SVU participate in the Million Youth Volunteer Initiative for Climate Adaptation in conference.

## SVU action

SVU respond to SDG13 by participating in international collaboration to find the best practice action in terms of society awareness through workshops and organizing public events.

Low-carbon energy use :

- ✓ Renewable sources (biomass, hydropower, geothermal).
- ✓ Power generation sources (wind, solar, nuclear).
- ✓ Electricity (renewable).
- ✓ Electricity (nuclear) .
